Congressional Record.

PROCEEDINGS AND DEBATES OF THE SIXTY-SEVENTH CONGRESS SECOND SESSION.

SENATE.

TUESDAY, *May 9, 1922.*

(Legislative day of Thursday, April 20, 1922).

The Senate met at 11 o'clock a. m., on the expiration of the recess.

Mr. CURTIS. Mr. President, I suggest the absence of a quorum.

The PRESIDENT pro tempore. The Secretary will call the roll.

The reading clerk called the roll, and the following Senators answered to their names:

Ball	Harreld	McKinley	Smoot
Borah	Harris	McLean	Spencer
Brandegee	Harrison	McNary	Stanley
Bursum	Heflin	Nelson	Sterling
Calder	Hitchcock	Newberry	Sutherland
Capper	Johnson	Nicholson	Swanson
Caraway	Jones, Wash.	Norbeck	Townsend
Colt	Kellogg	Norris	Underwood
Culberson	Kendrick	Oddie	Wadsworth
Cummins	Keyes	Overman	Walsh, Mass.
Curtis	King	Page	Walsh, Mont.
Dial	Ladd	Phipps	Watson, Ga.
Dillingham	La Follette	Poindexter	Watson, Ind.
Fletcher	Lodge	Pomerene	Willis
Frelinghuysen	McCormick	Robinson	
Gooding	McCumber	Sheppard	
Hale	McKellar	Simmons	

Mr. DIAL. Mr. President, I desire to announce that my colleague [Mr. SMITH] is unavoidably detained. I ask that this announcement may continue through the day.

The PRESIDENT pro tempore. Sixty-five Senators have answered to their names. A quorum is present.

NOMINATION OF NAT GOLDSTEIN.

Mr. HARRISON. Mr. President, the morning papers carry an item—and I was just wondering if it is true—that on yesterday the Republican members of the Finance Committee had a meeting behind closed doors and had hearings on the nomination of Nat "Goldstained." Of course, I am not unaware of the fact that the majority members——

Mr. SIMMONS. Mr. President, do I understand the Senator to say the Finance Committee held a meeting?

Mr. HARRISON. I understood the Republican members of the Finance Committee yesterday had a meeting.

Mr. SIMMONS. Oh, that is a different matter.

Mr. HARRISON. They had a meeting with reference to Nat "Goldstain's" nomination, and there were witnesses before them and the matter was presented there behind closed doors. I do not know whether Democratic members of the Finance Committee were invited or not.

Mr. SIMMONS. The suggestion that the Finance Committee held a meeting is what I objected to in the Senator's statement. The Senator said the Republican members held a meeting of the Finance Committee. The Republican members can not hold a meeting of the Finance Committee without notifying the minority members to be present. There was no notice, so far as I have any knowledge, to the minority members of any meeting of the committee to be held on yesterday morning, and it could not have been, therefore, a meeting of the committee, but was just a meeting of the Republican members of the committee.

Mr. HARRISON. I am glad to have the statement of the Senator. I got my information from the Washington Post of this morning, which stated that Senator SPENCER, of Missouri, appeared before the Finance Committee in behalf of Nat "Goldstain's" nomination to be collector of internal revenue in St. Louis.

I am wondering how long this practice will last of the Republican members of the Finance Committee holding secret sessions behind closed doors and in such fashion determining the policy of the Congress. They did it with reference to the bonus legislation. They did it with reference to the tariff. They are now following the same course with reference to Nat "Goldstain's" nomination.

In this connection may I be permitted, before I take my seat, to have read a telegram from St. Louis touching this matter? It speaks the sentiment of the good women of that city, without respect to political alignments.

The PRESIDENT pro tempore. Without objection, the telegram will be read as requested.

The reading clerk read as follows:

ST. LOUIS, MO., *May 6, 1922.*

Hon. PAT HARRISON,
Senate Office Building, Washington, D. C.:

The board of presidents of the St. Louis League of Women Voters congratulate you on your stand concerning selection of Nat Goldstein for collector of revenue. We believe public recognition of and placing great responsibility in one nationally notorious through connection with Lowden slush fund must increase growing disrespect for public office. We call your attention to Nat Goldstein's St. Louis activities in and about the courts has constituted organization of a nefarious courthouse ring. Also his record in Hank Weeke naturalization case, now in Federal files here, disqualifies him for public office.

Mrs. D. O. IVES, *Independent President.*
Mrs. C. V. BECK, *Republican President.*
Mrs. FRED A. REID, *Democratic President.*

Mr. HARRISON. I am in hopes some one will answer the question which I have propounded as to whether any action has been taken on Nat "Goldstain's" nomination and if the article in the paper to which I have referred is correct. I see several members of the Finance Committee present. I take it some of them were present at the meeting. Can we not be informed if any action was taken, either favorable or unfavorable, with reference to the matter?

Mr. McCUMBER. Mr. President, whenever we can get a little time, so that I can call the committee together as a committee to consider the Goldstein appointment, I shall do so, and every Senator on the committee will be notified. The Republican members of the committee are attempting to meet every morning at 9.30 and to continue until 11 o'clock in the consideration of the tariff measure. At those meetings any Senator is entitled to be present if he has any matter which he wants to present to the Republican members of the committee concerning the tariff. We are meeting for no other purpose, and when we consider any other matters there will be a meeting of the entire committee called for that purpose.

The Senator from Missouri [Mr. SPENCER] came to see us yesterday about some matters pertaining to the tariff and also spoke concerning the Goldstein matter. There was no invitation for him to speak upon the matter and no hearing upon it. I shall not close my ears if the Senator comes before me and wants to talk even on the Goldstein matter, and if there are three or four of us together and he wishes to speak to us about the matter, I shall not close my ears. But when the matter comes up for consideration by the committee there will be a full committee called. There has been no hearing ordered or requested in the matter, nor has any been held.

Mr. HARRISON. May I ask the Senator a question before he takes his seat? Then the majority members of the Finance Committee did hear the Senator from Missouri [Mr. SPENCER] on yesterday touching the Nat "Goldstain" nomination?

Mr. McCUMBER. Not the majority members. I think there were four members present when the Senator from Missouri was speaking, not enough even to go on with the tariff measure.

Mr. HARRISON. May I ask the Senator another question? Has any action been taken touching the Nat "Goldstain" nomination?

Mr. McCUMBER. Certainly not, and there will be no action taken of any character until the committee—and that means the entire committee—is called together for that purpose.

Mr. HARRISON. The reason why I ask the question is that I had understood that when the nomination first came, probably the committee was polled and a favorable report had been made upon the nomination, and that then it was reconsidered, perhaps, or ordered brought back to the committee.

Mr. McCUMBER. Oh, no. Let me state to the Senator what is the usual course in such matters. The moment any nomina-

tion is sent to the committee, the chairman hands that nomination to some Senator and asks him to consult with both the Senators from the State of the nominee to ascertain whether the nomination is satisfactory to them.

That is the first step to be taken, and it is the step which always has been taken, whether the Democratic Party or the Republican Party has been in control. If the nomination is satisfactory and it is so reported to the committee, the committee act upon it. If, however, any extraneous matters have come to the attention of the committee to indicate that there will be opposition to the nomination, then, of course, the nomination is always held in abeyance until such opposition may be heard.

Mr. HARRISON. Then, I take it that the nomination of Nat "Goldstain" was turned over to some member of the Finance Committee, and he consulted the junior Senator from that State, and reported back to the committee that the nomination was satisfactory, and that the matter now stands in that attitude?

Mr. McCUMBER. No, Mr. President. On the contrary, the Senator who was asked to ascertain the desires of both Senators from the State of Missouri on the subject reported that the senior Senator from Missouri [Mr. REED] was not in the city, and he could not get in communication with him. That is the only report the committee has had. The matter is before the committee, and, of course, charges having been made, they will necessitate a full consideration by the entire committee before any kind of action may be taken.

Mr. HARRISON. Can the Senator from North Dakota indicate about when the hearing will be had or when further consideration will be given to the Nat. "Goldstain" nomination?

Mr. McCUMBER. No; I can not now inform the Senator as to that, because the committee is extremely busy on tariff matters.

FISCAL AFFAIRS OF THE DISTRICT OF COLUMBIA.

Mr. POINDEXTER. Mr. President, a few days ago I submitted a petition from the Citizens' Association of Columbia Heights. I think an order was made referring it to the Committee on the District of Columbia. It was a petition for hearings on the proposed change in the fiscal system of the District. I am informed by the chairman of the Committee on the District of Columbia, who is now on the floor, that the petition has never been received by his committee.

I think the reference was inadvertently made. It seems to me it should be referred to the Committee on Appropriations, which has charge of the bill involving the matter to which the petition relates—that of raising revenue in the District of Columbia. I ask unanimous consent that the previous order be vacated and that an order be made referring the petition to the Committee on Appropriations.

The PRESIDENT pro tempore. Without objection, it is so ordered.

DAYLIGHT SAVING.

Mr. DIAL. Mr. President, I hardly ever agree with the Washington Post politically, but I read an editorial in that newspaper on yesterday in reference to "daylight saving" which I most heartily commend.

We are all the time hearing in this city statements in reference to shortening the day or changing the time and interfering with the sun, and all that kind of nonsense. On behalf of the householders and housekeepers of this city I wish to protest against any change in the hours as recorded by the clock at present or any change in the time for going to work. We can not improve upon the time which the Creator gave us, as recorded by the sun. There is no necessity of interfering with it. By setting the clocks ahead an hour one will merely scald himself by trying hastily to drink a little hot coffee; the ladies will be hurried in the effort to get the children to school, and then people will be idle by the middle of the afternoon. Such a change would merely afford more time for "joyriding" and burning up gasoline.

No one ever advanced much by watching a clock. The only way to succeed is to be in love with your position and strive to excel. If you are not satisfied with your place, resign and somebody else will take it who will do the work as efficiently, and perhaps more so, than you. This is no time and the country is in no condition to compromise with impractical and newfangled nonsense.

In my younger days I thought that holidays were nonsense, but as I get a little older I have softened somewhat on that proposition, and lately I have come to believe that everybody ought to have some recreation; but they should wait for recreation until the proper time of the year arrives, say, along about August, after lay-by time, as we farmers say. Then every employer ought to arrange for his employees to have a couple of weeks' holiday in order that they might get off and breathe a little freer. However, to commence now at this time of the year to advance the clock an hour, to provide that everybody shall go to work an hour earlier, to disturb the hours of the post office and the banks and all other lines of business, is absolute nonsense. If a change should be made, it ought to be done universally and be in operation all over the country. Only last week a constituent of mine called to see me and stated that he had an engagement in Baltimore with a physician, but that he got there an hour after the Baltimore physician thought he would have been there, the mistake being occasioned by his watch being an hour later than Baltimore time. Consequently there was a row and perhaps an extra bill.

When one goes to a city which has adopted the so-called "daylight saving" plan he does not know how to set his watch. He does not know whether to get to the depot an hour earlier or an hour later. One is always perplexed and uneasy. We have had enough of perturbation. I want ease and quietude to reign. I most heartily protest against any interference with the time. People should follow the example of the Senate. Senators get up early; they attend to business at their houses; they visit the departments and come here and listen to eloquent speeches all day, and now I understand we are going to work at night. So the Senate is setting a good example for the country.

PETITIONS AND MEMORIALS.

Mr. BALL presented a resolution adopted by the Delaware State Baptist Convention, at Wilmington, Del., favoring the enactment of legislation providing for compulsory Sunday observance in the District of Columbia, which was referred to the Committee on the District of Columbia.

He also presented a resolution adopted by the Delaware State Baptist Convention, at Wilmington, Del., favoring an amendment to the Constitution providing for uniform marriage and divorce laws, which was referred to the Committee on the Judiciary.

He also presented a resolution adopted by the Delaware State Baptist Convention, at Wilmington, Del., favoring an amendment to the Constitution prohibiting polygamy, which was referred to the Committee on the Judiciary.

Mr. WILLIS presented a resolution adopted by the St. Clairsville Presbytery, at Caldwell, Ohio, favoring the enactment of legislation providing for Sunday observance in the District of Columbia, which was referred to the Committee on the District of Columbia.

He also presented a resolution adopted by the St. Clairsville Presbytery, at Caldwell, Ohio, favoring an amendment to the Constitution providing for uniform marriage and divorce laws, which was referred to the Committee on the Judiciary.

He also presented a resolution adopted by the St. Clairsville Presbytery, at Caldwell, Ohio, favoring an amendment to the Constitution prohibiting polygamy, which was referred to the Committee on the Judiciary.

He also presented petitions of S. B. Barnett and sundry other citizens of Rockford, Andrew Wuppert and sundry other citizens of Sherwood, and W. E. Otis and sundry other citizens of Hicksville, and also sundry other citizens, all in the State of Ohio, praying for the imposition of a tariff duty of $2 per hundred pounds on imported Cuban sugar, which were referred to the Committee on Finance.

Mr. WARREN presented a resolution adopted by the Laramie Presbytery, at Rawlins, Wyo., favoring the enactment of legislation providing for Sunday observance in the District of Columbia, which was referred to the Committee on the District of Columbia.

He also presented a resolution adopted by the Laramie Presbytery, at Rawlins, Wyo., favoring an amendment to the Constitution providing for uniform marriage and divorce laws, which was referred to the Committee on the Judiciary.

Mr. JOHNSON presented memorials of George M. Woodruff, of Calistoga, and 158 other citizens of Calistoga, Santa Rosa, Vineburg, St. Helena, Chula Vista, Palm City, and Imperial Beach, all in the State of California, remonstrating against the enactment of legislation providing for compulsory Sunday observance in the District of Columbia, which were referred to the Committee on the District of Columbia.

Mr. CAPPER presented a petition of sundry citizens of Humboldt, Kans., favoring the enactment of legislation creating a department of education, which was referred to the Committee on Education and Labor.

Mr. TOWNSEND presented petitions of sundry citizens of Detroit, Reese, Carson City, Valley Center, Brown City, Capac, Yale, Tyre, Cass City, Merrill, Owosso, Bad Axe, Wayland,

Hopkins, Bradley, Moline, Zeeland, Decker, Snover, Caro, Middleton, Marion, McBain, Ruth, Palms, Harbor Beach, White Rock, Croswell, Breckenridge, Bannister, Wheeler, Ithaca, Marlette, Mount Pleasant, Saginaw, Auburn, Kawkawlin, Rosebush, Fairgrove, Standish, Pinconning, all in the State of Michigan, and also sundry citizens in the State of Ohio, praying for the imposition of a tariff duty of $2 per 100 pounds on imported Cuban sugar, which were referred to the Committee on Finance.

He also presented the memorial of Mabel Powers and sundry other citizens of Athens, Jackson, Portland, Sunfield, Fowlerville, and Lake Odessa, all in the State of Michigan, remonstrating against the enactment of legislation providing for compulsory Sunday observance in the District of Columbia, which was referred to the Committee on the District of Columbia.

Mr. PHIPPS presented the following joint resolution of the Legislature of Colorado, which was referred to the Committee on Public Lands and Surveys:

Senate Joint Resolution 6.

Resolved by the senate (the house of representatives concurring):

Whereas we appreciate the need for the establishment of public shooting grounds and game refuges in various parts of the United States for the benefit of the public at large and for the protection of migratory birds; and

Whereas we approve of the purpose and aims of the Federal Government as evidenced by the present migratory bird laws, and are in favor of such additional legislation as may further such purpose; and

Whereas, on the other hand, we are not unmindful of the inherent sovereignty of the several States as recognized in the decision of the Supreme Court of the United States in its determination that the game and fish within the confines of each State are the property of such State, and, therefore, under the jurisdiction and control of State authority; and

Whereas we disapprove of the centralization of control in the Federal Government of the game, birds, animals, and fishes which find their range within the confines of any State; and

Whereas the purport of said Senate bill No. 1452 is not, in our opinion, as indicated in its title, but, on the contrary, is designed to and will result in an unwarranted encroachment by the Federal Government upon the rights of the various States in the protection of their fish and game and in the administration of their fish and game laws; and

Whereas said Senate bill, although in its title "providing for establishing shooting grounds for the public, for establishing game refuges and breeding grounds, for protecting migratory birds, and requiring a Federal license to hunt them," nevertheless, in the body thereof, purports to give authority, in no wise indicated in the title, and delegates power to the Department of Agriculture and a committee consisting of the Secretary of Agriculture, the Attorney General, the Postmaster General, two Members of the Senate, and two Members of the House of Representatives, giving said commission complete legislative powers to make rules and regulations, which will have the force of laws, governing and controlling not only the migratory birds and the game animals but also the fishes that may be found in their natural state or introduced into any of the lands or waters upon any game preserve secured under said act, either by gift, lease, or purchase; and

Whereas under the provisions of this bill the Federal Government assesses a license fee against citizens of a State for the privilege of hunting and fishing within the confines of their own State; and

Whereas 55 per cent of fees are to be spent for administration, and can not be used for anything else by the express terms of the bill, and of the remaining 45 per cent is to go for purchase, rental, and development of grounds and waters, and part for administration; it is apparent that at least 75 per cent will go for administration, and it is not at all likely that any part of the money collected in Colorado will ever be spent in Colorado for lands, waters, improvements or refuges: Now, therefore, be it

Resolved, That we protest against the enactment into law of United States Senate bill No. 1452 for the reasons as set forth in the foregoing preambles; and be it further

Resolved, That this resolution be enrolled and that a copy be sent to each Colorado Member of the United States Senate and House of Representatives.

(House journal, twelfth day, April 29, 1922.)

REPORTS OF COMMITTEES.

Mr. CAPPER, from the Committee on Claims, to which was referred the bill (H. R. 2620) for the relief of Welch, Fairchild & Co. (Inc.), reported it without amendment and submitted a report (No. 695) thereon.

Mr. STERLING, from the Committee on Education and Labor, to which was referred the joint resolution (S. J. Res. 178) authorizing the Secretary of Labor to investigate and report on labor conditions in Cuba, reported it with an amendment and submitted a report (No. 697) thereon.

BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. POINDEXTER:

A bill (S. 3569) granting an increase of pension to Annie Van Ogle; to the Committee on Pensions.

By Mr. SHEPPARD:

A bill (S. 3570) for the relief of the United Dredging Co.; to the Committee on Claims.

By Mr. BURSUM:

A bill (S. 3571) granting a pension to Pomucena Benavides; to the Committee on Pensions.

By Mr. WILLIS: A bill (S. 3572) granting an increase of pension to Sallie A. Palmer; to the Committee on Pensions.

By Mr. JONES of Washington:

A bill (S. 3573) to provide for the construction of a vessel for the Coast Guard; to the Committee on Commerce.

By Mr. SPENCER:

A bill (S. 3574) to authorize the sale of lands and plants not longer needed for Indian administrative or allotment purposes; to the Committee on Indian Affairs.

By Mr. FLETCHER:

A bill (S. 3575) to increase the pensions of surviving soldiers of the various Indian wars and their widows; to the Committee on Pensions.

By Mr. STANLEY:

A bill (S. 3576) to amend an act entitled "An act to authorize the Secretary of the Treasury to provide hospital and sanatorium facilities for discharged sick and disabled soldiers, sailors, and marines"; to the Committee on Public Buildings and Grounds.

By Mr. WALSH of Massachusetts:

A bill (S. 3577) allowing and regulating boxing and sparring matches in the District of Columbia; to the Committee on the District of Columbia.

AGRICULTURAL CREDIT CORPORATION.

Mr. SIMMONS. Mr. President, a few days ago I introduced a bill providing for the establishment of a national agricultural credit corporation. I have decided that that bill needs some amendment, and I wish now to introduce as a substitute for that bill, offered by me a few days ago, the bill which I send to the desk, and ask that it be referred to the Finance Committee, as was the original bill.

The bill (S. 3578) to provide credit facilities for the preservation and development of the agricultural industry, including live stock, in the United States; to extend and stabilize the market for United States bonds and other securities; to create an agency for the liquidation of commercial assets owned by the United States, for acting when required as depository of funds belonging to the United States, and otherwise performing services as fiscal agent of the United States, and for other purposes, was read twice by its title and referred to the Committee on Finance.

TARIFF BILL AMENDMENTS.

Mr. SPENCER submitted seven amendments intended to be proposed by him to House bill 7456, the tariff bill, which were referred to the Committee on Finance and ordered to be printed.

Mr. DIAL submitted five amendments intended to be proposed by him to House bill 7456, the tariff bill, which were ordered to lie on the table and to be printed.

AMENDMENT TO SENATE RIVER AND HARBOR BILL.

Mr. McNARY submitted an amendment providing for improvement of Umpqua River, bar, and entrance, Oregon, in accordance with report submitted in House Document No. 913, Sixty-fifth Congress, second session, $276,500, intended to be proposed by him to the bill (S. 3017) authorizing appropriations for the prosecution and maintenance of public works on canals, rivers, and harbors, and for other purposes, which was referred to the Committee on Commerce and ordered to be printed.

ALASKA FUR-SEAL SKINS.

Mr. HITCHCOCK. Mr. President, I submit a resolution which I ask may be referred to the Committee on the Judiciary.

The resolution (S. Res. 287) was referred to the Committee on the Judiciary, as follows:

Resolved, That the Secretary of Commerce be, and he is hereby, directed to furnish the Senate, for its information and use, a statement showing the total number of Government-owned Alaska fur-seal skins, as annually taken, and showing the total proceeds from said skins, as annually sold or disposed of under authority of act of August 24, 1912, up to April 5, 1922, inclusive; said statement to make a detailed showing of the time, place, and number of skins sold at each of said annual sales, with the classification of all the skins so offered, and prices obtained for each grade at said sales.

And further, that a complete record of the total annual payments made to the Governments of Great Britain and Japan since 1912 to January 1, 1922, inclusive, by the Secretary of Commerce as provided for in said act of August 24, 1912, be furnished the Senate by him, together with copies of the Government contracts made with Funsten Bros. & Co. in 1915, and the Foulke Fur Co. in 1921, for dressing and dyeing fur-seal skins owned by the Government.

THE TARIFF.

The Senate as in Committee of the Whole resumed the consideration of the bill (H. R. 7456) to provide revenue, to regulate commerce with foreign countries, to encourage the industries of the United States, and for other purposes.

The PRESIDENT pro tempore. The Secretary will state the pending amendment.

The ASSISTANT SECRETARY. On page 2, line 25, after the words "formic acid," it is proposed by the Committee on Finance to insert "4 cents per pound."

Mr. KING obtained the floor.

Mr. McNARY. Mr. President——

Mr. KING. I yield to the Senator from Oregon.

Mr. McNARY. I simply wish to call the attention of the Senate to an amendment to the committee amendment which I desire to offer on behalf of the Senator from Illinois [Mr. McCORMICK]. If it is in order at this time, on behalf of the Senator from Illinois, I offer an amendment to the committee amendment, after the words "formic acid" to strike out, on page 2, line 25, "4" and insert "6."

Mr. KING. Let the amendment which is proposed by the Senator from Oregon on behalf of the Senator from Illinois to the committee amendment be stated at the Secretary's desk.

The PRESIDENT pro tempore. The amendment to the committee amendment will be stated.

The ASSISTANT SECRETARY. On page 2, line 25, after the words "formic acid," it is proposed to amend the committee amendment by striking out the numeral "4" and inserting in lieu thereof the numeral "6."

Mr. McNARY. Mr. President, the senior Senator from Illinois [Mr. McCORMICK], who has been called from the Chamber on account of various official matters that are demanding his attention, has asked me briefly to present this amendment. On the 3d day of the present month he filed the amendment to the pending committee amendment, asking that the proposed duty of 4 cents be stricken out and 6 cents be inserted in lieu thereof. The increase in the rate is asked on the theory that the competition between this country and Germany in the manufacture of this acid is very keen, and, on account of the low cost of labor in Germany, the German manufacturers are able to produce the acid at a very much less cost than the manufacturers in this country can produce it, using the process employed by them. Unless the duty is increased it will be absolutely beyond their ability to maintain themselves in competition with Germany. A duty of 6 cents is necessary to put the American production of formic acid on an equal footing with the production of Germany. The production of this commodity in this country can not continue under the duty of 4 cents provided by the bill as reported to the Senate. I have not any idea——

Mr. WATSON of Indiana. Mr. President, if the Senator will yield for a moment, I inquire who has the floor?

Mr. KING. I have the floor, and I yielded to the Senator from Oregon. I will not claim the floor for the present.

The PRESIDENT pro tempore. The Senator from Utah has lost the floor. He yielded to the Senator from Oregon for an argument.

Mr. WATSON of Indiana. The Senator from Indiana understands, then, that the Senator from Utah has had the floor once on this question.

Mr. KING. If Senators upon the other side object to a courtesy being extended by a Senator who holds the floor to permit a Republican Senator to offer an amendment, we shall see how far courtesy will be carried in the future. I think it is infamous.

Mr. WATSON of Indiana. I do not care anything about the thought of the Senator from Utah on the subject.

Mr. KING. And the Senator from Utah does not care anything about the views of the Senator from Indiana.

Mr. WATSON of Indiana. The idea of the Senator from Utah and my idea as to what constitutes infamy may not be in exact harmony.

Mr. KING. I have no doubt the Senator from Indiana has been trained in the Indiana school.

Mr. WATSON of Indiana. All we are seeking is the enforcement of the rules, and we intend to enforce them, and the majority will see that they are enforced. Nobody understands the rules better than does the Senator from Utah, and he has no more right to violate the rules than has any other Senator. I should like to extend every consideration to the Senator when it comes to a matter of personal courtesy, but this is not a matter of personal courtesy; it is a question of enforcing the rules of the Senate; it is a question of speeding up legislation, and we intend to speed it up by enforcing all the rules which will tend to accomplish that result. I intend no discourtesy to the Senator from Utah, as he knows.

The PRESIDENT pro tempore. The Chair recognized the Senator from Utah, whereupon the Senator from Oregon rose, and the Senator from Utah yielded to him for the purpose of presenting an amendment to the committee amendment which is now pending. The Chair holds that thereupon the Senator from Utah lost the floor.

Mr. KING. Mr. President, of course if that is the interpretation which the Chair places upon the rule, it means the denial of the right of the Senator from Utah to argue this matter.

The PRESIDENT pro tempore. The Senator from Utah has lost no right.

Mr. KING. I protest against the ruling of the Chair, and affirm that the rule does not apply as it has been held to apply. Of course, if that is interpreted to be the rule, we can not in the future extend courtesies to Senators.

The PRESIDENT pro tempore. The Senator from Utah has still the right to speak twice on this amendment.

Mr. LODGE. No; only once.

Mr. WATSON of Indiana. Only once.

Mr. McNARY. Mr. President, I have no desire to obtrude myself at this time in the discussion of the amendment I have proposed on behalf of the Senator from Illinois to the amendment reported by the committee unless I am properly in order, nor do I have any desire to take the Senator from Utah off his feet, and I will yield to him.

Mr. KING. I have yielded to the Senator from Oregon, and of course he has the floor properly, and I hope that he will proceed, notwithstanding the views of the Senator from Indiana.

The PRESIDENT pro tempore. The Senator from Oregon has the floor.

Mr. McNARY. Mr. President, I regret the parliamentary situation which I have brought about. I merely desire on behalf of the Senator from Illinois to present to the Senate the amendment to the amendment, and to call the attention of the Finance Committee and the Members of the Senate to the fact that this industry will be unable to maintain itself and develop under the rate fixed by the Senate Finance Committee.

The industry is an important one; it is subject to competition under which it can not survive unless it is protected, as it ought to be. I think beyond question of dispute the data which the Senator from Illinois has collected show that the industry will perish unless the duty is increased from 4 cents a pound to 6 cents a pound. It is with a desire to protect this industry from destructive competition that I have called the amendment at this time to the attention of the Senate, even though in so doing I have caused the Senator from Utah to lose his position on the floor.

Mr. McCUMBER. Mr. President, I think that we ought not to change the duty on formic acid. It was given a 25 per cent duty by the House; the Senate committee has changed that to a specific duty, which is about the equivalent. There is not a great deal of use for this acid, because it is supplanted by other considerably cheaper substances which may be used for the same purposes. I hope the amendment to the amendment will not be agreed to.

Mr. KING. Mr. President——

The PRESIDENT pro tempore. The Senator from Utah.

Mr. STERLING rose.

Mr. KING. Mr. President, I do not dare to yield to the Senator from South Dakota, although under other circumstances I should be glad to do so.

Mr. STERLING. I wish to ask unanimous consent to present a report from a committee. I do not think that will take the Senator from the floor.

The PRESIDENT pro tempore. Does the Senator from Utah yield to the Senator from South Dakota?

Mr. KING. Not if I lose any rights.

Mr. STERLING. Mr. President, a parliamentary inquiry——

The PRESIDENT pro tempore. The question is, Does the Senator from Utah yield to the Senator from South Dakota?

Mr. KING. Not if I will lose any rights. The Senator from South Dakota desires to present a report, as I understand.

The PRESIDENT pro tempore. The Senator from Utah declines to yield.

Mr. STERLING. Very well. I will forego the request for the present.

Mr. KING. Mr. President, it is quite apparent that the Senator from Indiana [Mr. WATSON] and others of the majority are seeking to apply to the rules an interpretation which, to my knowledge, has not been applied in the past and which has for its object the prevention of a fair and full discussion of the infamies of this bill. Of course, I can not wonder at their objection to an exposition of the infirmities, not to say enormities, of the pending bill.

Addressing myself to the amendment—and I shall speak to that now—which has just been suggested by the Senator from Oregon [Mr. McNARY], as the spokesman for the senior Senator from Illinois [Mr. McCORMICK], to the amendment reported by the committee, permit me to say that that is merely an illustration of the character of bill which the reactionaries and stand-

patters desire to have passed by the Senate and imposed upon the country.

Take this item of formic acid now before us. The pre-war price was 4½ cents per pound. It is an acid which is of great importance in the domestic life of the people. Four and one-half cents per pound was the import price into the United States prior to the war. Now the Senator from Illinois, notwithstanding the House bill gives us a 25 per cent ad valorem tariff and the Senate bill gives us a 4 cents per pound specific rate upon formic acid, seeks to increase that extortionate rate, which amounts to practically 100 per cent above the market price, to 150 per cent; that is, to 6 cents per pound, specific.

The senior Senator from Utah [Mr. SMOOT] sotto voce says that the price is 16 cents. On the 24th of last April the price in the United States was 16 to 18 cents per pound, 400 per cent above pre-war prices, and yet the cupidity of the manufacturers in the United States and the vendors of this acid is not satisfied by 400 per cent above the pre-war prices—4½ cents per pound pre-war, 16 to 18 cents now—with a specific duty or rate recommended by the Senate committee of nearly 100 per cent above pre-war prices, and the Senator from Illinois is asking for a rate in excess of that, to wit, 6 cents per pound specific. When, Mr. President, will the greed of the beneficiaries of this tariff bill be satisfied?

I understood the distinguished Senator from North Dakota [Mr. MCCUMBER], the chairman of the committee, to say that the Republican members of the committee met every morning at 9:30 o'clock to consider the tariff bill. What are they meeting for? I think most of us know why they are meeting. I think the beneficiaries of this tariff bill, many of them, are here in Washington to-day. Not satisfied with the enormous rates which have been fixed in the Fordney bill and in the Senate bill, they are here pursuing and hounding the Republican Senators of the Finance Committee, demanding that the rates reported in the bill be further advanced. I have no doubt that last week, when the Republican members of the Finance Committee met, these predatory interests sought to inject themselves into their meetings and to dragoon the Republican members of the Finance Committee into increasing the rates above the already high levels that are found in the Senate bill.

The bill apparently is not finished yet, Mr. President; and I presume that before we get through, unless some of the Republican members of the Finance Committee have the patriotism and the courage to resist these importunate demands of the special interests, we will have applications to increase the rates above the altitudinous heights where they have been placed in the Senate bill.

I ask again, Why are these predatory interests still in Washington? Why do they not go home? The bill has been reported by the committee. The public hearings were closed January 10, months ago; but they linger here for the purpose of bringing all possible influence and pressure to bear upon the Republican members of the Finance Committee and upon the tariff bloc, perhaps, and upon the agricultural bloc, perhaps, for the augmentation of these rates that now are so high that they demand the condemnation of the patriotic people of the United States. This bill is the apotheosis of greed and avarice, and yet it does not satisfy these predatory interests that in the past have fattened upon the people, and that propose in the future to lay their heavy and oppressive hands upon them.

Why raise this duty from a specific rate of 4 cents per pound to 6 cents per pound? Four and one-half cents a pound was the price, as I stated, before the war. Suppose we put a 6 per cent specific rate upon this item, what will it mean? It will mean that the manufacturers in the United States will avail themselves of every mill of tariff benefit granted by this specific rate and increase the price of the product to a level which will be so high as to prevent any foreign competition. Of course, as Mr. Blaine and other men who were honest in the discussion of the tariff admitted, the purpose of a tariff is to increase prices.

It is only the unsophisticated and gullible, or those who seek to deceive, who argue that tariff rates are not for the purpose of enhancing prices. That is the object of higher rates, as was frankly admitted by the distinguished Senator from Oregon, who has just tendered this amendment. It is to raise the price.

I know who has urged the Senator from Illinois to make this suggestion. It was the Victor Chemical Works, which is operating in Chicago, Ill. I want to call attention to the House hearings first. A brief was filed before the Committee on Ways and Means of the House by the Victor Chemical Works, of Chicago, Ill. It is found beginning on page 64 of the House hearings. The modesty of the writer of the brief representing the company, his altruism, his great and extreme generosity for the welfare of the people are exemplified in the demand which he made in this brief:

> The Victor Chemical Works being large producers of sodium formate—

Sodium formate is used in the development of the category of acids which are found in this class, such as oxalic acid and formic acid and pyrogallic acid, the acids which come within this category, manufactured largely by this company; and as to them, some of them the result of sodium formate, which is an intermediate product, it was desired to increase the rates as indicated a little further on in the brief.

Proceeding with the brief:

> Sodium formate, as an intermediate product in its manufacture of oxalic acid, took up the manufacture of formic acid from sodium formate about six months ago, and they have been regularly offering formic acid on the market since that time.

Did they offer it at the pre-war prices? Oh, no! The prices have gone down somewhat. They had reached, on April 24, 1922, 16 to 18 cents per pound, between 300 and 400 per cent above the pre-war prices.

> If the domestic manufacturers of formic acid are afforded the reasonable and adequate protection of a duty of 7½ cents per pound, the industry can be continued in this country, the present manufacturing facilities being ample to supply the domestic requirements.

My good friend from Illinois is a little more modest in his demands than the representative of this corporation. The corporation wanted a specific duty of 7½ cents per pound, which would be nearly 100 per cent above the pre-war prices—nearly 100 per cent protection. Why, Mr. President, what do the manufacturers of the United States want? Obviously, from this bill, they want a clear field to exploit the people without the possibility of competition.

The Senator from Ohio asked me the other day the difference in the general average rate between the Underwood bill and this bill. I called his attention to the fact that I had made some computations, but that I did not wish to give a guess. I called his attention to the fact, and had shown in some observations the preceding day, that many of the items found in this chemical schedule showed an increase of from 150 to 600 per cent above the Underwood law.

I have had a computation made by representatives of the Tariff Commission, and it shows that the average rate in this schedule, including, of course, articles on the free list in the Underwood law and in this bill, is more than 100 per cent higher than the rates in the Payne-Aldrich law and nearly 150 per cent above the rates in the Underwood law; that is to say, the rates found in the schedule which we are now discussing are more than 100 per cent above those of the condemned and damned Payne-Aldrich law.

When this bill passes and is applied in the land the American people will pray upon bended knees for a return to the beneficent (?) rates of the Payne-Aldrich tariff law. They will say that the distinguished Senator from Rhode Island, who has gone to his reward, was an angel in disguise when he gave that law to the American people.

We read in Æsop's fables of the frogs who were dissatisfied with the log for a king, and they got, in response to their prayers, the stork, which devoured them. The American people were dissatisfied with the Payne-Aldrich tariff law, which was an inanimate log compared with the stork, the all-devouring stork, which is now striding throughout the land watching where its victims are, ready to devour them when this bill becomes a law. Let me suggest another kind of a bird, Mr. President, because we are inclined to regard the stork as a welcome visitor into the homes of the land. We will not have a stork; we will have a vulture, which will prey upon the people, devouring and rending them to satisfy the voracious appetite of this monster. These reactionary Republicans are giving us this vulture and this monster at a time when the American people need peace and rest and prosperity, an opportunity to return to normal conditions, in which there will be manufacturing and industrial development and happiness in the homes of the American workingmen.

Mr. WATSON of Georgia. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Utah yield to the Senator from Georgia?

Mr. KING. I yield.

Mr. WATSON of Georgia. Taking this tariff bill to be what the very able Senator from Utah [Mr. KING] says it is, will it not have the direct effect of compelling every European nation to put up walls against us, and will that not destroy our export trade?

Mr. KING. Mr. President, the inquiry of the learned Senator from Georgia is pertinent. May I say, by way of parenthesis, that the Senator from Georgia, in his study of the life of Napoleon—and he has given us one of the best books upon

Napoleon that was ever written—learned of the effect of the imposition of embargoes and high tariffs by European powers. They provoked then, as they always will provoke, reprisals and hostile or retaliatory legislation.

Already Canada, menaced by the evils of this bill, is talking about increasing her tariff rates, and the Senator knows that Canada has been one of the largest purchasers of our products. Great Britain has been first, Germany, as I recall, second, and Canada third. Our exports to Canada prior to the war reached nearly a billion dollars in some years. If we cut off imports by these high rates, what will other countries do; what may they feel compelled to do, Mr. President, not only for self-preservation, but in a proper spirit of retaliation for a wrong which has been done to them? I call it a wrong; it is not perhaps a technical, legal wrong, because America has the technical, legal right to be isolated from the world, and to deny the right of any foreigner to land upon her shores or to bring any of his products to this Republic.

Mr. McLEAN. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Utah yield to the Senator from Connecticut?

Mr. KING. For a question; but I have not finished replying to the interrogatory of my good friend from Georgia.

Mr. McLEAN. I will not interrupt if the Senator does not care to be interrogated; I merely wish to ask one question.

Mr. KING. I will note the question, and when I complete my answer to the Senator from Georgia I shall be happy to answer it if I can.

Mr. McLEAN. The Senator from Utah, in expressing the view that we should not enact these protective rates——

Mr. KING. The Senator from Utah did not say anything of the sort; not protective rates. If the Senator means the rates under this bill, I assent.

Mr. McLEAN. These exorbitant rates——

Mr. KING. These exorbitant, infamous, extortionate rates.

Mr. McLEAN. I will ask him if it has been called to his attention that England, France, Japan, Spain, Italy, and the Argentine and Chile revised their tariffs upward more than a year ago? I will ask him if he knows that Germany has prohibited the importation of such articles, for instance, as tractors and automobiles into Germany, and that France has already prohibited the importation of certain articles into France?

Mr. KING. Mr. President, I am aware of the fact that a number of the nations of the world have been in the past, and still are, living in the medieval atmosphere of political economy, and that they are obsessed with the same pernicious views which control the political conduct of the distinguished Senator from Connecticut.

The Senator from Connecticut during his entire political life, and before his advent into the Senate of the United States—as I know, because I have taken pleasure in learning something of his political views—has been a devotee of the theory that prosperity comes from exclusion, and of course he approves of the views of medieval nations. He delights in the views which prevailed for centuries and still prevail largely in China. Those views to him are like music to the entranced ears of the man who sighs for celestial strains. He is happy only when he reads of embargoes, when he learns of tariff walls erected so high that they even keep out the sunlight. I am sure the Senator from Connecticut, if he had his way, would prevent a ship landing on our shores with any foreign goods. I am sure he would keep out the sunlight as it streams over the eastern horizon.

I have no doubt that the Senator from Connecticut, upon many occasions when he has stood upon the Atlantic shores, and has seen the effulgent beams of the rising sun, has regretted that he did not have the power to build a wall so high that the rays of the sun coming from the east might not shine upon American shores.

I have no doubt that if the Senator from Connecticut had his way and had the power, and he could reconstruct the cosmogony of the universe, he would have the United States have a little sun of its own, and a little moon of its own, and bright celestial stars to twinkle in the heavens for us alone.

The Senator from Connecticut, Mr. President, rejoices in that conception of greatness, puissance, and national isolation to such a degree that he wants no contact with the peoples of the world.

I am surprised that the Senator from Connecticut permits to be used in our schools a translation of Homer or Dante, or of the great masters of classical history, as well as the immortals of more modern times. I am surprised that the Senator from Connecticut—and I am sure that he did not have his way—put anything on the free list, or permitted any rate to be laid in this bill which would possibly allow any article to enter the United States.

Mr. President, I received a letter some time ago, and I am sure it must have been written by a disciple of the distinguished Senator from Connecticut, in which it was insisted that we should prevent tea from being imported into the United States, because, the writer said, if tea were taxed two or three dollars per pound we could produce it in the United States. He was a disciple of the Senator. He shared the views of the distinguished Senator from Connecticut.

So I say, Mr. President, I am familiar with the fact that there are nations which share the views of the Senator from Connecticut, and they would impose tariff rates so high as to cut off imports. We have not the only disciples of this isolation school in the United States. They exist in China. Some of them are found in the recesses of Hindustan. Some of them are found among the Indian tribes of the United States. Some of them are scattered throughout the length and breadth of the land. May I be guilty of a repetition? Some of them are found now, though only a few of them, away up in the Georgian mountains, the remnants of the race of troglodytes, who want isolation, and who have isolation.

My friend from Connecticut belongs to the paleolithic age, to prehistoric times, when men lived alone, lived in the caves, lived in the forests, sought isolation, and every man's hand was against the world. The Senator from Connecticut would keep out the products of other nations; to be logical and consistent, he should prevent the export of products from the United States. He has assented to a provision in this bill which operates as an embargo upon a large number of products, perhaps hundreds of them, according to the construction placed upon the bill by my distinguished colleague, the senior Senator from Utah [Mr. SMOOT].

Mr. President, the Senator from Connecticut mentions Spain, obviously as an example for us to follow. The fact that Spain has imposed rates so high, or rather has increased her rates, is suggested by the Senator as a reason for the United States pursuing a similar course. Spain is a decadent nation. In the days of Philip and Charles the glories of Spain were known throughout the world. There was a time when the King of Spain was the ruler of Europe. Spain for a time glimpsed the great principles which make for national greatness and international prosperity. Then, when she began religious persecution and espoused the narrow provincial course recommended by the Senator from Connecticut and others who champion the pending bill, her star suffered an eclipse, and from a regnant position in the world she sank to a lowly one, and there are but few to-day who do her reverence.

Yes, Mr. President, I know there are nations that believe in the theories of the Senator from Connecticut, and that is what I am protesting against. I am protesting against the Senator from Connecticut forcing the theories of Spain and China upon the United States. I am protesting against a return to medievalism, a return to the days of Philip IV. I protest these unphilosophical and sophistical views that are being taught with so much eloquence and force by distinguished Republicans upon this floor and throughout the land.

Mr. McLEAN. Mr. President——

Mr. KING. I have not yet answered the Senator from Georgia, but I yield to the Senator from Connecticut for a question.

Mr. McLEAN. I think the Senator from Georgia will be patient.

Mr. KING. I hope he will. I know the Senator from Connecticut will be patient because, believing in the Chinese school of philosophy, he must believe in patience.

Mr. McLEAN. I did not happen to mention China among the nations which had raised tariff rates, but perhaps the Senator from Utah can mention a nation that has not adopted protective tariffs. I do not know of any. Does the Senator know of any such nation to-day?

Mr. KING. I beg the Senator's pardon. I did not know he was asking a question. I thought he was making a statement.

Mr. McLEAN. Does the Senator know of any civilized nation that does not to-day impose protective tariffs?

Mr. KING. It depends upon what is meant by a protective tariff. I have stated a number of times upon the floor of the Senate during the debate, and I apologize for a repetition, that the issue presented in this bill is not protectionism versus free trade. That issue is not thrust into this Chamber by any Democrat——

Mr. McLEAN. Why, Mr. President——

Mr. KING. Let me complete my sentence and then I will yield.

But the Senator from Connecticut, with that shrewdness and that subtlety—and I use the word in a complimentary way—

which manifests itself so often in our Yankee friends from the New England States when they are proponents of a cause, no matter how unworthy it may be, seeks to project some other issue into the discussions to conceal the objective which his party is seeking to obtain. Now I yield to the Senator.

Mr. McLEAN. I call the Senator's attention to the fact that the leader of his party on that side of the Chamber [Mr. UNDERWOOD] stated on Saturday last that his party does not believe in a protective tariff. I do not know whether the Senator from Utah subscribes to that policy or not. I asked him the question the other day, and I did not notice in the RECORD that he had answered it. I do not know whether the Senator from Massachusetts [Mr. WALSH], with whom the Senator has just consulted with regard to this matter, believes in a protective tariff or not.

Mr. KING. Oh, no; the Senator from Connecticut has many virtues, but he is not a mind reader.

Mr. WALSH of Massachusetts. Mr. President, I was complimenting the Senator from Utah on his eloquence. I said I had rarely heard him so eloquent as this morning.

Mr. McLEAN. I do not know whether the Senator from Massachusetts believes in a protective tariff or not. I do not know whether the Senator from Ohio [Mr. POMERENE] believes in a protective tariff or not. I do not know whether the Senator from Rhode Island [Mr. GERRY] believes in a protective tariff or not. But I do know that the leader of the party on the Democratic side of the Chamber announced the other day that his party does not believe in a protective tariff. Therefore, I think that if this is to be the paramount issue in the next campaign, as the Senator from Utah says, the Democratic Party ought to put itself somewhere on the question, either for or against protection.

I know it has been the habit of the Democratic Party in the past to proclaim protection in the North and a tariff for revenue only in the South. That they have done since 1844, when they named Mr. Polk as a free trader for President and Mr. Dallas, a protectionist, for Vice President. They have consistently endeavored to persuade their constituents in the North that they did not believe in a tariff for revenue only, but when they come to Congress, when they have the power to write their views into law, they invariably adhere to the tariff-for-revenue-only theory. If this is to be the paramount issue in the next campaign, I do not want my constituents in the North to be deceived about it. That is all. I would like to have the Democratic Party get somewhere on the question, and so I intend, as I have opportunity, to ask Senators who are opposed to this bill whether they believe in protective tariff or not. I would like to have the Senator from Utah answer the question.

Mr. KING. Mr. President, the Senator from Connecticut has demonstrated exactly what I said a moment ago—that he is a most acute and subtle debater. When he is the protagonist of an unworthy cause he seeks to muddy the waters so as to hide the issue which is presented. Now, may I repeat what I said when the debate was opened?

When the Senator from Illinois [Mr. MCCORMICK] was attempting to project the League of Nations into the coming campaign as the controlling, if not the supreme, issue, I said to him, when he asked my views upon the League of Nations, that my views upon that question were unimportant here or elsewhere; that the issue in the coming campaign was not the League of Nations, in my judgment; that the issue would be the domestic policies of the administration, the failures of the administration, the extravagances of the administration, the incompetency of the Republican administration to deal with the great domestic problems which confront the party and the Nation; and that one of the paramount issues would be this infamous tariff bill, which had been dictated by the trusts and the corporations, and which the Republican majority proposes to force through the Congress of the United States.

Let me say by way of parentheses, so that I may be understood by those who may do me the honor to listen or to read these observations which I am now making when they are reproduced in the RECORD, that I said to the Senator from Illinois, speaking for myself alone, that I do believe in the League of Nations, in an association of the nations of the world, and that there would not be world peace nor could there be that international fellowship until and unless there was an association of the nations of the world.

I further said to him that those who were the disciples of the Christian faith, when they repudiate the concepts lying back of an association of nations, are repudiating their faith in the divinity of the Master, Jesus Christ, and in the great principles of the Christian faith.

Now, Mr. President, coming back to the proposition, the tariff question as it finds expression in the pending bill will be a paramount issue in the coming campaign. If we see a man who has been profiting by taking the property of others for many years and claims a prescriptive right to continue such course, as many of those who believe in the protective tariff do, we get a little reconciled to the misconduct if it goes on to a time beyond which the memory of man runneth not to the contrary; but when the wrongdoer seeks to take more and still more and so oppress the people by his exactions, then we may make that an issue and insist that the trespasser be brought before the bar of public conscience, if not before the bar of the courts of the land.

The Republican Party, under the guise of protection as we find it exemplified in the McKinley bill, in the Dingley bill, in the Payne-Aldrich Tariff Act, were robbing the American people. Republicans themselves protested against the robbery when it got so high that it deprived them of some of the benefits which ought to come to the great consuming and producing masses of the people, and they rebelled against the Payne-Aldrich tariff law.

Let me say to my good friend from Connecticut that I am not saying one-half as bitter things against the pending bill as were said by the Republicans against the Payne-Aldrich tariff bill, to which the Senator from Connecticut subscribes. That bill was drawn by Republicans. Let me modify that. That bill was dictated by the predatory interests of the United States, as was so clearly indicated by Mr. Theodore Roosevelt upon many occasions.

Does anyone deny that Mr. Taft was defeated for any other reason than that the Republican Party enacted the Payne-Aldrich tariff law? Why, even Republicans, wedded to the protection theory, revolted against that infamous bill and hurled the Republican Party from power. Mr. Wilson would not have been elected if the Republican Party had pursued wise and just policies and had not surrendered to the dictates of trusts and combinations and conspiracies in restraint of trade and to the evil and vicious influences which too often have found refuge even in this Capitol and have been sufficiently powerful to force through measures which aggrandized them and increased their swollen and illicit gains.

Now, Mr. President, I do not speak for the Senator from Alabama [Mr. UNDERWOOD], our distinguished leader, or for the Senator from Ohio [Mr. POMERENE], a gentleman of ability and integrity, a man who is sound in the Democratic faith and a true tribune of the people. I do not in this contest speak for my leader, the able Senator from North Carolina [Mr. SIMMONS], whose leadership in fighting against these infamous schedules I gladly accept. I am speaking for myself; and I think in the observation I am about to make I shall speak for the overwhelming majority upon this side when I say the issue presented by this bill does not involve the question of protection or free trade. I said the other day, and I repeat it, if this bill were so modified as to raise a sufficient amount of revenue, if it afforded reasonable protection to infant industries, and took into account other factors that would appeal or might appeal to reasonable and patriotic Americans in view of world conditions, the proponents of the bill could put it through the Senate in a few weeks. Those upon this side of the Chamber who might then vote against it, for various reasons, would not be protesting as they are now protesting and denouncing vehemently these wicked schedules which the Senator from Connecticut [Mr. McLEAN] is defending.

The Senator from Alabama [Mr. UNDERWOOD], whose able speech I was not privileged to hear—and I have been denied because of press of business the opportunity to peruse it, but I venture the assertion without having heard or without having read it—did not say that the issue before us now or in the next campaign would be the issue of free trade or protection, but he may have stated that this bill with its odious provisions will present an issue in the next election.

No Senator on this side of the Chamber is now advocating free trade; no Senator is projecting a free trade bill; no Senator is offering schedules here as amendments to the pending bill that even a man who always looks through a glass darkly could affirm constituted or led to free trade. Republicans on the other side of the Chamber—I beg pardon, some Republicans—are misleading the people, though not intentionally, of course. They are trying to project into this debate an issue that is not raised.

The Senator from Connecticut, in addition to being a student of political economy and a statesman, is a lawyer. Doubtless he has tried many cases, and he knows when he has a bad case, when the evidence tends irresistibly to the establishment of the truthfulness of any fact or of a given status the establishment of which would bring condemnation to his client or to his cause, he seeks to dull the sharp edge of the incriminatory evidence and to distract attention to some other issue, hoping

thereby that the guilty or unworthy client may escape his just deserts.

Mr. McLEAN. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Utah yield to the Senator from Connecticut?

Mr. KING. I yield for a question.

Mr. McLEAN. The Senator from Utah in his discussion the other day said that Connecticut had greatly prospered under the infamous and extortionate tariff laws which Republican Congresses had enacted, but I notice that that statement was not printed in the RECORD the next morning. I had to go to the Official Reporters to get it. Of course, I find no fault with the Senator from Utah for erasing that statement from his remarks; he had a perfect right to do that; but I am wondering whether, upon reconsideration, he concluded that his testimony was not altogether reliable in his discussion of the tariff question, because one would naturally assume that if protection had brought prosperity to Connecticut it might bring like prosperity to every State that had a diversity of industries.

Mr. KING. Has the Senator from Connecticut finished his question?

Mr. McLEAN. I am not asking the Senator to give the reasons why he eliminated from the CONGRESSIONAL RECORD the remarks to which I have alluded unless he so desires.

Mr. KING. If I did eliminate the part referred to, I did it unintentionally, but I affirm now that the Senator's State has prospered greatly, far beyond its deserts, under the system of protection which has been established and promoted by the Republican Party.

Mr. McLEAN rose.

Mr. KING. Let me complete my sentence; the Senator will withhold his cynicism, if he can, for a moment. The Senator seems to have the Harveyized cynicism of our distinguished representative over the seas.

I repeat that the Senator's State has prospered. It is a little State, with few natural resources, but the few shrewd Yankees like the Senator from Connecticut living there have brought in cheap labor from over the seas.

Mr. McLEAN rose.

Mr. KING. Wait until I get through. I affirm that the Senator's State has employed cheap labor; and much of it has been foreign labor.

Mr. McLEAN. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Utah yield to the Senator from Connecticut?

Mr. KING. I yield.

Mr. McLEAN. Mr. President, the statistics will show that the wages which have been paid to labor in Connecticut have averaged much higher than those which have been paid by the States whose Senators have voted for a tariff for revenue only.

Mr. KING. Mr. President, I repeat what I said a moment ago, that a large part of the population working in the mills in the State of Connecticut was foreign. There were strikes in the mills and factories because of the injustice which the mill owners perpetrated upon the laborers whom they employed. I repeat, the Senator's State has grown rich. I do not mean the great masses of the people have prospered or become rich, but the predatory interests with which the Senator from Connecticut is allied have grown rich. The Senator, believing in their economic views, speaks for policies which they favor and for this bill, which they indorse. When we come to the textile schedule we shall find the able Senator from Connecticut lifting his voice in protest against fair and reasonable rates. He is willing that the favorites of the Republican Party, those favorites against whom Senator Dolliver inveighed, those favorites against whom Theodore Roosevelt inveighed, those favorites who have played the game in the past and who have prostituted the taxing powers of the Government for their enrichment shall continue their illegal course.

Mr. SPENCER. Mr. President——

Mr. KING. Let me first get through with the Senator from Connecticut, and then I will yield to the Senator from Missouri.

Mr. McLEAN. Mr. President, will the Senator yield?

Mr. KING. Wait until I get through; I will not yield for a moment.

Coming back to the question which I suggested a moment ago, I repeat that the manufacturers and the beneficiaries of the tariff system who reside in the State of the Senator from Connecticut, or who, if they do not reside there, reside in New York or Boston or elsewhere and have their factories in his State, have been willing to get cheap labor and get it from over the seas in order that they might increase their swollen fortunes. The State of Connecticut, small, with but limited agricultural resources, with no mineral wealth, and without having the advantages that are possessed by many other States, has directed its attention largely to manufacturing; and those engaged in manufacturing have perceived that if they could get higher tariff duties and prevent competition from abroad they would be able to exploit the American people by charging them infinitely more for their products than would have to be paid under a legitimate competitive system. Republicans of Connecticut have only done what Republicans—I am speaking now of the brand of Republicans that Roosevelt denounced—have done elsewhere.

Mr. President, soon after the Civil War, when the Republicans—the brand of Republicans of whom I am now speaking—had control of both the executive and legislative branches of the Government, they determined to bring down the price of labor or to prevent the price of labor advancing in order that the laboring man might share a proportionate part of the profits resulting from his toil. What did they do? They brought into Pennsylvania and into many other manufacturing States of the Union hundreds of thousands of the poor people of Europe who constituted in part what was then offensively called "pauper labor" of Europe. Why? In order to force wages down or to prevent wages from rising as they should have risen, keeping pace with the profits which were made by the employers of labor. The statistics show that following the Civil War and for many years thereafter millions of people from Italy, from Hungary, from Slovakia, from Greece, and from Bulgaria came into the United States and found places in the protected industries of the United States. American labor was largely driven out and foreign labor was employed. In the recent steel strike it was found that many of the men employed were foreigners, and that in many of the great protected industries, not only in Connecticut but elsewhere, an inadequate wage was paid to workingmen.

After the Senator called my attention to the statement which he says I made upon a former occasion as to the prosperity of Connecticut, I asked Colonel Halsey to bring me the latest Statistical Abstract of the United States showing the estimated true value of the property and of specified classes of property, and so forth, in the United States. The date is 1912. I regret that I have not the statistics for a later period, but I shall ask permission to put them into the RECORD at the conclusion of my remarks. I find, reading from page 714, that the value of the property of Connecticut, as reported in the Statistical Abstract furnished by the Department of Commerce, is $2,285,454,669. For instance, in the case of Florida, a great State, the value is $1,000,000,000 plus; in Georgia, substantially the same as in Connecticut, $2,382,000,000; in Idaho, $680,000,000; and so on. It is not necessary to put into the RECORD all of these figures.

I repeat that the State of Connecticut is rich. That more than two billions—$2,300,000,000—is not owned by the great mass of the people of the State of the Senator from Connecticut, however. It is owned by the corporations, by the manufacturing plants, by the great industries that have profited by the tariff bills that have been driven through by the Republican Party.

Mr. President, the Senator from Connecticut mentioned the wages paid to the laboring men. I remember reading of the strikes in his State—the Bridgeport strike, the street railway strike, the internecine war that resulted because of the starvation wages paid by the predatory interests to the men and women who worked for them. Many of the men working in these protected industries could not earn sufficient to clothe and feed themselves and their families, and mothers and little children were forced into the factories of the protected manufacturer in order to get enough money to meet the demands for food and clothing.

Ah, Mr. President, I repeat, the State of Connecticut is rich, but the people of Connecticut are not rich. The manufacturing institutions that have been profiting by these infamous tariffs are rich beyond the dreams of Midas and of Croesus. The State of Connecticut, or men who have profited by the great manufacturing and other industries of the Senator's State, have loaned millions and tens of millions of dollars throughout the agricultural districts of the United States.

Your State, my dear Senator—and I pay it and you the compliment—has grown so rich in its liquid assets that it has been able to loan to other States less fortunate, which have not been the beneficiaries of this high protective tariff system to the extent that a few of your States have, millions and hundreds of millions of dollars; and we are paying tribute to you now in interest upon the money which has been borrowed from the plutocrats of the State of Connecticut.

Mr. WATSON of Georgia. Mr. President——

Mr. KING. I yield.

Mr. WATSON of Georgia. When Daniel Webster went down to Columbia, S. C., to try a great law case, he was taken out

to the slave plantation of Gen. Wade Hampton; and after seeing how the slaves lived, their comfortable cottages, their comfortable clothing and shoes, and the mild manner in which they were worked, and were given periodical vacations, and had little gardens and patches of their own, he said to General Hampton: "I wish that the wage earners of New England fared as well as your Negro slaves are faring."

Mr. KING. I thank the Senator for his contribution.

With due courtesy and with deep respect for my friend, I want to say to him, I want to say to the manufacturers of the United States, to the capitalists of the United States, to the beneficiaries of this legislation, using somewhat the language of my friend the Senator from North Dakota [Mr. McCUMBER], who is not now here, that if they do not content themselves with "meager" profits there will be trouble. I have been one of the few in this Chamber who have opposed the consolidating tendencies of the Federal Government. I have perceived the evils that arise from centralized authority. I have rejoiced in the utterances of great men, such as the Governor of New York is, who have protested against the assumption by the Federal Government of the powers which belong to the States, and have insisted upon the deadly and paralyzing hand of the Federal Government being kept off from the States and from their legitimate activities.

Mr. SPENCER. Mr. President, will the Senator yield?

Mr. KING. Let me finish this thought. I believe in individualism. I believe in the competitive theory. I believe that the business men of our country, so long as they keep the law, ought to be left free to make such profits as they can. I have opposed the theory that the Federal Government could run the business of a man better than he could run it himself, and I voted against the socialistic tendencies that have manifested themselves so often in this Chamber; and I want to say now to the great manufacturing plants of the country and to the great producers of wealth—I mean those who are the beneficiaries of these tariff laws—that if they persist——

Mr. SPENCER. Will the Senator yield for a question?

Mr. KING. Let me finish my sentence. The Senator is so delightful that it is hard for me not to pause in the midst of a sentence to listen to him, but will he permit me to finish this?

That if they do not practice temperance and prudence—I do not ask for generosity—justice, fairness in dealing with the wage earner and with the people, discontent will arise and demand be made for material changes in the economics if not the political form of our Government. The future of this Republic is not alone in the hands of the wage earners. It is in the hands of the beneficiaries of class legislation. It is in the hands of those who profit by high tariffs and by legislation of a discriminatory character. If an employee of mine sees that I can come to Congress and get a tariff law that enables me to charge more for the product which he makes than it is worth, and this enables me to grow enormously rich out of his sweat and his tears, in the end he is going to say, "What is all this worth?" He is going to demand——

Mr. SPENCER. Mr. President, will the Senator yield for a question?

Mr. KING. He is going to demand that he share in the profits and proceeds of his labor, and that there shall be such a readjustment of the economic and the industrial system of the land as to establish what he conceives to be justice, equal and exact justice, to all.

I yield to the Senator from Missouri.

Mr. SPENCER. I thank the Senator.

Before the Senator got too far into the centralization of the Federal Government I wanted to ask him one question for my own information regarding his own State, for I have listened to his address with a great deal of interest. It seemed to me the most eloquent part of it was when he described how beneficial a protective tariff had been to the State of Connecticut. I agree with him in that statement. I am sure it has been extremely beneficial to the State of Connecticut. It has been equally beneficial to the State of Missouri, from which I come. What I wanted to ask the Senator, because I am not informed about it, is as to whether a protective tariff has not also been extremely beneficial in the State of Utah?

Mr. KING. The Senator from Missouri is like some Senators upon the other side of the Chamber. They are acute and shrewd, and are always anxious to depart from fundamental principles to consider some little, narrow question which they think will obscure the issue.

Mr. SPENCER. The Senator does not think the prosperity of the State of Utah is a narrow, technical issue, of course.

Mr. KING. No. I will say to the Senator from Missouri that Utah does not have very much prosperity now, with the mines shut down and business paralyzed partly because of some of the policies of the Republican Party.

Mr. WATSON of Georgia. Mr. President——

Mr. SPENCER. Mr. President, is it not true that for the last eight years the policies of the Republican Party could not have contributed to the present condition in Utah?

Mr. KING. Mr. President, the people of Utah and the State of Utah and other States in the United States never were so prosperous in the history of this Republic as they were——

Mr. SMOOT (from his seat). During the war.

Mr. KING. If Senators will not talk so loud, sotto voce, and will speak, one at a time, I shall be glad to answer them as best I can. This country never was so prosperous as during the years when Woodrow Wilson was in the White House, and the Democratic Party controlled both branches of Congress.

Mr. SPENCER. Of course the Senator has not yet answered my question. I wonder if he will.

Mr. KING. Mr. President, I will say to the Senator from Missouri that the prosperity of this country when the Democrats had control brought the wealth of the United States from $185,000,000,000 to more than $300,000,000,000. Now, since the Republicans have been in power, one year and more, they have reduced the wealth of the United States from $300,000,000,000 to perhaps $215,000,000,000 or $225,000,000,000. So Republicans can congratulate themselves upon the fact that they have decreased the wealth of the United States from $50,000,000,000 to $75,000,000,000 in about 15 to 16 months.

Mr. SPENCER. Mr. President, will the Senator let me repeat my question as to whether or not, in his opinion, a protective tariff is beneficial in the State of Utah? Of course, he knows, for his learning is great, as even I know, that the prosperity during the war, when no other nation could make anything and the United States could make everything, is no criterion in normal times. That is its own answer; but the question as to the effect of a protective tariff in Utah, I am free to say, I do not know, and I should very much like to have the judgment of the Senator from Utah.

Mr. KING. Mr. President, the Senators upon the other side of the Chamber have frequently asserted that the Underwood-Simmons law was a free-trade measure. If that was a free trade act, then it must be noted that Utah and the Nation under that so-called free trade act enjoyed the greatest prosperity which ever came to this Nation. I will say to my friend from Missouri, further, speaking about tariff laws, that according to James G. Blaine, at the time he wrote his "Twenty Years of Congress," the people of the United States never had as fair a tariff act as they had in the Walker tariff law, which was enacted in 1846. Walker, as everybody knows, was an eminent Democrat and a political economist who at that time stood in the front ranks of the great thinkers of the world.

Mr. McCUMBER. Mr. President——

Mr. KING. Let me finish the thought I was endeavoring to express. I will never get through if Republicans interrupt me so much. I have not yet answered the Senator from Georgia. I was going to talk only a few minutes on formic acid, and here I am back in 1846.

Mr. McCUMBER. My interruption might possibly be of assistance to the Senator.

Mr. KING. Having seen this bill, which he has brought before us, I am sure that the Senator from North Dakota could not be of very much assistance to me.

Mr. McCUMBER. Will the Senator allow me to ask him a question?

Mr. KING. Oh, yes.

Mr. SPENCER. I hope the Senator from North Dakota will let the Senator from Utah answer my question.

Mr. McCUMBER. My question will probably bring out an answer to the question of the Senator from Missouri as well. Inasmuch as for more than 75 years each side of this Chamber has been trying to convince the other side that it was wrong upon the matter of protection, or upon the matter of a tariff for revenue only, does not the Senator think it is time to drop the discussion for a little while, and come down to formic acid, the question which is immediately before the Senate?

Mr. KING. Mr. President, the only fault I find with my friend from North Dakota is that he does not get rid of some of his Scotch pertinacity, and let his goodness and his better judgment lead him into the ranks of the Democratic Party, where he belongs. Let me say to him that I was talking about the amendment which had been tendered to this bill by the distinguished Senator from Oregon, when my distinguished friend the Senator from Connecticut saw fit, of which I make no complaint, to propound several questions. The Senator from

Georgia [Mr. WATSON] propounded one and the junior Senator from Missouri [Mr. SPENCER] got into the arena, so I will say to my friend that I have not been able to go very far with formic acid, and I am not going back to formic acid until I conclude the observations which have been made necessary, in my view, by the questions which have been submitted by Republicans.

Mr. McKELLAR. Mr. President, will the Senator yield for a question?

Mr. KING. Just for a question.

Mr. McKELLAR. The Senator from Missouri [Mr. SPENCER] and the Senator from Connecticut [Mr. McLEAN] asked the Senator from Utah what he had to say about the great prosperity in Connecticut and Missouri under a high protective tariff. Will the Senator say whether or not such prosperity as has gone to those two States, and to other States, by reason of a protective tariff, has gone to the few who received the benefits of such legislation, or has the prosperity been enjoyed by all the people? Has it not been confined to a few, in a large measure, who were beneficiaries of the tariff system?

Mr. KING. Mr. President, it is difficult to answer that question of the Senator in general terms without perhaps doing an injustice, and I do not want to do any injustice to any person. But let me say in general terms that, in my opinion, the statistics which have been furnished, and which have been quoted upon this floor, not in this debate but in other debates in the past few years, elaborated by the distinguished Senator from Wisconsin a number of years ago, show that the bulk of the property of the United States—I will first limit it to what might be denominated the productive property, the manufacturing property, the mines, the smelters, the banks, the railroads, the mills—is owned by a limited number of people compared with the population of the country. Some writers have stated that 80 per cent of the wealth of the United States was owned by less than 20 per cent of the people. Others give more extreme figures. I have no doubt that in the State of Connecticut the overwhelming part of the wealth of the State is owned by the banks, the trust companies, the railroads, the manufacturing institutions, and the corporations which are engaged in what we frequently call industrial activities.

When we go into the States of Iowa, Illinois, and others of the agricultural class we find that property is more equitably distributed, and a larger number of people are owners. Yet we find in the agricultural States that tenancy is increasing, that manufacturing plants are growing up, that corporations are increasing in wealth, and that the productive property is narrowing into fewer hands and being controlled by fewer individuals and corporations.

Take, for instance, the chemical industry. I have examined the list of corporations which control the greater part of that, and I say that more than 70 per cent of the chemical industry is owned by comparatively few corporations.

So it is impossible to say, in a general statement, just what proportion of the wealth of the United States is owned by the few and what proportion is owned by the great mass of the people; but, generally speaking, I will say that the high protective tariff has ministered to the material aggrandizement of the few and not the many.

Mr. SMOOT. Mr. President, will my colleague yield?

The PRESIDENT pro tempore. Does the junior Senator from Utah yield to his colleague?

Mr. KING. I yield.

Mr. SMOOT. Perhaps, from the statement which the Senator has made in relation to the rates of duty in the Underwood tariff law——

Mr. KING. Does the Senator mean early in my remarks?

Mr. SMOOT. Just a short time ago the Senator referred to those rates of duty as affecting the State of Utah, and in order that his remarks may not be misunderstood so that he may correct me if I understood him wrongly, I want to ask him if we are to understand him to mean that he would want wool on the free list, as it was under the Underwood tariff law?

Mr. KING. I have made no statement at all from which the Senator can make that deduction. This is what I said, and if the Senator listened he must have known what I said——

Mr. SMOOT. I listened.

Mr. KING. I said, in answer to the Senator from Missouri, that the Republicans are constantly denominating the Underwood tariff law a free-trade measure, and I said if it were a free-trade act, then the State of Utah and the Union had prospered more under its operation than they had during any corresponding period in the history of the United States. That is what I said substantially.

Mr. SMOOT. I understood my colleague to say that the State of Utah had prospered more under the Underwood law than at any time in the history of the State of Utah.

Mr. KING. I made the statement which I just repeated, or that in substance.

Mr. SMOOT. I simply wanted to know, because if it had not been for the amendment of the Underwood tariff law by the emergency tariff act passed at this Congress, as far as the sheep industry of Utah is concerned, it would have been dead to-day, and as far as the sugar business is concerned it would have been dead to-day. I think my colleague will agree with me as to those two items. If the rates under the Underwood law had remained in force until to-day, not one-tenth of the sheepmen of the State of Utah could have survived, and the sugar industry would have been dead.

Mr. KING. Mr. President, I do not agree with my colleague at all; and when we come to the wool schedule and the sugar schedule I may have some observations to make upon both of those schedules. I content myself now by repeating in a general way what I intended to say with respect to the Underwood law, that our Republican friends are constantly insisting that the the Underwood law is a free trade act, which I deny; and I said that if it were a free trade act, then it had brought to the United States greater prosperity than the United States had ever enjoyed; and I said that when Mr. Wilson went into the White House the property of the United States was of the value of $187,000,000,000, and that when Mr. Wilson left the White House it was of the value of approximately $300,000,000,000; and that under a Republican administration values had declined. There would be a dispute, of course, as to the levels to which they did decline. I concede—and anybody of any sense must concede—that if you put a tariff wall around our country or if you put a tariff upon any article so high as to keep out competition of any kind you are going to permit the domestic producer of that article to charge whatever he pleases, and if he is greedy and avaricious his profits will be tremendous.

Mr. President, I concede that if I could get a monopoly in the United States for the manufacture of any article—plows or harrows or hats or shoes or anything else of importance—I soon would be rich beyond the dreams of avarice. Monopolies, of course, will make the monopolists rich. That is why they want monopolies.

Of course, a high tariff which destroys competition will make those who are the beneficiaries of the system rich. That is what I am protesting against. Not that I protest against riches. I believe in the development of the resources of our country. I do protest, though, Mr. President, against an economic policy enforced by discriminating statutes which enrich the few at the expense of the many. We denounce slavery and laws which avowedly seek to favor one class at the expense of another. Tariff laws may be so drawn as to give privileges and advantages to a few which are denied to the many. Justice should be the aim of all government. Injustice arises when the laws are framed in the interest of a given class or group or profession.

Governments are not instituted among men for the purpose of granting special privileges to one class. Democracy is a failure, a delusion, a sham, if there is perpetuated under the name of democracy the evils which existed under the feudalistic system. We affirm glibly, with a sort of "bunting patriotism," in the language of H. G. Wells, that we have established liberty in the land. It was M. de Lavalaye, the great writer of Europe, whose untimely death we deplored, who said that the struggle in the past had been for civil, for political, and for religious liberty, but that the struggle of this century would be for industrial liberty and freedom.

We profess religious liberty and political liberty. Ah, Mr. President, both religious liberty and political liberty will perish unless there is industrial liberty. If by unjust and special legislation you put into the hands of a few individuals the power to use the Government for their own enrichment, and they grow enormously wealthy, like the feudal barons of old, and the mass of the people grow poor, or do not keep pace with the industrial and the moral development of the country, in the end you are going to destroy any government, even though you may denominate it a republic or a democracy.

I am for the development of our country. I want to see our fields produce abundantly the food which we need and to supply the hungry in other parts of the world.

I want our factories to be busy, the mills to furnish employment, the mines to operate, and peace and plenty, as God's sunlight is visited upon all, to be visited upon the people of our broad land. I do not want the benefits to come only to the few. I want them for all. I do not want the Government to be a rich man's government or a political party to be a rich man's political party, as the Republican Party is now becoming. The Republican Party is protecting the corporations and trusts. They take shelter and refuge behind Republican politicians and Republican measures and Republican laws. I want the day to

come when there is equality and equal and exact justice for all in this broad land.

Mr. President, when I was diverted by the questions of the Senator from Missouri [Mr. SPENCER] I was calling attention to the Walker tariff law and what Mr. Blaine said about it, as an exemplification of the fact that we may have a tariff measure that gives revenue and affords incidental and indeed "reasonable" protection and brings substantial justice to all classes—manufacturer and consumer.

Mr. Blaine said that the Walker tariff law—I can not repeat the words, but this is the substance—was one of the fairest tariff measures that had ever been drawn. He said, furthermore, that under that law the prosperity of the United States had never been greater. Of course, an examination of the statistics of the States and of the country at that time exemplifies the accuracy of that statement.

Mr. WATSON of Georgia. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Utah yield to the Senator from Georgia?

Mr. KING. I yield.

Mr. WATSON of Georgia. In this connection I would remind the Senator that under the Walker tariff law three-fourths of our imports and exports were carried in American bottoms. While that tariff law was in effect Charles Dickens visited this country and wrote back home in one of his letters that America had no poor and that a beggar on the streets of Boston would create as much of a sensation as would an angel with a flaming sword in his hand in those streets.

Mr. KING. I thank the Senator for calling attention to the matter.

Mr. President, a just tariff law does not create a vast gulf and chasm in the social organism. Some people think that we are prosperous if a few have limousines and great wealth and the masses are poor. They measure prosperity by the aggregate wealth, though the great majority of it is owned and controlled by the few. Somewhere in the Bible something is said about having neither riches nor poverty. In the ideal state, Mr. President, the state of the future, there will be social justice. The laboring man, by whose bowed back wealth has been created, will not have to be content with the crumbs that fall from the rich table of Dives.

I am pleading for Lazarus now and not Dives, for the poor of the land and not for the rich corporations, whose outstretched hands remind one of the gaunt and grim specters, hideous and affrighting, as portrayed by the genius of men upon canvas and pages of the printed book.

Mr. President, no one can defend the pending bill as in the interest of the people. Some one was kind enough to mail me yesterday a recent issue of the Literary Digest, which contains excerpts from Republican newspapers relating to the Fordney bill. Let me read a few statements about this bill.

The New York Journal of Commerce, a Republican newspaper, says:

> It is something of a shock to learn, if the analysis of the Associated Press is accurate, that the rates of the bill are on the whole higher than those of the Payne-Aldrich law.

I called attention a moment ago to the fact that the average rates of chemical schedules bear this ratio to each other: The act of 1909, the Payne-Aldrich law, would bear a ratio of 13.2 per cent; the act of 1913, 10 per cent; and the Senate committee bill, 28.6 per cent, or nearly three times the rates of the Underwood law, and nearly two and one-third times the rates of the Payne-Aldrich law.

The new York Tribune, a Republican paper, says:

> If President Harding stands for reelection it is scarcely fair to handicap him as was President Taft in 1912 by the Payne-Aldrich Act.

In another editorial in the New York Tribune it is said that the Republicans are "warned that the present is no time to go tariff mad." When I used the expression about midsummer madness in the submission of this bill for our consideration, I was merely echoing the statement of a great Republican newspaper, not as great perhaps as it was in the days of Horace Greeley, but still it is a Republican newspaper.

The St. Louis-Globe Democrat, which is a strong Republican paper, states that this bill—

> seems to have pledged the principle of protection to everything without regard to present world conditions and without regard to our position in relation to world trade.

Mr. SPENCER. Mr. President, will the Senator allow me to correct him? The St. Louis Globe-Democrat is not a Republican newspaper, and has not been for some years.

Mr. KING. I was reading from the Literary Digest, which says that—

> The St. Louis Globe-Democrat, a strong Republican organ, says the bill seems to have pledged the principle of protection—

And so forth.

Mr. SPENCER. That is the correction I desire to make, that it is not a Republican newspaper, and has not been for some years.

Mr. KING. I am sorry the Literary Digest has fallen into that error. That was my understanding, but I supposed the Literary Digest would be more accurate than my recollection.

Mr. SPENCER. I hope its other information is more accurate.

Mr. KING. It quotes Republican newspapers. Does the Senator deny that the New York Tribune is a Republican newspaper?

Mr. SPENCER. Oh, no; I do not.

Mr. KING. Does the Senator deny that the New York Journal of Commerce is a Republican newspaper?

Mr. SPENCER. I do not know anything about it. I do know that the St. Louis Globe-Democrat is not, and does not pretend to be, a Republican newspaper, and the statement which the Senator quoted, therefore, was a mistake. That is the reason why I rose to make the correction.

Mr. KING. I am not complaining of the correction, but the Senator stated that he hoped the other statements which I was quoting were more accurate. I ask the Senator if he thinks the statements which I am reading from the New York Tribune as found in the Literary Digest are inaccurate?

Mr. SPENCER. I do not, and I repeat what I said. I hope its other references are more accurate than its statement about the St. Louis Globe-Democrat.

Mr. KING. It is referring to the tariff. It is simply quoting Republican newspapers. The Senator from Massachusetts [Mr. WALSH] suggests to me, and I propound the question to the Senator from Missouri, Does the Senator from Missouri say that the St. Louis Globe-Democrat is a Democratic newspaper?

Mr. SPENCER. The St. Louis Globe-Democrat boasts that it is neither Republican nor Democratic; that it is an independent paper. I said the other day, and I repeat, that I think so far as the Republicans in Missouri are concerned they regard it as very much inclined toward the Democratic side, though in some respects that statement is not quite fair.

Mr. KING. I suppose the Democrats regard it as a Republican newspaper?

Mr. SPENCER. No; I think they are very much pleased with its attitude and rather regard it as a help to them. I may say for the information of the Senate that some years ago the Globe-Democrat bought out the St. Louis Republic. The St. Louis Republic was a historic Democratic paper, the oldest paper, perhaps, in the State; certainly in the city. When they bought out the Republic and took over their subscription list they changed from the policy of being a Republican newspaper to that of being what they called an independent newspaper, and they never have since called themselves a Republican newspaper. Certainly no one who reads the paper would ever think it was Republican.

Mr. KING. My understanding about the matter comes back to me now. When the newspaper was purchased, it was purchased by individuals who sought to change it from a Democratic newspaper to an independent Republican newspaper.

Mr. SPENCER. No; the Senator is entirely wrong about that.

Mr. KING. I think a perusal of its columns will determine whether or not the Senator from Utah or the Senator from Missouri is right.

The Syracuse Post-Standard, which is a Republican paper according to the Literary Digest, states:

> The Senate must give ear to the changed conditions of world trade, to our change from a debtor to a creditor nation. It must give ear also to a demand that the rates on foodstuffs shall not be the highest ever levied.

Now, the Senator from Massachusetts may correct me if I place the Boston Transcript in the wrong column as an independent Republican paper. I understood it to be strongly Republican, with now and then a glimpse of political light shining through the dark recesses which surrounded it. However, what it says is this:

> Give the American producers all they want on wheat, hides, and wool, and never mind whether the manufacturer gets compensatory protection on his products or not.

Further it says:

> Party guidance is thrown to the winds.

I said that the other day. We read about the tariff bloc holding receptions and receiving Mr. Arnold, who represented an organization. The tariff bloc received the schedules which were tendered, and those schedules, as I have examined the letter of Mr. Arnold and the schedules in the bill, seem to have been reproduced in the bill itself.

> Party guidance is thrown to the winds.

That means Republican Party guidance. I do not think the Senator from Massachusetts [Mr. LODGE] controls in the framing of this bill. The junior Senator from Idaho [Mr. GOODING] submitted a statement a few days ago of the names of the Members in the tariff bloc—I think some 25 or 26 Republican Senators. They constitute what is known as the tariff bloc. None of them were members of the Finance Committee. They had a room and were receiving delegates and men who are pleading for high tariffs, and after listening to them, as we are informed, the tariff bloc submitted its demands to the committee, or collaborated with the committee, or made known to the committee in some way—I mean the Republican members of the Finance Committee—what were the demands of the tariff bloc.

By the way, let me ask right here, digressing for a moment, is there any combination between the tariff bloc and other Republicans and one or two Democrats for the purpose of forcing through this tariff bill? Take the item of lactic acid, take the item upon which we voted yesterday of arsenious acid and arsenic acid, and it appears that the tariff bloc and the agricultural bloc upon the other side, to a man, voted for the duty on arsenious acid. The Senator from Kansas [Mr. CAPPER] who I notice is in the Chamber—and I feel complimented in knowing that he is here while I am making a few observations—on yesterday voted, if he were here—and I have not noticed the vote to ascertain whether or not he was present—for these high tariff rates upon arsenious acid and arsenic acid, though the farmers and the horticulturists of his State will be robbed and compelled to pay more for an article which they need to combat the ravages of insects and rodents and other animal pests which are destructive of plant and vegetable life. I think the Senator from Kansas ought to write to his newspaper and say to the farmers of Kansas, "I voted to tax you farmers in favor of the arsenic trust. Of course, you must forgive me, because I belong to the tariff bloc, and the tariff bloc and the agricultural bloc have just formed a combine with the manufacturing interests of this United States to stand by these schedules from Dan to Beersheba."

Mr. McNARY. Mr. President——

The PRESIDING OFFICER (Mr. WILLIS in the chair). Does the Senator from Utah yield to the Senator from Oregon?

Mr. KING. I yield to the Senator.

Mr. McNARY. I desire to inform the Senator from Utah that he is entirely misinformed when he makes the statement that the tariff bloc and the agricultural bloc are working together toward a common end. The agricultural bloc is a nonpartisan organization of Senators who have come together for the purpose of formulating certain legislation which is calculated to improve the welfare of the farmers without attacking any other industry in the country.

Mr. KING. May I inquire of the Senator—for I do not intend to do the agricultural bloc an injustice—has the agricultural bloc been functioning in the preparation of any of the schedules of the tariff bill?

Mr. McNARY. Not in any manner whatsoever. The tariff bloc, composed entirely of Republicans who are interested in agriculture, meet together and advise one with the other for the purpose of coming to a common understanding with regard to securing sufficient protection for certain agricultural industries.

Mr. KING. May I inquire of the Senator whether the members of the agricultural bloc upon the other side of the Chamber voted for the high rates on arsenious acid and arsenic acid?

Mr. McNARY. I have kept no record of that matter and have not been concerned. If they have done so, it is a coincidence entirely, and based upon their better judgment as to what were proper duties to provide adequate protection.

Mr. KING. May I inquire of the Senator from Oregon whether it is not a fact that every member of the tariff bloc upon the other side of the Chamber has voted for every item in the bill upon which a vote has so far been taken?

Mr. McNARY. Does the Senator from Utah refer to the tariff bloc?

Mr. KING. Yes; the members of the tariff bloc; not as a bloc but as individuals.

Mr. McNARY. I do not think there has been—and I have, I believe, attended all of the meetings—any particular time given to the consideration of the chemical schedule. The tariff bloc has considered those items which are peculiarly agricultural in their nature.

Mr. KING. The Senator from Oregon evidently did not understand me. I beg pardon. I did not make myself clear. The inquiry I last made was this: Is it not a fact that every Republican member of the tariff bloc—not as members of the bloc but as individuals—has voted affirmatively upon every item thus far upon which a vote has been taken?

Mr. McNARY. I will say to the Senator from Utah that there have been so few items voted upon during the four weeks the bill has been under consideration that I am really unable to answer his question; but I can assure the Senator, as a final word, that the tariff bloc is composed entirely of Republicans who are alone interested in the proper protection of agricultural products.

Mr. LODGE. When the Senator from Oregon refers to the tariff bloc does he mean what is called the farmers' bloc?

Mr. McNARY. I will state to the distinguished leader on this side of the Chamber that a moment ago I very briefly stated to the Senator from Utah that the agricultural bloc was nonpartisan, having for its purpose legislation pertaining solely to the welfare of the agricultural interests of the country, while the tariff bloc is composed of western and middle western Republicans who have a desire to see certain basic agricultural products protected from the competition of foreign lands.

Mr. KING. Of course, I did not intend to do an injustice to any bloc, although I confess that I do not believe in blocs, either agricultural blocs, mining blocs, labor blocs, or any other kind of blocs. I believe in parties and in party government. The only way, Mr. President, in which we can preserve our Government is by preserving the integrity of parties. I want the Republican Party to be maintained as a powerful, militant organization, devoted to what it believes to be the fundamental principles of that party. If I had my way and had the power, I would not destroy the Republican Party. I know that my party, unchecked, supreme, without opposition, would in the end degenerate, would become controlled by politicians, by sinister and selfish motives. That is human nature. Our country was born in the midst of party strife. I believe in party battles, in battles royal, in which both political parties contend earnestly, honestly, and fairly for the triumph of the principles for which they stand; but I am against blocs and classes and factions and groups, because in the end they will destroy parties, and when parties are destroyed there is laid the foundation for the destruction of our form of government. In France, when Briand came here filled with high hopes to do something, he was pounded by the blocs and the groups at home, and now when Barthou is in Genoa trying, with Lloyd-George and other statesmen, to do something for Europe and for the world, the blocs and the groups at home are tying his hands and striking into his back and preventing the consummation of his beneficent purposes. I have no sympathy, I will say to my friend from Oregon, with blocs in any party. I denounce them. I am looking to see if any Democrats here—and there are some who belong to the agricultural bloc—intend in any way to cooperate in this matter. I oppose blocs, and I criticize Democrats—I do not care who they are—as I criticize Republicans, who belong to blocs. I do not know blocs, Mr. President, except for the purpose of condemning them. I am a Democrat—and not a tariff-bloc man or an agricultural-bloc man or a manufacturing-bloc man or any other kind of a bloc man. I think the formation of blocs is a mistake.

The agricultural bloc weakens both parties and the tariff bloc weakens both parties, and when they strike at the integrity of party organizations they are indirectly striking at our form of government. If when it is in power the Republican Party, with its statesmanship and the hundreds and thousands of good men in that party, can not carry out the purposes of the Government or of the people, then elect the Democratic Party; and if they fail in their high mission, then elect the Republican Party or some other great party competent to deal with the problems of the hour, but do not weaken your own parties, do not destroy your own political organizations in order to get some particular scheme or some particular legislation through the Congress. I should not like to see the kind of Christianity that believes in little groups and little blocs. A bloc Christian! No, Mr. President, we are Christians, but not bloc Christians, not group Christians. We believe in the great Founder of the faith, and we seek to execute His divine purposes on the earth.

Mr. WALSH of Massachusetts. Mr. President——

The PRESIDING OFFICER. Does the Senator from Utah yield to the Senator from Massachusetts?

Mr. KING. I yield.

Mr. WALSH of Massachusetts. Of course the Senator will agree that the existence of blocs in a political party is in itself indicative of distrust of the leadership of that party. It is a method taken by a group within the party to exact what they think is justly due them by the use of a club.

Mr. KING. That may be, Mr. President, but I do not justify the use of such clubs.

Mr. WALSH of Massachusetts. Of course the Senator knows that I do not believe in or justify blocs, either, but the very existence of them is indicative of distrust of party leadership and a belief by a certain group in a political party that they can not, through the party organization, obtain that relief or selfish interest to which they think they are entitled without an implied threat of insurrection unless their demands are satisfied.

Mr. KING. I think that is true. So we have a tariff bloc led by the junior Senator from Idaho [Mr. GOODING]. Here is the Senator from North Dakota [Mr. MCCUMBER] and my distinguished colleague [Mr. SMOOT], men of ability, who have given years of thought to the tariff, and other men on the Finance Committee who have studied the question. I would rather follow them if I were a Republican than follow any bloc. I would confer with them, and if I thought they were wrong I would go to them and attempt to convince them of their error. If they refused to admit the error I would vote against them, but I would not form a bloc for the purpose of disrupting and destroying them.

Mr. WATSON of Georgia. Mr. President——

The PRESIDING OFFICER. Does the Senator from Utah yield to the Senator from Georgia?

Mr. KING. I yield to my friend from Georgia.

Mr. WATSON of Georgia. It has been repeatedly stated here in the debate that it was the purpose of this tariff bill to give a reasonable profit to manufacturers. I should like some Senator on the other side to tell me where they get the constitutional authority to legislate a profit into anybody's business. I hope the Senator will address himself to that question. The very first time that statement was put forward was by Mr. Taft in his second race for the Presidency. He said that the tariff was intended to give the American manufacturer a reasonable profit. Since that time it has gone into Republican literature as a fixture, and it has been stated here in the Senate as a matter of fact and a matter of course. I should like to know where we get authority to legislate a profit into the business of the manufacturer any more than we do into the business of the farmer.

Mr. KING. Mr. President, the question asked by my friend from Georgia strikes at the very root of this question and involves, indeed, the very root of government.

Mr. WATSON of Georgia. Mr. President, will the Senator allow me to interrupt him further?

Mr. KING. I yield.

Mr. WATSON of Georgia. I believe that any American taxpayer could get out an injunction and stop the operation of this proposed law, in view of the fact that it has been stated here officially during the debate that the purpose of it is not to raise revenue but to put a profit into private business.

Mr. KING. Mr. President, I wish the Supreme Court would take the view which the Senator from Georgia takes. I remember the oleomargarine law and other legislation the constitutionality of which has been affirmed, as I recall, by the Supreme Court of the United States. The oleomargarine law was clearly an abuse of the taxing power, and much of our tariff legislation is an abuse and prostitution of the taxing power. I can not say that I agree with my friend from Georgia because I think the court will not agree with him, but I think the court ought to agree with him, and I agree with the views which are implied and expressed in the question and statement made by my distinguished friend.

What is the power of taxation? We are all familiar, of course, with the language of Chief Justice Marshall. The power of taxation is the power to destroy. When we formed the Constitution of the United States and committed to the Federal Government certain powers, and gave it the right to tax for certain purposes, was it believed that there was no restriction or limit whatever upon the taxing power? Why, Mr. President, if any man had stood up in the Constitutional Convention and affirmed that, there would have been no Constitution formed, and there would have been none ratified. The fathers of this Republic, the men who lived in the 13 independent nations, never would have joined in the formation of this Government if it had been understood that they were committing to the Government unrestricted power to tax for any and all purposes which imperialists or favorites or predatory interests conceived to be for their good.

Mr. WATSON of Georgia. Mr. President——

The PRESIDING OFFICER. Does the Senator from Utah yield to the Senator from Georgia?

Mr. KING. I yield further for a question.

Mr. WATSON of Georgia. The Senator from Utah well knows that when J. P. Morgan organized the Steel Trust he issued, in addition to the bonds and the preferred stock, an enormous amount—$500,000,000, as I remember—of steel common, which represented no investment whatever. It was mere water, mere paper. During the St. Louis Exposition I remember that a gentleman who owned some of that stock was told that it had sunk to $15 a share. He did not seem to be disturbed by it. He said, "That will all come right." That stock is now selling at par. In other words, these tariffs in favor of the Steel Trust have put dollar for dollar into steel common, where not a cent was ever invested.

Mr. KING. Mr. President, the observation of the Senator from Georgia demonstrates the fact that many of these tariff bills are drawn for the purpose of putting money into the pockets of certain interests. Is it right to use the taxing power of the Federal Government—if I may elaborate very briefly the thought of my good friend from Georgia—when that power was restricted and is restricted in the Constitution for the purpose of enriching any particular class? The power of taxation ought to be as sacredly guarded as we guard our honor or the most treasured things of life. The greatest struggles in the past have been over the exercise of the taxing power. Our liberties, won by our fathers at Lexington and Bunker Hill, and in the South by the gallant soldiers and leaders there, grew out of the abuse of the taxing power by Great Britain. We insisted that there should be no taxation without representation. We insisted that they should not impose a tea tax and other taxes upon the American people; that we were entitled to all the rights of Britishers; that there could be no discrimination against the people living under the British flag upon this continent.

Mr. WATSON of Georgia. Mr. President——

Mr. KING. I yield.

Mr. WATSON of Georgia. Some years ago I spent months studying the statistical reports as to the profits of manufacturers and the profits of farmers; and I found, as a result of that research, that the Steel Trust alone made more profits every year than all the farmers of America had made in any year since the foundation of this Government.

Mr. KING. Mr. President, there are a good many Democrats who forget that our Government is one of enumerated and limited powers, and they ascribe to the Federal Government the same powers that are exercised by the Government of Great Britain or France or some other nation that does not exist in virtue of delegated authority. The States were sovereign, and the United States became their agent, and they delegated what they pleased to the Federal Government and reserved the residue of the powers which belonged to the individuals or to the States to the individuals or to the States, respectively. Our Republican friends now say, however, that when the people formed a corporation, and put a certain amount of their property into the corporation, and limited the powers of the corporation, and defined its authority with the most meticulous care, the corporation—to wit, the Federal Government—became omnipotent, and can drag the people in, and can drag all the rest of their property in, and assert all power and all authority which belongs to the people or to the States; and there are Democrats in various parts of the country who are lending themselves to that heresy and drifting into this latitudinarian construction of the Constitution of the United States, and declaring the Constitution to be a mere rope of sand, and that the Federal Government is supreme in all things, and the States mere lifeless, flaccid organizations.

I am a Democrat. I believe in the rights of the States and the rights of the people, and in putting hooks into the jaws of the Federal Government, so that it may not transgress its authority, impinge upon the rights of the States, and lay its unrestrained and heavy hand upon individuals to destroy their liberties and their rights.

Mr. WALSH of Massachusetts. Mr. President——

The PRESIDING OFFICER. Does the Senator from Utah yield to the Senator from Massachusetts?

Mr. KING. I yield.

Mr. WALSH of Massachusetts. I hope the Senator from Utah will not allow the question directed to him by the Senator from Connecticut [Mr. MCLEAN] some time ago to go without being very fully answered. He has already very ably answered it in part. The Senator's question was, in substance, to the effect that there are divergent opinions upon the tariff on the Democratic side of this Chamber, and that Senators upon the other side would like to know what the different opinions of different members of the Democratic Party are.

I think it ought to be made clear and stated emphatically to the Senator from Connecticut that it makes no difference what views individuals in either party have on the tariff question, because there is no question of free trade in this bill;

there is no question of tariff for revenue in this bill; there is no question of protecting American industries because of difference in cost of production at home and abroad in this bill; there is involved in this pending bill simply the question of granting protection to certain monopolies that control the production and prices of those commodities that the people consume; and, further, most important of all, this bill raises for the first time in America the bold proposition of protecting profits.

Mr. KING. Mr. President, the Senator from Massachusetts has stated the issue in a very succinct way. In my opening speech a few days ago I tried to state the issue. I adopt the very fine phraseology of my good friend. This is not a question of free trade or protection at all.

Mr. WALSH of Massachusetts. Or of cost of production.

Mr. KING. Or of cost of production, or price of labor, or anything of that nature. The question here is simply this: Shall we let the barons and the robbers and the trusts and the corporations have unrestricted power to continue exploiting and robbing, as many of them did during the war, and to increase their power for exploiting, the American people?

I was diverted from this editorial in the Boston Transcript. Of course the Boston Transcript was not referring to the leader of the Republican Party in the Senate, the Senator from Massachusetts [Mr. LODGE]; but let me read that sentence again, because it is pregnant with meaning. This is a New England paper. The Senator from Massachusetts is a candidate for reelection to the Senate.

Mr. WALSH of Massachusetts. And it is supporting him.

Mr. KING. And this paper is supporting him, the junior Senator from Massachusetts advises me. This paper says:

> Party guidance is thrown to the winds.

Where is the party guidance on the other side? Is it exercised by the junior Senator from Idaho [Mr. GOODING], the head of the tariff bloc? Is it exercised by the Senator from Kansas [Mr. CAPPER], the head of the agricultural bloc? Is it exercised by the Senator from Oregon [Mr. MCNARY], an able lieutenant of the agricultural bloc? Is it exercised by the Senator from North Dakota [Mr. MCCUMBER]? Where is the leadership? Party guidance, I repeat, is thrown to the winds.

But, Mr. President, we do not need, apparently, any party guidance. They interlock together. No matter what these schedules may be, no matter whether one of them is 600 per cent higher than the Payne-Aldrich bill, no matter if it gives a complete monopoly, no matter if it creates embargoes and turns over to the Du Ponts and the dye monopoly the control of the dyestuffs industries that they may exploit and rob the people, no matter what it is, they start in:

The Senator from Delaware [Mr. BALL], "Aye."
The Senator from Kansas [Mr. CAPPER], "Aye."
The Senator from New Mexico [Mr. BURSUM], "Aye."
And so on, down the list:
The Senator from Massachusetts [Mr. LODGE], "Aye."
The Senator from North Dakota [Mr. MCCUMBER], "Aye."
The Senator from Indiana [Mr. WATSON], "Aye."

And so it goes, down the list, all united as a solid phalanx. They do not need any leadership, Mr. President. Why have leaders when you are bound and locked together in chains of steel? Do not spell it wrongly—s-t-e-e-l, not s-t-e-a-l.

Mr. WATSON of Georgia. The terms are synonymous when it comes to a tariff bill.

Mr. KING. I go on with this interesting editorial:

> This is undoubtedly due to the prevalent chaotic condition, not only of conditions and of interests, but of views.

The chaotic conditions of interests and of views are all dissipated; there comes the most perfect and beautiful solidarity when it comes to voting. No matter what the views are, when the votes are counted they are all there in a solid phalanx.

> There may be some consolation in the fact that it will take a long time to straighten out this chaos of views and that the delay will give an opportunity to get rid of some of the injustices involved in the Senate bill.

I commend that statement to the Senator from Indiana [Mr. WATSON], who has been so impatient at any discussion of this bill. Here is a fine Republican newspaper, one of the ablest in the United States, an ardent champion of the distinguished senior Senator from Massachusetts [Mr. LODGE], pleading for delay that we may straighten out our views. I say, straighten out your views, my Republican brethren, but be sure to straighten them out right.

This Republican newspaper says your views are wrong as they find expression in this tariff bill; so straighten them out. We are going to help you. We are going to debate this bill, hoping that reason may reassert itself upon the other side of the Chamber, and that the good conscience, the honest judgment of honest Republicans—and they are honest on the other side, as we are—will assert itself, and that they will vote against these schedules, and say to the trusts who are here in the Capitol now by their representatives, who are in Washington here by their representatives and their attorneys and their agents, "Go home. Cease your importunities. We are going to write a decent, an honest, and a fair tariff bill, not one the schedules of which are dictated by you."

> But in the meantime the manufacturers of the country are carrying all or most of the expenses involved by the war without the market which the war created, and are consequently pretty nearly paralyzed. In this situation they are to some extent prepared to regard strikes as a blessing and are content to let the tariff repose on the switch.

May I inquire of the distinguished Senator from Ohio if the Columbus Ohio State Journal is not a Republican paper?

I will not read from it, then. This is criticism of the Republican Party, and let us have criticisms from Republicans today. I read from the Business Farmer, of Mount Clemens, an agricultural paper, which is not very enthusiastic about this bill.

The Literary Digest says, speaking of the bill:

> The Business Farmer, of Mount Clemens, characterizes it as "a very acceptable gift horse for the farmers, provided they do not look into its mouth."

The Business Farmer said:

> A casual examination and comparison with former tariff measures would lead agriculture to believe that its long-cherished dreams had come true and that it is at last to sit in the front pew of the world's protected markets. But a closer inspection dispels some of these fond illusions. Nearly all the agricultural items are in terms of specific duties. Reduced to an ad valorem basis at current valuations and compared with the ad valorem rates on commodities of which the farmer is a large purchaser, we find that the agricultural schedules are actually among the lowest on the list, amounting in few, if any, cases to more than 30 per cent. Of what benefit to the farmer is a 25 per cent duty on a world grain like wheat, of which we produce a large surplus, when he must turn right around and pay a 40 to 80 per cent duty on the majority of things he buys?

I wonder if the agricultural bloc thinks of that? I continue reading:

> The value to the farmer of a tariff on corn and oats is negligible. The duties on dairy products are badly needed and none too high. The duty on sugar is an affront to every American consumer. Michigan is an important sugar-beet growing State, but only 10,000 of her 200,000 farmers grow beets.

The senior Senator from Michigan [Mr. TOWNSEND], who is a candidate for reelection, should take notice of this observation—

> But three and a half million Michigan people are asked to add several million dollars to their sugar bill for the direct benefit of a few hundred sugar-mill stockholders and the very small indirect benefit of the handful of beet growers.

Let me read a few statements from some independent newspapers, Mr. President. Take the St. Paul Dispatch. It ridicules the idea that it can "work the miracle of protecting industry and agriculture alike—a patent impossibility unless the fundamental laws of economics are repealed at the same time." I read from the Literary Digest:

> But, assuming that both the farmer and the manufacturer are to be protected, adds this Minnesota journal, "what of the great unregarded masses of consumers?" This bill, says the New York Herald, an independent newspaper with marked Republican leanings, "completely shuts America out of foreign markets, except in our raw materials, notably cotton and copper."

If this independent Republican newspaper is correct, if these predictions are to be verified, obviously this bill is a menace to the peace and prosperity of the United States, because our prosperity is dependent very largely upon our exports; and if we are shut off, or shut out, from the markets of the world, as this paper says this bill will shut us out, then, of course, our prosperity will be postponed, and perhaps never arrive.

The New York Evening Post says this bill "will make trouble for the consumer." The New York Globe says "we practically make Europe a present of the $11,000,000,000 she owes us." For—

> She can't pay in gold, and we wouldn't let her if she could, for it would be ruinous to us to receive it. She can only pay in goods, and against those goods we now propose to erect impossible tariff barriers.

The Kansas City Star declares the bill "is a serious economic mistake," the immediate effect of which will be to increase the cost of living. The farmer, it adds, will find that the protection offered his products "is an illusion," while "the protection on what he has to buy will be real."

The Springfield Republican says the bill "is open to severe attack by those who believe that the price of commodities should not be raised." The Senate "should modify it with a

liberal hand, in obedience to the logic of the world situation and of the just claims of the American consuming public."

That is the language of the Chicago Daily News. The Indianapolis News, speaking of the bill, says:

It represents an outrageous abuse of the taxing power.

Mr. President, it is not only an abuse of the taxing power, but, as indicated by the Senator from Georgia, it is a complete prostitution of it. It enacts a law which, measured by the powers of the Federal Government, is unconstitutional, and should be so declared by the Supreme Court of the United States. However, I have no doubt but that the Supreme Court of the United States would probably support any law which taxes the people for any purpose, no matter how illegitimate or how remote the purpose was from the object for which the Federal Government was established.

Mr. LODGE. Mr. President——

The PRESIDING OFFICER (Mr. WILLIS in the chair). Does the Senator from Utah yield to the Senator from Massachusetts?

Mr. KING. I yield.

Mr. LODGE. If the Senator will permit me just a moment to correct, not a statement of his but a statement of my friend, the Senator from Georgia [Mr. WATSON], whom I see on the floor now, I would appreciate it. The Senator from Georgia made a little error, and I may say he is in excellent company in making the error, for I heard it made here in the debate on the McKinley bill, and I have been through the framing of eight tariffs. He spoke of the famous description in Dickens's Notes, often cited, especially the part about the factory girls at Lowell, to which he did not refer. He spoke of it in connection with the Walker tariff.

The American Notes were written in 1842. Mr. Walker came into the Treasury in 1845, and the Walker tariff was made law in 1846, four years after the Notes were written. At the time when Mr. Dickens wrote the American Notes, I am sorry to say, we were under the Whig protective tariff of 1842.

Mr. WATSON of Georgia. Mr. President, perhaps I should have said a low tariff, instead of the Walker tariff. The Walker tariff, the Senator remembers, was very low as compared with this and as compared with the Payne-Aldrich law.

Mr. LODGE. My point is that it was not under the Robert J. Walker tariff.

Mr. WATSON of Georgia. Perhaps I was mistaken as to that. We all make such little mistakes occasionally, and I am glad to have my attention called to this one.

Mr. LODGE. We all make mistakes. That same mistake was made by Mr. Wilson, of West Virginia, in a debate, where I had the pleasure of calling his attention to it.

Mr. WATSON of Georgia. I am glad to be in company with William L. Wilson, because a finer man never came here from the South.

Mr. LODGE. He was a very fine man.

Mr. WATSON of Georgia. The point of my remark was that at that time we had no poor, but that Europe had her poor.

Mr. LODGE. That is quite true.

Mr. WATSON of Georgia. That is the main point.

Mr. LODGE. I do not think that had anything to do with the tariff.

Mr. WATSON of Georgia. As to whether it did or not is a question which we might debate here for the balance of the session.

Mr. LODGE. The tariff of 1828, which was some time before Dickens's Notes were written, was called the "tariff of abomination."

Mr. WATSON of Georgia. Yes, Mr. President; and that tariff does not compare with this tariff, or with the McKinley law or the Payne-Aldrich law.

Mr. LODGE. I think pauperism such as exists comes from very much deeper causes.

Mr. WATSON of Georgia. I remind the Senator, and he will no doubt agree, that Hugh Legaré, of South Carolina, the greatest scholar who ever came here from the other side of the Mason and Dixon line, stated as a truism that this country had no poor and no problem of pauperism.

Mr. LODGE. That is quite true. If the Senator from Utah has concluded, I simply desire to ask to have printed at this point a comparison of the wages and hours in the cotton-goods manufacturing industry of South Carolina and of Massachusetts, which I think have more spindles in that industry than any other two States. I also desire to have printed a table of comparative wages and hours in all the States. I think they deserve consideration when the Senator from Utah makes another speech about wages and hours.

There being no objection, the tables were ordered to be printed in the RECORD, as follows:

TABLE I.—*Cotton-goods manufacturing wages and hours, by selected occupations, for Massachusetts and South Carolina, 1920.*[1]

Occupation.	Work.[2]	Massachusetts.			South Carolina.		
		Number of employees.	Hours per week.	Wages per hour.	Number of employees.	Hours per week.	Wages per hour.
Picker tenders, male	Time	207	48.0	$0.511	115	55.0	$0.373
Card tenders and strippers, male	...do	219	48.6	.588	146	55.0	.412
Card grinders, male	...do	87	48.5	.637	59	55.1	.574
Drawing-frame tenders, male	...do	94	51.7	.521	123	54.8	.394
Drawing-frame tenders, female	...do	271	47.9	.406	4	55.0	.349
Slubber tenders, male	Piece	124	48.0	.663	117	55.0	.509
Speeder tenders, male	...do	179	49.5	.678	390	54.9	.501
Speeder tenders, female	...do	1,004	48.0	.515	171	54.8	.440
Spinners, frame, male	Time	95	49.9	.605	108	51.5	.313
Spinners, frame, female	...do	1,642	47.9	.506	1,004	54.0	.391
Doffers, male	...do	361	47.7	.506	575	54.3	.449
Spool tenders, female	Piece	721	48.0	.474	488	54.2	.357
Creelers or tiers-in, female	Time	107	47.8	.372	23	55.0	.343
Warp tenders, female	Piece	111	48.0	.512	32	55.0	.445
Slasher tenders, male	Time	133	48.0	.706	80	55.0	.442
Drawers-in, female	Piece	210	47.9	.530	37	54.5	.438
Warp-tying machine tenders, male	Time	27	48.0	.652	30	55.0	.550
Loom fixers, male	...do	611	48.0	.790	380	55.9	.596
Weavers, male	Piece	1,719	48.0	.598	917	55.0	.532
Weavers, female	...do	3,022	48.0	.548	500	54.3	.468
Trimmers or inspectors, female	Time	257	47.8	.368	155	54.8	.311

[1] Compiled from Table A—wages and hours of labor in cotton-goods manufacturing, 1920, Bureau of Labor Statistics, September, 1921.
[2] Where both piecework and time-work wages are reported, the one that affords comparison or the more extensive comparison is given.

TABLE II.—*Cotton-goods manufacturing wages and hours for spinners, frame, female, by States, 1920.*[1]

State.	Work.[2]	Number of mills.	Number of employees.	Hours per week.	Wages per hour.	Weekly earnings.
Alabama	Time	6	508	57.5	$0.293	$16.85
Connecticut	...do	2	122	48.0	.459	22.03
Georgia	...do	9	602	53.9	.351	19.08
Maine	...do	3	219	54.0	.475	25.65
Massachusetts	...do	16	1,642	47.9	.506	24.24

[1] Compiled from Table A—Wages and hours of labor in cotton-goods manufacturing, 1920. Bureau of Labor Statistics, September, 1921.
[2] Where both piecework and time-work wages are reported the one that affords comparison or the more extensive comparison is given.

Mr. WATSON of Georgia subsequently said: The Senator from Massachusetts [Mr. LODGE] made a statement in reference to what Charles Dickens had written in regard to the general prosperity of our people during the time of his first visit here. The Senator from Massachusetts quoted the remark as coming from the "American Notes" of Dickens. The statement is not in the "American Notes" at all, but the Senator from Massachusetts is generally so accurate that for a moment I thought, perhaps, I had erred instead of himself.

I said, as the Senate will remember, that the statement occurred in one of Mr. Dickens' letters home. It is a letter to John Forster, his friend and subsequently his biographer. This statement was made by Dickens in his private letter to his friend in London, while the Henry Clay tariff, as I remember, was in force. Now, to show what fruit that tree bore, as compared with what it is bearing now, I will, with the permission of the Senate, read that part of Mr. Dickens' letter to his friend.

Mr. SMOOT. Will the Senator give the date of the letter?

Mr. WATSON of Georgia. Yes, Mr. President; it was in 1842.

Mr. SMOOT. That is right.

Mr. WATSON of Georgia. It occurs on page 95, of Gissing's Abridgement of Forster's Life of Dickens: Dickens is writing from Boston.

> There is no man in this town, or in this State of New England, who has not a blazing fire and a meat dinner every day of his life. A flaming sword in the air would not attract so much attention as a beggar in the streets. There are no charity uniforms, no wearisome repetition of the same dull, ugly dress in that blind school. All are attired after their own tastes, and every boy or girl has his or her individuality as distinct and unimpaired as you would find it in their own homes.

The rest of the letter is irrelevant. I merely quote that to show that Charles Dickens was amazed at the contrast between the general welfare of the people of Boston and New England, and that of the people of the Old World.

Mr. SMOOT. When the Senator made that statement I understood that he made it based upon something that was said by my colleague in relation to the Walker tariff.

Mr. WATSON of Georgia. To that extent I was in error, and I corrected it.

Mr. SMOOT. The Walker tariff was not passed until 1846.

Mr. WATSON of Georgia. I am aware of that.

Mr. SMOOT. That was the only object the Senator from Massachusetts had in mentioning what he did.

Mr. WATSON of Georgia. The Henry Clay tariff was a tariff on only a few articles as compared with this, which taxes nearly 4,000, and the general rate of duty was somewhere between 20 and 30 per cent on those few articles.

Mr. SHORTRIDGE. Does not every history and every textbook in the public schools tell us that the panic of 1837 was the result of the low tariff or compromise bill of 1833, and was not Martin Van Buren defeated for reelection because of the panic caused by the Democratic tariff?

Mr. WATSON of Georgia. Mr. President, that is not my understanding of it at all. The panic was precipitated because President Jackson issued what was called the "Specie Circular," requiring that payments for public land be made in gold or silver. He outlawed paper money, just as the present Federal Reserve Board has done. The New York banks called in their loans. This calling in of the loans concentrated the money in New York. The country districts of the South and West were stripped of coin, stripped of currency. It was Andrew Jackson's specie circular demanding gold payment that caused the panic.

Mr. ASHURST. Mr. President, I have no disposition at this time, or at any other time, to enter the lists against the doughty junior Senator from Utah [Mr. KING]. His discussions of the tariff bill have disclosed a sweep of intellect and a wealth of information pleasing to his friends and gratifying to his party associates. I have not had an opportunity to review the stenographic report of his remarks, but he seems to criticize the agricultural bloc.

Mr. WALSH of Massachusetts. Mr. President, I realize that the Senator was absent during the speech of the Senator from Utah; but the gist of his reference to the agricultural bloc was that there were groups in party organizations existing for selfish purposes; that blocs in political parties were productive of distrust of party organization; that the security of our institutions depends upon party organization and not class or bloc groups; that blocs tried to get legislative results through force, the power of numbers, rather than through argumentative persuasion.

Mr. ASHURST. I will briefly relate the manner in which the meetings of the bloc take place: I will select the time, last evening; the place, the committee room of the Committee on Agriculture, in the Senate Office Building. The doors unlocked, the doors were flung wide open—any citizen at liberty to come in and take a seat and hear every word said.

Mr. WALSH of Massachusetts. Were there any outsiders present?

Mr. ASHURST. There were a number of outsiders present; that is, persons not members of the Senate. The bloc meeting was called regularly. Every Member was given a notice of the meeting. The meeting was presided over by the junior Senator from Kansas [Mr. CAPPER]. The Senators present are as capable and as diligent as any other group of Senators of like number that may be made up.

There were present the presiding officer [Mr. CAPPER], the Senator from Wisconsin [Mr. LENROOT], the Senator from Washington [Mr. JONES], the Senator from New Mexico [Mr. JONES], the Senator from Wyoming [Mr. KENDRICK], the Senator from South Dakota [Mr. NORBECK], the Senator from North Carolina [Mr. SIMMONS], the Senator from South Dakota [Mr. STERLING], the Senator from Idaho [Mr. GOODING], the Senator from Oklahoma [Mr. HARRELD], the Senator from Texas [Mr. SHEPPARD], the Senator from Florida [Mr. FLETCHER], the Senator from Georgia [Mr. HARRIS], the Senator from South Carolina [Mr. DIAL], the Senator from Mississippi [Mr. HARRISON], the Senator from North Dakota [Mr. LADD], the Senator from Oregon [Mr. MCNARY], the Senator from Virginia [Mr. SWANSON], the Senator from New Mexico [Mr. BURSUM], and myself. There may have been others—yes, the Senator from Alabama [Mr. HEFLIN].

Mr. HEFLIN. I was not present; but I would have been present except for a previous engagement.

Mr. ASHURST. The Senator's zeal and interest in behalf of agriculture is at all times manifest.

The bills to be discussed were distributed to the Senators present and to those present who were not Senators. There was also present Mr. Eugene Meyer, managing director of the War Finance Corporation, and there were present upward of a dozen representatives of farm organizations. The bill proposed by the Senator from North Carolina [Mr. SIMMONS] was discussed, he outlining the purpose and scope of his bill, which is to extend long-time credits to farmers and live-stock growers.

Then the Senator from Wisconsin [Mr. LENROOT] discussed his bill, giving in a brief manner the purpose and scope of the bill. Then the Senator from South Dakota [Mr. NORBECK] discussed his bill, giving its outlines. A general discussion was then entered upon.

At all times the main subject was kept in view. No one went off on an unreturning parabola. Every man spoke to the point, not a word was wasted. There were no periphrases, no circumlocution; no "house-that-Jack-built" methods of discussion were employed. Concrete, coherent, succinct discussion was had from the time the chairman called the meeting to order until we dispersed. While no particular bill was agreed upon—it was thought that there should be a more complete reading of all the bills—and while all the Senators who spoke said they had no pride of expression, no pride of authorship, they would be glad to meet on common ground and draw a bill that would extend long-time credits to farmers.

The War Finance Corporation is an emergency energy. Surely in the United States we need not be told, because we must know, that agriculture, being the basis of all the industries, must in the very nature of things have a "square deal" and that it is no small task to write a bill which will afford the farmer, the agriculturist, the live-stock man, and especially the tenant farmer, an opportunity to obtain the appropriate credits.

I know of a State where there are 600,000 tenant farmers. The rural credit law performs a necessary and useful function; the War Finance Corporation performs a necessary and useful function, but the tenant farmer must obtain personal credit. Character is the basis of credit. The tenant farmer has character. The tenant farmer has industry.

I shall not enter into any extended eulogy of the farm bloc. I ask that the Senators consider what the agricultural bloc has done. I shall not ask that the agricultural bloc be measured by the greatness of things said or of things written, but I ask that its efficiency and its purposes be measured by the greatness of things done.

Last Saturday the Senate agreed to a conference report presented by the Senator from Oregon [Mr. MCNARY]. In that report there was a provision that lands under Federal irrigation projects shall be eligible for Federal farm loans. I ask Senators to consider what that means. It means that heretofore farmers under Federal irrigation projects could not obtain loans from the Federal Government, whilst those outside of Federal irrigation projects could obtain such loans. This amendment was proposed in the Senate a month ago by the Senator from Idaho [Mr. BORAH]. The conference report was

agreed to by the Senate on Saturday last and was agreed to by the House yesterday.

The agricultural bloc was directly responsible for that amendment in the Senate and for its galvanization into the law of the country. If the agricultural bloc had never done aught else but had simply whipped that legislation through, and then dissolved, it would have justified its existence. Senators who rise here to denounce the agricultural bloc, and the journals which denounce the agricultural bloc, may just as well relieve themselves, because the bloc, in spite of all the flailings of words that are going to come upon it, is continuing its work in trying to secure justice for the farmer.

Mr. WALSH of Massachusetts. Mr. President——

Mr. ASHURST. I yield to the Senator from Massachusetts.

Mr. WALSH of Massachusetts. The Senator from Utah [Mr. KING] referred this morning to a tariff bloc, intimating that inside of the agricultural bloc there is a tariff bloc. Can the Senator from Arizona enlighten us as to the existence of such a bloc? It is the first time I had heard a tariff bloc referred to.

Mr. ASHURST. The agricultural bloc is bipartisan, being composed of Democrats and Republicans. Our former colleague, Mr. Kenyon, was chairman and upon his resignation from the Senate the junior Senator from Kansas [Mr. CAPPER] was unanimously chosen for chairman.

I believe I will assume the responsibility of speaking for the Democratic members of the agricultural bloc on the tariff question. That is assuming quite a responsibility, especially as I am an humble Member of the Senate. My State is interested in agriculture, but it does not rise to importance in agriculture like the great agricultural States of Iowa or Texas.

In my judgment the views of the Democratic members of the agricultural bloc respecting the tariff are as follows. Tariffs may be good; they may be bad. As to that we will not discuss. But I do say that if the country is going to have a high tariff, by what reason in morals, by what reason in fair dealing, in law and policy, can you put a tariff upon the products of the factory and refuse to put a tariff upon the products of the field, the farm, and the ranch? The agricultural bloc says that if a tariff upon shoes be proper then a tariff upon the hide which the farmer removes from his bovine is proper.

Mr. STANLEY. Mr. President, will the Senator yield to me?

Mr. ASHURST. I yield.

Mr. STANLEY. Do I understand the Senator from Arizona to say that the agricultural bloc is obligated in some way to vote, for instance, for a duty upon hides without regard to the action of either Republican or Democratic organizations on that subject? For instance, suppose there were a duty upon leather or shoes, and the Democrats should hold a caucus and declare in favor of free hides, what would be the allegiance of a loyal member of that bloc with a caucus of his party acting one way and the bloc acting another way?

Mr. ASHURST. My learned friend must have misunderstood what I said or, following my usual custom, I have been cloudy in my statements. I am volunteering to give what I "guess" or think are the views of the agricultural bloc. I may be doing something improper to assume to give the views of other men, but I think I know the working of their fair minds well enough to say what I think they think. I do not recall that in the meetings of the agricultural bloc the tariff question was ever discussed.

Mr. STANLEY. I am not inferentially criticizing the conduct of the agricultural bloc one way or another. I simply wanted to get the attitude of the bloc on the tariff question.

Mr. ASHURST. I can not give it except to assume to say what I believe they think.

Mr. STANLEY. I understood the Senator to say that they were in favor of duties upon agricultural products.

Mr. ASHURST. I repeat that so far as I know the bipartisan agricultural bloc has never discussed the tariff question; in other words, you can not fool the farmer any more on the tariff question. The representatives of the farmers' organizations would not, in my opinion, listen with any degree of patience if any body began to expatiate about the tariff. Since the beginning of the Government a tariff has been a device to assist and promote the interest of the manufacturers and it has militated against the farmer. So the agricultural bloc has not been very enthusiastic about a tariff according to the old plan.

What I tried to say was that in my judgment the views of the Democratic members of the agricultural bloc on the tariff question were as follows: If it be right, if it be moral and proper, to lay a tariff upon the manufactured article—for instance, shoes—by what right in morals, in politics, or in Government do you refuse to put a tariff on hides, the farmers' product? That is the question I asked. I did not say it was right to do either; but I should like to have some Senator—or, indeed, anybody here or elsewhere—tell me that he believes it is right to lay a tariff on shoes and that it is wrong to put a tariff on hides.

Mr. WALSH of Massachusetts rose.

Mr. ASHURST. Is the Senator from Massachusetts going to attempt to answer the question?

Mr. WALSH of Massachusetts. I am merely going to say to the Senator from Arizona that the boot and shoe manufacturers of this country have petitioned Congress not to put any protective duty on boots and shoes or on hides and leather.

Mr. ASHURST. If I understand the Senator from Massachusetts, he says that the manufacturers of boots and shoes want boots and shoes placed on the free list?

Mr. WALSH of Massachusetts. Absolutely; and they also desire to have hides and leather free of duty.

Mr. ASHURST. Very well. If the manufacturers are in earnest to have boots and shoes placed on the free list you will not hear any farmer complaining when hides are also put on the free list.

Mr. WALSH of Massachusetts. But the Finance Committee have reported a bill providing for a duty upon hides and leather and a compensatory and protective duty upon boots and shoes, notwithstanding the fact that the boot and shoe manufacturers do not want any such protection. In a referendum vote by the boot and shoe manufacturers of this country they requested that no duty be put upon either leather and hides or boots and shoes. The Finance Committee evidently is bound to give protection, even where it is not wanted.

Mr. ASHURST. Very well.

Mr. STANLEY. Mr. President——

The PRESIDING OFFICER. Does the Senator from Arizona yield to the Senator from Kentucky?

Mr. ASHURST. I do not want to lose the floor.

Mr. STANLEY. I do not presume the Senator will lose the floor merely by yielding for a question. The question I shall ask is a simple question and is asked merely for the purpose of obtaining information—not for the purpose of condemning the attitude of the agricultural bloc one way or the other. I was simply curious to ascertain whether this organization of patriotic and eminent Senators, in the most laudable of endeavors to help a basic industry such as agriculture, are committed to a policy of placing a duty upon agricultural products in the event there is a duty placed upon the finished fabrics of agriculture, without regard to the action of the duly constituted political organizations on either side of the Chamber?

Mr. ASHURST. The agricultural bloc is not going to pay much attention to dictates whether from caucuses or Executives. The agricultural bloc is going to pass by as the idle wind which it regards not any dictation from any source. If the white-collared gentlemen in the cities desire to be fed, they must no longer crush out the farmer, who is trying to feed them. If the gentlemen of the cities desire fresh supplies of milk each morning, they ought to have comprehension enough not to crush the dairyman. If they desire food and clothing, they are not going to be so shortsighted as to continue to have laws operate unjustly against the basic industry of agriculture, in which 40,000,000 people are engaged; indeed, in which the multitudes of the earth are engaged.

I have already mentioned the fact that the agricultural bloc has driven through this Congress a law making lands under Federal irrigation projects eligible for Federal farm loans. How can the injustices that have existed so long be defended? Here is a farm which is owned by A; it is outside of a Federal irrigation project; it is eligible for a loan from the Federal Government. Ten feet across the line is the farm of B; he is within a Federal irrigation project, but the lands of the one in the irrigation project are not eligible for a Federal loan. The farm bloc has secured the passage through both Houses of Congress of a bill which provides that land in Federal irrigation projects shall be eligible for loans.

The ship subsidy bill was to be brought in here providing for loans at 2 per cent interest to those engaged in the shipping industry. Is any farmer going to get money for 2 per cent? The agricultural bloc would have been annihilated had we presumed to bring in a bill proposing to lend to the farmers money at 2 per cent a year. Money at the rate of 2 per cent seems to be for men who are looking for subsidies. Two per cent money does not seem to be for farmers.

Mr. WATSON of Indiana. Will it embarrass my friend from Arizona if I ask him a question?

The PRESIDING OFFICER. Does the Senator from Arizona yield to the Senator from Indiana?

Mr. ASHURST. Mr. President, the genial and graceful Senator from Indiana never——

The PRESIDING OFFICER. Does the Senator from Arizona decline to yield?

Mr. WATSON of Indiana. I merely desire to ask the Senator a question.

Mr. ASHURST. Just a moment. The genial and graceful statesman from Indiana never comes athwart the disk of my horizon that I do not immediately yield to anything that he asks.

Mr. WATSON of Indiana. I am very grateful to my good friend, and I assure him that whatever else I may seek to do it will not be to embarrass him by the question I am about to ask.

Mr. ASHURST. The Senator from Indiana, in point of ability, always embarrasses me when I put myself into competition with him.

Mr. WATSON of Indiana. The Senator from Arizona is always complimentary, and I hope in this case equally truthful. The Senator belongs to the agricultural bloc, which is bipartisan, consisting of both Democrats and Republicans. Suppose that the agricultural bloc succeeds in incorporating in this bill all the rates they want to incorporate, will the Democratic members of the agricultural bloc vote for the bill?

Mr. ASHURST. I answer that question readily and say if you bring in an honest bill every Democratic member of the agricultural bloc is going to vote for it without regard to local schedules. If you bring in a dishonest bill, every Democratic member of the agricultural bloc is going to vote against it without regard to local schedules.

Mr. WATSON of Indiana. Of course, Mr. President——

Mr. STANLEY. Mr. President——

Mr. ASHURST. Bring in an honest bill and call the roll and we will all vote for it; bring in a dishonest bill and we will all vote against it without regard to local schedules. Do not make any mistake about that.

The PRESIDING OFFICER. Does the Senator from Arizona yield; and if so, to whom?

Mr. ASHURST. I yield first to the Senator from Indiana.

Mr. WATSON of Indiana. Take it for granted that it is an honest bill——

Mr. ASHURST. I hope so; but I am harassed with doubt.

Mr. WATSON of Indiana. Assume that it is an honest bill, so far as the agricultural portion of it is concerned, if we put in all the agricultural bloc wants put in; then suppose that everything in it is honest, and you get all you want, under your plea of the remainder of it being dishonest, does the Senator from Arizona intend to vote down the bill containing the things he wants? [Laughter.]

Mr. ASHURST. Mr. President, I am glad to see my genial friend from Massachusetts [Mr. LODGE] laugh. He does it so seldom that it is gratifying to see him laugh. [Laughter.]

The PRESIDING OFFICER. The Senate will be in order.

Mr. ASHURST. Senators know how I have stormed around like a bifurcated volcano urging a proper import duty on long-staple cotton. I believe, Mr. President, that a proper duty should be placed on long-staple cotton; all Senators know that I so believe and that I have tried to justify a tariff on long-staple cotton; but, if the bill should be a dishonest one, do you think that by dangling in front of me a tariff on long-staple cotton I would be induced to vote for a dishonest bill? All you have to do is present a fair and square bill, and I think I have in times gone by shown that I have some independence.

Mr. McCUMBER and Mr. STANLEY addressed the Chair.

The PRESIDING OFFICER. Does the Senator from Arizona yield; and if so, to whom?

Mr. ASHURST. I yield first to the Senator from North Dakota, but I desire to conclude.

Mr. McCUMBER. It is because the Senator announced a moment ago that he was about to yield the floor that I want to ask him a question.

Mr. ASHURST. I certainly yield.

Mr. McCUMBER. It is a simple question. I desire to ask the Senator whether he will help me in trying to emulate and to put into force and effect the wonderful example which the Senator has given of the method of doing business employed by the agricultural bloc, namely, of talking directly to the subject and disposing of it? The real subject before the Senate to-day, the subject which has been before the Senate for several hours, is the rate of duty on formic acid. Why, in Heaven's name, can we not talk to that subject and reach a vote on it? If the rate proposed is too high, let us vote to lower it; but at least I wish the Senator would help us to keep attention riveted upon the only question before the Senate, and that is the amendments which come up from time to time. We want to vote on them.

Mr. ASHURST. Mr. President, it is impossible to resist the eagle of the Dakotas. I will conclude, therefore, by referring——

Mr. STANLEY. Mr. President, before the Senator concludes I wish to ask him a categorical question.

The PRESIDING OFFICER. Does the Senator from Arizona yield to the Senator from Kentucky?

Mr. ASHURST. I yield.

Mr. STANLEY. Does the Senator mean to imply that the agricultural bloc will be governed in its attitude toward this bill by the schedules in which they are most interested; that if the duties imposed upon agriculture are satisfactory they will vote for the bill, but, if they are not satisfactory they will vote against it without regard to their several political alliances or commitments?

Mr. ASHURST. Mr. President, I have tried to make myself plain. I was asked as to the attitude of the Democratic members of the bloc. I would not presume, I think it would be offensive if I should presume, to speak for the Republican members of that bloc, but I feel that I have a certain liberty to say what would be the attitude of the Democratic members of the agricultural bloc.

Mr. STANLEY. That is the reason I asked the Senator the question.

Mr. ASHURST. I think their attitude is about as follows: That without regard to local schedules, if the tariff bill as a whole were an honest bill, they would be inclined to vote for it, and probably would vote for it, and further, without regard to local schedules, if the bill were dishonest they would be inclined to vote against it.

Mr. STANLEY. Mr. President, let me ask one other question, and then I will not impose further upon the patience of the Senator.

Mr. ASHURST. The Senator from Kentucky is not imposing upon my patience, but upon the patience of the Senator from North Dakota.

Mr. STANLEY. Oh, he can give us pause. Does the Senator from Arizona understand that a fair bill is a bill whose purpose is a tariff for revenue only, whose duties are imposed for the purpose of supplying the needs of a Government economically administered, and so imposed as to secure a maximum of revenue with a minimum of duty, or is it a bill so arranged as to distribute the alleged benefits of protection to agriculture and to the manufacturing industry alike?

Mr. ASHURST. I did not think it was necessary at this time for anybody to ask what is meant by an honest tariff bill. An honest tariff bill is one whose rates are so framed as to make the tariff rates on the imported article equal to the difference between the cost of production at home and abroad, it being assumed, of course, that the tariff-protected commodity can be produced here in sufficient volume to take care of the bulk of consumption in this country and sell the same to the consumer at a fair and reasonable price.

Mr. STANLEY. Mr. President, is not that standard the standard once set and the apology once made for this iniquitous thing by our Republican friends? It is news to me that the Democratic Party has ever committed itself to the policy of imposing a duty upon all articles produced in this country that shall equalize the cost of production at home and abroad. The Senator may know better than I do about it.

Mr. ASHURST. Oh, the Senator knows—he is too astute a statesman, and he is too fair a man to dissemble——

Mr. STANLEY. Never consciously.

Mr. ASHURST. The Senator knows that in every tariff bill, even a high-protective tariff bill, there is a free list—articles that in the very nature of things, for various reasons, are put upon the free list. The Senator knows that there is a free list in every tariff bill, and I believe, although I am not certain, there was a free list even in the tariff bill that James Madison drove through the House. By the way, that was the first protective tariff we ever had, the first bill ever passed by the American Congress, signed on the 4th of July, 1789, by George Washington, driven through the House by James Madison, a Democrat.

I believe, although I have not looked at it for some years, that there was a free list in that bill, and in the Payne-Aldrich bill there is a free list. In the Simmons-Underwood bill there is a free list. In the Dingley bill there is a free list.

Mr. UNDERWOOD. Mr. President, if the Senator will allow me to interrupt him——

The PRESIDING OFFICER. Does the Senator from Arizona yield to the Senator from Alabama?

Mr. ASHURST. Certainly; I yield.

Mr. UNDERWOOD. The free list is an invention of protection. All bills have free lists now, but the original idea of levying taxes was to levy them on a particular commodity and leave everything else untaxed. When the theory arose that it was better to protect special interests behind a tariff wall, and that it was a greater duty to protect special interests behind a

tariff wall than it was to protect the American people from the burdens of taxation, in order that nothing might escape taxation by inadvertence, an omnium gatherum clause was put in tariff bills to tax everything unmentioned, and then the particular items that they desired to exempt were put on a free list; but that was merely for the purpose of seeing that nothing escaped from the hand of the taxgatherer.

Mr. ASHURST. I have no doubt the Senator speaks correctly. I was only saying that so far as my memory goes—and my researches have been extended—there has been a free list in all tariff bills. I have assumed that the difference between the cost of production at home and abroad was the true basis of a protective tariff, unless indeed it is the open design to give a bounty.

Mr. STANLEY. Mr. President, I fear I did not make myself clear. A duty that imposes a greater impost, a higher duty than sufficient to equal the difference in the cost of production at home and abroad, has hitherto been more or less indefensible from the protectionist standpoint. The maxim of protection was adequate equalization of the difference in the cost of production at home and abroad; but the Democrats, as I understand, have never been committed, directly or impliedly, to any obligation to impose a duty that should equalize the cost of production at home and abroad.

Mr. ASHURST. I am not trying to commit anybody. The Senator asked me a question as to what would be the attitude of the tariff bloc toward this bill. I said if it was an honest bill they would vote for it. Then the Senator asked, "What is an honest bill?" and I gave him my humble view as to what was an honest tariff bill. I hope that no Democrat or anybody else thinks I am trying to commit him.

Mr. WALSH of Massachusetts and Mr. SHORTRIDGE addressed the Chair.

The PRESIDING OFFICER. Does the Senator from Arizona yield, and, if so, to whom?

Mr. ASHURST. I yield to the Senator from Massachusetts.

Mr. WALSH of Massachusetts. The Senator from Utah [Mr. KING] intimated in his address to-day that there was a tariff bloc in the agricultural bloc, and that the business of the tariff bloc in the agricultural bloc was to increase the rates on agricultural products and decrease the rates on manufactured products; and, of course, the conclusion is that this will become an honest bill to the agricultural bloc when the rates on the manufactured products are lowered and the rates on the agricultural products are raised.

Mr. SHORTRIDGE. Mr. President——

The PRESIDING OFFICER. Does the Senator from Arizona yield to the Senator from California?

Mr. ASHURST. I yield to the Senator.

Mr. SHORTRIDGE. In order to corroborate the statement made by the Senator from Arizona in a reference he made to the early tariff act, I wish to call attention to the act of July 4, 1789. Section 1 reads:

> Whereas it is necessary for the support of government, for the discharge of the debts of the United States, and the encouragement and protection of manufactures, that duties be laid on goods, wares, and merchandise imported.

Then follows the act specifically laying duties upon certain imports. It is interesting to call attention to the first item:

> On all distilled spirits of Jamaica proof, imported from any kingdom or country whatsoever, per gallon, 10 cents.

The point I wish to have appear in the RECORD is that at the very birth of our Government the statesmen of that hour recognized the doctrine of protection which has been followed by different political organizations, adhered to and enlarged upon, perhaps, from that day until now, in respect to the encouragement of manufactures; and the same principle applies, as clearly and forcibly stated by the Senator from Arizona, as to agricultural products. The same doctrine applies, and ought to be applied, and we purpose to have it applied.

Mr. ASHURST. Mr. President——

Mr. STANLEY. Mr. President, just one minute. I can thoroughly understand, from the point of view of the eminent and accomplished Senator from California, why he would want to spread out this doctrine of protection, like you would butter a biscuit, over every character of industry, and commit every character of industry—agricultural, commercial, financial—to the theory of protection, with the idea that he is giving a part of the usufruct, of the plunder, of the misuse of the taxing power; but I hope that the accomplished Senator from Arizona or his bloc will not go so far along that questionable road from a Democratic standpoint.

Mr. ASHURST. I will ask the Senator this question: If this should prove to be an honest bill, will he vote for it? Now, let the Senator answer that question. He has asked me some pointed questions. If it is finally whipped into an honest bill, will the Senator vote for it?

Mr. STANLEY. Mr. President, when God Almighty makes two hills without a hollow, when He makes night without day, when He makes a sun without heat, the old guard will write a tariff bill that is honest.

Mr. ASHURST. I am asking the Senator if this finally be made into an honest bill, will he vote for it?

Mr. STANLEY. Why, Mr. President, to ask me about "honest protection" is like asking me about a sweet-smelling stench. There is no such thing, whether it is in the case of long-staple cotton or anything else.

Mr. ASHURST. Now, just one moment. I have not asserted that. I asked the Senator a plain question. That is all I asked him.

Mr. STANLEY. Mr. President——

Mr. ASHURST. I withdraw the question and yield now to the Senator from California.

Mr. SHORTRIDGE. Mr. President——

The PRESIDING OFFICER. To whom does the Senator yield?

Mr. STANLEY. I would vote for an honest bill imposing revenues, of course; but it can not be made out of this bill any more than you can make a silk purse out of a sow's ear. I have read the thing.

Mr. ASHURST. That is a fair answer.

Mr. SHORTRIDGE. Mr. President, may I ask the Senator from Kentucky a question?

Mr. ASHURST. Yes; I yield.

Mr. SHORTRIDGE. May I ask the Senator from Kentucky one question?

Mr. STANLEY. Certainly, so far as I am concerned.

Mr. SHORTRIDGE. I will call it one question. You raise tobacco in Kentucky. Why do the people of Kentucky, where my forefathers came from, ask for, and why do the Republican Party and many Democrats favor granting their request, namely, a protective tariff on that important product of Kentucky, namely, tobacco? Why do we grant it? Why do your people ask it? Do you not favor it?

Mr. STANLEY. Mr. President, if the Senator from Arizona will yield——

The PRESIDING OFFICER. Does the Senator from Arizona yield to the Senator from Kentucky?

Mr. ASHURST. I yield.

Mr. STANLEY. Is the Senator from Arizona about to conclude?

Mr. ASHURST. I want to conclude at the earliest moment, but I yield for this answer.

Mr. STANLEY. I was going to say that if the Senator was about to conclude I would wait until he concluded to answer the question.

Mr. President, the question of the Senator from California assumes a condition that does not exist. In his question he predicates my answer upon an alleged demand of the people of Kentucky for a duty upon tobacco. Kentucky produces more tobacco than any other State in the Union. It produces more tobacco in one year than the Imperial Valley in Arizona would produce of long-staple cotton in the life of any man now living; and Kentucky—that is, Democratic Kentucky, has not asked and never will ask for the mean privilege of a part of the fleshpots of Egypt while she denounces the dishonesty of the Egyptians in filling those pots. The democracy of Kentucky, in so far as it is represented by the senior Senator from that States, comes now as it has come since the days of Clay, when the first Democrat was elected from that great tobacco district, without asking one red cent upon her tobacco. More than that, Mr. President, the great State of Kentucky produces more things, more different commodities, whose price could be enhanced by this thing than perhaps any other State in the Union.

There are barytes mines in my State which could be worked with a duty and an increased burden placed upon every cottage that is painted from Cape May to the Golden Gate, and the honest democracy of Kentucky asks no duty upon barytes.

There are mines which produce fluorspar in my State, a product which is used in fluxing minerals protected to the limit, but the honest democracy of Kentucky asks no duty upon fluorspar.

Kentucky has more coal than Pennsylvania, thousands upon thousands of acres of virgin coal, the finest that was ever dug from the earth. Admiral Rodman told me the other day that the coal from West Virginia and Kentucky had no peer

for steam purposes, either in Cardiff or elsewhere in all the world; but the honest democracy of Kentucky asks no duty upon coal.

We believe that every dollar collected at the port of entry by the strong arm of taxation is impressed with a trust, to be used for the purpose of defraying the expenses of a Government economically administered, and we will never use the power of this Government to tax all the people in order to enrich a few unless the exigencies of the revenue demand it.

Kentucky became Democratic and the Kentuckians of the blue-grass region announced their allegiance to that honest doctrine when all central Kentucky was a great hemp field, and there was not a single stalk of hemp which could not have been enhanced in value by virtue of an unearned increment which would have made every citizen who used that fiber pay two prices for it; and she preferred to see her hemp fields desolated, to abandon that great industry, rather than abandon the truth, for she loves the truth better than she loves the dirty dollars of protectionism.

Is the Senator from California answered?

Mr. SHORTRIDGE. Mr. President, I am very much gratified. If the Senator from Kentucky speaks the doctrine of the Democratic Party, we will submit that to the American people November 2 next.

Mr. ASHURST. Mr. President, I suppose it is entirely appropriate that when I rose to discuss the farm bloc that there should creep in through some of the interstices now and then references to the main question, the tariff bill.

I had no intention of discussing the tariff question, and I was drawn to the subject accidentally. Getting back now to the question propounded to me as to the attitude of the Democratic members of the agricultural bloc on the tariff question, I leave that phase of the question as I began it, with the statement that the agricultural interests of this country are convinced that the protective-tariff system has been employed and exercised for over a hundred years for the benefit of the manufacturer only; that if it be a good thing, as its protagonists and its friends say it is, then by what rule do you exclude agriculture? That is the question I have been propounding.

I have not the capacity, even if I had the inclination, to deliver such a brilliant eulogy upon a theory of government or upon a State as the Senator from Kentucky has done; but, brilliant as his eulogy is and captivating as it was, it had nothing to do with the question. It shed no light upon my inquiry. It did not answer the question I propounded as to what rule of morals or government was invoked when you say a protective tariff is good for the manufacturer and is a good system to employ in our Republic, but that you will never employ it regarding agriculture. That is the subject upon which I desire to be enlightened. What rule do Senators invoke, what principle do they invoke, what statesman do they quote when they say, "Protection to the factory is a good thing, but it must not apply to the farm, field, or ranch"? That is the point upon which I have sought information. That is the distinction I have attempted to draw; and I simply said that if protection be a good thing the farmers of the country are going to demand that they be placed on a parity with the manufacturers.

The farmer, flockmaster, the herdsman, the cowboy, by sun and by rain, tend the cattle and bring them into the market. When the wool is clipped from the sheep and brought to the train, that is the sheep grower's finished product. Indeed, Mr. President, there is no such thing as raw material. It is wrong that in the nomenclature of tariff bills for a century and a half the term "raw materials" should have been used. There is no such thing as raw material. What might be raw material to one might be the finished product to another. Indeed, the air, the earth as it is scooped out, and the sea may be raw material, but I think of no others.

The logger who goes into his forest, cuts down trees, and skids them as logs to the train regards them as his finished product. The manufacturer calls it his raw material. Then it is taken to the mill, and it is put through the sawmill to be made into boards or moldings. The miller calls the logs raw material. It is the logger's finished product.

So it is with hides. You may call them the raw material, and you may say that our manufacturers must have free raw material. You from Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, and the other States where the great textiles industries are, say, "We want free raw material." Certainly you want free raw material. You are just like everybody else. You are free traders after you get your own interests protected.

The farmer is not that kind of a man. The farmer is willing that everybody else should have protection if the farmer has protection, but the farmer says that if he is to be on the free list everybody else must be on the free list, and that is the attitude of the farm bloc, in my judgment, certainly of the Democratic members.

Mr. STANLEY. Mr. President——

Mr. ASHURST. Will not the Senator let me finish unless it is a short question?

Mr. STANLEY. It is a very short question. Do I understand the Senator to say that the farmer is for protection if you give it to everybody else—the Democratic farmer of the bloc or elsewhere?

Mr. ASHURST. If he is not for protection when everybody else is for protection, he is a fool. If any farmer in this country says, "I want my machinery highly protected, so that I will pay 200 per cent for my farm machinery; I want my shoes on the protective tariff list, so that I and my wife and my children may pay high prices for shoes, but I demand the sacred right to have my cotton and corn and my hides on the free list, so that I may get just as little as possible for my farm products"—what farmer is going to say that? No farmer. If he has any sense, he will say with Jefferson, "Equal rights to all, special privileges to none." If a protective tariff be a good thing, apply it to the products of the ranch and the farm and the field. If free trade be a good thing, apply it to the factories as you apply it to the farm. That is all the farmer asks.

Mr. President, the farmer may not always pronounce words with the same euphony and the same grace we employ in this forum, but the farmer understands fundamentals as well as we do, if not better. You can not make any farmer in this country, whether he be in Iowa or Maine or in Illinois, any longer believe that it is right and moral and profitable to put the products of the factory on the protective list and the products of the farm and the field and the ranch on the free list.

Mr. President, the learned Senator from California [Mr. SHORTRIDGE] read from the first tariff act, which was signed on the 4th of July, 1789. Very largely the data for that bill was furnished by Alexander Hamilton, the Secretary of the Treasury, supplemented by the superb ability of James Madison. It so happened, however, that it turned out largely to be merely in the interest of the manufacturer.

The great originator of the farm bloc, Mr. Jefferson, had not reached home from France at that time. Three times the Colonies had asked Jefferson to go to France. It was necessary in the early days of the Republic and during the Confederation to have the friendship of France, and the most eligible men we had to hold that friendship were Thomas Jefferson and he of capacious brain, which contained kites and constitutions, Benjamin Franklin. Twice Thomas Jefferson declined to go, so much did he love the comforts of home; but he finally went, at the insistence of the Colonial Government, and spent four years in France; and when the first tariff bill was passed, he, the American father of the farm blocs, was not here, but he had just concluded a trip throughout all France; he had just returned to the French capital, and in his surtout, in his vest pockets, there were the seeds of the rice which you grow in your Piedmont sections. It was an offense punishable with death at that time in France to smuggle out rice seed from France; but this lover of his fellow men, this great patriot, this founder of the Democratic Party, smuggled the rice and sent home the seeds to be planted. He encouraged agriculture.

This founder of farm blocs saw when he reached here that the tariff bill which had been passed had discriminated against agriculture.

So if, sirs, you say that your protective tariff policy has built up manufacture, if you say that your protective policy has been a good thing, all that the farmer asks is that you apply that same plan of government to the farm. We arraign you at the bar of history for your failure in the past to include the products of the farm and the field and the ranch in your tariff bills.

That is my answer to Senators on both sides as to the attitude of the Democratic members of the farm bloc. If you have an honest bill we will vote for it. If it is a dishonest bill we will vote against it.

In conclusion I read from a speech by the Senator from Kansas [Mr. CAPPER] stating what the agricultural bloc has accomplished, what it intends to do, and what it believes it will do. Here are the items:

> Mr. President, I wish to call attention to the fact that this corrective legislation has been sponsored and promoted by the agricultural bloc. Congress has realized the grave importance of doing something constructive to aid agriculture and has passed several valuable acts. The billion-dollar War Finance Corporation to handle agricultural credit more effectively is one. The Capper-Tincher future trading bill to regulate the grain exchanges is another. Then there is the packer control bill, the agricultural emergency tariff bill, the Kenyon bill increasing interest rates on bonds of the farm loan banks from 5 to 5½ per cent, and the Curtis bill authorizing the appropriation of $25,000,-

000 as a revolving fund for the Federal farm loan banks. One of the most important enactments was the passage of the measure permitting farmers to market their products cooperatively. That measure gives the farmer the opportunity to help himself in overcoming and removing many of the evils that have grown up in the marketing of agricultural products. It will tend to reduce the great spread between the prices the producer receives and the price the consumer pays for the products.

The farm bloc favors a liberal but sane appropriation for the Department of Agriculture, so that it may function efficiently and conduct its activities on a scale in conformity with the size and importance of the industry it serves.

The farm bloc believes railway freight rates are too high and must come down.

The farm bloc would restore to State railway commissions much of the power taken away from them by an unwarrantable interpretation of the transportation act by the Interstate Commerce Commission.

Another measure favored by the farm bloc which will contribute to a permanent and prosperous system of agriculture is the development of the Muscle Shoals project. We should resume work immediately on the Government's great fertilizer and power plants on the Tennessee River. The Nation's fertilizer bill is now about $250,000,000 annually. I believe it is possible to reduce this one-half if we carry out the Muscle Shoals program.

The farm bloc is supporting the Capper-French truth in fabric bill to compel makers of clothing to brand their goods so that the buyer will know the amount of pure wool and the amount of shoddy in it.

First in its program, the farm bloc holds credit reform. It realizes that agriculture is at the mercy of those who control credit, and that many who exert that control are not particularly in sympathy with agriculture. The farm bloc knows that farmers have suffered and many have been ruined financially by lack of credit.

The farm bloc is seeking to evolve a credit plan which will give relief to agriculture, which will make more money for financing the slow turnover of the farms, which will give the farmer another opportunity to go ahead with his work with a decent chance to make good. If that is accomplished, it will mean cheaper food, more work, reopened factories and mills, and a return of good times.

Senator MCNARY'S bill extending the operation of the War Finance Corporation until July 1, 1923, should be promptly passed by this Congress.

Another obvious need in the way of further legislation for the encouragement of agriculture is a law that will make the Federal Reserve Board more responsive to the farmer's credit needs. This is best met, in the judgment of many, by the bill which already has passed this body and is pending in the House, providing for the recognition of agriculture in the appointment of members of the board.

Mr. ASHURST subsequently said: Mr. President, some moments ago I discussed what bills the agricultural bloc considered last evening. I stated in a concrete and succinct manner that the Senator from North Carolina [Mr. SIMMONS], the Senator from Wisconsin [Mr. LENROOT], and the Senator from South Dakota [Mr. NORBECK] presented their views as to the bills proposing to extend long-time loans and personal credits to agricultural interests. I ask unanimous consent as an appendix to my remarks to include in the RECORD a summary of the essential features of each one of those measures, together with a comparative analysis of each bill. This summary has been prepared by a trained expert of the Treasury Department, and I believe it will be illuminating.

The VICE PRESIDENT. Without objection, the request is granted.

Mr. ASHURST. This summary contains statistical matter, and I ask that it be printed in 8-point type, the regular RECORD type.

The VICE PRESIDENT. Without objection, it is so ordered.

The matter referred to is as follows:

Digest of proposed agricultural credits legislation.

ANDERSON BILL.

This bill proposes to amend the Federal farm loan act by establishing a farm credits department in each Federal land bank, said farm credits department to be authorized—

(1) To discount for any national bank, State bank, trust company, incorporated live-stock loan company, or savings institution, with its indorsement, any paper the proceeds of which have been advanced or used in the first instance for an agricultural purpose or for the raising, breeding, fattening, or marketing of live stock;

(2) To make direct loans to any cooperative association organized under the laws of any State and composed of persons engaged in producing staple agricultural products, the instruments evidencing such loans to be secured by warehouse receipts for staple agricultural products;

Said loans or discounts to bear such rate of interest as may be determined by the Federal land bank, with the approval of the Federal Farm Loan Board and to mature not less than six months nor more than three years from the date upon which any such loan or discount shall have been made;

(3) To rediscount with any Federal reserve bank any such paper discounted or loans made having a maturity of not more than six months: *Provided* That no paper shall be so rediscounted which bears the indorsement of a nonmember State bank or trust company eligible for membership in the Federal reserve system;

(4) To sell, with or without recourse, any such loans or discounts made; and

(5) To issue and sell debentures having a maturity not exceeding three years and secured by notes or other obligations representing loans or discounts made by it.

The bill provides that the Federal land bank farm credits departments thereby created shall each have a capital stock of $1,000,000, all of which shall be subscribed, held, and paid by the Government of the United States. (In the light of this provision, it is not clear what the further provision to the effect that "the Government of the United States shall be entitled to one vote for each share of such stock in deciding all questions at meetings of stockholders" means.)

Although the financial operations and responsibilities of these farm credits departments are to be kept separate and distinct from those of the regular Federal land banks, Federal land bank appraisers are required to examine and report upon agricultural products covered by warehouse receipts offered by cooperative associations as security for loans, and Federal land bank examiners are required to investigate and report upon the condition of any such cooperative association to which the farm credits department contemplates making loans.

The Comptroller of the Currency is authorized and directed upon request to furnish for the confidential use of such farm credits departments such reports and information as he may have available with respect to the financial condition of national banks from which applications for discounts may be received, and to make, through his examiners, examinations of State banks, trust companies, live-stock loan companies, and savings institutions upon their consent.

NORBECK BILL.

This is a bill to "provide credit to secure the successful production and profitable and orderly marketing of agricultural products and live stock in the United States" by the creation of a corporation to be known as the "National Farmers' Finance Union," to take over the assets of the War Finance Corporation with full authority to conduct its business as the business of the union.

The provisions of the Norbeck bill are practically identical with the provisions of the amended War Finance Corporation act except in one of two important respects:

(1) The powers conferred by sections 21 and 22 of the War Finance Corporation act with respect to advances to banks, exporters, and dealers to assist in financing domestic products for export are carried into this bill and made applicable to direct loans by the union to any person or association engaged in producing, dealing in, or marketing agricultural products of the United States for the purpose of assisting in carrying such products until they can be manufactured or processed or sold for domestic consumption or otherwise in an orderly manner (sec. 7).

(2) The provision appearing near the end of section 24 of the amended War Finance Corporation act, authorizing the corporation to purchase, sell, or otherwise deal in acceptance issued by banking corporations organized under section 25 (a) of the Federal reserve act in case such purchases of acceptances be made for the purpose of assisting in financing the exportation of domestic products to foreign countries, has likewise been enlarged by the Norbeck bill so as to permit the purchase by the union of Edge law corporation acceptances for the purpose of assisting in financing "the domestic marketing" of staple agricultural products.

In this connection it would be interesting to know whether the above-mentioned provision was intended to repeal section 25 (a) of the Federal reserve act, which provides that "no corporation organized under that section (Edge law corporations) shall carry on any part of its business in the United States except such as shall be incidental to its international or foreign business."

OTHER CHANGES AND ADDITIONS.

(3) Of the four directors of the union provided to be appointed by the President, two are required to be bankers residing in agricultural communities and two agricultural or live-stock producers.

(4) The union is to have succession for a period of 25 years.

(5) The rate of interest which a bank obtaining an agricultural advance from the union is permitted to charge its customers for such funds is limited to 1 per cent in excess of the rate charged to such bank by the union, as against 2 per cent under the War Finance Corporation act.

(6) The union may issue its bonds in the proportion of 5 to 1 of its capital stock, whereas the War Finance Corporation act makes the limit 3 to 1.

(7) The war-time powers conferred by sections 7, 8, and 9 of the War Finance Corporation act are, of course, omitted from the bill under consideration.

(8) The bill contains an added provision that the reserve profits of the union shall be set aside and used to retire the stock of the union, and that when all such stock shall have been retired the union shall be converted into a cooperative financial institution.

THE SIMMONS BILL.

This is a bill "to provide credit facilities for the preservation and development in the United States of the agricultural industry, including live stock, * * * and for other purposes," by the establishment of a complete system of rural credits machinery under the title of "Agricultural credits act of 1922."

The salient provisions of the bill include:

The creation of a corporation to be known as the "National Agricultural Credits Corporation," to be composed of the Secretary of Agriculture and four additional directors to be appointed by the President by and with the consent of the Senate; not more than two of said directors to be of the same political party, and one of which shall be chosen from each of the four geographical districts or regions into which, for that purpose, the country shall be divided; said corporation to have succession for a period of 50 years, to have its principal office in the city of Washington, D, C., with agencies located in such cities or towns within the United States and operated under such rules and regulations as the directors of the National Agricultural Credits Corporation may prescribe.

The original capital stock of the corporation, $500,000,000, is to be subscribed by the United States of America, and paid for and reduced by the retirement of the capital stock of the War Finance Corporation and the transfer and liquidation of the assets of the latter in the following manner:

TRANSFER OF ASSETS OF WAR FINANCE CORPORATION TO NATIONAL AGRICULTURAL CREDITS CORPORATION.

After setting aside with the Treasurer of the United States a sum sufficient to meet all its outstanding liabilities, the War Finance Corporation shall transfer and deliver to the National Agricultural Credits Corporation all its cash, securities, furniture, and fixtures, and other assets, which shall forthwith become the property of the National Agricultural Credits Corporation.

RETIREMENT OF CAPITAL STOCK OF WAR FINANCE CORPORATION BY ISSUE OF LIKE AMOUNT OF CAPITAL STOCK OF NATIONAL AGRICULTURAL CREDITS CORPORATION.

Simultaneously with such transfer and delivery of the assets of the War Finance Corporation to the National Agricultural Credits Corporation, the entire capital stock of the War Finance Corporation held by the United States, amounting to $500,000,000, shall be retired and canceled, and the National Agricultural Credits Corporation shall issue in the name of the United States and deliver to the Secretary of the Treasury its capital stock in an equal aggregate amount, and the Secretary of the Treasury shall thereupon have power on behalf of the United States to assign and transfer the certificates representing such capital stock in the manner and for the purpose provided by the act.

SURPLUS.

The assets of the War Finance Corporation so transferred shall be carried on the books of the National Agricultural Credits Corporation at the value at which such assets were carried on the books of the War Finance Corporation, and the amount by which such assets exceed $500,000,000 shall be carried into the surplus fund of the National Agricultural Credits Corporation.

REDUCTION OF CAPITAL STOCK OF NATIONAL AGRICULTURAL CREDITS CORPORATION.

When the National Agricultural Credits Corporation shall have received in cash or its equivalent the sum of $100,000,000, either from the transfer to it of the cash assets of the War Finance Corporation or from the liquidation of other assets of the War Finance Corporation so transferred, all further sums realized from liquidation of the assets of the War Finance Corporation shall be applied to the retirement of the capital stock of the National Agricultural Credits Corporation held by the United States until the entire outstanding capital stock of said corporation shall be reduced to $100,000,000.

BONDS.

In addition to the $100,000,000 of cash capital above provided, the National Agricultural Credits Corporation will be empowered to raise funds by the issue and sale of its bonds, the aggregate principal amount of which shall not exceed ten times the capital stock of the corporation at the time issued and outstanding, said bonds to constitute a first and paramount floating charge upon all the assets of the corporation, to be exempt from payment of Federal, State, or local taxes, and to mature not less than six months nor more than five years from the respective dates of issue.

MEMBER CORPORATIONS.

In conformity with the general purpose of the bill to meet the present-day need for a distinct credit structure through which the agricultural and live-stock industries of the country can be adequately financed, provision is made for the admission to membership in said agricultural credits system of the following three classes of eligible corporations:

Class A. National banks, State banks, trust companies, or other banking corporations having a paid-in capital of not less than $20,000.

Class B. Incorporated live-stock or agricultural loan companies having a combined paid-in and unimpaired capital and surplus of not less than $100,000, the principal business of which corporations shall consist in making loans for agricultural or live-stock purposes.

Class C. National agricultural credit unions created by Federal charter in the manner and for the purposes prescribed by the agricultural credits act, the capital stock of such credit unions to be not less than $25,000.

The requirements for admission of any of the above-named institutions to membership are that the applicant shall (1) at the time have outstanding or propose to make loans for agricultural purposes as defined by the agricultural credits act; (2) subscribe to an amount of the capital stock of the National Agricultural Credits Corporation equal, in the case of a class A eligible corporation, to 5 per cent, and in the case of a class B or class C eligible corporation to 10 per cent of the paid-in capital and unimpaired surplus of such eligible corporations; and (3) agree to conform to and be bound by such rules, regulations, and requirements as may by the board of directors of the National Agricultural Credits Corporation be prescribed or imposed with respect to member organizations.

Having duly qualified and received a certificate of membership issued by the National Agricultural Credits Corporation—

Any class A member corporation may apply to the National Agricultural Credits Corporation for an advance either (a) by way of discount of notes, drafts, bills of exchange, or other evidences of debt representing an agricultural purpose, or (b) upon its secured promissory note up to the amount of any outstanding agricultural loans made by such class A member corporation to its customers.

Any class B member corporation may apply to the National Agricultural Credits Corporation for an advance either (a) by way of discount of notes, drafts, bills of exchange, or other evidences of debt supported by negotiable warehouse receipts, chattel mortgages, bills of lading, shipping documents, or other instruments, in writing, conveying or securing marketable title to agricultural products, including live stock; or (b) upon its promissory note collaterally secured by such stable agricultural products or live stock.

Any class C member corporation may apply to the National Agricultural Credits Corporation for an advance either (a) by way of discount of notes, drafts, bills of exchange, or other evidences of debt supported by negotiable warehouse receipts, chattel mortgages, bills of lading, shipping documents, or other instruments, in writing, conveying or securing marketable title to agricultural products, including live stock; or (b) upon its secured promissory note up to the aggregate amount of any outstanding agricultural loans made by such class C member corporation to its customers.

DISTRICT BRANCHES.

Upon the application of 10 or more such member corporations a district branch of the National Agricultural Credits Corporation (not more than one of which shall be located in any given State) may be established to operate within such geographical limits as the directors of the National Agricultural Credits Corporation may prescribe: *Provided*, That upon vote taken two-thirds of the member corporations located within the district so to be served are found to be in favor of the establishment of such district branch: *And provided further*, That no such district branch shall be established unless the member corporations located and doing business within the geographical limits of said district shall own stock in the National Agricultural Credits Corporation in an aggregate amount of $250,000 or more. Such district branches shall, subject to such rules and regulations as the board of directors of the National Agricultural Credits Corporation may prescribe, be operated under the supervision of a board of directors consisting of not more than seven nor less than three, of whom a majority of one shall be appointed by the directors of the National Agricultural Credits Corporation. Under the establishment of any such district branch all member corporations located within the territory served thereby shall deal directly therewith.

COOPERATION ASSOCIATIONS.

In addition to the advances above provided for, the National Agricultural Credits Corporation may make loans to any cooperation association organized for the purpose of marketing the agricultural products of its members, such loans to be made upon the promissory note of the association, collaterally secured by a satisfactory margin in commodity paper or receipts representing staple agricultural products pledged or conveyed thereby.

PURCHASE OF COMMODITY PAPER.

The National Agricultural Credits Corporation may also purchase such commodity paper from cooperative associations or in the open market.

REDISCOUNTS.

The National Agricultural Credits Corporation may rediscount with any Federal reserve bank commodity and other agricultural paper owned by it which may be eligible for rediscount under the Federal reserve act.

RATE OF INTEREST.

The rate of interest to be charged upon any such loan or advance shall be left to the determination of the board of directors of the National Agricultural Credits Corporation, but in no event shall the rate so charged exceed the legal rate prevailing in the State in which the applicant is located.

MATURITY.

The maturity of any such loan or advance shall not exceed one year, but the National Agricultural Credits Corporation may, in its discretion, grant extensions or renewals up to three years from the date upon which any such loan or advance was originally made.

COMPARATIVE ANALYSIS OF THE ANDERSON BILL, THE NORBECK BILL, AND SIMMONS BILL.

In examining the respective merits of the three proposed enactments it may be well to attempt a forecast—based upon the general scheme embodied in the provisions of the bills, stripped of all legal verbiage—of the manner and scope of operation of the agricultural credit facilities which each such bill would provide.

I.

THE ANDERSON BILL.

Under the Anderson bill there would be created a farm credit department in each of the 12 Federal land banks located at Springfield, Mass.; Baltimore, Md.; Columbia, S. C.; Louisville, Ky.; New Orleans, La.; St. Louis, Mo.; St. Paul, Minn.; Omaha, Nebr.; Wichita, Kans.; Houston, Tex.; Berkeley, Calif.; Spokane, Wash.; each of which would commence operations with a capital of $1,000,000 provided by Government subscription to stock in that amount.

Discounts are authorized to be made for and through national banks, State banks, trust companies, live-stock loan companies, and savings institutions, and direct loans are authorized to be made to cooperative associations of producers—but where would the funds with which such agricultural loans and discounts are to be made come from? When loans and discounts up to the amount of the $1,000,000 capital subscribed by the Government has been consummated by the farm credits department of a Federal land bank—and a single transaction with a cooperative association or a live-stock loan company might easily absorb that sum—the agricultural credit machinery thus set up would cease to function further until it should be able either to sell or rediscount with a Federal reserve bank the loans and discounts previously made, or to issue and market its debentures secured by the paper upon which such loans and discounts were made. Any such paper having a maturity of more than six months would not be eligible for rediscount, and paper bearing the indorsement of nonmember eligible State banks (to which class more than half of the State banks and trust companies of the country belong) could not, under the act, be handled through a Federal reserve bank.

If an attempt were made to raise new capital through an issue of debentures that process would, at best, entail a great deal of delay. The requisite legal formalities, the appointment of a trustee and depository, the approval of the issue by the Federal land bank and the Federal farm loan board at Washington, the preparation of the form and the issue of the debentures, and finally, the offering for sale and marketing of the debentures, would obviously take time.

The farm credits department could not, of course, begin to consider new applications for loans until the additional funds with which to make new loans had been obtained, because until the sale of the debentures had actually been consummated there would be no assurance that any new loans could be made.

As a matter of fact, it is a question of grave doubt whether debentures of the character proposed, secured by miscellaneous collateral taken for live stock and agricultural loans made by a farm land bank board, could be marketed at all. Even if the debentures could be sold, the difficulties to be encountered in the endless process of substituting and resubstituting new collateral for constantly maturing collateral and subcollateral to be withdrawn would be almost insurmountable.

The Federal land bank appraisers and examiners would not seem to be well qualified to inspect and examine, nor members of Federal land banks to pass upon, security offered in connection with applications for agricultural and live-stock loans.

II.

THE NORBECK BILL.

The Norbeck bill would practically accomplish the reenactment of the War Finance Corporation act under another name, with certain provisions inserted, one of which contemplates the taking over by the National Farmers' Finance Union thereby created of all the assets of the War Finance Corporation and the transfer to the union of all the certificates of capital stock of the War Finance Corporation owned by the United States, in return for which the Secretary of the Treasury shall receive stock of the union in an equal amount. As the proposed capital stock of the union is $200,000,000, while the stock of the War Finance Corporation owned by the Government is two and a half times that amount, the exchange of stock of the union for stock of the War Finance Corporation could not be made as proposed.

There is in the Norbeck bill one rather radical and noteworthy extension of the powers exercised by the War Finance Corporation under the amended War Finance Corporation act, and that is the provision contained in section 7 of the proposed bill, the effect of which would be to empower the National Farmers' Finance Union to make direct loans to farmers, dealers, and cooperative associations, at a rate of interest not more than 1 per cent in excess of the prevailing Federal reserve discount rate, until the agricultural products produced or dealt in by them may be manufactured, processed, or profitably sold for domestic consumption or for export in an orderly manner. With this opening for direct agricultural loans from the Government to the producer and dealer, there would seem to be little necessity for the other provisions of the bill authorizing the union to make advances for agricultural purposes to banks and other financial institutions, as such producers and dealers would much prefer to deal directly with the Government if by that means long-term loans could be obtained at lower rates of interest.

The proposed legislation embodied in the Norbeck bill is open to the same criticism to which the War Finance Corporation has been subjected—that it involves a "centralization" of banking power. All of the capital would be provided by the Government, and all of its credit machinery and facilities would be centered in Washington. The bill, however, contemplates the accumulation of a reserve fund from the surplus earnings of the union, which would be applied to the gradual reduction and retirement of the capital stock of the union and its ultimate conversion into a cooperative financial institution.

The corporation proposed to be created by the Norbeck bill would probably have no difficulty in providing adequate funds for its operations by the issue of bonds authorized up to five times the amount of its capital stock. Such bonds would constitute a first and paramount floating charge on more than $500,000,000 of assets, and would be exempt from Federal, State, and local taxes to the same extent to which bonds issued under the War Finance Corporation act are exempt.

III.

THE SIMMONS BILL.

The enactment of the Simmons bill would provide for the establishment of a distinct and complete system of agricultural credit facilities designed to meet present requirements. Under this bill there would be created at Washington a corporation with a Government-subscribed capital of $500,000,000 to take over and liquidate the assets of the War Finance Corporation and, in addition to the loans and purchases authorized to be made to cooperative associations of producers of agricultural products, to make loans and advances to three classes of applicants which shall have duly qualified and become member corporations by subscribing to the capital stock of the National Agricultural Credits Corporation and otherwise complied with the regulations and requirements thereby prescribed and imposed.

It may discount for class A member corporations—consisting of banks and banking corporations with paid-in capital of not

less than $20,000—paper representing loans made for agricultural purposes, and make loans to such member corporations up to the amount of any agricultural loans made by them to their customers.

It may discount for class B member corporations—consisting of incorporated live stock or agricultural loan companies having a paid-in capital and surplus of not less than $100,000—agricultural commodity or live-stock paper, and make loans to such member corporations collaterally secured by warehouse receipts for agricultural products or chattel mortgage upon live stock.

It may discount for class C member corporations—consisting of National Agricultural Credit Unions created by Federal charter in the manner and for the purpose prescribed by the agricultural credits act, having a capital of not less than $25,000—agricultural commodity or live-stock paper, and make loans to such member corporations up to the amount of any agricultural loans made by them to their customers.

There would thus be provided under the proposed agricultural credits act:

(1) A central corporation (National Agricultural Credits Corporation) with a capital of $500,000,000, with authority to issue bonds up to ten times the amount of its capital, with cash assets of $100,000,000 immediately available for making agricultural loans and discounts to member corporations and loans to cooperative associations, and with authority to rediscount with Federal reserve banks any agricultural or live-stock paper owned by it which may be eligible under the Federal reserve act;

(2) Class A member corporations, with authority to make loans and advances to farmers, cattlemen, and others for agricultural and live-stock purposes, which said loans and advances may by them be discounted with or made the basis of loans from the National Agricultural Credits Corporation;

(3) Class B member corporations, with authority to make loans and advances to farmers or cattlemen upon paper secured by agricultural products or live stock, which said loans may by them be discounted with or borrowed upon from the National Agricultural Credits Corporation;

(4) Class C member corporations, with authority to make loans and advances to farmers, cattlemen, or others for agricultural and live-stock purposes, which may by them be borrowed upon from the National Agricultural Credits Corporation, or if secured by agricultural commodities or live stock, may be discounted with said corporation; and

(5) Cooperative associations of producers, which may make agricultural loans to persons, firms, or corporations having membership therein, with authority to borrow corresponding amounts from the National Agricultural Credits Corporation upon the security of warehouse receipts representing agricultural products transferred to such associations by the members thereof, or at the election of the National Agricultural Credits Corporation, to sell such paper thereto.

Such member corporations, other than national banks, shall, as a condition of membership, agree to submit to examination by examiners appointed or selected by the directors of the National Agricultural Credits Corporation, and all district branches and agencies of the corporation shall be regularly examined and audited at least twice in each calendar year by examiners appointed or selected by said directors. The Comptroller of the Currency will furnish, for the confidential use of the National Agricultural Credits Corporation, any information called for with reference to any national bank member corporation, and will, upon request, make special examinations of any such national bank or of any State bank or loan company which shall have become a member corporation.

This bill contains no features which may be characterized as an encroachment upon, but on the contrary provides for, a much-needed extension of the functions heretofore performed by the banks in the agricultural sections of the country.

While it is true that the agricultural credits system proposed to be established by this bill does, to some extent, represent the centralization of banking power, as must be the case with any financial system dependent at the outset upon Government capital, at the same time effective provision is made for gradual decentralization, both with respect to the capital employed and the exercise of the administrative power, not by the building up of huge surplus reserves from Government profits in a business enterprise but by the virtual relinquishment of ownership and control through the careful distribution of the shares of the National Agricultural Credits Corporation among the several classes of member corporations and the establishment of district branches, upon the directorate of which such member corporations will have representation and with which they will directly deal.

The cost to the Government of the establishment of the agricultural credits machinery provided by the Simmons bill will be really less than nothing, as the National Agricultural Credits Corporation will not only function with the assets to be taken over from the War Finance Corporation, but will be able, as an incident to its business, and without additional cost, to liquidate and pay back into the Treasury the funds representing War Finance Corporation advances heretofore made.

Mr. STANLEY. Mr. President, my devotion to the cause or, more properly, to the great and basic industry of agriculture needs no certificate of good character from any bloc or combination of men in or outside of the Federal Congress. Twenty long years ago, before the Senator from Arizona [Mr. ASHURST] was a member of this body, the first organization of agriculturists ever formed in Kentucky, in my opinion, for the purpose of collective bargaining and selling their produce met in the little town of Guthrie, in the State of Kentucky, on the Tennessee line. I journeyed at my own expense from the city of Washington to this little railroad crossing, and in a little hall above a country store we organized the Planters' Protective Association.

I assisted in drawing up its charter and by-laws. I saw it grow until it comprised 40,000 members. I saw that organization bring to terms the great regie contractors, the monopolists of kings, in defense of their right to sell in the open market. After three years of fight with the American Tobacco Co., I saw the resolution which I had offered on the floor of the Federal Congress incorporated in the decision of Chief Justice White, dissolving that great trust.

I have assisted in the organization of more cooperative associations of farmers than any other Senator upon this floor, or any Member of the House for that matter. I have traveled five times as many miles, I will guarantee, and spent five times as much out of my own pocket in defense of the farmer's right to an open market, in aiding him in his fight against trusts when they were crushing him, as has the Senator from Arizona himself. I have campaigned at my own expense in the States of Tennessee, Ohio, West Virginia, Virginia, and Maryland in defense of this right of the farmer, and I have never accepted one dime of compensation for it. Ten of the best years of my life I have given in a labor of love in aiding and assisting farmers' organizations.

But I did not then, and I do now now, Mr. President, ask for the farmer more than I would ask for any other industry. I was never a member of any combination of men for the purpose of securing an unearned increment or an advantage out of a Republican tariff bill. I do not mean to intimate that the farmers' bloc is doing that sort of thing now, but I do mean to say that Democrats, whether from agricultural districts or not, should keep away from the fleshpots of Egypt when they are writing a tariff bill.

Mr. President, I wish to call the attention of the Senator from Arizona to this statement. He has argued here that if protection is a good thing for the manufacturer it is a good thing for the farmer, and both ought to have it. It is true that protection was a good thing for a few robber barons. Protection was infallibly a good thing for the weavers of woolen and cotton fabrics. It was a good thing for the makers of rails and structural steel. But while it fattened a few hundred multimillionaires it plundered a hundred million voiceless and helpless consumers.

Will it be said that the agriculturists of this country will close their eyes and their ears and deaden their consciences to the iniquity of plundering the great masses of the people and will say, "If it made a manufacturer rich, no matter how many it plunders it will make the farmer rich, too. Will we recant all we have said when years ago we denounced you as pirates upon an industrial sea if you will only make us partners in the piracy?"

The farmers of Kentucky will not be caught on that hook, will not be deluded by that policy, will not be bought by that abominable thing.

Mr. WATSON of Indiana. Mr. President, will my friend the Senator from Kentucky permit a question?

Mr. STANLEY. Certainly.

Mr. WATSON of Indiana. Not a statement, but a question.

Mr. STANLEY. Either one.

Mr. WATSON of Indiana. I can not make a statement without taking the Senator off the floor.

Mr. STANLEY. It would be a pity to do that.

Mr. WATSON of Indiana. In the speech which the Senator made a moment ago he used this language:

> She saw her hemp fields desolated. She practically abandoned that great industry rather than abandon the truth, for she loves the truth better than she loves the dirty dollars of protection.

Mr. STANLEY. Yes, sir.

Mr. WATSON of Indiana. What was it that destroyed the hemp industry of Kentucky? Was it free trade?

Mr. STANLEY. The hemp industry of Kentucky came in sharp competition with the sea grasses and other fabrics imported from abroad for the making of rope and other fabrics, and their exclusion imposed an inordinate burden upon the consumer.

Mr. WATSON of Indiana. In other words, it was either free trade or a tariff for revenue only?

Mr. STANLEY. No; it was not that.

Mr. WATSON of Indiana. It was a matter of protection of Kentucky's hemp industry?

Mr. STANLEY. No.

Mr. WATSON of Indiana. What was it, then?

Mr. STANLEY. The hemp industry could not overcome foreign competition under the circumstances without a duty——

Mr. WATSON of Indiana. A protective-tariff duty?

Mr. STANELY. Wait a moment—without such a duty as would have imposed an inordinate burden upon the consumer. In other words, it would have taken a two or three hundred per cent duty and almost an embargo to have forced the consumer to use hempen rope to the exclusion of all sea grass or cotton rope. The Kentuckian found that he could make a living by cultivating his fertile fields, without imposing an indefensible tax upon all the other people in the United States, and he was too honest a man to ask to have this inequitable duty taken off his plows, off his trace chains, off of his harness, off of everything else, in order that he might raise protected hemp. From that day to this the Democrats of Kentucky have never demanded a duty upon hemp, which, if it had been high enough, might, of course, have maintained the industry to this day.

Mr. WATSON of Indiana. But I return now to the question, "She saw her hemp fields desolated;" that is to say, desolated by the failure of Congress to place a protective tariff rate on hemp.

Mr. STANLEY. Certainly; she would have abandoned profit before principle.

Mr. WATSON of Indiana. "She practically abandoned that industry rather than abandon the truth, for she loves the truth better than she loves the dollars of protection."

Mr. STANLEY. Yes. She never allowed this personal interest to interfere with her political principles.

Mr. WATSON of Indiana. That is to say, if Kentucky had maintained a protective duty she would have had her hemp industry?

Mr. STANLEY. Yes. Had the duty been high enough.

Mr. WATSON of Indiana. She abandoned the hemp industry because she wanted to abandon protection?

Mr. STANLEY. Certainly, I would answer. She would have quit raising hemp before she would have accepted the heresy of protection.

Mr. WATSON of Indiana. So that free trade desolated the fields of hemp in Kentucky?

Mr. STANLEY. It made the hemp-raising industry in Kentucky less profitable; yes.

Mr. SMOOT. Mr. President——

Mr. STANLEY. Let me finish with the Senator from Indiana before I take up another. It affected the profit upon hemp, but it did not desolate the fields upon which it grew. It discouraged the growing of hemp, but we found the growing of other things more profitable in Kentucky. We did not destroy the Imperial Valley by ceasing to subsidize Arizona long-staple cotton. We did not destroy Kentucky by ceasing to put a duty upon flax and hemp. We simply refused to subsidize a nonprofitable industry, and the agriculturist availed himself of the opportunity to engage in a profitable industry. I will say that Kentucky is better off to-day than if she had continued to raise hemp, because she has found other industries and other products more profitable, and the raising of those products has not imposed a burden upon the public generally.

Mr. WATSON of Indiana. If I may ask my friend another question, if the fields that were desolated by free trade began to raise other products, were not those other products protected?

Mr. STANLEY. They were not. It was impossible to protect them.

Mr. WATSON of Indiana. What were they?

Mr. STANLEY. Kentucky raises tobacco for export. You can not protect that. She raises cotton and she raises corn, and you can not protect those.

Mr. WATSON of Indiana. What else did Kentucky raise?

Mr. STANLEY. She raised wheat, and you can not protect wheat, as the Senator knows.

Mr. WATSON of Indiana. Did not Kentucky also raise cattle and sheep and hogs?

Mr. STANLEY. Yes.

Mr. WATSON of Indiana. Did Kentucky raise anything else?

Mr. STANLEY. Kentucky can raise almost anything that can be raised on earth or in heaven except Republicans. Kentucky is not very good at raising them in the central part of the State. [Laughter.]

Mr. SMOOT. Mr. President, will the Senator from Kentucky yield to me?

Mr. STANLEY. Certainly.

Mr. SMOOT. Then, I understand that when Senator Bradley, of Kentucky, was here in the year 1909 and asked for a duty upon jute butts and hemp he did not represent the sentiment of the people of Kentucky?

Mr. STANLEY. He did not represent the sentiment of the members of my party. I am a Democrat.

Mr. SMOOT. But he represented the people who sent him to the Senate.

Mr. STANLEY. He represented the party which nominated him.

Mr. SMOOT. And there was nobody who was any more insistent upon having a duty upon jute butts and flax and hemp than was Senator Bradley.

Mr. STANLEY. That is true.

Mr. SMOOT. I remember his standing at that desk [indicating] and pleading almost for a full day for such a duty, and explaining what it meant to the good people of Kentucky. I know he touched my heart.

Mr. STANLEY. Naturally he would do that.

Mr. SMOOT. Perhaps there was in his appeal to me something of what might be denominated the "call of the wild"——

Mr. STANLEY. Perhaps it was "the tie that binds."

Mr. SMOOT. For my father was born in Kentucky. In yielding to his wishes for the imposition of such a duty, I felt that I was not only acting as a protectionist but it gave me a great deal of pleasure to help the good people of Kentucky by protecting an industry which meant so much to them.

Mr. STANLEY. Mr. President, Senator Bradley was a great man in many respects. He was the most gifted orator in his party. He was a sincere and stalwart protectionist, as is the senior Senator from Utah. He demanded protection as a principle; he did not spread it around as a bait. He was not a "bloc" protectionist, but he was a protectionist by conviction. He was not willing to trade his party off in or outside of the organization. He was a stalwart of stalwarts. He was the greatest apostle of error that Kentucky ever produced; but he was unfortunately committed to this benighted doctrine, and in an hour of mental aberration Kentucky forgot herself and sent a great man with a bad policy to the Senate. She will never do it any more. Senator Bradley, however, was not elected by the Democracy of Kentucky, and three-fourths of the white men in Kentucky who once raised hemp voted against him, and would do so again.

Mr. SMOOT. But the Senator from Kentucky has forgotten that Kentucky has already forgotten herself, and that, as the result of the last election, we now have a Republican Senator from Kentucky.

Mr. STANLEY. Yes; and he is one of the best of his kind, but Kentucky will not forget herself in that way any more.

Mr. President, to get back to the discussion, the Senator from Arizona has stated that if protection is a good thing for the manufacturer it is a good thing for the farmer. I deny it. Good, used in that connection, can only mean profitable, I will say to the Senator. It can not mean just; it can not mean fair; it can not mean democratic. If protection is a profitable and a pernicious practice which has made the manufacturers rich, the farmers of Kentucky have no right to ask me to lend my vote to a profitable and pernicious practice in order that it may make them rich.

Mr. ASHURST. Will the Senator from Kentucky yield to me?

Mr. STANLEY. Certainly, and I will not accuse the Senator of being a fool when I do so.

Mr. ASHURST. I did not accuse the Senator from Kentucky or any Senator of being a fool. That would have been most unparliamentary and offensive.

Mr. STANLEY. I hope the Senator did not mean that.

Mr. ASHURST. I did not say it. I did not apply it to the Senator from Kentucky at all. I never asked the Senator about his vote. I never asked any man how he was going to vote. The farm bloc, however, had been asked if rates of duty in conformity with the farmers' views were provided, what would we do? Without a single solitary exception we have said, "If your bill is honest, you need not fear; we shall vote for it; but if your bill is dishonest, we shall vote against it."

Now, why is it necessary to argue as if I were here urging a protective tariff system? I have not done that. The Sena-

tor, I think, must reflect for a moment. I have never said other than that my people can live under free trade and the farmer can live under free trade, if everything else is under free trade; and also that the country can get along under a protective tariff if all things are protected. All of the sophistry, all of the attempted logic can not get around that. If protection is just and right to the products of the factory, it is just and right to the products of the farm. Let the Senator answer the question as to why protection is good for the factory but bad for the farmer; or why, if we are to have a protective tariff policy, it is all right to have the factory share in the benefits of the policy but that the farm shall not share in them? Do I make myself clear?

Let me say now that the tariff bloc, so far as its Democratic members are concerned, are profoundly indifferent as to what is done with the tariff so long as all men are treated alike. There is one thing which the Democratic members of the tariff bloc resent and to which we object, and that is any suggestion that we are for free trade. Do Senators understand that? We resent, we object to any suggestion that a Democrat is for free trade. Democratic Presidents have been lost; Democratic Senators who ought to have been reelected have lost their seats; Democratic Representatives who ought to have been reelected have lost their seats because they did not make that fact clear. There is no such thing as free trade except in Greenland and Spitzbergen. Free trade exists only in the brain of theorists who hibernate. Do I make myself clear? The Democratic members of the farm bloc are opposed to free trade. That is clear, is it not? Very well.

Then, are we for protection? I have told the Senator—and he will pardon me for referring to him personally—and I have told the Senate that, with billions of dollars of revenue to raise, with the people's backs now bent double from taxation, by what theory of government, by what principle of justice can it be said, "We will take revenue for the Treasury by taxing shoes, but not take it by taxing hides"? How can a Democrat seeking revenue for the Government excuse in the Underwood law putting a duty of 35 cents a pound on one fabricated article and then putting the so-called raw material on the free list? That was inexcusable; it was unjustifiable; it should not be done. All the farm bloc has ever asked, ever fought for, or ever contended for on this side is that, on whatever basis tariff duties are based, they shall apply to all citizens alike.

The Senator says he does not belong to the farm bloc. There are many Senators on both sides who do not belong to that bloc.

Mr. STANLEY. I have not said anything about belonging to the farm bloc.

Mr. ASHURST. The Senator disclaimed any membership in it.

Mr. STANLEY. No; I did not.

Mr. ASHURST. Then, I beg the Senator's pardon. I thought he disclaimed membership in it. May I welcome him to membership?

Mr. STANLEY. I would be delighted to cooperate with the Senator in any Democratic way to help the farmer.

Mr. ASHURST. What more Democratic way can be found to help the farmer than to say that if a tariff law shall be passed it shall apply to him the same as to all other citizens? That is all we ask. Now I am going to bring this debate to a close, so far as I am concerned. In the first place, I want lunch, and, in the second place, I am always at a disadvantage when I debate with so able, astute, and trained a debater as the Senator from Kentucky.

Mr. STANLEY. Mr. President, in the first place, I wish to be distinctly understood as not condemning in any way the farm bloc. I represent an agricultural State. In the next place, I am very anxious to understand to what extent agriculturists are to be committed to a protective policy. There is an insidious fallacy—and I say it most respectfully—in the argument of the able Senator from Arizona. I should deeply regret to see Democrats on this side of the Chamber ready and willing to accept any kind of protection so long as it affected their own individual States, their own individual constituents, and then raising their voices in horror of any kind of protection when it applied to some other industry and to some other section. Of course, if it is right and just to all parties to foster industries by imposing duties and artificially increasing the cost of the article, then the principle should be spread out over the whole country.

Mr. President, the converse of that proposition is that which I wish to impress. If the levying of duties for the purpose of making an unprofitable industry profitable, for the purpose of supplying by law that which is not and can not be produced by labor, is wrong when applied to a factory, it is indefensible when applied to a farm. If, as the Democrats have said for 100 years, it is indefensible to use the taxing power of the Government, not for the purpose of collecting revenue, but for the purpose of enriching its favorites, if that is wrong when applied to the steel mills and to the boot and shoe factories and to the cotton and woolen mills of the country, if it is wrong when applied to its mines, if it is wrong when applied to any other form of industry, then it is equally indefensible when applied to agriculture.

Mr. SHORTRIDGE. Mr. President, may I ask the Senator from Kentucky a question?

The PRESIDING OFFICER. Does the Senator from Kentucky yield to the Senator from California?

Mr. STANLEY. Certainly.

Mr. SHORTRIDGE. We produce rice in California.

Mr. STANLEY. Yes.

Mr. SHORTRIDGE. Rice is also produced in Arkansas, in Louisiana, and in other States.

Mr. STANLEY. Yes.

Mr. SHORTRIDGE. Now, to reduce this to a concrete illustration, does the Senator think that it is economically wrong to impose a protective tariff on rice? Is it economically wrong or erroneous to impose a tariff for the protection, as we say, of the rice industry in California or Arkansas or Louisiana?

Mr. STANLEY. I should say, Mr. President, that if an essential article of food like rice can be produced in the markets of the world at a reasonable price, and it is necessary to impose a duty of 100 or 200 per cent upon it, to double the cost of an article of food, in order to create an industry in this country such as the raising of rice, it would be economically indefensible.

Mr. SHORTRIDGE. But it is conceded, is it not, that foreign countries, certain oriental and other countries, can produce rice far more cheaply than we?

Mr. STANLEY. That may be true.

Mr. SHORTRIDGE. Does the Senator think that we should go out of the rice business in America and be dependent upon the foreigner for that staple article of food?

Mr. STANLEY. If it is necessary to put a duty of 100 or 200 per cent upon the hungry mouths of a hundred million people in order to make profitable a few thousand acres in California, Louisiana, and the Carolinas, I certainly would take off the duty without one moment's hesitation.

Mr. WATSON of Indiana. Mr. President, will the Senator permit me to ask him a question right there?

Mr. STANLEY. I am not speaking for anybody but STANLEY, of Kentucky, understand.

Mr. WATSON of Indiana. I am asking STANLEY, of Kentucky.

Mr. STANLEY. All right.

Mr. WATSON of Indiana. Does the Senator, then, assume as the basis of his argument the general proposition that we should buy wherever we can buy cheapest, regardless of all other conditions?

Mr. STANLEY. No; I have not assumed that at all. There are many conditions——

Mr. WATSON of Indiana. Is not that the necessary and logical result of the Senator's previous statements? We can not produce rice in the United States as cheaply as it is produced in China; therefore we should abandon the rice fields of the United States and buy in China; because we can get rice cheaper in China than we can raise it in the United States. If that applies to rice, does it not apply equally to everything else?

Mr. STANLEY. Not necessarily.

Mr. WATSON of Indiana. Does it not apply to sugar?

Mr. STANLEY. It might.

Mr. WATSON of Indiana. In other words, does not the Senator go back to the old Democratic doctrine of cheapness—that is to say, that we shall buy wherever in the world we can buy the cheapest, and that the doctrine of protection is a hothousing doctrine?

Mr. STANLEY. The Senator is stating a general principle to which I might or might not give approval. I would rather he would confine himself to specific cases. The condition of the world is such at the present time that hard-and-fast rules can not be applied to all countries, because so many different unknown quantities enter into the equation of international relations. For instance, I would not apply the same rule to Belgium and to Germany at the present time.

Mr. WATSON of Indiana. That is quite true; but, if the Senator will permit me, while I do not like to interrupt him, the Democrats are always stating that the object of a protective tariff is to raise the price, and that they are against protection because it raises the price, and causes the consumer to pay a higher price than he otherwise would. If that be true, does not

that drive the Senator irresistibly to the conclusion that we must buy wherever we can buy cheapest?

Mr. STANLEY. Not universally and necessarily. I am at a loss to understand just what the learned Senator from Indiana means by the word "buy." We, in fact, do not buy in international commerce. There is no such thing as sending over a shipload of money to China for a shipload of rice; there is no such thing as sending a ship full of coin to Belgium for a shipload of linen or cut glass; or sending a shipload of money to Delft for a shipload of pottery; or to Germany for a shipload of razor blades.

International trade is international barter; and when we get rice from the Orient, or linen or silk fabrics from Belgium or France, or steel and electrical instruments from Germany, we send on the boat that brings those back our semifinished steel; we send the products of our field and farm and mine. It is a matter of trade; and it is better to trade the things we can produce cheaply for the things that we will produce at an unjustifiable cost than to destroy this mutually beneficial barter, and buy at a high price in the market everything that we need.

Mr. WATSON of Indiana. But my friend has said that because it costs more to produce rice in the United States than in China we ought to buy it in China, and that we ought not by any system of protection to maintain the rice fields of the United States.

Mr. STANLEY. I do not say that.

Mr. WATSON of Indiana. Did not the Senator answer my friend from California that way?

Mr. STANLEY. Well, let the Senator go ahead, and I will explain.

Mr. WATSON of Indiana. If that be true as to rice, is not that true as to every other product? Germany to-day is manufacturing a very great number of products that we produce in the United States at a very small percentage of what we are producing them for in the United States, owing to conditions there and the rate of exchange. If the Senator's statement be economically sound as to rice, why is it not sound as to everything that Germany produces and that she can send into this country; and why is not the doctrine of protection, therefore, wrong as to all those commodities that come into this country from any other country; and why should we not go abroad to buy wherever we can buy the cheapest, if the Senator's theory is right?

Mr. STANLEY. Mr. President, the Senator from Kentucky never has said that he would oppose any tariff duty upon rice because rice is produced cheaper in China than in the United States. A reasonable revenue duty, a reasonable impost which would go into the revenues of the country and would not result in an enormous and unjustifiable increase in the cost of a necessary of life, is a very different question, a very different condition, from that of which the Senator spoke. The Senator from Kentucky explicitly stated his position, that he is unalterably opposed not to a revenue duty but to a duty imposed for the purpose of protection which inordinately increases the duty in order to hothouse an industry in this country; and whenever the difference in the cost of production abroad and at home is so great that the duty would result in an increase of 100 or 200 per cent in the price of that commodity, and where that commodity is an essential, especially of food, I certainly should be against the duty.

Mr. WATSON of Georgia. Mr. President——

Mr. WATSON of Indiana. But suppose that it cost 100 per cent more to make it in this country than to make it abroad?

Mr. STANLEY. Then let it come in from abroad.

Mr. WATSON of Indiana. At what percentage would the Senator stop? Suppose it cost 50 per cent more to make it here than to make it abroad, and it took a duty of 50 per cent to equalize the cost of production abroad and at home, then would the Senator let the foreign product come in free?

Mr. STANLEY. Without going down to the nickel, I would stop at a reasonable revenue duty.

Mr. WATSON of Indiana. Oh, a revenue duty?

Mr. STANLEY. Certainly.

Mr. WATSON of Indiana. Then is the Senator opposed to all protective duties?

Mr. STANLEY. I am opposed to levying any duty simply for the purpose of increasing the cost of a commodity produced by an industry which is not indigenous and without the duty could not be maintained in this country.

Mr. BROUSSARD. Mr. President——

Mr. WATSON of Indiana. If the Senator from Louisiana will pardon me, I should like to have the learned Senator from Kentucky answer my question. To put a revenue duty on rice would in no wise protect it in the United States. For many decades the Democratic Party in this body believed in a tariff for revenue, with incidental protection——

Mr. STANLEY. Yes.

Mr. WATSON of Indiana. Which, of course, was as incongruous a proposition as the mind of man ever conceived, at the same time denouncing protection as robbery, and all that sort of thing, so that we were to have incidental robbery. They abandoned that along about the time of the Civil War; but it was not until 1884 that any Democratic platform ever boldly declared for a tariff for revenue only.

What I want to point out is this: If, in the case of rice, a revenue duty would not enable it to be raised in the United States, does the Senator say that we must of necessity do what he said free trade did to the hemp fields in Kentucky—desolate those fields—and must we go abroad to buy that rice of China, simply because a protective duty on the rice coming into this country from China would be necessary to enable us to continue to grow it in the United States?

Mr. STANLEY. I thought I answered the Senator sufficiently clearly; but I will answer him again.

Mr. WATSON of Indiana. Let me ask the Senator this final question: Is the Senator, then, opposed to any protective tariff on any imported article?

Mr. STANLEY. That would depend. There might be certain conditions, where the national defense, for instance, required it, where I would not oppose a duty that would enable an absolutely new industry, predicated upon the licensing of a patent, for the time being to be fostered by the Government. There are exceptions to all general rules; but I am certainly unalterably opposed to the pernicious principle of levying a duty upon the whole people to give a bonus, a subsidy, to a few people who are engaged in business, whose prosperity depends upon the operation of the law and not upon its suitability to this country or the skill or capacity of those who are engaged in it.

Mr. President, as I rose to state in the beginning, no man can feel and no man has demonstrated a more devout attachment to the interests of the agriculturists than I. My people have been agriculturists. I have the honor to represent an agricultural community. I believe, with the father of Democracy, that every other industry finds its roots in the soil. Without the prosperity of the tiller of the soil, your factories will be empty, your great arteries of commerce stilled, your mines deserted, and the grass will grow in the streets of your most populous cities. But I believe with Jefferson in cultivating agriculture, and commerce as her handmaiden. I believe that the tilling of the soil, that agriculture, is an integral part of the industrial life of America, and that the statesman can not encourage any business to the detriment or the injustice of any other legitimate business, and defend his course before his conscience, his constitutency, or his God.

I have seen a blacksmith with one arm, that of a Titan, and the other that of a pigmy. That was not development; that was deformity, and as Members of this body you can not approve of a policy for the development of agriculture, commerce, mining, or manufacturing by placing an indefensible burden or an indefensible tax upon any other industry, thus not developing, but deforming, the industrial life of America.

They are as interwoven as the limbs and the head and heart in the physical body. I would encourage agriculture by just legislation, by absolute justice before the law, by justice of taxation, and I would foster with it commerce as its handmaiden, and industries to keep commerce and agriculture both alive.

I will never abandon the principles of my party. I will never abandon what is more and deeper and bigger and broader, the principles of just legislation, of justifiable taxation, to give a bonus to a majority of my people, because they happen to be the recipients of that bonus.

I will not defend an iniquitous duty, an indefensible duty, an inordinate duty, upon any essential of life, because it is produced in my district. I would not put a duty upon the wheat of an American farmer if I believe that it will make bread unjustifiably high to the poor and the hungry of the world. I will not put an indefensible duty upon the wool of the sheep growers of Kentucky if it adds an unjustifiable and an indefensible weight to the toiling masses. I will not make America naked in order to make the sheep grower of Kentucky fat. I will apply the same rules of justice to the agriculturist, though he number as ten to one the manufacturers of Kentucky, that I do to the manufacturers, and when I can not live true to the principles of the fathers, true to the basic principles of a party for which my fathers stood and for which in war they were willing to fight or to fall; when I must turn apostate to the principles of Democracy, and the same principles of legislation, to meet the demands

of a class or bloc, then I will be ready and willing to surrender the high commission I hold in this honorable body.

Mr. SHORTRIDGE. May I ask the Senator a question?

Mr. STANLEY. Certainly.

Mr. SHORTRIDGE. I assume the Senator regards Thomas Jefferson as an original and a great Democrat?

Mr. STANLEY. I do.

Mr. SHORTRIDGE. Though he did not bear that title exactly. The Senator also assumes that Andrew Jackson was a great, valiant Democrat?

Mr. STANLEY. I do.

Mr. SHORTRIDGE. I undertake to say that they were both in favor of a protective tariff, and I shall be able to show it by their writings, their letters, and their acts.

I want to ask the Senator this question, testing the correctness of principles here clashing. In California we have a fairly intelligent people; we have schools; we have colleges and universities; we have many churches and many law-abiding people—the average community of an American State. Those men and women of our race, our blood, and our type and standard of life and living can not compete with oriental labor and live. They can not do it. We are engaged in many industries in California the products of which come into competition with oriental industries and products, the only difference in the competition being the question of freight across the Pacific Ocean.

I stated it somewhat dogmatically, but as an economic fact, that my people and yours in California can not compete with the cheap pauper labor of China. The only way this Government can help California and our people is by imposing tariff duties upon these competing articles. Does the Senator think that we should remove these protective duties and bring about on our part this suicidal competition with the cheap oriental labor? It is a very practical thing with us. It comes home to men's firesides and bosoms, perhaps even more directly than the problem confronting Louisiana yonder in regard to her sugar.

I want to test this matter and in candor ask the question, knowing I will receive a candid answer: Does the Senator think we should remove these protective duties, or not impose protective duties, in respect to the industries immediately and directly engaged in by the people of California? If what the Senator has said with emphasis and earnestness be true economically and for the welfare of our country, then I draw this conclusion, that we should remove these protective duties, the result of which will be certain and fatal to California. Wherefore, to repeat myself, what is the Senator's position with respect to the levying of duties on industries in which we are directly engaged in California and which come directly in competition with the products of the oriental countries? I have mentioned China. I would include also Japan and the farther east.

Mr. STANLEY. Mr. President, it is very difficult to answer a general question, and I would not attempt to answer the Senator from California except candidly. I have expressed my emphatic dissent from the doctrine of protection, my inveterate hostility and abhorrence of the policy of creating industries by the operation of law which, but for the favoring statute, would never have proven profitable in this country.

It is nevertheless true that vast industries have been hothoused by law, and that millions have been invested in those industries. I am not prepared to say that at one fell blow I would smash all those industries, if the removal of all protective duties would do it. The doctor may believe in the evils of excessive alcoholism, and yet he would give alcohol to a patient who is suffering from delirium. It may be necessary, to bring us back to an open and honest revenue basis or system of collecting our import duties, to temporize with these industries which have been unduly and unreasonably fostered. But I would write every tariff bill with the ultimate goal of a duty sufficient to raise the necessary revenue, and where the purpose of the duty should be the securing of a revenue, and not the fostering of an industry.

Where there is an incidental protection that does not amount to extortion upon the consumer, I would not always object to merely incidental protection.

Mr. BROUSSARD. Mr. President, I had not intended to address the Senate, but I do wish to say a few words in connection with what has been suggested with reference to the policy of the Government as applied to industries in our country. I personally have never been able to draw the line where the tariff for revenue stops and the tariff for protection begins. For instance, some 12 or 15 years ago, when the Government needed less than $1,000,000,000 annually to carry on the affairs of the Government, the theory of a tariff for revenue only necessarily would have required much less than would be justified even under that theory to be applied as a tariff when we now need annually $5,000,000,000 of revenue.

But if the object of any definite policy in this country is only to impose such tariff as is considered necessary for the revenue, and if we then take that subject which has been referred to several times, the rice industry, we find that a tariff based upon the Democratic theory may be just a little bit less than what is absolutely essential to maintain that industry in this country when competing with cheap, Asiatic labor. Therefore the Democratic theory would be to destroy that industry by considering only the amount of money which the Government needed under pre-war conditions.

This proved to be the case under the Underwood law, because during the 10 months of its operation previous to the World War in 1914 the statistics inform us that the importations of clean rice increased fourfold over the previous year. The result was that the duty imposed at that time would defeat itself because it would destroy the industry and give the control to foreigners. When they disregard the needs of the particular industry in this country, they forget that the numerous American citizens employed in that industry would be absolutely thrown out of employment and forget that which to me is of primary importance. But, considering it only on the theory upon which they base their argument, that of receiving only such revenue as the Government needs, that very industry just discussed, the rice industry, demonstrates that within a period of two or three years, after the tariff act of 1913, the industry would be absolutely wiped out as a domestic industry and that source of wealth absolutely destroyed. So that argument does not appeal to me at all.

I prefer to consider first and foremost the interests of the American people employed and the interests of those whose entire assets and finances are involved in the industry; therefore when the question arises of fixing a duty for that particular industry—and when I refer to the rice industry I am not referring to it otherwise than as a mere illustration, because my theory has always been that what I desire for my people I am willing to grant to other industries, no matter what section of the country it may benefit—when we come to frame such a tariff as we are now attempting to do my only concern is to fix such a tariff as, applied to an industry which has demonstrated that it is possible of development, will sustain it and maintain it.

When we discuss the rice industry as it has been discussed this afternoon, I remind Senators that the statistics show that in 1895 it was so insignificant that the Agricultural Yearbook for that year did not even mention it; but in 1921 we produced in this country 1,400,000 pounds of rice. That shows that we have progressed to the point in that limited time where we are supplying to the domestic market over two-thirds of its demands, and with proper protection in a few years the industry will meet all the requirements for this market, and when it does then the tariff will not affect it at all and it will need no protection. Thus another industry will be built in the United States which will supply local needs entirely through the efforts of American capital and American labor, who buy entirely everything they need in the domestic market.

Mr. STANLEY. Mr. President, will my good friend from Louisiana yield to me?

Mr. BROUSSARD. With pleasure.

Mr. STANLEY. I hesitate to interrupt the trend of the splendid argument of the Senator from Louisiana, but when he begins to talk about the tariff and the needs of Louisiana for protection as regards this particular industry I feel almost like Agrippa did before old Paul, "Almost thou persuadest me to be a Christian." But I can not quite agree with the Senator.

If what the Senator says is correct, that until 1910 there was no rice worth mentioning raised in this country, what becomes of the horrible sight invoked by the imaginative Senator from California [Mr. SHORTRIDGE], who says that if we do not have a duty on rice the Japanese will reduce all the people in California to penury? What did they do before 1910 if they did not raise rice?

Mr. BROUSSARD. They did raise rice before 1910, I will say to the Senator from Kentucky.

Mr. STANLEY. I am not agreeing with what the Senator said, that it was a negligible quantity.

Mr. BROUSSARD. The rice industry has been a large industry in my State for many years. It was an important industry locally in the State many years before 1895, but about 1894 other States took it up and it has developed wonderfully. For instance, the development in my own State has reached the point where there are 700,000 acres of land in cultivation producing rice. The State of California has taken it up more re-

cently than 1895, but it has made wonderful progress there, and so it has in Arkansas, Texas, and other States. Without adequate protection to counterbalance the difference in the cost of production and labor to maintain the American standard of life as compared with a Chinese who works for $8.60 per year, it could have made no progress at all. The result would be that the Government under the Democratic theory would prevent its development or destroy it. It would destroy through its policy what promises in the very near future to be a self-sustaining industry in this country.

It would have gone nowhere at all except with an adequate protection. Even under the previous Democratic tariff law the duty was inadequate. The Democratic Party has not always been a free-trade party. Its leaders have not advocated free trade.

Mr. ASHURST. Mr. President——

The PRESIDING OFFICER (Mr. ODDIE in the chair). Does the Senator from Louisiana yield to the Senator from Arizona?

Mr. BROUSSARD. I yield.

Mr. ASHURST. The Senator says the Democratic Party has not always been a free-trade party. Let me say to him in brotherly love and candor that it is not now a free-trade party. The Senator's language implies that it might be. That must never be allowed to go out before the country.

Mr. BROUSSARD. But there are many advocates of free trade in the Democratic ranks, too many, according to my own views, so far as that is concerned.

Mr. WATSON of Georgia. Mr. President——

Mr. BROUSSARD. I yield to the Senator from Georgia.

Mr. WATSON of Georgia. I think if my friend from Arizona will examine the Democratic platforms since the Civil War he will find the party does declare for free trade.

Mr. STANLEY. Mr. President——

Mr. BROUSSARD. I yield to the Senator from Kentucky.

Mr. STANLEY. I dislike to see this debate degenerate into what Bacon would call a logomachy. There are no two men who seem to agree about what free trade means. Those who inveigh against free trade erect a man of straw in assuming that free trade is trade unrestricted and untouched by the imposition of revenues. Nobody I ever heard of is in favor of that. The collection of taxes by the imposition of duties upon certain imports is practiced by free-trade countries, so called, just as much as by protective countries.

If the Senator means to say that a free trader is a man who would impose no duties, I know of no free trader. If the Senator means to say that a free trader is a man who would, as far as possible, collect his duties from noncompetitive products in order that a maximum of income might come to the Government from a minimum duty, I know of many who advocate such a theory.

Mr. BROUSSARD. Mr. President, I think I have covered the subject that I wanted to discuss, which was suggested to me by the colloquies in which were involved two of the main staple industries of my State.

I agree with the Senator from Kentucky [Mr. STANLEY] that all Democrats are not free traders. There are a very few, I think, who are free traders; but there are two other classes of Democrats—one the tariff for revenue Democrat and the other the Democrat who goes a little further and is for a tariff for revenue with incidental protection. Surrounding the tariff for revenue only Democrat, the tariff for revenue with incidental protection Democrat, and the man who stands for protection I think there is a twilight zone within which it is very difficult for anybody to draw a line of demarcation between the three classes.

Mr. WATSON of Georgia. Mr. President, returning to my friend the senior Senator from Massachusetts [Mr. LODGE], I call attention to the fact that he stated that the tariff of 1828, which was enacted some time before Dickens's American Notes were written and previous to his reference to pauperism, was called the "tariff of abominations." In his correction of my mistake as to the date of the Walker tariff the Senator from Massachusetts fell into two errors of his own. What Dickens said about there being no pauperism in New England does not occur in his American Notes, but in a private letter to John Forster, and the "tariff of abominations" was not in existence when Mr. Dickens in January, 1842, visited Boston. In Taylor's splendid work "Is Protection a Benefit?" I find the following on page 44:

> Under these circumstances, in 1833, our fifth tariff was passed, called the "compromise tariff." The presidential election was just over. Clay went into the canvass against Jackson as an advocate of high protection. He was beaten in the race. The country seemed to have spoken against protection, and Congress spent the entire winter in wrangles over the tariff. Finally, near the end of the session, Clay proposed a new bill as a substitute for all others. Calhoun's support was secured, and the united influence of the two was sufficient to carry it through against the high protectionists, led by Webster. It went into effect just in time to prevent the hostile collision between South Carolina and the General Government over the nullification troubles. The law provided for a gradual reduction of all duties above 20 per cent until they should reach that figure on the home valuation. This was what is called a "horizontal tariff." Under its operation the duties were slowly lowered. * * * This tariff, as its name implies, was a mere political expedient.

That is to say, it brought about peace between Jackson, Clay, and Webster on one side, and the nullifiers on the other.

That was the tariff that was in operation and had been for nine years when Charles Dickens visited Boston and spoke of the splendid benefits and results which that low tariff had brought about. It was after that time that the tariff of the Whig Party was passed in 1842; of course not in January, but after Mr. Dickens wrote his letter. The "tariff of abominations" was passed in 1828, Mr. President. The compromise tariff of 1833 was in existence for nine years, carrying it beyond the time when Mr. Dickens landed in New England.

Mr. McCUMBER. Mr. President, the Senate of the United States, the greatest deliberative body in the world, as I have often heard, has now deliberated 5 hours and 20 minutes on 4 cents' worth of formic acid, and I wish to know if it is not about time that we voted on it.

SEVERAL SENATORS. Vote!

The PRESIDING OFFICER. The question is on the amendment proposed by the Senator from Oregon [Mr. MCNARY] on behalf of the Senator from Illinois [Mr. MCCORMICK] to the amendment of the committee, which will be stated.

The ASSISTANT SECRETARY. On page 2, line 25, after the words "formic acid," it is proposed to amend the amendment of the Committee on Finance by striking out the numeral "4" and inserting the numeral "6," so as to read:

> Formic acid, 6 cents per pound.

The PRESIDING OFFICER. The question is on the amendment of the Senator from Oregon to the amendment of the committee.

Mr. SIMMONS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The Secretary will call the roll.

The roll was called, and the following Senators answered to their names:

Ashurst	Harrison	McKinley	Simmons
Ball	Heflin	McLean	Smoot
Borah	Hitchcock	McNary	Spencer
Brandegee	Johnson	Nelson	Stanley
Broussard	Jones, N. Mex.	Newberry	Sterling
Bursum	Jones, Wash.	Nicholson	Sutherland
Capper	Kellogg	Norbeck	Swanson
Caraway	Kendrick	Oddie	Townsend
Curtis	Keyes	Overman	Underwood
Dial	King	Page	Wadsworth
Dillingham	Ladd	Phipps	Walsh, Mass.
Elkins	La Follette	Pittman	Warren
Fletcher	Lenroot	Poindexter	Watson, Ga.
Frelinghuysen	Lodge	Rawson	Watson, Ind.
Gooding	McCormick	Sheppard	Willis
Hale	McCumber	Shields	
Harris	McKellar	Shortridge	

Mr. HEFLIN. Mr. President, I wish to announce that the junior Senator from Nebraska [Mr. NORRIS] is in attendance upon a hearing of the Committee on Agriculture.

The PRESIDING OFFICER. Sixty-six Senators have answered to their names. A quorum of the Senate is present. The question is on the amendment offered by the Senator from Oregon [Mr. MCNARY] on behalf of the Senator from Illinois [Mr. MCCORMICK] to the amendment reported by the committee on page 2, line 25, the item relative to formic acid.

Mr. HITCHCOCK. Mr. President, I should like to ask the Senator in charge of the bill whether the effect of the change from an ad valorem duty as provided in the House bill to a specific duty is to increase or decrease the rate?

Mr. McCUMBER. The specific rate provided by the Senate bill is about the same as the ad valorem rate of the House bill, which was 25 per cent. The commodity is now worth 16 cents a pound, so that a duty of 4 cents a pound is equivalent to a duty of 25 per cent ad valorem.

Mr. HITCHCOCK. If it is the same in effect, then why is it changed?

Mr. McCUMBER. Because we have endeavored to substitute specific duties for ad valorem duties wherever we could do so.

Mr. HITCHCOCK. Why?

Mr. McCUMBER. Because we regard specific duties as better than ad valorem duties. As I have explained heretofore, it is more desirable to impose a specific duty, where it may be imposed, for the reason that the same article pays the same duty no matter from what country it is imported, whereas if a duty is imposed on the ad valorem basis, then a commodity pays one duty when coming from Germany, another duty when

coming from Japan, another duty when coming from Great Britain, and still another duty when coming from France.

Mr. HITCHCOCK. Then, is it the purpose to shut out chemical imports from Germany? Is that the purpose of the duties proposed in the chemical schedule?

Mr. McCUMBER. No; I do not think the rate of duty will shut out imports at all.

Mr. HITCHCOCK. Does the Senator accept the figures given by the Senator from Utah [Mr. KING] yesterday, which show that at the present time we are selling to Germany more chemicals than we are purchasing from her?

Mr. McCUMBER. No; I do not accept that as a condition that is at all lasting. We know something about the cheap labor and the cheap production of chemicals in Germany, and I believe that a 25 per cent ad valorem duty or an equivalent specific duty will not keep out the German article.

Mr. HITCHCOCK. The Senator realizes the necessity to the American producer of selling certain products to Germany. How are we going to sell products to Germany if we put up a barrier against the importation of her products?

Mr. McCUMBER. I do not expect we are going to sell chemicals to Germany.

Mr. HITCHCOCK. But what does the Senator expect to purchase from Germany if we impose prohibitory tariff duties against her chemicals?

Mr. McCUMBER. If the Senator desires to ask me that question again, I will answer it, although I have answered it a great many times. For 50 years we have sold Great Britain from two to three times as much as we have ever bought from her. The balance of trade has always been immensely in our favor. It did not break Great Britain during all of those years; she was able to trade with some other country and was able to buy our products. She bought our products because she could buy them probably cheaper. Every nation will go to the market which is the best purchasing market for the things it needs to purchase for its people. What we want to take care of is our own market. Let other peoples take care of theirs. I have no doubt that Germany will be able to sell her products in South America in a very short time and that she will probably be able to drive us entirely out of that market. I have no doubt that she will, to a considerable extent, drive us out of the market in the Orient, and she will get enough from those sources to buy the commodities which she needs of us. I am not worrying as to what either the United Kingdom or France or Germany will purchase from the United States as much as I am worrying about holding the market of the United States for the producers of America. That is the one important thing.

Mr. HITCHCOCK. The Senator leaves the subject which I brought up. I am not talking about trade with Great Britain. I am not talking about pre-war trade. Before the war we had a great trade with Germany, and there was a great balance in our favor, and Germany was able to pay that balance. Does the Senator think now that Germany is in any position to pay a balance of trade against her and in our favor?

Mr. McCUMBER. I have stated that I think in a very short time Germany will drive the United States out of the markets of South America and many other countries, and she will produce a sufficient balance of trade in her favor to use the same amount of money for purchasing American products of the things she must purchase from us. I do not think there has to be an exact balancing of trade as between any two nations. Each nation trades with the country with which it can trade to the best advantage. The British may have a trade with the Orient that is much superior to ours, and then we may have a trade with Great Britain which is superior to that which we have with France or with Germany. It is not dependent at all upon any equality or exact balancing of the trade relations between any two countries. Each country undoubtedly will be able to take care of its own trade. I am simply maintaining that the first duty of the American people is to so protect the American market that the American producer may be able to sell his products in his own market in competition with the products of other countries, and that is all that this tariff bill is intended to accomplish.

Mr. HITCHCOCK. I understand the Senator's anxiety that our market is going to be flooded and that our producers are going to be driven out of business; but the Senator knows very well these facts: Before the war the United States had an enormous balance of trade in our favor against all the world. Taking all of the nations together, we had a great balance of trade in our favor.

The Senator knows that that balance of trade continued in our favor all through the war. The Senator knows that that balance of trade has continued all since the war; and now how is the Senator going to explain to the people of the United States how the rest of the world is going to pay us for that balance of trade? How can the Senator convince the people of the United States that we can continue to export our goods to the rest of the world when we build a Chinese wall around the country to keep exports from coming in here?

Germany can not pay us in cash. Great Britain can not pay us in cash. France can not pay us in cash. Italy can not pay us in cash. None of the countries in Europe can pay us in cash. They will have to pay us in goods if they buy our goods; and yet the Senator is deliberately erecting a wall around the United States to keep out imports, in the delusion that we can have prosperity by isolating ourselves from the rest of the world, when the only possible way in which the rest of the world can buy our goods is to sell goods to us.

Mr. McCUMBER. Mr. President, I say candidly that it would be better for us never to get paid than to close our own markets and allow the debtor countries to pay us in goods at a price that would close our own mills and factories.

Mr. HITCHCOCK. Then the Senator from North Dakota must be tickled with the present situation. Our imports are falling off. They have been falling off now for nearly three years; and I suppose he would reach the acme of happiness if the imports into this country should disappear altogether; and yet the Senator knows that as those imports have fallen month by month this country has settled deeper and deeper into a depression which is now afflicting the country from end to end. The Senator knows that it has closed the factories down to 50 per cent of their capacity. The Senator knows that it has closed the copper mines of the West. The Senator knows that it has bankrupted the South with cotton which she has not been able to sell. The Senator knows that it has resulted in forcing down the prices of agricultural products in this country until they have been sold at such prices that the farmer could not be reimbursed for his cost of production. The Senator knows all these things. He knows that to-day imports are on the decline—that they are going down all the time—and yet he deliberately enters upon the policy of erecting a wall which will keep out even the few that are coming in; and he thinks the American people can prosper by having their markets cut off in that way! He is laboring under a delusion which he will pay dearly for, and his party will wake up some day to discover that they have made the mistake of their history.

Mr. WATSON of Indiana. Mr. President, there is one thing that the Senator has neglected to say, if he will permit me.

Mr. HITCHCOCK. I yield to the Senator.

Mr. WATSON of Indiana. He knows about all these depressing facts of which the Senator speaks. The Senator failed to say that he also knows that we are still operating in the United States under the Underwood-Simmons tariff law, under which these things are occurring, and which we now propose to get rid of by proper legislation.

Those of us who are familiar with the tariff have heard, over and over again, these same old complaints. In 1890, when the McKinley law was passed, we heard these same tales of woe. The doleful prophecies of Isaiah and the mournful stanzas and lamentations of Jeremiah were sweet music as compared to the doleful predictions of these gentlemen in 1890 when the McKinley law was passed. The same thing was true when the Dingley law was passed. At that time precisely the same argument was made that the Senator from Nebraska now makes, namely, that we could not sell abroad if we did not buy abroad, and that we could not buy abroad because of the high protective-tariff wall that we were erecting; and yet, notwithstanding that oft-repeated declaration, we continued to sell more and more abroad, and in the second year after the Dingley law became operative—and it was the highest tariff law ever passed in the history of the United States—we sold for the first time more of manufactured products abroad than we bought abroad. Never was there such a degree of prosperity coming to any people as came to our people under the Dingley law, with its high rates, because everybody in the United States was at work.

Mr. HITCHCOCK. I will ask the Senator to make his speech in his own time.

Mr. WATSON of Indiana. All of our money was profitably invested, and all of our labor was profitably employed, and we had the American market for the American producer and the American consumer; and never was there such prosperity coming to any people as came to us under those high rates.

Mr. HITCHCOCK. Wait a moment.

Mr. WATSON of Indiana. Precisely the same conditions prevailed in 1908. We heard these complaints and arguments all over and over again. My friend from North Carolina——

Mr. HITCHCOCK. I ask the Senator not to go into the Senator from North Carolina until I have commented on what he has said. He has revealed, just as I thought he would, the fact that he is still living in pre-war conditions.

Mr. WATSON of Indiana. Not at all.

Mr. HITCHCOCK. He does not know that a great change has occurred in the world, and that since the time that he refers to a great economic as well as a political revolution has occurred. The time that he refers to was when the United States was a debtor Nation. The time that he refers to was when it was possible for the United States to have a great balance of trade in its favor, because the United States had great debts to Europe. Europe owned our railroads. Europe owned the steamships in which we carried our goods. Europe had her insurance companies. Europe had loaned thousands of millions of dollars in the United States, and the balance of trade could be made good by the money shipments that we had to make to Europe; but that has all changed. Instead of the United States now being the debtor Nation, Europe is debtor to the United States to the extent of many thousands of millions of dollars. Europe is stripped of her gold, and to-day we have in the United States more gold than all Europe, all the nations of Europe combined have, and our trade is in collapse because Europe is not able to pay us for our goods, and the reason why Europe is not able to pay us for our goods is because she is not able to sell enough goods to us, and you propose to limit the amount of goods that she can sell to us. You are going to limit our exports. You are going to cut down our exports.

The Senator says the present tariff law is responsible for this. It is not. You propose to make it worse. If I were amending the present tariff law I would encourage imports. I would encourage trade with Germany. I would encourage trade with every nation on the earth, because I know that they are anxious to buy our goods. I know that our farmers are suffering because other nations can not pay for our goods. I know that our cotton raisers in the South are suffering because other nations can not pay for them. I know that the great copper interests of the West are suffering because other nations can not pay for them, and I know that we have four or five million men idle in the United States to-day because we have nothing for them to do. If I were revising the tariff, and if I were representing even the views of the Republican Party of a protective tariff, I would reduce the existing tariffs. I would open trade, I would solicit trade with Germany, and in doing this I would stimulate our exports. I would put our men to work. I would open our mines. I would set our factories going. Europe is anxious for what we have, but by the action you are taking you are trying to make it impossible for her to get the things that we have for sale.

Mr. McCORMICK. Mr. President, will the Senator let me ask him a question?

Mr. HITCHCOCK. Certainly.

Mr. McCORMICK. The British Islands suffer from no oppressive protective tariff. How does the Senator account for the unemployment there, which in proportion to the population is far greater than the unemployment here?

Mr. HITCHCOCK. The British Islands are suffering, France is suffering, Germany is suffering, every country in the world is suffering, because of the practical collapse of international trade, because of the collapse of international exchange, and you are doing nothing to stimulate it. You are trying to put obstacles in the way of its revival, and you are doing it by raising a tariff against the imports from other countries, and you will rue the day.

Mr. McCORMICK. Mr. President, the Senator knows that in proportion to population the unemployment in Great Britain far, far exceeds the unemployment in any other country of western Europe. The Senator knows that the only country in western Europe where there is no protective tariff is Great Britain.

Mr. HITCHCOCK. Mr. President, I know that we have discovered now that the world is one and that America is only a fraction of the world, and that when the rest of the world suffers we suffer with it. We are suffering now, the whole world is suffering, because we have not resumed production, and we have not resumed production because we can not get international exchange, and you are imposing an obstacle in the way of international exchange. We ought to do something to put American men to work upon goods that we can sell to the rest of the world. Those idle Englishmen in the British Isles ought to be set to work, and we ought to buy and sell the things that they can make. We ought to develop production in all countries, and you are doing exactly the opposite in the bill that you are seeking to pass.

Mr. McCORMICK. Mr. President, week after week the Senator told us that the world was one during the debate on the League of Nations, and then followed the political revolution to which he made allusion a few moments ago.

The PRESIDING OFFICER. The question is on the amendment offered by the Senator from Oregon [Mr. McNARY], on behalf of the Senator from Illinois [Mr. McCORMICK], to the amendment of the committee.

The amendment to the amendment was rejected.

The PRESIDING OFFICER. The question now is on the amendment of the committee.

Mr. KING. I move to amend the committee amendment which is found on page 2, line 25, by striking out the figure "4" and inserting in lieu thereof the figures "2½," so that it will read:

Formic acid, 2½ cents per pound.

I will ask that the Secretary state the amendment, and then I want to submit a few remarks.

The PRESIDING OFFICER. The Secretary will state the amendment to the amendment of the committee.

The ASSISTANT SECRETARY. On page 2, line 25, it is proposed to amend the committee amendment by striking out the numeral "4" and inserting in lieu thereof the numerals "2½," so as to read:

Formic acid, 2½ cents per pound.

Mr. KING. Mr. President, a moment ago the Senator from North Dakota, chairman of the Committee on Finance, in reply to a question submitted by the Senator from Nebraska [Mr. HITCHCOCK], stated that the rate fixed in the Senate committee bill was substantially the same as that in the bill as it came from the House. I have no doubt the Senator intended to be accurate in that statement, but I desire to call his attention to the fact that in the operation of the bill, if it should become law, it will be observed that the Senate rate is very much higher than the House rate. Let us see.

The pre-war import price of formic acid was 4½ cents per pound. A 25 per cent ad valorem rate, that which is fixed by the House bill, would be equivalent to 1⅛ cents per pound.

Mr. SMOOT. My colleague must remember that the rates in the bill as it passed the House were based on the American valuation plan, and the lowest price under the American valuation was 16 cents, which was the basis upon which the Senator from North Dakota said it would be substantially the same as the House rate. What my colleague says as to the pre-war price being 4½ cents is true, as applied to one year. That was not what it sold for in this country, however. That was the foreign import price.

Mr. KING. The price in the domestic market was not very much in excess of that.

Mr. McCUMBER. Will the Senator yield to me?

Mr. KING. I yield.

Mr. McCUMBER. If the article goes back to the pre-war price the rate will be much above 25 per cent; but does the Senator expect that either during his life or my life any of these prices will ever go back to the pre-war basis?

Mr. KING. Mr. President, I am unable to tell. I do not know what economic tides will sweep around the world and what changes will occur in the industrial life of this and other nations. I do believe that there will be material changes in existing prices throughout the world. I hope that prices in the United States relating to many articles will reach lower levels than those which are now maintained by the trusts.

If I were to properly characterize this bill, Mr. President, I would say that it is drawn for the purpose of maintaining, and, indeed, increasing domestic prices, and it is calculated to increase the foreign prices, if not to the levels of the domestic market, at least approximately to the extortionate levels which have been maintained by combinations in the United States during and since the war. Of course, this transfer from the ad valorem, as fixed by the House, to the specific, as fixed in the Senate committee bill, is designed to aid the domestic producer. If there is a reduction in prices, as there should be in many commodities, the ad valorem would operate to make the tax less than the specific rate. Of course, if prices are to be maintained, as suggested by the Senator from North Dakota, so that the price would be 16 to 18 cents per pound, it would make little difference whether the specific of 4 cents per pound was adopted or the ad valorem of 25 per cent. But, in my opinion, there will be a reduction from the extortionate prices now charged. Sixteen cents a pound to 18 cents a pound was the wholesale price of formic acid on April 24 in the domestic market, and the import price prior to the war was from 4½ to 5 cents a pound.

Mr. McCUMBER. Mr. President, the Senator, of course, is well aware of the fact that the volume of currency in the United States is about double per capita what it was prior to the war. In other sections of the world, like Germany, it is many, many times the volume of what it was before the war. We can not by any rule suddenly return to the old standards. Deflation must necessarily be a very slow process, and that is the reason why I said that I do not think either the Senator or myself will live to see the day when the present process of deflation will bring us back to a pre-war condition. Therefore, we must presume that all these commodities will be very much higher priced than at any time prior to the war.

If I thought for a single moment that in any reasonable number of years we would get back to a pre-war basis I should not be in favor of a duty that would measure even 25 per cent upon the present value in the United States.

Mr. KING. Mr. President, I shall not digress for the purpose of attempting to show the relation between the volume of money and prices. Of course, everybody who has studied the quantitative theory of money is struck by the fact that there is some sort of a relation between the volume of primary money in a country and the prices of commodities. My opinion is, Mr. President, that Mr. Bryan and some who shared his views attributed too much importance to the quantitative theory and ascribed to it a virtue in increasing prices that was not justified. In other words, there were factors to be considered which affect prices, which were, perhaps, ignored or at least not accurately appraised. But I shall not enter into a discussion of that question nor its ramifications at this time.

But I call attention to the fact, as indicated by the Senator from North Dakota, that in this bill wherever it has been possible a change has been made from ad valorem rates to the specific rates, but not in the interest of the consuming public. The changes have been made in the interest of the manufacturers, the beneficiaries under the bill, those who profit by it, to enable them to charge higher prices for their products than justice and fair dealing would warrant. Here is an illustration: If formic acid goes down to pre-war levels, or approximately to those levels, if it should go to 6 cents a pound, for instance, and the pre-war levels were 4½ to 5 cents per pound, it is obvious that a specific rate of 4 cents per pound would be to the advantage of the manufacturer of formic acid over an ad valorem of 25 per cent. I repeat that one who examines this bill from the beginning to the end will be surprised to see the pertinacity with which its authors have adhered to the policy of removing articles from the ad valorem to the specific list.

There is very much in what my distinguished colleague, the senior Senator from Utah, has said. That view has been expressed by the chairman of the committee, that there are some advantages in placing a specific duty instead of an ad valorem duty; but when they thus have been weighed in the balance and there has been taken into consideration the disadvantages to the public as between the specific and the ad valorem rates the conclusion will be reached that the interest of the masses of the people has been disregarded. The interests profiting by this bill have sought specific rates and their demands have been acceded to in hundreds if not thousands of commodities carried by this bill.

If one reads the testimony relating to the chemical schedule, as well as the testimony dealing with other schedules, he will find the names of representatives of greedy cormorants who went before the committee and urged these high rates and changes from ad valorem to specific rates.

Just a word in regard to the suggestion made by the Senator from Nebraska [Mr. HITCHCOCK]. The Senator from North Dakota stated that we were not shipping many articles to Germany. The Senator from Nebraska asked him whether he accepted the tables which I placed in the RECORD a day or two ago, and which appear in this morning's RECORD, as to the exports for 1921 under the chemical schedule from this country to Germany and the imports from Germany to this country for the same year. The Senator did not answer the question, if I correctly interpreted his reply. I am sure he did not mean to dispute these tables.

Mr. McCUMBER. Mr. President, I did not mean to say that we never exported a dollar's worth to Germany, or anything of that kind. I simply intended to make a general statement, that our export of chemicals to Germany will be practically negligible. There may be a time before she can start her factories again, when she may demand certain chemicals for a short time, but there is no question but that Germany can produce practically all the chemicals we can produce, and she can produce them very much cheaper than it is possible for us to produce them. I make that as a general statement.

Mr. KING. Mr. President, there is always some excuse offered by our Republican friends to meet the evidence and the facts which controverts their heresies. Our Republican friends have been declaring for the past two years that with the inflation of currency in Germany that country could produce much more cheaply than could the United States, as a result of which our products would be driven from the world markets.

Mr. President, we bought from Germany last year products under this schedule to the value of $12,271,733. I asked the Department of Commerce to furnish me a statement, so far as their records would show, of our imports from Germany and our exports to Germany for the year 1921, covering the commodities found within Schedule 1. This table was furnished me and it appears on page 7162 of this morning's RECORD.

The United States imported, of commodities within Schedule 1, $12,000,000 plus, as I have just indicated, and we exported to Germany products from within this schedule of the value of $29,975,549. I would state to my friend from Nebraska that these are not my tables or my figures. They are shown by the records of the Government, which he can find in the Department of Commerce.

We exported to Germany last year, when it was alleged that because of the cheap labor in Germany she could surpass the world in the production of chemicals particularly, chemical products of the value of $30,000,000, we not only competing with her in her domestic market, but we also sold tens of millions of dollars of products in the world's markets, successfully meeting all competition.

Mr. SMOOT. Mr. President, if the Senator will allow me——

Mr. KING. I know what the Senator is going to do. He is going to call attention to petroleum as one of the large items.

Mr. SMOOT. That is one, but it is not all.

Mr. KING. If he had waited a moment, I would have called attention to that.

Mr. SMOOT. That is not what I was going to call to the Senator's attention. I know that the Senator appreciates the weakness of his statement. I am not alarmed, of course, at the statement he was going to make.

Out of this $29,000,000, of course, there was $17,000,000 of mineral oils. But that is not what I had in mind, because there are other items under the schedule. Here is the item of oil cake, $2,939,000. That does not fall under this schedule at all.

Mr. KING. I am not sure that the Senator is right as to that, but I will subtract it, and that still leaves us with over $27,000,000 exported as against $12,000,000 imported.

Mr. SMOOT. That makes over $20,000,000.

Mr. KING. Oh, no; the Senator is wrong.

Mr. SMOOT. Oh, yes; if the Senator takes $17,000,000——

Mr. KING. I am not taking $17,000,000 at this time.

Mr. SMOOT. I was not going to refer to that, except that the Senator said he was going to do so, and was going to use it. Then the balance, of course, would be less than $9,000,000.

Mr. KING. If the Senator eliminates mineral oil, which we export to Germany, amounting to $17,000,000, and oil cakes, nearly $3,000,000, it would still leave substantially $10,000,000 as against $12,000,000.

Mr. SMOOT. Then, of course, there is fertilizer, $2,184,000.

Mr. KING. I grant that. Fertilizers are products coming under this schedule, and that is what I am alluding to.

Mr. SMOOT. They are, provided they are phosphates.

Mr. KING. I may observe that some of the imports from Germany were fertilizers and constituted a part of the $12,000,000.

Mr. SMOOT. I say, if they were phosphates, then they did. I do not know whether they all came in under the head of phosphates or not.

Mr. KING. I notice under the head of "Fertilizers imported," kainite, manure salts, potash, muriate of potash, sulphate of potash, and all other fertilizers, amounting to $2,220,691. These we imported from Germany in 1921. The Senator called attention to the fact that we exported fertilizers of the value of $2,184,000, so that our exports practically balanced the imports.

The fact of the matter is that all this talk about Germany being the great competitor of the United States and the horrible monster that stands in the way of our national progress and development is one of the figments of the diseased brain of some people and is a product of the intriguing propaganda of some of the manufacturing concerns of the United States and their representatives who desire opportunity to further exploit

the American people. It is not an honest claim, nor can it be supported by the record.

The Senator from North Dakota [Mr. McCUMBER] with his predilection to prophecy—and he must have obtained that from the doughty John Knox of old, as the Senator (who is of Scotch ancestry) has the characteristics of John Knox—tells us what Germany is going to do; that Germany is going to drive us out of South America and the Orient and practically from all markets of the world.

My friend is the only one who fears that. The manufacturers do not fear it. Those who know world conditions have no apprehension of such results. Men who know the condition of Germany entertain no such fear. I have had occasion to refer briefly to Germany's condition during the debate and would not again allude to this subject except for the reference to the matter by the Senator from North Dakota. These constant averments by Republicans that our trade in the world is threatened by Germany are without foundation and are designed to deceive the American people and to frighten the Senate and the Congress into granting these indefensible rates that find expression in the bill coming from the House and now before the Senate.

I hold no brief for Germany. I have denounced Germany as bitterly as any Senator has. I have denounced kaiserism and the militaristic policies which dominated Germany for many years. I have condemned the Pan-German spirit which exhibited itself in Germany and which was largely responsible for the imperialistic career upon which Germany entered.

But I have said during the debate, and I repeat, that the war is over, and the hatreds and animosities of the past must end. I would feel ashamed to stand upon the floor of the Senate over the prostrate form of a defeated foe, a foe that is bound by the provisions of the Versailles treaty and by other conditions not necessary to now enumerate, and demand that the Senate pass this tariff bill upon the theory that Germany is a powerful and relentless industrial foe which is now menacing our industrial and economic life. Germany has under the Versailles treaty to assume billions of indemnities aggregating over $33,000,000,000. She has lost her colonial possessions, her ships, and a part of her continental territory. I am not condemning or defending the terms of the Versailles treaty as they relate to Germany. I am simply calling attention to them for the purpose of showing the absurdity of the contention that Germany now constitutes a menace to the industrial rehabilitation and development of the United States. Mr. President, the sooner Germany advances to a state of prosperity the better it will be for the business and for the industries of our country. If Germany were able to purchase more of our products, the better it would be for the United States. When Germany is in a position to buy products to the extent of $1,000,000,000 annually from our country, it can safely be stated that our industrial prosperity will be greatly advanced.

Let me add that Germany is compelled now to buy from abroad a very large part of her raw materials to make chemicals and other commodities for home consumption as well as for export, and she is compelled to buy upon a gold basis, so that in order to compete with the United States or with other nations she is compelled to go into other countries and buy their raw materials and their intermediates, paying therefor upon the basis of value fixed by gold. She must then pay the freight on these raw materials to Germany, convert them into finished products, pay the insurance and other charges and the freight to other countries if she sells beyond her borders. All these impediments must be met by her if she enters the world market.

Moreover, conditions are rapidly changing in that country. Prices are rapidly advancing. The cost of labor is increasing, and the prices of all commodities are responding to these new influences and situations. I learn from a recent cable that in Great Britain prices are advancing. Indeed, the situation in Europe furnishes indicia that the low level of prices—caused by inflation and other causes—have been reached, and that there is an unmistakable forward and upward movement in all industrial activities. Higher wages, higher transportation charges, advancing costs for rent, these and other factors will be reflected in greatly increased costs of all commodities.

I am not going to indulge in prophecy—the Senator from North Dakota has done that—but may I make the suggestion by way of reply to his predictions that we have not lost our markets in South America, and we will not do so if the business men of the United States desire to trade with the countries in South and Central America. But they must pursue the quest with ability and honesty and be prepared to extend credits to purchasers. In my opinion we have not pushed our trade in the Latin-American Republics with that vigor and intelligence that should have characterized the business men of the United States.

The trouble has been that our Republican friends have attempted to establish an industrial system that would permit the manufacturer to exploit the American public and then to dump their goods, to use their expression, upon other nations; that is to say, such enormous profits have been made in the home market that manufacturers have been rather indifferent to some world markets, or they have been able to undersell in many countries all competitors.

Mr. President, we will expand our trade just in proportion to the liberal methods which we adopt in our economic relations with other nations. If we will trade with them they will trade with us. Instead of South America being closed to American goods, the ports of South America will be opened to American commodities, and the people of South America will buy them. We can sell in competition with Germany or with any other country in the world. For years we have outsold, to use the language of the street, in South America, England, and other European countries. We have manufactured and shipped sewing machines to Great Britain and sold them there cheaper than they could be manufactured in Great Britain. We have sold plows and harrows and other agricultural machinery in South America cheaper than any other country in the world could sell in the same markets.

Ah, Mr. President, our Republican friends in tariff debates and in the presentation of tariff bills are always warning the American people about the invasion of the foreigner and the inability of Americans to compete in the markets of the world; they have been telling us for the past two years that because of the fall in exchange and because of the cheap labor of Europe we could not compete with Germany and other European nations, but we are now selling hundreds of millions of dollars of American products in competition with Germany and other European nations in the markets of the world and selling at a profit.

I would not have adverted to these matters, Mr. President, except for the statement made by the Senator from North Dakota [Mr. McCUMBER]. Germany will be a great market for American surplus products if we will trade with Germany. Great Britain will buy, not four hundred or five hundred or six hundred or seven hundred million dollars' worth of American products, but she will buy American products of the value of more than a billion dollars annually within the next two or three years if we pursue a sane and rational policy.

We will get the trade of the world if we want the trade of the world. A man will get the friendship of his fellows if he desires their friendship. A man will get knowledge from the world if he carries knowledge to the world. If we "would bring home the wealth of the Indies," we "must carry the wealth of the Indies" to other peoples; and if we would trade with other peoples we must receive in return their wealth and their products.

Mr. SIMMONS. Mr. President——

Mr. KING. I yield to the Senator from North Carolina.

Mr. SIMMONS. In connection with what the Senator from Utah is saying as to our present trade relations with Germany I desire to direct attention to the fact that during the year 1921 we imported from Germany $88,000,000 worth of her products, while during the same year we exported to Germany something over $300,000,000 worth of our products. If the sale by Germany of $88,000,000 worth of her products in our market is to be ascribed to underselling and to low prices as compared with our prices, then the invasion by us of the German market to the extent of $300,000,000 must be ascribed to our ability to undersell Germany in her markets.

Mr. KING. Mr. President, the observations of my distinguished friend destroy the arguments of the proponents of this bill. His deduction can not be confuted. Let me add to what my good friend from North Carolina has said by putting in juxtaposition the fact that our domestic production last year was approximately $62,500,000,000 while our imports from Germany were but $88,000,000. It is like pouring a pint of water into the Gulf of Mexico and saying that the introduction of such a stupendous volume of water held in the pint cup will drown the people of Louisiana and sections of country contiguous to the Gulf.

But it must not be forgotten that while Germany added the pint of water ($88,000,000) to our mighty gulf of production ($62,500,000,000) we took therefrom several gallons consisting of hundreds of millions of products and poured them into Germany.

Mr. SMOOT. Mr. President, I think the Senator from North Carolina, on reflection, would not say that $62,000,000,000

worth of goods were produced in this country last year. There was a turnover of $62,000,000,000; that is, from the raw material up to the sale of the finished product to the jobber, from the jobber to the wholesaler, from the wholesaler to the retailer, and from the retailer to the consumer the amount aggregated $62,000,000,000.

Mr. SIMMONS. According to the statistics, the total production in this country for the year given was $62,000,000,000. That has nothing to do with the turnover at all.

Mr. SMOOT. I will let my statement stand, Mr. President, as against that of the Senator from North Carolina. I made the statement on the floor of the Senate when the sales tax was under consideration that the value of American products was $62,000,000,000; but I analyzed the figures in every detail and showed precisely from what source the sales tax would be collected. It was upon the basis I have indicated that the collection would be made. So, I repeat, I am perfectly willing to let my statement stand as against that of the Senator from North Carolina.

Mr. SIMMONS. Mr. President, I have simply given the official figures. I know nothing about their correctness.

Mr. POMERENE. Mr. President——

Mr. KING. I yield to the Senator from Ohio.

Mr. POMERENE. As bearing upon the pending question I have a little pamphlet in my hand which has been issued by the National Industrial Conference Board, in which they say:

> The United States in the year 1870, with a population of 38,558,371, manufactured goods to the value of $4,232,325,442, or $110 per capita. In 1920, with a population of 105,710,620, the value of manufactured products had increased slightly over $59,500,000,000, or $563 per capita.

That substantiates the figures which the Senator from Utah [Mr. KING] and the Senator from North Carolina [Mr. SIMMONS] have given.

Mr. KING. Mr. President, I did not say, or at least I did not mean to say, that all of these products, aggregating in value $62,500,000,000, were finished products of manufacturing products. Prof. W. I. King, in discussing production in his interesting volume, calls attention to the fact that for the year prior to the writing of the volume—I have forgotten the year, but it was after 1900—the value of American production, which included, of course, ore taken from the mines, all metalliferous products, coal, wool, and all manufactured and agricultural products, was more than $35,000,000,000.

Mr. SMOOT. Mr. President, the Senator is right that $62,000,000,000 represents the value of production, with the modification that the value was computed on every step that the raw material was advanced into the finished product. The figures are correct with that explanation. In other words, the value of the coal is computed at the mouth of the mine, and when it is used in the manufacture of steel or for creating power or for any other purpose then the value of the coal so used is included in the value of the finished product. With that modification I admit that my colleague is right when he said that the value of American production was $62,000,000,000. There is not any doubt of that at all.

Mr. KING. Mr. President, the situation in a nutshell is this: The value of the raw materials of our farms and mines and mills and smelters and factories when added together gives us the gigantic sum of more than $62,000,000,000. In 1921 we imported from Germany, as I have stated, $88,000,000. Yet we are to be drowned by this devastating flood that is to inundate the land. Mr. President, would it hurt if there was a little more inundation, particularly if it would lower some of the high prices charged by American producers for needed commodities. I noticed in the morning papers that the prices of some commodities are rising. I am receiving scores of letters protesting against this bill, not from importers alone but from the people, and the more they learn of its iniquitous features the more letters will be written in protest against it. A letter which I received from New York inclosed a page from the New York Times. The letter contained the inquiry, Is a statement of James McCutcheon & Co. true? The statement referred to is as follows:

> NEW YORK.
>
> *To the public:*
>
> The Senate committee has reported to the Senate the new tariff bill. This bill would raise the duties on linens from 30 and 40 per cent to 50 and 60 per cent, or in other words would almost double them. This will, of course, mean that the prices of those goods will have to be advanced.
>
> By way of illustration, a towel 18 by 32 inches, which now sells at $6 per dozen, would have to sell at $7.25 or $7.50 a dozen under the new tariff. Handkerchiefs, which to-day are selling around $3.85 a dozen, would have to sell for about $4.50 a dozen.
>
> If this change was going to protect the American workingman and American manufacturer, we would have nothing to say. But it does not, for the simple reason that, except for the lower end huck towels and crashes, there is practically no linen manufactured in the United States. More than 98 per cent of the linen you use comes from abroad.
>
> We have been making strenuous efforts in the last year and a half to reduce the prices of all of our goods, and are most distressed at the thought of having to advance them at a time like this. If you agree with us that such a change in the tariff on lineus is unwise and that prices should not be forced up, won't you write to your Senators and Representatives in Congress and protest against this uncalled for advance in rates.
>
> Yours very truly, JAMES MCCUTCHEON & CO.

This statement indicates that 98 per cent of the product referred to therein is imported. Assume that 2 per cent, or 10 per cent, or 20 per cent is domestic, shall we impose a tariff on these products to enable the domestic manufacturers to raise the prices to the levels indicated in the statement just read? There are thousands of commodities affected by this bill, and the prices are to be raised in order to satisfy the demands of favored interests. This bill lays the heavy hand of oppressive monopoly upon the people, not alone upon the rich, but upon the poor, upon the working classes, upon the great consuming American public. Yet not a voice, unless it be one, upon the other side of the Chamber will be lifted to defend the American people.

I have every reason to believe that there will be at least one distinguished Republican whose voice has so often been lifted in behalf of labor and the masses of the people who, before this bill shall have finally been disposed of in the Senate, will lift his powerful and eloquent voice against this bill and will point out many of its abhorrent features.

Mr. President, if the Senator from North Dakota had not classed himself as a prophet, I should have been through with formic acid long ago. I shall conclude within a few minutes, if the Senator will permit me to do so.

Let me just briefly read from the survey prepared by the Tariff Commission. In the pamphlet called "A–1," dealing with a number of acids found in paragraph 1 of the bill, there are two or three pages devoted to the formic-acid industry, and it states that the tariff act of 1913 provided for a tariff of 1¼ cents per pound. Then it proceeds:

> Formic acid is a useful material in the dyeing and tanning industries, but other competing acids have, as a rule, been cheaper, and the use of formic acid has therefore been restricted to a few cases for which it has peculiar advantages. It is chiefly of interest because recent technical advances in its manufacture indicate that when normal industrial conditions are restored it may be put on the market at a lower price, which should greatly broaden its market. These new discoveries will probably indirectly have a marked influence also on the manufacture of oxalic acid.

Of course, upon the theory of my friend from North Dakota, prices are not going to come down. That is the purpose of this bill—to arrest any legitimate downward movement of prices in the commodities and articles which are daily consumed by the people. The manufacturers are determined to prevent competition, to prevent a reduction of prices.

Proceeding, this pamphlet states that this acid is—

> a stronger acid than acetic acid, which it resembles most closely, and has antiseptic properties. Formic acid produces a painful sore when brought in contact with the skin—

And so forth.

> The textile industry can use formic acid for many purposes. In the dyeing of cotton and wool mixtures in acid bath it is said to be superior to sulphuric acid, because it is less injurious to cotton than sulphuric acid. It is also used as a mordanting assistant in dyeing wool with a chrome mordant, for which purpose it competes with tartaric, oxalic, and lactic acids.

Of course, those who are familiar with dyes and textiles know the importance of the mordant.

> It may replace acetic acid for many purposes in the textile mill whenever the price will justify it.
>
> Formic acid has been used to some extent in tanneries as a substitute for the bran drench for removing lime from hides, but unless the price can be greatly reduced it is not likely to prove a serious competitor with lactic acid for the purpose.
>
> In some distilleries small amounts of formic acid are added to the acidified mash. It is said that formic acid stimulates the activity of the yeast and represses the activity of the acid-forming bacteria, thereby increasing the yield and purity of the alcohol.
>
> Formic acid forms salts with all metals, but the most important derivative is sodium formate.

With our enormous deposits of the materials essential in the production of sodium formate, one would suppose that we could compete with the world in its production.

> It is the material from which formic acid is made and is also used for the manufacture of oxalic acid. Nickel formate is used as a catalytic agent in the hydrogenation of oils. Many different forms of nickel are used for this process, but it is claimed that the formate has many advantages and a large and growing use is indicated.
>
> Formic acid forms many esters, including methyl formate, ethyl formate, butyl formate, and amyl formate. These are useful as perfumes and solvents—

That is, the esters, the combination with the alcohol. It forms esters in that way, combining with alcohol, for perfumes and those articles for which alcohol is used.

> Cellulose formate, although not yet commercially developed, may prove an important rival for cellulose acetate and nitrate in the manufacture of plastics, lacquers, and coatings for airplane wings. A de-

rivative of formic acid known as diphosgene (perchlormethyl formate) was used by the Germans in poison-gas warfare. It can be prepared from formic acid, methyl alcohol, and chlorine, or from phosgene, methyl alcohol, and chlorine.

The earliest method of making formic acid was by the distillation with water of the bodies of certain varieties of ants. The name of the acid is derived from this source (*formica*, Latin for ant). Formic acid was next made by heating together oxalic acid and glycerine, but the acid made in this way was too expensive to find wide use. The development of the Goldschmidt process by the Germans reduced the cost of formic acid considerably and made it possible for the industry to grow rapidly. This process consists in heating carbon monoxide (or a gas rich in carbon monoxide such as producer gas) with caustic soda, under a pressure of about 10 atmospheres and at a temperature of about 200° C. This results in a direct combination, yielding sodium formate of a high degree of purity. The sodium formate may be treated with an acid (sulphuric acid or niter cake) and distilled, yielding formic acid. An even more important development is the conversion of the sodium formate into sodium oxalate and oxalic acid.

The development of this process in Germany gave to Germany a dominant position in the industry throughout the world. The only American manufacturer of formic acid before the outbreak of the European war was the Merrimac Chemical Co., of Boston, who for some time operated under their own and foreign patents. With the changed conditions, however, due to the war, they discontinued making this product and are not now making formic acid.

The imports are shown on page 37.

In the fiscal year 1906, when the rate of duty was 25 per cent ad valorem, 58,305 pounds were imported, the value being $4,036. In the fiscal year 1914 the record shows importations of 74,901 pounds. With the tariff at 1½ cents per pound under the Underwood bill, the imports were 1,044,844 pounds in the remainder of the fiscal year 1914. In the fiscal year 1915 they dropped to 534,895 pounds; in the fiscal year 1916 to 131,719 pounds; in the fiscal year 1917 they were 385,463 pounds. There is no report for the fiscal years 1918 or 1919. The calendar year 1919 shows imports of 132,333 pounds, of the value of $29,604. The unit value of imports, as indicated in that year, was 22⅜ cents.

The Tariff Summary shows the imports for 1920 to have been 173,019 pounds, and for nine months of 1921, 415,617 pounds, with a unit value for the last-named year of 12 cents.

Mr. President, as I have heretofore indicated, the pre-war import price was 4½ cents a pound. The price in the United States on the 24th of April this year was from 16 to 18 cents per pound—an increase of more than 300 per cent. That is what the domestic producers are charging. In addition, as I understand the application of the embargo act, this commodity is embraced within that act. I may be in error, but if I understand the position of my friend, the senior Senator from Utah [Mr. SMOOT], it would come in the category of a synthetic organic chemical, and therefore would be embargoed.

This product is manufactured by the Victor Chemical Works, and the Senator from Illinois [Mr. MCCORMICK] to-day offered an amendment to increase the rate from 4 cents per pound, which is a tariff nearly 100 per cent above pre-war prices, to 6 cents per pound. The Senate defeated that amendment.

I called attention briefly this morning, and just refer to it now, to the fact that in the brief of this corporation it was requested that the rate be laid at 7½ cents a pound. In other words, upon a product that sold before the war—import price—at 4½ cents per pound, they, the domestic producers, asked for a tariff of 7½ cents a pound. Under such a rate the retail price would probably be from 16 cents to 25 cents per pound.

I have suggested an amendment to strike out the provision in the Senate committee bill and insert in lieu thereof 2½ cents per pound. That would be approximately a 60 per cent tariff, based upon pre-war prices. If Senators will not accept that amendment, then it is apparent that no fair rate will be accepted as to any schedule of this bill, and that no amendment which seeks to protect the interests of the people will be adopted.

Mr. President, I ask for the yeas and nays.

The yeas and nays were ordered.

Mr. SMOOT. Mr. President, I just want to say a word for the RECORD. I have just analyzed our exports to Germany and our imports from Germany with a view of finding what effect they would have upon the rates named in this chemical schedule as those rates are set out, and I find that out of $29,975,549 of our exports to Germany there were $24,951,649 that represents articles that are on the free list. All the world buys the same goods from us, because they can buy the goods from us cheaper than anywhere else in the world. That leaves only $5,023,900 out of $29,900,000, and some of those goods are on the free list, but I can not tell just how many, as they are not classified and are grouped as a whole.

Not only that, Mr. President, but when you turn to the other side of the question, to articles we have imported from Germany, we find that most of them are on the free list. So, whatever rates are fixed in this bill, they have no relation whatever to the figures named here, outside of the little amount I have already suggested, because the large proportion of them are on the free list, both imported and exported.

Mr. JONES of New Mexico. I did not get from the Senator the classes of goods which we export to Germany.

Mr. SMOOT. I can tell them.

Mr. JONES of New Mexico. I thought the Senator was commenting on that.

Mr. SMOOT. I was. I said that out of $29,000,000 worth, referred to by my colleague as being the exports to Germany, $24,951,649 worth of them were goods on the free list.

Mr. JONES of New Mexico. On whose free list?

Mr. SMOOT. On our free list. There is no duty upon them, and we sell them to all the balance of the world, and the reason Germany buys them from us is because she can not buy them anywhere else as cheaply.

Mr. JONES of New Mexico. Is not the Senator interested in our continuing to sell those goods?

Mr. SMOOT. Yes; and they are on the free list to-day, and they are on the free list in this bill. Not one of them is taken from the free list.

Mr. JONES of New Mexico. Does that make any difference when we must find a market for what we do export to Germany?

Mr. SMOOT. That is a question I am not going to discuss at this late hour, but I am perfectly willing to discuss it with the Senator. As far as that is concerned, neither England nor any other country of Europe buys any more wheat from us than they have to, and they do not buy any more of other goods than they have to, and if they have to have them, they are going to buy them from this country.

Mr. JONES of New Mexico. The position which the Senator from Utah now takes has already been taken, and frankly stated at different times by the Senator from North Dakota, that simply because we are exporting products to Germany, in competition with the world, that does not make any difference, and he is not concerned about that.

Mr. SMOOT. They are a class of goods which Germany can not buy anywhere else as cheaply as she can here. If these were on the dutiable list it would be an entirely different proposition, but we are not putting them on the dutiable list. They are on the free list.

Mr. JONES of New Mexico. I can not see what difference it makes, and I do not care to go into a discussion of these questions at this time, but I do want to express the thought that we are just as much interested in getting a market for those things which we ship abroad, and which are not on the dutiable list, as we are for those which are on the dutiable list.

Mr. SMOOT. My colleague gave us a reason why there should not be imposed the rates found in this schedule, because of the fact that we export to Germany more than we import from Germany. That was the basis of his argument, and I do not want to go into a discussion of the other question, but I rose only to make this statement for the RECORD.

Mr. JONES of New Mexico. I just want to make this statement for the RECORD, too.

Mr. SIMMONS. The statement the Senator from Utah made a little while ago which struck me with most force was that these things which we ship to Germany are on the free list, and we can undersell the world in the products which are on the free list. If we can undersell the world in the products which are on the free list, why not in the products that are not on the free list?

Mr. SMOOT. That would be very easy to answer, but at this late hour I can not answer it. We can take up each item as we come to it and explain the matter. The Senator knows enough about the production of goods in this country to know the reason why. He should not have asked the question, as I know that he knows so much about the tariff that he knows the reason why that is true.

Mr. SIMMONS. I would like to have the Senator give the reason. If he thinks I know it, he is badly mistaken. I can not understand the force of the statement of the Senator that we can not compete with the outside world on any product that is on the dutiable list, but we can undersell all the world in an American product that happens to be on the free list.

Mr. SMOOT. If the conditions as to all the articles were the same as the conditions as to turpentine, and these other goods on the free list which have been exported to Germany, we would not want any tariff; there would be no need of a tariff law in the United States. But every one of the items mentioned is an item which we produce in this country cheaper than most any other country in the world can produce it, and all the balance of the world draws from us.

Mr. JONES of New Mexico. Mr. President, I have been interested in finding a market for these other products. I am not quite willing to say to the people of the country what the Senator from North Dakota said in his speech presenting this bill to the Senate. He advised the people to quit raising wheat until there should not be produced a surplus in this country, and go to raising flax.

I am not willing to indorse that sort of a doctrine, because, if that is the principle which the Senators had in mind in preparing this bill, that would mean that the copper producers of the country should quit producing copper and go to raising flax, and the laborers and men working in the steel factories of the country should stop that business and go to raising flax, and the cotton raisers and others likewise. I am not willing to subscribe to any such doctrine as that as promising the welfare of this country of ours, but that is precisely the basis on which this bill is founded. As stated by the Senator from North Dakota this afternoon, what is proposed is simply to hold this American market at all hazards, and regardless of all consequences. That is the doctrine he announced this afternoon, and whenever you look into any one of the items in this bill you will find that they have combed the commerce of all the world with a fine-tooth comb, and wherever they could find that any of these things were coming into the United States they have tried to put up a barrier to prevent them from coming in. As to every schedule and every item which I have examined that is almost invariably the result of this bill. If there is just a little of it coming in here they will build up a wall so high that none can come in.

Mr. POMERENE. Mr. President——

The VICE PRESIDENT. Does the Senator from New Mexico yield to the Senator from Ohio?

Mr. JONES of New Mexico. I yield.

Mr. POMERENE. Do I understand that as a result of that doctrine the farmers would be advised to stop raising wheat, and corn, and oats, and cattle, and hogs, and sheep, because they could not sell them abroad?

Mr. JONES of New Mexico. That is precisely what the Senator from North Dakota announced in his first speech, or the effect of it.

Mr. POMERENE. If that is so, I am quite sure that when this bill passes there will be no market for these surplus products.

Mr. JONES of New Mexico. The Senator's statement was, and he quoted the President of the United States, that it was unfortunate that when we had a surplus of products in this country we often got less for the crop than when we had a shortage; and so he advised that we produce just enough wheat, and if we would restrict our production of wheat so that we would not produce enough by about 1 per cent, we would be able then to increase the price of what we did raise. He specifically advised his people to quit raising wheat and go to raising flax. That was a very candid statement of the position taken by those who are advocating this bill. They simply want to prevent anything from coming into this country and to shut off any exports from this country. If we are producing a surplus of anything, we are advised to stop producing that and go to raising flax or something else of which we are not producing enough to satisfy the home market.

Mr. STANLEY. Mr. President, in other words, we should discontinue those industries which have been profitable, more or less, without the adventitious aid of protective duties, and go into those industries which have not been able to exist except by virtue of the same.

Mr. JONES of New Mexico. That is the logical result of this bill, not only to stop us from producing the things which we have found to be profitable but to force the people to engage in other occupations, something which they know nothing about. That is the effect of the bill.

Take this particular commodity which we are considering now—formic acid. There is only one concern—not over two, I believe—producing this article in the United States; and if you take the testimony of the man who appeared representing the industry, you will find that he said the duty which this bill proposes is not nearly high enough to keep that industry from dying. The only testimony as to this article is from the man representing that one concern, and he insists that the duty shall be about twice as high as proposed in this bill. How the committee ever arrived at these figures from any testimony in the hearings is more than I can say. The interested party who appeared wanted a tariff about twice what this bill gives him, and said his business could not live unless he did get a duty about twice as high as they have fixed it. His testimony upon this subject, however, is quite conflicting. I do not care to take up the time of the Senate in doing it, but I just want to call the attention of the Senate to the character of the testimony there is in the record in regard to this item.

We find in the hearings before the Ways and Means Committee the testimony in a brief by the Victor Chemical Works, of Chicago. According to that testimony the labor cost in formic acid is 7.84 cents a pound, the raw material cost is 7.85 cents per pound, the other expense is 2.31 cents a pound, making a total of 18 cents a pound. That was the statement in the hearings before the Ways and Means Committee, but the president of the same concern appeared before the Finance Committee of the Senate and put his labor cost at 5.07 cents, the material cost at 9.44 cents, the factory expense at 2.27 cents, sales and transportation, warehousing, and so forth, 1.5 cents, making a total of 18.28 cents.

It will be observed that the labor cost as shown by the testimony from the same concern on two different occasions had been reduced from 7.84 to 5.07 cents per pound and the raw material cost had been increased from 7.85 cents to 9.44 cents per pound. I wonder how they reached that, because this chemical concern is the one which manufactures the sodium formate, which is the raw material out of which the formic acid is made. So a witness of that sort can give any kind of testimony on the subject that he pleases and it will be true, because he manufactures his own sodium formate and he can put any price on that that he chooses and then use it as his basic material for the manufacture of the formic acid. That is the testimony in the case, and here we have, as between the hearings before the Ways and Means Committee of the House and the Finance Committee of the Senate a variation of practically 50 per cent in the cost of this basic material, increasing from 7 cents a pound to about 9½ cents a pound, and all of it manufactured by the same concern. That is the kind of evidence we have.

What does that mean to the consumers of formic acid? These are the prices before the war; prices, by the way, of the imports when none of it was imported to this country; when there was a German monopoly; when there was nobody in the United States competing. The export price in 1908 was 7 cents a pound; in 1910, 7 cents a pound; in 1912, 4½ cents; in 1914, 5 cents; 1916, 15 cents; 1920, 24 cents; and in 1921, 12 cents. The New York price of formic acid is now from 16 to 18 cents a pound. The latest price that we have was in 1921, 12 cents a pound, more than twice the price in Germany before the war. The German product is selling for more than twice what it was before the war.

Now, upon what theory shall you say that you are scared? Is there not something wrong with this American price? Is not this one concern which manufactures its own formate wanting to build up a monopoly in this case, to keep up the prices to two or three times what they were before the war? The question of price, according to the members of the Finance Committee, is all that has been considered in framing the bill. Shall we build up a tariff here which will permit these commodities to remain at such high prices?

The Senator from North Dakota this afternoon announced a new doctrine. He said in response to the Senator from Utah [Mr. KING] that the volume of money in the world had increased. We have had everything interjected into the discussion heretofore except that, and that is something new. The Senator brings in the quantitative theory of money, and he does that to explain just such things as this, that the price of these commodities shall be kept up higher than it was before the war because there is more money in this country than there was before the war.

I would like to have the chairman of the Finance Committee tell us what percentage he wants to allow on these prices to account for that theory. The great Finance Committee in its wisdom, when it was considering the question of the quantitative theory of money, has justified an increase in prices. I would like to have some one of them rise and tell us how much of a factor that was in the framing of the bill.

They say they are going to try to equalize the difference in trade conditions; that they have done it by considering the prices which prevail in this country now and those which prevail in other countries, and then want to keep up these prices because of the quantitive theory of money, because we have more money than we had before. I would like to know how much of a controlling factor that was with the committee in framing the bill.

Mr. President, it is another illustration of the very confused and uncertain foundation underlying the whole bill. We were first told that the bill was framed for the purpose of equalizing the difference in the cost of production here and abroad. We asked where they got it. Then they said they got it from prices and wanted to equalize that condition. Now they want to justify the high prices, and so they talk to us about the quantitive theory of money.

Mr. President, it is getting late. I wonder if the Senator from North Dakota intends to move an executive session or to adjourn?

Mr. McCUMBER. Mr. President, I intend to get a vote on this item if I can.

Mr. JONES of New Mexico. I hope also that we may get a vote on the item.

Mr. HEFLIN. Mr. President, I was very much interested in the able speech made by the Senator from New Mexico. He touched upon a suggestion made by the Senator from North Dakota about the money supply in the United States. If I understood him correctly, the Senator from North Dakota asserts that there is more money per capita in circulation now than we have ever had.

I dispute that proposition. I grant that there is more money in the United States now than there ever has been in its history, but that money is being hoarded, that money is being kept out of circulation. The common man, the average business man, can not get in touch with that money. It is not serving the needs of the people.

The fact that there is money hoarded in Wall Street by the millions and the billions does not help the man in the West, in the North, in the East, or in the South, who needs money to carry on his business. While the distinguished Senator from North Dakota and those who support his measure are trying to legislate money into the pockets of the monopolies of the country I suggest that they do something to loose the purse-strings so that the common man can get money to carry on his business, so that the man who has something that he wants to do can get the necessary money to do it, so that those who are unemployed can have employment.

The farmer who has his cotton prices driven down far below the cost of production would like very much to have something done that would enable him to get at least the cost of production. I saw the Republican side on yesterday vote to increase the tariff tax on arsenic, I believe it was, 3 cents a pound—2 cents a pound, the Senator from Utah [Mr. SMOOT] indicates to me by holding up two fingers—increasing the price of the material that the farmer needs in so many ways, taxing it and increasing the burden of the farmer. Yet now we are told that he ought to smile and be thankful because there is more money—not in circulation, but somewhere in the United States.

Well, Mr. President, it is not in circulation. What value is it to me when I am hungry and there is a mountain of food piled up in my sight if I can not get to it? Of what value is it to me that gold be stored in the vaults of the country if I need money to carry on my business and can not get it? Former Senator Dolliver, able and brilliant Senator from Iowa, illustrated the situation in speaking in this Chamber many years ago when he said, "I might be standing on the street corner talking to two other men. I may have had three square meals that day. Upon your theory," he said, "it would be claimed we have had an average of one meal apiece, when as a matter of fact I had all three of the meals and the other two men had no meal at all."

That is the situation we have in this country with the money that is being hoarded, and then Senators talk about so much money being in circulation. It is not true. It has been retired from circulation. The Republicans have contracted the currency, deflated credits, not by the millions but by the hundreds of millions. That is what they have done. This money is not out serving the needs of the people, and I do not want the impression to get out that all of us agree to the suggestion that there is more money in circulation now than we have ever had at any time. There is not now in circulation anything like the amount that we had in 1919. I grant that we have more money in the country, but not in circulation. The money supply of the United States was intended to serve the needs of the people of the United States. It is not doing it. It is being handled and manipulated so as to make some people exceedingly rich and some exceedingly poor.

Mr. WATSON of Indiana. Mr. President, if we are ready to vote, I shall make no remarks.

Mr. KING. I am ready for a vote.

SEVERAL SENATORS. Vote!

Mr. WATSON of Indiana. I am entirely willing that a vote may be now taken.

The VICE PRESIDENT. The yeas and nays having been ordered, the Secretary will call the roll.

The reading clerk proceeded to call the roll.

Mr. SMOOT. A parliamentary inquiry.

The VICE PRESIDENT. Without objection the Senator will state his inquiry.

Mr. SMOOT. Is the vote now being taken on the amendment offered by the Senator from Utah [Mr. KING] to the committee amendment?

The VICE PRESIDENT. It is.

The reading clerk resumed the calling of the roll.

Mr. DILLINGHAM (when his name was called). I have a general pair with the Senator from Virginia [Mr. GLASS], which I transfer to the Senator from Maryland [Mr. FRANCE], and vote "nay."

Mr. LODGE (when his name was called). I have a general pair with the Senator from Alabama [Mr. UNDERWOOD]. I transfer that pair to the Senator from Pennsylvania [Mr. PEPPER], and vote "nay."

Mr. McKELLAR (when his name was called). I have a general pair with the junior Senator from Indiana [Mr. NEW], which I transfer to the junior Senator from Rhode Island [Mr. GERRY], and vote "yea."

Mr. STANLEY (when his name was called). I transfer my general pair with the junior Senator from Kentucky [Mr. ERNST] to the senior Senator from Texas [Mr. CULBERSON], and vote "yea."

Mr. STERLING (when his name was called). Transferring my pair with the Senator from South Carolina [Mr. SMITH] to the Senator from Oregon [Mr. STANFIELD], I vote "nay."

Mr. HEFLIN (when Mr. UNDERWOOD's name was called). My colleague [Mr. UNDERWOOD] is paired with the senior Senator from Massachusetts [Mr. LODGE]. If my colleague were present he would vote "yea."

Mr. WATSON of Indiana (when his name was called). I have a general pair with the senior Senator from Mississippi [Mr. WILLIAMS]. In his absence I transfer that pair to the junior Senator from Delaware [Mr. DU PONT] and vote "nay."

The roll call was concluded.

Mr. JONES of Washington. The Senator from Virginia [Mr. SWANSON] is necessarily absent. I promised to take care of him by pair during the day. I find I can transfer my pair with the Senator from Virginia to the junior Senator from Maryland [Mr. WELLER]. I do so, and shall vote. I vote "nay."

Mr. McKINLEY. I transfer my pair with the junior Senator from Arkansas [Mr. CARAWAY] to the senior Senator from Vermont [Mr. PAGE] and vote "nay."

Mr. SIMMONS. I wish to announce that the senior Senator from Missouri [Mr. REED] is absent. If he were present, he would vote "yea" on the pending amendment.

I also desire to state that had the Senator from Missouri been present during the last few days he would have voted "yea" upon the several amendments which have been offered by the minority to the amendments reported by the Committee on Finance.

Mr. JONES of New Mexico (after having voted in the affirmative). I desire to announce the transfer of my pair with the Senator from Maine [Mr. FERNALD] to the Senator from Missouri [Mr. REED], and will allow my vote to stand.

Mr. SUTHERLAND. I have a general pair with the senior Senator from Arkansas [Mr. ROBINSON]. I transfer that pair to the senior Senator from Pennsylvania [Mr. CROW], and will vote. I vote "nay."

Mr. FRELINGHUYSEN. I transfer my general pair with the Senator from Montana [Mr. WALSH] to the Senator from New Hampshire [Mr. MOSES] and vote "nay."

Mr. CURTIS. I desire to announce the following pairs:

The Senator from Arizona [Mr. CAMERON] with the Senator from Georgia [Mr. WATSON];

The Senator from Rhode Island [Mr. COLT] with the Senator from Florida [Mr. TRAMMELL];

The Senator from New Jersey [Mr. EDGE] with the Senator from Oklahoma [Mr. OWEN]; and

The Senator from Connecticut [Mr. McLEAN] with the Senator from Montana [Mr. MYERS].

The result was announced—yeas 17, nays 38, as follows:

YEAS—17.

Ashurst	Heflin	Overman	Stanley
Dial	Hitchcock	Pomerene	Walsh, Mass.
Fletcher	Jones, N. Mex.	Sheppard	
Harris	King	Shields	
Harrison	McKellar	Simmons	

NAYS—38.

Ball	Harreld	McKinley	Spencer
Brandegee	Jones, Wash.	McNary	Sterling
Broussard	Kellogg	Newberry	Sutherland
Bursum	Kendrick	Norbeck	Townsend
Calder	Keyes	Oddie	Wadsworth
Capper	Ladd	Phipps	Warren
Curtis	Lenroot	Poindexter	Watson, Ind.
Dillingham	Lodge	Rawson	Willis
Frelinghuysen	McCormick	Shortridge	
Hale	McCumber	Smoot	

NOT VOTING—41.

Borah	Fernald	New	Stanfield
Cameron	France	Nicholson	Swanson
Caraway	Gerry	Norris	Trammell
Colt	Glass	Owen	Underwood
Crow	Gooding	Page	Walsh, Mont.
Culberson	Johnson	Pepper	Watson, Ga.
Cummins	La Follette	Pittman	Weller
du Pont	McLean	Ransdell	Williams
Edge	Moses	Reed	
Elkins	Myers	Robinson	
Ernst	Nelson	Smith	

So Mr. KING'S amendment to the committee amendment was rejected.

The VICE PRESIDENT. The question is on agreeing to the amendment reported by the committee.

The amendment was agreed to.

ORDER FOR RECESS.

Mr. McCUMBER. I ask unanimous consent that when the Senate concludes its session this calendar day it shall take a recess until to-morrow at 11 o'clock a. m.

The VICE PRESIDENT. Is there objection? The Chair hears none, and it is so ordered.

LANDS IN WIND RIVER RESERVATION, WYO.

Mr. SPENCER. From the Committee on Indian Affairs I report back favorably without amendment the bill (H. R. 4069) authorizing the Secretary of the Interior to sell certain lands on the Wind River Reservation, Wyo., and I submit a report (No. 696) thereon.

The bill relates to a 40-acre tract of land in Wyoming. Both Senators from that State are anxious that authority should be given for the sale of the land; the committee are unanimous in their report, and the department likewise is in favor of the bill. I ask unanimous consent for the immediate consideration of the bill.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which was read, as follows:

Be it enacted, etc., That the Secretary of the Interior be, and he is hereby, authorized, in his discretion, to sell to the Arapahoe Trading Co., Yellowstone Sheep Co., and Patrick A. McGovern, bishop of the Catholic Church for Wyoming, for an adequate consideration, not to exceed 40 acres of land on which is located valuable improvements at the Arapahoe subagency, on the Wind River Reservation, Wyo., being the southeast quarter of the northwest quarter, section 23, township 1 south, range 3 east, Wind River meridian, and to convey the same by patents in fee to the interests herein named, the said patents to include the lands on which the improvements are located: *Provided*, That the cost of any special survey required for issuing the patents shall be paid by the purchaser.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

FOREIGN POLICY OF THE UNITED STATES.

Mr. McCORMICK. I send to the desk and ask to have printed in the RECORD the report of a special committee of the Chicago Association of Commerce on "Present day world problems as they affect the United States."

There being no objection, the report was ordered printed in the RECORD, as follows:

WHAT SHALL OUR FOREIGN POLICY BE?—A STUDY OF PRESENT-DAY PROBLEMS AS THEY AFFECT THE UNITED STATES—FOR THE CHICAGO ASSOCIATION OF COMMERCE.

(By Wyllys W. Baird, chairman, Baird & Warner, real estate and mortgages; W. Rufus Abbott, president Illinois Bell Telephone Co.; Edgar A. Bancroft, Scott, Bancroft, Martin & Stephens, attorneys; John F. Bass, author and war correspondent; Abel Davis, vice president Chicago Title & Trust Co.; H. G. P. Deans, vice president Merchants Loan & Trust Co.; Robert P. Lamont, president American Steel Foundries; Harold G. Moulton, department of political economy, University of Chicago; C. H. MacDowell, president Armour Fertilizer Works; John W. Scott, vice president Carson Pirie Scott & Co.; Edward M. Skinner, general manager Wilson Bros.; James Simpson, vice president Marshall Field & Co.; Silas H. Strawn Winston, Strawn & Shaw, attorneys; Thomas E. Wilson, president Wilson & Co., special committee.)

FOREWORD.

The time for the American people to determine the basic elements of our foreign policy is now. The European economic situation is critical; if the United States is ultimately to cooperate with Europe in any far-reaching program of reconstruction, we have got to make up our minds soon what we stand for, what we think Europe must do, and what we are willing to contribute to the process of settlement. American delegates can not function at any international conference unless they go there, if not with power to act, at least with something in the way of a formulated and expressed public opinion back of them. In a democracy public opinion is supreme. What is American public opinion with reference to the issues raised in this memorandum—a memorandum only, submitted to the public without recommendations and solely for the purpose of provoking thought and discussion?

CHICAGO, *April 15, 1922.*

I.—THE DEPENDENCE OF AMERICAN PROSPERITY ON EUROPEAN PROSPERITY.

Widespread misapprehension exists concerning the causes of the business depression in the United States. Each section of the Nation's producers, confused by the economic crisis, have sought to lay the blame of their misfortunes on the shoulders of some other section of the productive community. The farmer, deeply in debt and unable to obtain adequate prices for his products, accuses the bankers of withholding adequate credit, accuses the manufacturer of profiteering, and accuses the middlemen and boards of trade of exploitation and the ruination of the country's basic industry. The manufacturer, on his side, asserts that it is labor, with its inefficiency and its unreasonable wage demands, that stands in the way of the revival of production and of general prosperity. Labor, in its turn, is convinced that there is something radically wrong in the system of production, by which the workers are robbed of their just proportion of wealth. The workers demand the right to a higher standard of life from a Nation whose power to satisfy that demand has been greatly impaired.

Nearly all groups, moreover, contend that high freight rates stand as a bar to industrial prosperity. Reduce railway charges and all things else will follow. But to this the carriers reply that rates can not be reduced until the wages of the railway employees are correspondingly reduced. Again, there is the complaint that taxation—Federal, State, and local—is ruinous; taxes must certainly be reduced. But taxes, others urge, must be increased because of the demands for a bonus and other appropriations.

Unable to understand the interdependence of the different parts of the world economic organization, the farmers, capitalists, and laborers alike are led to seek fictitious remedies, remedies which, like quack medicines, only tend to weaken the system. The fact that the United States is an economic unit, each group and each section of which in the end must stand or fall with the whole, has not yet sunk into the consciousness of the Nation. Much less do we realize that the entire world is now an economic unit.

While there are no doubt grave defects in the modern economic system, no remedy will be found in the present crisis by weakening or wrecking that system. Yet such will be the result if ignorance leads large groups of the country to emphasize our antagonism of interest instead of our common needs. Such results will also inevitably follow if nations, ignoring the needs of their neighbors, refuse to cooperate in the solution of international problems and stand apart in the fancied security of their supposed isolation.

The truth is that the United States is fundamentally dependent upon European prosperity. Specific data are required to reveal how closely interrelated is the economic life of modern nations. The following statement taken from a publication of a leading financial institution of New York, based upon practical trade information coming into the bank, indicates in some detail the nature of the interdependence of trade between the United States and foreign lands since the war:

"Danville, Va., is interested in sending tobacco to Venezuela; Laporte, Ind., wants to send farm tractors to Brazil; St. Joseph, Mich., desires an agent for automobile accessories in India; Durgettstown, Pa., sends an inquiry regarding industrial enterprises in Yugoslavia; Parkersburg, W. Va., wants to sell oil-well supplies to Mexico; Keokuk, Iowa, is interested in developing a market for rolled oats in South America; Coshocton, Ohio, wants to appoint an agent in Spain for its glass bottles; Cadillac, Mich., desires to ship veneer to New Zealand; Monessen, Pa., is interested in steel wire in South Africa; Charlotte, N. C., wants to send cotton to Finland; Norfolk Downs, Mass., has a customer for weighing machinery in Formosa; Mount Pleasant, Mich., has a customer for trucks in Guatemala; and Valdosta, Ga., wants to export cotton linters to Czechoslovakia."

"A recent analysis of the cargo carried by a United Fruit liner sailing from New Orleans to South American ports showed that practically every community in the United States, manufacturing or agricultural, had some part in the production of the cargo sent out in this steamer."

Nor is the United States interested merely in exports. The statement goes on to say:

"We must have a regular and increasing supply of many commodities which are not produced in the United States, or which are produced in such small volume as to be entirely inadequate for our requirements. We must obtain manganese for our steel mills from Russia and South America.

"Our tanneries must have quebracho from Argentina; our automobile-tire industry must obtain crude rubber from Brazil; our machine shops, rail mills, armored-plate works, and wire-rope factories must have nickel from Canada and New Caledonia; our tinplate manufacturers must import their tin from the Malay Straits and from Bolivia; our silk factories must get their raw product from China and Japan; our clothing wools must be imported from Australia and Argentina; our manufacturers of twines, canvas, linens, and laces must get their flax from Russia and Belgium; our burlap makers must get their jute from India; the sisal which is used to make our binder twine must come from Yucatan. We must also import large quantities of coconut oil and other vegetable oils from the Dutch East Indies and from Pacific isles; coffee from Brazil, tea from China, India, Japan, and Java; cocoa from Venezuela; sugar from Cuba; rice from the Far East; spices from the East Indies; platinum from Colombia; and vanadium from Peru."

Notwithstanding such facts as these and in spite of all the emphasis that has been placed by bankers and others upon the necessity of maintaining our export trade if the country is to prosper, one still hears men say on every hand that whatever happens in Europe this great country of ours will not be seriously affected. Let our foreign markets go, if need be. It is urged that they are relatively unimportant anyhow; for our foreign trade is only 8 or 10 per cent of our total trade. Rather than grieve over the loss of foreign markets, let us confidently devote our attention to developing our home markets. Is not the consuming capacity of the American people limitless in extent? Think of the enormous numbers of people who still have no automobiles; think of the number whose homes are not elegantly furnished; think of the number, if one must, who are still scarcely above the minimum of subsistence. Why worry about foreign markets when such vast potential demands are to be found within our own borders?

These are brave words, no doubt, but they are based upon fundamental misconceptions of the working of economic forces. Large and thriving domestic markets, unfortunately, depend upon foreign markets; they can not readily be stimulated when foreign markets are waning. Moreover, it is altogether misleading to argue that since our export trade as a whole constitutes only 8 or 10 per cent of our total trade, it is relatively unimportant. The truth of the matter is that practically 50 per cent of our total cotton supply is normally exported, and from 25 to 30 per cent of our wheat crop. In many lines of industry our exports are altogether negligible; while in certain other important industries the export trade is of paramount significance. While one might argue with a show of plausibility that a 10 per cent loss of trade is not significant, he can not argue with equal cogency

when the percentage that is involved is 20 or 30 or even 50 per cent, as in the case of cotton and copper.

There is no escape from the conclusion that if American exports of cotton and wheat should be very greatly reduced as a result of European decadence, the cotton belt and the wheat belt would be seriously depressed for years to come. As a consequence the industrial activity of this country, as we shall see, would be seriously curtailed.

The effects of reduced European purchasing power are already clearly manifest. Exports of manufactured goods of practically every kind have been tremendously reduced during the past year. Although the physical volume of exports of grain has been very large, nevertheless the price of wheat fell during the year 1921 nearly 50 per cent. According to the closest observers, the European demand was always sluggish; purchases would be made only if the price were low. It may be pointed out, moreover, that the British export price to the continent fell much more than the American export price, thus indicating that continental Europe is the economic sore spot of the world. The recovery in the price of cotton in the late summer was due to the small supply rather than to the large demand. It remains to be seen, moreover, whether the recent rise in wheat will be sustained through the harvesting season.

It is idle to hope that our manufacturing industries—if shorn of their foreign markets—could, under the conditions prevailing, immediately devote their attention to the manufacture of goods for sale to the people of the cotton districts and to the wheat farmers of the West. Cotton and grain growers can purchase the products of domestic manufacture only when a strong foreign demand affords them a paying price for their products. And under a profit-making system manufacturers will produce goods for sale to farmers, or to anyone else, only when it pays to do so.

During the war period, in consequence of the inordinate foreign demands for American raw materials and foodstuffs, producers of cotton and food enjoyed unprecedented prosperity; whereupon they proceeded to purchase, with an abandon never before equaled, the products of American manufacture. The expanded domestic demand was definitely a result of the large foreign demand. The tide has now been reversed, and we shall not be able to expand materially our domestic sales in the agricultural regions of the South and West so long as the foreign demand for the produce of these regions continues to decline.

The point of this analysis is that since a decline in foreign demand may cause economic prostration in certain basic industries in the United States and since the effects of this are felt throughout the entire industrial system of the country, the loss of our foreign trade is of vital importance. A decline of foreign trade carries with it, for at least a considerable period of time, a decline in domestic trade.

The qualification, "for at least a considerable period of time," will be noted. The North American Continent is undoubtedly economically self-sufficient; and it is large enough and diversified enough to permit an extensive geographical specialization in production. In the long run we might, therefore, effect a vast reorganization of the channels of trade and of financial relations and get on well enough without Europe. The trouble is that we are just now faced with the short run, which must be completed before we shall have an opportunity to engage in the longer jaunt. Our economic organization is adjusted, as a result of the trade and industrial evolution of the last hundred years, to trade with Europe. The process of reorganizing the industrial system on wholly independent lines would involve the gravest industrial consequences and require many years to accomplish.

Again we must come back to the question of imports. If the power of other nations to produce commodities required by the United States is seriously impaired, it will in many cases seriously hamper American industries. Run back over the list of commodities mentioned in the quotation above that must be imported by the United States, and you will find that the maintenance of imports is quite as essential to American prosperity as the maintenance of exports.

The maintenance of American imports is, moreover, directly indispensable to the maintenance of American exports. Other nations can purchase our goods only if we purchase theirs in substantially like amounts. International commerce at bottom means swapping goods.

All nations, then—even the United States—will have to bear the industrial consequences if the process of economic and social disintegration in Europe, particularly central and eastern Europe, is allowed to run its fatal course.

II.—The Nature of the European Sickness.

While the persistence of European prostration and gradual decadence is conceded without argument by most close students of international economic conditions, it is perhaps well to point out here the principal sources of difficulty at the present time, and the chief evidences of continued economic deterioration.

In some important respects the situation is better now than it was two years or even a year ago. Industrial and political unrest has, temporarily at least, been allayed; food production has increased somewhat; and there is a growing disposition in many countries toward renewed international cooperation in economic affairs. But in other fundamental respects the situation has shown no improvement. The principal evidences lie in: (1) Statistics of monetary inflation; (2) government budgets and debts; and (3) foreign trade.

In the allied and neutral nations the total of outstanding currency has been reduced somewhat during the past year, and in some quarters this has been pointed to as indisputable evidence of general improvement. The truth is, however, that it is merely a result of business depression. Just as bank loans and outstanding notes and deposits in American banks have declined during the past year because of declining prices and curtailed business operations, they have also been reduced in Europe. In all of the countries of central and eastern Europe, however, there has been an enormous expansion of currency, largely to meet government deficits.

In nearly every continental country government deficits were larger in 1921 than in 1920—with England the only belligerent nation in Europe that could by any stretch of the imagination be regarded as in a sound fiscal condition. To take a horrible example, Poland's revenue from taxation in 1920 was estimated at 3,000,000,000 paper marks and expenditures at 15,000,000,000. In 1921 the figures have been computed by a leading American banker at 10,000,000,000 paper marks taxation revenue and 110,000,000,000 paper marks expenditures. The proportion raised by taxation decreased from 21 to 9 per cent.

Even France is still in a very grave financial condition, as the following figures of mounting indebtedness show:

Total debt (in francs).

1914, July 31	34,188,000,000
1918, December 31	151,122,000,000
1919, December 31	240,242,000,000
1920, September 30	285,836,000,000
1921, February 28	302,743,000,000
1921, September 30	320,000,000,000
1921, December 31	328,000,000,000

These official figures of the increase in the French debt are sufficient answer to those who contend that France has now practically balanced her budget. In the 12 months ending September 30, 1921, the deficit was obviously nearly 35,000,000,000 francs, making no allowance for interest on the Government debt to other allied nations. It should be added that reparation claims, if paid in full, would reduce this deficit to about 20,000,000,000. But does anyone now believe that they will ever be paid in full?

Germany's debt increase has been even more stupendous since the armistice. In order to balance her budget at the present time Germany would have to double her revenues and halve her expenses. It may well be questioned whether any continental European Government could remain in power if it attempted to make fiscal ends meet. It is the huge fiscal deficit in Germany that in the main explains the stupendous increase in mark circulation from 70,000,000,000 last May to over 120,000,000,000 at the present time.

With reference to foreign trade, most European nations have reduced somewhat the excess of imports over exports—the unfavorable balance. But this is mainly the result of the fact that while exports have declined, imports have declined still more heavily, all of which is in no small degree again merely a reflection of the world-wide business depression. Only to the extent that the reduced imports are in foodstuffs and nonessential commodities can they be regarded as evidences of improvement. Unfortunately, the progress in this connection has been far from satisfactory in most European countries. On the whole, European trade is still very greatly depressed, evidencing, as in the United States, decreased industrial activity and diminished output at a time when the crying need of the world is for increased wealth production.

The Unity of the Problem.

Even if it were true that a few particular nations of Europe had shown improvements during the past year, there could be no assurance of permanency in such improvement so long as other important sections of Europe are in decadence. If the prosperity of the United States is dependent upon stable European conditions, the prosperity of France and England and other western European nations is even more dependent upon the restoration of the shattered economic organization of central and eastern Europe. All nations of Europe will in the end progress or retrogress together.

III. The Fundamental Requirements.

The purpose of this memorandum is, first, to direct the attention of American business men to conditions in Europe and the relation thereof to American prosperity, and then to promote discussion of ways and means of remedying the existing situation. To this end there is drawn up below a statement of the principles involved, together with the arguments, pro and con, on highly controversial issues.

There are two elemental principles which, if kept steadfastly in mind, will contribute greatly to a sound solution of the present world problem. They are as follows:

1. There can be no permanent improvement in any country unless there is an increase in production. It is self-evident that we can not consume what has not been produced.

2. There can be no great increase in production in any nation so long as international commerce is languishing. The existing economic system is international in scope; for good or for ill, each nation depends for its material well-being upon thriving trade with other nations.

The crux of the problem therefore lies in the reestablishment of normal trade relations between nations, to the end that through specialized production and exchange the wealth of the world may be increased and the welfare of all classes promoted.

Means of Restoring International Trade.

A consideration of the means of reestablishing trade naturally leads to certain controversial issues. The following are the fundamental problems involved:

(1) Fluctuating exchange rates.
(2) Trade barriers and restrictions.
(3) The payment of reparations and interallied debts.

The Exchange Problem.

The elimination of fluctuating exchange rates requires: (a) The restoration of the gold standard in Europe, (b) the balancing of European budgets, and (c) the balancing of exports and imports in the several countries. Let us see what each of these steps involves.

(a) The gold standard can not be restored in many European countries without increasing the amount of the gold reserve. The United States and the European neutral nations now have huge supplies of gold—supplies far in excess of trade or bank reserve requirements. It has been suggested that the restoration of the gold standard would be facilitated if the excess gold of certain countries were loaned to the nations with depleted gold reserves. (It goes without saying, however, that this should be done only as part of a many-sided program of reconstruction.)

In many European countries it will be found impossible under any circumstances to redeem the huge volume of outstanding paper currency in gold at par. The redemption should be made at some fixed ratio, as a hundred to one, a thousand to one, or a million to one, depending upon the degree of inflation in the various countries.

(b) The balancing of budgets is necessary to a restoration of the gold standard, and thus to a restoration of stable exchange rates. Government deficits require additional Government borrowing—and this additional borrowing in many countries necessarily takes the form of legal tender irredeemable paper promises to pay. This increase of paper currency is accompanied by persistent depreciation in terms of gold. The gold standard, if reestablished, can not be maintained unless budgets are balanced and all further issues of paper currency consequently avoided.

A balancing of budgets in continental European countries can, as a practical matter, be accomplished only by a great reduction in expenditures. In most countries the tax burden is already very heavy in proportion to per capita income. Higher taxes would tend to impede rather than encourage enterprise. Expenses can be officially reduced only in the following ways, all other means being of minor significance: (1) By decreasing military expenditures; (2) by refunding Government securities at lower interest rates.

When it is known, for example, that the interest on the French debt now equals about 65 per cent of the total French revenues from taxa-

tion, and that the two items of interest (exclusive of that on the foreign debt) and military expenses alone now exceed the total revenue from taxation, it will be readily recognized that drastic curtailment of expenditures for these purposes is necessary.

TRADE BARRIERS AND RESTRICTIONS.

Since the war there has been a return to a régime of trade control and tariff regulation comparable only to the situation during the so-called mercantilist era of the seventeenth and eighteenth centuries. Then the guiding principle of nations was to develop national power through a series of trade regulations and restrictions designed to promote manufacturing and to make the exports of every nation exceed the imports. While the utter futility of this has been repeatedly demonstrated, it has come to the front again since the war. Each of the new States of central and eastern Europe has been trying to render itself economically self-sufficient through trade embargoes, restrictions, and tariffs; each has, however, merely succeeded in rendering itself economically impotent. Says the British commercial commissioner to Hungary of the States arising out of the former Austro-Hungarian Empire, "It would seem that each State has determined to prevent the others from existing, even if it ruins itself in the endeavor."

Happily there has been some change of sentiment in central and eastern Europe during the past few months, and trade treaties are now being negotiated. There is still much to be accomplished, however, and the necessity of permitting unrestricted trade is still to be fully recognized by the nations of western Europe as well as by the United States.

This is not an argument for the establishment of free trade throughout the world. On the contrary, it is recognized that such a policy would be likely to produce a new chain of maladjustments and transition difficulties. But it is an argument against the artificial and destructive trade restrictions and barriers that have followed in the wake of the war.

THE REPARATION AND DEBT PROBLEM.

From the economic standpoint the payment of reparations and allied debts involve almost identical principles. But since their origin is different they must be treated separately.

The arguments in favor of requiring Germany to pay the reparations stipulated in the Versailles treaty are as follows:

(1) Germany not only was responsible for the war, but her armies devastated a large area in France and Belgium. She should therefore pay for the damages wrought to property and furnish pension money for allied soldiers.

(2) Germany should be placed under the reparation handicap in order to prevent her from beginning immediate preparation for a future renewal of the attack on civilization.

(3) France, particularly, can not balance her budget and recover her financial equilibrium unless Germany pays. Without reparations France is bankrupt. Italy and Belgium are in a similar position.

(4) Germany is able to pay, as is evidenced by her industrial activity and huge profits.

The following are the arguments for a very great reduction of the reparation payments:

(1) Germany will collapse financially if forced to meet the strain of reparation payments in addition to meeting her ordinary financial requirements. The collapse of German exchange since the settlement of last May is pointed to as evidence in point. The apparent prosperity is not built on solid foundations; business is feverish, not healthy, and the profits are largely paper profits. A collapse of Germany would seal the industrial fate of Europe for at least a generation.

(2) Germany has less than $250,000,000 in gold. It is agreed, therefore, by allied statesmen as well as by financiers and economists everywhere that Germany can pay only with goods. The fundamental principle is that foreign debts can be paid only through an excess of exports over imports. The allied nations are not willing to receive huge quantities of German goods nor are they willing to see German trade thus stimulated. They have already erected tariff barriers against German goods. The reparations issue reveals the truth of the old saying, "It is more blessed to give than to receive."

(3) The payment of reparations would reduce the exports of the allied nations.

If Germany is compelled to export, say, $1,000,000,000 of goods annually for reparation payments she can not use that $1,000,000,000 in purchasing allied goods. Allied exports will accordingly be $1,000,000,000 less than would otherwise be the case. Great Britain, France, Belgium, Italy, Serbia, and Rumania need to have Germany buy from them quite as much as they need to have German materials furnished free of charge. The recognition of the importance to every nation of German markets and of the necessity of allowing Germany to use her own exports as a means of purchasing imports, if German markets are to be restored, leads inevitably to the conclusion that the reparation payments must be reduced to very small quantities for the good of the allied nations themselves. It is this recognition of the necessity of restoring German demand for the exports of other countries that is responsible for the almost complete shift of opinion in Great Britain on the whole subject of reparations.

These considerations lead to the conclusion that reparation payments should be confined to shipments of such materials of reconstruction as allied nations specify they wish to receive.

The arguments in favor of requiring the payment of the allied debts to the United States are as follows (the arguments as to the debts between England, France, etc., are the same in most respects):

(1) Europe has a moral obligation to pay, and it is highly important in these days of unsettlement that moral obligations be recognized and kept.

(2) We asked for no reparations or cessions of territory.

(3) We need the money in order to reduce our oppressive tax burdens.

(4) We are in a strong strategic position as a creditor nation; debtors always listen to those to whom they owe money. Why part with this weapon of diplomacy? Hold it as a club over Europe, as a means of enforcing our demands for internal European reforms.

(5) The cancellation of these debts would prejudice future international credit operations.

The arguments in favor of substantial cancellation of the debts of European nations to the United States Government are as follows:

(1) Some six or seven billions of the ten billions of government loans were made for war purposes at a time when that was the only way in which we could cooperate effectively in the struggle. That much of it, at least, should be regarded as a war cost—incurred at a time when the allied armies alone were holding the enemy at bay. It may be recalled in this connection that this money was largely spent in the United States in payment for war supplies purchased here.

(2) The remission of these debts would gain for us the good will of the world, a good will which in the long run would prove of incalculable practical benefit.

(3) The allied nations can pay us only by shipping goods here. The interest alone on the total of government debts now amounts to about $500,000,000 annually. To pay the interest would therefore require an excess of American imports over exports of $500,000,000 a year. Private debts now owing us add about $200,000,000 more to this amount.

The United States desires to increase exports. But as a practical matter if we require Europe to ship us $700,000,000 annually in payment of interest on past debts and another $300,000,000 annually, say, for reduction of principal, Europe's ability to purchase our current production will be reduced by a billion dollars annually, and our exports will decline accordingly. All who want to see exports maintained and increased should, therefore, stand for debt cancellation. So, also, with all those who believe in high protection for American industry.

(4) We can not reduce the burden of taxes by requiring Europe to pay. The inevitable resulting curtailment of exports would intensify the business depression and thereby make a less total of taxes more difficult to meet than the present total. We were prosperous while the process of shipping Europe $10,000,000,000 of goods on credit was under way; we would be unprosperous if Europe were to pay us. The very fact that we have been seeking to devise means of continuing foreign credits "for the benefit of American business" suggests that prosperity here is not to be found in declining exports and expanding imports. With good business in this country our present taxes would prove less onerous than would taxes $500,000,000 less under conditions of serious business depression.

(5) The answer to argument No. (3) in favor of making Europe pay is that we would make a more effective use of our power if we agreed to cancel the debt on condition that the Allies undertake to do now what is regarded as necessary for the restoration of world prosperity. These debts will prove a valuable weapon of diplomacy only if they are actually used for bargaining purposes—thrown into the pot as a part of the general settlement. It would be impossible, for example, for us to induce France to let up on reparation demands if we were unwilling to reduce or cancel our debt claims.

(6) There is a final argument for cancellation. When a private debtor becomes so seriously embarrassed that it is apparent he can not meet his obligations within any reasonable length of time he is permitted to go through bankruptcy proceedings and start anew. It is recognized that this is sound policy, even from the point of view of the creditor, for the bankrupt may in time become once more a good customer. Why should not the same policy be adopted between nations? Should it not be recognized that the nations of continental Europe can not pay within any reasonable length of time, and that our interests, as well as theirs, would be promoted if we let bygones be bygones?

Such are the arguments for and against reparation and debt reduction or cancellation. Since the purpose of this memorandum is only to provoke thought and discussion, we express here no opinion on the merits of the controversy. It is deemed important, however, to emphasize one matter of policy. Granted that it may in the end be wise to cancel or reduce the war debt to the United States, it would certainly not be sound policy to do so at the present moment and unconditionally. We should await the proper time, and then agree to cancellation, reduction, or a general reorganization agreement, with equitable adjustments of monetary obligations and trade restrictions, only on condition that the European nations resolutely undertake to perform their part in the general settlement. Meanwhile we should be studying the problem involved so that there may be no unnecessary delay when the psychological moment arrives.

IV.—WHAT SHOULD THE FOREIGN POLICY OF THE UNITED STATES BE?

The Conference for the Reduction of Armament recently held in Washington constituted an important step toward the sort of international cooperation that is needed if the economic rehabilitation of the world is to be effected. It points the way to further constructive achievement. Although the conference was called to consider the reduction of armaments both on sea and on land, it was found inexpedient to consider at the moment the question of European land armaments, vital as that question was known to be. In spite of this failure to secure any alleviation of the burden of land armaments, the action taken in Washington gives greater promise of world peace and consequently of economic rehabilitation than any other international action since the armistice. The definite results obtained constitute a saving of many millions of dollars annually for each of the great powers and renders naval competition and naval warfare in the near future a practical impossibility. Major questions of dispute in the Far East have been settled amicably. China and Siberia have been protected from political and military aggression so far as conditions in these countries now make possible. A greater degree of international trade and financial cooperation in relation to China is assured.

Furthermore, the moral effect of the Washington settlements, reached in a spirit of cooperation in which each nation has conceded something for the common good, must in the end exert a tremendous pressure for similar action in Europe. Peoples now staggering under the burden of military armaments will demand of their governments substantial relief from that burden. Moreover, the permanent administrative agencies, established to carry out the terms of the Washington agreement, will constitute in themselves the basis of a practicable association of nations to promote international peace and cooperation.

Relieved of naval militarism, the nations of the world may now seek to bring about permanent peace conditions and a substantial reduction of land armaments on the Continent of Europe. Since the economic stability of Governments everywhere in Europe requires the cooperation of the United States and Great Britain with the nations of continental Europe, in the end the influence which our Nation can exert for the rehabilitation of Europe must be decisive. If the great Anglo-Saxon nations use their combined influence to secure international cooperation for a reduction of European armaments and a restoration of international commerce, they will have made the economic recovery of Europe possible.

The United States Government has recently seen fit to refuse the invitation to attend the "economic and financial" conference called to meet in Genoa early in April. This refusal, however, in no sense indicates a determination on our part to withdraw from all participation in European affairs—to adhere to a policy of narrow isolation. The refusal is apparently based on the conviction that the Genoa conference may be involved in political controversies that will hinder rather than promote constructive economic settlements.

The administration stated in reply to the invitation that the conference did not appear to be primarily economic and that certain funda-

mentally important issues are excluded from the agenda. Mr. Hughes's note concludes: "While this Government does not believe that it should participate in the proposed conference, it sincerely hopes that progress may be made in preparing the way for the eventual discussion and settlement of the fundamental economic and financial questions relating to European recuperation which press for solution."

The time for the American people to determine the basic elements of our foreign policy is now. The European economic situation is critical; if the United States is ultimately to cooperate with Europe in any far-reaching program of reconstruction, we have got to make up our minds soon what we stand for, what we think Europe must do, and what we are willing to contribute to the process of settlement. American delegates can not function at any international conference unless they go there, if not with power to act, at least with something in the way of a formulated and expressed public opinion back of them. In a democracy public opinion is supreme. What is American public opinion with reference to the issues raised in this memorandum?

EXECUTIVE SESSION.

Mr. CURTIS. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After five minutes spent in executive session the doors were reopened, and (at 6 o'clock and 30 minutes p. m.) the Senate took a recess under the order previously made until to-morrow, Wednesday, May 10, 1922, at 11 o'clock a. m.

CONFIRMATIONS.

Executive nominations confirmed by the Senate May 9 (legislative day of April 20), 1922.

COLLECTOR OF INTERNAL REVENUE.

John F. Jones to be collector of internal revenue, South Carolina.

REGISTERS OF THE LAND OFFICE.

Hugh E. O'Donnell to be register of land office, Lewiston, Idaho.

Jaffa Miller to be register of land office, Roswell, N. Mex.

PROMOTIONS IN THE ARMY.

James Henry McRae to be major general.

Harry Alexander Smith to be brigadier general.

POSTMASTERS.

GEORGIA.

Forrest L. Dyar, Calhoun.

KENTUCKY.

Allie H. Gibson, Ghent.

James H. Branstetter, Glasgow.

OHIO.

Elizabeth P. CarSkaden, Castalia.

Jennie Fickes, Empire.

William E. Davidson, Kensington.

OKLAHOMA.

Lester A. Presson, Sulphur.

SOUTH CAROLINA.

Caleb F. Pendleton, Cheraw.

Pierce M. Huff, Piedmont.

Clifton O. Crosby, Walterboro.

WISCONSIN.

Charles L. Bingham, College Camp.

HOUSE OF REPRESENTATIVES.

TUESDAY, *May 9, 1922.*

The House met at 12 o'clock noon.

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

Our Father of all goodness and God of all grace, we thank Thee that the Divine Nature broods over our world and cares for the countless needs of earth's imperfect creatures. Thy voices are manifold. Thou art speaking to us out of the sky, out of the earth, and out of human experience. O make the truth to dwell in us. Always may it appeal to our understanding, to our moral sense, to our affections, and to our deepest sympathies. Let its influence and might direct our public and private conduct. Throughout our land bless and consecrate the centers of power, that our civilization may not be material, but that it may rise to the highest form of life through Christ. Amen.

The Journal of the proceedings of yesterday was read and approved.

PAY OF THE ARMY, NAVY, ETC.

Mr. McKENZIE. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill (H. R. 10972) to readjust the pay and allowances of the commissioned and enlisted personnel of the Army, Navy, Marine Corps, Coast Guard, Coast and Geodetic Survey, and Public Health Service.

The question was taken.

Mr. RANKIN. Mr. Speaker, I make the point of order that there is no quorum present.

The SPEAKER. The gentleman from Mississippi makes the point of order that there is no quorum present. Evidently there is not. The Doorkeeper will close the doors, the Sergeant at Arms will notify absentees, and the Clerk will call the roll.

The question is on the motion of the gentleman from Illinois that the House resolve itself into the Committee of the Whole House on the state of the Union for the further consideration of the Army pay bill.

The question was taken; and there were—yeas 294, nays 0, not voting 136, as follows:

YEAS—294.

Ackerman	Fitzgerald	Lee, Ga.	Roach
Almon	Fordney	Lee, N. Y.	Robertson
Andrew, Mass.	Frear	Lehlbach	Robsion
Andrews, Nebr.	Free	Lineberger	Rodenberg

So the motion was agreed to.

The Clerk announced the following pairs:

Until further notice:

Mr. Treadway with Mr. Cockran.
Mr. Davis of Minnesota with Mr. Montague.
Mr. Winslow with Mr. Bankhead.
Mr. Kahn with Mr. Campbell of Pennsylvania.
Mr. Greene of Massachusetts with Mr. Drewry.
Mr. Shreve with Mr. Woods of Virginia.
Mr. Beedy with Mr. Mead.
Mr. Kies with Mr. Hardy of Texas.
Mr. Wood of Indiana with Mr. Favrot.
Mr. Taylor of New Jersey with Mr. Collier.
Mr. McArthur with Mr. Raker.
Mr. Gorman with Mr. Brand.
Mr. Johnson of South Dakota with Mr. Smithwick.
Mr. Butler with Mr. Jacoway.
Mr. Michaelson with Mr. Martin.
Mr. Dickinson with Mr. Humphreys.
Mr. Sanders of Indiana with Mr. Fields.
Mr. Atkeson with Mr. Drane.
Mr. Bixler with Mr. Clark of Florida.
Mr. Connell with Mr. Dominick.
Mr. Kendall with Mr. Sears.
Mr. Snyder with Mr. Ward of North Carolina.
Mr. Scott of Michigan with Mr. Gilbert.
Mr. Hogan with Mr. Upshaw.
Mr. Patterson of New Jersey with Mr. Taylor of Colorado.
Mr. McPherson with Mr. Collins.
Mr. Osborne with Mr. Bland of Virginia.
Mr. Coughlin with Mr. Carter.
Mr. Strong of Pennsylvania with Mr. Sullivan.
Mr. Ellis with Mr. Hudspeth.
Mr. Burke with Mr. Kindred.
Mr. Kearns with Mr. Wingo.
Mr. Reece with Mr. Kitchin.
Mr. Wurzbach with Mr. O'Connor.
Mr. Stiness with Mr. Kunz.
Mr. Maloney with Mr. Taylor of Arkansas.
Mr. Volk with Mr. Blanton.
Mr. Boies with Mr. Rainey of Alabama.
Mr. Darrow with Mr. Jeffers of Alabama.

The result of the vote was announced as above recorded.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the further consideration of the Army pay bill, with Mr. TOWNER in the chair.

The Clerk reported the title of the bill.

Mr. OLIVER. Mr. Chairman, may I be pardoned for a moment's digression to say that it is not pleasant to be in disagreement with one's colleagues, especially when that disagreement relates to the compensation of worth-while and essential public services. When Members of the House, however, are honored with an appointment on an important committee, and the recommendations of the majority can not be approved by the minority, then a high duty is owing by the minority to the Members of the House to give the reasons and facts on which their objections to the recommendations of the majority are based. Especially is that duty emphasized when the subject is technical and involved, because we know that the Members of the House, engrossed as they are with a multitude of duties, can not find the time to read extended hearings on all proposed legislation, and I know that has happened in reference to the pending bill. The minority have endeavored to discharge that duty by writing a report which they think is an accurate statement of well-founded objections, and in that report they have indulged in no recriminations, nor any unkind thrusts, but have endeavored to lay before you the bare facts on which these objections are based. We respectfully ask for the report your thoughtful consideration. My friend, the gentleman from Illinois [Mr. MCKENZIE], has given to the minority report but a superficial examination, if he has interpreted it as depreciating or disparaging in the least the services to our country of its Army and Navy.

I value and appreciate the loyalty, the splendid record, the glorious achievements of the Army and the Navy in the past, and they supply protection and security for our country now and in the future. However, Mr. Chairman, we must not forget that, like ourselves, these services are but the servants of a great people who, without intending offense or lack of appreciation, may, should—yea, do—demand that these arms of the Government be maintained on a sane, just, and economic basis.

I feel that before a permanent pay schedule for these services is written into law Congress should first see that the readjustment which it now has in mind and also the readjustment which the President has announced he will recommend should be made so that the permanent strength of the Navy, Army, and Marine Corps can then be definitely fixed. Unless this course is pursued, the passing of a permanent pay bill will of necessity entail needless and large expense. It will provide an increase in both the active and retired pay of a large number of officers, who under readjustments or reductions in officer personnel will be separated from the service within the next few years.

The House has passed a bill reducing the officer personnel of the Army 2,000, and the House Naval Affairs Committee has reported out a bill seeking to make reduction in the commissioned personnel of the Navy, and we should at least wait until final action is taken on these two matters before providing a permanent pay schedule, involving large increased officer pay for many now in the service and who in all probability will be retired on increased pay.

In the minority report you will find a statement showing that we now have in the commissioned grades of the Army and the corresponding grades of the other services 12,769 more commissioned officers than we had in these same services in July of 1916. This comparison was based on tables giving the commissioned personnel as of January last. Since that date the number of commissioned officers in these services, from reports submitted within the last 10 days to the chairman of the Appropriations Committee, show an increase over July, 1916, of 13,716 commissioned officers instead of 12,769.

Mr. RANKIN. Will the gentleman yield?

Mr. OLIVER. Yes.

Mr. RANKIN. The gentleman says the number of officers has rapidly increased. Does he mean the officers of the higher rank?

Mr. OLIVER. Yes.

Mr. RANKIN. And not lieutenants?

Mr. OLIVER. No. In 1916 in the grade of major and corresponding grades in the other service we had 19; we now have 70. We had 39 brigadier generals, and we now have 100. We had 310 colonels, and we now have 981. We had 414 lieutenant colonels, and we now have 1,415. We had 115 majors, and we now have 4,660. We had 2,686 captains, and now we have 8,946. We had 2,956 first lieutenants, and we now have 5,012. We had 1,236 second lieutenants, and now, with this large increase in the upper grades, we have only 1,351 second lieutenants, and 1,142 of these are ensigns, leaving 77 second lieutenants now in the Army.

The gentleman from Illinois in his speech on yesterday stated that there were a few exceptional cases of colonels who would be entitled to the maximum pay of that grade by reason of service. Now, the facts are that there are 434 colonels who have over 30 years' service, and who, if the pending bill is passed, would be entitled to a maximum compensation of $7,200, and who if retired would receive an increased retirement pay of $750 each. There would also be an additional 366 colonels who would enjoy under the pending bill the same increase in retired pay within the next four or five years—some of this additional number within a very short time.

Some one has asked how under the pending bill is this possible? It happens in this way, that section 1 increases the longevity pay from 40 to 50 per cent of the base pay and repeals the limitation of $1,000 on the maximum base and longevity pay as now applied to colonels, lieutenant colonels, and majors, and those in the corresponding grades of the other services. In other words, the base and longevity pay of colonels is now $5,000, lieutenant colonels $4,500, and majors

$4,000, but under the pending bill this limitation of $1,000 is removed and the maximum base and longevity pay of a colonel will hereafter be $6,000, that of lieutenant colonel $5,750, and that of major $5,250. This constitutes the basis for computing retired pay; that is to say, the officer retires on three-fourths of his base and longevity pay. Examine Table 1, attached to the minority report, and you will see how a large number of colonels, also lieutenant colonels and majors, who, if retired now, will receive increased retired pay. In the case of colonels $750; in the case of lieutenant colonels and majors $937.50.

This Table 1 will also disclose the large additional number that will soon be entitled to the maximum base and longevity pay, thus increasing their retired pay as indicated above. This liberal increase in the retired pay of colonels, lieutenant colonels, and majors, under the terms of the bill, is extended to those now on the retired list, and where the officers in these grades at the time of retirement had normal service to their credit they will be given the increased retired pay provided in the pending bill.

Certainly, when the House appointed the committee to make recommendations relative to a permanent pay bill, they had little idea of having this large increase in retired pay provided for. The increase for the grades mentioned is made possible by the removal of the $1,000 limitation on base and longevity pay.

Mr. BLACK. Will the gentleman yield?

Mr. OLIVER. Yes.

Mr. BLACK. I understand the gentleman to say that the retired officers would have their retired pay increased provided they had normal service. Will the gentleman give a little explanation of what he means by normal service?

Mr. OLIVER. For a colonel, 26 years; for a lieutenant colonel, 20 years; for a major, 14 years. There are retired officers in these grades with sufficient service to entitle them to the maximum increase in retired pay which I have hereinbefore stated this bill provides.

In this connection Congress passed a bill some years ago permitting retired officers to be called into active service, and information before the committee showed that this statute had been abused, and it was the unanimous belief of the committee that it should be repealed. Many retired officers have been called into active service, so that they could be advanced to a higher grade and retired at increased pay. Now, the pending bill will, by reason of increasing the retired pay on account of service and the removal of the $1,000 limitation, give to many officers who have been advanced by reason of this statute substantial increases in retirement pay.

Mr. BYRNES of South Carolina. Will the gentleman yield?

Mr. OLIVER. Yes.

Mr. BYRNES of South Carolina. It is a fact that the retired maximum could be received for 30 years' service. If they have served 20 years or less the longevity will be less than the present list?

Mr. OLIVER. No. Section 16 of the pending bill saves the present base and longevity pay of all officers.

Mr. McKENZIE. Is it not true, however, the question asked by the gentleman from South Carolina is a fact as to all officers coming in hereafter?

Mr. OLIVER. Yes. I will discuss that in a few moments. That is accomplished in this way, that the pending bill, while increasing the longevity pay from 40 to 50 per cent, makes a change in the periods when the longevity pay accrues. Under existing law commissioned officers are entitled to 40 per cent longevity, subject to the $1,000 limitation which I have hereinbefore alluded to—10 per cent of this 40 per cent accrued in 5 years and 10 per cent every 5 years thereafter until the 40 per cent had finally accrued at the end of 20 years. Now, under the pending bill the longevity percentage is increased from 40 to 50 and the officer is entitled to 50 per cent longevity pay increase at the expiration of 3-year periods, thus giving him the 50 per cent in 30 years, whereas under existing law he was limited to 40 per cent, which accrued in 20 years.

Under existing law service can only count on longevity pay, and this service is not confined to commissioned service. It includes, for those officers who graduated from the academy prior to 1916, the years they spent in school, also any enlisted service they may have had, and for a large number of the officers who were commissioned prior to March, 1913, constructive or gift service. As stated above, this service now only counts for longevity pay, and the longevity percentage is limited to 40 per cent, with the further limitation that in the grades corresponding to those of colonel, lieutenant colonel, and major in the Army the total longevity pay can not exceed $1,000. Now, this bill has not only increased the longevity percentage from 40 to 50 and removed the $1,000 limitation but it proposes to allow officers now in the service to count all service, heretofore only counted for longevity pay, for the purpose of advancing such officers to the next high base pay period, thereby giving a $500 increase in base pay, on which longevity pay will be computed. In other words, a major under this bill, with 23 years' service, not limited to commissioned service, will immediately pass to the pay grade of a lieutenant colonel, the base pay of which is $500 in excess of the base pay of a major. An examination of Table 1 will show there are at least 265 majors with 23 years' service who, under the pending bill, will be advanced to the pay period of a lieutenant colonel while still holding a major's commission, and each will thus receive an increase of $500 in base pay, and on which their longevity pay will hereafter be computed.

When you recall that we now have 4,650 majors, 265 of which will immediately pass to the pay period of a lieutenant colonel, and others will rapidly follow, you can well understand just how favorable the proposed bill is to the officers now in the service.

We now have some majors with only about 6 years' service, when it formerly required from 17 to 20 or longer service to advance one to that grade. Some of the majors now have 30 years' service, and these will be advanced, under the pending bill, to the pay period of a lieutenant colonel, which will entitle them to the maximum compensation of a colonel, to wit, $7,200. Hereafter the bill provides that no officer coming into the service can ever count for longevity pay or for advancing an officer to the next high pay period any but commissioned service. Certainly no explanation can be offered why this discrimination should be made in favor of the officers now in the service and why the officer now in the service should be able to count every character of service for the purpose of advancing him to the next pay period, whereas only commissioned service can be so counted by officers commissioned after the passage of the bill.

Mr. BYRNES of South Carolina. Will the gentleman yield?

Mr. OLIVER. I will.

Mr. BYRNES of South Carolina. The gentleman has referred to a major of 30 years' service.

Mr. OLIVER. Yes. That is, where I stated that he would be entitled to receive the maximum pay of a colonel.

Mr. BYRNES of South Carolina. The gentleman does not contend that a major with six years' service will not receive a reduction as a result of this bill.

Mr. OLIVER. A major with six years' service receives no reduction in his base and longevity pay, because that is saved to him by section 16 of the bill.

Mr. BYRNES of South Carolina. But the gentleman does not contend that a six-year major under this bill will not receive a reduction in compensation below what he is receiving to-day under present law?

Mr. OLIVER. You, of course, refer to the March 18, 1920, act, which expires on June 30. Now, this act gave indiscriminately to all majors a bonus of $840, and certainly Congress would not have made this generous provision for all majors had they known on May 18, 1920, that there would be promoted to that grade a large number of young officers who ordinarily would have been compelled to wait from 14 to 20 years to reach the grade. While I favor the continuance of a temporary bill, yet it should be so written as to take into account the rapid promotions that have carried officers to high grades. Officers thus rapidly advanced to the grade of a major have received not only large increased pay and compensation by reason of such promotions but have been paid in addition thereto a bonus of $840.

Mr. SISSON. Will the gentleman yield?

Mr. OLIVER. Yes.

Mr. SISSON. Under the law the gentleman speaks of these rapid promotions that have depleted the second lieutenants' places until there are less than 100.

Mr. OLIVER. Now 77 in the Army.

Mr. SISSON. Now 77. Now, in this new bill—this bill that is now asked to be enacted into law—it does not affect in any way the promotion which, I think, was illegally and unjustly had under an erroneous construction of that very law?

Mr. STAFFORD. If the gentleman will permit, the practice of the War Department being to promote and fill every vacancy in the higher grades to the full complement of the increased officer personnel, what percentage of officers in the service have not received an increased rank, and thereby increase of pay, during the past 18 months?

Mr. OLIVER. I do not think you will find any.

Mr. STAFFORD. They have all received promotion or increase of pay of several hundred dollars?

Mr. OLIVER. Yes.

Mr. McKENZIE. I want to ask the gentleman if it should not be stated in all fairness that when this bill becomes a law a

major would have to serve 14 years before he gets that place—that is, for any six-year majors?

Mr. OLIVER. Section 16 saves to him his base and longevity pay, and until he has been in the service 14 years his allowances are those of the captain's pay period.

Mr. HUDDLESTON. What has been said about these promotions implies that they were deliberately made, not for the good of the service, but to enable the beneficiaries to get a large advance in their compensation? Is that a conclusion warranted by the facts in the case?

Mr. OLIVER. I would prefer not to discuss the motives that may have prompted these. Everyone can draw his own conclusions.

Mr. SISSON. It is well enough for us to consider the former law which fixed their grade and pay prior to the war. Then the act the gentleman referred to gives all these rapid promotions, eliminating the second lieutenants. As to this law, I do not think it would be contended; that is, that this law that is proposed to be enacted carries anything like the pay prior to the war.

Mr. OLIVER. Not at all. May I read a very interesting statement made by the gentleman from Illinois [Mr. MCKENZIE] during a colloquy with Secretary Denby. This is what Mr. MCKENZIE said, speaking of promotions:

> I want to be very frank with you. You are aware of the fact that since we got into this Great War with Germany there are hundreds and hundreds of young officers who have received very rapid promotion, and some of these older officers, in both the Army and Navy, that I see sitting around in the room, probably served 10 or 15 or 20 or 25 years before they reached the point where they were drawing the pay that some of these younger men are drawing after two or three years' service.

And yet my friend, perhaps forgetting that statement, is now supporting a bill that saves this grade and longevity pay to these young men, and in addition thereto proposes to give them a ration allowance and increase commutation for quarters. I am wondering if that is a just, fair, and sane economy? [Applause.]

Mr. MCKENZIE. Will not my colleague concede, however, that if this bill is enacted into law this abuse he complains of will never occur again?

Mr. OLIVER. Let us inquire into the matter which the question of the gentleman raises. The minority report states that this bill is overgenerous to the officers who assisted in its preparation; I might go so far as to say, to the officers who actually wrote it, and in prepared form submitted it to the committee for their consideration.

Mr. JOHNSON of Mississippi. Will the gentleman yield?

Mr. OLIVER. In a moment. I quote from section 1, as follows:

> For officers hereafter appointed, no service shall be counted for the purpose of pay except effective commission service under Federal appointment. For officers now in the service all service which is counted in computing longevity pay shall be included in the computation.

Service now counted in computing longevity pay and which this provision seeks to make available to officers now in the service so as to advance them to the next pay period, thereby increasing their base pay, is not limited to commission service, but includes for all graduates from the academies at West Point and Annapolis prior to July, 1916, the time spent at these academies in school, and constructive or gift service credited to many officers appointed from civil life prior to March 3, 1913, also enlisted service. After the passage of the bill, however, for officers hereafter commissioned, only commissioned service can be counted either for longevity pay or for the purpose of advancing an officer to another pay period higher than that corresponding to the grade in which he is commissioned.

Now, in all fairness, would it not be more equitable to favor the incoming officer rather than the one now enjoying high rank by reason of unusual and rapid promotions?

This but illustrates how the bill discriminates in favor of the officers now in the service, and against those that may come into the service hereafter. It is just another evidence that men are human, just a little selfish when they come to write something applying to themselves and which may bring to their pockets some additional dollars; but how quickly is the fellow who has no one to speak for him lost sight of. In other words, the section which I have quoted, and which the gentleman from Illinois seems now to favor, provides that all service can be counted by the officer now in, but only commissioned service by those hereafter coming in; thus a young man serving to-day in the Army, in the Navy, in the Marine Corps, who has aspirations for a commission, will never be able to count, if this bill is passed as drawn; the service which he has rendered while a private, where he undergoes hardship, should he hereafter receive a commission, because, forsooth, that the officers now in have said, "We will claim all that we had as a private, and even the time spent at school; but we will deny to you the right to count anything but commissioned service, either for longevity or to advance you to another pay grade."

Mr. EVANS. Mr. Chairman, will the gentleman yield?

Mr. OLIVER. Let me finish the thought. May I ask the gentleman from Illinois whether he knows of any sound reason why this discrimination should be made in favor of the officers now in? The officers who undertook the preparation of this bill state that they were told by some one that it was necessary to show a saving under the 1923 Budget in order to secure any legislation at this session. In this connection it is interesting to note that if there be substantial saving under the 1923 Budget, based on the May 18, 1920, act, which expires on June 30, 1922, it is accomplished largely at the expense of the private in the Army and the apprentice seaman in the Navy.

The House will be interested in a statement appearing in the hearings by Senator WADSWORTH, chairman of the Joint Pay Committee, touching on this subject, as follows:

> It is well to remember, if we are thinking about the condition of the Federal Treasury and the upkeep of the Army and Navy, that where the great cost is is in the lowest grades of both services. Two or three dollars decrease in the pay of privates in the Army and of apprentice seamen in the Navy amounts to something like two and a half million dollars.

Since the pay in the pending bill has been reduced for the private in the Army $9 and the apprentice seaman $12, you will understand how, if the chairman of the committee was correct in this statement, millions may appear to have been saved.

Mr. STAFFORD. Mr. Chairman, will the gentleman yield?

Mr. OLIVER. Just in a moment. Now, in the fall of 1919 officers appeared before the Committee on Naval Affairs and also before the Committee on Military Affairs of the House and expressed solicitude for the enlisted man and urged that his pay be increased. They even seemed more solicitous about the pay of the enlisted man than they were about their own at that time. Congress very wisely increased the pay of the enlisted man, and thus the officers by the same bill secured for themselves increased pay; but, lo and behold, when they now learn that it is necessary to show a substantial saving under the 1923 Budget, based on the increases granted by the May, 1920, act, they accomplish all of the substantial reduction by reducing the pay of the enlisted man in the low grades.

Mr. STAFFORD. Mr. Chairman, will the gentleman yield?

Mr. OLIVER. Yes.

Mr. STAFFORD. It was stated yesterday by the gentleman from Illinois [Mr. MCKENZIE] that there would be only about $1,000,000 difference in the pay next year under the law that is expiring on June 30 of this year. The gentleman is just calling attention to the fact that the pay of the enlisted man by the proposed bill is reduced from $30 to $21, so far as the Army is concerned.

Mr. OLIVER. Yes; from $30 to $21 in the Army, and from $33 to $21 in the Navy.

Mr. STAFFORD. Has the gentleman any estimate of the gross amount of reduction that will be necessary to make up the high increased pay of the officers as provided in this bill?

Mr. OLIVER. Many tables have been submitted showing this result, and I am unable to give the gentleman an answer and be assured of its correctness. You will find, however, that the gentleman from Illinois [Mr. MCKENZIE], according to all the tables, was in error if you understood him to say that next year this difference would appear. I call your attention to Table 2, appearing in the minority report, and which was submitted by the Army, with accompanying tables, analyzing the results there shown. You will note from this table that it is stated that the amount under the Budget for 1923 will be $59,376,759 for officer pay and under the proposed bill the officer pay will be $59,548,877. All of the tables show that any substantial savings result from a reduction in the pay of the low grades in the enlisted personnel of the Army and Navy. This Table 2, attached to the minority report, shows that under the 1923 Budget the enlisted men will receive $139,421,530 and under the proposed bill only $131,602,593.

Mr. STAFFORD. Will the gentleman yield?

Mr. OLIVER. Yes.

Mr. STAFFORD. What assurance has the committee that the enlisted men, when times are normal, will get the reduced pay of from $33 to $21?

Mr. OLIVER. I am not prepared to state further than this, that you will recall how difficult it was to secure enlistments under the old pay prior to the war. You will find a statement as to this matter in the hearings from some of the naval officers.

Mr. COOPER of Wisconsin. Will the gentleman yield?

Mr. OLIVER. Yes.

Mr. COOPER of Wisconsin. I want to ask the gentleman, if the pending bill were enacted into law, how will it affect the compensation of the rank and file of enlisted men in the Coast Guard? I have a Coast Guard station in my district, and that is the reason I make the inquiry.

Mr. OLIVER. The enlisted personnel in all the services are to be put substantially on the same basis and I think the enlisted men in all services are well provided for, except in the lowest grades. I will be very glad when this section is reached to make further explanation.

Mr. COOPER of Wisconsin. One of the lowest grades would be the man entering the service. Is that reduced?

Mr. OLIVER. Yes; that is reduced in the Army and Navy. The Coast Guard takes the pay of the schedule of the Navy, and the Marine Corps takes the schedule of the Army. There is one rating in the Coast Guard which is not carried in the Navy, and my understanding is that a satisfactory pay is provided for this rating.

Mr. JOHNSON of Mississippi. Will the gentleman yield?

Mr. OLIVER. Yes.

Mr. JOHNSON of Mississippi. I want to ask the gentleman to whom he referred awhile ago when he said that "they who drafted the bill submitted to us," and so forth; and in addition to that I want to ask the gentleman if it contains a provision that the enlisted men's pay should be reduced and the officers' pay should be increased. I think the country is very much interested to know who drafted the bill.

Mr. OLIVER. The gentlemen who drafted the bill are officers in the different services, who enjoyed the respect and confidence of the members of the committee.

Mr. JOHNSON of Mississippi. I am not talking about that.

Mr. OLIVER. They rendered to the committee helpful service. The committee had the right to reject what was prepared and so far as I know there was no effort on the part of any of the officers to conceal from the committee the meaning of any provision in the bill which they prepared. I wish to say that in justice to the officers. The reason that I mentioned that officers prepared the bill was to show that it is perfectly human, if one is preparing something for his own profession, to look at it through the glasses of that profession. That is a human weakness.

Mr. BYRNES of South Carolina. Will the gentleman yield?

Mr. OLIVER. Yes.

Mr. BYRNES of South Carolina. The gentleman does not mean to say that this bill was originally drafted by the officers; he knows that the original proposition upon which this was based was prepared by the gentleman from Illinois [Mr. McKENZIE] and submitted to the committee.

Mr. OLIVER. Yes; I appreciate the valuable services that the gentleman from Illinois rendered in that connection. I have in my report called attention to the fact that the bill which the gentleman from Illinois submitted as a tentative draft was in many respects a decided improvement over the bill which later he consented for the officers to amend and change. [Applause.] In other words, let me call attention to some of the changes.

My friend from Illinois in his statement when he first suggested that he had in mind a tentative bill said he wanted to do away with all longevity pay. He wanted to simplify things, and he desired to draft it on a simplified basis. While contending that service should mainly control in the pay of officers, yet he insisted that only commissioned service could be counted, thus avoiding all discrimination in favor of those officers now in the service. Likewise he said to the officers commissioned from civil life under the 1920 bill, "I propose to give you some constructive service, since you have been trained on the outside at your own expense and have shown by examination that you are qualified for the duties of the grade in which you are commissioned; I will give you such constructive service as will equal the normal service accredited to your grade." Strange to say, the officers at first approved of that suggestion in reference to constructive service, but later rejected it. That is the bill my friend speaks of, and it did have some good features, some, I think, that were a decided improvement over the bill as now presented.

Mr. McKENZIE. Will the gentleman yield?

Mr. OLIVER. Certainly.

Mr. McKENZIE. My colleague will not have the Members of the House believe that in my proposition to give them constructive service I put them in the pay period and also gave them longevity pay?

Mr. OLIVER. The gentleman from Illinois has changed his mind so often in reference to the pay bill that I may have confused the House in undertaking to give an outline of his tentative bills. I was quite familiar with the general idea underlying the tentative bill which he discussed with General Pershing and other officers appearing before the joint committee, and probably in the first tentative bill he did not offer to give constructive service to the officers taken in under the June 4, 1920, act, but he favored abolishing all longevity pay and having commissioned service alone to determine base pay.

Early in January of this year the gentleman submitted another bill, in which it was proposed to give constructive service to the officers commissioned under the June 4, 1920, act, the extent of the constructive service being determined by the normal service of the grades in which commissioned.

The officers approved this suggestion of constructive service for officers commissioned from civil life at first and concluded their approving comments with this statement:

> It is believed that the section as now written—
>
> Referring to the constructive-service section—
>
> will tend to eliminate from the Army the dissatisfaction which has existed among different groups of officers on account of the arrangement of the initial promotion list.

You will find a copy of the tentative bill, together with the officers' comments thereon, in the hearings.

Mr. NEWTON of Minnesota. Mr. Chairman, will the gentleman yield?

Mr. OLIVER. Yes.

Mr. NEWTON of Minnesota. As I understand from the bill as reported out, it is possible, then, for a major with periods of constructive service to his credit to draw more pay than some man who is taken from civil life under the 1920 act and who now holds the rank of colonel?

Mr. OLIVER. Absolutely. In other words, there are colonels who came into the service by reason of the June 4, 1920, act who will get about $6,200, and there will be majors advanced to the pay period of lieutenant colonel who will receive $7,200 while still holding a commission in the major's grade. They would get more than $7,200 if it was not for the limitation fixing a colonel's maximum compensation at $7,200.

Mr. NEWTON of Minnesota. Is it not possible for a captain under this bill to get more money than a lieutenant colonel who is an emergency officer?

Mr. OLIVER. Yes; and since the gentlemen has asked the question, it will be interesting to note that we now have 8,946 captains, which exceeds the number of the entire office personnel of all the services in 1916. There are also 139 captains under the 1908 bill who would receive as maximum compensation $4,160.50, and who, under the pending bill, if passed, will receive $6,357, which represents an increase of $2,197 to each of these captains over the 1908 schedule, and an increase to each of $1,477 over the May 18, 1920, temporary pay, to which act the gentleman from South Carolina [Mr. BYRNES] has several times called attention.

Mr. NEWTON of Minnesota. So, that quite a number of officers, running up in the several hundred, will draw more pay under this bill than they would under the 1920 emergency pay bill?

Mr. OLIVER. Yes. If the gentleman wishes some interesting mathematical problem to work out, which will disclose how rapidly officers of the Army and Navy in the years to follow will be advanced to higher pay periods by reason of service if the pending bill passes, I suggest that he examine Table 1, attached to the minority report, and take the 8,946 captains, with their service records as there shown, and see how rapidly many of them will be advanced to the next pay period, thereby receiving an increase in compensation of $1,477 over the May 18, 1920, act, and $2,197 over the 1908 act. The results will prove a very comforting message, no doubt, to the taxpayers, who now are told that they must be taxed to meet a half billion deficit. The gentleman will also find an interesting statement by Colonel Munson, in which, while giving percentage increases in the pay of the officer personnel in foreign services, on being asked to explain an item in the table which he submitted showing 99 per cent increase in the pay of British captains, he answered that in American dollars the British captain, with these increases, would receive $1,938. Yet you are providing in the pending bill for captains to receive $6,300 as a maximum compensation.

Mr. MONDELL. Mr. Chairman, will the gentleman yield?

Mr. OLIVER. Yes.

Mr. MONDELL. I judge from what the gentleman says that under this bill there will be some very rare cases in which the increase of pay provided for by the bill will be almost as great as the general increases which we provided in the Patent Office a short time ago by a bill which was passed through the House by a very large majority.

Mr. STAFFORD. Still harping on the old question?

Mr. OLIVER. I prefer that the gentleman should elaborate that idea himself.

Mr. MONDELL. I merely wanted to call attention to that fact. Those were very popular increases.

Mr. OLIVER. I am glad always to have the gentleman interrupt me, and may I remind him of another thing that happened in reference to the May 18, 1920, bill? The Naval Affairs Committee, as well as the House Military Affairs Committee, was sympathetic with the idea of granting a reasonable temporary increase to the officers as well as the enlisted personnel, especially to the enlisted personnel, but the gentleman will recall that we could not have the bill considered if we included officers in it. Therefore we brought out a bill providing only for the enlisted personnel, and the officer increase was added by the Senate. This May 18, 1920, increase, as it applied to officers, was never really considered by the House.

No roll call was had on the conference report which included the May 18, 1920, pay provision for officers in the service, and that is one reason why such generous provision was made for the officer personnel in certain grades. It illustrates the danger of hasty legislation. This May 18, 1920, act gave to a large number of young majors and young captains and young first lieutenants a bonus, when, in fact, their rapid promotions to these grades brought to them an increase in pay and allowance which equaled in many cases the amount of the bonus.

Mr. SNELL. Will the gentleman yield?

Mr. OLIVER. I will.

Mr. SNELL. The gentleman made reference to the number of officer personnel in 1916?

Mr. OLIVER. Yes.

Mr. SNELL. As compared with the number authorized under this bill. Does the gentleman——

Mr. OLIVER. Not authorized under this bill, but the number we now have in the service.

Mr. SNELL. I accept the correction. Does the gentleman think that we have enough to maintain to an ample degree preparedness under the 1916 proposition?

Mr. OLIVER. I do not think so.

Mr. SNELL. The gentleman does not object to the number?

Mr. OLIVER. I think we have too large a number now and have called attention to the recent action of the House to reduce the commissioned officers in the Army to 11,000. I do not know whether the gentleman voted for the decrease, but I do not think the gentleman from Illinois did. The House thus is on record as voting for a substantial reduction, and the President himself has indicated he would like to have a coalition of certain services, so as to bring about a further reduction of commissioned officers.

Pending these adjustments and the fixing of the permanent strength of the Army and Navy, I feel that it would be wise to provide for any needed increase in the pay of the officer or enlisted personnel of the services by a temporary rather than by a permanent bill. By referring to page 157 of the joint hearings you will find a strong indorsement by Secretary Denby for temporary legislation; on pages 161 and 162 Admiral Coontz favored temporary legislation; also Admiral Elerbe on page 168. The reason stated by Admiral Coontz certainly applies with the same force that it did in November last, when he made the statement.

Mr. MONDELL. Will the gentleman yield?

Mr. OLIVER. Certainly.

Mr. MONDELL. These suggestions were in regard to the extension of the present temporary law, and, as I understand, a large amount of the total cost under the present law would be considerably more than under the bill now before the House.

Mr. OLIVER. The Congress could by a temporary bill provide a just increase for the officer and enlisted personnel where needed, and certainly no one would favor a continuance of the May 18, 1920, act, with the facts now disclosed. In the preparation of a temporary bill account should be taken of the rapid promotions that occurred in the service shortly after the passage of the May 18, 1920, act.

Mr. MONDELL. What I desire to call attention to is the fact that those gentlemen desired an extension of the present law to new legislation, and the gentleman from Alabama, I think, would be in favor of the extension of the present law.

Mr. OLIVER. No; but a satisfactory temporary bill can be drawn that will adequately provide for needed increase in the enlisted and commissioned personnel, and at the same time show a substantial saving under the May 18, 1920, act than is shown by the proposed bill, and no injustice will be done to the enlisted personnel. [Applause.]

Mr. GREENE of Vermont. Will the gentleman yield?

Mr. OLIVER. Certainly.

Mr. GREENE of Vermont. That statement has been made several times that on account of the increase we gave the commissioned personnel we took from the enlisted men, and there is an impression given some way or other we are robbing Peter to pay Paul. Is it not true the pay of the enlisted man is increased?

Mr. OLIVER. To be accurate—and the gentleman is always so accurate I hesitate to correct him—we now have in the Army a $30 permanent pay for the enlisted private.

Mr. GREENE of Vermont. Yes.

Mr. OLIVER. In the Navy we have a $33 pay for the apprentice seamen. We have likewise in the Army a certain special rating for the sixth-grade private. Under this bill you make a reduction of the special rating for the sixth grade and in the pay of the seventh-grade private. The same reduction is proposed for the Navy. They take $12 from the apprentice seamen and $12 from one nonrated class.

Mr. GREENE of Vermont. But the point is that the term "enlisted men"—and I think the House, with all due respect to it, might well be reminded what the term "enlisted men" comprehends—comprehends not only the private but all the grades of the noncommissioned personnel.

Mr. OLIVER. I have not time for the gentleman to make a statement. You will find when we come to discuss it that there is legislation in reference to the enlisted personnel of the Army that does not apply to the enlisted personnel of the Navy. In other words, the gentleman's committee has very wisely fixed a limit on the number in the different grades of the enlisted personnel of the Army, and you have fixed a limit which can not be exceeded in the higher grades; 76 per cent or more of your enlisted men are, by these limitations, placed in the sixth and seventh grades. When you come to examine more critically this matter of what a reduction of $9 in the pay of the enlisted Army private means and $12 on the apprentice seaman, you will find how rapidly it runs into high figures, especially in the Army, because so many of your enlisted men are held in the lowest grade by limitations under existing law. There is also a limitation as to special ratings. The Navy must sooner or later, as the gentleman from Illinois [Mr. MCKENZIE] and the chairman of the committee pointed out, accept like limitations as to their enlisted grades also.

Mr. GREENE of Vermont. The gentleman will not contend that the gross figures are any argument as to what is the proper pay to be given to an individual?

Mr. OLIVER. I would like to have you examine a very interesting statement made by Commander Porterfield, of the Navy. It was a splendid presentation of the enlisted man's case. Also a statement of Chief Yeoman White, now retired. You will find that neither of them favor a cut in the pay of the enlisted personnel. Let me read you what Commander Porterfield says about that.

Mr. GREENE of Vermont. I am not talking about the Navy.

Mr. OLIVER. The same applies to the Army with greater force. Under the bill which was passed fixing the Navy personnel at 86,000 men for 1923 you only gave them 80,000 men and 6,000 apprentice seamen. They now have about 93,000 men, with not exceeding 400 apprentice seamen, so they must discharge 12,000 or 13,000 men in order to comply with the law giving 6,000 apprentice seamen.

Let me call your attention to what Commander Porterfield says. It is an interesting statement. I call it to your attention, because the Navy has given careful thought to this subject and made a most splendid presentment of it, one well to be kept in your library, because it is full of helpful and useful information as to Navy personnel. Commander Porterfield, speaking of the pay of enlisted men and how opportunity to rise was offered them after they had remained four months as apprentice seamen, said:

> That holds good for practically every rating in the Navy to-day, with the exception of radio men and torpedo men, where we have a shortage and can rate them right up. If the number of men in the Navy is made below 100,000, promotion in the Navy would be stopped indefinitely for the enlisted men.

What do you think of that? Indefinitely for the enlisted men. And he was serving notice that until you have adjusted conditions now existing in the enlisted personnel of the Navy, where we are top-heavy with petty officers and other high ratings, there is slight chance for the enlisted man to advance.

Mr. MONDELL. Will the gentleman yield at that point?

Mr. OLIVER. Yes.

Mr. MONDELL. I think that the gentleman unintentionally left an erroneous impression with the House with regard to the pay of the enlisted men. We must take into consideration not only the present pay of the enlisted men but what the pay of the enlisted man would be after the 1st of July unless we legis-

late. Assuming now the condition that would exist after the 1st of July, then the enlisted man in the Navy in his first enlistment would receive $17.60. The enlisted man in the Army would receive $30 on his first enlistment.

Mr. OLIVER. That is permanent.

Mr. MONDELL. What the bill does is to equalize the two and place them both at the rate of $21, raising the enlisted man of the Navy and reducing the enlisted man of the Army.

Mr. OLIVER. Yes. But I do not think the House would for a moment, in the light of the hearings which the gentleman himself so heartily approved in 1919, reduce the pay of enlisted men in the Navy. All of this can be cared for by temporary legislation, as now.

Mr. MONDELL. I was not expressing an opinion of the subject, but simply calling attention to what the bill does. It raises, taking the situation as to the 1st of July, the pay of the enlisted man of the Navy and lowers that of the enlisted man of the Army.

Mr. OLIVER. For instance, you have passed a reclassification bill. That reclassification bill promised advances to a large number of civil employees of the Government. There is strong probability that the bill may not pass the Senate before July. The gentleman from Illinois [Mr. MADDEN], the chairman of the Appropriation Committee, has given assurance that in the event this occurs he will offer a resolution providing a bonus for the year 1923.

Temporary legislation can care for all the needed increases that should be made for those now in the service.

Mr. MADDEN. The decrease in the pay of the enlisted men of the Army and the Navy only applies to apprenticed men when they first go in.

Mr. OLIVER. The gentleman is inaccurate. There is a small decrease.

Mr. MADDEN. I mean decrease.

Mr. OLIVER. There is also a decrease in one of the nonrated grades, and there is a decrease in special ratings for the sixth grade of the Army.

Mr. MONDELL. We have not increased the Navy in its present pay, but as to the pay after the 1st of July, unless we legislate there will be an increase?

Mr. BYRNES of South Carolina. The gentleman from Alabama says that this will not mean an increase at first, but after the first three months does he not get an increase then?

Mr. OLIVER. That may occur, but it is not absolutely sure to occur. I read you what Commander Porterfield said about it.

Mr. BYRNES of South Carolina. And Commander Porterfield is enthusiastically in favor of the bill?

Mr. OLIVER. He was very strongly opposed to reducing the pay of the enlisted men when he was before the committee, and I do not understand that he recommends that now.

The CHAIRMAN. The time of the gentleman from Alabama has expired.

Mr. OLIVER. May I have five minutes more?

The CHAIRMAN. Is there objection to the request of the gentleman from Alabama?

There was no objection.

Mr. BYRNES of South Carolina. He enthusiastically recommended it in the hearings and to members of the committee at all times. He was objecting to any reduction in the higher grades of the enlisted men.

Mr. OLIVER. I will discuss that more at length when reached.

Mr. HOCH. Mr. Chairman, will the gentleman yield?

Mr. OLIVER. Yes.

Mr. HOCH. Does the gentleman have a comparative table showing the pay of enlisted men and each rank of the commissioned personnel under the act of May 18, 1920, and under the proposed bill?

Mr. OLIVER. I will include that in an extension of my remarks for the gentleman.

Mr. HOCH. I think it would be much more illuminating than these tables.

Mr. OLIVER. I shall be glad to do that when I extend my remarks.

Mr. HUDDLESTON. Mr. Chairman, will the gentleman yield?

Mr. OLIVER. Yes.

Mr. HUDDLESTON. The committee heard, in advocacy of the pay scale of the commissioned officers, representatives of the commissioned officers. Did the committee hear anyone to represent the $21-a-month class—the private soldiers? Who spoke for them?

Mr. OLIVER. My recollection is that officers were there speaking for the enlisted personnel. We also had a number of warrant officers and chief petty officers and representatives from other ratings, but their statements were largely devoted to showing how they needed increase in pay.

Mr. HUDDLESTON. Did you hear a single individual of the classes whose pay is to be reduced?

Mr. OLIVER. I do not think any of those were heard. I will ask the gentleman from South Carolina, was an apprentice seaman heard?

Mr. BYRNES of South Carolina. I do not think so.

Mr. HUDDLESTON. Were the private soldiers considered?

Mr. OLIVER. They were not considering that subject at the time. No reductions were proposed for them then.

Mr. KINCHELOE. Mr. Chairman, will the gentleman yield?

Mr. OLIVER. Yes.

Mr. KINCHELOE. I am trying to get information on the cost of this bill if it is enacted. I have tried to get information from some of the gentlemen who ought to know, who claim that if this bill is enacted it will not cost the Government as much as if it is not enacted. I understand the gentleman's argument is that it will increase the pay and increase the amount paid by the Federal Government.

Mr. OLIVER. I put the information in the RECORD which came from the Army and the Navy. My good friend from South Carolina [Mr. BYRNES] is very good in handling figures, and sometimes he finds serious differences with gentlemen on the other side as to what figures mean; so does my other good friend from Tennessee [Mr. BYRNS]. I am going to let them settle any differences that appear in the tables submitted from time to time by the services. I will say that I believe you will find in all of these tables that the substantial reductions come from reductions in enlisted low grades.

Mr. KINCHELOE. I want to ask the gentleman this question: What, in your judgment, will be the total amount of increased pay under this bill, with the present number of enlisted men and the present number of officers, per annum?

Mr. OLIVER. I can only refer the gentleman to the tables numbered 2, 3, and 4. He will get it there.

Mr. MOORE of Virginia. Mr. Chairman, will the gentleman permit a question?

Mr. OLIVER. Yes.

Mr. MOORE of Virginia. Going back to the point that the gentleman made at the outset, suppose that we assume that the Army and Navy appropriation bills as passed by the House will finally be enacted into law, and suppose we assume further that the President may recommend the consolidation of the War Department and the Navy Department, and that that recommendation may be approved by Congress. Do you consider, in view of all that, that the enactment of this bill would be premature and produce complications?

Mr. OLIVER. I think unquestionably so.

Mr. MOORE of Virginia. I would like to ask the gentleman, if he can, to explain a little bit more fully what would be the practical difficulty of applying this legislation, should it be enacted, to the new situation thus created?

Mr. OLIVER. If we should have a temporary bill?

Mr. MOORE of Virginia. Yes.

Mr. OLIVER. If we should have a temporary bill, it could be easily applied, and in view of the fact that we are in a readjustment period you will find that officers, including Admiral Coontz, advocated temporary legislation, and I think the House will see that it is better to provide for the situation by temporary rather than by permanent legislation.

The CHAIRMAN. The time of the gentleman from Alabama has again expired.

Mr. OLIVER. May I have two minutes more?

The CHAIRMAN. Is there objection to the request of the gentleman from Alabama?

There was no objection.

Mr. OLIVER. I have no feeling about this matter. I felt, however, that I owed it as a duty to the House to give some study to this rather technical and involved matter, in order that I might be able to answer questions asked for information. You are the final judges of this matter. You must pass on it. There is the best of feeling between all members of the subcommittee, and while holding different opinions as to the pending bill, we are desirous of giving to the House full information about it, so that you may intelligently pass on the matter. For the reasons appearing in the minority report I feel that it is far better to provide any needed increase in the pay of either the enlisted or the commissioned personnel by temporary rather than by permanent legislation as now proposed. [Applause.]

The CHAIRMAN. The time of the gentleman from Alabama has again expired.

Mr. McKENZIE. Mr. Chairman, I yield one minute to the gentleman from Vermont [Mr. GREENE].

The CHAIRMAN. The gentleman from Vermont is recognized for one minute.

Mr. GREENE of Vermont. Mr. Chairman, in view of the fact that there has been manifest at different times the more or less common idea that in addition to the base pay which is given to the officers of the Regular Army as a compensation they all have various perquisites and emoluments and the means of obtaining increase of compensation "on the side" which are not generally understood by the public, I have asked The Adjutant General's office to prepare for me a concise, accurate, and authoritative statement of all the sources of revenue of any commissioned officer of the Regular Army, which I shall ask to have inserted in the RECORD.

The CHAIRMAN. The gentleman from Vermont asks unanimous consent to extend his remarks in the RECORD in the manner indicated. Is there objection?

There was no objection.

Mr. GREENE of Vermont. The following is a brief statement of the principal items of pay and allowances provided by law for officers of the Army in addition to base pay:

Subject.	Substance of law and comment.	Where found.
Temporary increase	A temporary increase of $420 per annum for a second lieutenant, $600 for a first lieutenant, lieutenant colonel, and colonel; $720 for a captain, and $840 for a major is authorized for the period Jan. 1, 1920, to June 30, 1922.	Act May 18, 1920 (41 Stat. 601).
Additional pay for length of service.	A 10 per cent increase in the pay of officers for each term of five years, not to exceed 40 per cent, and limited to $1,000 in any one case is authorized.	Sections 1262 and 1263, Revised Statutes, and act May 11, 1908 (35 Stat. 108).
	All service in Army, Navy, Marine Corps, Coast Guard, Public Health Service, and Coast and Geodetic Survey is counted in computing this pay.	Act May 18, 1920 (37 Stat. 594).
	Cadets who entered the academy subsequent to Aug. 24, 1912, are not entitled to credit for such service.	Act Aug. 24, 1912 (37 Stat. 594).
Foreign service increase.	The pay of officers is increased by 10 per cent for service beyond the limits of the United States, except for service in the Canal Zone, Panama, Hawaii, or Porto Rico.	Acts June 30, 1902 (34 Stat. 246), and Aug. 24, 1912 (37 Stat. 756).
Additional pay for aids.	Additional pay for aids is authorized at $200 per annum for an aid to a major general and $150 for an aid to a brigadier general.	Section 1261, Revised Statutes.
Increase for exercising higher command.	In time of war an officer serving with troops operating against an enemy who exercises, under assignment in orders issued by competent authority, a command above that pertaining to his grade, receives the pay and allowances of the grade appropriate to the command so exercised, no rate of pay greater than that of a brigadier general to be paid.	Act Apr. 26, 1898 (30 Stat. 365).
Increase for aviation.	An increase of 50 per cent of their pay is authorized to officers and men of the Army while on duty requiring them to make regular and frequent aerial flights. Under decision of the Comptroller of the Treasury this increase is limited to officers of the Air Service.	41 Statutes, 769.
Quarters	An officer is allowed the following number of rooms as quarters: Second lieutenant 2 First lieutenant 3 Captain 4 Major 5 Lieutenant colonel 6 Colonel 7 Brigadier general 8 Major general 9 General 10	Act Mar. 2, 1907 (34 Stat. 1178).
Commutation of quarters.	At places where no public quarters are available, commutation is paid to officers at the rate of $12 per room per month.	Act Mar. 4, 1915 (38 Stat. 1089).
Quarters, or commutation thereof, for dependents.	An officer on duty in the field, or on active duty without the territorial jurisdiction of the United States; is furnished quarters for wife, child, or dependent parents at the place of abode maintained by him for them, or if such quarters are not available he is paid commutation of quarters, heat, and light. This authority ceases on June 30, 1922.	Act Apr. 16, 1918 (40 Stat. 530); act May 18, 1920 (41 Stat. 602).
Heat and light	Heat and light necessary for the authorized allowances of quarters is furnished at the expense of the United States. Pursuant to this law, commutation rates are published in Army Regulations fixing allowances in accordance with zones of equal temperature and seasons of the year.	Act Mar. 2, 1907 (34 Stat. 1167).
Forage	Forage in kind may be furnished officers for the following allowance of horses owned and actually kept by them in the performance of their duties, viz: General 5 Lieutenant general 4 Major general 3 Brigadier general 3 Each other officer 2	Act June 18, 1918 (20 Stat. 150).
Forage	When forage in kind can not be furnished it may be commuted.	Act Feb. 27, 1877 (19 Stat. 243).
Care of mounts	An officer is furnished bedding, shoeing, and shelter for his authorized mounts.	Act Mar. 2, 1907 (34 Stat. 1166).
Transportation of mounts.	An officer is on change of station entitled to transportation of his authorized mounts from his old to his new station, or elsewhere as directed by competent authority, or if ordered overseas or to Alaska, to remount depots or elsewhere in the United States for safe-keeping during his absence.	Act Mar. 2, 1907 (34 Stat. 1166); act July 9, 1918 (40 Stat. 859).
Mounts and horse equipment for officers below grade of major.	An officer below the grade of major required to be mounted may be furnished mounts and horse equipment at the expense of the United States, but he is paid $150 a year if he provides one suitable mount at his own expense and $200 a year if he provides two mounts.	Act May 11, 1908 (35 Stat. 108).
Mileage other than sea travel.	Officers traveling under orders without troops are, for other than sea travel, entitled to 7 cents per mile, the distance to be commuted over the shortest usually traveled route; reduction of 3 cents per mile is made from the officer's accounts for that part of the journey which is over land-grant or bond-aided railroad, or that part over which transportation is furnished by the Government.	Act June 12, 1906 (34 Stat. 246).
Expenses for sea travel.	Actual expenses only paid for sea travel.	Do.
Packing, crating, and transportation of baggage.	Upon change of station an officer is entitled to have a limited amount of baggage, including household goods, packed, crated, and transported, ordinarily by freight, from his old to his new station, or in certain cases, when the cost is not greater, from his old station to other points, or from other points to his new station. Allowances are prescribed in Army Regulations.	Annual appropriation acts.
Transportation of dependents.	An officer ordered to make a permanent change of station is entitled to transportation to his new station for his wife and dependent child or children.	Act May 18, 1920 (41 Stat. 604).
Expenses of burial and shipment of remains.	The remains of a deceased officer are buried, or shipped to the home or a designated national cemetery, at Government expense, provided the cost does not exceed a maximum prescribed in regulations.	
Gratuity upon death.	A payment of six months' pay to the widow, child, or children, or other dependent relative of any officer or enlisted man who dies in active service and whose death is not the result of his own misconduct is authorized.	Act Dec. 17, 1919 (41 Stat. 367).

I want to call attention to the fact, if you will do me the honor to study this when it appears in the RECORD—that it is shown plainly enough in that statement that it is a mistaken and fallacious idea that all officers have something in the way of so-called emolument or perquisites on the side. You will see that the statutes plainly provide when and in what case an officer may get commutation for this, that, and the other thing to which he is put to expense. As a matter of fact, as you will see, he gets no more than his pay and statutory allowances.

No one officer gets all these allowances unless, through some most remarkable combination of circumstances, he is put at one and the same time into all the various situations contemplated by all these statutes hereinafter cited—an impossibility on the face of it. On the other hand many officers do not come in for any commutation at all, except upon rare occasions.

Generally speaking, aside from longevity pay or something of the kind, these allowances are not in the form of net income to the officer, but are commutations designed to cover his own actual expense. The officer clothes and equips himself, and furnishes his own subsistence. The enlisted man, it should be remembered, has these things furnished him by the Government.

Both officers and enlisted men are housed in barracks in the post, of course, because they must live at their duty station as, for instance, firemen do, and be instantly available to call, night or day, unless otherwise relieved. When an officer or enlisted man is sent to duty at a place where there are no Government barracks, however, then he is allowed the commutation for quarters hereinafter shown.

And so on throughout the list. As I have said, it is only when the peculiar situation of the officer brings him within the provisions of any of the statutes that are cited that he is entitled to any of the compensation or commutation therein provided.

MESSAGE FROM THE SENATE.

The committee informally rose; and the Speaker having taken the chair, a message from the Senate, by Mr. Craven, its Chief Clerk, announced that the Senate had agreed to the report of

the committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the joint resolution (S. J. Res. 132) to provide for the continuance of certain Government publications.

The message also announced that the Senate had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 9859) making appropriations for the Post Office Department for the fiscal year ending June 30, 1923, and for other purposes, had further insisted upon its amendments numbered 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 17, 32, 40, 52, 54, 55, 58, 59, 60, and 61, disagreed to by the House of Representatives, had asked a further conference with the House, and had appointed Mr. TOWNSEND, Mr. STERLING, Mr. MOSES, Mr. WALSH of Massachusetts, and Mr. BROUSSARD as the conferees on the part of the Senate.

READJUSTMENT OF PAY OF THE ARMY, NAVY, ETC.

The committee resumed its session.

Mr. McKENZIE. Mr. Chairman, I yield 15 minutes to the gentleman from Wyoming [Mr. MONDELL].

Mr. SNELL. Mr. Chairman, I make the point that there is no quorum present.

The CHAIRMAN. The gentleman from New York makes the point that no quorum is present. The Chair will count. [After counting.] Sixty-five Members present; not a quorum. The Clerk will call the roll.

The Clerk called the roll, when the following Members failed to answer to their names:

Anderson	Dyer	Knight	Sanders, Ind.
Atkeson	Edmonds	Kreider	Sears
Bankhead	Elliott	Kunz	Shreve
Beck	Ellis	Lampert	Siegel
Beedy	Fairchild	Langley	Smith, Mich.
Benham	Fairfield	Linthicum	Smithwick
Bixler	Fenn	Little	Snyder
Black	Fess	Luhring	Sproul
Blakeney	Fields	McArthur	Steagall
Blanton	Focht	McCormick	Stiness
Boies	Foster	McFadden	Strong, Pa.
Brand	Frear	McLaughlin, Pa.	Sullivan
Britten	Free	MacGregor	Sumners, Tex.
Brooks, Pa.	French	Maloney	Sweet
Bulwinkle	Frothingham	Mann	Taylor, Ark.
Burdick	Gilbert	Martin	Taylor, Colo.
Burke	Gorman	Mead	Taylor, Tenn.
Burroughs	Gould	Michaelson	Tilson
Butler	Green, Iowa	Mills	Treadway
Campbell, Pa.	Griest	Montague	Underhill
Clark, Fla.	Hawley	Mott	Upshaw
Clarke, N. Y.	Hicks	Mudd	Vinson
Classon	Hill	Murphy	Voigt
Cockran	Hoch	O'Connor	Volstead
Codd	Hudspeth	Osborne	Walters
Collins	Humphreys	Parker, N. Y.	Ward, N. Y.
Connell	Husted	Patterson, Mo.	Ward, N. C.
Connolly, Pa.	Ireland	Patterson, N. J.	Webster
Copley	Jeffers, Ala.	Porter	Wheeler
Coughlin	Johnson, Wash.	Pou	White, Me.
Crago	Jones, Pa.	Rainey, Ala.	Williams
Dallinger	Jones, Tex.	Raker	Wingo
Darrow	Kahn	Ransley	Winslow
Davis, Minn.	Kearns	Reavis	Wood, Ind.
Davis, Tenn.	Kelley, Mich.	Reber	Woods, Va.
Dempsey	Kelly, Pa.	Reed, W. Va.	Woodyard
Dickinson	Kiess	Rhodes	Wurzbach
Dominick	Kindred	Riddick	Wyant
Drane	Kirkpatrick	Riordan	Yates
Drewry	Kitchin	Rosenbloom	Zihlman
Dunn	Kleczka	Ryan	

The committee rose; and the Speaker having resumed the chair, Mr. TOWNER, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee having under consideration the bill H. R. 10972 had found itself without a quorum, that he had caused the roll to be called, and that 267 Members answered to their names.

The committee resumed its session.

Mr. MONDELL. Mr. Chairman, on several occasions in the recent past some impatience has been voiced on the floor of the House as to the progress that is being made in the Department of Justice in the preparation and prosecution of cases, particularly those growing out of war contracts. This morning the Attorney General addressed a letter to the President referring to these expressions and giving the President a brief statement of the situation with regard to the cases before the department. The President has forwarded the letter of the Attorney General to me with a brief letter of transmittal, and I ask unanimous consent for the reading in my time of the President's letter and the letter of the Attorney General.

The CHAIRMAN. The gentleman from Wyoming asks unanimous consent for the reading of the letters referred to in his time. Is there objection?

There was no objection.

The Clerk read as follows:

THE WHITE HOUSE,
Washington, May 9, 1922.

Hon. FRANK W. MONDELL,
House of Representatives, Washington, D. C.

MY DEAR CONGRESSMAN MONDELL: In view of the fact that the House has under consideration the matter of entering upon an investigation of the handling of war contract adjustments by the War Department and the prosecution of claims by the Department of Justice, I am sending you herewith a recital of the situation which I have just received from the Attorney General in response to an inquiry from me concerning this work. I have thought the information contained in the letter of the Attorney General would be helpful to the House in deciding upon its course in this matter.

Very truly yours,

WARREN G. HARDING.

MAY 9, 1922.

MY DEAR MR. PRESIDENT: In view of the interest manifested in Congress and the press in the matter of the investigation and prosecution of the so-called war contract cases, I feel that I should advise you of the nature and extent of these cases, and of the very substantial progress which has been made by the Department of Justice notwithstanding the lack of adequate facilities in funds and men.

All patriotic citizens are agreed that the persons and corporations who took advantage of the extraordinary opportunities afforded by the war to defraud and despoil the Government should be vigorously prosecuted to the full extent of the law, and should be made to disgorge the unholy profits of their treasonable conduct. These crimes and offenses are all the more reprehensible when committed or connived at by sworn officers and employees of the Government.

The transactions out of which these cases grow in a vast majority of instances took place during the preceding administration. Naturally little or nothing was done during that administration to bring these matters to light. As the country will soon have reason to know, influential personages in the Government who had knowledge of these transactions and were in a position to make disclosure were personally interested in concealing them. It is not to be wondered, therefore, that upon coming into office I found not only that practically nothing had been done in the way of investigating and prosecuting these offenses but that no machinery had been set up for handling the cases in an orderly and systematic way.

The task of creating an organization for this work came coincidently with the well-founded popular demand for retrenchment in governmental expenditures. The Department of Justice, in common with the other Government establishments, has felt the effect of the laudable efforts of Congress to meet this demand. Because of this I have not been able to realize the ideal I have had in mind of an adequately equipped separate division for the handling of all cases of this general class. A number of the more important ones have been centered in the office of the assistant to the Attorney General, but the remainder have of necessity been distributed among the other regularly established divisions.

Before taking up the department's accomplishments in this work I feel that I should state a few of the outstanding facts which emphasize the need of increased appropriations. While the war-time activities of many of the departments and bureaus have been completed or are nearing completion, the work of this department in connection with those activities is at its peak. The department now is handling, in one stage or another, upward of 200 cases coming under the general head of war-contract cases. This includes only investigations and proceedings looking to the punishment of individuals for defrauding the Government and to the recovery of moneys due the Government. It does not take into account the almost equal number of cases brought against the Government on claims growing out of war-time operations and in which the Government's interest must be protected.

Notwithstanding the serious handicap of lack of funds, the Department of Justice has made gratifying progress in these war-contract cases. The work thus far has been largely in the way of organization and investigation. The hearings before the several subcommittees of the select committee on expenditures in the War Department, of which Hon. WILLIAM J. GRAHAM, of Illinois, was chairman, have been examined and the testimony relating to the more important cases digested and analyzed. While these hearings in numerous instances developed some valuable evidence and pointed to irregularities, it has been found necessary to supplement them by audits of accounts and further investigation in the way of interviews with prospective witnesses and other interested persons. The work of auditing these transactions is being carried on by the War Department, and, of course, the Department of Justice can not institute legal proceedings until those audits are completed and furnished. As these audits are received from time to time they are promptly taken up and studied by this department and the work of preparing for appropriate legal proceedings is begun. You, of course, understand that these audits are in form a mere claim, and that the work of collecting the evidence and personally interviewing the witnesses in many parts of the country devolves upon this department.

It is a terrible thing to charge a citizen with robbing his own Government, and I have insisted upon the most painstaking investigation of all cases involving charges of criminality. The investigations in a number of the more important cases have been completed or are rapidly nearing completion. In each instance they disclose a sufficient indication that a crime has been committed to warrant submitting them to a grand jury. It is regrettable that public attention should have been so strongly focused on these cases upon the eve of their prosecution. Those who may be indicted will lustily proclaim that they are the innocent victims of a stimulated activity for political effect. Such, however, will not be the case and the Department of Justice will not be swerved from its carefully laid plans by any such consideration.

The transactions involved in these cases for the most part took place in the District of Columbia, and venue can be more definitely established in this district than in any other. Under existing law there is provision for only one grand jury for both Federal and local cases. During the last several months the time of this grand jury has been entirely taken up with the consideration of the Knickerbocker Theater disaster, the Morse case, and local business of a most pressing nature. There is now pending in Congress a bill which I prepared and recommended, and which it is hoped will become a law within a few days, providing for an additional grand jury in the District of Columbia.

It is planned to convene this second grand jury immediately upon the passage of the bill and to employ it as long as may be necessary for the consideration of war contract cases, the venue of which falls within this District.

Two cases of the first magnitude are ready for prompt submission. One of these is nation-wide in scope and the investigation has covered a wide range. If this case had been presented without such preliminary investigation, the principals might possibly have been indicted, and their liability to the Government in large amounts established. However, this investigation, conducted in the most confidential way, has developed that a great many others who have been lurking in the shadows are also involved in the unlawful transaction. The result is that not only will the principals and several others in all probability be indicted here, but other indictments against the principals and different groups of individuals may be expected to follow in other parts of the country. When these two cases have been fully presented, a third case, which has been under investigation for many months and which has received considerable publicity, will be ready for presentation. Others now in course of preparation will follow, and it is expected that the work of preparing and presenting these cases will continue throughout the entire summer.

To avoid aggravating the already congested condition in the local courts cases will be presented in other districts wherever possible.

Of the 200 and odd cases of this general description which I have mentioned, a great majority represent claims for civil recovery without the element of fraud. In the matter of amounts involved they range all the way from claims for a few hundred dollars to claims reaching into the millions. The aggregate possible recoveries in these cases if the Government should be completely successful in each would probably equal $100,000,000. The War Department, with the assistance of this department, has already recovered millions of dollars from those who were overpaid or who knowingly overcharged their Government. These claims come to this department mainly in the form of statements and audits from other departments. I have reason to believe that as the work of auditing accounts and settlements progresses in the several departments, this department will continue to receive such claims in increasing numbers. Cases of outstanding importance are being studied and prepared for suit in the department, and to the extent that the funds placed at my disposal will permit, will be prosecuted by skilled special counsel.

The remainder have been referred to the United States attorneys in the districts in which the debtors are located for appropriate action. Included among these are many cases involving large sums of money and complicated statements of fact. As is well known, the United States attorneys and the Federal courts are literally swamped with the increased business which has developed in recent years, and notwithstanding their ability and devotion to the Government's interest, they have neither the time nor the facilities adequately to handle these important and difficult cases. It was because of this congestion that I recommended to be introduced in Congress the bill providing for 23 additional Federal judges, and which it is hoped will soon become a law.

In view of the criticism which has been directed at the Department of Justice in connection with its handling of the claim against the Lincoln Motor Co., I deem it my duty to lay the facts before you. This case involves alleged irregularities in connection with the adjustment of a contract with that company for the manufacture of Liberty motors. Before the completion of the War Department's audit, the assets and properties of the company had been sold at receiver's sale, and the proceeds were being held for the benefit of creditors. The audit when completed disclosed a maximum claim against the company of $9,188,561.98, and possible grounds for criminal proceedings. By letter dated February 14, 1922, the War Department advised the Department of Justice of the result of the audit and requested that claim be filed with the receiver, and that the usual priority rights be asserted. On February 15, 1922, this department instructed the United States attorney at Detroit, Mich., to prepare the claim for filing, and at the same time arranged with the War Department that persons familiar with the facts should be sent to Detroit to assist him. The receiver, the Detroit Trust Co.—the officer of the court—requested a hearing by the Department of Justice on the ground that at the time of its appointment it was generally understood that the Government had no claim against the assets in its hands, due to the settlement made by the War Department during the former administration with the Lincoln Motor Co. Under the circumstances the department properly granted the request, and the United States attorney at Detroit, with the consent of the receiver, obtained an extension of the time in which the Government might file and prosecute its claim. After hearing counsel for the receiver and other interested parties, I concluded that the matter should be submitted to judicial determination, and accordingly the Government's claim was filed within the time allowed.

I am in receipt of a letter from Hon. Arthur J. Tuttle, United States district judge for the Eastern District of Michigan, written on April 21, 1922, after the Government's claim against the receiver of the Lincoln Motor Co. had been filed, in which he makes the following reference to handling of this claim:

"While writing you this letter, which is official and yet tinged with a degree of personality, I believe I can with propriety refer to the recent newspaper notoriety relative to the claim of the Government against the Lincoln Motor Co. I, of course, have no reference whatever to the merits of the Government's claim or any other matter which is now and may hereafter be pending before me for my decision or judgment. Congressman WOODRUFF, of Bay City, Mich., is one of my old friends, and good friends; undoubtedly he believes what he stated in regard to the matter; on the other hand I know that he is entirely mistaken in making criticism of you and your department in anything which has happened up to this time or failed to happen up to this time in protecting the Government's interest. Because of the activity of your department through the local United States attorney not one dollar of the fund has ever been paid out to creditors, and it is being held here intact by the court pending a disposition of the Government's claim. The few days' delay during which time the Government investigated the matter and heard what other interested parties had to say has not and could not jeopardize the rights of the Government or anyone else. I had thought of writing my friend WOODRUFF about the matter; but this case is pending before me and a discussion of the matter might later prove embarrassing to me some way. I had also thought of writing you relative to the matter; but I knew you must understand the situation fully and also know that I understood it fully, so I could see no reason for doing that. In writing you about the other matter, however, I could not resist the temptation of visiting with you about this phase of the matter which surely has nothing whatever to do with the merits of the case. I am sure you will understand fully that the feeling on my part and the knowledge on my part that the criticism was unjust prompted this reference."

The record of the Department of Justice in connection with these war contract cases calls for no apology and none is intended. The work has been pressed to the fullest extent that the funds at my disposal would permit. It has been carried on under my direction by a few able and conscientious officers and attorneys who have devoted themselves to the task with untiring energy. Because of the need for the utmost confidence and secrecy information as to the progress in the preparation of the cases and the plans for their prosecution has been restricted to the officers in charge, and, of course, has not been divulged to minor employees. This accounts for much of the misinformation which has been circulated in reference to these cases; but as I have sufficiently indicated, the plans are laid and the work is under way, and all cases will be energetically prosecuted. The work can be greatly accelerated by the granting of the request for a special appropriation for $500,000 which you recently submitted to Congress, and by the prompt passage of the bill for an additional grand jury in the District of Columbia.

Faithfully yours,

H. M. DAUGHERTY, *Attorney General.*

Mr. MONDELL. Mr. Chairman, the letter of the Attorney General certainly evidences diligence in the investigation and preparation of cases before his department and satisfactory assurance of prompt and effective action. We join with the Attorney General in the hope that the additional judges required may be provided at a very early date. The bill providing for an additional grand jury for the District of Columbia now on the calendar we hope may be accorded consideration in a very few days, not later than Monday next. The appropriation to which the Attorney General refers is now under consideration by the Appropriations Committee and will be reported to the House and taken up for consideration in the very near future. With this action on the part of Congress I have no doubt the Attorney General will continue the work of examination and the prosecution of these cases, to the end that all those who have defrauded the Government shall be brought to the bar of justice and punished. [Applause.]

Mr. Chairman, I yield back the balance of my time.

Mr. OLIVER. Mr. Chairman, I yield five minutes to the gentleman from Michigan [Mr. WOODRUFF].

Mr. WOODRUFF. Mr. Chairman, I have been much interested in the contents of the letter of Attorney General Daugherty just read to the House. I am sure that everyone here and everyone in the country will give me credit for having only one thing in mind, and that is the prosecution of these war fraud cases. I am not as optimistic, however, about the way these matters will move as some Members of the House apparently are, judging by the applause given at the conclusion of the reading of the letter.

I want to call the attention of the House to several things in connection with this question. In my speech on the floor of this House on the 11th day of last month I made certain definite charges, and I take it the Attorney General's letter is supposed to answer those charges. The only thing mentioned in my speech on that day referred to specifically in the letter of the Attorney General is the Lincoln Motor Co. case. I would like to touch on that just a bit. The Lincoln Motor Co. case was audited by the proper auditing section of the Government. It was transmitted to the Department of Justice, together with a brief which was very comprehensive, and which I am printing at the conclusion of these remarks. That brief and the audit transmitted to the Department of Justice were deemed sufficient by the Department of Justice upon which to base action. That brief and audit were examined by certain Assistant Attorneys General down in the Department of Justice, and at the insistence of Assistant Attorney General Crim the case was forwarded to the district attorney at Detroit. So far, so good. That case was very promptly filed with the district court in Detroit, but after the case was filed, and at the request of the two United States Senators from Michigan, it was taken out of the hands of the district attorney at Detroit and brought back to Washington for further rehearing, notwithstanding the fact that they had already held a number of hearings on the case here, and the thing that prompted me on the 11th to say what I did say regarding the Lincoln Motor case and to serve notice on the Attorney General that if he did not allow the courts of the United States to decide the merits of this case I should move his impeachment, was the fact that the attorneys who were here in Washington representing the Lincoln Motor Co., or the receivers of that company, had whispered it about that they had the thing "all fixed up." They were very free in their remarks the day following when they stated that "WOODRUFF has spilled the beans." It was not difficult to believe, Mr. Chairman, that this case had been tentatively "fixed up" when one considers what happened in the Wright-Martin case, an almost identical case, and apparently in other cases.

It is true, as stated in the letter of Judge Tuttle to the Attorney General, that the steps taken by the Department of Justice to protect the interests of the Government had been all that they should have been up to the time the case was recalled to Washington for further hearings. It is true in this

case, as it was true in the Wright-Martin case, that had the Attorney General or the Department of Justice decided after these further hearings in Washington to take the case from the hands of the district attorney in Detroit, that case would very promptly have been withdrawn and the suit in the United States circuit court in Detroit dropped. The district attorney at Detroit would hardly dare disobey instructions of the Attorney General and refuse to return this case and drop proceedings. That the Lincoln Motor case had been handled by subordinates of Attorney General Daugherty and that he was satisfied to allow these same subordinates to handle this case is clearly shown by the fact that notwithstanding the hearings were to be held on the day following my speech, the Attorney General was in Ohio. According to newspaper accounts, which have not been contradicted, the Attorney General, immediately upon reading the press reports of my speech, wired his subordinates in Washington to postpone the hearings in the Lincoln Motor case until such time as he could return and give it his personal attention. Whether my threat of impeachment hastened his return to Washington only the Attorney General himself knows.

The case of the Lincoln Motor Co. and that of the Wright-Martin Co. are similar in many respects. The audit of the latter's contracts discloses their indebtedness to the Government in the sum of $5,267,476.75. This case was sent to the Department of Justice more than six months ago. Accompanying the report of the auditors was a brief prepared by the attorneys for the audit section, setting forth the facts upon which to base recovery. This brief was most voluminous, consisting of 100 typewritten pages. After a careful review of the audit and the brief by the Department of Justice this case was very promptly referred to the district attorney at New York for action, clearly setting forth that the audit and brief together supplied sufficient facts upon which the Department of Justice could base action for the recovery of these moneys. Apparently the department was to take necessary action in this case. But at the request of the Secretary of War, who has acknowledged this to me and to other Members of the House, this case was returned to the Department of Justice for further hearings. That the hearings were satisfactory to the Wright-Martin Co. and entirely unsatisfactory to the taxpayers of this country is evidenced by the fact that the Wright-Martin case still reposes in the archives of the Department of Justice and no action has been taken. The Attorney General in his letter to the President very carefully refrains from mentioning the Wright-Martin case.

Months ago the Department of Justice was notified by the contract audit section that the Standard Air Craft Corporation and the Standard Aero Co., two companies financed by the Mitsui Co., Japanese bankers, had been overpaid more than $6,500,000. The Department of Justice was also notified that these two companies were undergoing liquidation and that the assets of the same were being rapidly dissipated. Notwithstanding the fact that it was exceedingly necessary, if the Government's interests were to be protected, that the Department of Justice should take some action looking to this protection, no action has as yet been taken in either of these cases. Unquestionably, as a result of the inactivity of the Department of Justice or the evasion of duty on the part of the Attorney General, the opportunity for recovering these overpayments has been taken from the people of the United States. Mr. Daugherty in his letter to the President very carefully refrains from mentioning either of these two cases.

The Attorney General also carefully refrains from mentioning the American Electro Products Co. This company is a Canadian concern, and its contract provided for the erection of a plant at Shawinigan Falls, Canada, for the production of glacial acetic acid. It also provided for the loan of $1,750,000 from the United States Government, the plant to remain the property of the contractors at all times. On December 22, 1920, the Hon. Newton D. Baker, Secretary of War at that time, requested an opinion of the Attorney General as to the validity of the contract, and stated among other things:

> In the opinion of the Judge Advocate General, the foregoing provisions as to obligations upon the part of the Government were so wasteful and extravagant, and, in view of the location of the plant in a foreign country, so inimical to the interests of the Government, as to be beyond the power of any agent of the Government to incorporate them in a binding contract. Herewith is transmitted a copy of such opinion, together with all pertinent papers.

On April 20, 1921, Hon. J. M. Wainwright, Assistant Secretary of War, communicated with the Attorney General, requesting that such litigation be instituted as deemed necessary to protect the Government's interests. Among other things, the communication stated:

> I consider the terms of the contract as unconscionable, and that suit should be instituted to recover from the company the sum of $1,750,000 loaned by the Government plus unpaid interest from February 28, 1918.

It will be seen that this case has been in the Department of Justice for about a year, but so far no action has been taken looking toward the recovery of this money. It is exceedingly strange, Mr. Chairman, that the Attorney General neglected to mention this specific case in his letter to the President.

In the Sixty-sixth Congress the House, after receiving the Graham report, by a vote of 299 to 4 requested the Attorney General to take necessary action in the cantonment cases. This is one of the cases unheeded by the present incumbent. Notwithstanding that no further serious attempt to secure information relative to these cases was made by the Department of Justice, Mr. Myers some months ago announced to the men working on these cases that they had been closed. It is exceedingly strange that only within the past few days the Attorney General has announced that he has retained a former Member of this body to prosecute these cantonment cases, when to all intents and purposes they had been closed for months. The Attorney General carefully refrains from mentioning the cantonment cases in his letter to the President.

It is also exceedingly strange that no notice has been taken by the Department of Justice of repeated attempts by the contract audit section of the office of Chief of Finance to have the case of Phillips & Stephens prosecuted. In a memorandum dated September 8, 1921, the attention of the Attorney General was called to the conditions existing in this case and prosecution was requested. In a later memorandum dated March 11, 1922, Mr. E. C. Steward, in charge of the contract audit section of the office of the Chief of Finance, submitted another memorandum again calling attention to the conditions, and strongly suggesting both civil and criminal action. In this memorandum he states, although over 15,000 contracts had been investigated and audited by that office, it could be stated beyond argument that the contract in question was one which for criminal ingenuity was surpassed by none. Over 14 months of painstaking and diligent labor were consumed in making this audit and all of the facts contained therein had been explained in detail to representatives of the Department of Justice, and great pains had been taken to follow every development that might show the criminal intent of the contractor, and that it was to be regretted that up to that time there had been no tangible action taken. Mr. Steward stands ready at any and all times to assist in every way the prosecution of this case with a view to recovering the money wrongfully withheld from the Government, and if possible to punish those who are guilty in this connection, and it was respectfully and earnestly urged that such action be taken by the Department of Justice as would attain this end.

Mr. Chairman, the records in this case show that Phillips & Stephens have swindled the Government out of $1,854,076.04. That the Department of Justice has long had information relative to the criminal character of this case I propose to show by inserting an extract from the memorandum submitted to Mr. William J. Burns, Chief of the Bureau of Investigation of the Department of Justice by Maj. W. O. Watts, recently discharged by the Attorney General for giving to the gentleman from South Dakota [Mr. JOHNSON] and myself information relative to the public business, but who was at that time in the Department of Justice and working on this case. The extract is as follows:

> FEBRUARY 18, 1922.
>
> (Memorandum for W. J. Burns, Chief of the Bureau of Investigation, Department of Justice. Subject: Reference to the conduct of war-graft cases.)
>

>
> 6. About the middle of September, 1921, the Secretary of War referred to the Department of Justice the War Department's report on lumber contract with Phillips & Stephens, showing alleged irregularities exceeding $1,800,000. This contract had been under investigation by the department for some time, by Agents Borchardt and Ward, under the jurisdiction of Attorney Ramsay, so Mr. Lenihan informed me. Mr. Lenihan manipulated matters so as to get this case assigned to him, together with Agents Borchardt and Ward. Within a few days after the lumber case had been assigned to Mr. Lenihan, Mr. Phillips, of Phillips & Stephens, the contractors, called on Mr. Lenihan. Mr. Phillips introduced himself to Mr. Lenihan as of Phillips & Stephens, lumber contractors. He then proceeded to state that he had just come from the Attorney General, with whom he said he was arranging appointment of Federal judges in his district. He said he was the leader of the Republican Party in his district, and that the negro attorney (Anderson) claiming local leadership had no status as a political leader. He went on to state that President Harding had sent for him as the accredited party leader and discussed with him the local political situation and patronage.
>
> After an animated discussion of politics and public policies, Mr. Phillips impressed upon Mr. Lenihan his virtues and importance as a party leader. He said to Mr. Lenihan, in effect: "You are in charge of the lumber case concerning Phillips & Stephens. I want to say that there is nothing to this case and to get permission to destroy a lot of old records which are in the way; that Mr. Borchart has been going over these papers for some time, and I want to close up the case." Mr. Lenihan said that he did have charge of the case; that he had not had time to analyze it, but would go into it at once, and would see Mr. Phillips at a later date.

When this case was assigned to Mr. Lenihan I informed him that I could give him some information of value and put him in touch with a certain party (naming the man) who claimed to have extremely important information or access to such, pertaining to the lumber contract. Mr. Lenihan ignored this proffer of assistance and has never indicated to me a desire to obtain this information, although I subsequently repeated my previous offer and called his attention to the fact that the statute of limitation would soon expire, as the contract was dated February 26, 1919. On January 11 a representative of the War Department made inquiry relative to the status of the lumber case and as to when the War Department may expect formal action against the principals involved.

It is suggested that this case be inquired into.

7. At the time of Mr. Phillips's visit Mr. Lenihan expressed his views very freely to me regarding the inadvisability of the administration proceeding against the war contractors generally, as to do so, he contended, would upset business conditions, and was contrary to good policy.

He held the view that these alleged frauds had been committed during the stress of war, and were a matter of past history which should be generally left alone. From my observation of Mr. Lenihan's work this attitude has been found to almost inherently characterize his action on all War Department matters. In my opinion Mr. Lenihan lacks that sympathetic and faithful loyalty to the Government's interests which is always accorded as a fundamental duty by officials of integrity and ability, and is so necessary to the successful prosecution of these fraud cases.

8. He has stated to me that he was not interested in keeping his job in the Department of Justice for any great length of time, but would play the game for all it was worth while here, with Frank Hogan and other men of influence and power, who would be of use to him in the future.

9. Mr. Hogan was and has been unquestionably oversolicitous in cultivating the friendship and association of Mr. Lenihan, almost from the beginning of the latter attorney's association with the Harness case. Mr. Hogan is undoubtedly a very clever and cunning attorney, who is not averse to resorting to unethical and unscrupulous methods to gain the ends sought.

Mr. Hogan arranged an early luncheon at the "Round Table" for Mr. Lenihan, at which the latter attorney informed me some men of prominence were present. Mr. Lenihan stated that drinks were served in Mr. Hogan's office before going to luncheon.

These luncheons subsequently became common affairs. I can conceive of nothing but ulterior motives in Mr. Hogan's design. Certainly it is improbable that a man of Mr. Hogan's accredited standing as a jurist was in the least interested in Mr. Lenihan, a young and comparatively inexperienced attorney, for purely platonic reasons.

Mr. Lenihan is a man of free conversation, little versed in worldly affairs, of mediocre ability, and in no sense equipped to contend with this masterful opponent.

I propose to show further, Mr. Chairman, that long before this audit the Department of Justice was fully conversant with the criminal character of Mr. Phillips and the men associated with him in the sale of surplus lumber by inserting in the RECORD the following affidavit of Mr. B. G. Reamy, given to me on April 19, 1922. The affidavit very clearly sets forth who Mr. Reamy is and indicates that the Department of Justice has not wished to proceed in this case:

APRIL 19, 1922.

DISTRICT OF COLUMBIA,
City of Washington, ss:

Personally appeared before me R. T. Reamy, of Heflin, Va., who, being duly sworn, deposes and says as follows:

"That from March 3, 1920, to October 4, 1920, he was assistant to the commanding officer of the Detroit district ordnance office and vice chairman of the Detroit district ordnance salvage board, and that from October 5, 1920, to March 11, 1921, he was commanding officer of the Detroit district ordnance office and chairman of the Detroit district ordnance salvage board; that in these capacities he had charge of the sale of surplus Government war supplies pertaining to the Ordnance Department, and that among other supplies to be disposed of in the Detroit district was approximately 1,500,000 feet of lumber; that during the month of May, 1920, he was advised by the Ordnance Salvage Board at Washington that this lumber was to be turned over to Phillips & Stephens for sale in accordance with the contract the Government had with that firm for the sale of surplus Government lumber.

"That on receipt of this information, deponent objected to this method of disposing of said lumber on the grounds that the lumber market at that time in Detroit was very good, and the lumber could have been disposed of very readily by the Detroit district salvage board direct, thereby saving the Government any commissions that might accrue to Phillips & Stephens for the sale of it; but particularly for the reason that the Detroit salvage board could obtain a higher price for it than would be obtained by Phillips & Stephens. A reply was received from the Ordnance Salvage Board, Washington, that instructions from the office of the Director of Sales had been received, ordering said lumber to be sold only through Phillips & Stephens in accordance with their contract.

"A short time after this, the exact date in May, 1920, deponent does not remember, he was informed by Victor J. Mollere, whose place of business at that time was Grand Rapids, Mich. that he, Mollere, had just received a telegram from Mr. J. L. Phillips that he, Phillips, had sold to Mollere the lumber above referred to. Deponent asked Mr. Mollere what price he was to pay the Government through Phillips & Stephens for it, and Mollere replied that he did not know, as Mr. Phillips's telegram had simply said that the lumber had been sold to him without mentioning any price. Mollere further stated that he expected Mr. Phillips in Detroit within a few days to inspect the lumber. On Saturday, May 29, 1920, deponent was called at his office by telephone by Mr. Mollere, stating that Mr. Phillips was in town and that it would be impossible for himself and Phillips to inspect the lumber and come to my office before closing time, and asked deponent if he could meet Mollere and Phillips at the Statler Hotel that afternoon. This was agreed to, and on the afternoon of May 29, 1920, deponent went to the room occupied by Victor J. Mollere at the Statler Hotel, at which time Mr. J. L. Phillips was present. During the conversation regarding the lumber J. L. Phillips told deponent he would like to speak to him privately, and therefore deponent and Mr. Phillips went into the bathroom of that room, at which time Mr. Phillips stated that he was making lots of money in the sale of Government-owned lumber; that he had various agents or associates in different districts of the United States to whom he sold the lumber at a low price, and that later this agent or associate would sell the lumber at a good profit, which profits were always split 50–50 between Mr. Phillips and the agent or associate. Phillips further stated that some of the agents seemed to think that he, Phillips, was taking the lion's share of the profits on the 50 per cent basis, but that this was not true, because it was necessary for him out of his 50 per cent of the profits to "look after the boys in Washington." He further stated that he considered deponent, in a way, as one of his "partners," and that after the Government lumber was all disposed of that he, Phillips, expected to give deponent a certain amount of money as a partner; further stating that it might be six months or perhaps a year before this could be done, as he did not intend to do this until after the Government lumber had all been disposed of. Mr. Phillips did not mention the amount that he would pay deponent, but said that the matter would be adjusted to everybody's satisfaction.

Within two or three days after this conversation with Mr. Phillips deponent went to Washington, D. C., and reported this matter in detail to Lieutenant Colonel Buchanan, who at that time was in charge of the fraud section of the Military Intelligence. About three weeks after the date on which the report was made to the Military Intelligence deponent had occasion to visit Washington again on other matters, and while there went in to see Colonel Buchanan to find out whether anything further had developed regarding this case, and Lieutenant Colonel Buchanan stated to deponent that the Military Intelligence section of the Army was about to be abolished because of lack of appropriation by Congress to continue the work, and that all matters pending investigation were to be turned over to the Department of Justice for completion. He further stated that it had come to his knowledge that there was an understanding between Mr. Burke, who was at that time Chief of the Bureau of Investigation of the Department of Justice, and Mr. E. C. Morse, who at that time was director of sales, to the effect that Mr. Burke would not investigate any sales contracts made by the office of the director of sales. Deponent was somewhat disturbed and concerned at this information, and then visited the office of the Attorney General and reported this information to Mr. Fisher, who was at that time one of the assistants to Mr. Stewart. Mr. Fisher informed deponent that this phase of the question would be investigated, and if such an arrangement had been made by Mr. Burke that it would not be countenanced by the Attorney General. Deponent heard nothing further regarding this matter until during the first part of April, 1921. In the meantime, however, about September or October, 1921, deponent reported this whole matter to Mr. John E. Kinnane, who at that time was United States district attorney at Detroit, Mich., Mr. Kinnane stating to deponent that he would take the matter up with the Department of Justice at Washington.

In the early part of April, 1921, deponent, who was at that time temporarily located in Chicago, was called on the telephone by Mr. Borchart, of the Department of Justice, and asked to come to the Federal building at Chicago to see him—Borchart. On arrival at the Federal building Mr. Borchart stated that he was from the Department of Justice at Washington and had been investigating since the previous November the Phillips & Stephens contract with the Government and their manner of complying with that contract and wished a statement from deponent as to his knowledge of Phillips & Stephens' actions at Detroit. Deponent then stated to Mr. Borchart practically the information that has been stated in this affidavit. Deponent has heard nothing more from the Department of Justice or any other Government source regarding this matter since that time.

Further deponent sayeth not.

B. T. REAMY.

Subscribed and sworn to before me this 25th day of April, 1922.

[SEAL.] HOWARD F. BRESEE,
Notary Public.

Perhaps, Mr. Chairman, the fact that Mr. J. L. Phillips is now the Republican State chairman of Georgia has something to do with the reluctance with which the Department of Justice is moving in this case. It is to be noted further that he is the man who has the distribution of patronage in Georgia under this administration. The Attorney General carefully refrains from mentioning the Phillips-Stephens case in his letter to the President.

In my address before this House on April 11 last, I referred at some length to the case of the Chemical Foundation Co. All of the essential facts were there summarized and reference made to the criminal statutes of the United States applicable to those facts. I again refer to this matter because without question and to the knowledge of the Attorney General ever since he took office and to the knowledge of his predecessor a most outrageous fraud, amounting to many millions of dollars, was perpetrated upon the United States Government. The Attorney General would have us suppose that he has not yet had time or opportunity to make a sufficient examination of the important cases, including, no doubt, that of the Chemical Foundation Co., on which to base civil or criminal proceedings. Such a contention, in so far as it relates to this matter, is so unfounded as to be frivolous. Every essential fact is and has been a matter of public record for upward of two years. The names of the various persons concerned in the transactions by which the fraud was consummated have been known to the public since 1919. They were the subject of widespread newspaper discussions in the campaign of 1920; they are contained in the reports of congressional investigations which have been in the hands of or at least available to the Department of Justice prior to the time when the present Attorney General took office. Any man of ordinary intelligence, whether lawyer or layman, could in a very short time extract all of the material facts from official documents. The matter has been repeatedly called to the attention of the Attorney General by Members of Congress. There is not a single phase of this matter that at

this time or at any time since the present incumbent took the office of Attorney General that required any extensive investigation or study.

While the amount involved is large and the fraud is palpable, the facts are very simple. No action has been taken. It has not yet been intimated or stated by the Department of Justice that any action was to be taken looking to the criminal prosecution of those involved or the cancellation of the sale by any civil proceeding. True, powerful interests are involved. True, these interests are represented by persons belonging to both the dominant political parties. It has been suggested to me that this explains why it was possible to perpetrate the fraud under the former administration and possible to secure immunity from prosecution under the present administration. I am not yet ready to accept this explanation. But I warn you now that it will be accepted as the true one by the American people if, through further delay or nonaction, the persons and interests concerned in this prodigious fraud are not brought to justice and the wrong undone.

Notwithstanding that the Attorney General has had before him for many months a great number of cases against these war grafters, which have been all this time as carefully prepared as was the Lincoln Motor case when it was sent to the courts, yet neither he nor any of his subordinates have taken, in any of these cases, the action which is demanded by the American people. But instead, Mr. Chairman, in recounting the accomplishments of his administration of the Department of Justice for the past 14 months, he can point with pride only to the fact that 1 case of this character out of the 200 he has in his department has only just been presented to the courts, and it has not as yet been tried. Truly a staggering accomplishment.

The CHAIRMAN. The time of the gentleman from Michigan has expired.

Mr. OLIVER. Mr. Chairman, I yield the gentleman three minutes more.

Mr. WOODRUFF. Mr. Chairman, I might mention other specific cases, but I shall not do so at this time. However, I ask unanimous consent to extend my remarks in the RECORD.

The CHAIRMAN. The gentleman from Michigan asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

Mr. WOODRUFF. Mr. Chairman, the Attorney General, after 14 months in office, asks the Congress for $500,000 with which to prosecute war frauds. The chairman of the investigating committee [Mr. GRAHAM of Illinois] more than six months ago wrote the Attorney General and urged him to ask of Congress sufficient funds for this purpose. I want now to read something from an afternoon newspaper printed here in the city of Washington to prove to the Members of this House that the Attorney General is to-day doing exactly what many other heads of departments under this Government have done in the past, viz, passing the buck to Congress. In quoting an interview at the Department of Justice the newspaper says:

> Much of the delay in the prosecution of war-graft cases is charged by officials to inadequate appropriations by Congress.

There is not a Member of the House who does not know that no demand was ever made of Congress for funds for this purpose. Nor was any specific request ever made of the House for funds with which to audit these war contracts, and when the appropriation bill for the Army was before the House I was one of two men here who attempted to secure an appropriation for auditing these war contracts.

No point was made by the War Department at that time setting forth the importance of this work, and yet we learn that the Secretary of War now is laying great stress upon the fact that they need in that department $300,000, the exact amount I asked for, with which to audit these contracts. I say to you, Mr. Chairman, that I am satisfied, and every other man who knows the circumstances ought to be satisfied, that there has not been the activity there should have been in either the War Department or the Department of Justice in regard to these war fraud cases. I do not believe the Republican Party can face the people of the country in the coming election if we do not do something to clean up this thing. It smells to high heaven.

The CHAIRMAN. The time of the gentleman from Michigan has again expired.

Mr. OLIVER. Mr. Chairman, I yield three minutes more to the gentleman from Michigan.

Mr. JOHNSON of Mississippi. Mr. Chairman, will the gentleman yield?

Mr. WOODRUFF. Yes.

Mr. JOHNSON of Mississippi. Yesterday evening a newspaper stated that ex-Attorney General Wickersham had caused to be appointed in the Attorney General's office an office boy to handle these matters. Does the gentleman know anything about that?

Mr. WOODRUFF. I am reliably informed that it is true, but I am not stating so of my own knowledge. I understand that Mr. Myers did not begin the study of law until after he was an employee in the Department of Justice, and that his only experience as a lawyer has been acquired at the expense of the Government.

The Attorney General, in his letter to the President, sets forth the fact that the Department of Justice now has before it 200 of these war-fraud cases. He also states he hopes to recover as a result of the prosecution of these cases the sum of $100,000,000. The audit of the aircraft contracts to date has developed the fact that every contract audited shows overpayments or fraud. According to the Secretary of War there are 150,000 war contracts to be audited. If the Attorney General is correct in his statement to the effect that $100,000,000 can be recovered from 200 of these cases, will anyone dare prophesy the staggering sums which can be recovered if all the 150,000 accounts are properly and equitably adjusted?

The Attorney General states in his letter that as the audits proceed he anticipates these cases will come to the Department of Justice in ever-increasing numbers. It has taken him more than one year to present one case to the courts. Just how many centuries, Mr. Chairman, would it take that department to clean up these cases if he were to continue as its administrator?

My only complaint with the Attorney General is that he has been 14 months in office, and he has not brought to the bar of justice one single war grafter in this country, not one. Oh, some one might say he has brought Morse to the bar of justice, but I tell you he has not done that. He was very careful to refer that case to the Shipping Board. There has not been a man prosecuted for conspiracy to defraud. The only case before the courts to-day for the recovery of money fraudulently paid under these contracts is that of Lincoln Motor Co., and that is the very last of many cases which have been referred to the Department of Justice by the contract audit sections of this Government.

Mr. Chairman, it is well for every one of us to constantly keep in mind the fact that many hundreds of millions have been wrongfully and fraudulently taken from the Public Treasury. Every cent of that money was raised by taxing the people of the country. The taxpayers, big and little, have each contributed to these millions. The question before the House is: Are these hundreds millions to be returned to the Treasury and the taxpayers of the country to be relieved in the exact amount of these returns? Frankly, I am convinced that, unless the Attorney General displays more enthusiasm for this work than he has shown in the past 14 months no material results will be accomplished notwithstanding his much belated and evidently reluctant request for funds for this purpose put forward at this time.

Mr. JOHNSON of South Dakota. Mr. Chairman, will the gentleman yield?

Mr. WOODRUFF. Yes.

Mr. JOHNSON of South Dakota. The gentleman recalls the fact, does he not, that no request was ever made by the legal department for any appropriation whatever until I offered an amendment to the Department of Justice bill on April 7 last.

Mr. WOODRUFF. Yes; and it is a notable fact that the Attorney General comes along now and asks for an appropriation in the exact amount. [Applause.]

BRIEF FILED WITH THE DEPARTMENT OF JUSTICE BY THE CONTRACT AUDIT SECTION OF THE AIR SERVICE IN THE LINCOLN MOTOR CASE.

THE EXECUTIVE FINANCE SECTION,
LIQUIDATION BRANCH,
March 21, 1922.

Memorandum for War Department.

Subject: Report of special examination of the accounts and contracts with the Lincoln Motor Co., 1647 series.

1. On February 13, 1922, there was a letter forwarded by the Secretary of War to the Attorney General, briefly calling attention to certain conditions that arose under the settlement made of the war contracts with the Lincoln Motor Co., Detroit, Mich. To further explain the situation it may be stated that a certain number of Air Service war contracts and settlements had been selected for reexamination and reaudit on account of the fact that the Air Service was not satisfied with the settlements. The Lincoln Motor Co. was one of these contracts. The occasion for writing the letter to the Department of Justice was brought about by the failure of the Lincoln Motor Co. in the fall of 1921. It would have been only a short time until a detailed audit would have been commenced on the books and records of the Lincoln Motor Co., and the letter above referred to was written in order to advise the law department of the Government of the imme-

diate necessity of taking some action in order to protect the Government's interests in funds and property of the Lincoln Motor Co. in the hands of the receiver. The two items referred to in the letter, to-wit, $4,794,135.15, paid as special depreciation, and the sum of $1,000,000, paid as anticipated profits under the settlement, were obviously paid contrary to the terms of the original contracts. The War Department did not undertake to set out in this letter any other items, for the reason that at the time no investigation nor audit had been made. A receiver was appointed upon the petition of Jos. N. Smith & Co., a corporation of Detroit, Mich. This petition was filed in the District Court of the United States for the Eastern District of Michigan on the 8th of November, 1921. It is thought well to call attention to the fourth paragraph of this petition, which reads as follows:

"The defendant is indebted to the plaintiff in the sum of upward of $5,000, with interest thereon, for materials and supplies heretofore sold and delivered by the plaintiff to the defendant at its request. Said sum is wholly unpaid, and there are no offsets or counterclaims thereto."

2. The bill is filed on the equity side of the court and sets up in another paragraph the diversity of citizenship of the plaintiff and defendant in order to give the court jurisdiction.

3. Another paragraph in the petition alleges that on information and belief "the defendant is indebted to various persons, firms, and corporations in the sum upward of $2,000,000 for materials and supplies furnished," etc., and further that the "indebtedness to other firms amounts to upward of $4,000,000, making in all, including the commitments in respect of executory contracts, in the sum upward of $6,000,000."

4. In the prayer for relief the plaintiff asks that "a receiver be appointed for the purpose of protecting the rights and interests of the claimant and other creditors, and for the purpose of taking charge of and managing the property and assets of the defendant company, and to collect, receive, and take into possession all the goods, chattels, rights, and property, etc., of the defendant, and asks that at the proper time the property be sold. In other words, the object of the petition was to wind up the affairs, sell the property, and distribute the assets. This petition is signed by Jos. N. Smith & Co., by E. L. Ackerman, president, and Bernard M. Weadock, solicitor for plaintiff, and is filed November 8, 1921. On the same day an answer was filed by the Lincoln Motor Co., signed by W. A. C. Miller and Harold H. Emmons, solicitor for defendant, which reads as follows:

"In answer to bill of complaint in the above-entitled case, the Lincoln Motor Co., a corporation organized and existing under the laws of Detroit, and qualified to do business and actually transact its said business within the State of Michigan, admits the truth of the allegations therein contained and joins in the prayers thereof."

5. On the same day a decree was entered by the court which recites the substance of the allegations of the petition, and appoints the Detroit Trust Co. of Detroit, Mich., receiver, and authorizes said receiver to take possession of all the property, business assets, and effects of the Lincoln Motor Co. The property was taken under control of the receiver without disturbing the operations of the plant, which continued to produce motor cars without interruption, and after proper order of the court a sale was made on February 8, 1922, of the entire physical assets of the property of the Lincoln Motor Co., excluding, as I understand it, cash, bills, and notes receivable, and accounts receivable, etc.

6. The above recitals are made with reference to the failure of the Lincoln Motor Co., so that the Department of Justice may understand to some extent the real situation. It is apparent from the reading of the bill of complaint and the answer, together with the fact that the decree appointing a receiver was all done on the same day simultaneously that the proceeding was, so far as the Lincoln Motor Co. was concerned, a friendly action. Just why the other creditors were not uneasy and did not proceed prior to this time to file proceedings in bankruptcy against the Lincoln Motor Co. is not known.

7. The Lincoln Motor Co., of Michigan, which received the war contracts, was organized on August 29, 1917, with an authorized capital stock of $1,500,000, and there was issued, according to the balance sheet of December 31, 1918, of the Lincoln Motor Co. stock to the value of $850,100. On January 13, 1920, the Lelands organized a new corporation, called the Lincoln Motor Co., and took out a charter under the laws of the State of Delaware. At that time, it appears from the stock ledger that there were 22 stockholders, mostly officers and employees of the corporation and members of the Leland family. The authorized capital stock was 160,000 shares of class A stock, par value $50 per share, and 160,000 shares of class B stock, no value. This company succeeded the Lincoln Motor Co., a Michigan corporation, and acquired all its assets and assumed its liabilities, and paying as consideration therefor 24,200 shares of class A stock and 160,000 shares of class B stock. The financing of the new corporation was carried out by an underwriting arrangement with Kissel, Kinnecut & Co., who were acting in behalf of the Bankers' Trust Co., of New York, Cassatt & Co., of Chicago, and themselves. Twenty-four thousand two hundred shares of class A stock was turned over to the underwriters as a compensation for their services in financing and the balance of the 135,800 shares were sold at $50 per share, realizing $6,970,000, out of which a cash commission of $250,000 was paid to the underwriters. Therefore, the corporation realized a net sum of $6,540,000, or an average of $40.875 a share.

8. On November 6, 1921, the report of the receiver shows the following persons as class B stockholders, no par value, and the number of shares of stock owned:

Name issued:	Number of shares.
Ida Ayers	214
James Boyer (director)	9,099
Mary E. Forrester Brown	854
Emery W. Clark	534
Day	14,399
J. M. Eaton	534
John H. Emmert (director)	1,067
C. W. Gooch	350
William Guy (employee)	2,400
Frank Johnston (employee)	27,652
H. M. Leland	37,652
William C. Leland	40,156
Blanch D. Leland	2,400
Conrad Martin	235
William H. Murphy (director)	12,803
Fred T. Murphy	5,333
William T. Nash, secretary-treasurer	6,400
D. T. Randall (employee)	726
E. E. Sweet (employee)	2,400
Adele P. Shaw	1,067
John Trix (director)	6,934
Leroy J. Williams (counsel for the company)	5,973
L. Gertrude Williams	214
John B. Winfree, jr	150
Gertrude L. Woodbridge (daughter of Henry M. Leland)	8,000

9. On page 10 of the receiver's report of examination as at November 8, 1921, is contained an analysis of the corporation assets:

Value of class "B" stock at Jan. 17, 1920	$4,036,977.14
Reserve for treasury stock	94,228.00
Deficit accumulating from Jan. 17, 1920, to November, 1921	8,647,496.79

The deficit as of that date shows $4,516,291.65.

10. With reference to the transfer of the assets of the old corporation to the new corporation, the minutes of the first board meeting of the directors of the Delaware corporation, dated January 26, 1920, contain the following:

"(1) The Lincoln Motor Co., a Michigan corporation, will sell, transfer, and convey to this company all its property, business, and assets subject to its outstanding indebtedness, all as shown by its balance sheet dated December 31, 1919, and having a net valuation, after deductions for normal depreciation, amortization of war facilities, of $5,237,033.33 as of December 31, 1919, with adjustment to the date of transfer, and will accept as full payment therefor the following shares of capital stock of this company, namely, 160,000 shares of class B and 24,200 shares of class A, full paid and nonassessable, it being understood and agreed that while in the opinion of company's counsel reserves of the Michigan company for Federal income and profits taxes and war tax of 1919 and prior years are ample, this company will assume and pay any levies, assessments, or payments now or hereafter due in respect thereof, as well as all debts and liabilities of the Lincoln Motor Co., of Michigan."

11. An analysis of the balance sheet of the Lincoln Motor Co., dated December 31, 1918, shows a net profit of $3,036,409.28 for a period slightly over one year and on a capital investment of $850,100. This profit, as stated above, is after setting aside reserves amounting to $8,537,624.83, covering Federal taxes and amortization of plant.

12. Attention is invited to the balance sheet of April 30, 1919, prepared by the Lincoln Motor Co. after the settlement was made with the Government. This shows that on a capital investment of $980,000 and setting up reserves for plant facilities, taxes, claims, and inventory shrinkage, totaling $9,186,966.86, a profit of $4,405,461.77.

13. Attention is here called to the fact that on July 11, 1921, the new corporation authorized a bond issue of $2,500,000 at 7 per cent—three-year first-mortgage gold bonds. The Detroit Trust Co. became the registrar of the bonds and trustee under the mortgage. The amount of bonds actually certified and issued to the Detroit Trust Co. is stated in their report to be $1,950,000, there being $1,250,000 sold, $632,000 registered as collateral to bank loans, and $68,000 held in the treasury of the Lincoln Motor Co.

14. The mortgage covered all the land and real property of every description and all interest in real property owned at the time or thereafter acquired by the company, as well as plants, buildings, structures, fixtures, and erections attached thereto, and also all machinery, jigs, fixtures, and apparatus of the company wherever located, or whether owned at the date of the mortgage or thereafter acquired. According to the statement of the receiver in the report on page 6, it appears that the Lincoln Motor Co. borrowed $3,250,000 from banks; $500,000 was secured on the indorsement of William Nash, John Trix, H. M. Leland, W. C. Leland, W. H. Murphy, and Joseph Boyer, all being directors of the company. The balance of the notes of the $3,250,000 are guaranteed by bonds signed by Joseph Boyer, W. H. Murphy, John Trix, H. M. Leland, William Nash, W. C. Leland, and John W. Emmert, with the exception that the signature of John W. Emmert was not affixed to the bond given to the Union Trust Co., of Pittsburgh, Pa.

15. Another item is described as "bank loans" aggregating $632,000, which is in addition to the $3,250,000. The report of the receiver states that this represents a series of notes given to the Union Trust Co., of Cleveland, and to the Cleveland Trust Co., and secured by first mortgage bonds of the company in the amount of $632,000, as stated previously in this note. The notes given to the Union Trust Co., of Cleveland, aggregating $450,000, were indorsed by the Anderson Electric Car Co. Those to the Cleveland Trust Co., aggregating $182,000, are indorsed by the Timken Detroit Axle Co. The assets as shown by the books of the Lincoln Motor Co. on November 8, 1921, amounts to $15,061,391.54. The assets as found by the receivers total $11,968,325.54, and the same assets appraised as a going concern by the receiver, totaling $9,490,811.13, and were afterwards sold under order of the court to Henry Ford, of the Ford Motor Co., for $8,000,000.

16. For further information it may be stated that the list of claims filed is shown on a printed schedule issued by the receiver, approximating the following:

(A) Preferred claims, about	$1,000,000
(B) General claims, about	3,000,000

Schedule (C), being a list of claims approved by the receiver, stated to be $3,878,521.76, and Schedule (D), general claims that are filed that do not agree with the records of the Lincoln Motor Co., which are not totaled, and the amount can not be stated.

Schedule (E) is a list of claims not approved, amount not totaled, and a short list of claims filed after February 1, 1922, have not been passed upon, and the amount is not totaled. This statement of the list of claims printed by the Detroit Trust Co. is dated February 10, 1922.

The notes held by the banks are amply secured, and they can collect their money from the indorsers on the notes. They do not stand to lose any money, and are not dependent on the assets of the Lincoln Co.

SPECIAL INVESTIGATION AND REPORT.

17. On March 1, 1922, I was directed to proceed to Detroit, Mich., and supervise the investigation and checking of the accounts of the Lincoln Motor Co., under the series of contracts No. 1647. On account of the fact that the Lincoln Motor Co. is now in the hands of a receiver we were requested by the War Department to make a test check between the accounts of the Air Service and the Lincoln Motor Co., and report within as limited a time as was possible, in order that the results of this investigation might be made known to the Department of Justice so that it could properly determine what action was necessary for the Government to take in the premises, if any. The report of the Government accountants, Mr. William R.

Reece and Mr. W. J. Barry, is dated March 9, 1922, and a copy of the same is attached. These two gentlemen who signed this report are both senior accountants of many years' standing and have been connected with the work and investigation, and making audits and reports in connection with the liquidation and settlement of war contracts for the past three years.

THE CONTRACTS.

18. The limited time allotted in which to prepare this report made it impossible to analyze in detail and argue all conclusions that can properly be drawn from the various contracts and the settlement attempted to be made thereunder by the Air Service.

19. In order for this report to be as beneficial as it may be to the War Department and the Department of Justice, I have prepared a schedule which will be marked "A" and attached hereto, showing the salient or pertinent paragraphs of the various contracts involved, in parallel columns, with various comments and conclusions as to the effect of the changes made from the text of the original contracts.

20. Attention is also called to the fact that under the system of accounting that was adopted by the War Department with reference to cost-plus contracts, a force of accountants was established at the plant of each contractor. Vouchers were prepared by the contractor and checked and certified to by what was called a "plant accounting officer." The vouchers were then forwarded to Washington and cursorily inspected for apparent mathematical errors and passed for payment.

21. There is a clause in all the contracts that provides that these payments for labor, material, and overhead expenses may be based upon estimated figures, and they so were based most of the time. It was never intended to be a final transaction. There is a clause in the contracts that reads substantially as follows:

"Every determination of actual cost and the other factors under this article 6 necessary to the determination of the amount due or payable under any part thereof shall be subject to correction and adjustment at each successive computation, provided that this shall not be deemed to compel the Government to make such corrections and readjustments before the final adjustment hereunder, and a final adjustment shall be made upon the completion or termination of the contract, and any and all amounts due by either of the parties hereto to the other shall be immediately paid, provided that if an amount shall be found due to the contractor the same shall be paid only upon presentation of a proper voucher as hereinafter provided."

22. The above clause has been interpreted by the War Department from the commencement of the liquidation of war contracts to mean that on the final completion of the contract or upon the cancellation or termination of the contract, that necessarily a final audit must be made and a final determination of the liabilities of the Government must be determined, both from the standpoint of auditing and accounting, as well as a recasting of the entire obligations of the Government with reference to a correct interpretation of the principles of law involved under the contract.

23. The situation in the particular case under consideration with reference to the contracts are extremely complex and highly involved from a technical and legal standpoint, even if we had to consider only the original contract, but the situation is further twisted and involved by the numerous supplemental contracts and their voluminousness and the complex and contradictory language used therein.

24. In connection with the consideration of the nature of the final settlement which was made in this case, attention is called to the statement of the Lincoln Motor Co., which is dated the 24th day of April, 1919, signed and sworn to by Mr. W. C. Leland, vice president and general manager. In this connection, it should be kept in mind that the major portion of the $45,000,000 which was paid to the contractor by the Government had already been received by the contractor previous to the time any negotiation or settlement was entered into. I think I am safe in saying that if an audit and redetermination had been made before the contract of January 6, 1919, was entered into, which provided for the payment to the contractor of 55 per cent of the total cost of its entire plant, machinery, and equipment as special depreciation, and $1,000,000 for anticipated profits, this contract would not have been made nor the money paid out thereunder. Certain features of these vouchers which were presented will be commented upon later. The point I desire to make now is that there was no adjustment or redetermination and no audit made of the money paid, amounting to approximately $40,000,000, prior to January 1, nor no adjustment and no redetermination and no audit made of any moneys paid after January 1, 1919, in accordance with the paragraph of the contract quoted above.

25. If this had been done in January, 1919, at the time they signed the contract of January 6, No. 1647–8, there would have been no necessity to provide for any further payments to the Lincoln Motor Co., as they had already received more money at that time than they were entitled to under the contracts. There is a statement made by Mr. Leland in the claim filed April 24, 1919, that I desire to notice now, which reads as follows:

"When the plans for the organization of the Lincoln Motor Co. were determined upon it was understood that the Government expected it to provide facilities for the production of fourteen 12-cylinder motors per day. A survey of the situation disclosed that operating under a contract providing for liberal payments on the labor, material, and overhead items, promptly on disbursement, a company capitalized on a million and a half dollars, with borrowed credit to the amount of $2,000,000 could finance the undertaking."

26. I take it there can be only one purpose for this voluntary statement of the vice president and general manager of the company; that it is a sort of an excuse or justification for the enormous amount of money that was spent on the plant and equipment.

27. My answer in refutation to his statement is that the first contract, dated August 31, that the Lincoln Motor Co. received from the Government was for 6,000 Liberty motors, and the schedule of deliveries under article 3 of that contract are as follows:

1917.	Engines.
November	5
December	80
1918.	
January	160
February	275
March	700
April	1,400
May	1,900
June	1,480
July	6,000

28. The statement of Mr. Leland, which is quoted above in his claim, was repeated in the presence of the writer two or three times while in Detroit making this investigation. I can not find any authority for any such statements. It is not supported by any file, paper, letter, or statement that can be discovered in Government records, and the same is true, as far as I have been able to discover, from the files and records of the contractor. The above schedule of the deliveries under the first contract received calls for the delivery of 6,000 motors in eight months' time, which would require the contractor to deliver 208 motors per day if he would spread it out equally, counting 30 days to the month.

29. There is another statement contained in final claim of the Lincoln Motor Co. that I desire to notice, which is to my mind a curiosity and reads as follows:

"There were a number of provisions which the Government wished to insert in the contract it made that brought about the necessity of considerable negotiation. This contract for 6,000 engines was finally agreed upon and executed August 31, 1917. Included in it was a stringent provision giving to the Government the right to terminate the contract on 30 days' notice to the Lincoln Motor Co. This provision injected an element of risk of cancellation that put the enterprise on a most precarious footing, and it was only the patriotism of the men who laid their money and their services in the lap of their country that justified the venture."

30. In the opinion of the writer this is the most glaring sort of unjustified self-praise. In the first place, it was a cost-plus contract in which the Government agreed to pay a fixed profit of $913.05 per article, together with a like proportion of profit on whatever number of spare parts was produced, and such profit was outrageous and unconscionable, because if they had manufactured the 6,000 motors according to the schedule they would have made on the motors alone $5,478,300 and probably $3,000,000 on spares, which would have made $8,500,000 profit in eight months on an investment of about $800,000.

31. I want to make another statement in reference to the cancellation of the contract. On July 31, 1918, a new supplemental contract was entered into between the parties, and in its claim of April 24 the Lincoln Co. uses the subtitle in reference to that contract as follows:

"Change to noncancelable fixed-price contract, dated July 31, 1918."

32. The contractor in his final claim in reference to this last-above contract, which is dated July 31, 1918, No. 1647–6, among other things states:

"The erection of a new plant costing upward of $8,500,000, built and equipped under high pressure for the sole purpose of a war contract, with the attendant extra cost and increased prices which the situation demanded, placed the Lincoln Motor Co. in a peculiar position. The adequacy of returns from the venture depended entirely on whether the company was allowed to produce enough motors under its contract to charge off the extraordinary expenses and take care of the awkward position the company would find itself in at the end of the war. The company had had no established business prior to its creation for war purposes, and without the resources of a going concern in an established line of manufacture it would not be able to absorb the facilities provided at even their normal value without a loss attendant to readjustment. It was therefore recognized that if the profits should be reduced a certain production should be guaranteed to the contractor.

"A new noncancelable fixed price contract was therefore made on July 31, 1918, providing for the delivery of 9,000 engines altogether, dating back to the first engine produced, and specifying that an order might be placed for 8,000 additional engines at the same fixed price of $4,000 each. It was provided, however, that if the contractor should not be allowed to produce 17,000 engines there should be an additional depreciation and amortization on its entire plant and equipment after the depreciation and amortization already provided for had been deducted. The prices of spare-parts orders were also adjusted to meet the new price of $4,000 per engine and the initial rate of depreciation on the heat-treating building was fixed at 40 per cent."

33. It is the opinion of the writer that under the law no Government agent can make a noncancelable war contract; for that matter, it is extremely doubtful whether it could make such a contract for ordinary Government supplies in peace times; but certainly it can not be questioned but that the Government would have to consider a cancellation clause in a contract for war supplies. Without regard to ordinary principles of law, public policy and common fairness would make it impossible for a Government agent to bind the Government for an excessive or unnecessary quantity of war supplies. I might just as well, though, take the opportunity now to dispute the fact that contract 1647–6, dated July 31, 1918, is a "noncancelable contract" according to its provisions. This is a mistake made by the contractor. This point is therefore ruled against the contractor both on the question of fact and the law.

34. Contract 1647–6 referred to above, dated July 31, 1918, which is called by the contractor a "noncancelable contract for 17,000 motors," is a contract for 9,000 motors, reserving to the Government the option to order within 60 days 8,000 additional motors. So the contractor has been laboring under a delusion on the proposition that he had a contract for 17,000 motors.

35. Article 8 of this contract reads as follows:

"The contractor agrees that, at the termination or the completion of the contract, it will make an inventory of such stores of materials and supplies as shall be used in connection with this contract, and the accounting officer or his designees may supervise the same and determine the methods and check the correctness thereof."

There are other provisions in article 8, with reference to the procedure, in winding up and terminating the contract between the accounting officer and the contractor. We think the quotation above tends to dissipate the statement of the contractor that there is nothing in the contract which indicated that it might be canceled.

36. Then, again, article 11 provides that in the event of the failure of the contractor to comply substantially with the terms of this contract, this contract may be terminated by 60 days' notice in writing to the contractor, without prejudice to any claim the Government may have against the contractor, provided that after receipt of said notice the contractor shall not order any additional material, except by permission previously obtained from the accounting officer. Sections 2 and 3 of this article provide that upon cancellation notice being served, the Director of Aircraft Production may proceed to complete the making and delivery of the articles or any part thereof, etc.

37. Section 4 of this article provides that in the event of the cancellation of this contract on account of the default of the contractor the Government shall pay to the contractor all sums due at that date, less any damage sustained by the Government.

38. Our comment on this section is that as a matter of fact the contractor was on January 6, the date of this contract, in default under the July 31, 1918, contract, because he was about 2,000 engines behind in his schedule of delivery.

39. Special attention is now directed to section 5 of article 11 of this contract, which reads as follows:

"In the event that the continued performance by the contractor of this contract is finally prevented for any reason other than specified in section 6 hereof, the Government shall pay to the contractor all expenditures incurred in connection with the production of unfinished or undelivered articles and parts thereof, not previously paid to the contractor, and particularly including payment for all materials purchased, all costs of production (including an allowance for overhead, general administrative expenses, etc., properly apportionable thereto), and in addition all expenses incurred by the contractor and approved of by the Government in disposing of said materials.

"In addition thereto the Government shall pay to the contractor for each finished article accepted a sum provided as a fixed price by article 4."

40. Our comment on this section of article 11 of this contract is that it authorizes a cancellation—because a cancellation could effect no other purpose than to prevent the contractor from completing the contract, or, in other words, bring about a termination of the contract—before completion. It provides practically the same rules and methods and principles of payment to the contractor as is contained in article 11 of the original contract dated August 31, 1918. This same article goes on and provides:

(a) That on each finished article accepted shall be paid the sum of $4,000; and

(b) That on unfinished articles and parts thereof a sum to be determined as follows:

"An inventory shall be made of all materials and all unfinished articles or parts thereof on hand at the cost of such materials and at the cost of manufacture of such unfinished articles or parts thereof as hereinbefore defined."

(c) The contractor shall in the event of such cancellation or termination be relieved by the Government of all obligations incurred for the performance of this contract and not theretofore paid by the Government.

41. Our comment on the last above quotation is that it is a self-evident fact that the parties agreed on a method of cancellation, because it shows the intention and provides a method and means of a settlement between the Government and the contractor in the event that the contract is terminated or canceled, and uses the words "cancellation or termination." Then the next paragraph in this article reads as follows:

"It is understood and agreed by the parties hereto that the provisions contained in this article 11 are not intended by the parties to interfere with any payments due or to become due to the contractor under the provisions of article 5."

Section 10 of this article reads:

"In the event of the termination of this contract as aforesaid any and all obligations of the Government to make any payments to the contractor hereunder, other than those specified in this contract, shall at once cease and determine."

Comment.—This is the final proof that cancellation was provided for.

42. Article 12 of this contract is another statement from which no other conclusion can be drawn than it was in contemplation between the parties that the contract might be terminated, which reads as follows, to wit:

"Upon the completion of this contract, or the termination of the contract without further performance thereof, or from time to time during the performance of this contract, the contractor agrees to make such disposition of the unused materials, rejected articles, and any additional property which shall have been paid for by the Government except as herein otherwise provided, as the contracting officer shall in writing direct."

43. This same article goes on and provides other methods of making a settlement between the Government and the contractor with reference to other matters arising under the contract in case the contract is terminated.

44. So that the conclusion is inescapable from the reading of Articles XI and XII that the Government and the contractor both had in mind the fact that this was war equipment, and that if for any reason or especially if the war was concluded, naturally the Government would be compelled, in the interest of the public, to cancel the contract. It should also be noted that the methods of payment set out in the termination clause of Article XI of this contract are very clear and follow closely the same terms as is contained in the original terminating clause of the first contract, with the exception that the Government does not undertake nor promise to pay the contractor 10 per cent on the closing inventory of unfinished and partly completed parts in process; nevertheless, the Government did do that very thing in the settlement made with the contractor.

45. We think that the only tenable position that the Government can take is that this particular contract did provide for a cancellation, in the event the necessities of the Government required it, and that any attempted agreement on the part of the agents of the Government to the contrary was unauthorized and void, especially in view of the fact that such an agreement would be contrary to the terms of the original contract.

46. We think that an examination of the contracts, copies of which will accompany this memorandum, will convince a close student of the situation that there never was in fact any change from the cost-plus system throughout the entire proceedings between the Government and the contractor, and this method only should be considered in arriving at the true obligations of the Government.

47. To divert for the present, from a consideration of the contracts, attention is called to some of the payments made. Voucher No. 68, dated October 3, 1918, presented by the contractor, was for the sum of $740,643.39, being 40 per cent of $1,851,609.48, which was claimed by the contractor as being due under the terms of article 6, section 4, of contract 1647–6 for special depreciation or amortization of the machinery purchased by the contractor. Attention is called now to the fact that the rate of depreciation was changed arbitrarily in the contract dated January 6, 1919, practically at the end of production and long after the armistice, to 55 per cent of the total of the cost, according to the Lincoln books, of the land, plant, buildings, machinery, equipment, and accessories, and the whole account between the Government and the Lincoln Motor Co. as to this investment was recast, and the contractor was paid by virtue of this change in the contract 55 per cent depreciation on the above-enumerated items, which resulted, as a single glance will show, in paying to the Lincoln Motor Co. on this voucher, which had been settled back in October, 1918, the sum of $277,741.42 more than the Government had paid previously. Attention is invited to voucher No. 109, dated December 23, 1918, which is another 40 per cent depreciation voucher on machinery charged up to article 6 of this contract 1647–6 for $106,166.48, being 40 per cent of $265,416.20. At the rate of 55 per cent under the January 6, 1919, contract, the contractor was paid an additional sum of $39,812.53, making the total amount of these two additional payments by reason of the change in the contracts of $317,553.95. As a matter of fact this voucher for $106,166.48 last mentioned, while it is dated December 23, 1918, was not passed for payment until after the January 6 contract was signed, yet the entire account of the contractor was recast, and he received the additional 15 per cent on a settled transaction so far as the voucher was concerned between the Government and the contractor.

48. I have not the time to go through all the vouchers and see how many more payments were made, but this I know to be true, that fixed-profit vouchers under the December 10, 1917, contract were passed, approved, and paid for $625 fixed profit under the December 10 contract after the July 31 so-called fixed-price contract came into existence.

49. Referring for a moment to the provisions of the January 6, 1919, contract which provided for the 55 per cent flat amortization on the entire investment of the contractor, which the books show was in round numbers $8,700,000, attention is called to the fact that that contract calls for an audit, etc., to show the cost, and that no audit was in fact ever made.

50. Attention is called in this connection to a letter dated New York, February 8, 1919, addressed to Col. H. S. Brown, Four-and-a-half Street and Missouri Avenue, Washington, D. C., signed by Leroy J. Williams, who at that time and during production under the contracts was assistant to the vice president and general manager, and also counsel for the Lincoln Motor Co., and also a stockholder in the concern. A copy of the letter is attached which bears out the statement of the Government in this case as to the requirements of the contract for an audit, and that payments could be and were made under the contracts on an estimated basis, and that the contract required a redetermination and adjustment of all previous payments. This letter quotes a certain provision from contract 1647–8, as follows:

"He should be paid a sum equal to 55 per cent of the actual cost of our entire plant as soon as the amount thereof shall be determined by a proper audit."

Mr. Williams then states that the insertion of this provision in the latter contract really means that it is inserted in the contract as a substitution for the previous amortization and special depreciation provisions, and he proceeds to argue that there is nothing on the contract that prevents the application of the doctrine that payments can be made upon an estimated figure. He goes on and states, "Contract 1647–8 recites that the audits thereof made by the Government now disclose that the allowance for special depreciation or amortization will amount to 55 per cent of the aforementioned investment of approximately $8,500,000, i. e., approximately $4,675,000."

51. The situation was, at the time Mr. Williams wrote this letter, that a voucher for a very large sum of money, in my recollection in the neighborhood of $3,000,000, for amortization was pending and unpaid, but which was afterwards paid without any reinvestigation or redetermination or audit. We think that out of their own mouths they are now estopped to say that the Government has no right to reconsider and redetermine the rights of the Government under these contracts. This letter, written after this contract was signed, shows clearly that the counsel of the contractor interprets the "audit and redetermination" clause of the contract in the same way we do.

THE QUESTION OF AMORTIZATION AND PLANT DEPRECIATION.

52. Upon our arrival at Detroit, Mich., we immediately called upon the officers of the Lincoln Motor Co. at its offices at the plant on Warren Avenue. Mr. Neece, Mr. Barry, and I met in conference with Mr. Henry M. Leland and his son, W. C. Leland; Mr. W. T. Nash, secretary and treasurer; and Mr. Jackson, comptroller, the officers of the Lincoln Motor Co., and Mr. Lawrence W. Scudder, public accountant, of New York, representing the Detroit Trust Co., receiver of the Lincoln Motor Co.

53. I briefly informed the gentleman the purpose of the visit to the plant of the Lincoln Motor Co. and outlined what we desired to do. I called attention at the beginning of the conference to the fact that my investigation of the records and files at Washington did not disclose that the Government had been advised in any way as to the extent or cost of the buildings, plant, and equipment to be furnished in order to carry out this contract, and that I would be glad to know whether or not this was correct. Whereupon Mr. Henry M. Leland made the simple statement that they had intended to build the best plant of its kind and character in existence, and that the Government was not concerned in the matter, and he defied anybody to prove to the contrary. This incident, we think, is very enlightening, for the reason that the Government always has questioned the propriety of this huge investment made by the Lincoln Motor Co. Reference to this matter has been very succinctly made in the report of the auditors which accompanies my memorandum, and very little more need be said. I simply desire to confirm the fact that in my opinion the investment made by the Lincoln Motor Co. was not made for the purpose of manufacturing Liberty motors; that the matter of Liberty motors under the war contract, so far as the land, buildings, and general equipment is concerned, was a mere incident; that they had in view ultimately the manufacture of automobiles.

54. First, they bought 24 acres of ground. Then, later on—I don't know exactly the date after the first purchase—they bought another tract adjoining of about 28 acres, for which they paid practically double the price of their first purchase. This brought their holdings up to 52 acres, at a cost of about $660,972.17, which was included in the amortization. This land is now appraised, or held to be worth, by competent real estate men in the city of Detroit, not less than $1,000,000 approximately.

55. It is very pertinent to state at this point that the entire buildings and plant of the Lincoln Motor Co. occupy not exceeding 18 acres of the first purchase. All of the other land remains vacant and unoccupied except for tennis courts.

56. There was also included in the amortization what is known in the records of the Lincoln Motor Co. as the Holden Avenue plant, which was owned by the Lelands long prior to the time that they entered into any Government contract. The real estate is valued on the books at $125,000 and the buildings at $343,000, or a total of $468,000.

57. The buildings of the Warren Avenue plant are carried at $2,515,268.51, or a total for land and buildings of $5,951,935.20.

58. The balance sheet gotten out on November 8 by the receiver shows the land valued at $1,562,743.62; buildings, $4,389,191.58; machinery, $2,361,392.69; plant equipment, $1,227,643; long lived tools,

$494,423.83; diamonds, $9,706; office furniture, $117,929; motor vehicles, $53,778, or a total of a little over $10,000,000, called book assets.

59. It is evident that under any sort of a fair amortization proposition, the War Department would eliminate from consideration the total value of the Holden Avenue plant, would eliminate the total cost of the land of the Holden Avenue plant of $468,000, and would eliminate the cost of the office building of $500,000, and at least $2,000,000 in addition on other items of buildings and equipment, or $3,000,000 in round numbers. The reports of the various appraisers who have passed on the question of value show that there was absolutely no occasion to erect this wonderful 4-story office building, and they show that the plant was too large, and that the power house was entirely too large for any necessity then or in the near future, so that the whole matter can be explained only in the light of the statement made to the writer by Mr. Henry M. Leland, that it was their purpose and desire to build the best automobile plant in existence. The first estimate of the cost made by them to the War Department was $3,000,000. A few weeks later they said it would probably run to $4,000,000. A few weeks after that they said it would probably be $4,500,000, and they kept on making those guesses a few weeks apart until they finally said, along in the late fall or early winter of 1918, that the plant would probably cost around $7,000,000 or $8,000,000. We think, so far as the Government is concerned, that it is inexcusable to ask the Government to amortize a plant that they built according to their notions, and for their own future purposes, and not solely for the purpose of manufacturing Liberty motors.

60. Incidentally I desire to call the attention of the War Department to the fact that the board of directors of the Lincoln Motor Co., on October 10, 1919, fixed the salaries and compensation of four of the officers of the company as follows:

	Annual salary.	Special 1918 compensation.
Henry M. Leland	$50,000	$50,000
Wilford C. Leland	50,000	50,000
Wm. T. Nash	12,000	15,000
Leroy J. Williams	12,000	15,000

which makes a total of $254,000 paid to these four gentlemen annually.

61. At this time we do not know whether all of this was charged into these contracts and paid by the Government, as a detailed audit would be necessary to disclose this fact, but I have no doubt in my own mind that the Government paid the salaries, in view of the situation of their general accounts as we found them. I would be glad if time permitted to file a law brief; but it may be that would be a duplication of work, because the same kind of contracts and the same character of settlements have been fully discussed in two other cases, to wit, the Dayton Wright Co. and the Wright-Martin Co., both of which memoranda and briefs are now in possession of the Department of Justice, and copies can be furnished later on, if desired, by the War Department for the discussion of the contracts contained in these two memoranda.

62. A solution of the difficulties of this case is hard to arrive at, being complicated by the recent failure of the Lincoln Motor Co., which is one of the most disastrous that has ever come under my observation. It seems that they have lost since the 1st of January, 1920, down to November 8, 1921, a period of about 21 months, in the neighborhood of about $20,000,000, which includes $8,000,000, approximately, of capital stock and about $8,000,000 or $9,000,000 in borrowed money and more than $10,000,000 of general claims. The writer has received no explanation from any officer of the Lincoln Motor Co. as to the causes of this failure.

CONCLUSION AND RECOMMENDATION.

63. If the Lincoln Motor Co. was a going concern, we would recommend to the War Department that a detailed audit be made, but under the circumstances we do not believe that would be advisable, because the assets of the Lincoln Motor Co. are limited to the funds in the hands of the receiver, unless the Government should seek to reach the property and set aside the sale made by the receiver. The amounts due the Government that can now be established will absorb all available funds in the hands of the receiver.

64. There is no escape from the conclusion that the contracts, with the exception of the original contract and the contract dated December 10, 1918, reducing the fixed profit from $913 to $625, where they increase the obligations of the Government are void and unenforceable against the Government, and all payments made in excess of the obligations of the Government under those two original contracts are unenforceable and void, and all sums paid by virtue of the January 6, 1919, and April 29, 1919, contracts in excess of their provisions as shown on Schedule "B" can be recovered back.

65. Under the procedure outlined by the General Staff Supply Circular 111, and under the terms of the contracts where termination was made before completion, it is provided that the completed portion of the contract should bear its proper proportion of the cost of all facilities, and that only the remainder which represents the uncompleted portion of the contract should be amortized. On that basis (which is the only one the Government recognized through the War Department or the Treasury Department), taking as a basis of cost of plant and equipment of $8,700,000, which is the book value shown by the contractor, and the contract calling for the delivery of 9,000 motors, of which 6,500 were completed, we have this result:

66. Seventy-two per cent of the contract was completed; 28 per cent of the contract uncompleted. On the above value of the plant, 28 per cent representing the uncompleted portion of the contract, gives a figure of $2,436,000, which according to the rules and practice of the War Department, as well as nearly all contracts, would be the total amount which should be taken into consideration in this case for the purpose of amortization. Fifty-five per cent of this amount, if we accept the flat rate agreed upon in the January 6 contract, which is excessive, in our opinion, would produce $1,339,800, which the contractor would be entitled to receive. After deducting this figure from what was actually paid of $4,565,000, it would leave a balance that ought to be returned to the Government of $3,225,200, to which should be added the $1,000,000 paid without any authority, making a total of $4,225,200 or these two items.

67. Schedule B is a set-up of the payments made by the Government, which shows the profits on motors and spares under the original contract as modified by the contract of December 10, 1917, and overpayments which may be summarized as follows:

Summary from Schedule "B."

Due under contract 1647 and 2.		Amount overpaid 1647.
Profit on motors and spares	$4,491,208.17	$4,963,361.98
Amortization or depreciation	1,339,800.00	3,225,200.00
Anticipated profit		1,000,000.00
Total	5,831,008.17	9,188,561.98

68. In addition to the fixed profit and special depreciation shown above, amounting to $5,831,008.17, we reimbursed the contractor 100 cents on the dollar for so-called "special tools" in the sum of $1,838,868.59, which brings the total amount to $7,669,876.76 received by the contractor, which in fact represents a gross profit received of nearly eight times the total invested capital.

69. The three items shown above, aggregating $9,188,561.98, are payments erroneously made under supplements 1647–6 and 1647–8, which should be returned to the Government.

70. The cost of the motors is shown to be about $2,730, and therefore, when the change from a fixed profit of $625 per motor to a flat price of $4,000 per motor was attempted July 31, 1918, the contractor's profit jumped from $625 to $1,276 per motor, approximately. This is sustained by the records of the Lincoln Motor Co. Certainly it can never be sustained that the agents of the Government were authorized to consent to thus change the contracts and bind the Government to pay double and more in the form of manufacturing profit.

71. The argument applies to the amortization arrangements contained in contract 1647–8, dated January 6, 1919; production was at an end, and the obligations of the Government were fixed by the original contract, and the Secretary of War nor any of his subordinates had the slightest authority to increase the obligations of the Government. The principles of law supporting this position are elementary and can not be disputed.

72. In addition to the items mentioned in the above summary, paid the contractor, the Government paid approximately seven and a half millions additional for commitments and inventory for materials and other items of about $375,000, or a total of cost, profit, amortization shown on Schedule B, of $35,877,131.21, which, under a most liberal interpretation of the contracts, is all the contractor should have been paid. But by manipulations, unauthorized changes in contracts, erroneous construction, and wrongful interpretation of the contracts and the failure and neglect to compel the contractor to comply with the original terms of the contract, as well as a failure to audit the previous payments and make a final adjustment in accordance therewith, resulted in erroneous and unlawful payments in the total amount of $9,188,561.98, which should be recovered from the contractor. The total payments received by the contractor were $45,065,693.19. These figures as to costs, profits, etc., check with the contractor's books and therefore can not be challenged as to correctness.

73. It should be borne in mind that these various items are in agreement with the general books of the corporation, as shown by their balance sheets, which have been checked and substantiated by the Government accountants.

74. In the set-up as shown by Schedule B, showing costs, profits, commitments, charges for cancellation, special tools, etc., we are giving the contractor the benefit of his own figures, which would, according to the experience of the War Department, be reduced 10 or 15 per cent by a detailed audit. It should also be kept in mind that the amortization is figured on excess allowance of at least $3,000,000, which, under the facts in this case, should not be considered by the Government, for the reasons stated heretofore and which are pointed out in the auditor's report.

75. The appraisal report of Smith, Hynchman & Grylls shows excess of labor and material purchased; also that the office building was not necessary, and that the power house cost 14 per cent of total installation, when 6 per cent was all it ought to have cost; approximately $700,000 spent for land, etc. Such a layout was a pure speculative investment incurred for their own future benefit, and can not by any stretch of the imagination be made to apply as a temporary war necessity under the contracts.

76. And, finally, it should be remembered that there is a clause in the original contract that protects the Government against liability for special or increased facilities purchased by the contractor, unless the Government shall by separate agreement undertake to do so, and no such contract was made, and no claim was ever made by the contractor that any such agreement was ever made.

77. The fact should not be overlooked in this case that the Government from the beginning not only reimbursed the contractor dollar for dollar for labor, material, and all overhead expense weekly or every 10 days, and also came to the rescue of the contractor and advanced from time to time a total of $10,800,000. The contractor under these cost-plus contracts assumed no commercial risk whatever and was assured absolutely of a profit, and he was assured of a nonimpairment of his capital investment. Therefore, the profit made under this contract, under any view, still leaves the profit received by the contractor, in my opinion, indefensible and unconscionable.

78. It is recommended that the Government file a claim for the overpayments shown on Schedule B attached hereto, in the sum of $9,188,561.98.

Respectfully,

THOMAS F. LANE,
Legal assistant, Air Service, War Department.

—

DETROIT, MICH., *March 9, 1922.*

WAR DEPARTMENT,
United States Government,
Washington, D. C.:

1. In accordance with instructions there has been made an examination of the books, records, papers, and supporting data in connection with contract No. 1647 and supplements of the Lincoln Motor Co., Detroit, Mich., for the purpose of showing the cost to produce the 6,500 Liberty motors and spares and the profits paid thereon, together with the costs of land, buildings, machinery, and equipment, etc., which were used by the contractor in connection with the production of the foregoing.

2. The time allowed for this investigation being limited, it is, of course, understood that a detail audit was not made of all expenditures in connection with this cost of motors, but an examination was made which is substantially correct to the extent that the total figures of cost and profit agree substantially with the figures admitted by the contractor, and as is shown on their general ledger accounts and their profit and loss statements, which are on file at the main plant in the city of Detroit.

3. Attached hereto will be found Schedules A and B. Schedule A is an analysis made by your department of all payments which the Government made to the contractor on account of the cost to produce 6,500 Liberty motors with profits and the amortization allowed the contractor in connection with the land, buildings, machinery, and equipment. This schedule shows a total payment to the contractor of $45,065,693.19.

4. Schedule B is the result of the investigation which has been made in connection with the total expenditures shown in Schedule A. Schedule B shows a total cost of labor, material, overhead, commitments, and closing inventory of $28,031,193.11, and the cost of liquidated claims at the termination of the contract amounting to $1,079,744.58, and the cost of changes and specifications amounting to $128,445.60; also the cost of all special tools, amounting to $1,838,868.59. Such items as have been enumerated in the foregoing represent a total of $31,078,251.88, and this amount is the total actual cost to the contractor in connection with the production of 6,500 Liberty motors and spare parts, not taking into consideration any salvage value for special tools.

5. The result of our investigation shows that the Government paid the contractor the sum of $13,987,441.31, this amount being the difference between the total cost above referred to and the total amount paid to the contractor of $45,065,693.19. The item of $13,987,441.31 is composed of the following elements of profit to the contractor:

Items.

A—Amount paid contractor as amortization on plant, machinery, equipment, and land	$4,565,000.00
B—Amount paid contractor as unearned profits on uncompleted portion of the contract	1,000,000.00
C—Amount paid contractor as his manufacturing profit on 6,500 Liberty motors and spares	8,422,441.31
Total of Items A, B, and C	13,987,441.31

6. Item A is clearly shown on the records as an amount paid by the Government to the contractor for so-called amortization on the basis of 55 per cent of approximately a total cost to the contractor on the above item of $8,500,000, as provided in the contract of January 6, 1919, which percentage was for the first time agreed upon, and being contrary to the previous contracts, and this item will carry further comments under a report which Mr. Thomas F. Lane will provide.

7. Item B represents a payment of $1,000,000 for so-called profits on the uncompleted portion of the contract. The contractor estimated that his profit per engine aggregated $1,100, and inasmuch as there were 2,500 motors which were never completed, due to cancellation, some arrangement was made whereby a contract was entered into in which this payment was provided for in the January 6, 1919, contract.

8. Item C is the amount of actual profits which the contractor received from the Government for the 6,500 completed motors and spares. Due to the limited time and the confused condition of the contractor's records it was impossible to accurately segregate the profits on the motors from the spares; therefore this figure represents the profits paid on both. Special attention is called to this particular item of profit for the reason that the amount substantially agrees with the profits admitted by the contractor on their profit and loss statements and on their general ledger accounts, and there can be no question as to the accuracy of the same. The profit paid the contractor per motor with spares is $1,295.76, against an estimated profit per motor without spares, which the contractor submitted in reports to the Government of $1,100 per motor. This estimate of profit per motor which the contractor made to the Government is substantiated in a memorandum submitted to the Government by the contractor under date of April 24, 1919, known as "Statement of claim of Lincoln Motor Co. against the War Department, United States Government, in final settlement of contract No. 1647 and amendments thereto, for the manufacture of Liberty engines," under the heading of "Curtailment, supplemental contract," dated January 6, 1919. To be more specific, it is thought best to quote that part of the document above referred to: "Although it was agreed between the Government and the Lincoln Motor Co. that the profits that would have resulted from the completion of the contract for 9,000 motors would have amounted to an additional sum of not less than $2,700,000, it was agreed that the Lincoln Motor Co. should accept $1,000,000 and profits on certain inventory items in consideration of the cancellation of all engines over 6,500 and incorporated in contract No. 1647-8."

GENERAL.

9. In the final analysis of Schedules A and B it is shown that the contractor expended for production only $31,078,251.88, and that he was reimbursed 100 per cent by the Government for this amount, and, furthermore, the contractor received the sum of $13,987,441.31 in the form of profits on account of the above cost. To more clearly illustrate this matter, it is thought best to state that the contractor's entire cost of his building, land, equipment, and machinery was approximately $8,700,000, and the total profits which the Government paid him on account of production was $9,422,441.31, which will show that the contractor received the buildings without one dollar's cost to himself from the Government and in addition thereto the sum of $700,000 on the above calculation. In addition to this the contractor received in the form of amortization $4,565,000, which, when added to the aforementioned $700,000, would give him a net profit over and above a clear title to the plant the sum of $5,265,000, but out of this amount, of course, income and excess-profits taxes were paid.

10. While, of course, we do not understand why a Government agent would permit a contractor to receive such an excessive and fabulous profit per motor for the production of the Liberty motors, we are astounded with the findings in connection with the cost of the land, buildings, machinery, and equipment which was used for the purpose of manufacturing these motors. We have been unable to find among the files and records at this plant that the Government had at any time anything to do with the erection or the cost of this gigantic plant, and it appears that the entire cost was incurred upon the sole judgment of the Messrs. Leland and that the Government appears not to have been consulted nor advised with in any manner as to the character of the buildings and the extent of the cost of the same. Ordinarily for the production of Liberty motors or any other article required for the Air Service a building of temporary or perhaps semitemporary nature would only be required, but in this case it is very clear that the contractors did not have the Government's interest at heart when they erected this building, nor did they have in mind that the building was necessary for the production of Liberty motors. On the other hand, they seemed to have the idea that they wanted the greatest automobile factory in the United States and used the Government contract for the purpose of securing the same. This is substantially the statement made to us by Mr. Henry L. Leland.

11. Further attention should be directed to the apparent disregard for the Government's funds in that the contractor caused the Government to pay amortization at the rate of 55 per cent on approximately 52 acres of land in the city of Detroit. And on the other hand it is shown by appraisal reports dated December 15, 1921, of James S. Holden & Co., real estate dealers, Detroit, Mich., that this land had appreciated to the extent that the appraiser placed the value as of November 8, 1921, at $910,000. The Government paid the Lincoln Motor Co. 55 per cent of the original cost value as amortization, while on the other hand there had been an increase in the actual value of the property according to the aforementioned report. It appears that the original purchase of land was for 24 acres, of which 18 acres were used for the erection of buildings and equipment, 6 acres being of no immediate use, and later on the company purchased an additional adjacent plot, aggregating 28 acres, which has never been utilized for any purpose up to the present time, yet the cost of this last purchase of 28 acres was amortized by the Government on the basis of 55 per cent, when, as aforementioned, it had actually increased in value.

12. In connection with the consideration of the utility of the plant which was amortized by the Government on the basis of 55 per cent of the cost, we have examined an appraisal report made to the Detroit Trust Co., receiver, by Smith, Hinchman & Grylls, and find the report to contain certain comments which tend to show a further lack of disregard for Government funds when this building was being constructed, as well as bad judgment from a commercial and business standpoint.

13. It is found on the second page following item 6 that the appraisal as above referred to calls attention to certain matters which is quoted: "In the allocation of the total expenditure of $4,016,168.05 it was found that there was a surplus of material purchased, which was not apparent in the buildings after they were constructed. An examination of the amount of labor also indicated that a large amount of labor had been lost in the process of building. This statement applies to the work which was done on a cost-plus basis and not to the subcontracts for the trades. In allocating the whole cost to the several buildings the surplus materials and the surplus labor were charged to the several buildings in proportion to the amount of material and labor normally required for them."

14. Quoting further: "The life of 30 years was adopted after considering the character of the plants. With the exception of a very minor part of the work, all of these buildings are of an inflammable character—that is, they have wooden floors and wooden sash in addition to many wood partitions. The supporting structure is of brick with exposed steel columns and beams. This type of construction might have been considered the highest class about 15 years ago, but since that time has been entirely displaced in popular favor by the concrete building. In addition to the fact that this style of construction is well on its way to obsolescence at this time, it is also subject to a greater physical depreciation than a concrete building built at the same time. The exposed steel is subject to rust, the unventilated floor construction is subject to dry rot, and the window frames to shrinking, so that the buildings as units will not last as long as concrete buildings, nor have they as great a value in the eyes of a purchaser as concrete buildings. In the opinion of the writer, this type of building construction will not outlast the present generation and has not a value to-day comparable with the value of equal floor space in concrete construction, even at the same cost. The depreciated reproduction values as of December 31, 1918, are shown in columns "P" and "C," and, together, amount to $3,379,063."

15. Quoting further: "It seems to be beyond argument that a much smaller building would suffice for an office for this plant, and, as a matter of fact, the best policy, as far as the construction of an office was concerned, would be to incorporate the office in one of the factory buildings, as is frequently the case, citing the Hupp Motor Co., the present Cadillac plant, the old Studebaker plant, the present Maxwell plant, and many others. In a few words, an office building is a luxury, and an office building of this character would certainly find few buyers willing to invest a very large sum of money in it. However, as long as the building exists we have included it in the property and deducted the space which it is plainly apparent will not be used for many years for office purposes. Other deductions have been made as shown in the schedule. Many of these have been already discussed and agreed to in principle and some of them in amounts."

16. Quoting further: "One deduction which we feel it necessary to call attention to at this time is the power plant. This power plant, costing nearly 14 per cent of the original installation, is far too large for the development of the manufacturing plant. A comparison of the costs may be made with Dodge Bros.' ordnance plant, where the power plant was installed for only 6 per cent of the total expenditure. The size of the Lincoln power plant is liberal, due to its character. A plant of three-quarters the size would have been sufficient."

17. It is thought best to call special attention to the cost of restaurant building and the equipment, which together amount to a total cost of approximately $107,000. During the period of the war, when thousands of people were employed on Liberty motors, it is possible that a building of the size of the one in use was necessary, but certainly it was not necessary to have built it of such a permanent nature and of such a cost as was incurred. A much cheaper building with far less cost to the Government would certainly have been the proper thing for the contractor to have considered.

18. The above are but a few concrete illustrations, and we feel that a detailed audit would disclose similar conditions in the other units of the plant.

19. Under date of July 31, 1918, a certain contract was entered into—No. 1647-6—apparently for the purpose of changing the entire procedure of manufacturing motors from a cost-plus basis to a fixed price, but the new contract of July 31 carried a provision fixing the maximum cost per motor of $4,000, and a modification that in the event labor or material exceeded certain figures the Government would reimburse them for such excessive increased costs. Therefore it does not appear that the contract was ever changed from a cost-plus to a fixed-price contract, it being our opinion that the contract started on a cost-plus basis and remained so throughout the entire production, in so far as practical results are concerned. Furthermore, under the terms of

the supplemental contract dated December 10, 1917, a bogie price was reduced from $6,087 to $5,000, and the total profit was reduced from $1,013.05 to $625, so that when the contract of July 31 was entered into fixing a price of $4,000 per motor, results now show that this caused the Government to pay to the contractor practically double the amount of profit provided for under the contract of December 10, 1917.

CONCLUSION.

20. It appears from contract dated January 6, 1919, that final payments thereunder for amortization on real estate, plant, equipment, machinery, etc., could not be paid without a complete audit by the Government. It further appears that no audit was made and, therefore, the terms of the contract were not complied with in this respect. We are strongly of the opinion that sums were paid to the contractor under the heading of overhead which were not proper under the existing contracts, but, due to the limited time of this investigation, the overhead accounts, amounting to several million dollars, were not analyzed and it is, therefore, recommended that authority be secured for a complete audit of the overhead accounts as well as a detail audit of the cost of the plant and equipment, to determine the exact overpayment made to the contractor.

Respectfully submitted.

W. R REECE,
Principal Accountant, Air Service, War Department.
W. J. BARRY,
Senior Cost Accountant, Air Service, War Department.

Summary.

Other overhead		$257,379.55
Special depreciation		4,565,000.00
Cost of cancellation		1,000,000.00
Special tools		1,838,868.59
Completed articles delivered, 6,500 engines		26,000,000.00
Completed articles delivered, spare parts		3,737,564.60
Commitment claims		6,458,690.27
Changes in specification		128,445.60
Liquidation of claims		1,079,744.58
Total		45,065,693.19
To balance all payments made to contractor by Government		$45,065,693.19
Less:		
Total cost, labor, material, overhead, commitments, and inventory cost for manufacturing purposes only	$28,031,193.11	
Cost of liquidated claims	1,079,744.58	
Changes for specifications	128,445.60	
Cost of special tools	1,838,868.59	
Total manufacturing cost 6,500 Liberty engines and spares		31,078,251.88
Amount paid Lincoln Motor Co. over and above actual manufacturing cost of 6,500 Liberty engines and spares as per summary		13,987,441.31

SUMMARY AS ABOVE.

Amount paid Lincoln Motor Co. on amortization on plant, equipment, etc	$4,565,000.00
Amount paid Lincoln Motor Co. on unearned profits on uncompleted contract	1,000,000.00
Amount paid Lincoln Motor Co. on manufacturing profit on 6,500 Liberty motors and spares	8,422,441.31
Total profits to Lincoln Motor Co	13,987,441.31

NEW YORK, N. Y., *February 8, 1919.*

Col. H. S. BROWN,
Four-and-a-half Street and Missouri Avenue,
Washington, D. C.

SIR: With your permission there is presented herein some references which may be helpful in determining the propriety of using estimated figures as a basis of payment for special depreciation or amortization under section 23 of Article VI of contract No. 1647-6, and section 1 of Article IV of contract No. 1647-8.

Referring now more particularly to contract 1647-6, which is the main fixed price contract for the production of Liberty motors, it will be found that Articles V and VI relate to the matter of payments. Article V is confined to defining the manner and method of payment by the Government to the contractor for special depreciation and/or amortization.

Section 2 of this article requires the payment to our company of 100 per cent "of the actual cost" of certain testing and inspection facilities.

Section 3 of the same article requires the payment to us of 40 per cent "of the actual cost" of certain heat-treating buildings and equipment.

Section 4 of the same article requires the payment to us of 40 per cent "of the actual cost" of certain machinery, tools, and other equipment.

In the event that our company were not permitted to manufacture 17,000 motors, section 5 of the same article requires the Government to make an additional payment for special depreciation or amortization, based upon 40 per cent of certain "actual cost" of the contractor's plant.

It is to be noted, upon further reference to sections 2, 3, and 4 of this article, that the amounts for special depreciation or amortization "shall be paid by the Government to the contractor as soon as the amounts thereof shall be determined by proper audit."

The first portion of Article VI of the contract under discussion, namely, sections 1, 2, 3, and 4, requires payment by the Government to the contractor on account of motors to be thereafter delivered. It will be noted particularly from section 2 of this article that payments are to be made on direct materials and supplies "definitely ascertainable," as having been used or expended in the production of the articles contracted for. Likewise section 3 of this article provides for payments on account of labor "definitely ascertainable," as used in the production of the articles contracted for.

Section 5 of the same article requires the payment to the contractor of all amounts which "shall be determined" as paid for special tools.

Section 14 of the same article requires the Government to pay to the contractor certain increases in expense which the latter is put to, due to increase in the prices of materials, the Government being required to pay such amounts only "after proper audit."

Attention is called to the fact that the provisions above referred to define when the Government shall be required to make payments. However, recognizing the fact that some of these determinations and audits might involve considerable delay, with the result that the contractor might be embarrassed financially during the interim, it was understood and agreed that the contractor might be paid against these various accounts on an estimate basis. Section 23 of article 6 therefore provides that "in the discretion of the accounting officer estimated figures may be used as the basis for payments made under this contract." This section, it will be seen, permits payments to be made to the contractor in advance of the audits and determinations which are necessary for a final determination.

In other words, estimated figures are to be used only as a basis for preliminary payments. As a matter of fact, the Government has so interpreted this provision and has made payments thereunder.

Section 19 of article 6 of this contract provides that "every determination of the amounts due or payable under any part hereof shall be subject to correction and adjustment at each successive computation, provided that this shall not be deemed to compel the Government to make such corrections and readjustments before the final adjustment hereunder, and a final adjustment shall be made upon the completion or termination of the contract."

I would again here emphasize the fact that one group of provisions previously discussed requires certain payments to be made only after certain audits and determinations have been made, and another section permits payments to be made prior to such determinations and audits.

Now, taking up contract 1647-8, it will be noted that article 4, section 1A, in reality cancels and supersedes article 5 of contract 1647-6 and provides that in lieu of the amortization or special depreciation payments based upon different percentages of cost of different units of our plant, we should be paid "a sum equal to 55 per cent of the actual cost" of our entire plant "as soon as the amount thereof shall be determined by proper audit." The insertion of this provision in the later contract really means that it is inserted in the previous contract as a substitution for the previous amortization and special depreciation provisions. If the later amortization provision had been inserted in the previous contract it would not have been questioned that advance payments could be made to us for amortization on an estimate basis in the same manner as material, labor, and overhead payments have been made to us repeatedly on an estimate basis.

Therefore it is submitted that whether the 55 per cent special depreciation provision is embodied in the previous or in the later contract does not alter or change its purport and legal intent. That is to say, there is nothing in this provision which in any way "contradicts or contravenes" the provisions of section 23 of article 6 of the earlier contract. On the other hand, one provision is a complement of the other.

Section 1A of article 4 of contract 1647-8 requires payment after the amount "shall be determined by proper audit," and section 23 of article 6 of the previous contract permits the accounting officer to use estimated figures as the basis for payments. The accounting officer, in the exercise of the discretion given to him by section 23, just referred to, has approved of the use of estimated figures as a basis for special depreciation or amortization payments, and it is believed that all of the requirements of the contracts have been complied with.

It will be found by reference to the voucher that very liberal deductions have been made to prevent overpayment to the contractor for special depreciation or amortization.

Contract 1647-8 recites that "the audits thereof made by the Government now disclose" that the allowance for special depreciation or amortization "will amount to 55 per cent of the aforementioned investment of approximately $8,500,000, i. e., approximately $4,675,000." A comparison of the voucher with this provision shows that it leaves no question as to the protection which has been afforded the Government.

It is submitted that it will appear from the above that there is no question as to the right of the Bureau of Aircraft Production to make payment in accordance with the voucher which has been presented. However, we would here again emphasize the fact that the estimated figures are being now used as a basis for preliminary payment and not as a basis for final settlement.

If your engagements permit of a consideration and determination of this question next Monday, will you be so kind as to advise us by wire at Detroit of your decision?

Yours very truly,

LE ROI WILLIAMS,
Counsel, Lincoln Motor Co.

Mr. OLIVER. I yield five minutes to the gentleman from Tennessee [Mr. GARRETT].

Mr. GARRETT of Tennessee. Mr. Chairman, I served for eight years in the Congress of the United States under a Democratic administration. That administration served through the most crucial times in the history of the world. On every side it was criticized and complained of, but its head, nor any of the heads of the departments, although first and last criticized from every partisan angle and standpoint, thank God, never, directly or indirectly, requested to be excused from a congressional investigation. [Applause.]

The Woodruff resolution, which was favorably reported from the Committee on Rules, was not of Democratic origin. It came from known, respectable, and responsible Republicans.

In answer to that resolution what does the Attorney General of the United States say?

Please get well in mind that Democrats have not asked for this investigation. Democratic members of the Committee on Rules voted for a favorable report, just as they voted for resolutions placed before them by Republicans throughout the Democratic administration to investigate the activities of that Democratic administration.

In answer to the resolution introduced by the gentleman from Michigan [Mr. WOODRUFF], who has just spoken, and adopted by the Committee on Rules, what does the Attorney General say? "Do not investigate my department; give me $500,000. Do not investigate my department; give me a special grand jury in

the District of Columbia. Do not investigate my department; give me 23 new Federal judges." The gentleman from Wyoming [Mr. MONDELL] says all these will be given him just as quickly as possible.

Mr. WOODRUFF. Will the gentleman yield?

Mr. GARRETT of Tennessee. I will yield.

Mr. WOODRUFF. Will the gentleman point out where the Attorney General has cluttered up the courts to any extent with any of these war-fraud cases which might indicate a need of additional circuit court judges? [Laughter.]

Mr. GARRETT of Tennessee. Well, I will yield to the gentleman from Wyoming to answer that. [Applause.]

Mr. Chairman, I wish to reiterate again that Democrats have not asked for this investigation. They——

The CHAIRMAN. The time of the gentleman has expired.

Mr. GARRETT of Tennessee. Can the gentleman give me additional time?

Mr. OLIVER. How much time does the gentleman want?

Mr. GARRETT of Tennessee. Three minutes.

Mr. OLIVER. I will yield the gentleman three additional minutes.

Mr. GARRETT of Tennessee. But Democrats are willing to stand now as they did throughout the Democratic administration and support a resolution for investigation. [Applause.] The Democratic administration never did anything they objected to having investigated.

If there is objection upon the Republican side to an investigation, well and good; but I should like for the gentleman from Wyoming [Mr. MONDELL] to tell us—and he can confer with the gentleman from Kansas concerning it—whether or not the reading of that letter of the Attorney General means that the Woodruff resolution adopted by the Committee on Rules is now dead and will not be further considered? Is it the intention by having that letter of the Attorney General read in the House to indicate to the House that this is the end of the chapter? If so, we would appreciate the information. We Democrats did not initiate the resolution. [Laughter.] But we are ready to support it. No Democratic administration ever backed away from an investigation or attempted to avoid it. Will yours? [Applause.]

Mr. Chairman, I yield back my time which may remain.

The CHAIRMAN. The gentleman from Tennessee yields back one minute.

Mr. McKENZIE. I yield five minutes to the gentleman from Wyoming [Mr. MONDELL].

Mr. MONDELL. Mr. Chairman, we thought we had realized—the country long since believed it had fully realized—the magnitude of the ills that grew out of the Democratic administration and the Democratic conduct of the war. But as time passes our realization of the breadth and depth, the wider variety and the harmful character of those ills grows and increases. What is the question at issue? Just how much thievery was there under the Democratic administration during the war; just how many malefactors were there in that time; who robbed the Government when it was engaged in war? We have had an idea, so far as one can grasp it, of the unfathomable extravagances of that time, but we have not yet fully developed the extent to which these extravagances were accompanied by criminal negligence in the settlement of claims and in making overpayments. We all of us have heard from time to time complaints of the law's delay. It is no new thing that responsible officials, charged with responsibility of making investigations and, if justfied, of charging men with serious crimes, officials charged with the responsibility of delving into the records to determine to what extent men were overpaid, to what extent they had defrauded the Government, should consume considerable time. All this requires time and patience. I am not quarreling with gentlemen who grow impatient because the work is not all done in a day; but I wonder if they realize, if they had their way about it, and the widest publicity was given to all that has been done in the way of investigation, and to all that the department hopes to prove, the effect it will have in putting those charged with crime on guard and in granting them immunity——

Mr. WOODRUFF. Will the gentleman yield?

Mr. MONDELL. Just a moment; my time is very brief. Up to this time——

The CHAIRMAN. The time of the gentleman has expired.

Mr. MONDELL. Can the gentleman yield me five minutes?

Mr. McKENZIE. I have not the time, but I will yield the gentleman three minutes additional.

Mr. GARNER. Will the gentleman yield for a question?

Mr. MONDELL. I only have three minutes.

Mr. GARNER. Just a question.

Mr. MONDELL. I can not answer a question——

Mr. GARNER. I will get the gentleman an additional minute if he will yield.

Mr. MONDELL. I will yield.

Mr. GARNER. Do you intend to pass the Woodruff resolution?

Mr. MONDELL. At the proper time and in the proper way that question will be answered. Mr. Chairman—well there is a good deal of hilarity on the Democratic side; there may not be so much when by reason of the steady grinding of the mills of justice the amount of the extravagance and the fraud under their administration has been more fully developed. Let gentlemen who become impatient restrain themselves. No one believed to be guilty has so far been given immunity. The Government has not lost any cases; it has not allowed any guilty individual to escape. The net is being drawn.

Mr. WOODRUFF. Will the gentleman yield?

Mr. MONDELL. The investigations are proceeding in an orderly way and in due time these cases will be brought to trial. It is true that the Congress has in a way been derelict in its duty in providing additional judges. You gentlemen on that side have done everything you could to prevent the passage of the legislation providing for those judges. [Applause.]

It is true that we have been sparing in our appropriations for different purposes and have scaled them down and it is true that the Attorney General having consideration for our desire to economize has not asked for as much as he has been inclined to do. Of that I have personal knowledge. But, Mr. Chairman, the period of investigation in these cases has largely passed. The necessary and essential details have largely been attended to. The cases are approaching trial, and in due time those who have defrauded the Government under the Democratic administration during the war and those that have been scandalously overpaid by the Democratic administration during the war will in the one case be punished and in the other compelled to disgorge. [Applause.]

Mr. JEFFERIS of Nebraska. Mr. Chairman, I ask unanimous consent to proceed for 15 minutes on this subject.

The CHAIRMAN. The gentleman from Illinois [Mr. McKENZIE] has control of the time.

Mr. McKENZIE. Mr. Chairman, I yield 45 minutes to the gentleman from South Carolina [Mr. BYRNES].

Mr. BYRNES of South Carolina. Mr. Chairman and gentlemen of the committee, I am not going to continue the very interesting discussing that has been proceeding for the last half hour, but I am going to speak of the pending pay bill, which is certainly of great importance, because it affects the morale of the military services of this Government.

No man will accuse me of being a militarist. No man will accuse me, I think, of being extravagant in voting for appropriations in this Congress. But I am for the pending bill because, first, it provides for a decrease in the appropriations for the military services for the next fiscal year of $14,154,359 below the amount estimated for by the Budget and below the amount appropriated this year for those services. Further, because as certain saving clauses provided in this bill, which I will afterwards explain, expire there will be additional savings, until four years from now the saving to taxpayers by reason of this bill, below the appropriations for the current year and below the amount estimated for the next year, will amount to $27,585,862. And, in addition, by the inclusion of a provision fixing a variable element in the pay of officers providing that allowances for subsistence and for quarters shall be reduced as there is a reduction in the cost of living, should there be a reduction of the cost of living to the rate of 1913, the first year for which statistics were prepared by the Department of Labor, there will be an additional saving of $10,000,000. If the cost of living is not reduced to that extent, but is reduced to a lesser extent, there will be a reduction in proportion to whatever reduction there is. Further, I favor it because this bill for the first time in the history of the Government puts the pay of all the military services on an equal parity, so that when you look at the law you can know that the compensation of a man in the Army is the same as the compensation of a man in the Navy and all other services of the same rank. Heretofore it has been almost impossible to secure this parity in the various services, and, as a result, year after year one service or the other has come to Congress seeking an increase, some additional compensation, on the ground that some other service has it.

No longer could that be done. Again, the amount that is appropriated is distributed among the officers and men in the service in such a way as to offer to the young man who is commissioned and to the young man who enters the enlisted personnel the hope of a career in the military service of the Government.

Now, I know that some of you gentlemen who have listened to the speeches opposed to the bill may wonder how that is possible. My good friend from Alabama [Mr. OLIVER], for whom I entertain an affection that I entertain for but few men, disagrees somewhat with the position that I take on this bill. So does my friend from Indiana [Mr. KRAUS].

The Speaker last year, in pursuance with the provisions of the act of 1920, directing the appointment of a joint committee, appointed five Members of the House, the President of the Senate appointing five, to consider this matter of the readjustment of pay. I was one of the five House Members appointed. When he wished that appointment on me, he did me no favor. Last fall when the Congress adjourned I remained here during the recess and for two weeks attended the hearings upon this bill. My two good friends, the gentleman from Indiana [Mr. KRAUS] and the gentleman from Alabama [Mr. OLIVER], were unable to be present, through no fault of theirs, because Congress was not in session, and I thought it an inopportune time to hold the hearings, but the chairman of the joint committee having summoned the committee at that time, I remained. I closely followed the hearings upon this question. I reached the conclusion that you will reach if you attempt to study the question, namely, that in justice to the Government and in justice to the men in the military service, we can not allow the law under which the services are now paid to expire on June 30, enact no legislation, and go back to the law of 1908 without absolutely demoralizing every branch of the military service in this country.

Why, my friends, think of the condition that prevailed in 1908. Who will say that the compensation given to a man in 1908 in these services is sufficient to meet the needs he must confront to-day in order to provide a decent living for himself and family and maintain himself as the American people want the officers and enlisted men to maintain themselves? The gentlemen who came before us represented all branches of the service—the Coast Guard, the Public Health, the Marine Corps, the Navy, and the Army—and presented carefully prepared statements as to the cost of living; presented also a statement from the Secretary of Labor—challenge them, if you will, but certainly they are in accord with my own experience in life—that it will take about $1.70 to-day to buy what you could buy in 1908 for $1. If you say that is not true of food, I wish to say that there are other things entering into the cost of living besides food. It is true, and more than true, of rentals to-day throughout the United States, and certainly here in the city of Washington. It is true as to clothing, as to fuel, and every other thing that the officer or man must buy. Could we consider enacting no legislation and having these representatives of the Government lead a normal life, a married life, with dependents, under the compensation of 1908? In addition to the vastly increased cost of living, since the ending of the war, all officers now have to pay the income tax, an item that did not exist in 1908.

Another thing, my friends: If you enact no legislation, you leave the military services in this fix, where, under the reorganization act, a man entering the Army is paid $30 and a man entering the Navy under the law of 1908 is paid $17.60. Would you leave them with this discrimination against one service and the many other discriminations as between the services? You and I know it should not be done. We know, further, that the situation last hinted at by the gentleman from Alabama is sure to occur. The Army and Navy bills are now held up in the Senate pending the solution of this question. One of two things will happen—either this bill will pass, readjusting the pay, or else in the Senate the amount estimated for by the Budget Bureau for this year, based on the current appropriations for this fiscal year, will be added to those bills.

They will come here to the House, and the House having to choose between that and the demoralization and disorganization certain to result from the law of 1908, with its inadequate pay and with its discriminations, will vote for the present law. Even my friends in the minority on this particular question will continue to vote for that bonus rather than have no legislation, and in doing so we will force upon the taxpayers next year an expenditure of $14,000,000 more than if this bill is enacted into law.

Mr. OLIVER. Will the gentleman yield?

Mr. BYRNES of South Carolina. If the gentleman will allow me to proceed for a few minutes, I will yield to him and to any gentleman in the House. I want to proceed for a few minutes.

If that is done, let us see the situation under the continuance of the bonus. Is that desirable? Suppose you continue this bonus—they call it a bonus—this increase of pay provided for in 1920.

Much complaint has been made about these boy majors who have been promoted after six years of service to majorities.

If you do not enact this legislation and the existing pay scale is enacted into law for another year, it gives them $840 bonus, while your lieutenant colonel and your colonel get only $600, and your first lieutenant gets $600 bonus under the existing law—as much as the bonus paid the colonel, with greater responsibilities and demands. There is no sense of proportion in it. The boy major of six years' service gets $840, the same as the major who has served 30 years and has gone through the fire of military service and is worth infinitely more to the Government. Is that fair? Will we continue it? Under the bonus the enlisted man in the Navy starts in a training school at $33 a month. In the Army he enlists at $30 a month. That is the minimum pay. In the Navy the enlisted man who enters at $33 can go to $157, while in the highest grade in the Army, a comparative service, he can get only $118.40.

Gentlemen can take this pending bill and point out here and there, by reason of some peculiar legislation that has passed in years gone by, some inequity which may result from the application of a general principle, but has there ever been a law regulating the pay of either the civilian or the military services that has not shown some inequities, some provision which appeared to be too liberal to some individual or group by reason of prior legislation?

If we pass this bill my good friend from Alabama fears many terrible things will happen. The truth is, the attitude of the gentleman from Alabama is the product of imaginary fears about this bill which I do not believe are justified by the facts. For instance, as to the table to which he called attention to-day, which appears in the report filed by the minority and which is published in the RECORD this morning, the gentleman from Alabama published it this morning in order to correct the figures, but, as corrected, the table still remains inaccurate. I took the trouble to have the finance officers of the Army and Navy check them up to see if they are correct, and I hold in my hand the corrected statement. Every one under which there is a red figure is, according to the finance officers of the Army and Navy, inaccurate. You see the large number of figures in this table that are still inaccurate, some of the mistakes really against their own position.

Now, even if all these figures were accurate, it all depends, as some gentleman has said, on how you state the figures. For instance, in the table you find second lieutenant, "total compensation, proposed bill, with dependents, $4,158." That is for a second lieutenant; but the table does not state that that would be possible only in case a man remained a second lieutenant for 30 years and received the maximum of all allowances. It is entirely theoretical. There never was and never will be a second lieutenant with 30 years' service, and if there is one to-day in either the Army or the Navy I will pay part of his salary if you point him out. I have inquired, and in the Coast Guard we have a second lieutenant whose service in that grade is 19 years. That is the nearest approach. In the Navy there is an ensign with nine years' service. As to second lieutenants in the Army, the trouble is you have no second lieutenants with any length of service at all. It is absolutely absurd to imagine a second lieutenant in the Army or ensign in the Navy with 30 years' service in that grade. There is none to-day, and will be none.

Mr. NEWTON of Minnesota. Mr. Chairman, will the gentleman yield?

Mr. BYRNES of South Carolina. Yes.

Mr. NEWTON of Minnesota. That may be true as to the second lieutenant, but the statement with reference to captains can be true, and is true, is it not?

Mr. BYRNES of South Carolina. Yes; as to 25 in the Medical Administrative Corps who by law can not be promoted. I will go into that presently. I was calling attention to the tables simply to emphasize the difficulties we can get into if we simply consider these extreme figures as indicative of what may happen instead of considering the average and what actually does occur.

Now, the next thing stressed by the gentleman from Alabama throughout his entire argument is the size of commissioned personnel of the Army and the Navy. He called attention to the fact that we are proposing to reduce the number of officers and should not, therefore, enact pay legislation at this time. I am in favor of reducing them. I voted in favor of the proposition in the House and will vote for any other reasonable proposition to reduce the commissioned personnel of the Army and of the Navy; but it has little relevancy to the question as to what you are going to pay these men who remain. This question is not one of reducing the number of officers or the number

of men, but as to what you are going to pay to those who remain.

I favored the reduction of the Army to 115,000, as you gentlemen know. I did the best I could to support the gentleman from Michigan [Mr. KELLEY] and reduce the personnel of the Navy also. But my position is this, that what Army and Navy we do have I want to be a good Army and Navy. And that you can not have if you fail to enact any legislation and thus return to the pay scale of 1908. The gentleman from Alabama says there are too many men in the higher grades of the enlisted men of the Navy—the chief petty officers. This bill could not affect that. But in the appropriation bill this year there is a provision correcting that, a provision which will solve most of the difficulties the gentleman complains of. He was in favor of it, as I was, and I know he will be glad to learn that the Secretary of the Navy, without awaiting the enactment of the bill, sent broadcast to the fleet the information that there had to be a reduction in this top-heavy grade and that the provision in the bill now pending before the Senate committee and agreed to by that committee should be taken advantage of, and so many men have filed application for transfer to the fleet reserve that by July 1 the condition of which the gentleman complains will be remedied and the number of chief petty officers will be reduced, in accordance with the provisions of the appropriation bill, to the required number for a total personnel of 86,000 men.

Now, another question before us is the disposition as between officers and men of this amount of money in such manner as to secure the greatest efficiency. My good friend says there is a discrimination in this distribution in favor of the commissioned officer and against the enlisted man. I am not sure that that is a good statement to make, because the enlisted man is dear to our hearts. My only regret is that neither one of the good gentlemen ever made that statement in the committee. It is new to me. But I realize that it is fair, because all things are fair in love and war, and if it can get you, and make you shy from this bill, as a mule will shy at the sound of a steam piano, well and good. [Laughter.] But it is not justified, and if I can not prove it I do not want you to vote for it.

Now, here is a chart showing the base pay and allowances of the commissioned personnel under the 1908 law and the increase by percentage in each grade of this bill as compared with the 1908 law without the bonus. The chart shows also the increase of the enlisted men, all grades, over the 1908 law, and you can see how vastly greater is the percentage of increase for enlisted men as compared with officers.

WHAT H. R. 10972 DOES TO THE 1908 PAY SCHEDULE FOR THE OFFICERS AND ENLISTED MEN OF THE ARMY.

Increase in proposed 1922 pay over 1908 pay, by grades.

	Per cent.
Commissioned grades (based on the average annual compensation (including base pay, longevity pay, subsistence and rental allowances, commutation of quarters, heat, and light in 1908 schedule) of the average officer in the several grades):	
Second lieutenant	2
First lieutenant	14
Captain	15
Major	9
Lieutenant colonel	24
Colonel	16
Enlisted grades (based on the base pay only of the various grades, allowances and longevity not included. The allowances under the 1908 schedule and under H. R. 10972 are practically the same. The longevity in H. R. 10972 is practically the same as the reenlistment pay in the 1908 schedule which it replaces):	
Private (seventh grade)	40
Private, first class (sixth grade)	67
Corporal (fifth grade)	100
Sergeant (fourth grade)	80
Staff sergeant (third grade)	80
Technical sergeant, first sergeant (second grade)	87
Master sergeant (first grade)	68

I have had it prepared to show the average of what the officers get in each grade, including base pay, longevity, subsistence, and rental allowance, as compared with 1908. A second lieutenant by this bill gets 2 per cent increase, a first lieutenant 14, captain 15, major 9, lieutenant colonel 24, and colonel 16. Now, how about the enlisted men? The enlisted private in 1908 got $15; by this bill when he enlists he gets $21, an increase of 41 per cent. The next rank, private, first class, gets 67 per cent, increasing from $18 to $30; the corporal, 100 per cent, from $21 to $42; the sergeant, 80 per cent, from $30 to $50; the staff sergeant, 80 per cent, from $40 to $72; technical sergeant, first sergeant, 87 per cent, from $45 to $84; and master sergeant, 68 per cent, from $75 to $126.

Gentlemen say, nevertheless, that is a discrimination against the enlisted man. When was the compensation of the enlisted man increased? As we entered the war, for the duration of the war. How does it work to-day? First, as to the Navy. I asked my good friend a few moments ago, as to the Navy, if it is not a fact that only these boys who are in training for four months as apprentice seamen will receive $21. That is the fact, and in the Navy no apprentice seamen are sent to sea. They spend four months in school and then they are sent to sea, and the day they go to sea they will receive $36. Is that a discrimination against the enlisted man? As a matter of fact it is the enlisted boy, not man.

The boy who goes in at 18 years of age is inspired by the spirit of adventure, not money, ninety-nine times out of every hundred. You and I know and the recruiting officer knows that it is the beautiful pictures—seeing the world, going to sea—which looks attractive, and they are off. The only complaint I have ever heard about it is not that they were not offering sufficient inducement to these young boys to leave the farms to enlist but that they were making it too attractive. If you raise it to $50, you would, of course, get still more boys to go in; but the question is, Can we under the increase of 40 per cent over 1908 get enough recruits? It interested us; we had it investigated, submitted to all the recruiting officers of the country. I know that you have confidence in these men whose business it is to secure these enlisted men. They have no motive to make their work harder, and they say they have not the slightest doubt in the world that they can get them, and especially under this plan, which holds out to them a chance for advancement in the service.

Now, take the Army and what happens there. In the vast majority of cases it is the boy between 18 and 20 who enlists. The Army does not want to keep him down. If he shows any aptitude for the service he quickly gets an increase. If they give him a rating as a specialist he will get an increase.

Commander Porterfield, representing the enlisted men of the Navy, says—and I have his statement here—that these young boys during their training having $21 to spend, have ample for their needs; that giving them more money to spend at that time is not advocated by him or the enlisted men who are in charge of these recruits. The boy of 18 can go in training and he does not have to buy even a toothbrush; he gets everything furnished him and he has $21 to spend. Here is a book of letters from enlisted men in the Coast Guard; here is a batch from men in the Marine Corps, all advocating this plan. The boy who is worth anything says if you are going to apportion the money for the enlisted men apportion it so that it will offer us a career in the future. While we can spend only $21 for the four months give us the knowledge that if we stay in the service and look to the future that there is an inducement for us to stay, that we can make it a career, that if we remain, and when 23 or 24 have advanced, we can marry with some hope of being able to support a family.

Now, gentlemen, think of it fairly. If you had a boy who went into the Navy at 18, would not you rather have him get $21 for four months while he is in the training school and then when he is 18 and 4 months and goes to sea get $36, and if he remains in the service have the knowledge that as the years go by he can work for promotion to these higher grades in the enlisted personnel, where the increase is 100 per cent, 87, or 68 per cent?

That would give him the greatest increase during that period of life when his necessities are the greatest and when he may have dependents. When the boy of 18 enters the Naval Training School he has no dependents, is furnished everything, and under this bill will get $21 spending money.

We have attempted to readjust this pay of enlisted men in a reasonable manner, seventh grade $21, sixth grade $30, fifth grade $42, fourth grade $54, third grade $72, second grade $84, first grade $126. Compare this scale with the law of 1908. The private under the 1908 schedule gets $15. When you get to a private of the first class it is $18. Under this bill it will be $30. To-day the corporal gets $21, and he will get $42 under this bill. Under the ridiculous schedule which now exists, and it evokes no complaint at all from the minority, the man who is a private of the first class gets $18, and if he is promoted and becomes a corporal he gets only $21. If a private of the first class gets a specialist rating, he gets more money than the corporal, who has additional responsibility. When he gets to be a sergeant he gets $30 now, and under this bill he will get $50. When he gets to be a staff sergeant he will get $72, where under existing law he now gets only $40. Then, when he gets to first sergeant where he now gets $45, under this bill he would get $84. Under the 1908 law the master sergeant gets $75, while under this law he will get $126. Is that discrimination against the enlisted man? Rather does it not hold out to him the hope of a career?

Mr. OLIVER. Is the gentleman discussing the enlisted man of the Army?

Mr. BYRNES of South Carolina. Yes.

Mr. OLIVER. Does the gentleman think he has told the whole story to the House in what he has said?

Mr. BYRNES of South Carolina. Oh, not the whole story, because that would take all afternoon. I am telling as much as I can.

Mr. OLIVER. Does the gentleman not think it would be well to tell what percentage of enlisted men, assuming we have an Army of 150,000, will reach the grades he holds out in the different pay periods? In other words, what percentage is in the first two periods and what percentage in the other period, and, likewise, what are the limitations under the law as to the special ratings in the different periods, which can be added to these percentages? I think the gentleman ought to give us that.

Mr. BYRNES of South Carolina. I can not do that, because I have not got them.

Mr. OLIVER. Does the gentleman know them?

Mr. BYRNES of South Carolina. But everybody knows that down here in the enlisted men in the lower grades there is bound to be the largest percentage. You can not have an army of corporals and sergeants and specialists. It is fundamental that the largest percentage must be here in the lower grades. The story is that even in the lowest grade there is an increase of 40 per cent over the 1908 law, and in the higher grade the increase to the enlisted man is greater, and the lowest increase of 40 per cent is almost twice as much as the highest increase given to the officers over the 1908 pay schedule for them.

Mr. MAPES. Mr. Chairman, will the gentleman yield?

Mr. BYRNES of South Carolina. Yes.

Mr. MAPES. Is the gentleman able to tell us how much additional they can get for longevity pay?

Mr. BYRNES of South Carolina. The enlisted man?

Mr. MAPES. Yes.

Mr. BYRNES of South Carolina. I am glad the gentleman asked about that. I ascertained that the longevity allowance under the 1908 law is approximately equal to the longevity pay under the proposed bill, that the one offsets the other, and I did not have it inserted in this chart, because I did not want to confuse anyone. I am glad, however, the gentleman called my attention to it, because I wanted to call that to the attention of the House. That, of course, is only a small element in the pay of the enlisted man.

Mr. OLIVER. Mr. Chairman, will the gentleman yield?

Mr. BYRNES of South Carolina. Yes.

Mr. OLIVER. The percentage in the first grade is six-tenths of 1 per cent, and the percentages in the sixth and seventh grades are over 76 per cent. Does the gentleman recognize the fact that when you reduce the Army you must of necessity, in order to comply with the law, reduce the men now in those low grades, and it is really a demotion? The result of it is that there is no opportunity, so long as you leave the limitations in the law, to rise rapidly to these percentages where you hold out such inducements.

Mr. BYRNES of South Carolina. I can not agree with the gentleman about that. To-day in the Army, as in the Navy, they are top-heavy, but orders have been issued in both services to reduce to normal by July 1, and when normal conditions prevail the chance of promotion will be better than the present. I have no objection to his inserting his percentages, because I accept them without question. My friend talks about saving. I assert this right now: If we want to save some money, you can not save any large amount of money on generals, because we have but one. If there is any way in which this saving can be effected, it has got to be in the lower grades, and with some of the boy major officers and some of the bachelor officers and some of these boys in the enlisted personnel, when they first enter and go to training school, and also in another way.

We furnish one saving here that I know my friend from Indiana [Mr. KRAUS] and my friend from Alabama [Mr. OLIVER] will concur in, because we reduce the enlistment gratuities that have been growing up for years. I have heard every gentleman on the Naval Affairs Committee complain of that. We reduce them and effect a saving of $2,000,000, and yet my friends do not call attention to this.

Mr. CHALMERS. The reenlistment gratuity?

Mr. BYRNES of South Carolina. Yes. We are reducing them, and also repealed some other small allowances. My good friend from Illinois [Mr. MCKENZIE] had a list here yesterday. In order to ascertain what a man's pay was, you would have to look through a list about 2 yards long. Our hope is that we can simplify it by repealing some of these gratuities, and we reduce the enlistment gratuities at a saving of about $2,000,000. These allowances have been added at various times, and have grown and grown until it is very difficult to get rid of them. The enlistment gratuity we allow to remain just about equals the cost of recruiting a new man.

Mr. GRIFFIN. Would the gentleman explain the inequality in percentages of increase which cover this advance of pay? I note from the chart that the inequality is quite apparent among the officers as well as among the enlisted men. For instance, the second lieutenant gets an increase of only 2 per cent, whereas the first lieutenant lets one of 14 per cent. A lieutenant gets an increase of 24 per cent, while the colonel gets an increase of only 16 per cent.

Mr. BYRNES of South Carolina. I shall do that right now. I call attention to this table:

Pay schedules, United States Army.

Schedule.	Second lieutenant at time of appointment.	First lieutenant of 7 years' service.	Captain of 8 years' service.	Major of 14 years' service.	Lieutenant colonel of 24 years' service.	Colonel of 29 years' service.
What the schedule would be in 1922 if the 1908 schedule were changed to accord with the increase in the cost of living since 1908 [1]	$3,521	$4,528	$5,495	$7,659	$8,691	$10,375
Schedule under the act of May 18, 1920 (bonus)	2,340	3,069	3,716	5,016	5,339	6,257
Proposed schedule in the pending bill H. R. 10972	1,959	2,813	3,429	4,555	5,869	6,561
1908 schedule	1,920	2,469	2,996	4,176	4,739	5,657

[1] In 1908, $1 purchased as much as $1.83 purchases now.

These amounts represent the average amount required to pay officers now in the grades indicated. Thus, for the proposed schedule, the amount indicated for majors ($4,555) was obtained by adding the total base pay, longevity pay, allowance for rental, and allowance for subsistence required to pay all the majors now in the Army and dividing this sum by the number of majors now in the Army.

The committee in taking this bill into consideration believed that the correct solution was to take the total appropriation and distribute it in such a way as to provide reasonable promotion and to hold out to the young officer, when he comes into the service in the Army or the Marine Corps as a career, that there he can work; and even though it might look hard to reduce his entrance pay beneath this bonus provision, it is 2 per cent more than the 1908 law, and then the chances are that he has no dependents in 90 per cent of the cases, and on the other hand he knows that as he remains in the service he will have an increased compensation and that increase will come at a period of his life when he will have greater need for it. It is readjusted so as to be more equitable as between the grades and as proposed meets the approval of 90 per cent of the officers as well as the men.

Mr. EVANS. Will the gentleman yield?

Mr. BYRNES of South Carolina. I will.

Mr. EVANS. Under Table No. 2 it shows that there is an excess under your 1922 schedule over your 1920 schedule, and yet if your marks on that chart clearly indicate the condition it would seem that the 1920 schedule ought to be higher in expenditure than what it is for the 1922 schedule for this reason: You have but few officers in the higher grades as compared with those in the lower and you only take it where it crosses the line—about nine years to run.

Mr. BYRNES of South Carolina. I should explain this situation that the gentleman has in mind, or rather which I think he has. In framing this bill the committee had this thought in mind, that we ought to take the position that Congress has always taken in the past. We wanted to protect both the commissioned officer or the enlisted man as to the compensation which the law authorized and which they expected to receive at the time they entered the service.

Congress followed that back in 1912 when they prohibited the counting of constructive service for the time spent at Annapolis and West Point, saying that it should not be counted in the future, but that the new law would not apply to the 1913, 1914, and 1915 classes because they entered Annapolis and West Point with the understanding they would receive that constructive service.

And right here let me say with reference to the enlisted man, that under this law the pay of the enlisted man now in the service is not reduced to $21. What is called the saving clause provides that the men shall during their present term of enlistment receive the pay they now receive.

We are providing for the future. But we thought that in justice, in fair dealing, we could not reduce the amount that a boy expected under the law to receive when he enlisted and break contract with him. Therefore we provide the saving clause, and no boy's compensation will be reduced in this enlisted personnel during his term of enlistment. But a boy goes out, and as he goes out a boy comes in at the new rate of pay. Officers go out, and as they go out those who come in will come at the new rate of pay. Consequently, there is, year by year, a continued decrease in the total appropriation. And that explains this Table No. 2, which was doubtless confusing to my good friend from Nebraska [Mr. EVANS]. But the table is accurate and shows an ultimate saving in four years of $28,000,000.

Mr. WILLIAMSON. Will the gentleman yield for one question?

Mr. BYRNES of South Carolina. I will.

Mr. WILLIAMSON. A moment ago you said you had tried to eliminate all the present gratuities.

Mr. BYRNES of South Carolina. I did not mean all. I mean certain gratuities. They had so many special allowances that my friend would really be surprised to know. I did not know there were so many until I went into it. The fact is, there is an enlistment gratuity under this pay bill, but it is much less than the gratuity offered for reenlistment under the existing law. And yet it certainly is sufficient.

Mr. WILLIAMSON. Have you any idea as to how much of a saving will be made under the law that you propose now, over the law which has been existing with reference to gratuities?

Mr. BYRNES of South Carolina. Two million dollars is the estimate.

Mr. WILLIAMSON. On gratuities?

Mr. BYRNES of South Carolina. On reenlistment gratuities.

Mr. MAPES. Will the gentleman yield?

Mr. BYRNES of South Carolina. Yes.

Mr. MAPES. The gentleman says that he did not know how many gratuities were allowed under the existing law until he got to investigating it. One of the criticisms I have heard of this bill is that it is difficult for laymen to figure out what the real pay is of the men in the services. I would like the gentleman's opinion as to which is the most difficult to figure out, the existing law or the proposed law.

Mr. BYRNES of South Carolina. I know the gentleman would approach the consideration of that subject as I do. I wish it could be made simpler. I frankly admit that the system of pay in the Army and Navy, which has grown up in all of the Governments of the world, seems to be unable to escape these complications. Try as you will, it is impossible to devise any system by which you can fix it so that a man can look at it and read as he runs.

If the gentleman from Michigan could see the ratings that exist to-day, he would reach the conclusion that while this bill is not perfection it is perfection compared to the existing system. And it is the same as to all services. One improvement. I have heard that in London a sailor goes to an office in one part of London and collects part of his pay, and then goes over to another section of the city and visits five or six offices before he collects all of his various allowances in pay. This has grown up through the years, and they seem unable to remedy it. We are in this bill making a great advance.

Mr. STAFFORD. Will the gentleman yield?

Mr. BYRNES of South Carolina. I will.

Mr. STAFFORD. Do the hearings disclose the number of officer personnel in the Army that have been promoted to higher grades and how many grades within the past 18 months and the proportionate increase of officers by promotion to higher grades?

Mr. BYRNES of South Carolina. The hearings contain information along that line. I have not got it, because I really did not think that it would develop the line of argument I am making. If the gentleman will look at the hearings he will find reference to it. By reason of the reorganization act there were such rapid promotions that there were many undesirable situations created.

Mr. STAFFORD. But which we have attempted to correct in the War Department appropriation bill by compelling the War Department to reduce the grades of men so that there will be a well-balanced Army of officers.

Mr. BYRNES of South Carolina. And my friend will approve the principle in the bill, which seeks to correct this situation. You can take the officers that the gentleman has in mind, who have been appointed majors after only six years' service. Everybody complains about it; but while everybody complains about it, we are making an honest effort to remedy it in the only way we can in a pay bill by requiring them to mark time so far as pay is concerned for eight years to come.

Mr. STAFFORD. We attempted to remedy it in the War Department appropriation bill. Now, you are adding additional increases of salaries to those which have already been granted.

The CHAIRMAN. The time of the gentleman has expired.

Mr. OLIVER. Mr. Chairman, I yield five minutes more to the gentleman.

Mr. BYRNES of South Carolina. With respect to that, the gentleman is in error. Instead of adding increased salaries, these officers suffer a reduction in compensation. My good friend talked of some men who were going to receive, by reason of this principle of longevity, an enormous increase of $2,000 over 1908 or about $1,000 over present law. It is true as to a few, and here is the reason for it: Under the reorganization act there were 25 officers who served 30 years, and who by law are limited in promotion to that of captain, and if they stay in that grade for 30 years they get this increase. It is one of the situations created by a prior law that we found in applying the general principle.

Mr. McKENZIE. Will the gentleman yield? In the medical administrative corps promotion is limited to the grade of captain, by law.

Mr. BYRNES of South Carolina. Yes; but there are only 25 of those men who have this 30 years' service, and they are going out. Now, the other men are in the Navy—112 of them, out of a total of 2,704 lieutenants in the Navy. The Naval Committee two years ago put through a proposition by which warrant officers who had served 30 years were commissioned, many without examination, because of their good service, and they are going to receive compensation larger than that which they ought to receive. But the normal lieutenant will receive less than he does at present. During the war these warrant officers served on the mine planters in the North Sea, and they rendered distinguished services. When they came back the gentleman from Pennsylvania [Mr. BUTLER], according to my information, in his desire to do justice to these old sailor men, advocated commissions for them, and the Secretary joined him, and those are the officers about whom the gentleman from Alabama has complained. There are only 114 of them in all. They will receive more than they should by the application of the general principles to their peculiar situation, but they are old and will soon go out.

On the other hand, let us see what this same principle does. Where are the great body of officers here? Down in the larger grades. Take a captain of six years' service who hereafter is promoted to major. He will receive $1,077 less than he does at present. At the end of seven years you will have 1,050 of these captains drawing $1,077 less than the bonus, as against the 25 Army captains drawing $1,456 more. An Army major to-day is drawing $5,115. By this principle he will draw only $4,038, a difference of $1,077. He has a right to stir up a fight against this bill, and I do not blame him. The men in the commissioned service who are bachelors have a good right to do so, because we have not given them the same allowances as married men. We took your emergency officer, who is a major, and by an arbitrary provision we placed him in the fourth period, and thus in effect give him 14 years constructive service by putting him in this period. The major, who is a young man, jumped up after only six years' service, will receive less than the major who was an emergency officer.

It is a discrimination in favor of the emergency officer, but is justified, because he comes in older in years and in experience, possibly, having seen prior service in the National Guard of this country, and we thought he was entitled to it, and therefore we gave it to him. The complaint that gentlemen make about rapid promotions we try to remedy by this proposition. It is the only proposition that is offered to remedy it. What remedy is suggested by the minority here? I am a minority Member, but I appreciated this duty as seriously as I have appreciated anything in my service here. I knew that I could get out and criticize this bill—pick flaws in it. That is easy as to any pay bill. But I knew if I did that I would not be doing my duty to the Congress or my duty to the people, because our duty required us to offer something constructive or else say nothing at all.

What are you going to do? I am not going to shift the responsibility. Do nothing and demoralize the services. Adopt a negative policy. I believe it is my Navy and my Army just as much as it is the Navy and the Army of the Members on this side [Republican], and believing that, have tried to frame a bill that would be fair to them and to the taxpayers. I know that it effects a reduction of $14,000,000 in the first year and promises an ultimate saving in four years of $28,000,000, and if the cost of living is reduced a still further saving in allow-

ances, and I am going to vote for it, and I am in hopes that my friends on the Democratic side will not be carried away by appeals to prejudice on the subject of the enlisted man, because that appeal has no foundation in fact, this bill providing a great increase over 1908 and offering to the enlisted man an opportunity to increase his compenstion if he remains in the service. [Applause.]

The CHAIRMAN. The time of the gentleman from South Carolina has again expired.

Mr. OLIVER. Mr. Chairman, I yield 10 minutes to the gentleman from Indiana [Mr. KRAUS].

The CHAIRMAN. The gentleman from Indiana is recognized for 10 minutes.

Mr. KRAUS. Mr. Chairman and gentlemen, I approach this problem, and especially the duty of talking on the subject, with a good deal of diffidence. It is an involved and complicated question. But, as a member of the committee, I feel that I have gained some information and that it is my duty to impart it to you. And in talking to you concerning it I am going to speak of the financial results of this legislation as a whole, and not as to its effect in detail on officers of the various classes in the pay periods, which was so ably and earnestly presented to you by our good friend, the gentleman from Alabama [Mr. OLIVER].

In presenting to you this phase of the subject we can only make proper deductions and reach correct conclusions if at all times we use the same number of men in these services, in precisely the same ratings or grades, except that we must take into consideration the promotions they will receive in due course and increase of pay because of length of service. The hearings proceeded on the basis that an effort should be made—or at least it was stated at the late hearings before the joint committee the bill should be so formulated as to bring the total expenditure for these services and for each of them under the amounts set forth in the Budget estimate for the year 1923.

In that estimate the Budget estimate for 1923 contemplated for the Army 150,000 men and 13,000 officers. Therefore, all figures used should be on that basis. Suppose, as a matter of fact, that under new legislation you increased the number of officers and men, or doubled them next year, by legislation. You could not charge the expenditure as the result of that legislation to this bill. Or if, as a matter of fact, you cut the number of men and officers in two, and thereby saved a large amount of money under the Budget estimate, that is immaterial here at this time.

As a matter of fact, we want to know what will be the cost of this service, say, of the Army in the year 1923 under this bill and under the Budget. And by the way, in passing, as has already been detailed to you here, although the bonus provisions for officers under what is known as the bonus act of May 18, 1920, expires by limitation on the 30th day of June next, nevertheless the Budget estimates submitted by the Army and the one prepared by the Navy, as well as by every other organization included in this bill, assumed that the bonus would be continued; and therefore we have the anomalous spectacle of having a budget that, so far as this phase of the budget is concerned, has no justification in law. But that is not a matter with which I am now concerned. As a matter of fact, I say to you, my friends, frankly, that I am taking the figures as supplied by the several services. The tables disclose the Army will save slightly over $6,000,000 as compared with the Budget estimate of 1923.

Mr. JOHNSON of Mississippi. Mr. Chairman, will the gentleman yield?

Mr. KRAUS. Yes.

Mr. JOHNSON of Mississippi. In a statement issued by Mr. Mellon, the Secretary of the Treasury, to-day he stated that in the budget for 1923 there will be half a billion indebtedness.

Mr. KRAUS. It might therefore be encouraging to try to save a large amount by this legislation.

Mr. GRIFFIN. Mr. Chairman, will the gentleman yield right there?

Mr. KRAUS. Yes.

Mr. GRIFFIN. I want to ask the gentleman if the Army appropriation bill, which we passed and which is now pending in the Senate, provides for the bonus in the coming year?

Mr. KRAUS. No. I know that neither the Army bill nor the Navy bill provides for the bonus. I think the House proceeded on the theory that if the bonus was granted it would require a deficiency. However, you have just had word on that subject in the last 30 minutes or the last hour, and it has been indicated that if you do not pass this bill another body will just embody the old bonus, and it has been asserted you will be compelled to vote for it.

Now, my friends, the minority of this committee submitted a number of tables. All the tables were supplied by the officers representing these various organizations. I am frank with you when I say they are rather disappointing to me because of lack of uniformity. But they are the figures and the exact figures that have been supplied by the Army officers to the joint committee. If you will refer to Table 2 in the minority report you will find it clearly demonstrates that the commissioned personnel of the Army will in the year 1923 obtain some $200,000 more than they would have received under the bonus law, clearly demonstrating that if there is to be a saving of approximately $6,000,000, more than $6,400,000 in some way comes from other elements in the service of the Army, and a very cursory investigation of this table will show as a matter of fact that it does come, according to that statement, from the enlisted personnel. If you will note under subject "enlisted men," third item, under the Budget $71,000,000 in round numbers, and under the proposed plan $62,000,000. I would also call your attention to Table No. 3. Under this last-mentioned table the figures clearly show that the saving is made by reduced expenditures for the enlisted personnel, although this last table shows a substantial saving under the proposed law on the commissioned personnel of approximately a million dollars. My reason for calling your attention to the discrepancies is because frankly, my friends, it is my opinion that neither the Army nor the Navy, nor any other organization, nor any man on this committee who has given the subject any consideration, can with any degree of reasonable certainty assure you what this law will cost.

I am calling your attention to the discrepancies for that sole purpose. There are elements that enter into it under this measure on which the departments have no information. They have guessed, and if you will examine the figures you will find that they have guessed different amounts at various times. Neither Army nor Navy has statistics showing number of officers with and without, or the numbers in Government quarters, and without this information every estimate given as to the cost of this phase of the legislation is a mere guess. On that subject I will give you some of the various estimates at a later point.

I might take the time in calling your attention to these same discrepancies in the information supplied by the Navy, but a very brief review of Table 4 will disclose that, as a matter of fact, essentially all the saving comes from the enlisted personnel. It is true that it does not come off of what is regarded as the wages or salary, but a large part of the saving comes from the discontinuance of the reenlistment gratuity. Under this table we shall save $4,000,000 annually on this item alone, a matter of legislation entirely independent of pay. As the gentleman who just preceded me has stated, every member of this committee and the joint committee were unanimously in favor of this provision of the bill. In order to bolster up the economy claim for this bill you would be led to believe it is an item of pay. The serious thing about this matter, when I know as a matter of fact that no man can tell what the measure will cost, is that we are putting a millstone around our necks that will be there for all time. It is the experience of every man in public and private life that when salaries are once fixed by legislation they never come down.

Now, I want to call attention to some very interesting tables that will disclose in my judgment that, as a matter of fact, the anticipated future lessened cost of the commissioned personnel of the Army is a mere myth. By that I mean as long as you have in the commissioned personnel any considerable element now in the services that is protected by the extremely advantageous provisions of this measure for the men who are now in the commissioned service, then for many years in the future we will have increased expenditures rather than lessened for the officer personnel. These tables were procured and supplied in response to questions propounded by the chairman of the Committee on Appropriations. So that we may understand what the tables mean I want to read the questions propounded by the gentleman from Illinois [Mr. MADDEN].

The questions were as follows:

2. What will be the total amount of the pay and allowances of the commissioned officers of the Army included under the provisions of H. R. 10972 for the fiscal year 1923, based upon the number of officers contemplated in the 1923 Budget, for each of the several grades provided in H. R. 10972 as distributed and classified in the several grades, pay periods, and subdivisions thereof?

In answering this question consult table on page 57 of the hearings on the bill H. R. 10972, which gives in each pay period certain groups, namely:

One hundred and twenty-one colonels with less than 26 years' service.
Seven hundred and nineteen lieutenant colonels with more than 20 and less than 30 years' service.
Twenty-one lieutenant colonels appointed under section 24 of the act of June 4, 1920.

And so forth.

And in replying to this inquiry give the total amount of the pay and allowances of each of the various groups shown in the table on page 57, and in addition thereto the grand total for the commissioned personnel of each of the various groups.

3. The information requested in paragraph 2 for the fiscal year 1923 is requested for each of the following fiscal years: 1926, 1929, 1932, 1935, 1938, and 1941.

By referring to the pay periods provided for in H. R. 10972, the pertinency of the information called for in the fiscal years above set out will clearly appear.

In order to answer this question, the report was made and it was assumed that there would be 13,000 officers in the Army, that all of the men in the service at the time the Budget estimate was made would be retained, except those that go out by death, retirement under the law, or resignation, and that the number was kept up by putting men in at the foot of the list; in other words, putting in men who would go in as second lieutenants in order to keep the same number of officers. The cost for the fiscal year 1923 for commissioned personnel was reported as $49,894,000. That you may have the details I am going to incorporate this in the RECORD:

Estimated cost of the officers of the Army for the fiscal year 1923 under H. R. 10972 (includes base pay, service pay, subsistence, and rental allowances).

Grade and service.	Number of officers in each group.	Subtotals.	Total.
General officers	94	$812,908.20	$812,908.20
Sixth pay period:			
Colonel over 26 years' service	504	3,468,231.20	
Colonel, first appointment above captain	2	13,240.60	
Colonel appointed under section 24	6	33,121.80	
Lieutenant colonel over 30 years' service	10	27,703.00	
			3,582,296.60
Fifth pay period:			
Colonel, less than 26 years' service	121	734,905.60	
Lieutenant colonel, over 20 less than 30 years	719	4,278,718.40	
Lieutenant colonel, appointment under section 24	21	102,870.60	
Major, over 23 years' service	200	1,204,220.00	
			6,320,714.60
Fourth pay period:			
Lieutenant colonel, less than 20 years	50	247,680.00	
Major, over 14 and less than 23 years	1,205	5,869,638.00	
Major, first appointed above second lieutenant	450	1,994,820.00	
Major, appointed under section 24	391	1,726,557.60	
Captain, over 17 years' service	200	1,027,470.00	
			10,866,165.60
Third pay period:			
Major, less than 14 years' service	550	1,631,925.00	
Captain, over 7 and less than 17 years	500	1,801,950.00	
Captain, with rank from July 1, 1920	4,158	14,121,815.40	
First lieutenant, over 10 years' service	394	1,457,062.20	
			19,012,752.60
Second pay period:			
Captain, less than 7 years' service	409	1,143,686.70	
First lieutenant, over 3 years, less than 10 years	2,424	6,910,631.20	
First lieutenant, first appointment above second lieutenant; second lieutenant, over 5 years	77	241,715.10	
			8,296,033.00
First pay period:			
First lieutenant, less than 3 years	515	1,008,885.00	1,008,885.00
Second lieutenant, less than 5 years			
Total	13,000		49,899,755.60

The cost for the fiscal year 1923 will be $49,899,000.

Mr. JOHNSON of Mississippi. How much increase will this bill make over the pay of the commissioned personnel as it is now?

Mr. KRAUS. I just went over that a few minutes ago. Under one table that has been supplied there is to be an additional cost of $200,000, and then under another table there is a decrease of a million dollars. I am giving the gentleman both tables.

Mr. JOHNSON of Mississippi. And the gentleman will put those in the RECORD?

Mr. KRAUS. Not the tables, because I do not want to encumber the RECORD. They are already in the report. I am going to give one table and give the total figures in the other tables.

Mr. MCKENZIE. Mr. Chairman, will the gentleman yield?

Mr. KRAUS. Yes.

Mr. MCKENZIE. One of the tables to which the gentleman now refers, the first table, was furnished the joint committee when we were considering an entirely different bill from the one now before us, was it not?

Mr. KRAUS. I do not know whether it was the first table. I know it was one furnished to the joint committee.

Mr. MCKENZIE. There are two tables published, and, while there is a discrepancy in them, the discrepancy can be easily explained away.

Mr. KRAUS. I hope the gentleman will undertake to explain it away in his own time.

Mr. MCKENZIE. They are both correct.

Mr. KRAUS. Remember the cost of the fiscal year 1923 is to be approximately $49,000,000. In the fiscal year 1926 the cost will be $48,900,000, approximately. I want gentlemen to have all of the figures. According to the Army estimates the commissioned personnel of the Army will cost practically $1,100,000 less in 1923 than in the year 1926. In 1929 the cost will be $50,034,000. This is the same personnel of 13,000 men, with men going out at the top, retiring, or otherwise leaving the service, and with new men coming in at the bottom. We have been told it will cost less under this bill and produce a saving of approximately $27,000,000, and yet with this same personnel here we have gone higher now in 1929 than in 1923. In 1932 the cost will be $50,341,000; in 1933 it will be $51,182,000; in 1938, $52,885,000; and in 1941, $54,000,000.

Statement showing the estimated cost of the officers of the Army under H. R. 10972 in 1941, based on the assumption that at that time there will be 13,000 officers distributed in grades as now authorized by the Army reorganization act of June 4, 1920, viz., 17,000 officers, no provision being made in this estimate for the decrease in the number of officers in the higher grades as contemplated in the pending Army appropriation bill.

	Number.	Subtotals.	Total.
Sixth pay period:			
Colonel over 26 years	566	$3,810,578.00	
Colonel, first appointment above captain			
Colonel, appointed under section 24	53	345,979.00	
Lieutenant colonel, over 30 years	24	158,892.00	
			$4,315,449.00
Fifth pay period:			
Colonel, less than 26 years	54	324,124.40	
Lieutenant colonel, over 20, less than 30	493	2,896,634.80	
Lieutenant colonel, appointed under section 24	654	3,928,559.40	
Major, over 23 years	1,596	9,574,847.10	
			16,724,165.70
Fourth pay period:			
Lieutenant colonel, less than 20 years			
Major, over 14, less than 23	678	3,382,840.80	
Major, first appointment above second lieutenant	96	454,095.60	
Major appointed under section 24			
Captain, over 17 years	899	4,345,586.40	
			8,182,522.80
Third pay period:			
Major, less than 14 years	58	210,785.40	
Captain, over 7, less than 17	3,669	13,214,084.70	
Captain, first appointment above second lieutenant	416	1,428,940.80	
Captain, present rank July 1, 1920			
First lieutenant, over 10 years	16	58,180.80	
			14,911,991.70
Second pay period:			
Captain, less than 7 years			
First lieutenant, over 3, less than 10	2,073	5,821,829.90	
First lieutenant, first appointment above second lieutenant	232	627,041.60	
Second lieutenant over 5 years	24	68,511.20	
			6,517,382.70
First pay period:			
First lieutenant, less than 3 years	1,279	2,505,561.00	
Second lieutenant, less than 5 years	26	50,934.00	
			2,556,495.00
Total	12,906		53,208,006.90
General officers	94		812,908.20
Grand total	13,000		54,020,915.10

In other words, as long as we have the favored class, the commissioned personnel now in the Army, with the protection they have been given, with the abnormal advance in pay periods, this dream, this alleged hope of the proponents of this bill—that the commissioned personnel in the future will cost less—I am confident will vanish like mist before the sun. I am depending upon the figures supplied by the Army itself. I have similar figures supplied by the Navy. I do not desire to encumber the RECORD. Frankly, it shows practically the same result; but with equal frankness I must say that in 1941 the Navy figures would seem to indicate a reduction below the figures that it would cost in 1938, the figure, however, being an increase over what it will cost in 1923.

I believe this is the only fair test to determine probabilities and costs under this measure, as it refers to the commissioned personnel, and clearly on these figures supplied by these various services there is no doubt that there can be no possible reduction until the entire commissioned personnel is composed of individuals who start service after July 1, 1922. The fact of it is that this bill preserves the alleged rights, under the bonus

act of 1920, of the men now in the commissioned service, and it must necessarily prevent any reduction in cost.

Mr. ARENTZ. Mr. Chairman, will the gentleman yield?

Mr. KRAUS. Yes.

Mr. ARENTZ. There seems to be quite a discussion in respect to the status of the men who have been commissioned from civil life. You can not change their status, can you?

Mr. KRAUS. Very easily. All you have to do is to put them in a higher pay period. That is what has been done in many instances, and I will be frank to say that in a couple of instances men of a certain rank have been put into lower pay periods, but the putting of the men in the lower period in the instance last described does not take anything away from these men so far as the base pay and the longevity pay is concerned. This is true for the obvious reason that they are cared for by the "saving" or "protecting" clause.

Mr. ARENTZ. Some bill must pass between now and the 1st of July relative to the pay of the commissioned personnel and enlisted men. Can not amendments be made to this bill so that it will cover the points the gentleman complains of?

The Congress is looking for facts, and if the facts are presented, that is all that will be necessary. I must admit that I can not get any facts out of the debate except the one thing that you are objecting to—the commissions in civil life that have been given, that they have been advanced in grades away beyond reason.

The CHAIRMAN. The time of the gentleman from Indiana has again expired.

Mr. OLIVER. I yield the gentleman two minutes more.

Mr. KRAUS. I want to be frank with my friend from Nevada. I am inclined to believe that it is practically impossible to amend this bill so as to accomplish what the gentleman has in mind. The bill is so interwoven that you can not amend it on the floor of the House. I believe that can not be done and have a workable measure. There are some provisions that can be amended, but this entire system is so new, it is so interwoven, that I do not think it can be done intelligently from the floor. Undoubtedly certain provisions can be taken out or they can be amended without destroying the theories of the bill and at the same time either increase or decrease costs.

Mr. ARENTZ. Does the gentleman think the curves are wrong that were presented to us? Surely the rates given in the bill are between the low rate of 1908 and the rate of 1922.

Mr. KRAUS. Why indulge in rates or perecntages when the department gives you actual figures and costs and tells you what it claims will be the actual cost with this personnel in the years to come? It is not necessary to complicate the matter by talking percentages, and particularly when it was obvious the percentages were based on alleged averages.

Mr. BYRNES of South Carolina. Mr. Chairman, will the gentleman yield?

Mr. KRAUS. Yes.

Mr. BYRNES of South Carolina. With reference to the figures in the letter to Mr. MADDEN, the 1941 figures are compared with the cost this year; but if the 1920 law went on it would be entirely different, and it is not fair to compare the difference in 1941 with what it is now. Under any rate I think the gentleman will agree, because of the unusual condition of the Army, there would be an increase in 1941. The gentleman would agree to that?

Mr. KRAUS. No.

The CHAIRMAN. The time of the gentleman has expired.

Mr. KRAUS. The figures presented for 1941 are not a comparison, I will say to my friend from South Carolina, with any other figures. They are merely a statement of the actual cost supplied by the Army, and, by the way, incorrect, because every one of them leaves out the cost of the saving clause—a misnomer which even led the chairman of the committee astray in the statement he made yesterday, and which the gentleman from South Carolina gracefully assisted him in correcting.

Mr. BYRNES of South Carolina. And the gentleman gracefully desires to assist the gentleman in correcting this statement that in 1941 there will be an increase under this system because of the abnormal situation in the Army, where there are so many young officers now.

Mr. KRAUS. The very thing we are complaining of is you have taken care of this abnormal situation and preserved the abnormal rating of every man now in the commissioned service. [Applause.]

Mr. McKENZIE. Mr. Chairman, our good colleague, the gentleman from Connecticut [Mr. TILSON], who served with us on this joint committee, is unavoidably absent from Washington. He prepared a short speech which he requested me to ask unanimous consent of the committee to be included in this discussion in the CONGRESSIONAL RECORD.

The CHAIRMAN. The gentleman from Illinois asks unanimous consent that the remarks of the gentleman from Connecticut [Mr. TILSON] may be inserted in the RECORD. Is there objection? [After a pause.] The Chair hears none.

Mr. TILSON. Mr. Chairman, I desire to bring to the attention of the Members of the House a few words on the bill now pending dealing with the subject of pay adjustment for the Army, Navy, and other services. It is my purpose first to state very briefly the problem which the special committee for the adjustment of pay of the Army, Navy, and other services were set to solve, then some of the principles applied in the effort to solve the problem, and finally something as to the relative cost of making the proposed change.

The last general legislation before the war fixing the pay of the Army and Navy was in 1908. Until the recent war came, bringing in its train high living costs, the scale of pay fixed by this legislation was accepted as reasonably satisfactory. True there were certain inequalities and apparent discriminations, especially in reference to commutation of quarters, heat, light, and so forth, which caused in individual instances hardship and dissatisfaction. There were also differences between the different services that were not entirely fair and which were not conducive to general satisfaction. It was one of the objectives of the special committee to present a bill that would do away with these differences and produce substantial equality in all of the services.

When we entered the war the pay of enlisted men of the Army was doubled. To the officers in the Regular Establishment promotion in the emergency Army came almost universally during the progress of the war and in this way took care of the soaring cost of living. Substantially the same situation existed in the Navy and Marine Corps. When the war ended and officers who had held advanced emergency rank had to return to their pre-war grades and pay, a crisis in their affairs resulted. The act of May 18, 1920, was passed to save the situation. A so-called bonus, arbitrarily fixed in each grade, was added to the pay provided by the 1908 legislation. By the terms of the 1920 act the bonus was to be paid only to June 30, 1922, on which date the authority to pay it will expire by limitation. If no legislation is enacted prior to June 30 next the enlisted personnel in the Navy and the officers of the Army and Navy will revert to their pre-war pay status. Such an occurrence, under present living conditions, would produce a most demoralizing condition in all the services.

It has been proposed by some that the bonus provision be extended for a year or two years in the hope that meanwhile conditions will change for the better. Realizing that this, or something else, was necessary to prevent a return to the 1908 basis, the Budget estimated for the necessary amount to pay the bonus for the next fiscal year. A majority of the special committee, however, believed that the time had come to deal with the situation through permanent legislation.

In formulating this bill the committee took into account, first, the status quo. The enlisted men have a contract of enlistment, which, of course, is to be fulfilled to the letter. A saving clause is carried in the bill having this effect. The officers have been receiving a substantial increase over the 1908 pay scale in the form of a bonus. While living conditions remain as they are it would be disastrous to suddenly reduce their pay to the 1908 basis. A saving clause prevents this and provides for a gradual working out of the problem as to them.

Another fact taken into account in fixing pay for the future is the family relationship. This is new, so far as recent pay legislation is concerned, although it was used early in the history of our Army and the principle was thoroughly recognized in the allotments and allowances to dependents during the last war. It is assumed and taken for granted that most officers of the Army, Navy, and other services will marry and live the family life. We believe that they should be encouraged rather than discouraged in so doing. When quarters in kind are furnished a distinction in effect is now made between married and single men. In this bill the same principle is carried out in regard to commutation, subsistence, and allowances. In other words, an officer with a family or dependents receives additional compensation to a certain limited extent on this account.

Length of service and rank are also taken into account in fixing the rate of pay. Heretofore length of service has affected pay only by a percentage of increase on the base pay, known as "fogies." In this bill the base pay is affected directly by length of service by dividing the normal period of service into pay periods, which correspond quite roughly, of course, to average promotion through the several grades in normal times.

In general, the officer with long service and a family to his credit is favored by the bill, while the inexperienced officer

without a family or dependents receives correspondingly less pay. The committee believe that in view of the fact that the strictest economy must now be practiced in the military and other services this is as it should be. The young officer without dependents should be able to maintain himself creditably on the pay provided in this bill. The exercise of a fair measure of thrift and frugality at this period of a young man's life ought to be helpful rather than otherwise. On the other hand, the older officer, with longer service and a family, will continue to receive substantially what he now receives, including the bonus. It is believed that this arrangement will work out for the best interests of the several services, holding out, as it does, the assurance of higher pay for age, experience, and responsibilities, to compensate for the lower pay during the earlier years of service. It provides something worth while to which the young officer may look forward.

The following excerpts from a statement filed with the committee by representatives of the Army set forth in somewhat greater detail the principles upon which this bill is predicated:

COMPENSATION OF OFFICERS.

The total compensation of officers is made up of two parts: One, pay proper with longevity; and the other, subsistence and rental allowances, which will fluctuate from year to year as subsistence and rental costs fluctuate. The pay proper was built upon the base pay as established in the 1908 pay schedule, except that that of a second lieutenant is reduced from $1,700 to $1,500 and the longevity is changed from the existing 10 per cent increase for every five years' service, with its limitations, to a 5 per cent increase for each three years' service up to and including 30 years of service. For the purpose of computing pay all service which has heretofore been counted for that purpose is continued as counting with the proviso that officers who hereafter enter the service can count for pay purposes commissioned service only.

In order to make length of service a controlling factor in determining the pay of officers, and at the same time to recognize grade as an essential feature, it was decided to recommend a sliding scale in regard to pay, which would protect the interests of the Government in case of abnormally rapid promotion in any particular service, and which would protect the interests of the individual in case of any abnormally slow promotion. The effect of this sliding scale is to give to an officer of any particular grade the pay and allowances of the next higher period when promotion is abnormally slow. The contrary effect is obtained by providing that an officer should continue to receive the pay and allowances of his old period when promotion is abnormally rapid.

SUBSISTENCE AND RENTAL ALLOWANCES.

In establishing the subsistence and rental allowances to be given under the proposed law three conditions were considered. The first was that the allowance should be one which would fluctuate as living costs fluctuate; the second, that the allowances should be those that would fit as near as possible the average family life at the different periods of an officer's career; and the third, that a junior officer requires somewhat less in the matter of living conditions than older officers.

This principle is apparently a new one, but as a matter of fact examples of it in the history of the Army are numerous and characteristic. During the entire history of our Army up to the year 1871 a ration allowance was part of the emoluments of the service. They were based upon the grades of officers and prior to the Civil War amounted to as many as 40 rations. The present subsistence allowance is merely a return in principle after a lapse of more than 50 years to a system of procedure which was in operation for the first 80 years of the Republic.

The recognition of dependents exists in the act of May 18, 1920, which furnished transportation at Government expense for certain classes of dependents. The same act provided for the payment of commutation of quarters, heat, and light to officers on field service who had dependents at home. Quarters for Army officers at Army posts have always been built so as to provide accommodations for officers' families. Dependency was recognized during the war by exempting certain classes of men with dependents from the draft, by granting family allowances to men serving in the military service, and by providing the compensation feature of the war-risk insurance. The Government now allows a gratuity of six months' pay to certain specified dependents in the case of an officer or enlisted man dying in the service.

This principle is also recognized in the exemption granted under the income tax law for a wife or minor children. It is also recognized by various industrial and commercial organizations in civil life. For example, railroads give free transportation to the families of their railroad employees after the latter have been with them a year or more, thus recognizing in a dual way the principle of dependency and of length of service, both of which are recognized in this bill. Many other cases could be cited. It is thus apparent that this proposition partially to base the allowances of an officer on the fact of dependency is by no means new in principle; it is merely a variation of the application of old and recognized principles of law.

In applying this principle to establish subsistence allowances, it was assumed that the young man in the first few years of his service would have no dependents; that the requirements because of dependents would increase during the life of the officer up to about 25 years' service, after which time they would begin to decrease.

In applying this principle in establishing rental allowances the same conditions were considered to exist as in the case of subsistence allowances with the additional element that an older officer requires somewhat better living conditions than a younger one.

These two allowances constitute the variable part of an officer's total compensation.

Compared with the Budget estimate for the fiscal year of 1923, which means the 1908 scale of pay plus the so-called bonus, the bill under consideration would effect a considerable immediate saving and eventually, after time has eliminated the effect of the saving clauses, will closely approximate, if it does not go below, what the cost would be under the 1908 scale of pay.

The pay of the Army fairly illustrates the effect of the entire bill, and as I am more familiar with the Army pay than any other I shall use it for the purpose of illustration. A table is here inserted showing the total cost for the pay of the Army under the Budget estimate, under the proposed bill, and under the 1908 scale of pay:

Table showing total cost for pay of the Army under Budget estimate, proposed bill, and 1908 scale of pay.

	Budget, 1923.	Proposed bill.	1908 pay.
Base and service pay of officers	$39,906,190	$38,816,705	$39,906,190
Temporary increase, act of May 18, 1920	9,032,820	.....	.....
Foreign-service pay	380,644	.....	380,644
Saving clause, officers, active list	.....	2,004,645	.....
Commutation of quarters, heat, and light	4,925,050	6,007,280	4,925,050
Subsistence allowances	.....	5,680,422	.....
Pay of retired officers	5,132,055	5,107,350	5,132,055
Saving clause, retired officers	.....	461,865	.....
Pay and allowances, warrant officers	2,479,846	3,153,120	2,455,846
Pay and allowances of nurses	1,092,455	1,257,985	882,535
Pay of enlisted men	73,015,586	65,529,857	72,054,276
Saving clause, enlisted men	.....	5,000,000	.....
Temporary increase, act of May 18, 1920	3,623,705	.....	.....
Total	139,588,351	133,019,229	125,736,596

It is estimated that the $5,000,000, which is the cost of the "saving clause for enlisted men," will be reduced by one-half within a year, and will disappear entirely within three years, making the decrease below the Budget estimate at the end of three years $11,569,122. The $2,004,645, which is the cost of the "saving clause for officers of the active list," will disappear entirely as officers pass into higher pay periods, while the $461,865, which is the cost of the "saving clause for retired officers," will disappear gradually as those now on the retired list die, making the total ultimate decrease below the Budget estimate $14,035,632. Summarizing, the account would stand as follows:

Total cost of the "saving clauses" is $5,000,000 plus $2,004,645 plus $461,865, which equals $7,466,510.

When this amount has disappeared from the cost of the present bill its ultimate cost will be as follows:

One hundred and thirty-three million nineteen thousand two hundred and twenty-two dollars less $7,466,510, which leaves a total cost, after the act has taken full effect, of $125,552,719, which is $183,877 less than the total cost under the 1908 scale of pay.

In making the foregoing computations it is all the while assumed as a basis that the Army remains of the same size and that the cost of living remains at the same level. If living costs should be reduced, then there will be an additional saving. It will thus be seen that beginning at once the cost for pay of the Army will be continuously reduced until it reaches the 1908 level and goes below it. An attempt to make further or more radical reductions at the present time would be, in my judgment, a very great mistake and would have a most unfortunate effect on the several services.

I believe that the present bill is the best and most scientific solution of the pay problem that has been proposed, and that it will give satisfaction throughout all the services concerned, which of itself is a very great accomplishment. The bill should be enacted into law at the earliest date practicable in order that there may be time to provide the necessary funds in the several appropriation bills now pending.

Mr. OLIVER. Mr. Chairman, I ask unanimous consent to revise and extend my remarks.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none. The Clerk will read the bill.

The Clerk began the reading of the bill.

Mr. GARNER. Mr. Chairman, I want to ask the gentleman if he does not think, as there is nobody here and the bill is being read for amendment, that we had better read this to-morrow or the next day?

The CHAIRMAN. The Clerk has not concluded the reading of the first paragraph.

Mr. GARNER. I know; but it occurs to me that it would be better to have a larger attendance in the committee when this bill is being read for amendment. If you read this entire paragraph at this time it will not be read day after to-morrow. There may be nobody here who desires to make an amendment to it to-day, and it appears to me it would be well to adjourn and give an opportunity for gentlemen to offer amendments.

Mr. McKENZIE. Mr. Chairman, I wish to say to my good friend from Texas that it was my only desire to continue for a short time longer, in order to carry out the wishes of the majority leader, who said he hoped we would run until 5 o'clock, that he was called away and would be back by that time and make a statement in regard to the program.

Mr. GARNER. If that is the case, I have no monkey wrench to drop into the machinery.

Mr. McKENZIE. I suggest the Clerk complete the reading of the first section, and then I shall move that the committee rise and go into the House, with the understanding that the section will be taken up for amendment when the bill is again taken up for consideration.

Mr. OLIVER. In other words, nobody will be prejudiced by its reading?

Mr. McKENZIE. Absolutely not.

Mr. OLIVER. The rights of everyone will be absolutely preserved?

Mr. McKENZIE. We shoot right in the open; there will be no advantage taken of anybody.

The Clerk read as follows:

Be it enacted, etc., That, beginning July 1, 1922, for the purpose of computing the annual pay of the commissioned officers of the Regular Army and Marine Corps below the grade of brigadier general, of the Navy below the grade of rear admiral, of the Coast Guard, of the Coast and Geodetic Survey, and of the Public Health Service below the grade of surgeon general, pay periods are prescribed, and the base pay for each is fixed as follows:

The first period, $1,500; the second period, $2,000; the third period, $2,400; the fourth period, $3,000; the fifth period, $3,500; and the sixth period, $4,000.

The pay of the sixth period shall be paid to colonels of the Army, captains of the Navy, and officers of corresponding grade who have completed twenty-six years' service, or whose first appointment in the permanent service was in a grade above that corresponding to captain in the Army, or who were appointed to the Regular Army under the provisions of the first sentence of section 24, act of June 3, 1916, as amended by the act of June 4, 1920; to officers of the Staff Corps of the Navy advanced by selection under existing laws to the rank or pay of captain; to lieutenant colonels of the Army, commanders of the Navy, and officers of corresponding grade, and lieutenant commanders of the line and Engineer Corps of the Coast Guard who have completed 30 years' service; and to the Chief of Chaplains of the Army.

The pay of the fifth period shall be paid to colonels of the Army, captains of the Navy, and officers of corresponding grade who are not entitled to the pay of the sixth period; to lieutenant colonels of the Army, commanders of the Navy, and officers of corresponding grade who have completed 20 years' service, or whose first appointment in the permanent service was in a grade above that corresponding to captain in the Army, or who were appointed to the Regular Army under the provisions of the first sentence of said section 24; to officers of the Staff Corps of the Navy advanced by selection under existing laws to the rank or pay of commander; and to majors of the Army, lieutenant commanders of the Navy, and officers of corresponding grade who have completed 23 years' service: *Provided*, That lieutenant commanders of the Staff Corps of the Navy who were appointed between the dates of March 4, 1913, and June 7, 1916, in a grade above that of ensign shall receive the pay of this pay period after completing 20 years' service.

The pay of the fourth period shall be paid to lieutenant colonels of the Army, commanders of the Navy, and officers of corresponding grade who are not entitled to the pay of the fifth or sixth period; to majors of the Army, lieutenant commanders of the Navy, and officers of corresponding grade who have completed 14 years' service, or whose first appointment in the permanent service was in a grade above that corresponding to second lieutenant in the Army, or who were appointed to the Regular Army under the provisions of the first sentence of said section 24; to captains of the Army, lieutenants of the Navy, and officers of corresponding grade who have completed 17 years' service; and to lieutenants of the Staff Corps of the Navy, and lieutenants and lieutenants (junior grade) of the line and Engineer Corps of the Coast Guard whose total commissioned service equals that of lieutenant commanders of the line of the Navy drawing the pay of this period.

The pay of the third period shall be paid to majors of the Army, lieutenant commanders of the Navy, and officers of corresponding grade who are not entitled to the pay of the fourth, fifth, or sixth period; to captains of the Army, lieutenants of the Navy, and officers of corresponding grade who have completed seven years' service, or whose first appointment in the permanent service was in a grade above that corresponding to second lieutenant in the Army or whose present rank dates from July 1, 1920, or earlier; to first lieutenants of the Army, lieutenants (junior grade) of the Navy, and officers of corresponding grade who have completed 10 years' service; and to lieutenants (junior grade) of the line and Engineer Corps of the Coast Guard whose total commissioned service equals that of lieutenants of the line of the Navy drawing the pay of this period.

The pay of the second period shall be paid to captains of the Army, lieutenants of the Navy, and officers of corresponding grade who are not entitled to the pay of the third or fourth period; to first lieutenants of the Army, lieutenants (junior grade) of the Navy, and officers of corresponding grade who have completed three years' service, or whose first appointment in the permanent service was in a grade above that corresponding to second lieutenant in the Army; and to second lieutenants of the Army, ensigns of the Navy, and officers of corresponding grade who have completed five years' service.

The pay of the first period shall be paid to all other officers whose pay is provided for in this section.

During the existence of a state of war formally recognized by Congress, officers of grades corresponding to those of colonel, lieutenant colonel, major, captain, and first lieutenants of the Army, holding either permanent or temporary commissions as such, shall receive the pay of the sixth, fifth, fourth, third, and second periods, respectively, unless entitled under the foregoing provisions of this section to the pay of a higher period.

Every officer paid under the provisions of this section shall receive an increase of 5 per cent of the base pay of his period for each 3 years of service up to 30 years: *Provided*, That the base pay plus pay for length of service of no officer below the grade of colonel of the Army, captain of the Navy, or corresponding grade, shall exceed $5,750.

For officers hereafter appointed no service shall be counted for purposes of pay except active commissioned service under a Federal appointment and commissioned service in the National Guard when called out by order of the President. For officers now in the service all service which is now counted in computing longevity pay, and service as a contract surgeon serving full time, shall be included in the computation.

The provisions of this act shall apply equally to those persons serving, not as commissioned officers in the Army, or in the other services mentioned in the title of this act, but whose pay under existing law is an amount equivalent to that of a commissioned officer of one of the above grades, those receiving the pay of colonel, lieutenant colonel, major, captain, first lieutenant, and second lieutenant being classified as in the sixth, fifth, fourth, third, second, and first periods, respectively. Pay clerks of the Marine Corps shall receive the pay of second lieutenants of the Army of the same length of service. Contract surgeons serving full time shall have the pay and allowances for subsistence and rental authorized for officers serving in their second pay period. Commissioned warrant officers on the active list with creditable records shall, after 6 years' commissioned service, receive the pay of the second period, and after 12 years' commissioned service receive the pay of the third period: *Provided*, That a commissioned warrant officer promoted from the grade of warrant officer shall suffer no reduction of pay by reason of such promotion. Army field clerks and field clerks, Quartermaster Corps, shall have the allowances for subsistence and rental authorized for officers receiving the pay of the first period.

Mr. McKENZIE. Mr. Chairman, I move that the committee do now rise.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. TOWNER, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee, having had under consideration the bill H. R. 10972, had come to no resolution thereon.

HOUR OF MEETING TO-MORROW.

Mr. FORDNEY. Mr. Speaker, I ask unanimous consent that when the House meets to-morrow it meet at 11 o'clock and that we have five hours' general debate on the so-called Liberian bill, House Joint Resolution 270, one-half the time to be controlled by myself and one-half by the gentleman from Texas [Mr. GARNER], and at the end of the five hours' debate the joint resolution be read under the five-minute rule.

The SPEAKER. The gentleman from Michigan asks unanimous consent that when the House adjourns to-day it adjourn to meet at 11 o'clock to-morrow for the consideration of the Liberian bill, upon which there shall be general debate of not exceeding five hours.

Mr. FORDNEY. Not to run later than 4 o'clock.

Mr. GARNER. I would suggest to the gentleman that this side of the House expected in good faith to assist in getting a vote on the bill to-morrow; that was the subject of the conference had between Mr. MONDELL, the gentleman from Michigan, and myself, and I think if anyone should make a point of no quorum and we have a number of roll calls it will knock us out of a good deal of time, and we would not get through by 4.30. The bill only occupies one page and consists of one paragraph, and all amendments could be offered and discussed in 15 or 20 minutes, and five hours would put us to 4 o'clock.

The SPEAKER. It would go beyond that if there was a point of no quorum.

Mr. GARNER. If we get into the Committee of the Whole House on the state of the Union there will be probably a quorum here, and if we get the membership over here at 11 o'clock we can avoid the roll call and we can certainly get through the five hours by 4 o'clock; and if we do have a roll call, we will get through by 4.30.

Mr. FORDNEY. What limit of time would the gentleman suggest?

Mr. GARNER. Half past 4.

Mr. FORDNEY. I will amend that and ask that the general debate close at not later than 4.30.

The SPEAKER. The gentleman from Michigan asks unanimous consent for the agreement as stated by the Chair, except that general debate shall be closed at not later than 4.30. Is there objection to the request? [After a pause.] The Chair hears none. The Chair has an engagement to-morrow morning and he may be late, and in that event he designates Mr. WALSH to act as Speaker pro tempore until he arrives.

Mr. FORDNEY. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. FORDNEY. When the House adjourned on Wednesday last the Committee on Ways and Means was on call. Is that committee automatically on call to-morrow morning?

The SPEAKER. Certainly. The Chair has the understanding it is agreed to have the consideration of this bill on the call of the Committee on Ways and Means. Is that correct?

Mr. GARNER. That is correct—that this joint resolution be considered to-morrow.

The SPEAKER. The Chair thought it wise to have that understood.

LEAVE OF ABSENCE.

By unanimous consent, leave of absence was granted to—

Mr. DAVIS of Minnesota, indefinitely, on account of important business.

Mr. STEVENSON, for the rest of the week, on account of going home on business.

Mr. FOCHT, for one week, on account of important business.

ENROLLED BILLS SIGNED.

Mr. RICKETTS, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled bills of the following titles, when the Speaker signed the same:

H. R. 4382. An act to provide for the application of the reclamation law to irrigation districts;

H. R. 10941. An act authorizing the Postmaster General to grant permission to use special canceling stamps or postmarking dies; and

H. R. 11547. An act making an appropriation for additional hospital facilities for patients of the United States Veterans' Bureau.

The SPEAKER announced his signature to enrolled joint resolution of the following title:

S. J. Res. 132. Joint resolution to authorize the printing of journals, magazines, periodicals, and similar publications, and for other purposes.

ADJOURNMENT.

Mr. MCKENZIE. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 4 o'clock and 47 minutes p. m.) the House adjourned to meet to-morrow, Wednesday, May 10, 1922, at 11 o'clock a. m.

EXECUTIVE COMMUNICATIONS, ETC.

608. Under clause 2 of Rule XXIV, a communication from the President of the United States transmitting supplemental estimate of appropriation for the United States Veterans' Bureau for the fiscal year ending June 30, 1922, for the settlement of claims under act of March 8, 1918, Article IV, $25,000 (H. Doc. 308), was taken from the Speaker's table, referred to the Committee on Appropriations, and ordered to be printed.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII,

Mr. HAUGEN: Committee on Agriculture. H. R. 11396. A bill to regulate foreign commerce in the importation into the United States of the adult honeybee (Apis mellifica); with an amendment (Rept No. 994). Referred to the House Calendar.

Mr. LUCE: Committee on the Library. H. R. 11393. A bill to abolish the office of Superintendent of the Library Building and Grounds and to transfer the duties thereof to the Architect of the Capitol and the Librarian of Congress; without amendment (Rept. No. 995). Referred to the Committee of the Whole House on the state of the Union.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. KINCHELOE: A bill (H. R. 11588) to amend an act entitled "An act to authorize the Secretary of the Treasury to provide hospital and sanatorium facilities for discharged sick and disabled soldiers, sailors, and marines"; to the Committee on Public Buildings and Grounds.

By Mr. BALDWIN: A bill (H. R. 11589) to provide for the transfer of the land and buildings of the Federal leprosy investigation station at Kalawao, on the island of Molokai, in the Territory of Hawaii, to the Territory of Hawaii, and for other purposes; to the Committee on the Territories.

By Mr. BALDWIN: A bill (H. R. 11590) to amend sections 34 and 40 of the organic act of the Territory of Hawaii; to the Committee on the Territories.

By Mr. MANSFIELD: A bill (H. R. 11591) authorizing and directing the Secretary of War to cause survey to be made of the Colorado River in Texas, with a view to the removal of the raft in said stream, in the counties of Wharton and Matagorda, and to controlling the flood waters of said stream, and for other purposes; to the Committee on Flood Control.

By Mr. GALLIVAN: A bill (H. R. 11592) to authorize an appropriation to enable the Director of the United States Veterans' Bureau to provide for the acquiring of sites and the building of rest camps as he may deem advisable in the several regional districts; to the Committee on Public Buildings and Grounds.

By Mr. ASWELL: Joint resolution (H. J. Res. 323) to appropriate $500,000, or so much thereof as may be necessary, for the purchase of suitable planting seeds to be supplied to farmers in overflowed areas of the United States, said amount to be expended under rules and regulations prescribed by the Secretary of Agriculture; to the Committee on Appropriations.

By the SPEAKER (by request): Memorial of the Legislature of the State of Rhode Island, relative to recognizing Palestine as the homeland of the Jewish people; to the Committee on Foreign Affairs.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. APPLEBY: A bill (H. R. 11593) granting an increase of pension to Philip Hawk; to the Committee on Invalid Pensions.

By Mr. HUKRIEDE: A bill (H. R. 11594) granting a pension to George W. Morgan; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11595) granting a pension to William J. Kinion; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11596) granting a pension to David Gibson; to the Committee on Invalid Pensions.

By Mr. HUTCHINSON: A bill (H. R. 11597) granting a pension to Annie H. Sines; to the Committee on Invalid Pensions.

By Mr. PURNELL: A bill (H. R. 11598) granting a pension to Sarah S. Bradfield; to the Committee on Invalid Pensions.

By Mr. RIORDAN: A bill (H. R. 11599) granting a pension to James Farley; to the Committee on Invalid Pensions.

By Mr. TAYLOR of Tennessee: A bill (H. R. 11600) granting an increase of pension to James O. Wilkerson; to the Committee on Pensions.

Also, a bill (H. R. 11601) granting a pension to Swepson Sutton; to the Committee on Invalid Pensions.

By Mr. VESTAL: A bill (H. R. 11602) granting a pension to Parthine Curtis; to the Committee on Invalid Pensions.

By Mr. WHITE of Maine: A bill (H. R. 11603) to validate for certain purposes the revocation of discharge orders of Lieut. Col. James M. Palmer and the orders restoring such officer to his former rank and command; to the Committee on Military Affairs.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

5521. By Mr. ANSORGE: Petition of Appomattox Republican Club, New York City, recommending care of disabled soldiers and their families, employment of soldiers, and the granting of a bonus with deferred payments; to the Committee on Ways and Means.

5522. By Mr. APPLEBY: Evidence to accompany House bill 9139, granting a pension to Amelia M. Hetherington; to the Committee on Invalid Pensions.

5523. By Mr. CULLEN: Resolution adopted by the board of estimate and apportionment of the city of New York, urging Federal and State officials to immediately begin all improvements contemplated or proposed and to make available for such improvements any appropriations that have already been granted or authorized in connection therewith; to the Committee on Appropriations.

5524. By Mr. FROTHINGHAM: Resolution adopted by the Massachusetts Commandery of the Naval and Military Order of the Spanish-American War, protesting against the reduction of the Army below an enlisted strength of 150,000 with 13,000 officers; to the Committee on Appropriations.

5525. Also, resolution adopted by the Massachusetts Commandery of the Naval and Military Order of the Spanish-American War, protesting against the reduction of the Navy below 96,000 men; to the Committee on Appropriations.

5526. By Mr. HAWLEY: Petition of E. B. Leonard and other residents of Oregon, opposing the passage of House bill 9753 and other Sunday bills; to the Committee on the District of Columbia.

5527. Also, petition of Harold Olson and other residents of Oregon, opposing the passage of House bill 9753 and other Sunday bills; to the Committee on the District of Columbia.

5528. By Mr. JOHNSON of Mississippi: Resolution adopted by the board of supervisors of Forrest County, Miss., urging the Congress to accept the Henry Ford offer for Muscle Shoals; to the Committee on Military Affairs.

5529. By Mr. KENNEDY: Resolution of the General Assembly of the State of Rhode Island urging recognition of Palestine as the homeland of the Jewish people; to the Committee on Foreign Affairs.

5530. By Mr. KISSEL: Petition of William F. Deegan, Esq., State commander, American Legion, New York City, N. Y., on

the Army appropriation bill; to the Committee on Appropriations.

5531. Also, petition of Shoe Manufacturers Board of Trade of New York (Inc.), Brooklyn, N. Y., relative to the tariff bill; to the Committee on Ways and Means.

5532. By Mr. KUNZ: Petition of Mary E. O'Neill and others of Chicago opposing the passage of House bill 9753 and other Sunday bills; to the Committee on the District of Columbia.

5533. By Mr. LINTHICUM: Petitions of Maass & Kemper, Baltimore, Md., protesting against proposed rates on linens; W. E. Robinson & Co., Bel Air, Md., protesting against lack of sufficient protection to American industries and farmers; Booth Packing Co., Baltimore, Md., proposing certain tariff on canned goods; and Crown Cork & Seal Co., Baltimore, Md., protesting against proposed customs duty on imported casein; to the Committee on Ways and Means.

5534. Also, petition of Westport Paving Brick Co., Baltimore, Md., and Graham Gunby, Salisbury, Md., urging proper legislation for Coast Guard Service; to the Committee on Interstate and Foreign Commerce.

5535. Also, petition of H. E. Houck & Co., Baltimore, urging passage of Volstead bill (H. R. 10159); to the Committee on the Judiciary.

5536. By Mr. SINCLAIR: Petition of Kiwanis Club, of Minot, N. Dak., protesting against the repeal or amendment of the transportation act of 1920; to the Committee on Interstate and Foreign Commerce.

5537. Also, petition of William Polansky and 36 others of New Hradec, N. Dak., and vicinity, urging the revival of the United States Grain Corporation and a stabilized price on farm products; to the Committee on Agriculture.

5538. By Mr. SMITH of Michigan: Petition of the International Arbitration Association of the State of Michigan, calling for an international peace conference of all the nations of the world; to the Committee on Foreign Affairs.

5539. By Mr. SNYDER: Petition of Arthur Morse, Clinton B. Griffin, Charles H. Knapka, Charles H. Burrill, E. J. Beckingham, Mary C. Miller, and Mrs. P. Devenbeck, of Herkimer, N. Y., favoring the passage of the Chandler pension bill (H. R. 9198) increasing the pensions of volunteers serving in the War with Spain or China or Philippine expeditions; to the Committee on Pensions.

5540. By Mr. STEENERSON: Petition of Richard Ormiston, Gust Nelson, and other residents of Marshall County, Minn., favoring duty on linseed oil; to the Committee on Ways and Means.

5541. By Mr. TOWNER: Petition of Presbytery of Corning at Nodaway, Iowa, urging passage of Senate Joint Resolution 31, proposing a constitutional amendment authorizing Congress to enact uniform laws on the subject of marriage and divorce; to the Committee on the Judiciary.

5542. Also, petition of Presbytery of Corning at Nodaway, Iowa, urging passage of House Joint Resolution 131, proposing a constitutional amendment prohibiting polygamy and polygamous cohabitation in the United States; to the Committee on the Judiciary.

5543. Also, petition of Presbytery of Corning at Nodaway, Iowa, urging passage of House bill 9753, to secure Sunday as a day of rest in the District of Columbia; to the Committee on the District of Columbia.

SENATE.

WEDNESDAY, *May 10, 1922.*

(Legislative day of Thursday, April 20, 1922.)

The Senate met at 11 o'clock a. m., on the expiration of the recess.

Mr. HARRISON. Does the Senator from Kansas [Mr. CURTIS] desire to suggest the absence of a quorum?

Mr. CURTIS. I have a conference report to submit. Does the Senator from Mississippi wish to call for a quorum?

Mr. HARRISON. I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The reading clerk called the roll, and the following Senators answered to their names:

Ashurst	Dial	Jones, Wash.	McLean
Ball	Dillingham	Kellogg	McNary
Borah	Frelinghuysen	Kendrick	Nelson
Brandegee	Gooding	King	Newberry
Bursum	Hale	Ladd	Nicholson
Calder	Harreld	La Follette	Oddie
Capper	Harris	Lenroot	Overman
Caraway	Harrison	Lodge	Page
Colt	Heflin	McCumber	Phipps
Culberson	Johnson	McKellar	Poindexter
Curtis	Jones, N. Mex.	McKinley	Pomerene
Rawson	Smoot	Swanson	Walsh, Mass.
Robinson	Spencer	Townsend	Watson, Ga.
Sheppard	Stanley	Underwood	Watson, Ind.
Simmons	Sutherland	Wadsworth	Willis

Mr. DIAL. My colleague [Mr. SMITH] is unavoidably detained. I ask that this announcement may continue through the day.

Mr. SHEPPARD. The Senator from Montana [Mr. WALSH] is detained on official business.

Mr. WILLIS. I was requested to announce the absence of the senior Senator from Florida [Mr. FLETCHER] on business of the Senate.

Mr. HEFLIN. The Senator from Nebraska [Mr. NORRIS], the Senator from New Hampshire [Mr. KEYES], and the Senator from South Dakota [Mr. NORBECK] are engaged in a hearing on the Muscle Shoals project before the Committee on Agriculture and Forestry.

The VICE PRESIDENT. Sixty Senators have answered to their names. A quorum is present.

DEPARTMENTS OF STATE AND JUSTICE APPROPRIATIONS—CONFERENCE REPORT.

Mr. CURTIS. I submit a conference report on House bill 11065, making appropriations for the Department of State and the Department of Justice, and ask for its present consideration.

There being no objection, the Senate proceeded to consider the report, which was read, as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 11065) making appropriations for the Departments of State and Justice and for the judiciary for the fiscal year ending June 30, 1923, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 21, 27, 34, 35, 37, 38, 51, 52, 59, 63, 64, 68, 69, 74, 75, 77, 78, 85, 87, 88, 93, and 94.

That the House recede from its disagreement to the amendments of the Senate numbered 2, 3, 4, 9, 10, 11, 18, 20, 23, 26, 29, 31, 32, 33, 39, 41, 42, 46, 50, 54, 55, 56, 57, 58, 60, 65, 66, 67, 76, 80, 81, 82, 83, 84, 86, and 97; and agree to the same.

Amendment numbered 1: That the House recede from its disagreement to the amendment of the Senate numbered 1, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$260,000"; and the Senate agree to the same.

Amendment numbered 12: That the House recede from its disagreement to the amendment of the Senate numbered 12, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$350,000"; and the Senate agree to the same.

Amendment numbered 14: That the House recede from its disagreement to the amendment of the Senate numbered 14, and agree to the same with an amendment as follows: Transpose the matter inserted by said amendment to page 8, line 5 of the bill, to follow the word "of," amended to read as follows: "and rent for"; and the Senate agree to the same.

Amendment numbered 15: That the House recede from its disagreement to the amendment of the Senate numbered 15, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$750,000"; and the Senate agree to the same.

Amendment numbered 16: That the House recede from its disagreement to the amendment of the Senate numbered 16, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$1,900,000"; and the Senate agree to the same.

Amendment numbered 17: That the House recede from its disagreement to the amendment of the Senate numbered 17, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$1,935,000"; and the Senate agree to the same.

Amendment numbered 19: That the House recede from its disagreement to the amendment of the Senate numbered 19, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$1,150,000"; and the Senate agree to the same.

Amendment numbered 22: That the House recede from its disagreement to the amendment of the Senate numbered 22, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$290,000"; and the Senate agree to the same.

Amendment numbered 30: That the House recede from its disagreement to the amendment of the Senate numbered 30, and

agree to the same with an amendment as follows: In lieu of the sum proposed insert "$49,400"; and the Senate agree to the same.

Amendment numbered 36: That the House recede from its disagreement to the amendment of the Senate numbered 36, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following: "For the expenses of the arbitration of outstanding pecuniary claims between the United States and Great Britain, in accordance with the special agreement concluded for that purpose August 18, 1910, and the schedules of claims thereunder, including salary and expenses of the tribunal, and of the agent, to be appointed by the President, by and with the advice and consent of the Senate, counsel, joint secretary and other assistants, contingent expenses, and personal services and rent in the District of Columbia, and elsewhere, to be expended under the direction of the Secretary of State, $60,000"; and the Senate agree to the same.

Amendment numbered 53: That the House recede from its disagreement to the amendment of the Senate numbered 53, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$479,010"; and the Senate agree to the same.

Amendment numbered 62: That the House recede from its disagreement to the amendment of the Senate numbered 62, and agree to the same with an amendment as follows: Restore the matter stricken out by said amendment amended to read as follows: "the investigation of the official acts, records, and accounts of marshals, attorneys, and clerks of the United States courts and the Territorial courts, and United States commissioners, for which purpose all the official papers, records, and dockets of said officers, without exception, shall be examined by the agents of the Attorney General at any time"; and the Senate agree to the same.

Amendment numbered 72: That the House recede from its disagreement to the amendment of the Senate numbered 72, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$2,275,000"; and the Senate agree to the same.

Amendment numbered 79: That the House recede from its disagreement to the amendment of the Senate numbered 79, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$90,000"; and the Senate agree to the same.

Amendment numbered 89: That the House recede from its disagreement to the amendment of the Senate numbered 89, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$578,500"; and the Senate agree to the same.

Amendment numbered 90: That the House recede from its disagreement to the amendment of the Senate numbered 90, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$37,500"; and the Senate agree to the same.

Amendment numbered 91: That the House recede from its disagreement to the amendment of the Senate numbered 91, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$23,000"; and the Senate agree to the same.

Amendment numbered 92: That the House recede from its disagreement to the amendment of the Senate numbered 92, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$2,000"; and the Senate agree to the same.

Amendment numbered 95: That the House recede from its disagreement to the amendment of the Senate numbered 95, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$149,300"; and the Senate agree to the same.

Amendment numbered 96: That the House recede from its disagreement to the amendment of the Senate numbered 96, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$1,050,000"; and the Senate agree to the same.

The committee of conference have not agreed on Senate amendments numbered 5, 6, 7, 8, 13, 24, 25, 28, 40, 43, 44, 45, 47, 48, 49, 61, 70, 71, and 73.

CHARLES CURTIS,
F. E. WARREN,
H. C. LODGE,
LEE S. OVERMAN,
G. M. HITCHCOCK,
Managers on the part of the Senate.
JAMES W. HUSTED,
GEO. HOLDEN TINKHAM,
Managers on the part of the House.

Mr. UNDERWOOD. Mr. President, will the Senator in charge of the conference report give us a short statement as to what the substance of it is, and especially what the items are which have not been agreed to in conference?

Mr. CURTIS. The items not agreed to in conference are the new matters added in the Senate by reason of the action of the conference to reduce armament. It being new legislation, the House conferees thought that the amendments should go back to the House for action by that body. The House conferees thought it doubtful whether they had a right to agree to the amendments without presenting them to the House. I may state to the Senator that we have substantially reached an agreement on all these items, but they are going back to the House for the purpose which I have stated in order to avoid any question as to a violation of the rule.

Mr. JONES of Washington. Do I understand the Senator from Kansas to say that the items which are reported as in disagreement have, as a matter of fact, been agreed to by the conferees among themselves?

Mr. CURTIS. The conferees have substantially agreed to them, but we did not finally agree because the House conferees thought, as they constituted new matter inserted by the Senate, they had a right, and furthermore that it was their duty under the rule, to present them to the House before final action was taken.

Mr. JONES of Washington. But is it understood that they are going to present them to the House of Representatives with the recommendation that the House agree to them?

Mr. CURTIS. Yes.

Mr. JONES of Washington. Then, as a matter of fact, the conferees have substantially agreed to the amendments which are reported as in disagreement?

Mr. CURTIS. Yes; that is correct.

The VICE PRESIDENT. The question is on agreeing to the conference report.

The report was agreed to.

The VICE PRESIDENT. Does the Senator from Kansas desire to ask for a further conference with the House?

Mr. CURTIS. No; I do not think that is necessary at this time.

LINCOLN MEMORIAL DEDICATION.

The VICE PRESIDENT. The Chair lays before the Senate a communication which the Secretary will read.

The reading clerk read as follows:

LINCOLN MEMORIAL COMMISSION,
Washington, D. C., May 9, 1922.

Hon. CALVIN COOLIDGE,
Vice President of the United States,
The Capitol, Washington, D. C.

MY DEAR MR. VICE PRESIDENT: It has been suggested that it would be a most impressive feature of the Lincoln memorial dedication if the Senate and House of Representatives would arrange to approach the memorial in a body and sit together in a group during the ceremonies.

Will you kindly inform me if it would be agreeable to the Members of the Senate if seats are reserved for them on this supposition? If this plan meets with the approval of the Senators, such additional seats as they may desire for their families will be reserved in a different section. I am writing a similar letter to the Speaker of the House.

Yours very sincerely,

WM. H. TAFT, *Chairman.*

The VICE PRESIDENT. The Chair will refer the communication to the Committee on Rules.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. Overhue, its enrolling clerk, announced that the Speaker of the House had signed the following enrolled bills and joint resolution, and they were thereupon signed by the Vice President:

S. 1813. An act for the relief of the owner of the steamer *Mayflower;*

S. 1814. An act for the relief of the owner of the steam lighter *Cornelia;*

S. 1817. An act for the relief of the owners of the schooner *Horatio G. Foss;*

H. R. 4382. An act to provide for the application of the reclamation law to irrigation districts;

H. R. 10941. An act authorizing the Postmaster General to grant permission to use special canceling stamps or postmarking dies;

H. R. 11547. An act making an appropriation for additional hospital facilities for patients of the United States Veterans' Bureau; and

S. J. Res. 132. Joint resolution to authorize the printing of journals, magazines, periodicals, and similar publications, and for other purposes.

SENATOR HARRY S. NEW.

Mr. HARRIS. Mr. President, I ask permission to have printed in the RECORD, in the regular RECORD type, part of an editorial from the Indianapolis News, one of the leading papers

in the country, which is published in the home city of the junior Senator from Indiana [Mr. NEW]. It shows that the people among whom he has lived, who know him best, esteem him highest. It would be difficult to find two men who differ more widely in their political views than the Senator from Indiana and myself; but I have served with him on the Committee on Territories and Insular Possessions, of which he is chairman, and I know how conscientious and able he has been in the discharge of his duties. No Member of this body has given more attention to the many difficult questions coming before the Senate.

Although I and my Democratic colleagues may have differed with him on many public questions, he has the respect and confidence of us all, regardless of party.

The VICE PRESIDENT. Without objection, the article presented by the Senator from Georgia will be printed in the RECORD as requested.

The article is as follows:

[From the Indianapolis News.]

HARRY S. NEW.

The defeat of Senator NEW in Tuesday's primary will occasion sorrow to many people, for few men have been blessed with as many true friends. Unlike Senators Beveridge and WATSON, Senator NEW is not a showy man, yet he won men to intimacy as neither of them could do. Whether at home in Indiana or among his colleagues in Washington, he made friends and held them. A new man in the Senate, he was called to the two very important committees of Foreign Relations and Military Affairs. The President made him his close friend and his colleagues valued him for his sturdy honesty, good sense, and devotion to the public service. Nor did he ever forget his duty to his constituents. He will leave Washington regretted by a host of friends, but he will return to his home with a welcome that few men could call forth.

PETITIONS AND MEMORIALS.

Mr. DILLINGHAM presented a memorial of sundry citizens of Rutland, Vt., remonstrating against the enactment of legislation providing for compulsory Sunday observance in the District of Columbia, which was referred to the Committee on the District of Columbia.

He also presented a memorial of sundry citizens of Strafford, South Strafford, Norwich, Thetford, and Thetford Center, all in the State of Vermont, remonstrating against the enactment of Senate bill 2747, the so-called McNary cooperative reclamation bill, which was referred to the Committee on Irrigation and Reclamation.

Mr. MYERS presented a memorial of sundry citizens of Hamilton, Mont., remonstrating against the enactment of legislation providing for Sunday observance in the District of Columbia, which was referred to the Committee on the District of Columbia.

He also presented petitions of sundry citizens of Fairfield, Power, and of the Little Bitter Root Valley, all in the State of Montana, praying for the enactment of legislation reviving the United States Grain Corporation so as to stabilize prices of certain farm products, which were referred to the Committee on Agriculture and Forestry.

Mr. WILLIS presented petitions of George A. Hoffman and sundry other citizens of Haskins, Ira E. Shook and sundry other citizens of Stony Ridge, and W. B. Mowrey and sundry other citizens of Delphos, and also sundry other citizens, all in the State of Ohio, praying for the imposition of a tariff duty of $2 per hundred pounds on imported Cuban sugar, which were referred to the Committee on Finance.

Mr. LODGE presented the following concurrent resolution of the Legislature of Massachusetts, which was referred to the Committee on the Judiciary:

THE COMMONWEALTH OF MASSACHUSETTS,
In the year one thousand nine hundred and twenty-two.

Resolutions urging the United States Senate to pass legislation to make mob murder and lynching a crime against the Federal Government.

Whereas the public record shows that approximately 4,000 persons have been lynched by lawless mobs in our Republic in the last 40 years; and

Whereas national repute among the nations of the world requires that an end be put to this practice of mob murder and lynching in the United States; and

Whereas local and State laws and administration have failed to end these mob murders and lynchings; and

Whereas this practice ruthlessly deprives citizens of life and property without due process of law and unchecked tends to undermine respect for law and the very foundations of government: Therefore be it

Resolved, That the general court of Massachusetts respectfully urges upon the United States Senate and its Judiciary Committee the speedy enactment of the Dyer antilynching bill, so called, already passed by the House of Representatives by an overwhelming majority, and designed to end lynching by making mob murder a crime against the Federal Government: And be it further

Resolved, That copies of these resolutions be sent by the secretary of the Commonwealth to the President of the United States, to the Presiding Officer of the United States Senate, to the Members of the Senate from this Commonwealth, and to the chairman of the Judiciary Committee of the United States Senate.

In house of representatives adopted May 1, 1922.
In senate adopted in concurrence May 3, 1922.
A true copy. Attest:

F. W. COOK,
Secretary of the Commonwealth.

REPORT OF COMMITTEE ON PUBLIC LANDS AND SURVEYS.

Mr. NORBECK, from the Committee on Public Lands and Surveys, to which was refered the bill (S. 3425) to continue the land offices at Belle Fourche, Timber Lake, and Lemmon, in the State of South Dakota, and for other purposes, reported it with amendments and submitted a report (No. 698) thereon.

BILL INTRODUCED.

A bill was introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. BURSUM:

A bill (S. 3579) granting a pension to Maria L. de Baca; to the Committee on Pensions.

FINANCIAL AFFAIRS IN HAITI.

Mr. KING. I ask unanimous consent to submit a resolution, which is quite important, dealing with the Haitian situation and the question of a loan. I ask that it be printed and lie upon the table.

The resolution (S. Res. 288) was ordered to lie on the table and to be printed, as follows:

Whereas the Senate on July 27, 1921, by Senate Resolution 112 authorized and directed a special committee to investigate the affairs of the Haitian Government and all questions affecting the relations between the United States and Haiti; and

Whereas an investigation of the aforesaid matters has been made by said committee; and

Whereas the report of said committee is now in process of preparation, which report will undoubtedly make recommendations as to the future policy of the United States in the premises; and

Whereas it is inadvisable that any further commitments of a financial character be made by the Haitian Government under the direction or advice and approval of the United States until the Senate shall receive and consider the report of said committee and shall determine, in conjunction with the House of Representatives and the President, the future policy of the United States in the premises: Now, therefore, be it

Resolved, That it is the sense of the Senate that pending the receipt and consideration of the report of said committee no loan or issue of bonds be made by the Haitian Government under the direction and advice of representatives of the United States, and the President of the United States is hereby respectfully requested to direct the financial adviser of the Haitian Government and the receiver of customs to withhold taking any action for the consummation of a new loan to the Haitian Government, or the issue of Haitian bonds, until such time as the report of said committee shall have been received and considered by the Senate and the executive department of the Government.

THE TARIFF.

The VICE PRESIDENT. The unfinished business, House bill 7456, will be proceeded with.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 7456) to provide revenue, to regulate commerce with foreign countries, to encourage the industries of the United States, and for other purposes.

The VICE PRESIDENT. The Secretary will state the pending amendment.

The ASSISTANT SECRETARY. The pending amendment reported by the Committee on Finance is, on page 3, line 1, after the words "gallic acid," to insert "8 cents per pound."

The VICE PRESIDENT. The question is on agreeing to the amendment of the committee.

Mr. SIMMONS obtained the floor.

Mr. SPENCER. Mr. President, will the Senator from North Carolina be kind enough to allow me to send to the desk an amendment which I desire to offer to the pending amendment of the committee with reference to gallic acid?

Mr. SIMMONS. I yield to the Senator from Missouri for that purpose.

Mr. SPENCER. I offer the amendment which I send to the desk, so that it may be before the Senate for consideration.

The VICE PRESIDENT. The amendment to the amendment will be stated.

The ASSISTANT SECRETARY. In lieu of the amendment of the committee on page 3, line 1, to insert "8 cents a pound," it is proposed to insert "25 per cent ad valorem," so as to read:

Gallic acid, 25 per cent ad valorem.

Mr. SIMMONS. Mr. President, I am in receipt of a letter from the Senator from Missouri [Mr. REED], who is now in Missouri, inclosing a petition with reference to certain items in the tariff bill. I understand he desires me to present the petition and to call it to the attention of the Senate, as well as of the Finance Committee. The petition, as I shall show, is signed by practically all the producers in this country of the article to which it refers, namely, harvest hats. On har-

vest hats valued at less than $3 per dozen the duty has been raised by the Senate committee from the House rate of 20 per cent to 30 per cent ad valorem. I am not making any statement myself about the matter, because I have not investigated this item, but the petition states:

These hats are used by the farmers and the poorer classes of people exclusively, and do not compete with any hats manufactured in the United States.

The members of the Ways and Means Committee were besought to rewrite the hat paragraph, giving these cheap hats a lower rate than felts, fine straws, and Panama. The present rating is 25 per cent, and on account of these harvest hats being hats for the farmers and the poorer class the paragraph was divided and these were rated at 20 per cent. The Senate now raises the rate to 30 per cent.

That petition, Mr. President, is not signed by the farmers who use these hats and the poorer classes of people, but it is signed by the following manufacturing concerns: Caradine Harvest Hat Co., by its president; International Harvest Hat Co., by its treasurer; Mexican American Hat Co., by its vice president; Black Harvest Hat Co., by its president; Langenberg Hat Co.; Superior Hat Co.; Commonwealth Harvest Hat Co., by Fred Foley; White-Branch Shelton Hat Co., by L. O. Branch, president; Harris-Polk Hat Co., by its president; Shelton Panama Hat Co., by Richard T. Shelton; and Rothschild Bros. Hat Co., by one of its officers.

Mr. President, I have not investigated this item, but I am glad to comply with what I understand to be the wish of the Senator from Missouri. I desire not only to incorporate, without further reading, this petition in the RECORD as a part of my remarks, but I wish especially to call the attention of the Finance Committee to it.

There being no objection, the petition was ordered to be inserted in the RECORD, as follows:

ST. LOUIS, MO., *May 5, 1922.*

Senator JAMES A. REED,
Washington, D. C.

DEAR SIR: Paragraph 1405 (H. R. 7456), lines 13 and 14, rewritten by the Senate. Paragraph 1406, lines 10 and 11.

Harvest hats, valued at $3 per dozen or less, have been raised by the Senate to 30 per cent, against 20 per cent, as rated by the House.

These hats are used by the farming and poor class exclusively and do not compare with any hats manufactured in the United States.

These hats are manufactured from body hats, which are handmade by the natives of foreign countries.

We requested the Ways and Means Committee to rewrite the hat paragraph, giving these cheap hats a lower rating than felts, fine straws, and Panamas. The present rating is 25 per cent, and on account of their being hats for the poorer and farm class, the paragraph was divided and these were rated at 20 per cent. The Senate now raises it to 30 per cent.

We believe that 75 per cent of these hats are blocked and trimmed and marketed from St. Louis and can conceive of no opposition from any direction to this rate being restored, especially since it is a very direct benefit to the farmer and poor class of our land.

Also in order to clarify the real meaning of the sentence in the paragraph as rewritten, please have inserted between the words "Harvest hats" and "valued," on line 14 in the House bill, these words: "Composed wholly or in chief value of any of the foregoing materials." Eliminating the word "straw," in line 13. This correction likewise should be made in Senate paragraph 1406, in lines 10 and 11, and the word "straw" eliminated in the tenth line. Copy of paragraph as we would like it attached.

Will you please be kind enough to get in touch with the committee and, if possible, secure the restoration of the 20 per cent, as allowed by the Ways and Means Committee?

There appears no reason why the farm hand should be penalized, when the manufacturers ask for no tariff protection.

Respectfully submitted for your earnest consideration.

Mr. SMOOT. Mr. President, if the Senator from North Carolina contemplates answering the letter of the Senator from Missouri [Mr. REED], I suggest that he advise the Senator from Missouri that the rate provided by the Senate committee is lower than the House rate.

Mr. SIMMONS. That is, upon the idea that the Senate committee rate is based upon the foreign valuation, while the House rate is based on American valuation?

Mr. SMOOT. Yes.

Mr. SIMMONS. I expected that answer from the Senator. This petition, however, Mr. President, suggests that the hats referred to ought to be on the free list. They are not manufactured in this country, and are used only by farmers in harvest time and by the poorer classes of people when they are at work in the fields. As the duty has not been asked for by any of the manufacturers of straw hats in this country, it is more than likely that the duty is asked by those who produce other kinds of hats and do not want any cheap hats to come into this market to displace their products.

There are many similar instances in this bill where the duty is asked not by those who manufacture the article but by those who manufacture some other article of like kind but higher in price, and they ask for a duty for the purpose of excluding another product which might be purchased by some class of our population, so as to make it possible for the manufacturers to force that class of people, whether they are able to buy their product or not, to buy it anyhow, because they can not get something cheaper in price. That is particularly true, Mr. President, with reference to silks. The pongee silks of China and the Habutai silks of Japan are the products of wild silk. They are not manufactured in this country; they are rather cheap silks, not produced in this country at all; but the silk manufacturers in this country, finding that these cheaper articles which are purchased by the poorer classes of people displace their own goods, have an idea that if they can exclude pongee and Habutai silks it will make more customers for their silks—higher-priced silks—and that they can force the poorer people, although they prefer the cheaper article and are absolutely content with it, to buy the more expensive products.

Mr. President, in order that it may be made clear that the protests against this proposed tariff legislation do not come altogether from the consumers, do not come altogether from those who differ with the other side in politics, that the protests are not made for partisan purposes, but that they are based upon the honest conviction of the people of the United States, who are to-day in revolt against this measure, regardless of whether they belong to the Democratic Party or the Republican Party, and regardless of whether they are consumers or producers of protected products, I wish to read an editorial from the Chicago Tribune. I ask any Republican Senator here from the West whether there is any question about the Chicago Tribune being an orthodox Republican paper of large circulation throughout the entire Middle West? I am not a reader of that paper, but my information is that it is a Republican newspaper of unquestioned loyalty to the Republican Party, and that it always takes Republican medicine willingly so long as that party does not insist on making the dose altogether too nauseating to be swallowed. Even the Tribune's stomach is in revolt against the tariff dose that is now offered. I am going to read the Tribune editorial myself. It was printed in the Chicago Sunday Tribune of May 7. It is short, and reads as follows:

ADVICE TO TARIFF FILIBUSTERS.

The news from Washington that a Democratic filibuster is planned to delay passage of the permanent tariff bill until the next session of Congress leaves us more calm than filibusters usually do. The filibuster is bad in principle. It is a technical evasion of an issue, a refusal to allow a decision to be made upon its merits. It is subterfuge.

But the complications in the tariff bill now before the Senate are such that a long debate would be certain at best, and if the filibustering Senators really study the issues and say something in their speeches to clarify the measure an extended debate will not be an unmixed evil. Every hour's study of the bill, even by a layman, reveals some point of such remarkable possibilities for evil and injustice as to cast doubt upon the value of the bill as a whole.

The potash tariff, the wool schedule, and the sugar schedule have in them such potential backlashes. Aluminum provides a startling illustration. The bill provides a specific duty of 5 cents a pound on aluminum and 15 cents a pound on sheets, bars, plates, etc.

Other clauses would add a duty of 60 per cent to this specific rate, making a total duty of about 70 per cent on aluminum products. This protection is provided despite the fact that under the existing rates of 20.4 per cent aluminum manufacturers have built up a tremendous and profitable business in this country with raw materials which can be produced here probably more cheaply than any place in the world. With the 20.4 per cent duty our aluminum manufacturers have held foreign competition down to imports estimated at about three one-hundredths of home production. That should make it clear that an added duty of 50 per cent is not needed for protection, but can be used to enable the aluminum men to charge almost any price they wish for their products here.

Mr. President, I call attention to this statement:

It is a magnificent gift to the industry—

This is a Republican paper talking now—

which will be taken out of the pockets of American consumers.

Such features illustrate the log-rolling methods used in the preparation of this bill.

I have heretofore elaborated upon those methods.

They should be ferreted out and exposed.

That is what we are trying to do. We are trying to do it in an intelligent way, too.

They make the bill dangerous.

That is what we have said.

They illustrate the need of formulating a tariff on broad nonpartisan lines, with scientific exactness which will differentiate between exploitation of American consumers and protection of American industries.

Mr. President, the question that we are discussing now is not an issue between low tariff and protection. This is an issue between a just, fair, and honest effort at real protection—and we all recognize that this bill is going to be framed upon protective lines—and an exploitation of the American people by means of the pending bill. That is the issue we are discussing here to-day, stated splendidly by this paper, this great Republican organ, the Chicago Tribune.

Let the filibuster take up the subject from this viewpoint and it will have popular support, even though it will have the opposition of aluminum makers, and potash makers, and beet-sugar growers, and others who have obtained high protective duties regardless of their effect upon consumers and upon American commerce.

Mr. President, that sounds very much like some of the speeches we have been making here on this side of the Chamber. Upon every essential point that we have made here in our attacks upon this bill this great Republican organ of the West, in this editorial that I have read, expresses itself in hearty accord with our position.

But, Mr. President, I want to read from another great newspaper. I think nobody will say that it is an organ of the free traders. Nobody will say that it usually speaks for the poor consumers in this country who are to be the victims of this bill as it is now written. On the other hand, nobody will doubt that this paper not only represents but that it speaks for big business in this country. It speaks for the great moneyed interests of this country. It speaks for the great protected manufacturing interests of this country, and it not only does this but it stands out as the most conspicuous organ representing those great monopolized financial and industrial interests of our country. I have reference to the New York Journal of Commerce. This is taken from its issue of May 6:

Senator P. J. McCUMBER, in a fit of despondency, told his colleagues, according to report, that at the present rate of progress it might be 1946 before the new tariff bill would be adopted. The estimate may or may not be an accurate one. Doubtless, with the present majority in the Senate methods of "speeding up" can and will be resorted to, but the slowness of the advance that is being made (boric acid being the item under consideration at last account) has a meaning. This is that the country as a whole has been hopelessly hostile to the tariff bill as now framed.

Not the Democratic part of the country, not the poor farmer and laboring man who does not produce these protected products, but the people of the whole country, including everybody except these special interests that came up here and asked for these duties, including many of these special interests that did not have the hardihood or the effrontery to demand more of "protection" than they have now. It is certainly high time for the plain people of the United States to be alarmed and to make their protests felt when the Republican majority write a "protective" tariff that is so bad as to be severely condemned by the New York Journal of Commerce.

Let me proceed. I quote:

It would be mere conjecture to say whether Senators are in the habit of reading the newspaper press of the country—

I want right here and now to commend this editorial to our friends on the other side, who are driving with whip and spur, with such indecent haste, to secure the passage of this bill before it can be adequately explained and discussed.

Mr. KELLOGG. Mr. President——

The PRESIDING OFFICER (Mr. JONES of Washington in the chair). Does the Senator from North Carolina yield to the Senator from Minnesota?

Mr. SIMMONS. I do not wish to be interrupted in reading from this splendid organ of the protected and the money interests of the country. It would be impious to interrupt the reading of this condemnation by this great organ of the big business interests of the country with anything of less importance than the matter it is discussing.

I repeat:

It would be mere conjecture to say whether Senators are in the habit of reading the newspaper press of the country or whether they are influenced by it when they have read it. Some of them are often great readers of the "home town" sheets and not of much else.

What I started to suggest a little while ago to our friends on the other side was that if they would read the great metropolitan papers upon this bill their eyes would be opened.

Mr. SMOOT. Mr. President——

Mr. SIMMONS. I said I did not want to be interrupted in this reading.

The PRESIDING OFFICER. The Senator declines to yield.

Mr. SIMMONS. When I get through I shall be glad to yield. This is too good to be marred by any digression.

Mr. SMOOT. Mr. President——

The PRESIDING OFFICER. The Senator declines to yield.

Mr. SIMMONS. I can not yield. This is too sacred a thing, or ought to be, to the Republican side of the Chamber.

Mr. SMOOT. I simply want the Senator to remember that he is quoting from this paper.

Mr. SIMMONS (reading):

But even this limited form of reading must have convinced them that the tariff is anything but satisfactory to the different localities affected by it. A casual perusal of representative examples of the press of the United States shows, in fact, that there has never been a tariff bill that excited so much and such general condemnation and received so little praise. To those legislators who read more widely, either in the "home-town papers" of other Senators or in publications of a more general circulation, it must be clear that the whole project is a failure.

Yet there are plenty of legislators who refuse to accept newspaper opinion—except, of course, when it chimes with their own ideas or prejudices. To all such may be commended the fact that manufacturers in large numbers, and among them many influential names, are opposed to the tariff bill. This is true of the woolen, cotton, and other textiles, of boots and shoes and leather, of steel and iron, of chemicals and drugs, and of multitudinous other products.

The manufacturers of these basic products, cotton and woolen textiles, boots and shoes and leather, iron and steel, and chemicals—do not they constitute the basic industries of this country? The manufacturers of these things, says this great organ of Wall Street, are opposed to this bill, and those manufacturers are headed, it says, by men of great name and fame in this country.

Naturally, not all are in this position of hostility. But there are influential factors in each of these trades, and in some a considerable number of them, who regard this tariff as absolutely destructive to industry.

Not only these great basic industries but many others, says this great organ of the money power and the protected tariff barons of this country, regard this bill as absolutely destructive to industry. They could not use a broader term than that. What industry do they refer to? Why, they are speaking of their industries, to their own industries, as well as the general industry of the country. I quote again:

It is obviously not because of their own private interests—

Listen to that, Senators—

that they thus testify but because of the fact that experience has shown them about what must be expected from certain types of duty. The tariff is a poor job from its own point of view.

Meaning the tariff bill, of course.

It is unworkmanlike, unskillful, apparently made by neophytes and amateurs.

There were some amateurs on that committee, some gentlemen who had just got there, and who got there late. But after they got there they compelled a rewriting of the schedules as they affected the industries of their States, so I am told, and in some instances no industry in their States was allowed to pass without receiving with it a big, unconscionable duty. The neophytes and amateurs on that committee seem to have overpowered the old guard on the committee. I have no doubt from what I have heard that they exerted a vastly greater influence in the fixing of these rates than such veterans as my good friend from Utah [Mr. SMOOT]. I have no doubt that there are many, many duties carried in this bill which do not receive and did not receive the approval of his judgment.

Let me repeat that last quotation; it is good. I quote:

It is unworkmanlike, unskillful, apparently made by neophytes and amateurs, and will cause corresponding trouble. It is out of harmony with itself.

That is what we have been saying. The bill is absolutely out of harmony with itself and out of harmony with every principle of justice and equity. It is even out of harmony with the declared protection policy of the Republican Party.

Mr. McCUMBER. Mr. President, does the article give the name of the expert who writes on that subject?

Mr. SIMMONS. I suppose the writer on this subject is the editor of that paper. This is an editorial. I suppose it was written by the editor, and if there is an expert with reference to what affects the big interests of this country, injuriously or for good, from the standpoint of the protected interests in this country, it is the editor of this journal, the New York Journal of Commerce. I wish there were more editors in this country who would read this tariff and understand this tariff and discuss it as the editor of the Chicago Tribune, another great Republican paper, has studied it and understands it and discusses it.

Mr. McCUMBER. Will the Senator tell us what this expert's name is?

Mr. SIMMONS. I am not a reader of the New York Journal of Commerce. It does not usually reflect my sentiments, either politically or economically. It does not represent the class of people I represent. I represent the mass of the people of my State, and the bulk of them are farmers and laborers. I represent as well the honest industries of my State, which, while

growing large in many instances, have nevertheless remained honest. I think this paper represents chiefly the great moneyed interests of the United States and the great monopolized industrial interests of the country.

Mr. KING. If my colleague will yield, Mr. Brown is the editor of the paper, and is a very able political economist.

Mr. SMOOT. Will the Senator from North Carolina yield?

Mr. SIMMONS. I do not yield. The Senator from North Dakota, who interrupted me, did it without my consent, because this is also a very solemn matter I am reading now. It is a very solemn utterance. It comes from one whom you thought you had the right to expect would be standing with you and praising you.

Mr. SMOOT. I hope the Senator will follow his advice in some of the other matters, too.

Mr. SIMMONS. But you shock and terrify even Mr. Brown, and instead of standing with you and praising you in this instance he says, "That is impossible; I can not do it. What you are attempting to do will be absolutely destructive to the industries of this country, and I can not follow you in your course, much as I would like to." That is substantially what this editorial says. I read again:

One does not have to be a free trader or low-tariff man—

Few manufacturers are—

to find out that the proposed bill is a botch and a menace to industry.

How do you like that, Senators? I am sure the majority members of the Finance Committee will not believe that I would talk about them in that way. I have not said that their bill was a botch. I have not said it was the work of neophytes and amateurs. I do not think I have ever said in this Chamber that it would absolutely destroy industry, but this editorial says:

The bill is a botch and a menace to industry. This is why business opinion is so antagonistic to it.

You Senators sitting over on the other side, having your private meetings every morning in the Finance Committee, absorbing all of your time in the consideration of these little schedules and these high rates you have here prepared for the American people, do not have time to read these newspapers. I am sure you do not read these papers. If you read them you would bring in another bill not quite so destructive, perhaps, of the interests of the people of the United States. If you would only do that there might still be some hope for the people of the United States, not the farmers and the laboring people alone, but the industries of America, which this great paper says are about to be destroyed. I read again:

This is why business opinion is so antagonistic to it.

"It" in this editorial means this bill as you have amended and brought it to the Senate.

Senators know that such is the case.

Of course, those of us who do not spend all of our time fooling with these duties, trying to patch them up, know. I excuse you gentlemen on the other side for these morning sessions, which the Senator from North Dakota spoke about yesterday, sessions of the committee from 9 o'clock until 11 o'clock, studying this bill. I think it requires study, Senators. I think you have brought it in here without due study, and I think you are right to study it. You ought to take it up every morning and you ought to work upon it, because it is a botch, it is a makeshift, and it needs work, it needs constant, unremitting work in repairment in trying to whip it into some sort of workable form.

I read on:

Senators know that such is the case, and they are, perforce, voicing the objection of their constituents.

He is referring now to Senators on this side and to Senators on the other side who are opposing it. He is referring to us. We have been studying it. Its terms forced us to study it. He continues—

and they are, perforce, voicing the objection of their constituents, while others have adopted a Fabian policy and are waiting for something to help in modifying the rates.

If it were left to a plebiscite either of manufacturers, exporters, importers, consumers, or of any and all of these classes combined, the tariff would not merely be deferred to 1946, but it would never pass.

This newspaper evidently thinks that this bill, if not changed materially, should not be passed before 1946, and, indeed, ought never to be passed, now or at any other time.

Listen to this, Senators:

It represents simply the combined political jobbery that hangs over from the presidential campaign. This is why so little enthusiasm is felt for it. But the trouble is that as the tariff is studied more and more, it becomes plainer that to pass the bill will be a terribly costly experiment for the ruling party.

This is growing more evident as the days pass, and naturally causes anxiety among politicians. They had reconciled themselves to the thought of a considerable loss of votes—

Oh, yes; I think everybody concedes that that is inevitable. I read on—

which was to be charged off to election-cost account. It now looks as if their action might involve an impairment of the capital assets of the party, with possible bankruptcy as a result. It is rather late to make a change of policy, but if the party managers are wise they will "pigeonhole" this tariff until they can revise it and eliminate the oppression—

Listen to this—

the oppression, wrong, and thievery with which it is now crammed to repletion.

I have not used that language. I have not said that it was thievery. I have said nothing about this bill as bad as this editor has said about it in this great organ, which generally is solidly behind the Republican Party, especially solidly behind its tariff policies and its tariff legislation.

Under the guise of writing a bill for protection, this paper realizes, as this side realizes, that the majority members of the committee have written a bill not for protection but for exploitation. That is the issue we make with you here. We know you are going to enact a protective tariff bill. If your duties were laid upon a protective basis, measuring the difference in the cost of production here and abroad, we would recognize your right, inasmuch as you constitute the majority here, to pass this bill and pass it speedily. We would disapprove of your policy but would for the present perforce be resigned to it. But that is not the kind of bill you have brought here. You have brought us a monstrosity—an outrage—a bill based on the principle of the exploitation of the consuming masses of this country and of the maintenance of the present high prices of the profiteers; and we serve notice on you that we will fight it and discuss it until we shall have made clear these provisions which this great organ of protection declares are thievery as well as wrong and oppressive.

Mr. President, we are to have night sessions. I shall make no objection. We need time to discuss this bill. We want it passed in good time before the election, if it is to be enacted at all, because if it must become a law we want it to go into effect a reasonable time before the election so that it may, as it undoubtedly will, demonstrate the truth of every charge we have made against it. And yet our duty to the American people demands that we discuss it fully and expose its iniquities; and we are glad, if you gentlemen desire it, to have an opportunity for fuller discussion by means of night sessions.

Mr. McCUMBER obtained the floor.

Mr. SMOOT. Mr. President——

Mr. McCUMBER. I yield to the Senator from Utah.

Mr. SMOOT. May I ask the Senator from North Carolina a question before he leaves the Chamber? The Senator quoted from the Journal of Commerce, of New York, on rates, but no specific rates. Does the Senator take the same position in the matter of criticism that that paper has taken upon the schedules in this bill with reference to farmers' products?

Mr. SIMMONS. I do not know whether the paper I have just read gives the rate correctly. I have not made the necessary investigation to speak as to that.

Mr. SMOOT. But does the Senator believe that the criticism offered by the Journal of Commerce as to the rates of which he has spoken this morning should apply to all of the rates on farm products in the bill?

Mr. SIMMONS. I will say to the Senator that there are a great many, and they include most of the rates on farm products, that are mere frauds and will not yield a dollar of revenue. There are some of them that will. Many of those that will, I will say to the Senator, are outrageously high and ought to be reduced. I will stand for your passing a bill that carries reasonable rates, but some of your duties on agricultural products are just as obnoxious to me from the standpoint of excessiveness as are the rates here mentioned.

Mr. SMOOT. But the Senator has not yet answered my question. The Senator relies upon the editor of the Journal of Commerce for criticism of the bill generally as being a vicious bill.

Mr. SIMMONS. I read his criticism. I will make and have made my own.

Mr. SMOOT. The Senator read it for the information of the Senate?

Mr. SIMMONS. Yes; it is one of your papers.

Mr. SMOOT. The Senator would not have read it unless he approved of it. He wanted the country to understand that that was the position this paper takes, and he also wanted the Senate to understand that it was a matter of which he approved.

Mr. SIMMONS. No; there are some of these things so harsh that I would not have said them.

Mr. SMOOT. The Senator would not have said them, but he approved of them by reading them, and several times during

his speech he said it was so wonderfully true and so wonderfully fine that he could not be interrupted.

This same Journal of Commerce has criticized the rates in the bill on farm products for which I know the Senator will eventually vote.

Mr. SIMMONS. The Senator does not know what I am going to vote for, I will say to the Senator.

Mr. SMOOT. We will see that he has a chance to vote for them.

Mr. SIMMONS. The Senator should understand positively that I will vote for no duty on farm products or anything else in the world that I believe is excessive. I want the Senator to understand that. I do not care whether it is a farm product produced in my own State or some other State, I will not vote for any duty contained in this bill which I think is excessive, from the standpoint of the doctrine of my party. Now, the Senator has my position on the matter.

Mr. SMOOT. We will find before we get through the bill that the Senator will be voting for rates which this same Journal of Commerce has condemned. I say it now, and I believe the RECORD will show it before we get through. The Senator from North Carolina will vote for rates in the bill which this same Journal of Commerce has condemned and yet he now quotes it as a wonderful exhibition of criticism that should be offered against the bill.

Mr. SIMMONS. I should have expected the editor of the Journal of Commerce to object to tariff rates that would be in the interest of the farmer. I should have expected that from him, but I did not expect, in view of the fact that he is such an orthodox Republican, such an orthodox protectionist, that he would talk this way about the duties upon the manufactured products and about the tariff bill that the Republican Party proposes for enactment.

Mr. SMOOT. There are very few papers in New York that are orthodox protectionists. New York is an importing city. Business there is largely built upon the importation of goods from foreign countries, and these papers are kept up largely by the advertisements of the great importers, who through their advertisements distribute these goods throughout the country.

Mr. McCUMBER. Mr. President, I yield the floor to the Senator from Utah and the Senator from North Carolina.

Mr. SIMMONS. I simply wish to state that I recognize that New York is a great importing point and there are a great many importers there, but in the great city of New York there reside the heads, the managers, and the owners of practically every big industry in the country. There is not a trust in America that has not its head office in the city of New York. There is scarcely a great manufacturing industry in the country that is not owned chiefly or in part by men who live in New York and who have that as their place of business.

Mr. McCUMBER. Mr. President, the Senator from North Carolina has thrown down the gage of battle with the practical intimation that Senators upon that side of the Chamber propose to filibuster this bill to death if it is possible to do so.

Mr. SIMMONS. Mr. President——

Mr. McCUMBER. I do not yield to the Senator.

Mr. SIMMONS. I have said——

Mr. McCUMBER. I do not yield.

Mr. SIMMONS. Mr. President——

Mr. McCUMBER. Mr. President, I do not yield. The Senator from North Carolina declined to yield to me upon this question.

Mr. SIMMONS. Mr. President——

Mr. McCUMBER. I do not yield to the Senator.

Mr. SIMMONS. I do not object——

Mr. McCUMBER. No; the Senator will not make me yield. We will accept that gage of battle. We will accept it calmly. We will not shriek to the top of our voices in announcing that we will accept it, but we will accept it with a calm and determined effort to prevent it if possible.

I regret that the Senate of the United States has failed in all these years to adopt such rules as will allow it to do the business of the country. I have been in the minority in the belief that we should have a cloture rule and that we should have a rule that would compel Senators to speak to the subject under consideration. We have neither of those rules, and there is nothing left to do but to labor during the long hours of the day and the long hours of the night until Senators will agree to vote upon the measures that are presented for the consideration of the Senate.

Now, Mr. President, I have little to say upon the subject of the papers from which the Senator from North Carolina has quoted. The policies of practically all of the great metropolitan papers of the country are governed by the counting rooms. If the great department stores do not own stock in the great metropolitan press of the country, they are their customers, and, through the advertising medium, control the policy of those papers. From the time of the introduction of the great department stores of the country until the present time these papers have gradually become their mouthpieces in favor of practically free trade, or at least a very low tariff.

Every one of these great department establishments is an importer. I would to heaven that the American consumer could compare the price which these stores pay for the things which they import with the price they charge the consumer. Any little profit that may be made by the producer in this country would sink into insignificance compared with the enormous profit that is measured between the importer's purchase price and the selling price of the same commodities in these great stores whose representatives are damning every effort to keep alive the American producer.

Ninety per cent of the products consumed in the United States are produced in the United States. We want to continue to produce them in this country. We believe that by this bill we will assist in keeping the industries of the United States of America in operation, and, Mr. President, I do not believe, no matter how vicious the assaults may be, that we are going to surrender the interests of the producing nine-tenths of the American people for the interests of the importing one-tenth.

Mr. President, to give an illustration of the condemnation that was heard by this portion of the American press, let me say that the committee had before it only a little while ago some razors imported from a foreign country to be sold to the consumer in the United States. Each razor was in its own case and on the cover of the case was marked "Three dollars." That meant that the razor was retailed for $3, or $36 a dozen. What was the cost of it, according to the invoice? Fifty-nine cents a dozen, or 5 cents apiece, and sold for $36 a dozen, or $3 apiece.

I had exhibited to me the other day a watch with a Swiss movement, manufactured in a foreign country, gold filled, warranted for 20 years, with 10 jewels, so it stated. What could it be bought for in one of the stores here? Perhaps $15 to $25. What was the invoice price of that watch? Sixty cents! Do you wonder that they want to continue this opportunity to buy a watch for 60 cents and sell it for $25?

I can pick up article after article that is being imported and that will show 100 per cent profit to 1,000 per cent. The Senator from New York [Mr. WADSWORTH] just now shows me the very watch of which I have been speaking—a fine watch, 10 jewels. I do not know whether it is worth 10 cents or $10, but I imagine it is not a very valuable watch if it will sell for 60 cents, if that was the honest price.

Now, I know that the metropolitan press of the country represent the importers. They speak the sentiments of the importers. I know their power throughout the country. But, Mr. President, I know that we went before the country in 1920 upon the issue whether we should give protection to the American producer, and a sufficient protection to enable him to pay the wages which would enable the American laborer to pay the rent that he must pay and maintain an American standard of living. We have tried to draw the bill along those lines.

We have had to draw the bill under difficulties. The difficulties grow out of the rapid changes in values all over the world. We have presented the best bill that could be drafted, in my opinion, to meet the present conditions. We know that there will be changes in values, and as those changes shall occur we have provided a means by which the tariff may be lowered or raised upon any commodity, with but one purpose in view, and that is honest competition between the foreign importer and the American producer. That is all we have done. We will take the consequences, if the Republican Party is to be punished for doing that which the people asked it to do. I expect to hear condemnation from the other side; I expect to have them kill all the time they possibly can. We must meet the situation; but some day there will arise such a protest from the country against filibustering that both the Republicans and the Democrats will join together to adopt rules that will enable the Senate of the United States to do business.

The adoption of such rules will not be a party measure, but it will be a measure that will come from the heart of the people and will be reflected in the votes on both sides of the Chamber.

Mr. President, I do not desire to discuss that subject any further than to say that we accept the issue; we shall do the best we can to put the bill through; and if Senators on the other side want to talk against time, day and night, we shall have to do the best we can to allow them to do that.

Mr. President, in order to avoid any delay in the vote on one of the pending items on yesterday I did forego my purpose to reply briefly to one of the suggestions made by the junior Sena-

tor from Utah [Mr. KING]. Sometimes in a running debate Senators are very likely to misunderstand each other. On yesterday we were discussing chemicals. I insisted that we were not exporting any great amount of chemicals from this country to Germany. The Senator from Nebraska [Mr. HITCHCOCK] then said:

Mr. HITCHCOCK. Then, is it the purpose to shut out chemical imports from Germany? Is that the purpose of the duties proposed in the chemical schedule?

Mr. MCCUMBER. No; I do not think the rate of duty will shut out imports at all.

Mr. HITCHCOCK. Does the Senator accept the figures given by the Senator from Utah [Mr. KING] yesterday, which show that at the present time we are selling to Germany more chemicals than we are purchasing from her?

Mr. MCCUMBER. No; I do not accept that as a condition that is at all lasting. We know something about the cheap labor and the cheap production of chemicals in Germany, and I believe that a 25 per cent ad valorem duty or an equivalent specific duty will not keep out the German article.

Again, the junior Senator from Utah [Mr. KING] said:

Just a word in regard to the suggestion made by the Senator from Nebraska [Mr. HITCHCOCK]. The Senator from North Dakota stated that we were not shipping many articles to Germany.

The Senator from Utah made a mistake there. I did not state that we were not shipping "many articles," but I said that we were not shipping very many chemicals into Germany, or words to that effect.

Again, the junior Senator from Utah [Mr. KING] said:

The Senator from Nebraska asked him whether he accepted the tables which I placed in the RECORD a day or two ago, and which appear in this morning's RECORD, as to the exports for 1921 under the chemical schedule from this country to Germany and the imports from Germany to this country for the same year. The Senator did not answer the question, if I correctly interpreted his reply. I am sure he did not mean to dispute these tables.

I answered:

Mr. President, I did not mean to say that we never exported a dollar's worth to Germany, or anything of that kind. I simply intended to make a general statement that our export of chemicals to Germany will be practically negligible. There may be a time before she can start her factories again, when she may demand certain chemicals for a short time, but there is no question but that Germany can produce practically all the chemicals we can produce, and she can produce them very much cheaper than it is possible for us to produce them. I make that as a general statement.

Mr. President, the senior Senator from Utah [Mr. SMOOT] has already called attention to the fact of the $29,000,000, nearly $30,000,000, worth of exports sold to Germany in 1921, of which nearly $18,000,000 worth was mineral oil, which Germany does not produce, and which, as the Senator stated, is on the free list. I think that is really more a mineral than a chemical, although the junior Senator from Utah may, because it is in this list, regard it as being a chemical. Oil cake may also be classified as a chemical, although we do not generally regard such things as coal oil and oil cake as "chemicals," nor do we understand the word "chemical" to include starch, which is also in the chemical schedule. When we go through the entire list we find that there are only from $6,000,000 to $7,000,000 worth of articles which may properly be called chemicals at all.

Mr. SMOOT. Mr. President——

The PRESIDING OFFICER. Does the Senator from North Dakota yield to the Senator from Utah?

Mr. MCCUMBER. I yield.

Mr. SMOOT. The Senator from North Dakota will note the statement put in the RECORD that the total value of chemicals exported to Germany was only $1,464,357, but most of the commodities included in that amount were on the free list.

Mr. MCCUMBER. Yes; and I wish simply to explain that when I use the word "chemical" I use it in the ordinary sense. As to these exports to Germany, the great bulk of them consisted of coal oil, of which Germany produces but very little.

In this connection I wish to say that the Senator from Utah made a remark to which I most heartily agree. We should not at this time, Mr. President, attempt in any possible way to make Germany the scapegoat for any duty that may be imposed. It so happens that Germany probably produces cheaper than any other country in Europe those commodities of which she has the raw material, and with her wages representing from one-tenth to one-fifth American wages, of course, she will be able to produce any commodities coming within that category much cheaper than they can be produced in the United States.

Mr. President, I have never changed my views in favor of an association of the great nations of the world for the perpetuation and the peaceful settlement of international difficulties. The four-power treaty and the other treaties which we have recently ratified were exactly along that line. I stated in an argument in favor of those treaties at the time, and I reiterate the principle now, that such treaties ought not to stop with four powers or five powers, but that any association for the peace of the world should take within itself the more enlightened nations of the world, and such an association would certainly include Germany and Austria and Russia, as soon as Russia once again establishes a stable government.

We should extend the hand of good fellowship and friendliness toward every one of the great nations of the world. We asked nothing as a result of the World War. Therefore let us extend our friendly relations with every government, whether it was a friend or a foe during the late conflict. Mr. President, the only provision that was ever presented to the committee as a basis for tariff rates which in any way would seem to be aimed at Germany and Austria was the provision that such rates should be measured to some extent by the depreciation in the currencies of the nations dealing with us; in other words, that the nation suffering the greatest depreciation of currency should pay the largest duty partly to compensate for that depreciation. I opposed that suggestion in the committee, I am free to say. I opposed it on the ground that it seemed to strike at the distress of a nation, and I did not think it was proper for the United States by its tariff law to seem to take advantage of the distress of a nation which forced the value of its currency down until it became almost worthless.

But, Mr. President, while we are treating these nations with exact fairness all the time we must keep in view the welfare of the people of the United States. I have stated that the wonderful success of Germany prior to the war in 1914 was due to her protective policy, whereby she protected her home industries with extremely high tariffs, and then put the entire force of her Government back of her export trade, in order to force her goods into every market of the world; and under that policy she was gradually driving British trade out of practically every country in the world. There are no people in the whole world who are more industrious than the German people. They have no great navies now to support; they have no great armies to support; and all that man energy and woman energy—yes, and little child energy—is utilized in production. There is practically no idleness in Germany to-day; and with that industry and with her wonderful organization, I say most emphatically that I do expect to see her go forward as she did in the years prior to 1914 until she regains her old place in the commerce of the world, and in doing that she will necessarily take very much from the export trade of the United States. She will be entitled to it, because the industrious people of the world, the economic people of the world, are entitled to the fruits of their industry and of their economy.

Mr. President, I have taken up more time than I ought to when we are considering a specific item in the bill; but this matter having been discussed so thoroughly yesterday, and not having had an opportunity to reply at that time, I have taken this opportunity to-day to explain what my friend from Utah so eloquently referred to in his discussion of our relations with Germany.

Mr. POMERENE. Mr. President, the distinguished chairman of the Finance Committee has made a charge against the minority of filibustering on this bill. If that charge is well founded, I would sympathize with his position. I am one of those who do not believe in filibustering, whether it is by a majority or by a minority. I do not feel there has been any filibustering on this bill thus far. Speaking as a Democrat, I hope this bill will pass. Speaking as an American, I hope it will be overwhelmingly defeated.

This bill was presented to the Senate by the Finance Committee on April 11. It has been before the Senate perhaps about three weeks. This legislation has been occupying the attention of the majority for a very long time. I remember very distinctly that after the election in November, 1918, when it was discovered that the Republicans had gained the majority both in the Senate and in the House, it was announced through the public prints by Mr. FORDNEY that the Republicans in the House would at once take up the framing of revenue and tariff legislation. That was in 1918. The Congress which was elected in November, 1918, went into power on March 4, 1919. That Congress was called in extraordinary session, I think, in May, 1919, and the Congress which was elected in 1918, and whose term began March 4, 1919, was Republican, and lived and moved and died without having granted the relief which they had promised. So that if there has been any filibustering or delay on tariff or revenue legislation, it has been by the Republicans and not by the Democrats.

Then came the election of 1920, and the Republicans won the House by an overwhelming majority, and they won the Senate by an overwhelming majority; and that Congress began its active work after it had been called together April 4, 1921. So the Republicans have had constant control of both branches of Congress since March 4, 1919, and they have had control of the legislative and the executive branches since March 4, 1921,

and the hearings on this particular bill began a long time ago in the House. According to the report presented by Mr. FORDNEY, the chairman of the Ways and Means Committee—

On December 8, 1920, general tariff hearings were announced. These hearings opened January 6, 1921, and continued daily until February 16, 1921.

Mr. WALSH of Massachusetts. Was that a whole year?

Mr. POMERENE. No; the hearings on this particular bill began January 6, 1921, and they continued daily until February 16, 1921. This report further states that the majority members of the committee took up the work of framing a bill on March 21, and the work has continued without interruption until June 29, 1921; and the pending bill came over to the Senate on July 21, 1921, and was referred to the committee on July 22, 1921, and it was before the committee from that time until April 11, 1922.

Mr. WALSH of Massachusetts. The Finance Committee was considering the bill eight months, then?

Mr. POMERENE. Yes; eight months and longer.

Mr. WALSH of Massachusetts. And we have had it only a month.

Mr. POMERENE. The Committee on Finance began hearings July 25, 1921, and continued to and including August 31, 1921. Then they laid aside the tariff bill and took up the revenue bill, and the hearings on the tariff bill were resumed on November 3, 1921, and completed January 9, 1922; and after they had concluded their hearings the majority took up the work of framing this bill in private session. I am not complaining particularly of that; but, as I am advised, the minority were not kept fully informed as to the progress that was made in that bill, and of this I do complain.

I am also told by those who have made examination that when the Ways and Means Committee reported this bill to the House the House added 200 amendments to the bill, and the Finance Committee, taking up the consideration of this bill, thus amended, have added over 2,000 amendments to the bill. They have changed the administrative features of the bill; and is it strange that the Democrats, who did not have access to this bill until the date I have indicated, should want a little time to consider the 200 amendments which were added to the legislation by the House and the 2,000 and more amendments which were added to the House bill by the Senate?

Mr. KING. Mr. President, will the Senator yield?

The PRESIDING OFFICER. Does the Senator from Ohio yield to the Senator from Utah?

Mr. POMERENE. I yield.

Mr. KING. I should like to suggest to the Senate that in many of those basket clauses numerous items are found. In the Underwood-Simmons bill most of the basket clauses provided 15 per cent ad valorem. Most of the basket clauses here provide 25 per cent ad valorem, so that when you remove a basket clause from one ad valorem rate to a higher ad valorem rate you carry hundreds of items. As a matter of fact, in this chemical schedule there are hundreds of items not specifically named; so that when the schedules are taken into account, instead of there being 2,000 amendments, there would be a great many thousand amendments.

Mr. POMERENE. Yes; I think the Senator has correctly stated the condition; but I have called attention to these different steps which have been taken by the House of Representatives and the Ways and Means Committee and the majority of the Senate Finance Committee to demonstrate, if I can, the necessity for careful work here in the Senate; and the chairman of the Finance Committee must not deceive himself by saying that the public at large is not interested in the consideration of this bill. We are all very much interested in keeping control of our foreign market as best we can. Our production is exceeding our consumption all the while. The surplus of our exports over our imports amounts to from two to four billions of dollars annually; I have not the exact figures before me at this time; and if we are going to put up a wall here which is going to shut out imports completely, or at least very materially reduce them, it is going to have an effect upon the market for our exports. The large part of our exports consists of wheat and oats and corn and meat products and cotton.

Are we to frame legislation here which is going to ignore the necessities of our producers for a market? I am satisfied that if this bill passes in the form in which it is now, we are going to quickly diminish, if we do not largely destroy, our foreign market for these farm products, and you will not be able to deceive the farmer by saying, "We have given you a 35-cent duty per bushel on wheat and a 15-cent duty per bushel on corn." The public is not losing sight of this situation. The distinguished Senator from North Carolina [Mr. SIMMONS] has been justified in reading the editorial comments from many papers adverse to him, politically speaking. It is charged that one of these editorials comes from a Wall Street journal. Maybe that is so, and maybe that should be taken into consideration when we come to determine the weight which is to be given to these editorial utterances.

But Wall Street papers and other New York papers do not stand alone in their view of this bill.

In Columbus, Ohio, there is one morning paper. It is a very ably edited paper. It is the Ohio State Journal. It is a Republican paper. On May 6, 1922, it published this editorial:

A WELCOME DELAY.

Senator MCCUMBER announces in great alarm that, at the present rate of progress, the pending tariff bill will not be passed until September 29, 1946. We do not believe the public will worry much about that. The public in general, the part that thinks about it at all, is more intelligent on this subject than the standpatters, who seem to think that a higher tariff will help the country's business at any time and under any conditions whatsoever. They are obstinately blind to the fact that America's relative position in the world of traders is fundamentally changed from what it was in former years when our infant industries needed protection or thought they did and our party leaders always felt that there was one more election in the tariff.

What our farmers and our manufacturers need now is the least restricted market for their products it is possible to have. What our great mass of consumers need is work, together with a lowered cost of living. What Europe is in desperate need of is a chance to resume industry, sell goods, recuperate her strength, and pay her debts. These ends, infinitely more important than the advancement of the supposed interests of some comparatively small favor-seeking American group, would not be enhanced by a high tariff but rather defeated by it. Thus Senator MCCUMBER does not frighten or depress us a bit by his gloomy forebodings. And, glancing again at the returns from the Indiana primary, we do not believe that a standpat tariff would help any more in a political way than it would help in industry and commerce and the general joy of living.

Mr. President, no one can question the Republicanism of this paper or of Mr. Robert J. Wolfe, who manages and dictates its policies. He has been one of the leading Republicans of the State. His counsel is frequently sought. This editorial expresses the view of that paper.

I join with the chairman of the Finance Committee in the hope that there will be no undue discussion of this bill, no filibustering; but I do not hesitate to say that Democrats and Republicans alike will prove derelict in their duty to the public if they do not discuss it to the extent that the people will be fully advised as to the nature of the bill.

Mr. President, I was one of those who was anxious to renew the activities of the War Finance Corporation, because I felt that through this instrumentality we could enable the farmers of this country to market their products abroad; but this bill does not point the way to any new market for the farm products of this country.

When the McKinley tariff bill was before the Congress of the United States, it was no less a personage than James G. Blaine who said that if that bill in its then form should become a law, it would not furnish a market for a pound of pork or a barrel of flour, and neither will this bill in its present form furnish a market for a pound of pork or a barrel of flour.

Mr. JONES of New Mexico. Mr. President——

The PRESIDING OFFICER. Does the Senator from Ohio yield to the Senator from New Mexico?

Mr. POMERENE. I yield.

Mr. JONES of New Mexico. I think it would do no harm at this time to call attention to the fact that our exports of manufactured products have just about equaled our exports of foodstuffs, and that has been the case for the past two years. I put in the RECORD a few days ago a table showing that the exports of the three great classes of commodities involved in our export trade, foodstuffs, materials for manufacturing purposes, and manufactured commodities are just about equal, so that not only the farmers of the country are interested but the great manufacturing interests of the country are likewise and almost equally interested in this export trade.

Mr. POMERENE. Yes, Mr. President; and I am obliged to the Senator from New Mexico for his contribution to the statement I have been making; but I have been so impressed with the attempt to make the public believe this bill was framed for the benefit of the farming classes that I called especial attention to the present conditions in that behalf so that the farmers might understand the bill as it is.

Mr. President, our productive capacity has been constantly increasing. I put into the RECORD yesterday a few figures indicating how much our production per capita had increased within the last few years as compared with what it was some 25 or 30 years ago. But can we continue to produce if we can not sell? President McKinley, great protectionist as he was, in his final speech just before the assassin's bullet laid him low, said to the people of Buffalo:

You can not always expect to sell and never to buy.

But it seems that the theory of the framers of this bill is that the higher we build the wall the more we are going to be able to sell abroad. There are none so blind as those who will not see.

I do not care to occupy the attention of the Senate further at this time, but I am not ready yet to yield my approval to the statement that under these circumstances full and complete discussion shall not be given to the measure before us.

NOMINATION OF NAT GOLDSTEIN.

Mr. SPENCER. Mr. President, I crave the attention of the Senate for a moment in regard to the nomination of Mr. Nat Goldstein to be collector of internal revenue at St. Louis, Mo. I presented to the President this morning a letter from Mr. Goldstein, which I will now read:

MAY 10, 1922.

DEAR MR. PRESIDENT: I earnestly request you to withdraw my nomination as collector of internal revenue at St. Louis, Mo. The many condemnatory notices which have appeared in the public press concerning my nomination, though I know in my own heart how unfounded and cruelly unfair they are, can not be overlooked, and certainly anything I can prevent shall in no way cause the slightest embarrassment to you.

I can not shut my eyes either to the partisan efforts of Democratic leaders to make political capital, regardless of facts, at Republican expense over my nomination nor to the adverse opinion which has been expressed by many Republicans who, unfamiliar with the real facts, accept as true the distorted and unfounded statements of the press nor can I fail to realize the harm which may thus result to the Republican Party, which I love, or to your administration, in which I, in unison with the general public, have the greatest pride and confidence, and, therefore, I want to remove myself as the ostensible cause of it.

Would to God I could in some way confront every man and woman who is now brutally assailing me and clamoring for my political death—though this, I assure you, they are entirely unable to accomplish—with the plain and simple record of the truth as it is and of my life and public service in the city in which I live.

I shall never forget the trust and confidence of Senator SPENCER, who vouched for me to you, nor your own entire fairness and courtesy.

I am, Mr. President, gratefully,

Your humble servant,

NAT GOLDSTEIN.

Mr. President, in one sense I presume this closes the incident, and yet I can not refrain from putting into the RECORD some expressions concerning Mr. Goldstein, first, from those men who belong to the Democratic Party in the city of St. Louis, and who are among our outstanding men in the great metropolis, for with all the emphasis I can put into it, I want to say that this act of Mr. Goldstein, which is characteristic of the man, willing to sacrifice himself if he thinks the occasion requires, is indicative of the high character of the man himself.

No Democrat in St. Louis would disagree with the statement that Mr. Murray Carleton is one of the high standing men of that city. He is president of a great dry goods corporation, vice president of one of the great banks, a man of integrity and influence. He wired me this morning through no solicitation of mine. The wire came to me as an entire surprise. Said he:

[Western Union Telegram.]

SHOEMAKER, N. MEX., *May 9, 1922.*

Hon. SELDEN P. SPENCER,
United States Senate, Washington, D. C.:

Indorse and heartily approve your stand in respect to the appointment of Nat Goldstein for collector port of St. Louis and sincerely hope neither political or racial prejudice will outweigh his undenied fitness to worthily and impartially discharge the duties of the office.

MURRAY CARLETON.

A few months ago Mr. Goldstein's name was mentioned in connection with the post office at St. Louis, a position which he declined to consider. When his name was mentioned for that office I received from a number of men expressions of opinion regarding him, and two or three of them I bring before the Senate because it is the opinion of outstanding Democrats.

Mr. Festus J. Wade, who is the president of the Mercantile Trust Co. of St. Louis, wrote me and said:

MY DEAR SENATOR: I am told you are advocating the appointment of Mr. Nat Goldstein as postmaster for St. Louis.

As a loyal partisan and stanch citizen I feel quite confident Goldstein's appointment would be no mistake. His record as circuit clerk is quite satisfactory, and I hope you will be successful in securing for him the appointment as postmaster.

Very truly yours,

FESTUS J. WADE.

I read a letter from Mr. W. F. Carter, who was at the time the president of the Chamber of Commerce of St. Louis, a Democrat, a man of the highest character and standing:

MY DEAR SENATOR: I understand that Mr. Nat Goldstein, of this city, is being favorably considered for the position of postmaster.

I have known Mr. Goldstein, or as I have always known him as "Nat" for many years, and I have had occasion to come in contact with him at the courthouse on many occasions.

I have always known Mr. Goldstein as an efficient, industrious, competent, and polite official, and it affords me great pleasure to commend him to you and the Postmaster General as a man who, in my humble opinion, is abundantly able to discharge the duties of postmaster.

Yours very truly,

W. F. CARTER.

Judge Jesse McDonald was not only a judge of the circuit court with distinction to himself, but he is and always has been a power in the Democratic organization of the city of St. Louis and State of Missouri. Judge McDonald wrote me as follows:

DEAR SENATOR SPENCER: Mr. Nat Goldstein has conducted the office of clerk of the circuit court of this city for a number of years with entire satisfaction to those having contact with that office. He has unusual capacity and great industry. I think him highly qualified for the discharge of the duties of the office of postmaster of St. Louis, and this judgment is based on years of acquaintance, and I therefore take pleasure in adding to his many others my recommendation of him for favorable consideration for that position. With personal regards, I am,

Very sincerely yours,

JESSE MCDONALD.

Benjamin F. Bush, who is president of the Missouri Pacific Railway Co., wrote me as follows:

MY DEAR SENATOR: There is a general demand in St. Louis among the business men, regardless of politics, for the appointment of Mr. Nat Goldstein, present circuit clerk, as postmaster of this city.

His uniform courtesy and efficiency in the handling of the duties of the office of circuit clerk and his broad-minded citizenship are sufficient guaranty that if appointed postmaster at St. Louis his appointment will reflect credit on the administration.

I take pleasure in recommending Mr. Goldstein for this appointment.

With sincere regards, I am,

Yours very truly,

B. F. BUSH.

Mr. WALSH of Massachusetts. Mr. President——

The PRESIDING OFFICER. Does the Senator from Missouri yield to the Senator from Massachusetts?

Mr. SPENCER. I will yield in just a moment.

I have one other letter which I will read. It is from the president of the Real Estate Exchange of St. Louis, and is as follows:

DEAR SENATOR: It is my extreme pleasure to note the mention in the daily press of Mr. Nat Goldstein for appointment as postmaster of the city of St. Louis.

The privilege of indorsing Mr. Goldstein is personally very pleasing. I have known him intimately for many years and have been a close observer of the competent and faithful manner in which he has executed every duty intrusted to his care. Mr. Goldstein's record as circuit clerk is one any man might be proud of, and I am equally certain his stewardship of the office of postmaster of St. Louis would be such as to reflect honor and credit upon the city.

With this conviction I recommend Mr. Goldstein to your most earnest and favorable indorsement, and trust that you may find it consistent to use your great influence to the end that he may be appointed, and thereby assure to the city of St. Louis the same competent service in the post office which he has rendered as circuit clerk.

With personal esteem, I am,

Very cordially,

J. W. HANNAUER, *President.*

Mr. President, so far as I know nearly every one of those letters is from a leading, prominent Democrat. I have numbers of others, and, of course, those coming from Republicans far exceed in number those which I have just read. I only insert them in the RECORD because the things which have been said about Mr. Goldstein are not warranted by the facts. He is, as I said to the Senate when his name was first presented, a man of the highest character and standing, and a man who as collector of internal revenue would have made a record in that office of which as Americans we would have been proud. So far as I am concerned, if it had not been for the voluntary withdrawal of Mr. Goldstein I should have remained with him constantly. I believe in him, and it is only fair to him that these letters should be presented to the Senate.

I now yield to the Senator from Massachusetts.

Mr. WALSH of Massachusetts. I desired to ask the Senator the dates of the letters which he read.

Mr. SPENCER. Let me say to the Senator from Massachusetts that they vary in dates, but they are all within the last four or five months. I think the question regarding the postmastership arose some time in September, October, November, or December of last year, and all the letters were written within that period.

Mr. WALSH of Massachusetts. Am I to understand that Mr. Goldstein was an applicant for the postmastership at St. Louis?

Mr. SPENCER. No; he was not an applicant.

Mr. WALSH of Massachusetts. Of course these letters were not sent to the Senator unsolicited by some one?

Mr. SPENCER. Very many of them. They were all unsolicited.

Mr. WALSH of Massachusetts. Unsolicited by the Senator, but not by some one in St. Louis. Men do not write to Senators recommending men for a postmastership unless that man or some friend of his makes a canvass for him.

Mr. SPENCER. The Senator is entirely right. There was a general feeling in the city of St. Louis among a great many of the friends of Mr. Goldstein that he ought to be made postmaster, and there was a real effort to secure him for that office.

Mr. WALSH of Massachusetts. Did the Senator recommend him for the postmastership?

Mr. SPENCER. I did not; but I would have recommended him had he wanted to take the office.

Mr. WALSH of Massachusetts. Has a postmaster been named in St. Louis?

Mr. SPENCER. He has been named. He was named a couple of months after that time; in the early part of this year I think.

Mr. WALSH of Massachusetts. Failing to get the Senator's recommendation for the postmastership at St. Louis, Mr. Goldstein became a candidate for collector of customs there?

Mr. SPENCER. No; the Senator is entirely mistaken. He would have had my recommendation for postmaster, and he knows very well he could have had it.

Mr. WALSH of Massachusetts. But he withdrew his candidacy for that office, and is now withdrawing his application for the office to which he had been nominated?

Mr. SPENCER. No; the Senator again is mistaken. He did not withdraw as to that office, because he never was an applicant for that office. So he had nothing to withdraw from. His name was presented by many of his friends for that office and he undoubtedly had the matter under consideration, but he made up his mind that he could not accept it, and therefore there was no recommendation made.

Mr. WALSH of Massachusetts. Did he file an application with the Civil Service Commission for the postmastership? That is a matter of record. Of course, the Senator knows about it.

Mr. SPENCER. It is a matter of record. I do not think he did. My recollection is——

Mr. WALSH of Massachusetts. Was that all he did?

Mr. SPENCER. I am clear about the matter. He did not file any application with the Civil Service Commission.

Mr. WALSH of Massachusetts. When was the examination held for the postmastership in St. Louis?

Mr. SPENCER. Some time in January of this year.

Mr. WALSH of Massachusetts. And when was the appointment made?

Mr. SPENCER. Some time in January or February of this year.

Mr. WALSH of Massachusetts. The appointment was made in the same month the examinations were held?

Mr. SPENCER. It was made the following month, my recollection is. I may be mistaken about it by a week or two.

Mr. WALSH of Massachusetts. Does it not really take six months to get a certification of a candidate after the examination is held?

Mr. SPENCER. Not six months. The term of office of the incumbent in the city of St. Louis, if I recollect aright, expired on the 17th day of January, 1921. The examinations were held——

Mr. WALSH of Massachusetts. Months before that time?

Mr. SPENCER. No; the examinations were held very shortly before the expiration of the term. The eligibles were made public and the appointment was made some time within the last two or three months, some time in February or March. I have not the date accurately, but that is about the time.

Mr. WALSH of Massachusetts. Even in small communities it takes from three to six months to get the results of examinations after applications have been filed, and I am surprised that St. Louis should have its applications filed, examinations held, and the result of the examinations determined in such a brief time.

Mr. SPENCER. I should say the present postmaster has been in office certainly since the 1st of April. I know the tenure of the former postmaster expired on the 17th of January. So the time was not as long as the Senator thinks.

Mr. WALSH of Massachusetts. In any event, no situation arose which required the Senator to recommend him for postmaster at St. Louis?

Mr. SPENCER. No; I do not think there did.

Mr. WALSH of Massachusetts. But if one had arisen the Senator would have recommended him?

Mr. SPENCER. I certainly would have done so.

Mr. HARRISON. Mr. President, may I ask the Senator a question before he takes his seat?

Mr. SPENCER. Certainly.

Mr. HARRISON. I do not know now from the colloquy whether Mr. "Goldstain" was an applicant for the postmastership in St. Louis.

Mr. SPENCER. He was not.

Mr. HARRISON. He did not file his application?

Mr. SPENCER. He did not.

Mr. HARRISON. It was suggested to him, however, that he would be a good postmaster for St. Louis?

Mr. SPENCER. By a number of his friends. I am clear in my recollection, I will say to the Senator from Mississippi, that when the time came to file application with the Civil Service Commission, which, as the Senator from Massachusetts has rightly said, is a condition precedent to appointment, Mr. Goldstein made no application. I am very clear about that.

Mr. HARRISON. Is not the reason why he did not make application because some of his friends got together and thought that this matter of the Lowden campaign fund would be aired, and that it was the best thing for him not to do it because of that fact?

Mr. SPENCER. The Senator is very much mistaken. His friends got together and were very insistent that he should make application.

Mr. HARRISON. In spite of that?

Mr. SPENCER. In spite of it, if the Senator will, but notwithstanding it.

Mr. HARRISON. Mr. President, I congratulate the junior Senator from Missouri on partially extricating himself and his party at the eleventh hour from a very bad situation. I thought I could see the adroit hand of the distinguished junior Senator from Missouri when he pulled out his bundle of letters and read this letter at such a late hour from Mr. "Goldstain," asking the President to withdraw his name. It is not the first time in this body that the distinguished junior Senator from Missouri has led the host right up to the precipice and at the end turned a somersault that got his party into a worse fix than if he had not toppled over; so I congratulate him.

Mr. POMERENE. Mr. President——

Mr. HARRISON. I yield to the Senator from Ohio.

Mr. POMERENE. In the light of the statement made by the chairman of the Committee on Finance [Mr. McCUMBER] that there was filibustering going on, am I to understand that the Goldstein case is of more importance than the tariff bill?

Mr. HARRISON. Evidently it is to the Republican Party at this time.

Mr. SPENCER. Is this the first interruption the Senator from Mississippi has made with reference to the Goldstein case?

Mr. HARRISON. No; but I think after hearing the Senator this morning that our interruptions have brought about good results, so I am very glad we interrupted.

Mr. "Goldstain," according to the junior Senator from Missouri, "has sacrificed himself because the occasion required it." No one will take issue with that proposition. The occasion did require it and he sacrificed himself. Whether reluctantly or under lash I do not know.

The Senator from Missouri says great injustice has been done to this good man. I do not know Mr. "Goldstain." I never heard of him until the committee, of which the distinguished junior Senator from Missouri is a member, investigated contributions and expenditures in the last presidential campaign, and when it was represented that two delegates from Missouri had been bought or had been paid $2,500 each out of the Lowden campaign fund. Then we all heard of Mr. "Goldstain" and Mr. Moore. If anybody has done Mr. "Goldstain" an injustice it is because the record reveals an injustice to him. The facts made the brand and applied the mark. There has not been a speech made touching the matter where those speeches were not confined to the facts as revealed by the record.

Mr. SPENCER. Mr. President, will the Senator allow me to make a brief statement?

Mr. HARRISON. Certainly.

Mr. SPENCER. Here is where the injustice comes, and there is no better illustration than what the Senator from Mississippi has just said. The Senator said, "When we read from the record that he had been bought or paid a certain sum of money from the Lowden campaign fund." The Senator knows well enough that when that flashes out to the country every man, woman, and child reads "bought" and nothing else, and yet there is not a word in the record that indicates a single intention, either with the Lowden managers or with Mr. Goldstein, to purchase or to be sold. There was a transaction as familiar in politics as any other transaction, a legitimate expenditure of money for publicity and for legitimate campaign purposes, and yet the one thing that will go out to the country is that "Goldstein was bought," or, as the Senator said the other day, "the corrupt slush fund of Lowden." Those are the terms that go out, and there lies the injustice of the thing. Any man who will read the record from beginning to end of what Mr. Goldstein stated will come to the same conclusion which I doubt not members of the committee came to.

Mr. HARRISON. That is not the first time it has gone out to the country. It went out to the country two years ago when the committee of which the Senator from Missouri was

a member disclosed the facts to the country. It was the revelation of the $2,500 checks that were given to Mr. Moore and to Mr. "Goldstain" by "Liv" Morse and the emissaries of Mr. Lowden in Missouri that defeated Mr. Lowden's nomination at Chicago; and the defeat of Mr. Lowden's nomination at Chicago prevented him from now occupying the White House.

Mr. SPENCER. That may be; but the statements which went out were not the facts. The statements that went out were the words which the Senator from Mississippi has used here—"bought," "corrupt," "slush fund." It never went out that the $2,500 was tendered and accepted and returned; that it was tendered for a legitimate and definite purpose, and that when the occasion for its expenditure did not arise the money was returned. No one knows those facts. All that the country knows has been derived from such statements as the Senator from Mississippi has now repeated. Therein lies the injustice.

Mr. McKELLAR. Mr. President——

Mr. HARRISON. I yield for a question.

Mr. McKELLAR. I want to ask the Senator from Missouri a question. Does not Governor Lowden say that Mr. Goldstein was corrupt? Has he not so stated?

Mr. SPENCER. I understand the Senator from Mississippi had rather not have me answer that question now?

Mr. HARRISON. I will treat of that matter in a moment.

Mr. SPENCER. Very well; I will let the Senator from Mississippi have his own way.

Mr. HARRISON. The fact is—and the Senator knows it, because he was a member of the committee—that the emissaries of Mr. Lowden gave to Mr. Moore and Mr. "Goldstain" $2,500 each, and Mr. "Goldstain" became a Lowden advocate; he placed the money to his credit in the bank and checked on it just as he did on his other funds; but before the Senator's committee he afterwards admitted "that he had made a mistake" and that he was sorry for it. Now, the Senator says that we have done Mr. "Goldstain" an injustice. The Senator asked me why I called him "Goldstain." I suppose that Mr. Lowden would now change the name and call him "Goldstung." If gold was ever "stained" and a presidential candidate ever "stung," it was in this instance.

The Senator from Missouri says that some of us have done Mr. "Goldstain" an injustice. Of all the men who would come to the defense of Mr. "Goldstain," if he has been treated as badly as the Senator from Missouri thinks, would be Mr. Lowden, because it was Mr. Lowden's money that Mr. Babler and Mr. Morse gave to "Goldstain"—$2,500 of it—and it was Mr. Lowden's nomination that Mr. "Goldstain," as a prospective delegate to the Chicago convention was going to advocate. Mr. Lowden has been away; he has been in Europe; but he returned on yesterday, and in the New York Times of this morning, in big headlines, we read:

Lowden denounces Goldstein as unfit.

The Senator from Missouri does not agree with Mr. Lowden; evidently he thinks that Mr. Lowden has done Mr. "Goldstain" a great injustice. I wonder if the Senator from Missouri thinks that I have done Mr. "Goldstain" a greater injustice than Mr. Lowden has done by the statement which he gave to the press over radio on yesterday. But what I have read is not all that Mr. Lowden said. The headline continues:

Lowden denounces Goldstein as unfit—Gave false testimony on campaign fund, says ex-governor, nearing here on *Olympic*.

The headline further says:

Senator SPENCER blamed.

Well, I think that is wrong, because I am going to defend the Senator from Missouri. I do not accept the things that Mr. Lowden has said about the Senator from Missouri in this statement.

Mr. SPENCER. Do not take any unnecessary burden upon yourself in the matter.

Mr. HARRISON. I would take an unnecessary burden; I would go out of my way to defend the Senator from Missouri at any time.

Mr. SPENCER. Especially if you did not think he needed it.

Mr. HARRISON. The New York Times further says—and evidently the Senator from Missouri when he said I was doing Mr. "Goldstain" an injustice had not seen this article in this newspaper:

Ex-Gov. Frank O. Lowden, of Illinois, returning home from Europe on the *Olympic*, sent a wireless message to the St. Louis Globe-Democrat last night, condemning the nomination of Nat Goldstein to be internal-revenue collector of the St. Louis district, and declaring to be "absolutely false" the testimony which Goldstein gave before the Senate investigating committee in 1920 in connection with the $2,500 check given him by a Lowden agent while he was seeking to be elected a delegate to the Republican National Convention.

The former governor and former presidential candidate says he was told at the time that Senator SPENCER, of Missouri, had Goldstein give his testimony before the committee.

Of course, we do not believe that statement. It is an awful charge to make that the Senator from Missouri had Goldstein to give this testimony to the committee. The chairman of the committee, who was Senator Kenyon, and the other members of the committee had Goldstein to appear; but I can not believe that the Senator from Missouri, as revealed in this message, forced him to give his testimony before the committee.

Mr. SPENCER. Mr. President——

Mr. HARRISON. I yield to the Senator from Missouri.

Mr. SPENCER. I do not wonder that the Senator from Mississippi has difficulty in keeping from smiling.

Mr. HARRISON. I am smiling at the Senator from Missouri. I can not look at him without smiling.

Mr. SPENCER. That is delightful. I hope the Senator from Mississippi will keep his eyes fixed upon me.

Of course, the committee summoned Mr. Goldstein. I wanted him summoned, as did the other members of the committee. Whenever a man's name was mentioned in connection with the investigation of the campaign fund they wanted him before the committee in order to obtain his testimony and secure the facts. If there is any "awfulness" in that charge, the charge is perfectly true, and I admit my full share in it. I wanted Mr. Goldstein there; I wanted him to face the committee; I wanted the committee to see him; and I wanted to hear his testimony.

Mr. HARRISON. Of course.

Mr. SPENCER. And Mr. Goldstein came. I may say to the Senator now that Governor Lowden is mistaken as to the impression which the testimony of Mr. Goldstein made. The testimony is before the Senator from Mississippi, and it may be read. It was not false testimony, and I do not believe it made the impression upon any member of the committee as being false. Two members of the committee, one a Democrat, the senior Senator from Missouri [Mr. REED], and one a Republican, Senator Kenyon, if I remember the record aright, when the testimony was ended did a thing that so far as I know had no parallel in those hearings, and that was they gave an expression to Mr. Goldstein of commendation for the frankness of his testimony. There was not a word to indicate that there was any lack of confidence in what he said, and what he said was the truth.

Mr. HARRISON. Mr. President, it may be that Mr. Lowden thought that he was falsely testifying by not telling everything he knew, but what he did testify to evidently was true. However, Mr. Goldstein and Mr. Moore and Mr. Babler and the others who were present at that conference all understood that $2,500 of Lowden money was given over to Goldstein. Mr. Goldstein said, and they all said, it was to be used for Lowden, and afterwards Goldstein said that he had made a mistake in accepting it. I do not think there was any false testimony in that respect. From reading the testimony it seems to me that Goldstein was frank and candid about it. He may not have told everything that happened, but he told some of the things that happened truthfully.

Mr. BURSUM. Mr. President, will the Senator yield?

Mr. HARRISON. Yes; I yield.

Mr. BURSUM. Is the Senator from Mississippi speaking in opposition to or in behalf of the pending question, the amendment to the tariff bill?

Mr. HARRISON. I am speaking in behalf of the Republican Party and congratulating the Senator from Missouri on partially extricating it from a bad predicament for which he and the President are responsible and in which they had placed it.

Mr. SPENCER. Mr. President, may I say to the Senator that it is quite true Governor Lowden at Chicago repudiated Mr. Goldstein? Undoubtedly there existed in Chicago, as there exists now, a general feeling created by the public press that there was something corrupt. Here I do not speak by the card——

Mr. HARRISON. The Senator will agree with me that that defeated Lowden's nomination at Chicago?

Mr. SPENCER. I think it had a great deal to do with defeating it. Here I do not speak by the card, but I know that when the public press was placing before the public these occurrences under great headlines, unfair and unfounded, undoubtedly it created an impression at Chicago of corruption in the use of Lowden money, so that when the situation was brought to the attention of the Lowden managers they said, "We have got to say something or do something to counteract this impression." I have always thought—and here I speak only from my own conviction in the matter—and I thought at the time that they picked out Mr. Goldstein and Mr. Moore as the channels through which they would make that declaration.

Mr. HARRISON. The Senator thinks they were the worst cases, does he not, and that that may have also been a reason for the action to which he referred?

Mr. SPENCER. From the testimony I should not think they were by any manner of means.

Mr. HARRISON. What other cases in Missouri were worse than those of "Goldstain" and Moore?

Mr. SPENCER. I was not thinking of Missouri; the worst things do not occur there, but entirely in other States.

Mr. HARRISON. The condition was bad enough, however, in Missouri.

Mr. SPENCER. When the necessity for some scapegoat, if I may use the expression, arose, the Senate will remember that Mr. Lowden came out in Chicago and denounced Mr. Goldstein and denounced Mr. Moore, and said in public, "I do not want their support; they are not entitled to be delegates." I thought then, as I think now, that it was the political strategy of the hour and not by any manner of means a judicial decision. I do not believe the Senator from Mississippi, sitting as a judge, on the evidence presented would ever come to any such conclusion; and yet I can quite understand the political strategy which might necessitate the making of a sacrifice of a man in order to obtain some, perhaps, more important goal.

Mr. HARRISON. Does not the Senator think that the statement which was given out yesterday by Mr. Lowden was political strategy upon his part?

Mr. SPENCER. I think the statement that was given out yesterday, which the Senator was good enough to show me an hour or two ago——

Mr. HARRISON. And which I am going to read.

Mr. SPENCER. Simply reiterates on his part what he had previously said. Of course he did not want to go back upon what he had said at Chicago, and he reiterates it now. I say he is mistaken about what he said concerning me; and I hazard the guess that he has not seen the testimony of Mr. Goldstein nor refreshed his memory about it, but is reiterating what he said at Chicago, as, of course, he has a perfect right to do.

Mr. HARRISON. Does not the Senator think that Mr. Lowden has interpreted the feeling of this country against corruption in elections and in the choosing of delegates to conventions; that he believes the action of the Senate in seating a Senator here who had expended a very large sum of money has aroused the people all over the country, and, coming on top of that the nomination of a man to high position in Missouri who had admitted taking $2,500 as a delegate from Missouri and had given it back, would still further arouse the people and might destroy the Republican Party?

Mr. SPENCER. No one can think any more highly of the necessity of absolute purity in politics than do I or does the Senator from Mississippi, but there was not any great amount of money tendered to Mr. Goldstein as a delegate for Mr. Lowden. There is again the insinuation which the Senator throws in that creates the false impression. When those negotiations occurred and when that money was paid Mr. Goldstein was not a delegate for Lowden and Mr. Goldstein never did, as the record shows, pledge his support to Mr. Lowden. The sentiment of his district was for Mr. Lowden and, in his own opinion, he was for him; but the money was for a perfectly legitimate campaign political purpose.

Mr. HARRISON. Does the Senator indorse it?

Mr. SPENCER. Indorse the giving of the money?

Mr. HARRISON. The giving of the $2,500?

Mr. SPENCER. I see no objection to it. I do not think there was the taint of corruption with either the offer or the receipt of it; and, as the Senator knows, when the occasion for its use did not arise, it was returned, precisely as was indicated when it was received.

Mr. HARRISON. The Senator gives me a thought when he says that Mr. Goldstein was not for Lowden.

Mr. SPENCER. No; I did not say that.

Mr. HARRISON. Well, at that time he did not know whether he was for Lowden or not.

Mr. SPENCER. I did not say that. What I said was that there had not been on the part of Mr. Goldstein any announcement or pledge for Mr. Lowden. The sentiment of his district——

Mr. HARRISON. Was this $2,500 for the purpose of getting him to announce himself for Lowden?

Mr. SPENCER. It certainly was not. If it was, it failed, because he never did announce for him.

Mr. HARRISON. He afterwards did announce himself for Lowden.

Mr. SPENCER. He never did announce himself to be for Lowden.

Mr. HARRISON. Did he not tell the parties in that conference that he thought he could corral the boys together, and that they would be for Lowden all right?

Mr. SPENCER. He did not. He told the exact opposite of the inference which comes from the Senator's remark. When they offered that money to Mr. Goldstein, he said, "I do not want a dollar of the money. My district is for Mr. Lowden. There is no necessity for a dollar of expenditure in my district, and I do not want any money," and then he left it.

Mr. HARRISON. Why did he take the money?

Mr. SPENCER. I can tell the Senator. After he left it, within two weeks he was gotten over to Springfield to meet Mr. Lowden personally. Mr. Goldstein thought the whole financial arrangement had ended. When he went over to Springfield he met Mr. Lowden. There was a conversation, pleasant, personal, not a word about money. Two weeks after that, when he came back to Missouri, what happened? In the original conversation Mr. Goldstein had said: "I can not use any money for the Lowden campaign. My district is in favor of him. He is our neighbor across the river. The only time I could ever use any money would be at the time of registration, in order to get out the registration of voters. That is the only time that money is needed in my district," and that was a mere passing remark.

Mr. HARRISON. May I ask the Senator, did not Goldstein first deny getting the money?

Mr. SPENCER. Let me get to that in a minute. I will answer that fully. When the time came for the second interview, Mr. Goldstein was handed a check for $2,500, with the remark: "Here, you want money for registration. Well, there is $2,500, with the compliments of Mr. Lowden's managers, for registration." Mr. Goldstein said then: "I do not like to take that money now. I could use it for registration when registration time comes," because, mark you, this conversation was in January and registration time was not until summer. He said: "I can use that at registration time. Now, if Mr. Lowden is nominated, and the necessity for registration arises in his interest, I will use that money for that purpose. If he is not nominated, I will return the money." He was not nominated and the money was promptly returned, and there is the incident.

On the statement regarding the denial of the use of the money there is foundation for it. Mr. Goldstein did make a statement which was not true, and here is the way it happened:

At midnight he was called up by a representative of the press to find out whether he had received any money as a Lowden delegate. Now, mark you, some of the men who had had to do with the Lowden money had denied having received any of it, and wrongfully so, for it was not the truth; and at midnight the first impression that came to Mr. Goldstein was: "What is the object of all this query?" And half sleepily, but quite wrongfully, he said to whoever was interrogating him, "Oh, don't joke me about the Lowden money; I don't know anything about it," when, as a matter of fact, he did know about it, and to that extent he was wrong. The next day he told the fact, and when he came before the Senate committee he told the fact. There was the temporary equivocation of a fact which was subsequently stated in full. Now, make the most of it. I admit that that was wrong, and I do not think he ought to have done it.

Mr. HARRISON. I want to read, just in this connection, part of the testimony. It is very brief. This was when they had the conference:

Mr. GOLDSTEIN. They talked along those lines. They never did question as to whether I would vote for Lowden or not. I never told them I was for Lowden. The impression, of course, was that I was or would be, and they spoke about money. I laughed at that—

He laughed at that.

I laughed at that—

He says—

and told them that there would not be a dollar required.

He did not think there would be.

Well, Babler—

He is the national committeeman, I think.

Mr. SPENCER. He was then, and is now.

Mr. HARRISON (reading):

Well, Babler—

The Republican national committeeman—

seemed to carry on most of the conversation, and he said, "We will get some money, even if you do not need it."

The Senator may not have caught that. Mr. Babler, of the Republican National Committee, said this, says Mr. Goldstein:

We will get some money, even if you do not need it.

Mr. SPENCER. There are 16 congressional districts in Missouri. Mr. Goldstein comes from one.

Mr. HARRISON. Probably that is what Mr. Babler had in mind. Anyway, I reckon he thought the pickings were good, and he had better pick some, so he said:

"We will get some money, even if you do not need it." I said, "There is but one time that money can be used. We have a new registration—"

And then he talks about the new registration, as the Senator says.

Further, the chairman asked Mr. Goldstein this question:

When this matter was first presented to you by the reporter of the St. Louis Globe-Democrat, did you not deny receiving any money?

Mr. GOLDSTEIN. I did.

The CHAIRMAN. Why?

The Senator from Missouri was present when these questions were put, evidently.

Mr. GOLDSTEIN. Just because I knew I had made a mistake.

And yet the Senator was willing to right that mistake, even though Goldstein said it was a mistake, and recommend him as postmaster at St. Louis, or make him collector of internal revenue over Missouri.

Mr. GLASS. But the Senator from Missouri thinks he was talking in his sleep.

Mr. HARRISON. Well, I presume he does.

Those are the facts about the matter, and so Mr. Lowden was asked this question just before he landed in New York. Mr. Lowden's message was in answer to the following inquiry from the Globe-Democrat:

Governor LOWDEN:

Steamship Olympic:

Harding nominated Nat Goldstein revenue collector St. Louis district. In view of scandal handling your campaign funds, would appreciate your opinion appointment. Nomination now in Senate committee, with big opposition both sides. Please radio our expense to-night.

ST. LOUIS GLOBE-DEMOCRAT.

What is the answer of Mr. Lowden, who ought to know more about it than anyone else, who should be more interested in Goldstein than even the Senator from Missouri, because Goldstein got $2,500 of the Lowden money? Goldstein was going to support Mr. Lowden at the Chicago convention if the country had not become aroused and Lowden had not become frightened out of his boots and said he did not want his vote at the Chicago convention. Now, here is the reply that came from Mr. Lowden:

STEAMSHIP "OLYMPIC."

GLOBE-DEMOCRAT:

Testimony of Goldstein before Senate investigating committee was absolutely false—

The Senator disagrees with Mr. Lowden on that—

But whether true or false, it showed him equally unfit to sit as a delegate in any convention.

I therefore declined to accept his vote.

I was afterwards informed, in explanation of his conduct, that his testimony was given by suggestion of Senator SPENCER, member of the Senate investigating committee.

Of course, Mr. Lowden does the Senator an injustice, because first he says that this testimony that Mr. "Goldstain" gave "was absolutely false," and then he says that it was given "at the suggestion of the Senator from Missouri."

Mr. SPENCER. Of course, if the Senator from Mississippi reads in that any inference that false testimony was given at my instance—which I do not for a moment believe Governor Lowden meant——

Mr. HARRISON. I can not believe that he would mean anything like that, and I most assuredly hope not.

Mr. SPENCER. But if he meant anything like that, it is absolutely and unqualifiedly false. I do not believe for a moment, however, that Governor Lowden meant any such thing.

Mr. HARRISON. I hope he did not mean it, and I can not believe that he meant anything like that, and yet the telegram says:

Testimony of Goldstein before Senate investigating committee was absolutely false.

And then he says:

I was afterwards informed, in explanation of his conduct, that his testimony was given by suggestion of Senator SPENCER, member of the Senate investigating committee.

He is just unfortunate in the language that he uses.

It was difficult for me to believe this at the time—

He says—he had heard it once before, and he did not believe it then, but he says:

It was difficult for me to believe this at the time.

I do not know what he means by that, unless he has changed his mind about it and believes it now—

His nomination now, presumably at the instance of Spencer, would seem to give color to this charge.

Mr. Lowden has done the Senator from Missouri an injustice in this and owes him an apology. I am not elaborating on it. I am only reading the telegram and allowing it to speak for itself—

If he was unfit to sit as a delegate in convention, as I insisted at the time, it is hard to see how he can be regarded as a fit candidate for revenue collector.

FRANK O. LOWDEN.

I am glad that Goldstein has come to the conclusion that he is—well, not unfit, but in the interest of the good of the party, as a good soldier, he is willing even though reluctantly to have his name withdrawn; but the Senator from Missouri is so enamored of his splendid qualities that he would have stood firm for Mr. Goldstein and would have had him stand out to the end for this job.

Mr. CARAWAY. Mr. President, may I ask the Senator from Mississippi a question?

Mr. HARRISON. Yes.

Mr. CARAWAY. How much of the Lowden money was sent to Missouri?

Mr. HARRISON. I think sixty-odd thousand dollars, was it not, may I ask the Senator from Missouri? Liv. Morse spent $32,000.

Mr. SPENCER. The Senator has just about doubled it. I think the testimony shows somewhere between thirty and thirty-five thousand dollars; but that exaggeration is very small.

Mr. HARRISON. Now, before the Senator leaves the floor, there has just come to my attention the news that the ministers in St. Louis had a meeting, and they passed a resolution there about this matter. This is from the St. Louis Star:

Ministers assail Nat Goldstein—

I will not read the balance of that. I will leave out part of it. Those who are interested may read it in the papers.

Mr. SPENCER. Mr. President, is not the part which the Senator is leaving out of the report the fact that the only ministers who met were the so-called Disciples of Christ, or those who belonged to the Christian Church, and that it was not a meeting of the ministers of the city?

Mr. HARRISON. Out of courtesy to the Senator, I did not read the other part. If the Senator wants me to read it all I shall proceed.

Mr. SPENCER. No; I do not.

Mr. HARRISON. All right; I will not, then.

Mr. SPENCER. I will not make any suggestions. I do not care to.

Mr. HARRISON (reading):

Disapproval of the appointment of Nat Goldstein as United States collector of internal revenue in St. Louis—

It is a little hard to eliminate part of this—

are embodied in a resolution passed to-day at a meeting of ministers of the Christian churches (Disciples of Christ) at the offices of the Christian Board of Publications, 2712 Pine Street.

The resolution follows:

"*Resolved*, We most emphatically disapprove of Mr. Nat Goldstein for any political appointment whatsoever, and suggest to Senator SPENCER"—

Well, I will leave out part and just read——

Mr. KING. Read it all.

Mr. HARRISON. Does the Senator want me to read all this? I will not put this in the RECORD, Mr. President.

Mr. SPENCER. I do not care.

Mr. HARRISON. I will not read it all. Those who are interested may read it in the papers. There are too many personal allusions in it.

Now, Mr. President, it looks as though, while Mr. Lowden, the man who ought to be more interested in Goldstein than any other, is repudiating him, President Harding and Senator SPENCER praise and attempt to elevate him.

So the matter is now a closed book. The Senator has helped his party by having the name of Goldstein withdrawn as collector of internal revenue of Missouri, and while the stain will remain we will try to forget the unpleasant incident.

GOVERNOR OF PORTO RICO.

Mr. KING. Mr. President, while we are discussing Missouri appointments, I challenge the attention of the Senate to the fact that another man from Missouri was named for a high position, to wit, Governor of Porto Rico. I refer to Mr. E. Mont Reily, who at one time was assistant postmaster of Kansas City, and whose record persons who are interested in the matter can discover.

He was supported by a wing of the Republican Party, and President Harding named him for the important position of Governor of Porto Rico. He was wholly unfitted for the discharge of the duties of that important office. He has antagonized the people and produced a feeling of irritation and resentment that has made his further sojourn in Porto Rico injurious to that friendly relation which should exist between the United States and the inhabitants of Porto Rico. He has disregarded their wishes and ignored their cultural aspirations. His conduct has tended to alienate them from their devotion to the United States. He refuses to comprehend their racial and traditional characteristics. He ought to resign or, failing that, he should be removed. If he still is held in this position, an investigation should be had by the Senate. A resolution of investigation has been offered in the

House which, as I understand, seeks to determine the question of his fitness for the position he now holds.

When persons are selected for positions of this character the President should choose those who have sympathy with the people whom they are to serve, who know something of their traditions, of their cultural aspirations, and who will seek to unite them in every possible way with this Republic instead of producing discontent and irritation.

The present Governor of Porto Rico is not, I repeat, suited for the position, and the protests of the people of that island ought to be heeded by the President. He was no more fit to be Governor of Porto Rico than Mr. Goldstein was fit to be postmaster in St. Louis or collector of internal revenue of the district of Missouri. Perhaps the same influences which were back of Mr. Goldstein were back of Mr. Reily.

I have introduced a bill the object of which is to grant larger autonomy to the people of Porto Rico. They should have greater liberty in the determination of their domestic affairs.

THE TARIFF.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 7456) to provide revenue, to regulate commerce with foreign countries, to encourage the industries of the United States, and for other purposes.

Mr. McKELLAR. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The reading clerk called the roll, and the following Senators answered to their names:

Ashurst	Hale	McKellar	Simmons
Ball	Harreld	McKinley	Smoot
Borah	Harris	McLean	Spencer
Brandegee	Harrison	McNary	Stanley
Bursum	Heflin	Nelson	Sterling
Calder	Hitchcock	Newberry	Sutherland
Capper	Johnson	Nicholson	Swanson
Caraway	Jones, Wash.	Norbeck	Townsend
Colt	Kellogg	Norris	Wadsworth
Culberson	Kendrick	Oddie	Walsh, Mass.
Cummins	Keyes	Overman	Walsh, Mont.
Curtis	King	Page	Warren
Dial	Ladd	Pittman	Watson, Ga.
Dillingham	La Follette	Poindexter	Watson, Ind.
Fletcher	Lodge	Pomerene	Weller
Glass	McCormick	Sheppard	Willis
Gooding	McCumber	Shortridge	

The VICE PRESIDENT. Sixty-seven Senators having answered to their names, a quorum is present.

Mr. SPENCER. Mr. President, I want to say a word on the pending item, which I understand is gallic acid. It is used in the manufacture of medicines and dyes, and very largely manufactured by a St. Louis company, the Mallinckrodt Chemical Co.

I shall ask the chairman of the Finance Committee to correct me if I am wrong, but it is my information that the rate which is proposed in the bill, 8 cents a pound, is the rate which was carried in the Payne-Aldrich law, but at that time 8 cents a pound was the equivalent of a 25 per cent ad valorem duty, which the House put on, and which my amendment calls for. I know well enough that the Finance Committee are very much better qualified to speak upon these items than I can possibly be, but if it is true that the Payne-Aldrich law calls for an 8 cents per pound duty, which is the same as is put on here, and that that was the equivalent of a 25 per cent ad valorem duty at that time, I say to the Senator from Utah, whom I see standing, that now is equivalent to only 16 per cent ad valorem, and that is the basis of my amendment to the amendment of the committee.

Mr. SMOOT. Mr. President, it is true that the pre-war price of gallic acid was lower than it is to-day, and 25 per cent at that time was equivalent to about 8 cents per pound. But we do not expect that acids or anything else will go down to pre-war prices again. I may say to the Senator that I consider the 25 per cent rate an excessive rate, and that a rate of 8 cents a pound, which the committee reported, is ample to protect the industry.

The VICE PRESIDENT. The question is on agreeing to the amendment offered by the Senator from Missouri [Mr. SPENCER] to the committee amendment.

The amendment to the amendment was rejected.

Mr. KING. Mr. President, I propose an amendment to the committee amendment, on page 3, line 1, to strike out the numeral "8" and insert in lieu thereof the numeral "4," so that it will read:

Gallic acid, 4 cents per pound.

The VICE PRESIDENT. The question is on agreeing to the amendment of the Senator from Utah to the amendment of the committee.

Mr. KING. Mr. President, the bill as it passed the House provided an ad valorem duty of 25 per cent, as has been stated by my colleague, as I understood his statement, though I was called from the Chamber and did not hear all that was said by him or by the Senator from Missouri. The Senate committee bill fixes a specific rate of 8 cents per pound. The Payne-Aldrich law provided a specific duty of 8 cents per pound, and the Underwood-Simmons law fixes a specific duty of 6 cents per pound.

The survey which has been provided by the Tariff Commission contains some information which is valuable as to this acid and the uses to which it is put. May I say very briefly, Mr. President, paraphrasing some of the statements of the Tariff Commission, it is an acid which is the product of nutgalls, and Senators are aware of the fact that nutgalls consist of growths upon tropical trees. Insects perhaps are caught in the exudates upon the vegetation and in some form contribute to the development of what are denominated nutgalls.

We do not produce nutgalls in the United States, but they are imported, and from these nutgalls are produced gallic acid, tannic acid, and perhaps others not necessary to consider at this time.

It seems as though we should encourage the importation of nutgalls as a basis for the development of the production of acids which are the result of the various processes which must be followed to produce what might be called the finished product.

My colleague suggests that they are on the free list—as they should be. I have no doubt that if some American had suggested that perhaps we might induce insects to become the basis of a nutgall industry in the United States we would have had a high tariff fixed on nutgalls. We will have to teach some of these insects a little more about the necessity of home industry and have them collaborate with some of these great domestic producers, in order to develop another domestic industry, to wit, the production of nutgalls, upon which we may impose another high tariff.

Mr. President, gallic acid appears in commerce in two grades—the refined, conforming to the United States Pharmacopœia, and the less pure, or technical. The latter is an intermediate for making dyes, including gallocyanide blue. That is employed in dying the wool for Navy uniforms, and, as the Senator from Missouri said, it is also employed in the making of medicine and the production of inks, and as a raw material for pyrogallic acid.

The imports before the war averaged, as I recall, about 50,000 pounds per year, but in 1918 they were only 2,242 pounds. In 1919 we imported the stupendous quantity of 22 pounds. Mr. President, that is such a fearful menace to the American industry that, of course, we must have a high tariff. In 1920, according to the figures furnished by the Tariff Commission, there were no imports whatever. During the first nine months of 1921 the imports were 20 pounds. There has been some increase during the final three months of that year.

The exports are not available. I have been unable to ascertain the quantity of exports. An examination of the last issue of the Drug Reporter, which is issued once a week, shows that the prices are as follows: For the medicinal, 70 to 75 cents per pound; for the technical, 45 to 50 cents a pound. The pre-war price for this acid was 33 cents.

This acid is made quite extensively by the great manufacturing house of Powers, Weightman & Rosengarten Co., of Pennsylvania; by the Mallinckrodt Chemical Works, a very large corporation, which has its headquarters in St. Louis, Mo. It is also made by the Eastman Kodak Co. and by the Zinssner Co., of Hastings, N. Y., and by the National Aniline & Chemical Co., which is a branch of the great national chemical trust, with a capital stock of approximately $300,000,000.

Mr. Zinssner, whose company makes this acid, testified in the hearings before the House committee—page 67. He desired a tariff duty of 25 cents per pound as a specific rate. So far as I can learn, that is the only testimony which was taken before the House committee, and there is none, as I recall, before the Senate committee. The House committee, for reasons which to me are incomprehensible, fixed this, as I conceive, indefensibly high rate.

When there are no imports, or practically none—20 pounds for 1920 and 22 pounds for the first nine months of 1921—I can not comprehend the theory upon which a tariff of 8 cents per pound is laid. When we take into account the fact that this product is used in the manufacture of ink, is one of the basic ingredients in the production of some medicines, and that medicines are so indispensable to the health and the lives of the people, I am unable to understand the mental ratiocinations of the Senators who drew this schedule. Why should we have a tariff of 8 cents a pound upon a product where there is no competition or competition so inconsequential as that it may be said it constitutes no competition?

Mr. McCUMBER. Mr. President——

The PRESIDING OFFICER (Mr. STERLING in the chair). Does the Senator from Utah yield to the Senator from North Dakota?

Mr. KING. I yield.

Mr. McCUMBER. Might not the Senator ask the same question, why we should give a rate of 6 cents, which is the present rate in the Underwood law? My answer would be that both were for revenue purposes.

Mr. KING. I would say that is true if there were any imports, I was about to respond to my friend.

Mr. McCUMBER. There have been imports, of course, even when the rate was 8 cents, of some 78,000 or 79,000 pounds. There seem to be a great many different influences that bear upon the importation of these articles. I admit that the importations have been very light compared with the entire product used in the United States. The proposed rate is a very slight increase over the present law and amounts on the present valuation to only 11 per cent ad valorem on the higher-priced product and to only 16 per cent ad valorem upon the lower-priced product, which is a very low ad valorem rate.

Mr. KING. I concede what my good friend has stated with respect to its being a rather low ad valorem rate. But if tariff duties are to be justified they must be either for revenue purposes or for the protection of some home industry, the domestic manufacturer. I think the Senator from North Dakota will agree with me, and I feel sure my able colleague will, that it is not wise even if one believes in protection per se to fix the rates so high as to practically prohibit importation, because no matter how just the domestic manufacturers may desire to be there is a disposition in human nature to avail one's self of the opportunities to enlarge profits. If there is no foreign competition there is a disposition—and we find it in our industrial life—to form domestic combinations or associations or organizations for the purpose of maintaining prices or of preventing a reasonable reduction in domestic prices.

Therefore I say, returning to the point I had in mind, that even if one believes in protection per se, he ought not to support duties where there are no importations unless it is for revenue—and of course this brings no revenue—or if the importations are of so inconsequential a character as to afford no revenue or to constitute no competition with the domestic manufacturer.

So we have here an instance where there is no revenue that can be obtained from a duty upon the product, nor is there a sufficient amount imported to develop competition in the United States. It would be far better for the welfare of the American people if there were greater competition in this article as well as in many other articles placed upon the dutiable list, because, as I said, the temptation to charge exorbitant prices for the domestic products may not be resisted if we are to judge human nature in the future as we may judge it by the past, when the opportunities for swelling one's profits are so freely accorded as they are under the provisions of this bill.

There is another fact, too, that I should call to the attention of the Senator from North Dakota. Under the broad construction placed upon the embargo act this would be denominated a synthetic chemical compound or product, and it is now absolutely interdicted unless one obtains a license, and he may not get a license unless it can be shown that the product is not obtainable in the United States. So now we have an embargo upon the product.

Mr. SMOOT. Mr. President, may I suggest to my colleague that that is the embargo, one reason why we have not any imports.

Mr. KING. But I will say to my colleague that the embargo was not in existence in 1918, 1919, and 1920.

Mr. SMOOT. That was because of the war; and, of course, we could not get anything in then; but from May, 1921, the embargo has been in force and we could not get any in at all.

Mr. KING. In 1910 the imports were 1,002 pounds—that is, of the 10 cents per pound grade.

Mr. SMOOT. No; the rate was 10 cents a pound.

Mr. KING. Of the 8-cent grade, there were 78,000 pounds.

Mr. SMOOT. That was only during the small part of the year after the bill passed.

Mr. KING. In 1911 the imports were 45,000 pounds plus; in 1912, 28,000 pounds plus; in 1913, 51,000 pounds plus; in 1914, 4,000 pounds plus. Of the 6 cents per pound grade, in 1914 the imports were 57,046 pounds and in 1915 were 41,558 pounds.

Mr. SMOOT. Then we entered the war.

Mr. KING. Yes. In 1917 there was none imported and in 1918 there were 8,643 pounds imported. I have given the imports for the other years.

Now, Mr. President, in view of the fact that this product is manufactured by these great—I will not use the word "trusts"—organizations, with their colossal capital, well established as they are, engaged in the production of many chemicals and allied chemical products; in view of the fact that so small a part of the consumption is imported; in view of the fact that the revenue obtained by the imposition of a duty would be negligible, it does seem to me that this is not an item upon which we should lay this heavy duty, and that the amendment which I have offered should be unanimously agreed to.

Mr. SMOOT. Mr. President, I wish to say only a word. The House provided a 25 per cent ad valorem rate. The rate on the technical product is 8 cents, which is about 18 per cent, and on the medicinal it is 11 per cent, as the Senator from North Dakota has stated.

The pre-war rate, or the rate under the Underwood law, was 8 cents, and the highest importations were made under that rate. If we want to continue the embargo, if the embargo is to be the policy here for synthetic chemicals, we might as well place this item on the free list, so far as that is concerned, because it is embargoed from coming into the country. I am in hopes that proposition will die out at the earliest possible date. I do think, with the 8-cent rate which we have here, that 11 per cent is not out of the way for this particular item if we want to manufacture it in this country.

Mr. President, I am ready for a vote.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Utah [Mr. KING] to the amendment of the committee.

Mr. KING. On that I demand the yeas and nays.

The yeas and nays were ordered, and the reading clerk proceeded to call the roll.

The PRESIDING OFFICER (when Mr. STERLING's name was called). The present occupant of the chair transfers his pair with the Senator from South Carolina [Mr. SMITH] to the Senator from Oregon [Mr. STANFIELD] and votes "nay."

Mr. WALSH of Montana (when his name was called). I inquire if the Senator from New Jersey [Mr. FRELINGHUYSEN] has voted?

The PRESIDING OFFICER. The Senator from New Jersey has not voted.

Mr. WALSH of Montana. I have a general pair with that Senator, which I transfer to the Senator from Nevada [Mr. PITTMAN] and vote "yea."

Mr. WATSON of Georgia. I have a general pair with the junior Senator from Arizona [Mr. CAMERON]. I transfer that pair to the senior Senator from Tennessee [Mr. SHIELDS] and vote "yea."

The roll call was concluded.

Mr. SUTHERLAND (after having voted in the negative). I transfer my general pair with the Senator from Arkansas [Mr. ROBINSON] to the junior Senator from Delaware [Mr. DU PONT] and allow my vote to stand.

Mr. COLT. I have a general pair with the junior Senator from Florida [Mr. TRAMMELL]. I transfer that pair to the junior Senator from Pennsylvania [Mr. PEPPER] and vote "nay."

Mr. STANLEY. I inquire if the junior Senator from Kentucky [Mr. ERNST] has voted?

The PRESIDING OFFICER. The junior Senator from Kentucky has not voted.

Mr. STANLEY. I have a pair with that Senator, and being unable to secure a transfer I withhold my vote. If permitted to vote, I should vote "yea."

Mr. HARRISON. I transfer my general pair with the junior Senator from West Virginia [Mr. ELKINS] to the junior Senator from Rhode Island [Mr. GERRY] and vote "yea."

Mr. JONES of New Mexico. I transfer my general pair with the Senator from Maine [Mr. FERNALD] to the Senator from Missouri [Mr. REED] and vote "yea."

Mr. WATSON of Indiana (after having voted in the negative). I transfer my general pair with the senior Senator from Mississippi [Mr. WILLIAMS] to the senior Senator from Pennsylvania [Mr. CROW] and permit my vote to stand.

Mr. DILLINGHAM. I inquire whether the Senator from Virginia [Mr. GLASS] has voted?

The PRESIDING OFFICER. The Senator from Virginia has not voted.

Mr. DILLINGHAM. I have a general pair with that Senator, and therefore withhold my vote.

Mr. CURTIS. I desire to announce the following pairs:

The Senator from New Jersey [Mr. EDGE] with the Senator from Oklahoma [Mr. OWEN]; and

The Senator from Indiana [Mr. NEW] with the Senator from Tennessee [Mr. MCKELLAR].

The result was announced—yeas 22, nays 43, as follows:

YEAS—22.

Ashurst	Harrison	Myers	Underwood
Caraway	Heflin	Overman	Walsh, Mass.
Culberson	Hitchcock	Pomerene	Walsh, Mont.
Dial	Jones, N. Mex.	Sheppard	Watson, Ga.
Fletcher	King	Simmons	
Harris	La Follette	Swanson	

NAYS—43.

Ball	Hale	McLean	Smoot
Borah	Harreld	McNary	Spencer
Brandegee	Johnson	Nelson	Sterling
Bursum	Jones, Wash.	Newberry	Sutherland
Calder	Kellogg	Nicholson	Townsend
Capper	Keyes	Norbeck	Wadsworth
Colt	Ladd	Norris	Warren
Cummins	Lodge	Oddie	Watson, Ind.
Curtis	McCormick	Page	Weller
France	McCumber	Phipps	Willis
Gooding	McKinley	Shortridge	

NOT VOTING—31.

Broussard	Fernald	New	Robinson
Cameron	Frelinghuysen	Owen	Shields
Crow	Gerry	Pepper	Smith
Dillingham	Glass	Pittman	Stanfield
du Pont.	Kendrick	Poindexter	Stanley
Edge	Lenroot	Ransdell	Trammell
Elkins	McKellar	Rawson	Williams
Ernst	Moses	Reed	

So Mr. KING's amendment to the amendment of the committee was rejected.

The PRESIDING OFFICER. The question recurs on agreeing to the amendment reported by the committee.

Mr. KING. I move to strike out the numeral "8" in line 1, page 3, after the word "acid," and insert the numeral "2," so as to read:

Gallic acid, 2 cents per pound.

In view of the limited importations, the great production, and the enormous capital of those engaged in the production of this item, and in view of its importance in medicine and in products which enter into the lives of the people, it ought to be on the free list, but as an evidence of my high protectionism I have moved the amendment suggesting that the duty should be 2 cents a pound instead of the rate proposed by the committee.

Mr. LA FOLLETTE. Mr. President, I wish to ask the Senator if he is able to do so that he state the present price of gallic acid.

Mr. KING. On the 24th of last month the prices were 45 to 50 cents a pound for the technical and 70 to 75 cents a pound for the United States Pharmacopœia; but, as I indicated a few moments ago, the importations for the first nine months of 1921 were 20 pounds—of course, it is embargoed—and for 1920, 22 pounds; and from the period beginning back in 1910 and 1911 the importations have been very limited. I think, however, the Senator from New Mexico [Mr. JONES] desires to submit some observations.

Mr. LA FOLLETTE. Even when there was no embargo the imports were very limited, were they not?

Mr. KING. They were very limited.

The PRESIDING OFFICER. The question is on the amendment offered by the Senator from Utah to the amendment reported by the committee.

Mr. JONES of New Mexico. Mr. President, I just want to take a moment.

In further reply to the query of the Senator from Wisconsin [Mr. LA FOLLETTE] I will state that I have before me a comparison of these prices.

In 1908 the price on which the duty was levied on importations was 32 cents per pound; in 1910 it was 30 cents; in 1912 it was 33 cents; in 1914 it was 34 cents; in 1916 it was 38 cents; in 1918 it was $1.22. The price is not given for 1920. For 1921, as stated by the Senator from Utah, it was 45 cents. In other words, the price at which the article is imported now is about 50 per cent higher than it was before the war.

Mr. LA FOLLETTE. May I inquire whether the Senator is stating the foreign price?

Mr. JONES of New Mexico. This is the foreign price.

Mr. LA FOLLETTE. The price upon which the duty is levied?

Mr. JONES of New Mexico. Yes.

Mr. SIMMONS. Mr. President, may I ask the Senator a question? There is no importer's profit in that?

Mr. JONES of New Mexico. No; that is the foreign price on which the duty is levied. The importer's profit, of course, is added to that price.

Mr. SIMMONS. Has the Senator the American wholesale selling price?

Mr. JONES of New Mexico. Unfortunately the last issue of the journal which gives these prices does not state the price on technical gallic acid. The one which I have here states it only on the medicinal product. That is given at 75 cents, but that is the grade that is used for medicinal purposes.

Mr. SMOOT. The price of the technical acid is 45 to 50 cents.

Mr. SIMMONS. The point to which I want to call the attention of the Senator from New Mexico is this: The foreign price he has read there is the price upon which the duty is laid. There is no importer's profit in that. The importer is the jobber in that case, but there is no importer's profit in that. In the price which the Senator has just read, the American wholesale price, there is a profit—the profit of the wholesaler of this product in this country.

Mr. JONES of New Mexico. The Senator from North Carolina is quite right about that.

Mr. SIMMONS. So that you are comparing the foreign price upon which the duty is laid, and there is no profit allowed the importer for his commission, and so forth, in selling it, with the American price, which has in it the profits of the jobber or of the wholesaler, together with any expense that may be incident to transportation or that may be incident to insurance and other items. The point I wanted to suggest was this: If they want to compare these importers' prices—I mean the price upon which the duty is paid—with the American selling price, they ought to give us what that selling price is without any profit at all, and not give us for comparison the selling price with these profits inserted in it, sometimes running as high as two or three hundred per cent.

Mr. JONES of New Mexico. The Senator from North Carolina is quite right about that. The foreign price mentioned here as the price on which the duty is levied is the cost of the article in the foreign country and does not include any cost of transportation or profits of the importer, whereas the American selling price includes the profits and all other costs which are necessary in putting the article upon the market.

Mr. KING. Mr. President, may I inquire of the Senator whether there was any testimony before the committee indicating the cost of brokerage, insurance, freight, the construction of casks—because this would have to be a heavy wooden cask as a receptacle—or iron casks or barrels where required for articles that are brought to the United States? In other words, is there any testimony showing the proportion of cost, generally speaking, of these factors which must be added to the purchase price? I am speaking of the acids now, particularly.

Mr. JONES of New Mexico. Mr. President, so far as I have been able to find, there is no evidence of a definite character regarding costs on these articles at all. There was one manufacturer who appeared before the Committee on Ways and Means in the House and undertook to say how much duty he wanted upon these articles. It developed that his factory was manufacturing about 1,700 different chemical articles, and he made some rather broad statements regarding the costs—usually the question of the daily wage in this country and the wage in Germany; he referred to that—but there was no definite information on the subject of costs, certainly nothing from which one could draw a conclusion.

Now I want to call the attention of the chairman of the committee—I observe that he is engaged in private conversation at the present time—to the question of the duty on these items, gallic acid and tannic acid.

The bill puts the duty on tannic acid at 4 cents per pound, and the duty on gallic acid in the Senate bill is put at 8 cents per pound. One is just twice as much as the other; and in the testimony of the manufacturer who was interested in this item he said that on gallic acid he asked the same rates as on tannic acid, stating that the cost of the preparation of that is practically the same as the cost of preparing tannic acid. I should be glad if we could get some information here as to why there should be a duty of 4 cents a pound on tannic acid and 8 cents a pound on gallic acid, when, according to the testimony before the committee from the manufacturer, the cost is practically the same. I am at a loss to understand why there should be this difference of 100 per cent in the duty.

Mr. SIMMONS. Mr. President, I call the attention of the Senator to the fact that there seems to be no member of the Finance Committee here except the Senator from Wisconsin [Mr. LA FOLLETTE] to answer his very pertinent inquiry.

Mr. JONES of New Mexico. I observe two members of the committee over in one corner of the Chamber, probably discussing some other item. I hope they will give attention to this bill, so that we may progress. I am very anxious that the passage of this bill shall not be delayed, and yet I think the Senate is entitled to some information on this subject.

Mr. McCUMBER. Mr. President, do I understand the Senator to say that there is only one member of the Finance Committee present?

Mr. JONES of New Mexico. I said there were two members of the Finance Committee present, but they were off discussing, probably, some other item of the bill.

Mr. SIMMONS. Mr. President, I think I made that statement, but I did not look over in the corner of the Chamber and did not see the two Senators.

Mr. JONES of New Mexico. Mr. President, I wanted to make an inquiry of some member of the majority of the Finance Committee on a point which I observe in the testimony.

The principal witness who appeared before the committee testifying regarding tannic acid and gallic acid said that the duty should be the same on each of those two items, and that the cost of production was practically the same; but I observe that the duty upon tannic acid is 4 cents per pound and the duty on gallic acid is 8 cents per pound. There may be some very good reason for that which I have not been able to gather from the evidence before the committee or from the Tariff Commission or any other source; and I should like to get some information as to why there is that difference in these duties.

Mr. McCUMBER. Mr. President, on account of a good many persons speaking to me at the same time and the confusion in the Senate Chamber, I can not always tell just exactly what the question is that is asked by the Senator, and I am under the necessity of asking him to state his question in question form. If I am unable to answer it, I will say so.

Mr. JONES of New Mexico. My question, I thought, was rather plain, but I shall be glad to state it again.

I observe that this bill puts upon tannic acid a duty of 4 cents a pound and upon gallic acid a duty of 8 cents a pound. I should like to know why that difference was made—why the duty on gallic acid was made twice the duty on tannic acid.

Mr. McCUMBER. Mr. President, I can not just at the moment say why we placed one at 4 cents a pound and the other at 8 cents, except to say that it was a matter of difference of importations, uses, and many other things. We are trying to keep, as nearly as we can, what is equivalent to an ad valorem duty ordinarily of about 25 per cent upon the value of the product. I have already stated that on tannic acid the higher price gives us a duty of 28 per cent; the lower price gives us a duty of 22 per cent; the average would be about 25 per cent ad valorem, and the other is on about the same basis of 25 per cent.

Mr. JONES of New Mexico. Mr. President, that gives us some additional information. I observe in this paragraph a number of different items which in the bill as it passed the House were taxes at the uniform rate of 25 per cent ad valorem. It appears now from the statement of the chairman of the Finance Committee that the only reason for changing from the ad valorem rate of 25 per cent to a specific duty was simply to avoid the ad valorem rate fixed by the House, which they accepted, and simply fixed these per pound specific duties at a rate which would be equivalent to the House rate. So it is evident that there is no foundation for these changes or for the levy of these duties, so far as the Finance Committee is concerned, other than just a desire to make a sweeping change in several items from the ad valorem rate to a specific duty.

What does that mean? It appears that the prices of these different articles vary, so that there would be a specific duty in the one case of 4 cents a pound and in the other of 8 cents a pound. I can not understand how that is consistent with any theory of legislation which has been announced as the basis of this bill. The cost of the two items is the same, according to the testimony of this witness.

Mr. SMOOT. Mr. President——

The PRESIDING OFFICER (Mr. ODDIE in the chair). Does the Senator from New Mexico yield to the Senator from Utah?

Mr. JONES of New Mexico. I gladly yield.

Mr. SMOOT. If the Senator will read carefully, he will find that the 4 cents a pound duty is on tannic acid of 50 per cent or less purity, and tannic acid of over 50 per cent purity is taxed 10 cents. All the gallic acid is the same as the full strength tannic acid. So, if there was any mistake made at all, it was made in the imposition of the 10-cent duty on tannic acid and not in the imposition of the 8 cents on gallic acid. In other words, if the Senator's argument is correct, and that is the same as tannic acid, then we ought to increase the rate from 8 cents to 10 cents.

Mr. JONES of New Mexico. If the Senator from Utah is correct, there could be no argument for this specific duty. If there are different grades of gallic acid, and you levy a uniform rate of 8 cents per pound——

Mr. SMOOT. The Senator from Utah did not say there were different grades. The Senator said there were two degrees of tannic acid, not of gallic acid. There are two qualities of gallic acid; one is the technical gallic acid and the other is the medicinal gallic acid, but as to the percentages, it is not as it is in the case of tannic acid.

Mr. JONES of New Mexico. There is only one duty on gallic acid.

Mr. SMOOT. That is true; there is one duty on gallic acid.

Mr. JONES of New Mexico. And the Senator intimated, at least, awhile ago, if I understood him correctly, that there was a difference in grade; that one is cheaper than the other.

Mr. SMOOT. That is true.

Mr. JONES of New Mexico. And the duty is the same on the whole?

Mr. SMOOT. That is true.

Mr. JONES of New Mexico. I would like to know how the Senator can defend that.

Mr. SMOOT. Mr. President, the only way it can be defended is to say that, as far as the making of it is concerned, and as far as the same grade in a foreign country coming in competition with the two grades is concerned, there is just the same difference in the cost in the case of the one as in the case of the other. The ad valorem duty would present an entirely different situation. The equivalent ad valorem duty is 18 per cent on the one and 11 per cent on the other.

Mr. JONES of New Mexico. The Senator must admit, then, that no attempt was made by the committee to equalize or make uniform the duties on the different grades of gallic acid, either as to the cost of production or as to price.

Mr. SMOOT. I would not say that, Mr. President. I do not think the statement made by the witness is correct that tannic acid is the same as gallic acid, or that the same process is used. I do not agree with him; nor do I agree with him, nor does the market price bear him out, as to the value. Does the Senator want the 25 per cent, which the House fixed on this item, reinserted in the bill?

Mr. JONES of New Mexico. I am not discussing what I want.

Mr. SMOOT. I was asking the Senator. I did not know what he wanted.

Mr. JONES of New Mexico. What I wanted was to get information as to how these duties were laid and why they were laid. The only testimony before the committee as to the comparative cost of production is the statement of the manufacturer that the cost is the same.

Mr. SMOOT. The Senator knows that we did not take the statement of the manufacturers into consideration, because the manufacturers asked 25 cents on gallic acid, and we gave them 8. The Senator knows that the 25 per cent ad valorem rate is very much higher, and on the medicinal it is over 100 per cent higher than the rates fixed by the Senate committee. In other words, the Senate Finance Committee has cut the amount of duty upon gallic acid over 50 per cent from the House provision.

Mr. JONES of New Mexico. I understood from the statement of the Senator from North Dakota that they attempted to fix these rates at such a point that they would just about equal the 25 per cent. I should like to know who is right about it, the Senator from Utah or the Senator from North Dakota?

Mr. SMOOT. I do not think the Senator from North Dakota had reference to this one particular item. I think he had reference to all the items in this paragraph. The Senator from New Mexico knows that we have not always taken into consideration just what the House put in and fixed an equivalent ad valorem for their specific duty. The Senator will find that the duties fixed by the House were based on the American valuation plan, and he will find rates in the bill as reported to the Senate by the Senate Finance Committee which are lower than the rates fixed by the House on the American valuation plan.

Mr. JONES of New Mexico. There is no doubt about that, but I was trying to reconcile the statement of the Senator from Utah with that of the Senator from North Dakota, two leading members of the Finance Committee, and I wanted to develop some basis for the justification of these duties, if they could be justified at all.

Mr. SMOOT. Mr. President, I will simply mention one, and then I am not going to take any further time.

If the Senator will turn back to the statistics of 1910, 1911, and 1912, before the war, he will notice the importations of gallic acid into this country from Germany. During that time there was a duty of 8 cents. I do not remember just the figures, but a great percentage of the consumption of gallic acid in this country was imported into the country under the 8-cent rate.

We have not even gone above that, notwithstanding the conditions existing in Germany to-day, notwithstanding the ability of Germany to manufacture goods to-day at even less than it cost her to manufacture them during the pre-war period, as measured in gold dollars.

Mr. JONES of New Mexico. Mr. President, that calls for the consideration of a subject which has been very much discussed in the Chamber. The Senator again refers to importations of this article from Germany. The truth is that the raw product, the gallnut, from which these acids are made, must come from China, and Germany must pay for the crude product on a gold basis, and with her depreciated currency she is absolutely shut out from the market where the raw material must be procured. You will not find that any of this acid has been imported into this country from Germany; but every time something of this sort comes up somebody calls attention to the difference in exchange in Germany and the low cost of labor in Germany, and that is one reason why I called up this specific item. I wanted to find out if that same old excuse would be offered for this greatly increased tariff upon gallic acid.

It is true that prior to the war Germany did buy her raw material from China, and she did export some of it to the United States, but it is so no longer, and the people of the United States and of Germany, and everywhere else where this acid is made, get their raw material from China. Then Senators talk to me about the difference in the cost of labor and the difference in exchange in Germany in connection with this item. Whenever nothing else can be suggested as a justification for what has been done, apparently relying upon the lack of information on the other side, they get up and talk about Germany.

Mr. HITCHCOCK. Mr. President——

Mr. JONES of New Mexico. I yield to the Senator from Nebraska.

Mr. HITCHCOCK. Is it not a fact also that instead of talking about what Germany has done in the way of exporting goods to this country, Senators talk in a vague way about what they think Germany will do at some time in the future? There is no basis of fact now, judging from the present imports from Germany, for such an absurd fear as is used as a basis for these excessive tariff rates.

Mr. SMOOT. The Senator must know that the embargo absolutely prevents the importation of gallic acid into this country. That is why the importation was only 22 pounds. The Senator from New Mexico I know has examined the statistics, and if he will turn back to the pre-war period, no matter what the price was at that time, the rate averaged from 23 to 25 per cent, and now, under this bill, we are reducing it to 11 per cent, much lower than it was in the Payne-Aldrich law, and lower than the rate adopted by the House on the same item.

Mr. HITCHCOCK. It is true that the embargo was put upon the importation of many chemicals from Germany under the utterly false assumption that this country was going to be deluged by such importations, but this whole chemical schedule, whether covered by embargo heretofore or not, is directed against Germany, apparently with the purpose of preventing all imports from Germany, when everyone knows that we must have imports from Germany if we are going to export goods to Germany and give Germany an opportunity to particulate in the commerce of the world.

Mr. SMOOT. As far as the embargo is concerned, I am not a believer in the embargo at all.

Mr. HITCHCOCK. The Senator is not a believer in it, but he voted for it, and it was fastened upon the country.

Mr. SMOOT. The Senator from Nebraska is mistaken.

Mr. HITCHCOCK. I know the Senator personally disclaimed favoring it at the time. I think he is too intelligent a public servant to favor it.

Mr. SMOOT. The Senator from Nebraska did not stop there. He said the Senator from Utah voted for it. The Senator from Nebraska is mistaken.

Mr. HITCHCOCK. I understood that the Senator voted for it in the emergency tariff bill.

Mr. SMOOT. Not at all. The Senator is mistaken.

Mr. HITCHCOCK. The Senator voted for the emergency tariff bill which contained it.

Mr. SMOOT. Certainly; I was not going to vote against everything in the emergency tariff bill because of the fact that that embargo was contained in the emergency tariff bill.

Mr. HITCHCOCK. The Senator voted for the emergency tariff bill when we were trying to defeat it, and when he voted for that bill he voted for everything there was in it, and he voted for it knowing that the emergency tariff was not right.

Mr. SMOOT. Mr. President, there were provisions in the emergency tariff bill which meant the absolute preservation of industries in the United States, and I had to decide between the embargo and the destruction of those great industries in the United States. The Senator from Nebraska knows that. The Senator from Nebraska would have done the same that I did if he had been in favor of the emergency tariff bill.

Mr. JONES of New Mexico. Mr. President, as I said, I brought up this matter just at this time in order to emphasize the fact that the majority members of the Finance Committee are trying to frighten the people of the country with the ghost of Germany. This morning I clipped from the Washington Post an article on foreign-trade facts, commenting upon the statement of the Department of Commerce, and here is what I find: The ratios of the total foreign trade of England, France, and Germany are, respectively, 107, 114, and 39 per cent of the foreign trade for pre-war years. England and France have gotten back to a little above their pre-war export trade, but Germany, this great ghost which is built up and flaunted in our faces in the shadow of every day, has but 39 per cent of her pre-war foreign trade.

It is with reference to the item of gallic acid. It is claimed the reason why these conditions exist is that Germany must buy her raw products with gold and she can not get the gold. That is the reason why, in her leather and textile commodities, her prices to-day in gold are higher than the American prices, because she must buy her raw material and pay for it in gold, which she is unable to do and compete with the rest of the world.

I say that the time has come when this ghost should be put back in the dark closet. Let the members of the Finance Committee no longer attempt to scare the people of the country with it, and that in the face of the fact that our exports to Germany are several times our imports from Germany. Do we want to keep up this invisible thing here, using it as a mere pretext to impose upon the people of the country for monopolistic prices for these commodities?

There are only one or two large chemical concerns in the United States that make gallic acid, and by such duties these people are given an absolute monopoly. They can raise their prices where they will. It appears that on this very item the prices are now at least 50 per cent higher than they were prior to the war. You are not only willing to impose a tax upon this importation for the purpose of equalizing so-called costs of production but you are deliberately imposing a tax for the purpose not only of maintaining the existing high prices but in a manner to enable these concerns to raise their prices still higher.

I do not understand any justification for the high tax upon this article when the United States can compete with Germany or any other country in the world. We get the raw material for this product from China, and the other nations must get it from there. The cost of production, as stated by one witness, is no greater in the case of gallic acid than it is in the case of tannic acid, yet we find in the one case a duty of only 4 cents a pound and in the other case a duty of 8 cents a pound.

The Senator from North Dakota [Mr. McCUMBER] said a while ago that the only reason for the rate is that he wanted to make an average of 25 per cent ad valorem. The Senator from Utah disclaims any such purpose. That is the dilemma in which the people of the country find themselves when they undertake to understand the bill and get any basis for it. Here we have the two leaders on the majority side of the Finance Committee giving different reasons for the imposition of a duty upon the same item. How are we to understand it? When we undertake to ask questions, the Senator from Indiana [Mr. WATSON] rises and says that any answer to a question will be considered as a speech by the person making the answer.

Mr. SMOOT. Mr. President, perhaps the Senator from North Dakota had reference to the statement made by the Senator from New Mexico that tannic acid was only 4 cents a pound. The Senator from Utah called attention to the fact that gallic acid and tannic acid are not the same as that on which 4 cents a pound was imposed. The tannic acid that is equal to the gallic acid is 10 cents instead of 8 cents a pound.

Mr. JONES of New Mexico. I have here the prices of tannic acid before the war, and I find that the prices of tannic acid before the war were higher than the prices of gallic acid.

Mr. SMOOT. Yes; and now they are less than gallic acid. If the Senator will take his paper and examine it, he will find they are less than gallic acid now.

Mr. JONES of New Mexico. Yes; but I should like to know——

Mr. SMOOT. That is why we cut the rate provided by the House. The rate provided by the House was 25 per cent ad valorem, and that meant 18½ cents in the one case and 11½ cents in the other case. Now we take both of them and make

the rate 8 cents a pound. So it is virtually a cut of 50 per cent in the House provision. The whole question of the raw material, as we may term it, from which the gallic acid is made, was changed. We tried to bring the matter up to date and that is why the change was made.

Mr. JONES of New Mexico. The Senator from Utah said something a while ago about the embargo. I ask if the embargo applies to tannic acid?

Mr. SMOOT. No; it does not; because that is not a synthetic chemical.

Mr. JONES of New Mexico. Does it apply to gallic acid?

Mr. SMOOT. It does; because that is a synthetic chemical made from tannic acid.

Mr. JONES of New Mexico. If that is true, why did we have any gallic acid imported in 1921?

Mr. SMOOT. It came in before May, 1921. The small amount that came in during 1921 came before the embargo was put upon it under the emergency tariff law.

Mr. JONES of New Mexico. Does not the Senator recall that the embargo act was passed in 1919?

Mr. SMOOT. The embargo provision of the emergency tariff law, when it ran out, was changed and the Senator from Utah called attention to that the other day. It takes in now all synthetic chemicals. That was discussed on the floor of the Senate the other day.

Mr. JONES of New Mexico. Was not the same language used in the act of 1919 that was used in the act of 1921?

Mr. SMOOT. No. I told the Senator that the other day and read it to him and called his particular attention to the changes. We occupied a good deal of the time of the Senate on this very proposition, and I thought the Senator understood the change which was made in the emergency tariff act. If the Senator will remember, that is one of the things to which I objected on the floor of the Senate when the emergency tariff bill was under consideration. I know that the Senate did not understand how broad it was when it was put in there.

Mr. JONES of New Mexico. Then we have this situation: In 1908 the price of tannic acid was 55 cents a pound; in 1910, 48 cents a pound; in 1912, 48 cents; in 1914, 43 cents; in 1916, 31 cents; in 1918, 44 cents; in 1920, 54 cents. In 1921 there is given a price of 22 cents. Does the Senator believe that to be a representative price of the article, taking into consideration also that prior to the war the price of gallic acid was at least one-third more than the price of tannic acid?

Mr. SMOOT. It would only be a guess if I made the statement, because the Senator from Utah does not know what strength of tannic acid was shipped in 1921. It may have been an entirely different strength of tannic acid that was shipped in the years before. I can not say, and, therefore, I can not answer the Senator.

Mr. JONES of New Mexico. I am glad the Senator has so stated. His present statement destroys the argument which he made a while ago when he said the price of tannic acid was lower than the price of gallic acid.

Mr. SMOOT. It does not destroy the argument at all. I am speaking now of the present value of the two articles. All the Senator has to do is to take the prices that were given in 1912 and then come down to 1915 and then right down to date. I refer to the quotations in this country. He will learn that the values are quite different. The quotations in this country show the strength of tannic acid, and therefore we can compare them. I do not know whether the tannic acid which was imported was less than 50 per cent strength or more than 50 per cent strength, but we do know what the prices were in this country and the strength of the article.

Mr. JONES of New Mexico. Then how can the Senator say that the price of gallic acid to-day is higher than the price of similar tannic acid?

Mr. SMOOT. I can say it because we have here the quotations of April 10, 1922, and the prices are as follows: Technical tannic acid, 37 cents; medicinal, 65 cents. On the same identical day the price of gallic acid, technical, was 45 cents and medicinal 70 cents. Therefore the Senator knows there is a difference between the prices as stated.

Mr. JONES of New Mexico. That is on the present quotations.

Mr. SMOOT. That is what the Senator from Utah said in the beginning, and that is what the Senator from New Mexico asked.

Mr. JONES of New Mexico. The Senator is quite right, and I thank him for the information, because I did not happen to have the prices just now. I thank the Senator for the information. The Senator also gave me the information a while ago that tannic acid was not under an embargo at the present time, while gallic acid is.

Mr. SMOOT. Yes.

Mr. JONES of New Mexico. For that reason they put a duty on gallic acid at least twice the duty on tannic acid.

Mr. SMOOT. No; the Senator is mistaken again.

Mr. JONES of New Mexico. Then I ask to be corrected.

Mr. SMOOT. The duty on tannic acid over 50 per cent strength is 10 cents a pound under the provision that has been voted on. The rate now asked on gallic acid is 8 cents a pound.

Mr. JONES of New Mexico. Will the Senator tell me the strength of the acid for which he has just given the prices?

Mr. SMOOT. The technical, I should judge, is 70 per cent pure and the medicinal is over 80 per cent pure. That is the case with tannic acid.

Mr. JONES of New Mexico. Can the Senator quote the price?

Mr. SMOOT. I repeat the technical has a strength of 70 per cent, while the medicinal, of course, is a purer article, and, from its price, I should judge must be over 80 per cent pure.

Mr. JONES of New Mexico. I beg the Senator's pardon; there was some confusion, and I did not catch the figures he gave as to the different grades of tannic acid.

Mr. SMOOT. Technical tannic acid runs as high as 70 per cent, and the price of 70 per cent tannic acid is 37 cents. The medicinal runs over 80 per cent pure; sometimes it runs higher, as high as 98 per cent, or almost pure, which is perhaps the highest possible grade, and the price of that is 65 cents.

Mr. KING. Will the Senator from New Mexico yield to me?

Mr. JONES of New Mexico. I yield to the Senator from Utah.

Mr. KING. For information I should like to inquire where the senior Senator from Utah finds medicinal as exceeding 80 per cent? It is not in paragraph 1.

Mr. SMOOT. No; but the Senator from New Mexico is speaking of tannic acid. Perhaps I can answer the question better by saying that the lower grade, the strength of which is not 50 per cent, is only a liquid extract of nutgalls, and in that form it can not be over 50 per cent; but when it becomes a manufactured article—in other words, when the extraneous matter is taken out of it—it runs up to the point where it becomes a medicinal article.

Mr. KING. I understood the senior Senator from Utah to contend that under the provision of the bill upon which we have voted if it were denominated medicinal tannic acid it must be 80 per cent or more pure; and I do not find that in the bill, because the item says 50 per cent.

Mr. SMOOT. I said it runs generally about 80 per cent; and I will say to my colleague that the manufacturers would not think of manufacturing it of a less percentage than that. I do not say that they may not take the lower grade and manufacture it into medicinal, and I do not say that it could not be classed as medicinal, but no one who was manufacturing medicine for the people of the United States would ever think of using this article unless it were 80 per cent pure.

Mr. KING. I am not controverting that; the only point I am making is that it is denominated medicinal at a lower rate than 80 per cent, and I understood the senior Senator from Utah so to contend.

Mr. SMOOT. No; I simply said that on tannic acid containing less than 50 per cent the proposed duty is 4 cents and on all above 50 per cent it is 10 cents a pound.

Mr. KING. The senior Senator from Utah is right there.

Mr. SMOOT. Then I followed that statement with the further statement that medicinal tannic acid generally runs 80 per cent and sometimes as high as 98 per cent pure.

Mr. KING. That may be; I do not affirm as to the strength of the acid when it is denominated medicinal; but the grade as fixed in this schedule upon which we have voted does not say that in order to be medicinal it must be at least 80 per cent pure.

Mr. JONES of New Mexico. Mr. President, there has at least been developed one thing which I wanted to develop, and that is that prior to the World War tannic acid was selling for about 50 per cent higher than gallic acid. Now gallic acid is selling very much higher than is tannic acid. Tannic acid is not barred by the embargo law, while gallic acid is barred. Gallic acid is 50 per cent above the pre-war price, while tannic acid is about the same or less than the pre-war price. That means that the embargo has resulted in raising the price of gallic acid 50 per cent; and, in order to enable the manufacturers of this country to maintain that price or to increase that price, the Finance Committee propose to levy a duty of 8 cents per pound upon gallic acid, which has been barred by the embargo. They put only 4 cents a pound upon the article which has been reduced in price, while they put twice the amount on the article as to which there is an absolute monopoly in this country. Evidently, Mr. President, the members of the Finance Committee who suggested such rates did not understand what they were doing. I

ask the two leaders of the Finance Committee on the floor here if they will not reconsider their own action? I ask if they are willing for it to be said to the country that by means of an embargo they have raised the price of this commodity 50 per cent and that by means of this tariff they propose to maintain the price or to increase it because one and perhaps two concerns in this country make the product. Evidently it must have been done without any consideration of the facts and as a result of the lack of information; I can not believe that the very astute and intelligent and able members of the Finance Committee who brought in this bill would have done such a thing as this with their eyes open to the situation.

Mr. SMOOT. Mr. President, the committee is not making this bill for one year, at which time we hope the embargo will cease. The committee made this bill to be on the statute books for a number of years. The Senator must understand that his own party brought into being the embargo; it was started by the Senator's own party, and I think the Senator voted for it.

Mr. JONES of New Mexico. The Senator is quite right about that, but I gave notice when we last extended the period of its operations that I would never do so again.

Mr. SMOOT. I am glad to hear that.

Mr. JONES of New Mexico. I know the Senator from Utah was opposed to it, as was I.

Mr. SMOOT. I will say to the Senator that if we were making this bill to operate only while the embargo lasted, or, if the embargo were to last as long as this bill, there would be no need for any rates to speak of, because the embargo provides that wherever an item can be made in this country in a sufficient quantity to meet the needs of the country, then permission can not be obtained to import it into the country.

Mr. JONES of New Mexico. Yes.

Mr. SMOOT. I want the Senator to understand that this bill is not being made for one year during which the embargo is extended, but we are making a bill to last we hope indefinitely.

Mr. JONES of New Mexico. Yes. I will call attention to a previous statement of the Senator in regard to that.

Mr. SIMMONS. Mr. President——

The VICE PRESIDENT. Does the Senator from New Mexico yield to the Senator from North Carolina?

Mr. JONES of New Mexico. I yield.

Mr. SIMMONS. I understand with reference to this and a number of other commodities that are connected with the dye industry, the bill authorizes the continuance of the embargo.

Mr. SMOOT. For one year after the passage of the bill.

Mr. SIMMONS. It is also provided that the embargo may be extended for another year by action of the President.

Mr. SMOOT. In case the President sees fit to extend it, he is given that authority.

Mr. SIMMONS. I wish to ask the Senator if anticipating the termination of the embargo by the lapse of one year, or its termination at the end of two years by the action of the President in extending it, duties are not imposed to become effective as soon as an embargo is removed, and if those duties are not excessively high, so high that they will operate almost as a prohibition against the importation of these articles after the embargo shall have been removed?

Mr. SMOOT. Mr. President, there are some of the duties that I consider high and others which are not sufficient, in my opinion—and I am only expressing my opinion. I can not understand, however, why we should consume a whole day on an item like this when the present Underwood-Simmons Act provides a duty of 6 cents a pound and the House provided a duty of 20 per cent ad valorem, which the Senate committee has cut into, not to be effective while the embargo is on, but to be effective after the embargo is off.

Mr. JONES of New Mexico. Mr. President, of course the duties will be effective after the embargo is off, otherwise there is not justification for a duty on any of the items embraced within the embargo. That is quite true, but nevertheless the committee has fixed these rates in the manner I have stated. On tannic acid, which prior to the war, in normal times, sold for 50 per cent more than the gallic acid, the committee have levied a duty of only 4 cents a pound. Gallic acid is selling for about 50 per cent more than tannic acid——

Mr. SMOOT. Oh, no; it is only about 5 cents a pound. The Senator is wrong in that respect.

Mr. JONES of New Mexico. I was using the figures for the purpose of illustration. I withdraw the statement in regard to 50 per cent and will say 5 cents a pound more.

Mr. SMOOT. Five cents a pound.

Mr. JONES of New Mexico. But the fact remains that tannic acid now is selling for less than gallic acid, and gallic acid is under the embargo. That explains why the price is so high—50 per cent higher than it was prior to the war.

Mr. SMOOT. I have the prices here now for the years 1914, 1915, 1916, 1917, 1918, 1919, 1920, 1921, and 1922.

Mr. JONES of New Mexico. I have them also and I have put them in the RECORD.

Mr. SMOOT. Has the Senator the invoice prices? Is he comparing invoice prices with selling prices of gallic acid?

Mr. JONES of New Mexico. That is what we are talking about.

Mr. SMOOT. But the Senator can not as to one item take the invoice price of the importation, and then as to the other item take the selling price quoted from a paper in this country as to what it sold for generally throughout the country. That is not a fair comparison.

Mr. JONES of New Mexico. I agree with the Senator that it is not, and for that very reason there is no proper basis for the rates in this bill.

Mr. SMOOT. I do not agree with the Senator as to that.

Mr. JONES of New Mexico. What I am attempting to show is that under normal conditions, ranging over a period of years when there was no war, tannic acid was about 50 per cent higher in price than gallic acid, while now the price of gallic acid has increased until it is above the price of tannic acid, and it is now proposed to put a duty on gallic acid of 8 cents a pound and on tannic acid of only 4 cents a pound. The one is under the embargo and the other is not. The necessary result will be that they will protect the producers in this country in their high price for gallic acid much beyond the price of the tannic acid, which before the war was selling about 50 per cent higher than the gallic acid. It shows the utter lack of any information or scientific basis for the framing of this bill. It is mere guesswork.

Summing it all up, I am inclined to agree with the Senator from North Dakota that they just accepted the 25 per cent ad valorem blanket which the House had spread over the whole basket clause of this paragraph. They got prices from somewhere, and then figured out that the prices at so much per pound would result in about 25 per cent ad valorem. That is the pitiable spectacle which we have here—that they attempt by a specific rate, based upon uncertain and in this case practically regulated prices, to levy a blanket ad valorem tax. My belief is that when they came to this paragraph they probably turned it over to some clerk, some assistant who was helping to figure out this thing, and told him to change that from an ad valorem to a specific duty, without ever giving any consideration to the effect of such procedure; but it has been demonstrated here by the statements of the Senator from Utah and by the facts in the case that they are levying a tax 100 per cent higher upon one article than upon the other, with the evident and inevitable result that they build up a monopoly in this country. It is a monopoly under this embargo. They want it a monopoly when the embargo ceases.

Mr. SMOOT. Mr. President, the Senator must not misquote me again. The duty on tannic acid the strength of which is less than 50 per cent is 4 cents a pound. Above 50 per cent it is 10 cents a pound. The Senator now is comparing the tannic acid above 50 per cent, the duty on which is 10 cents, with gallic acid, and that is the only thing he can compare it with. He can not compare it with the other, because the other is just simply a liquid extract of nutgalls when it is less than 50 per cent, and that is not tannic acid. If the Senator is going to make any comparison, he ought to be absolutely fair and make it between two items that are comparable; and therefore it is 10 cents as against 8 cents.

Mr. JONES of New Mexico. Then I will ask the Senator what is the strength of these acids here? These are official figures which I have.

Mr. SMOOT. I know from the price of them what strength they are, and I think the Senator will agree with me. The prices of the technical acid and the medicinal acid are given here for every year from 1914 down.

The price of tannic acid in 1914 was 70 cents for technical acid and 75 cents for medicinal acid.

In 1915 the prices were 70 and 75 cents, respectively.

In 1916 the prices were 45 and 80 cents; that is, when the war began.

In 1917 the prices were 65 and 95 cents.

In 1918 the prices were 55 cents and $1.30.

In 1919 the prices were 65 cents and $1.40.

In 1920, 60 cents and $1.35.

In 1921 the medicinal acid—that is the only quotation we have—was $1.

In 1922 it fell to 75 cents.

In the case of gallic acid, the price of the medicinal acid in 1915 was 75 cents, as against 75 cents for tannic acid at the same time.

In 1916 the price of gallic acid was 85 cents, as against 80 cents for tannic acid.

In 1917 it was $1.28, as against 95 cents.

In 1918 it was $1.55, as against $1.30 for tannic acid.

In 1919 it was $1.60, as against $1.40.

In 1920 it was $1.40, as against $1.35.

In 1921 it was $1.15, as against $1.

In 1922, which is the first time it fell under the price of tannic acid, it was 70 cents, as against 75 cents.

Mr. JONES of New Mexico. Mr. President, I was going according to these official figures of importations.

Mr. SMOOT. I know where the figures come from, and I want to say that to be absolutely fair between man and man, and fair to the Senate itself, the Senator ought to quote comparable figures. The Senator is quoting the foreign invoice price and comparing it with the price at which the commodities are quoted in the United States. That is hardly a fair comparison, and I think the Senator will admit it. There is not anything in this whole matter that I want to cover up at all—not in the least—but I do think it is fair, when you are comparing two items here, that they should be two items that are comparable. The Senator ought not to take something that is not comparable with one article and then say that it is a 100 per cent increase, whereas the gallic acid is just 20 per cent less than the same quality of tannic acid.

Mr. JONES of New Mexico. Let me ask the Senator from Utah whether he did not say that the reason why they had a lower duty on the tannic acid of that grade was because it was lower?

Mr. SMOOT. No; the gallic acid is lower than the tannic acid of the same character. The tannic acid is 10 cents and the gallic acid is 8 cents. Then I said to the Senator that the price of gallic acid to-day of the medicinal grade is lower than the price of tannic acid, and before the war it was higher. The Senator is correct in that; but we found that the more pure tannic acid required in this country a little more protection than did gallic acid. The House did not agree with us, but we think we are right.

Mr. JONES of New Mexico. Mr. President, then there is an absolute difference in view between the Senator from Utah and the Senator from North Dakota that this was to be made on the basis of 25 per cent ad valorem. Would not the price of the tannic acid have to be twice as high as the price of the gallic acid in order to make each of them 25 per cent, when you have a duty of 4 cents a pound on one and 8 cents a pound on the other? Is there any such difference in those prices?

Mr. SMOOT. As I told the Senator, the whole difference is in strength. The rate of 4 cents a pound that the Senator speaks of is not on the same tannic acid that is quoted in the prices that the Senator has just read, or that I have just read. It is the higher grade of tannic acid that carries a rate of 10 cents a pound.

Mr. JONES of New Mexico. I will ask the Senator now whether the present prices which he is reading from are the prices which were considered by the committee when the bill was prepared?

Mr. SMOOT. They were the only prices that the committee had, and the prices that I have quoted are for the medicinal acid in both cases.

Mr. JONES of New Mexico. What is the date of those prices?

Mr. SMOOT. They are right up to date—April 10, 1922.

Mr. JONES of New Mexico. What time in 1922?

Mr. SMOOT. April, 1922.

Mr. JONES of New Mexico. These items were prepared before that.

Mr. SMOOT. No; I do not think so, Mr. President. I think this is almost one of the last amendments that was put in this bill.

Mr. JONES of New Mexico. And is that the only information that the Senator had when this bill was prepared?

Mr. SMOOT. We had all the prices from 1913 clear down to date. We had everything laid before us there as collected by the Tariff Commission, and we noted exactly what the prices were each year, and that is the information that we acted upon, given us by the Tariff Commission.

Mr. McCUMBER. Mr. President——

Mr. JONES of New Mexico. I yield to the Senator.

Mr. McCUMBER. If the Senator will allow me, because he has stated several times that there was some difference in statement between the Senator from Utah [Mr. SMOOT] and myself, I will say that the pre-war price of gallic acid was about 30 cents a pound. We put a duty of 8 cents a pound upon it. That is equivalent to about 21 per cent ad valorem. The price of tannic acid before the war—the figures I have here are for 1911—was 39 or 40 cents, and we put a duty of 10 cents a pound upon it. That would be just about 25 per cent. On one it would be about 21 per cent on the pre-war figures, and on the other it would be about 25 per cent; but on the whole, taking the prices throughout, it would range about 25 per cent on the pre-war prices, and we thought that was about fair.

Mr. WALSH of Montana. Mr. President, will the Senator pardon an interruption?

Mr. JONES of New Mexico. I yield.

Mr. WALSH of Montana. The information now given by the Senator from North Dakota is interesting, because I have understood heretofore that these duties were levied upon some basis of the difference in cost of production, or difference in the price in the foreign market and the price in the American market; but I gather that that was not the rule here, because here, I gather from what the Senator has said, the committee conceived that 25 per cent was about the right rate of duty, and that that rule was observed in this instance.

Mr. McCUMBER. I have stated that we thought that 25 per cent was a sufficient duty in this instance, and we levied that per cent.

Mr. WALSH of Montana. Then, so far as this item was concerned, the rule——

Mr. McCUMBER. There is no rule to go upon in regard to the present cost of an article which is not being imported at all; and I think we were safe in relying practically upon the pre-war prices of these two articles, inasmuch as the importations were practically negligible. This tariff bill is not alone for protection. It is for both protection and revenue. The Underwood rates were 6 cents. On one of these articles we raised those rates to 8 cents. Eight cents represents an equivalent of about 25 per cent ad valorem on the basis of the pre-war price of the foreign importations at that time. To get down to every instance and show just what the cost of production at home and abroad was is impossible. The Senator understands as well as I do the impossibility of ascertaining that in all cases. If we could ascertain it, it would be a pretty fair rule to follow.

Mr. WALSH of Montana. Of course, I was simply quoting the Senator from North Dakota, who told us some days ago that that was the rule that was observed.

Mr. McCUMBER. Oh, no, Mr. President.

Mr. WALSH of Montana. Oh, yes.

Mr. McCUMBER. I do not want to be misquoted. I gave that rule as well as half a dozen other ones, all of which had to be taken into consideration, and I never stated at any time that we held to one specific rule.

Mr. WALSH of Montana. No; the Senator did not say that.

Mr. McCUMBER. That has been quoted so many times, and so inaccurately, that it seems to me there ought to be a time when it will cease to be reiterated.

Mr. WALSH of Montana. I do not want to be inaccurate at all, if the Senator will pardon me. I have before me his very language in answer to an inquiry addressed to him by the Senator from New Mexico.

Mr. McCUMBER. But the Senator has not all of my statements.

Mr. WALSH of Montana. No; I have not all of them.

Mr. McCUMBER. I do not pretend, in a little colloquy that may relate only to one question, to bind myself to state everything that was taken into consideration in fixing a rate. I did that in the first instance. I have reiterated it several times over since.

Mr. WALSH of Montana. I do not undertake to say that the Senator did not say something else at some other time; but, being interrogated by the Senator from New Mexico as to the principle upon which the rates were fixed, the Senator stated without any equivocation and without any qualification that the rule was the difference in cost of production, with the cost of transportation to this country added to the foreign cost.

Mr. McCUMBER. Mr. President, I did not state that without any qualifications, and if the Senator will read further along he will find that I did give other bases of ascertaining what would be a fair test.

Mr. WALSH of Montana. I will not quarrel with the Senator about that, but I want to inquire of him now whether this other rule—that is to say, the 25 per cent rule—was applied only to those commodities falling under the embargo act, or whether it was pursued further in levying the rate?

Mr. McCUMBER. There is a general basket clause in the chemical schedule which carries a duty of 25 per cent ad valorem. We thought there should be a specific duty on many of these articles. We placed a specific duty that would be about the equivalent of 25 per cent as nearly as we could ascertain it, so that it would be in about the same ratio as the many items on which we could not put a specific duty on account of lack of

description, and so forth, and which would fall under the basket clause and pay 25 per cent ad valorem.

Mr. WALSH of Montana. Are we to understand that the 25 per cent ad valorem represents the difference between the cost of production here and abroad?

Mr. McCUMBER. There are articles the importations of which are comparatively small, and I have stated time and again that there are only very few instances in which we could get the figures as to the actual cost of production of an article at home and the cost of production of the same article abroad. There are some American manufacturers who also have factories in foreign countries, and they have been good enough to give us in many instances just what it costs them in the United States to produce an article, giving all the items which make up the cost and the equivalent items which make up the cost in a foreign country. We are unable to get that in very many instances. But, as I have stated time and again, there has always been a very close relation between the selling price of an article produced abroad in the markets abroad and the selling price of an article produced in the United States in the markets of the United States, and without a better basis we have adopted that, both in Republican tariffs and in Democratic tariffs, as the basis of making our duties, rather than fixing them upon the basis of the cost of production abroad.

Mr. WALSH of Montana. I am not quite sure that I understand the Senator's reply to my inquiry; but, as I understand him now, the 25 per cent, or the other ad valorem rate, whatever the rate may be, on these articles in the basket clause, to which he refers, does not represent the difference in the cost of production here and abroad, or at least the committee does not know whether it does or does not.

Mr. SMOOT. No; and no one who ever voted for a basket clause in a tariff bill would know whether every item should be given that rate or not. The basket clause is to include everything that is not specifically mentioned. Nobody can tell what will fall in it. There may be new items developed between the enactment of one tariff law and the passage of the next which would fall in the basket clause.

Mr. WALSH of Montana. I should think so. We will understand, then, that with respect to all items in the basket clause the rule that the rate is fixed by taking the difference in the cost of production here and abroad does not apply at all.

Mr. SMOOT. It may apply.

Mr. WALSH of Montana. It might possibly apply.

Mr. JONES of New Mexico. Mr. President, I thank the Senator from North Dakota for his endeavor to straighten out this difficulty, but I am afraid we are in a worse dilemma than ever. The Senator from Utah just stated that these rates were fixed on the prices in the Drug Journal of this year. The Senator from North Dakota has just stated that they were fixed on the basis of the prices prior to the war, so I am afraid that instead of helping out the situation they have made the situation worse. One Senator takes one time, the other another, and I am at a loss to understand how one could take prices of one period and another prices at another period, with the war occurring in between, and thus furnish any scientific basis for the preparation of this bill.

I realize that the Senator from Utah had one expert at his side conferring with him while he was attempting to answer, and the Senator from North Dakota had another at his side.

Mr. SMOOT. Mr. President, I want to say, as far as the expert at my side is concerned, that I have him here to hand me the prices to be quoted when I tell him what I want. I have a knowledge as to the items, but do not carry the figures in my mind as to all the items.

Mr. JONES of New Mexico. Did not the Senator from Utah state that the duties were arrived at by taking the prices quoted for April?

Mr. SMOOT. I said the prices I gave were quoted in April.

Mr. JONES of New Mexico. I asked the specific question, if those were the prices on which this bill was framed, and the Senator from Utah said they were, that they got as recent prices as they could.

Mr. SMOOT. The Senator never said anything of the kind. The Senator said we took the difference in the prices of the two articles; that is, the pre-war price compared with the price to-day. We took the prices of to-day to show the difference between tannic acid and gallic acid.

Mr. JONES of New Mexico. I ask the Reporter to give me a copy of just what the Senator from Utah did say.

Mr. SMOOT. The Reporter can read it if the Senator desires, if he can find it; but if the Senator expects me to stand here and help him kill time by answering, when he asks the same question every day, as the Senator from New Mexico has been doing in the last five or six days, as to how we arrived at every single rate in the bill, I am not going to take the time to answer.

Mr. JONES of New Mexico. I think the Senator is probably wise in not trying to answer.

Mr. SMOOT. I may be wise, but I am not going to do it; I am not going to be a party to this delay.

Mr. JONES of New Mexico. Never yet has any Senator on the other side undertaken to give a scientific basis for the framing of this bill, so far as the great majority of its items are concerned.

Mr. SMOOT. No Senator on this side could make any kind of an answer that would be satisfactory to the Senator from New Mexico. Nobody could answer him. If we answered him one way, then the Senator from New Mexico would take just the opposite view, and what is the use of wasting the time?

Mr. JONES of New Mexico. The trouble is, as the Senator from North Dakota stated a while ago, that they had one basis for a part of these items and another for another, and so on. It is all jumbled up, and nobody can tell about it, and I do not blame the Senator for not wanting to even give the facts as to the basis on which the duties on these items were fixed. I think the country ought to know just precisely how the situation has developed; that this bill is nothing but a hopper full of different ideas and different guesses, and by turning the machine they grind out these rates.

Mr. President, I just read in connection with the hearings on this particular item, or on the one just preceding, a statement of the Senator from Utah that he did not expect this bill to last many years.

Mr. SMOOT. The Senator from Utah did not say any such thing. The Senator from Utah said they were making this bill to last more than a year, and therefore we were not making the rates to take effect as long as the embargo lasted.

Mr. JONES of New Mexico. I just read what I stated. I read it to-day, but I do not think I will be able to put my hand on it without too much delay. I do not want to retard the passage of this bill when we can do it in an intelligent way, but I quoted the exact language of the Senator as used in these hearings.

Mr. SMOOT. The Secretary can read just what I said.

Mr. JONES of New Mexico. I referred to what the Senator said in the hearings before the committee.

Mr. SMOOT. I do not know what the Senator has reference to. I may have asked a witness whether he wanted it to remain on the statute books more than a year.

Mr. JONES of New Mexico. What the Senator said was that this bill would not last many years.

Mr. SMOOT. That is what I expect and that is what I hope, but the Senator said I made the statement that it would not last many years, or else I misunderstood him.

Mr. JONES of New Mexico. The Senator now says that he made such a statement, but that it was not on the floor of the Senate that he made it.

Mr. SMOOT. The Senator is mistaken again. The Senator from Utah stated that this rate upon gallic acid was not made to take effect while the embargo was to be in force, and that is only for a year. But we made the rates apply to gallic acid on account of the fact that we expected this bill to remain on the statute books for some time.

Mr. JONES of New Mexico. I wanted to compliment the Senator on having made what I believed would be a correct prophecy, that this bill will not remain on the statute books many years. I can not turn to it just now, but I will be glad to read it to the Senator.

Mr. SMOOT. To what rate did it apply, and in what hearing was it?

Mr. JONES of New Mexico. I will not take up the time in trying to find it now, but I will find it for the Senator.

Mr. SMOOT. I never looked over any of the reports made of those hearings, but if a stenographer ever reported me as saying that I did not expect this bill to remain on the statute books more than a year——

Mr. JONES of New Mexico. I said not many years.

Mr. SMOOT. Or not many years, then he reported me incorrectly. There may be lots of mistakes in the report, because I did not have the time to look over a single statement made before the committee.

Mr. JONES of New Mexico. I am quite sure that that was the case; nevertheless, it appears in the printed report of the hearings before the committee. I shall endeavor to find the passage, and I shall also get the notes from the reporter as to what the Senator said this afternoon.

I want to disclaim any thought of unnecessarily delaying the passage of this bill, as the Senator from Utah has just inti-

mated I am doing. I have no such intention as that in my mind, but I do insist that the people of this country shall understand, before it is passed, what a monstrosity this bill is, and I hope that there will be such an uprising of sentiment in this country that the committee will be forced to ask to have this bill recommitted.

Mr. SMOOT. Mr. President——

Mr. JONES of New Mexico. Mr. President, I do not care to yield any further. I want to get a vote on this item.

Mr. SMOOT. That is what I want. I want to say that so far as I am concerned I will frankly admit to the whole American people that the Senator from New Mexico is disgusted with the bill and will remain in that frame of mind. Not only today, but up until the minute it is passed he will say that it is a monstrosity.

Mr. JONES of New Mexico. Of course, the Senator from Utah would not apply adjectives of that sort to a product of his own brain. I presume he must view this measure with great admiration, but the people of the country are going to understand what it is. I do not want them to accept my views on the bill. I do want to develop what the items mean, and then let the people of the country judge for themselves. I do not ask my people to accept my judgment about the bill, but I do think they are entitled to know just what the bill means, and then pass their own judgment upon it.

Mr. President, I do not believe that there is any just foundation for these rates. I do not believe that any explanation has been made which would approach a justification for the rates. When we begin to ask questions as to why these rates were made and the basis for them, we are met at once by the assertion that we are filibustering. I deny any such motive from this side of the Chamber.

Mr. WALSH of Montana. Mr. President, I wish to place in the RECORD at this point the remarks of the Senator from North Dakota [Mr. MCCUMBER] alluded to a moment ago, to be found on page 5946 of the RECORD of April 25, being interrogated by the Senator from New Mexico [Mr. JONES], as follows:

I respectfully request that the chairman of the Finance Committee give the Senate and the country the reason why acetic acid was taken off the free list and put upon the dutiable list. Will the Senator from North Dakota oblige us with some information on that subject?

The Senator from North Dakota in reply made the following statement:

Mr. President, the reason I can give for placing this particular item upon the dutiable list is the reason that permeates the bill throughout; it is to equalize the difference between what is supposed to be, as nearly as we can arrive at it, the cost of production abroad, including the cost of shipment into this country, and the cost of manufacturing in this country.

The VICE PRESIDENT. The question is on agreeing to the amendment offered by the Senator from Utah [Mr. KING] to the amendment of the committee. It will be stated.

The READING CLERK. On page 3, line 1, strike out "8" and insert "2," so as to read:

Gallic acid, 2 cents.

Mr. KING. I call for the yeas and nays.

The yeas and nays were ordered and the reading clerk proceeded to call the roll.

Mr. JONES of New Mexico (when his name was called). I have a general pair with the Senator from Maine [Mr. FERNALD]. I transfer that pair to the senior Senator from Missouri [Mr. REED] and vote "yea."

Mr. STERLING (when his name was called). Transferring my pair with the Senator from South Carolina [Mr. SMITH] to the junior Senator from Oregon [Mr. STANFIELD], I vote "nay."

Mr. SUTHERLAND (when his name was called). I have a general pair with the senior Senator from Arkansas [Mr. ROBINSON]. I transfer that pair to the junior Senator from Pennsylvania [Mr. PEPPER] and vote "nay."

Mr. WALSH of Montana (when his name was called). I observe that the Senator from New Jersey [Mr. FRELINGHUYSEN], with whom I have a pair, is not present. Therefore, I withhold my vote.

The roll call was concluded.

Mr. COLT. I transfer my pair with the junior Senator from Florida [Mr. TRAMMELL] to the senior Senator from Pennsylvania [Mr. CROW] and vote "nay."

Mr. PHIPPS. I have a pair with the Senator from South Carolina [Mr. DIAL], which I transfer to my colleague [Mr. NICHOLSON], and vote "nay."

Mr. MCKINLEY. I have a pair with the junior Senator from Arkansas [Mr. CARAWAY], which I transfer to the junior Senator from Maryland [Mr. WELLER], and vote "nay."

Mr. STANLEY. I have a general pair with the junior Senator from Kentucky [Mr. ERNST]. I transfer that pair to the senior Senator from Texas [Mr. CULBERSON] and vote "yea."

Mr. MCKELLAR. I have a general pair with the junior Senator from Indiana [Mr. NEW], which I transfer to the senior Senator from Arizona [Mr. ASHURST], and vote "yea."

Mr. HARRISON. I transfer my pair with the junior Senator from West Virginia [Mr. ELKINS] to the junior Senator from Rhode Island [Mr. GERRY] and vote "yea."

Mr. WALSH of Montana. I transfer my pair with the Senator from New Jersey [Mr. FRELINGHUYSEN] to the senior Senator from Tennessee [Mr. SHIELDS] and vote "yea."

Mr. CURTIS. I wish to announce the following pairs:

The Senator from Vermont [Mr. DILLINGHAM] with the Senator from Virginia [Mr. GLASS];

The Senator from New Jersey [Mr. EDGE] with the Senator from Oklahoma [Mr. OWEN]; and

The Senator from Arizona [Mr. CAMERON] with the Senator from Georgia [Mr. WATSON].

The result was announced—yeas 21, nays 42, as follows:

YEAS—21.

Fletcher	King	Pomerene	Walsh, Mass.
Harris	La Follette	Sheppard	Walsh, Mont.
Harrison	McKellar	Simmons	Williams
Heflin	Myers	Stanley	
Hitchcock	Overman	Swanson	
Jones, N. Mex.	Pittman	Underwood	

NAYS—42.

Ball	Gooding	McKinley	Smoot
Borah	Hale	McLean	Spencer
Brandegee	Harreld	McNary	Sterling
Broussard	Johnson	Newberry	Sutherland
Bursum	Jones, Wash.	Norbeck	Townsend
Calder	Kellogg	Oddie	Wadsworth
Capper	Kendrick	Page	Warren
Colt	Keyes	Phipps	Watson, Ind.
Curtis	Lodge	Poindexter	Willis
du Pont	McCormick	Rawson	
France	McCumber	Shortridge	

NOT VOTING—33.

Ashurst	Elkins	Nelson	Shield
Cameron	Ernst	New	Smith
Caraway	Fernald	Nicholson	Stanfield
Crow	Frelinghuysen	Norris	Trammell
Culberson	Gerry	Owen	Watson, Ga.
Cummins	Glass	Pepper	Weller
Dial	Ladd	Ransdell	
Dillingham	Lenroot	Reed	
Edge	Moses	Robinson	

So Mr. KING's amendment to the committee amendment was rejected.

The PRESIDING OFFICER (Mr. JOHNSON in the chair). The question is on agreeing to the committee amendment.

Mr. KING. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state the inquiry.

Mr. KING. Was the vote just taken a final disposition of the item of gallic acid?

The PRESIDING OFFICER. The vote just taken was upon the amendment offered by the junior Senator from Utah to the committee amendment. The question is now upon agreeing to the committee amendment:

Gallic acid, 8 cents per pound.

Mr. HITCHCOCK. Before that vote is taken, I wish to put in the RECORD an article from the Chicago Tribune——

Mr. SMOOT. That has already been placed in the RECORD.

Mr. HITCHCOCK. I did not know that.

Mr. SMOOT. Oh, yes; the Democratic clipping bureau begins its activities early in the day.

Mr. HITCHCOCK. The Chicago Tribune is the officially recognized organ of Republicanism, and it seems to me the article ought to be in the RECORD, especially in view of some of the declarations made by the Senator from Utah and others who seem to be alarmed lest the people of Germany should ship a few chemicals or other manufactured articles to the United States. The Senator from North Carolina [Mr. SIMMONS] informs me that this is not the article which he put in the RECORD. As it comes from such a good Republican authority as the Chicago Tribune, I think some of my Republican colleagues may be interested in hearing it, so I will read it:

BOGY OF WORLD TRADE GOBBLED BY BERLIN FADES—MARCH BALANCE REVEALS GENESIS OF COLLAPSE.

WASHINGTON, D. C., May 8—(Special).—Federal officials are no longer worried about the threatened German post-war supremacy in world commerce. It is a collapsing bogy, they declare.

Government economists report that German trade has been falling off and that in March Germany slumped into an adverse trade balance with imports exceeding exports by some 8,600,000,000 marks as the net deficit for that month.

HAD WORLD ALARMED.

The feverish trade of Germany after the war continuing at high heat until the last few months, raised the bugaboo of world domination by a recuperating industrial nation which could dump cheaply manufactured products into the markets of the world. Considerable section of

American public opinion entertained apprehension of a German commercial drive which would force competing countries out of the markets.

Germany made that drive, and comparison of export statistics for 1920 and 1921 shows how she undercut competition and gave the apprehensive some grounds for believing the bogy was a thing of substance.

But during the last six months authorities in the Department of Commerce have discovered the signs of collapse.

WHEN PEAK WAS PASSED.

Germany has had a favorable trade balance through the winter months, but for March her imports were 29,600,000,000 marks and her exports 21,300,000,000. The excessive imports were largely in raw materials—ores, hides, and skins and fats and oiles included. Imports of food were less.

The unfavorable balance of March is the more extraordinary, because of January and February Germany had favorable balances of 1,400,000,000 and 1,200,000,000 marks, respectively.

In a few words, as Government specialists see it, the German offensive into the world markets has fallen short.

I wonder if the Committee on Finance is going to insist on its false claim that we have got to raise a high tariff wall against German exports because Germany is going to threaten the overwhelming of the industries of the United States. Can the committee not see the condition which Germany is in, her inability to buy her raw materials, her difficulty in dealing with a depreciated currency? Can the world not see that this is a mere pretense for raising a tariff wall to enrich a few manufacturing concerns in this country? I do not see how such a pretense may longer be upheld or defended by members of the Committee on Finance. Even the Republican Department of Commerce in this statement destroys the bogey, destroys the pretense which the Committee on Finance are holding before the American people as a warrant for increasing their taxes and maintaining the extortionate prices now being charged by some of our manufacturing enterprises.

The PRESIDING OFFICER. The question recurs upon the committee amendment.

The committee amendment was agreed to.

The next amendment of the Committee on Finance was, on page 3, line 1, after the word "oil," to insert "1½ cents per pound," so as to read:

Oleic acid or red oil, 1½ cents per pound.

Mr. KING. Mr. President, I regret that the parliamentary situation will not enable us at this moment to present the issue involved in this item in the manner in which it should be presented to the Senate and to the country. Oleic acid, or red oil, as it is denominated, carried in the House bill in a sort of a basket clause an ad valorem rate or duty of 25 per cent. It has been transferred by the Senate committee from the basket clause and is given a specific rate of 1½ cents per pound. Measured by a proper normal valuation—I mean pre-war—of the product, that specific rate is equivalent to approximately a 40 per cent ad valorem rate.

Mr. SMOOT. Oh, no.

Mr. KING. So the Senate committee bill gives us an ad valorem rate 15 per cent higher under the specific designation than the ad valorem rate which was fixed by the other House. The parliamentary situation will not permit me at this time to move to transfer this item to the free list. I think it will be obvious, when I call the attention of the Senate to some figures relative to this commodity, that it ought not to bear any duty at all; that in any rational, fair, or just tariff bill this acid or oil should be placed upon the free list.

Mr. SMOOT. Mr. President, just a word.

The PRESIDING OFFICER. Does the Senator from Utah yield to his colleague?

Mr. KING. I have not concluded.

Mr. SMOOT. Excuse me.

Mr. KING. I wish to call attention briefly, Mr. President, to some of the data which have been furnished by the Tariff Commission. I want Senators to understand exactly what this item is and who are to be the beneficiaries of a tariff on the same:

Oleic acid, which is commercially known as "red oil," is a clear, dark-red, fatty acid. It is obtained from fats and oils in the manufacture of soap. There are three grades of oleic acid, one a medicinal grade, conforming to specifications of the United States Pharmacopœia, and the other two, commercial grades, known as "saponified" and "distilled" red oil.

"Saponified" means the disintegration of the tallow into certain constituent parts.

The principal consumption of oleic acid is in the manufacture of textile soaps—

The soaps which are employed largely by the laundries and by the great mass of the people, and also by the textile mills.

Other important uses include the manufacture of oil-soluble colors, certain kinds of patent leather, polishing preparations, and lubricating and screw-cutting compounds.

Production of the larger part of oelic acid, or "red oil," is at soap and candle factories, although numerous small factories make this product only. The domestic output of 1912 was 27,494,000 pounds, but from 1914 to 1920, inclusive, it ranged between 38,000,000 and 43,000,000 pounds annually. Production for the first nine months of 1921—preliminary figures—was about 22,000,000 pounds.

Import figures are available for the fiscal year 1914 only, and were 367,070 pounds, valued at $24,662. This is approximately 1 per cent of the domestic production.

Mr. President, the packing companies are chiefly concerned in the production of this commodity. By this bill we are going to give a gratuity to the packing interests. Why are there no importations? Because the world is devoid of fats to-day. We are the great producing market for fat products from which this acid is derived as well as the stearic acid, an item to which we will refer a little later.

Mr. McCUMBER. Mr. President——

The PRESIDING OFFICER. Does the Senator from Utah yield to the Senator from North Dakota?

Mr. KING. I yield.

Mr. McCUMBER. I understood the Senator to state that oleic acid is a product of the packing houses?

Mr. KING. And of the soap producers.

Mr. McCUMBER. It is a product of soap making. It may be that some of the packing houses which produce fats and oils may be interested in it.

Mr. KING. The packers make soap.

Mr. McCUMBER. The object of my suggestion was to indicate that it simply would be of interest to those manufacturers or packers who make soaps.

Mr. SMOOT. Mr. President, the oil or acids referred to are made mostly into soap and used by the textile manufacturers of the country. It is not hardened. I have bought it by the carload for the purpose of making soap to wash flannels particularly, and it is a good commodity for that purpose. That is where the great bulk of it is used.

Mr. KING. Oleic acid, when you go to the genesis of it, is found in tallow, and tallow comes largely from the packing plants.

Mr. SMOOT. Of course it is found in any vegetable oil.

Mr. KING. I understand, but it is largely made, as I think my colleague will admit, from the tallow which we obtain in such enormous quantities from the packing institutions of the country.

In the Underwood law, paragraph 5, the rate of duty is 15 per cent ad valorem. In my opinion, that is entirely too much; it ought to be on the free list. It is obvious that it ought to be on the free list when our importations are only 1 per cent of the domestic production. I can not comprehend how Senators justify the tariff rate fixed with respect to this item or any tariff rate where the imports are only 1 per cent of the domestic production or of the domestic consumption, because it is obvious that, even if revenue was sought, with only 1 per cent imports the revenue would be negligible in amount.

Mr. McCUMBER. Mr. President——

Mr. KING. I yield to the Senator from North Dakota.

Mr. McCUMBER. I will ask the Senator if he has made any computation in order to base a comparison between the ad valorem duty under the present law and the specific duty under the proposed rate?

Mr. KING. Does the Senator mean the House bill?

Mr. McCUMBER. No; I mean the rate under the present law as compared with the rate proposed by the Senate committee. The pre-war price, going back to 1914, was 7 cents a pound. The ad valorem duty upon that price under the present law would be one cent and five one-hundredths of a cent per pound. The duty which we propose is 1½ cents, so that the only difference between what we propose and the present duty is five one-hundredths of a cent and five-tenths of one cent.

Mr. KING. The pre-war price for this acid, as I have been able to obtain it, was approximately 3½ cents a pound.

Mr. McCUMBER. It was 7 cents a pound according to the last figures I have.

Mr. KING. The quotations on April 24 last—and the figures are substantially the same in the last record I have—were 8½ to 9 cents a pound.

Mr. SMOOT. Mr. President——

Mr. KING. I yield to my colleague.

Mr. SMOOT. I call the Senator's attention to page 20 of the Tariff Summary, from which it appears that the figures as to importations, which are available for the fiscal year 1914 only, are 367,070 pounds, valued at $24,662, which represents a value of 7 cents a pound.

Mr. KING. I have read that into the record.

Mr. SMOOT. To-day, as the Senator says, the price is 8½ cents. On 8½ cents a duty of 1½ cents would be only 18 per

cent. The Senator said the duty was 40 per cent, whereas the duty proposed is only 3 per cent higher than the duty imposed under the present law.

Mr. KING. If my colleague will pardon me, what I said, or at least what I intended to say, was that under the House bill an ad valorem rate of 25 per cent was provided, and that under the Senate bill the item had been removed from the basket clause of 25 per cent ad valorem and given a specific rate of 1½ cents per pound, and that the difference between the basket rate and the Senate rate, as I figured it, would be the difference between 25 per cent ad valorem and 40 per cent ad valorem; or, in other words, the Senate has increased the rate approximately 15 per cent ad valorem, based on pre-war prices.

Mr. SMOOT. Of course, the Senator is wrong in that statement. The Senate has decreased the rate on the present price from 25 per cent to 18 per cent.

Mr. KING. It depends entirely, of course, upon the price which you assume the product has in the market.

Mr. SMOOT. Then, take the pre-war price of 7 cents—and I will say to the Senator that that is about as cheaply as it could be bought at any time, because I have bought it by the carload many and many a time.

Mr. KING. That is so long ago that it is outlawed.

Mr. SMOOT. That is outlawed; but, I say, the report itself shows that, so that that will be only 20 per cent, and that is a reduction from the House rate of 5 per cent, and it is only an increase of the rate under the present law of 5 per cent. If we go back to the pre-war price, then this rate will be a little higher than the rate of the existing law, but still will be less than the House provision.

Mr. KING. Mr. President, there may be some controversy as to exactly what the pre-war prices were with respect to this item; my colleague figures on one basis and I upon another. If the pre-war price is as I have stated, then the Senate bill increases this tariff over the House bill. But the point I am making is that here is an item which carries a duty which, measured by any rule which ought to apply in the formulation of a tariff bill, whether it be drawn by the most extreme protectionist or by the moderate protectionist, ought to bear no duty at all, but ought to be placed upon the free list. I am not here complaining of the views of distinguished Senators who believe in a moderate degree of protection. There may be, of course, differences of opinion as to what would be a fair and a moderate rate of protection, but those who seek to justify protection place it upon the ground of protecting an infant industry, or the difference in the price of labor abroad and labor in the home market, or some other real or fanciful reason. I have not yet been able to discover, however, any protectionist who offers a rational reason for a protective tariff when there can be no revenue derived and there is no competition. Can anybody say that 1 per cent import of tallow or oleic acid is a menace to the great tallow industry of the United States, which is controlled by the so-called Packers' Trust? You are now, in my opinion, by giving any rate at all to this item, making a contribution to the packers of the United States and to a few who produce oleic acid.

We want cheap soap. The people need cheap soap. The tallow which is produced by the packers is the basis of soap and is the basis of this oleic or red oil. If you increase the price of the tallow you increase the price of the oleic acid, and to that extent you increase the price of the quality of soap used by the great bulk of the American people.

Why give to the packers of the United States and a few other concerns this gratuity, I should like to know? How do you protectionists justify it? The junior Senator from Wyoming [Mr. KENDRICK], who is voting for these schedules, has been waging a bitter war against the packers, denominating them a great trust, and urging legislation to restrict their operations. I have no doubt, however, that he will vote for this schedule in order to put more money into the pockets of the packers. There are agriculturists on the other side, Senators who belong to the agricultural bloc and this tariff bloc, who profess great devotion to the masses of the people and want cheap soap and cheaper products for the great mass of the people, and who talk about the packers' trust as if it were a great devouring monster; and yet when we have a record vote upon this item every one of them will come up to the scratch—if I may be permitted this language of the street—and vote for the packers. The Senator from Kansas [Mr. CAPPER], the head of the agricultural bloc, who loves the farmers and people so much, will vote for this rate to put money into the pockets of the packers and a few manufacturers.

Mr. President, there is not a word of testimony, so far as I can find, in the record on oleic acid. Who asked for the duty on it? Was it the agricultural bloc or the tariff bloc? The tariff bloc submitted schedules. I should like to examine the schedules that the tariff bloc submitted to the Republican members of the committee. Did the tariff bloc urge a tariff of 1½ cents per pound upon oleic acid?

I should like an acid test of the fidelity of the farm bloc, the agricultural bloc, and the tariff bloc to the interests of the people, or their devotion to the trusts, the Packers' Trust and the other trusts and combinations that are so well taken care of under the provisions of this schedule and other schedules in the bill.

I state again that there is no testimony on this subject. No one asked for this duty. Now, who did? I should like to ask the distinguished chairman of the committee, Who asked for this rate? What witness came before your committee and gave testimony? If you did not take any testimony openly, what individual came before the committee behind closed doors and asked for a rate upon oleic or red oil?

The question can not be answered. No one asked for the duty, apparently, and yet it is here. Who is to benefit by this rate? The people? No; because the purpose of the tariff is to increase domestic prices, at least temporarily, the Republican theory being that ultimately it may lead to a diminution of prices. But the theory of the tariff is to raise prices, to prevent competition with foreign production; and, of course, when you prevent competition you are preventing a fall in prices, or you are permitting an opportunity to increase prices; so that fundamentally when you increase tariff rates you are increasing the domestic rates, or the opportunity for the domestic producers to increase the domestic rates.

Mr. President, there is not much to be said in regard to this item. It is so palpably wrong that I can not for the life of me comprehend how Senators can justify it, or how they can vote for a tariff upon tallow, or upon oleic acid, which is one of the products of tallow, and which is so essential for the people.

When we reach the free list I shall move—it may not be done now, under our parliamentary system—to transfer the item of oleic acid or red oil, found in paragraph 1, from the dutiable to the free list.

Mr. UNDERWOOD. Mr. President, I do not desire to detain the Senate long on this item.

The rate of duty now proposed by the Senate committee is the same rate of duty that is carried in existing law, which, I think, agreeing with the Senator from Utah, is demonstrated by the facts and returns to be too high at this time; but what I want to call to the attention of the Senate is the matter of the drafting of this bill.

I know that the gentlemen who believe in the theory of protection do not agree with me in my theory that taxes should be levied for revenue and not for protection, but I do not understand how there can be such a wide divergence of opinion between the House Committee on Ways and Means and the Senate Committee on Finance as to what constitutes a protective tariff in many of these items. I am not going to make the suggestion that these rates have been guessed at, have been ascertained by the rule of the thumb, and, where there was no knowledge, a rate was put into the bill without consideration, although I find very little consideration shown by the testimony in reference to this particular item in either House. What I want to call to the attention of the Senate, however, is that I find that this particular item was not enumerated in the House bill. It did not have a specific rate against it. It was dropped into the basket clause, which provided for a tax of 25 per cent ad valorem. The Senate committee have amended the bill, and I congratulate them on amending it, by reducing the tax. They levy a tax of a cent and a half a pound, but what I do not understand is the wide divergence of opinion in reference to what constitutes a protective tariff between the Republican members of the Ways and Means Committee of the House and the Republican members of the Finance Committee of the Senate.

This is a small item, but, as a matter of course, of importance to some of the people of the United States. I find that the unit value of this article, as shown from the imports in 1914, was 28 cents. A tax of 25 per cent would be one-fourth.

On further investigation, Mr. President, I find I had the wrong paragraph in reference to value. It was oxalic acid which was called to my attention. But I find that diversity of opinion. As the unit value of this particular acid is not expressed in the information which comes to me, I desire to ask those in charge of the bill if they have any statistics as to what the unit value of the last importations was?

Mr. McCUMBER. On the last importations we have I think it is about 8½ cents. The pre-war unit value, in 1914, was 7 cents. On a basis of 15 per cent on the pre-war, it would be 1.05 cents a pound. On the basis of 8½ cents it would be 1.225 cents per pound, and, in any instance, there would not be a

difference of more than about a quarter of a cent a pound between the rate in the present law and the duty as proposed by the Senate committee.

Mr. UNDERWOOD. If the unit value were 8 cents the tax of 25 per cent would be one-fourth, which would make it 2 cents a pound.

Mr. McCUMBER. The tax under the present law is 15 per cent.

Mr. UNDERWOOD. I am not talking about the present law. I was discussing the difference in rates levied in the bill as it passed the House and the Senate committee bill.

Mr. McCUMBER. The Senator must ask the House committee to explain its own views. We, of course, can not answer for them.

Mr. UNDERWOOD. That is true, but it is not so great in respect to this item as in respect to others. The question which struck me, in viewing a number of these items, was the great divergence of opinion there seems to be in regard to these rates. In most cases the Senate committee rate is higher than that of the House, as appears in the taxing clause. On the other hand, in this particular case the rate is lower.

Mr. McCUMBER. May I correct the Senator in one statement, because I do not think he wishes to make the statement that broad? The bill as it passed the House was based upon the American valuation plan, and the Senate committee bill is based on the foreign valuation plan. As a matter of fact, most of the rates in the Senate committee amendments are very much less than the corresponding House rates.

Mr. UNDERWOOD. I am not prepared to state the difference. I realize, of course, that under American valuation a rate may be higher than the Senate rate, based on the foreign valuation, but, of course, as in so many of these items of which I am speaking neither valuation is used, the duty is a specific duty and not an ad valorem rate; and in those cases the question of valuation, whether it is American or foreign, does not apply. I was misled in reference to the figures when I started to call the matter to the attention of the Senator, but in this particular case there is not so much divergence of opinion between the House and the Senate. I find in the case of many of these rates that there is a very considerable difference in the viewpoint of the two committees as to what a protective rate is. Yet I find no explanation in the report of the committee, and no explanation in the hearings to show on what basis the divergence of opinion rests.

Of course, I would not vote for a protective rate under any circumstances, but there are some people who believe in a protective tariff, and unless the committee has just put some arbitrary rate in the bill, there ought to be some basis for arriving at a protective rate. What does protection mean, when you establish these rates? Of course, I know what you say it means in your administrative features of the law where you declare what I interpret as the statement that there shall be protection of wholesale profits in authorizing the President to raise the rates to that extent. That will be the basis in the end, if that clause is adopted and the President carries it out, no matter what rate you put in the bill now; but I do not understand from the testimony which has been presented or the information which has come before the Senate that any explanation has been given of the differences in rates, sometimes quite marked differences in rates, between the House and the Senate committee bill, outside of the question, of course, of American valuation and foreign valuation, which is apparent. That does not apply to these questions of specific rates at all, however. It seems to me, Mr. President, that there is that divergence of opinion.

This is no simple matter. The question of levying taxes on goods coming into the customhouse not only involves industry; if you make a mistake, you may seriously affect a certain industry one way or another, but, more than that, you are levying taxes on the American people, and a large amount of these imports on which you are levying these taxes are somebody's raw material. If you unduly tax them, you interfere with the ability of those who use them as raw material to go into the markets in competition with those who have less taxes to pay. Under those circumstances, it seems to me, that in order that the Senate may pass on the question intelligently, we should have some understanding or some explanation when a very considerable diversity is shown between the Senate rates and the House rates in this bill in order that we may be able to come to an intelligent conclusion as to what brought the minds of the two Houses to find a different verdict in reference to the same subject.

Mr. KING. Mr. President, I merely want to put into the record a statement of a witness before the Senate committee, on page 1274, the witness being Mr. Eckman, who represented the B. T. Babbitt Co., of New York City. That is a large soap concern, I am advised.

Mr. SMOOT. It manufactures Babbitt's soap.

Mr. KING. Mr. Eckman stated:

> We would rather have the free raw materials and no duty on the imported finished product than to pay a duty which would shut out our cheap raw materials and then get the protection on the finished product.

In other words, as a manufacturer of soap—and this product we are discussing now is vital in the production of soap—no tariff was desired. As I suggested a moment ago, no one has asked for a tariff upon this, and we are now, without testimony, without any request, so far as the record shows, voting this enormous gratuity into the pockets of the great packing trusts of the United States.

Mr. McCUMBER. May I ask the Senator if there is anybody who asked for a tariff on it when the Underwood tariff law was being framed?

Mr. KING. The Senator would know far better than I, as he was a Member of the Senate then and I was not. But I can conceive of the fact that changes have occurred between the time when the Underwood schedules were written and the present time. I can understand that at that time you might have justified a rate which might not be justified now, and I can understand that in drafting the Underwood-Simmons tariff law, great measure as it was, errors might have crept in, and doubtless did. The Underwood law is not an infallible tariff measure; and because I find certain tariff rates in the Underwood law, that would not, to my mind, be conclusive that the same rates should be perpetuated.

Mr. McCUMBER. I am not assuming that would be the case; but this has been upon the dutiable list for a great many years; and whether it was a Republican or a Democratic tariff bill, both parties have given it some duty, maybe upon the principle of a protective tariff, although I hardly think it is claimed so much upon that theory as upon the revenue basis in both bills; and the difference is almost infinitesimal between the two bills.

Mr. KING. Let me say to my good friend from North Dakota that he does not expect any revenue from this item, either under the rate in the House text or under the Finance Committee schedule.

Mr. McCUMBER. Indeed, I do expect a revenue from it as soon as things become at all normal. I do not expect any great amount, but I do expect some revenue. For the same reason that Congress in the Underwood-Simmons law levied a duty, as they did in the Payne-Aldrich law, and as in all the previous laws they levied a duty upon this article, so we continued the policy of levying a very small duty on it.

Mr. KING. The Senator from North Dakota gives evidence in exemplification of the statement of the great prophet of old, Paul, when he said, "Faith is the substance of things hoped for, the evidence of things not seen."

The Senator can not, it seems to me, hope for any great revenue from the importations of oleic acid or tallow, because we in the United States are supreme in the production of animal fats. Europe is as hungry for animal fats as it has been and is for food, and we supply the United States and, indeed, a part of the world with animal fats, and there will be no competition. Our imports constitute 1 per cent, and how the Senator can expect any revenue from that is something I can not understand.

The Senator justifies the imposition of this duty upon the ground that it seems to have been a habit to levy it in tariff bills. If that has been the habit, this is a good time to break the habit. It is not the beginning of the new year, when we are in the habit of making new resolutions and casting aside habits of the past as we do our old raiment, but we are drafting a tariff bill now which the senior Senator from Utah expresses the hope will endure for some time. Let us get rid of that old habit and have a reason for the measures which we adopt and for the schedules which will finally be enacted into law.

Although I conceded a moment ago that perhaps technically I could not move to transfer this to the free list under the parliamentary situation, I am going to submit it to the Chair, having great confidence in the parliamentary knowledge, as well as the fairness, of the present occupant of the chair. I will submit the motion and then take the ruling of the Chair.

I move to strike out on lines 3 and 4, page 3, the words "oleic acid or red oil, 1½ cents per pound," and as a part of the motion I move that the words "oleic acid or red oil" be transferred to paragraph 1501, page 207, after the words

"muriatic acid" and before the word "nitric," on line 24, so that schedule 15 would read, if amended as my motion proposes, as follows:

Paragraph 1501. Acids and acid anhydrides: Chromic acid, hydrofluoric acid, hydrochloric or muriatic acid, oleic acid or red oil, nitric acid, etc.

The PRESIDING OFFICER (Mr. WADSWORTH in the chair). The Chair invites the attention of the junior Senator from Utah to the agreement already reached by the Senate that committee amendments shall be acted upon to the exclusion of other amendments and that the bill shall be read that committee amendments may be acted upon. Thereafter it is to be assumed that other amendments will be in order. The Chair will hold that the motion of the Senator from Utah made at this time is not in order, and that the only question which can be taken up by the Senate, other than by unanimous consent, is the adoption or rejection of committee amendments.

Mr. KING. I am not so sure but that the position of the Chair is correct. However, I felt that I should submit the matter. I give notice now to the chairman of the committee that when we reach Title II, schedule 115, paragraph 1501, I shall offer as an amendment to that section the amendment which I have just suggested. I am ready now for a vote on the pending amendment.

The PRESIDING OFFICER. The question is on the committee amendment, which will be stated.

The ASSISTANT SECRETARY. On page 3, line 1, after the word "oil," insert "1½ cents per pound," so as to read:

Oleic acid or red oil, 1½ cents per pound.

The amendment was agreed to.

The PRESIDING OFFICER. The next amendment of the committee will be stated.

The ASSISTANT SECRETARY. On page 3, line 2, after the words "oxalic acid" and the comma, insert the words "4 cents per pound" and a semicolon.

Mr. KING. Mr. President, may I ask the Senator from North Dakota [Mr. MCCUMBER] if he will agree to pass the item relating to oxalic acid just for a moment and consider phosphoric acid? Then we will recur to oxalic acid. Has the Senator any objection?

Mr. MCCUMBER. I have no objection.

The PRESIDING OFFICER. The item of "oxalic acid" will be passed over temporarily. The Secretary will state the next amendment.

The ASSISTANT SECRETARY. The next amendment of the Committee on Finance is on page 3, line 2, after the words "phosphoric acid," to insert the words "2 cents per pound" and a semicolon, so as to read:

Phosphoric acid, 2 cents per pound.

Mr. KING. That, I assume, is substantially in the same situation as oleic acid or red oil. I shall at the appropriate time move to transfer that item to the free list. I desire, however, to submit a few observations at the conclusion of the remarks of the Senator from Alabama [Mr. UNDERWOOD].

Mr. UNDERWOOD. Mr. President, continuing what I said a moment ago in reference to the great divergence in rates as between the House bill and the Senate committee bill, I wish to call to the attention of the Senate the fact that the House bill came over with a tax on phosphoric acid of 25 per cent ad valorem. That is a tax equal to one-fourth of the unit value of the article. The Senate committee proposes an amendment to the bill by providing a specific rate of duty of 2 cents per pound.

I have no information before me as to the American valuation—and, of course, the House rates were fixed on the American valuation—which undoubtedly must be higher than the foreign valuation, but I do not happen to have that information in my hand.

Mr. SMOOT. I will give it to the Senator if he desires.

Mr. UNDERWOOD. I have the foreign valuation, but not the American valuation. Of course, if the American valuation is less, then there is no reason for a tax at all.

Mr. SMOOT. I will say to the Senator that it is not less.

Mr. UNDERWOOD. As soon as I finish this statement I should be glad to have the information.

The survey of tariff information prepared by the United States Tariff Commission gives the valuation for 1919 per unit value of this item as 37 cents. One-fourth, or 25 per cent, of that would be 9¼ cents a pound tariff rate. For 1920 the unit value is given as 29 cents per pound. One-fourth, or 25 per cent, of that would be 7¼ cents per pound tariff rate. In 1921 the unit value is given at 37 cents a pound, upon which the tariff rate would be 9¼ cents per pound.

Now I shall be glad if the Senator from Utah will give me the domestic or American valuation.

Mr. SMOOT. I can not give the rate in the shape of percentage, because I do not know what was the strength of the acid imported.

Mr. UNDERWOOD. Of course, it is not material. I thought the Senator had it.

Mr. SMOOT. I will say that if it is 50 per cent technical phosphoric acid, it is sold in the American market to-day for 8½ cents per pound. However, this, I suppose, has reference to medicinal phosphoric acid.

Mr. UNDERWOOD. The Finance Committee laid this tariff information before the Senate; and I assume at least they were correct in giving the unit value of foreign importations, because that is ascertained from the customhouse. That is authentic, because it comes in with the value of the goods. The language here used in reference to this article is the same as was used in the present law, so that, so far as the mind of the House is concerned, there can be no doubt about what the House meant. They fixed a rate of 25 per cent, which, on the foreign valuation, would mean a rate of from 7 to 9 cents a pound. I do not know what the American valuation on that same strength of phosphoric acid is, but I can assume, I think without contradiction, that it is higher than the imported rates.

Mr. SMOOT. These are the prices to-day, I will say to the Senator: Fifty per cent technical phosphoric acid is 8½ cents, American product.

Mr. UNDERWOOD. If that is the case, I can not see how it is possible that the committee has not put this article on the free list.

Mr. SMOOT. Eighty-five per cent U. S. P., which is medicinal, is 17 cents a pound. I can not tell further than that, because we have not the 1921 value. There is no doubt that the price of phosphoric acid has rapidly decreased, not only in foreign countries, but in this country as well.

Mr. UNDERWOOD. I have no doubt that will be found to be true as to a great many items. They are coming down all over the world.

Mr. SMOOT. The pre-war price in 1913 was 12 cents.

Mr. UNDERWOOD. Here is the information given to the Houses of Congress on which to write a bill, and the foreign valuation is given for three years. There is no question that the domestic value must have been higher. I do not think it has fallen as much as from 37 to 17 cents. Even at 17 cents the duty would be more than 4 cents a pound, and at that rate there would be a divergence as of 2 to 1 between the two Houses. I take it undoubtedly that there is a difference in the commodity to which the Senator from Utah refers, because the United States Tariff Commission could not have made such a mistake as to send to the Senate information relative to an article showing the value to be 37 cents a pound, and then for it to turn up within a year at a value of 17 cents a pound.

Mr. SMOOT. Their report up to date shows that it has decreased greatly.

Mr. UNDERWOOD. All I am trying to point out in the matter is the reason why the bill should be considered. Even according to the figures of the Senator from Utah there is a tremendous divergence in the rates between the House and the Senate committee bills. I can not conceive how the committees, if they gave careful consideration to the proposition, could have reached such a great divergence in opinion as to what they consider a protective tariff. There must be some basis on which to ascertain the facts. It will not do to assume that the committee have guessed at what would be a protective tariff, guessed at what tax it is necessary for them to levy on the American people from their standpoint.

If the information of the Tariff Commission is correct, there is a divergence of views between a 9 and 7 cent tax on the unit value which they have given of 2 cents a pound. The information given by the Senator from Utah, which we get for the first time—it never before having been laid before the Senate officially and not being information that has been heretofore given to Congress to consider in the matter—is that it is 17 cents a pound in the American market; that would mean that the House rate is 4¼ cents a pound, as compared with 2 cents a pound as proposed in the Senate bill.

The particular commodity—phosphoric acid—was on the free list under the Payne-Aldrich law, and that was a protective law, undoubtedly a protective tariff law, so much so that it was repudiated by the American people; but this item, nevertheless, was put on the free list there. There was then no reason for levying a tax on phosphoric acid. The present law, for which the Democratic Party is responsible party, put phosphoric acid on the free list. Yet we find now that this acid, which is largely used for medicinal purposes, for medicines for the American people, is to be taxed, as proposed by the House bill, if the unit value of the Tariff Commission is correct, a rate

amounting to 7 or 9 cents a pound, and if the information which the senior Senator from Utah has just given me is correct, of which we have had no publicity before, then the rate of tax would be 4½ cents a pound on the House basis, while the Senate committee rate fixes it at 2 cents a pound. There is some mistake somewhere—some glaring mistake in reference to this duty by one committee or the other.

I am talking about the matter not from the revenue standpoint, because there is practically no revenue in it, but from the standpoint of protection. Somebody has made a mistake at one end or the other of the Capitol. I say if you are going to write a protective tariff bill to tax the American people to build up industry in this country, at least based on your theory, the American people are entitled to an intelligent verdict on the subject. This item shows that one of the committees has not rendered an intelligent verdict as to phosphoric acid. This item is not alone in that respect. The bill is full of such items, and I shall point to some others as we proceed where these great divergencies appear.

If that is the case, I think we are entitled to some explanation as to why 2 cents a pound is a protective tariff on phosphoric acid, if it is going to be taxed, and not from 4 to 7 cents, as provided in the House bill. We have not, however, had any such explanation, though we are entitled to it.

So far as I am concerned, I think this article is a necessity of life; it enters largely into medicine, and, so far as possible, I think articles of this kind should not be taxed. It was the policy of the Republican Party in the past not to tax it; it has heretofore been the policy of the Democratic Party not to tax it. The Finance Committee is reversing the entire policy of the American people in reference to taxing this article, and they are giving us no intelligent reason why they propose to do so. I think we are entitled, before this item is carried to conference, to an intelligent explanation in reference to the matter.

Of course, as the Chair has ruled, and I think properly ruled, under the unanimous-consent agreement heretofore reached we have no opportunity now to move to place the articles on the free list, which will be done in due time, but, as between the rate as fixed in the House bill and the rate proposed by the Senate committee, of course, I prefer the Senate amendment, because it provides a lower rate. I should like, however, to know on what basis the committee reached the conclusion that a 2-cents-a-pound duty is a protective rate for this article and that the House bill is wrong in placing the duty at from 4 to 7 cents.

Mr. SMOOT. I think the House rate is altogether too high, and that is what the committee thought.

Mr. UNDERWOOD. Why is it too high?

Mr. SMOOT. That it is too high will be seen by taking into consideration the production in this country, the importations, and the price at which it is quoted now in the United States and the pre-war price. The pre-war invoice price on importations of phosphoric acid in 1913 was 12 cents a pound. Phosphoric acid is made and sold in this country at 14 cents a pound, which is only 2 cents higher than the foreign price. I am not now referring to the 50 per cent technical acid; I am referring to the medicinal acid. There is but 2 cents difference between the pre-war price in the foreign country and the selling price in this country.

Mr. UNDERWOOD. Does the Senator from Utah refer to the present selling price in this country?

Mr. SMOOT. I refer to the present selling price in this country. The Committee on Finance thought, therefore, that it was no more than right that there should be a duty of 2 cents imposed, taking into consideration the pre-war price; in other words, if we go back to the pre-war cost here, there would be 2 cents difference. That is the reason why the committee fixed the rate on this item, I will say to the Senator, at 2 cents a pound, and I think, perhaps, it is justified in doing so.

Furthermore, with a price of 14 cents, a duty of 2 cents is less than 15 per cent, and if we take the 85 per cent acid, the highest price for which is 17 cents, the duty would only be about 12 per cent.

Mr. UNDERWOOD. If the Senator from Utah has concluded, I should like to ask him a question, for, though this is not an important item, I wish to know how he reached his conclusion. The Senator says that the pre-war price abroad—I suppose he means in Germany?

Mr. SMOOT. Yes.

Mr. UNDERWOOD. But abroad, anyway——

Mr. SMOOT. I refer to the price in Germany.

Mr. UNDERWOOD. That the pre-war price in Germany was 12 cents a pound. Is that correct?

Mr. SMOOT. That is correct.

Mr. UNDERWOOD. And that the present price in the United States is 14 cents per pound?

Mr. SMOOT. It was 12.7 cents a pound in Germany, to be accurate.

Mr. UNDERWOOD. I will take the round figures.

Mr. SMOOT. And 14 cents a pound in this country.

Mr. UNDERWOOD. Now?

Mr. SMOOT. Yes; to-day.

Mr. UNDERWOOD. We now have the basis on which the committee reached its conclusion; that in Germany, which is the country from which this article is imported, before the Great War the price was 12 cents, and that the price in America to-day is 14 cents, in round figures. Therefore, as this commodity was valued in Germany before the war at 12 cents a pound, and it is selling here for 14 cents to-day, the committee reach the intelligent conclusion that a tax of 2 cents a pound is a protective tariff.

Mr. President, I feared that that might be the way their conclusions were reached.

Mr. SMOOT. Would the Senator from Alabama have them reached in any other way?

Mr. UNDERWOOD. I certainly would. I will explain to the Senator. Of course, I am not criticizing the Senator's viewpoint; he is entitled to reach his conclusion as he desires to—and I thank him for telling me how he reached his conclusion—but I merely want the RECORD to show that my conclusion is not his conclusion. Why? As to the comparative cost of production in Germany now and before the Great War, when Germany was operating with a large supply of skilled chemists, when the factories of Germany had not been disorganized and shot to pieces, so to speak, when their taxes were very low as compared with the taxes which must now be paid in Germany, everybody must recognize that, in the adjustment of conditions, costs in Germany must of necessity be now higher than they then were.

I am not talking about the hourly selling price of this article. A man may sell the coat off his back for a hundredth part of its value for the hour; but the pending tariff bill, if it becomes a law, will last this year and next year and probably to the end of the Harding administration.

Mr. SMOOT. But the Senator from Alabama must also recognize that it now costs more to produce these goods in America.

Mr. UNDERWOOD. The Senator from Utah has already given me the price of this commodity in America; he has stated that it was 14 cents. I take that as a fixed equation; I am merely assuming what the Senator says it is; and he says the fixed fact on which he has based his conclusion is the price to-day, which he states is 14 cents. That, of course, is in the American market; and the Senator says that the pre-war price in Germany was 12 cents. If the selling price of the American producer to-day is 14 cents, and the selling price of the foreign manufacturer before the Great War was 12 cents, it seems to me that it must be in the mind of any reasonable man that there must have been that much increase in price due to the lack of efficiency of labor in Germany to-day as compared to the period before the Great War. That is recognized by all. The additional taxes in Germany, as compared to what they were before the war, also bear heavily on the industry. Then, besides that, these commodities have to stand the burden of transportation from the point of production in Germany to the American market.

From my viewpoint what the Senator has said clearly indicates that there is no reason for a protective tariff on this article. The policy of the Republican Party in the past and the policy of the Democratic Party in the past of leaving articles which enter into the medicines of the people on the free list should be pursued in the future.

Mr. SMOOT. Mr. President, so far as the cost of making goods is concerned compared to the cost before the war, there was not a witness who appeared before the Finance Committee who did not testify that the goods were made cheaper to-day in Germany than they were before the war. That is necessarily so, for the gold mark in Germany—and we have to pay Germany in gold for every mark's worth of goods we purchase—the gold mark in Germany to-day as compared with the gold mark before the war will purchase nearly 4 marks in labor, it will purchase nearly 4 marks in rent, it will purchase nearly 4 marks in clothing, and it will purchase nearly 4 marks in foodstuffs, the price of which is regulated in Germany.

Mr. President, that was not the case in Germany before the war. Germany then was on a gold basis, and every mark's worth of goods that Germany sold to America was valued by the gold mark, and every mark that we paid for those goods was paid in gold of the value of a mark. So neither country had any advantage whatever in the making of goods, so far as

exchange was concerned. The situation to-day, however, is quite different. I will say to the Senator that as to many commodities covered by this bill which are manufactured particularly in Germany, the testimony beyond a question of doubt shows that they can be made cheaper in Germany to-day than they could be made before the war.

Furthermore, the highest grade of medicinal phosphoric acid reaches a price of 17 cents a pound to-day, but we took as a basis the grade of commodity that is generally used commercially—and the great bulk of it used in this country is in that form. That is the fair thing to do. We did not give the rate that was provided in the House bill.

Mr. UNDERWOOD. I was not talking about the rate.

Mr. SMOOT. I think the House rate was too high, as I have stated. That is why the committee made the duty 2 cents.

Mr. UNDERWOOD. I think the Senator is entirely wrong as to the values which he gives. However, I was not arguing the question from the standpoint of values. I have already stated that I was discussing the question from the standpoint of how the committee arrived at its conclusion. Of course, I know there are depleted values in Germany; but I also know that there are many manufacturers who have conceived the idea that there is a juggernaut about to run over them whenever a tariff bill is discussed, and who have conceived the idea that foreign countries can produce much cheaper than they did before the war. Outside of a witness who testified from interest, I have seen nothing to bear out that contention. In all of the countries which were involved in the Great War my reading tells me the cost of production has increased and not diminished.

I merely wish to say before we pass this item that I do not know what profits result from making this commodity. I am not a chemist; but I will go back to the figures of the Senator. He said the value of the article in this country was 14 cents a pound and its value abroad was 12, and that the committee had adopted a rate of 2 cents to cover that difference. I have never seen a chemical commodity of this kind the profit on which to the American manufacturer did not amount to more than 10 per cent or 12 per cent of the value of the article. Therefore the difference of 2 cents must represent the profit of the American producer, if it does not represent more.

Mr. SMOOT. I wish to be perfectly fair to the manufacturer, and, therefore, I will state that in taking 14 cents we have taken the lowest price quoted. The prices quoted range from 14 to 17 cents.

Mr. UNDERWOOD. I understand that; but I think the Senator is wrong when he says that 14 cents is the basis on which the rate was built up. I am discussing now, however, not what the fact is as to the value. I think the value of this article is much greater, and there is a much greater diversity between the two Houses than is indicated in the conclusion reached by the Senate committee, which was based, as the Senator suggests, on a price of 14 cents.

I asked for the reasoning of the committee when they arrived at this rate of duty, and the Senator said they considered the value of the article to be 14 cents. I am not discussing the fact. I am discussing his reasons. He took as the basis for reaching the conclusion the price to-day in this country of 14 cents a pound and a price of 12 cents in Germany before the war.

Mr. KING. The price in Germany before the war, as a matter of fact, was 13½ cents.

Mr. UNDERWOOD. I am not discussing the fact; I am merely discussing the Senator's way of reaching his conclusion. I say that that difference must have been profit. It can not be anything else but profit; and it demonstrates, what the Senator admitted several days ago when we were discussing the section in the bill that allows the President to equalize the difference from the competitive standpoint, that it seeks to protect profit.

Mr. SMOOT. Not at all.

Mr. UNDERWOOD. It is clear that the 2 cents of difference here, to the Senator's mind, must have meant a protection of profit.

Mr. SMOOT. Not at all.

Mr. UNDERWOOD. It is not a protection of cost. The Senator is not referring to cost. When he gave me the figures he was giving me selling figures. Therefore, in those selling figures there must have been profit.

Mr. SMOOT. The 12 cents included the profit in Germany, just the same as here.

Mr. UNDERWOOD. To be sure, and the 14 cents included the profit here. There was a difference of price, according to the Senator's statement, of 2 cents, and therefore he put on a tax of 2 cents. Therefore he must have put on the tax of 2 cents to protect the profit of the American manufacturer. There can not be any question about that, when he says that he reached this conclusion on the basis of selling prices and not on the basis of cost of production.

I want to say this about the question of protecting profit: Whenever you build your tariff bill on the theory of protecting the manufacturer's profit—and that is what this bill does and that is what the Senator's argument was——

Mr. SMOOT. Not at all.

Mr. UNDERWOOD. That is what it leads to. It could not be anything else, because you bring up the foreign price to equalize the American selling price, and the American selling price, of course, has a profit included in it. If it is the selling price, it must have the profit included in it, and you put the tax high enough to make it equalize what you said you thought was the selling price.

Whenever you pass a bill to protect the profit of the American manufacturer of necessity you put an embargo on the importation of articles on which you levy that rate, and I will tell you why. It can not amount to anything else but an embargo in the end, because when by law you fix a rate that protects the profit of the American manufacturer, whether you do it under a specific rate of 2 cents a pound, as in this instance, or whether you do it by Executive order, as you would under the administrative features of this bill, you have the American manufacturer standing behind a wall where not only his cost of production but his fair and reasonable or unreasonable profit is included, and when the foreign goods come in they are taxed so that they can not come in at a price lower than that amount. They compete with the American manufacturer on an even basis of his cost of production and his profit. That is a fixed law. You can not change your law overnight; but there is nothing to prevent a manufacturer from dropping his prices overnight, and he can drop out his profit.

Mr. SMOOT. Either in this country or in a foreign country.

Mr. UNDERWOOD. To be sure; but it is this country where this competitive question is being raised now. This is the battle field we are talking about. When he drops his price to the extent of half his profit, or to the extent of all his profit, then the foreign goods can not find a market to sell in, because with the tax added they have to lose money to stay in the market. You have equalized the cost of production with profit added. They can not stay in the market and they have to go out. When they once go out they do not come in again, and I will tell the Senator why.

You can not build up a market overnight. It takes time and it takes labor and it takes money to develop and build up markets for any class of goods. When an importer comes into this country to sell boots and shoes—which he could not sell here—laces, or cotton goods, or any other necessity of life, he has to establish his distributing points; he has to establish his agencies; he has to advertise his goods and make them attractive to the American public; and when he has done that, then he finds his market and commences to sell his goods. If you fix the machinery of law so that he can only come in here on an equal basis with the cost of production with a profit added, and the American manufacturer for the time being drops his selling price just to the extent of his profit, or half his profit, he drives out the foreign goods, and they will not come back as long as that law stands on the statute books, because when you have driven them out they will not again go to the expense of appointing their agencies, developing their market, and advertising their goods for sale, when they know that under your law the American manufacturer, by giving up a part of his profits, can drive them out again. The result is that you establish an embargo, you create a monopoly in favor of the American manufacturer, and he can exploit the American people to any extent he desires.

Mr. SMOOT. Mr. President, I want to say again that in the 12.7 cents there is a profit in the foreign country just the same as in the price in this country; but the Senator only mentions one reason why we arrived at this figure. He has not taken into consideration the fact that those goods can be made in Germany now cheaper than they could be made before the war, cheaper than the pre-war price. I do not want to repeat what I have said, but it is impossible to conceive that they could not do it, when we know that every gold mark received for goods coming into this country from Germany purchases in Germany in labor and in clothing and in food nearly four marks, and that was not the case before the war. Such a condition as that never existed before, and there is not any doubt that Germany is in a position now to make goods cheaper than she did before the war. Will she sell them as cheaply as she did before the war? Yes. Can she sell them for less in order to get a market, the American market, the best there is in the world? Without a doubt. Therefore I think, as far

as the Senate amendment is concerned—about 12 per cent ad valorem—that there is no good reason for complaint, knowing those conditions to exist in Germany to-day.

Mr. KING. Mr. President, the senior Senator from Utah [Mr. SMOOT] has adverted, as has the Senator from North Dakota [Mr. MCCUMBER], a number of times to conditions in Germany. Conditions in Germany are changing perhaps more rapidly—I refer now to the industrial and economic conditions—than the conditions in many other countries in the world.

For instance, on the 1st day of April of this year there was an advance in Germany in all prices of labor of what might be denominated an industrial character, in contradistinction to labor of an agricultural character, of 40 per cent; and there was a marked advance—I am not sure as to the per cent—in the wages of agriculturists. The transportation charges likewise on the 1st day of April of this year, were advanced 40 per cent. Rents were advanced from 25 to 50 per cent and more; and in the case of nearly every commodity—indeed, I will say all commodities, so far as I am advised—sold in Germany the prices underwent a material advancement.

I shall present to-morrow morning some statistics from Germany, recently cabled, many of them obtained by the Department of Commerce, showing the wonderful mutations that are occurring there in the industrial and in the manufacturing life of the people.

I want to protest against the constant dangling of the German specter in this Chamber by Republican Senators to frighten hysterical Senators into the acceptance of the extortionate rates which find expression in this bill. I do not regard it as legitimate and fair to urge as reasons for these infamous rates the situation in Germany—a situation which existed months ago, but which has undergone a material modification. I will furnish some figures which I think will controvert the statement of my colleague that all of the products and commodities produced in Germany now are produced cheaper than they were before the war. I think I shall be able to show to the Senate, before this debate is over, that there are many articles produced in Germany now the cost of which is in excess of the pre-war cost, measured by the gold standard.

Mr. JONES of New Mexico. Mr. President——

The VICE PRESIDENT. Does the Senator from Utah yield to the Senator from New Mexico?

Mr. KING. I yield.

Mr. JONES of New Mexico. The Senator from North Carolina [Mr. SIMMONS], in his speech some days ago, presented some tables showing just the situation which the Senator from Utah has now announced. I can not recall the date of that speech so as to turn to those tables, but they have been printed in the RECORD, and they show just what the junior Senator from Utah has stated. As to textiles and leather, the gold cost of production in Germany is above that of the gold prices in the United States.

Mr. KING. The senior Senator from Utah [Mr. SMOOT] disagrees with the Senator from New Mexico; but I affirm that the facts will demonstrate the accuracy of the contention made by the Senator from New Mexico.

Mr. SMOOT. Mr. President, I should like to ask my colleague how such a thing could take place, how it would be possible, when I can demonstrate the contrary beyond a question of a doubt from the very best authority that there is in Germany, one of the greatest statisticians in Germany. I wrote and asked him what a gold mark would purchase in labor, in clothing, in rents, and in food in Germany on the basis of the then value of the mark, which was about fifty-two one-hundredths of a cent, and how much labor and how much rent and clothing and food the gold mark would purchase in Germany upon the basis of the value of the mark being fifty-two one-hundredths of 1 cent—how much more than fifty-two one-hundredths of 1 cent the gold mark would purchase in these commodities. His answer to me at that time was that it was 4.56 times, or over 450 per cent increase. Of course, I recognize that the mark is lower than that to-day, and perhaps the price of labor has increased with the falling of the mark to fifty-two one-hundredths of a cent; but even with that, Mr. President, I say it is nearly, if not all of, four times the amount. That is the condition which exists, and that is the answer I got to my letter. I have known the statistician for many years, and I know that he gave me the absolute facts.

Mr. SIMMONS. Mr. President, when we were having the hearings a very interesting incident occurred in connection with the testimony of one of the witnesses who was asking for greatly increased protection of his product, because he said he was in competition with like German products. He stated that he had been to Germany and had spent three months there, as I recall it; that he had visited the factories producing the same thing he produced and sold in this country, and he was comparing the prices paid in Germany for labor with the prices paid in this country for labor, reducing the German price to the gold standard.

After he had finished his testimony, tending to show that he could not compete with the German producer, I asked him if he investigated the prices of commodities in Germany, especially of those things which constitute the necessaries of life. He stated that he did. I asked him how many pounds of meat, such as is consumed in this country, the wages paid a laborer in his factory would purchase. He stated the number. I said, "How many pounds of like meat would the wages paid in Germany, in marks, purchase?" He hesitated a minute, and then said, "Just about the same number of pounds." That testimony is in the hearings, and I will find it if Senators question it.

I want to say to the Senator that undoubtedly just after the armistice there was a tremendous propaganda in Germany looking to the extension of German trade in foreign countries, looking to a conquest of the markets of foreign countries, in favor of an intensive drive on the part of Germany, appealing to the laborers of Germany to content themselves with low wages, appealing to the manufacturers to content themselves with low profits, in order that this great objective of Germany might be attained, and there was response to that in the prices charged by labor and the profits charged by manufacturers. While that process was going on there was undoubtedly low cost of production in Germany.

But that situation has passed. The German laborer is no longer content to receive low wages. He is now demanding that his wages be fixed by international standards. The German manufacturer is no longer content to take meager profits. He is insisting that he shall have the profits which obtain in world markets, and as a result of that change in conditions the prices of German products have advanced tremendously.

The experts—and I name them, Mr. Davis and Mr. Fix, appraisers selected by the committee to assist them because they stood out prominently in their profession as men of knowledge, men of information, men of judgment, men upon whose statements the committee could rely—those gentlemen have stated to me that the prices of German products last August, when the Reynolds investigation was made and at which time the prices found in the Reynolds report were fixed, were not the prices of the present time, but that at the present time the export prices of German products offered in foreign markets had greatly advanced, and that to-day there was very little if any difference between the export selling prices of German products in the world markets and the prices of other European industrial countries.

The conditions described by the gentlemen who came before the committee and demanded these high rates, especially where the competition was with Germany, probably justified the alarm they had taken, probably justified the panic into which they had been thrown; but those conditions exist no longer; those conditions are past. The conditions in Germany with reference to production, the cost of labor, the cost of raw materials, and the prices charged by the German manufacturer are about the same as those which exist in the other countries of Europe.

Mr. JONES of New Mexico. Mr. President——

The VICE PRESIDENT. Does the Senator from Utah yield to the Senator from New Mexico?

Mr. KING. I yield.

Mr. JONES of New Mexico. I have found the table to which I referred a few moments ago. It comes from the Department of Commerce, and compares the prices in the middle of 1914, just before the war, with the prices in April, 1922, and taking 100 as the price in July, 1914, just before the war, we find that of foodstuffs the relative price now has increased from 100 to 5,750; of textiles and leather, from 100 to 8,907.

The mark in Germany is worth only about one-seventieth of what it was in 1914, but we find that as to textiles and leather the increase in price has been eighty-nine times, taking the gold value in Germany at what it was in 1914. That is true as to textiles and leather, and other commodities have not increased to such an extent, but the average of all commodities is fifty-nine times what it was in 1914, in marks, leaving, on the average of all commodities over there, only a comparatively small difference between the cost of those commodities to-day, in marks, measured in their gold value, and the value in 1914.

Mr. SMOOT. It is between 70 and 59, and that is about 16 per cent. That is exactly what I claimed.

Mr. JONES of New Mexico. The junior Senator from Utah said that as to some of these articles, their cost of production

was beyond that of the pre-war times, and the junior Senator from Utah was right about it.

Mr. KING. I want to say to the Senator from New Mexico that those figures which he has read were based upon conditions anterior to April 1, and when you add to those items the increased cost which would result from a 40 per cent increase in wage, as well as the other increases, in transportation, cost of commodities, raw materials, and so forth, then, in my opinion, it will practically bridge the gulf suggested by my distinguished friend, between 59 and 70.

Mr. JONES of New Mexico. I wish to refer again to the statement made in this official document as to increases which had been made this year in wages, again corroborating what the junior Senator from Utah has said. I read again. I do not think it could be stated too often. Even Senators apparently can not remember it from one day to the next, so I desire to read again:

The New York office (50 Broad Street) of the Federal Reserve Board has received a wireless from the American commissioner in Germany, giving the wholesale price index of the Frankfurter-Zeitung for April 3, 1922. According to this index there has been an increasé of 20.7 per cent in the general level of wholesale prices in Germany during the month of March, as compared with an increase of 23.6 per cent during February.

Mr. SIMMONS. Let me interrupt the Senator. That is a statement which was issued by the Federal Reserve Board on the 8th day of April, 1922. I had that before me when I gave that table.

Mr. JONES of New Mexico. I referred to it two or three times, but apparently Senators can not remember these things, and we have to refer to them oftener than we would like. We do not want to consume time, and if Senators only remembered it, we would not be put to the necessity of having to repeat these statements.

Mr. SIMMONS. Mr. President, following the statement with reference to the increases announced by the Federal Reserve Board as having taken place in Germany in March and February of this year, there is the table given by the Federal Reserve Board, as to wholesale prices and the index numbers of Germany. Taking 100 as the starting point, in April, 1921, prices of food products had risen in Germany to 136; on all commodities to 130. In May they had risen to 133 on food products, and to 132 on all commodities, and so on, continuing up to December, 1921, when they had risen on food products to 362, and on all commodities to 298. In January, 1922, they had risen to 384 on food products, and to 317 on all commodities; and in April, only two months later, they had risen to 654 on food products, and 525 on all commodities. So that from the 1st day of April, 1921, on all commodities the index number had risen from 130 to 525.

Mr. KING. Mr. President, my attention has been called to a recent transaction in South America which illustrates the point I have been making, and it is my opinion a refutation of the position of Senators upon the other side, namely, that prices in Germany are rapidly rising and that in some instances they have reached heights greater than those attained in the pre-war period, and that Germany is unable now to compete in the markets of the world with the United States, as well as with other countries.

In the Argentine Republic, within a few days last past, bids were advertised for the purchase of a limited amount of rolling stock for railroad purposes. The specifications were very clear and there was no misunderstanding as to the character of the materials desired. Belgium bid, the United States bid—and when I say Belgium and the United States, I mean representatives from those countries. There were one or more bids from Great Britain and one or more bids from Germany; I have not the exact number. The lowest bid was submitted by Belgium. The next higher bid was submitted by the representative of the British house. The United States stood third, and Germany presented the highest bid. The Belgian bid was $1,000,000. The British bid was $1,250,000. I am reducing everything to the basis of the dollar. The bid submitted by representatives of the United States was $1,500,000. The bid submitted by the German representatives was $2,000,000.

Mr. WILLIS. Mr. President——

Mr. KING. I yield to the Senator from Ohio.

Mr. WILLIS. On the point my friend from Utah is just making, speaking relative to prices in Germany, I wonder if it would not illuminate his most interesting argument if I should call his attention to a card which has just come to me from a friend who is traveling in Germany, a souvenir postcard, on which is written this message:

The Germans will make good if they have a chance. The German mark is selling to-day 300 for one American dollar. The city is filled with foreign buyers and money from America.

Now, if the free-trade idea of my friend from Utah shall obtain in our tariff making, that condition will continue. Germany will continue to be filled with American buyers, spending American money for German products, and American factories will stand idle and American workingmen will be in the streets.

Mr. KING. Mr. President, the Senator from Ohio shows as great ignorance as to my position on this question as he does upon economic questions, and I say that with all due respect to him. In the first place he knows, because he has been in the Chamber during the debate, that the question of free trade is not involved, that there is no one arguing for free trade, that no one is advocating free trade, that I have repeatedly declared that was not the issue, and that I was not advocating a free-trade policy. So the Senator misstates knowingly—I will withdraw that—he misstates my position, and I attribute it to the fact that he did not hear what I have said upon a number of occasions.

Mr. WILLIS. Mr. President, the Senator is worn weary——

Mr. KING. The Senator need not worry about the weariness of the Senator from Utah.

Mr. WILLIS. I was about to say that the Senator is not in his usual good humor, or he would not have said what he just started to say. I did not misunderstand the Senator.

Mr. KING. I do not yield for the Senator to make a speech. He can do that in his own time.

Mr. WILLIS. I wanted to correct the misapprehension under which the Senator is resting. If he does not desire to be corrected, certainly I shall not interfere with him.

Mr. KING. If the Senator has anything to state by way of correction, I shall be glad to hear it.

Mr. WILLIS. What I said is correct. I wish to correct the Senator from Utah.

Mr. KING. What the Senator said a moment ago with respect to my views is absolutely incorrect, and he ought to know it. The Senator from Ohio accepts the economic view that the more paper money we issue the greater our prosperity.

Mr. WILLIS. I do not desire to have the Senator make a statement like that. If he refers to me, I entertain no such view and have never here or elsewhere expressed any such thought.

Mr. KING. It is just as clear as the noonday sun that the Senator, when he exhibited with so much glee the post card which he has called to our attention, has accepted the view that because the paper mark measured by the gold dollar was of negligible value, Germany was put in the position that she could outsell the world and so occupy a position of vantage that she would not occupy if she was on the gold basis. I was about to say to the Senator that, possessing these remarkable economic views so consistent with Republican theories of finance and tariff, he would find a haven of delight and refuge if he should go to Russia. There if a man goes out to buy a breakfast consisting of an egg of ancient vintage, a little piece of brown bread or black bread the size of three or four fingers, and a cup of tea, he has to carry along a wheelbarrowful of rubles.

I recall the statement made by a number of persons who recently came from Russia, some of them being representatives of the Red Cross—I do not carry the figures in my mind, but I remember that one man paid the driver to take him from the station to the hotel 1,000,000 rubles, $500,000. I recall another case where a man bought an overcoat that cost him something like 12,000,000 or 15,000,000 rubles, which would be $6,000,000.

Evidently the view of the Senator from Ohio—and I am afraid the same view has impregnated my able colleague from Utah—rests upon the theory that the more paper money we issue the greater the expansion of currency, the greater the prosperity, and the greater the ability of the United States to compete with other nations in manufacturing enterprises and industrial development.

Mr. WILLIS. Mr. President——

Mr. KING. I yield to the Senator from Ohio.

Mr. WILLIS. I know the Senator wants to be fair. What was stated in the card which I read to the Senator was that Germany was filled with American buyers. That had no relation at all to what the Senator has been so eloquently and interestingly speaking about.

On the money matter, of course, the Senator misstates my view, but the statement on the post card had no relation to that. There are Americans in Germany buying, with American gold, German products because they can be made there more cheaply than they are being made here. I repeat my statement. I withdraw what I said about the Senator's free-trade views. If he regards that as objectionable, I withdraw it. I only drew that conclusion from what I have heard him say, and I have

listened with great interest to his speeches; but if he regards that as scandalous, I will withdraw it.

Mr. KING. If the Senator wants to be insulting, I will not yield to him.

Mr. WILLIS. I do not desire to be insulting at all.

Mr. KING. He will find that others can say something, too, if he persists in that sort of talk.

Mr. WILLIS. What I was undertaking to say to the Senator was in perfect good humor. I do not understand his very unusual testiness. I was endeavoring to say to the Senator in perfect good humor that the statement I am trying to bring to his attention is the fact that American buyers are now in Germany buying, with American gold, German products which we ought to be manufacturing here, and which he thinks it would be better to have manufactured there.

Mr. KING. The first thing the Senator called attention to with such evident glee was the fact that 300 marks would buy an American dollar. That is number one. We will discuss that for a moment.

The view of my esteemed friend, and that view has been expressed by the chairman of the committee upon a number of occasions, seems to be that the more paper money the Government issues the stronger it becomes as an economic factor in the industrial world; that the more paper money Germany issues the greater competitor she is of the United States in the world markets.

Now, if that is good economics, Poland ought to be a greater competitor than Germany, because she has issued more of an inflated currency in proportion to the gold reserve which she has, her wealth and her population, than has Germany. Look at Russia, with her 120,000,000 to 170,000,000 people, depending upon what we denominate Russia, considering the excisions which have been made from her territory, has issued now trillions—it exceeds billions and the last statement that I saw it was two or three trillions of dollars of paper money. This philosophy, which is comparable to the philosophy of the great protectionists, not the modern protectionists but the protectionist who finds refuge behind this bill now before us, would mean that those nations which have issued the greatest amount of currency ought to be our most formidable competitors. Of course the theory is absolutely fallacious. A nation may go upon a spree, if I may use an expression which we all understood before prohibition, the same as a man may go upon a spree, but it, as well as he, pays the penalty. A man may take a drug or a nation may take a drug and fancy that the drug has made him or it rich. Germany issued a large amount of paper money, and some foolish people there, and some foolish people here and elsewhere, conceived that that great inflation in Germany was going to make her regnant in the financial and in the industrial world.

Mr. McCUMBER. Mr. President——

Mr. KING. First let me complete my statement.

But as the paper money was issued, of course prices began to rise, measured by gold—that is, the mark measured by the gold dollar. The best economists of Europe and the best financial thinkers of the United States know that Germany, if she persists in this policy of inflation, must reach the same result that Russia has reached, and so will have, as the Southern Confederacy had at the end of the war, large quantities of paper money which will be absolutely worthless, shrinking in value and requiring more and more of the paper money to purchase the most insignificant article that enters into the consumption of the people.

I now yield to the Senator from North Dakota.

Mr. McCUMBER. I agree with the Senator that anyone who takes the position that the depreciated currency is in the end beneficial to a country is adopting a most fallacious theory. The matter to which I wish to take exception is the Senator's statement that the chairman of the committee has ever in any way, shape, or manner taken a position of that kind. I certainly never have. I have not even discussed that in the consideration of the pending bill, much less did I ever assume any such position.

Mr. KING. Perhaps I stated it too broadly, and I ask the Senator's pardon. What I meant to say was that the Senator from North Dakota, chairman of the Committee on Finance, in his very strong discussions of the bill—they have been strong, and he has stated the arguments in favor of his position and the bill as strong as they could be stated by anyone—has called attention to conditions in Germany and the price of labor, the low wage paid, and the low price for raw materials and commodities. The inference which I drew from his statements was that the cheapness, the low price of labor, and the low price of commodities resulted from inflated currency.

Mr. McCUMBER. No, Mr. President, as I have stated, only as measured by the American standard. I have not discussed to what extent the depreciated currency of Germany has had to do with the lower wages there, but I have simply measured those wages in American dollars and in nothing else. I want to assert most positively, however, that I do not think a depreciated currency is any more beneficial to any country than having a lot of outstanding notes which are not worth one cent on the dollar is beneficial to an individual.

Mr. KING. Mr. President, I know the integrity of the soul and of the life of the Senator from North Dakota and his soundness upon fiscal policy. I think he is not sound on the tariff question, and, of course, he does not credit my views as squaring with the principles of a sound economic policy as it relates to the tariff.

However, Mr. President, coming back to the point which I was discussing, it is obvious that if Senators or anyone else attribute to Germany any superior supremacy or any advantage in the industrial world because of her inflated currency they must soon abandon that position, as Germany will be compelled to abandon that position.

Mr. SMOOT. Mr. President, I do not know whether or not my colleague is aware that in Germany the only advantage that can possibly come from her depreciated currency is that Germany regulates the amount of rent which shall be paid by the laboring man, the prices at which his food shall be sold to him, the prices of the clothing which he buys. In that way there is an advantage in Germany in the making of goods. Nobody has ever dreamed that a depreciated currency in the end would save any country or be of any advantage to any country.

However, the conditions which I have described are now in existence in Germany. Under the German form of government the man who has a house to rent may be compelled to rent it at a certain rental; the man who has goods of a certain class to sell may be compelled to sell them at a certain price; and the laborer who is to be paid is compelled to be paid a certain price. Those are the advantages, and the only advantages, that come from the existence of a depreciated currency, and those advantages, Mr. President, Germany to-day has.

Mr. KING. I am familiar with the regulations which in the past have been promulgated by the new German Government under the Presidency of Mr. Ebert. I know, however, the restive attitude of the people of Germany toward what they regard as unjust and improper regulations. There have been such protests against some of those regulations as that many modifications of them have been made. It is only a question of a little time when there will be a revolution in Germany—I do not mean a political one—that will be so powerful against what might be denominated these paternalistic impositions as that they will be swept away.

As I have stated—and I ask pardon for the repetition—on the 1st of this month, notwithstanding there had been an increase in wages only a short time before, there was an increase of 40 per cent in wages demanded by the laborers in Germany. We all know the power of the labor organizations in Germany. We know, as was so succinctly and forcefully stated by the distinguished Senator from North Carolina [Mr. SIMMONS], that there is manifesting itself a world solidarity among the laboring people. Whether we like it or do not like it, there will come a time when the wages paid in the country where they attain the highest rates will measure the wages in substantially all other civilized countries.

I confess that I look with a good deal of apprehension upon the movement toward a world union of the laboring classes. We know what is being done—it is ascribed to the La Follette bill; I make no comment, one way or the other—among the laborers in the marine world. The higher wages paid upon American vessels have brought higher wages upon other vessels, and the higher wages paid in the United States undoubtedly have been reflected in demands for higher wages in other countries. In Canada we know that the labor unions are in constant apposition to the labor unions here. They have international meetings in Ottawa one year and possibly the next year in some city in the United States. A scale of wages is adopted which is substantially the same in Canada as that which prevails in the United States.

We have international wage meetings in the City of Mexico and representatives go there from the United States. International wage gatherings are held in European nations to which representatives of the civilized nations go.

There is a leveling process, Mr. President, in the wages paid throughout the civilized world, and as that leveling process is effectuated it manifests itself in a leveling process in the prices of world commodities. We may fight against it as much as we

like, but the tendency in prices is to a world price level. There is practically a world price level in agricultural products and in many other products. I admit that there are many exceptions to the statement which I have made; but I am merely stating that there is a tendency in this direction; and in time—and it will not be very long—we shall find, Mr. President, that the cost of production of many of the articles embraced in this bill will be substantially the same throughout the civilized world, and the cost of labor will be substantially the same throughout the civilized world. When I say the "cost of labor" I do not mean necessarily per man, but measured by the result of labor rather than by the number of employees, for in some countries, because of superior skill or initiative or ingenuity, one man may perform and does perform more work than will be performed by a workman in the same craft in some other country.

Mr. President, I protest again against these efforts to affright the Senate and the country by holding up Germany as a great juggernaut that is about to be rolled over the prostrate form of this puissant Nation. In my judgment, it is no creditable view of the power of our own Nation, and it is ascribing to Germany a power and a resiliency which she does not possess. I repeat what I said in the beginning, before the interruptions occurred, that in some articles even now the cost in Germany is greater than it was before the war. It can not be otherwise. There have been excised from Germany by the Versailles treaty Alsace and Lorraine; a part of her territory was given to Belgium, although only a small area, it is true; a considerable part was taken from her and awarded to Poland; she has been divided by the corridor that runs to the free city of Danzig. Some of her iron mines have been taken from her; much of her coal has been taken from her; a large part of her potash has been given to Alsace.

Stripped of her ships, stripped of many of her resources, including her colonies, burdened by financial obligations imposed by the Versailles treaty of more than 130,000,000,000 marks, it must be obvious to the most superficial observer of economic conditions and world conditions that Germany for many years will be prostrate. How is Germany going to meet the tremendous burdens placed upon her?

Moreover, Mr. President, she will be compelled to buy in the markets of the world raw materials in order that she may engage in manufacturing enterprises to the extent that she engaged in them prior to the war. She can not hope to achieve any degree of success in a manufacturing or industrial way except by the purchase of millions of dollars' worth of products from other countries annually. She has to buy our cotton; she desires to and must buy copper and many other raw materials from this country as well as from other countries. It is absurd to say, when she has got to trade in the world on the gold basis in order to buy the things she needs, that she occupies the great advantage to which some of our Republican friends are constantly referring.

My good friend from Ohio [Mr. WILLIS] said that a friend of his who was over there speaks about the number of Americans over there who are buying or preparing to buy. I do not know what the particular facts are, but I do know that there are Americans going into all countries where they can find markets for the purpose of selling and, of course, in many instances for the purpose of buying. Of course, we are buying something from Germany. Last year we imported approximately $88,000,000 worth of products from Germany, but we sold to Germany approximately $300,000,000 worth of our products. I have no doubt that some of the men referred to in the suggestion of the Senator from Ohio who had gone from America were selling American goods to Germans, and they were, of course, buying in return German goods for this market; exchanges were being made. Is it wrong for Germans to come here to buy our goods? It is all right, I suppose, for Germans to come over here and buy $300,000,000 worth of our goods, but it is wrong for Americans to go over there to buy $88,000,000 worth of their goods. As a matter of fact, Germany would not have purchased approximately $300,000,000 worth of our products unless she could have paid for some of them by selling to us $88,000,000 worth of her products.

We benefited by our representatives going to Germany. Doubtless they found markets there for our surplus products, and I have no doubt there are many representatives of American houses, of American manufacturers, of American vendors, in Germany seeking markets there for surplus American products.

Mr. President, I wanted to say just a word or two about the item which is under discussion—phosphoric acid—and I would not have alluded to these other matters except for the remarks which have been made by some of my Republican friends.

In the first place, I want to call attention to the fact that phosphoric acid is made by the General Chemical Co., which has been absorbed by or constitutes a part of the great trust, the Allied Chemical & Dye Corporation of the United States, one of the trusts of the United States—and there are a good many. It has a capital of approximately $300,000,000. It has absorbed a great number of chemical houses or chemical plants and chemical corporations that for a number of years operated independently in the United States. I charge that the Allied Chemical & Dye Co., with its enormous holdings, is a trust and has sought benefits under the schedules of this bill. It is interested in phosphoric acid. It manufactures it. It doubtless was interested in having it transferred from the free list to the dutiable list. Why, even in the Payne-Aldrich Act it was not deemed wise or prudent to put phosphoric acid upon the dutiable list, but in this bill the trusts have become so dominant that they have insisted that phosphoric acid be placed upon the dutiable list. If not the trusts, who else? Why was it done? Who are demanding it? What are the reasons for it?

Another large organization, with capital going into the millions, is interested in this product. That is the Mallinckrodt Chemical Co., of Missouri; and my recollection is that in the House hearings a brief was filed, signed by Mr. Edward Mallinckrodt, which was a plea for a tariff upon this article. The Victor Chemical Works, of Illinois, is a manufacturer of phosphoric acid, as is the Warner Chemical Co., and Powers, Weightman & Rosengarten Co.

Let us see, briefly, the uses to which this product is put.

The principal uses of phosphoric acid, according to the statement made by the Tariff Commission, are in medicine, dental cements, and beverages. I have called attention repeatedly, and I shall do so often again during the course of this discussion, to the fact that the drug men and the chemical men and the manufacturers of medicines seem to have had a free hand in drawing these schedules. Nearly every medicine is put upon the dutiable list, and the people are to pay tribute to these great drug companies, chemical companies, and medicinal companies that have grown fabulously rich in vending their products to the American people.

The domestic production of phosphoric acid in 1914 was 12,420,191 pounds. The import for that year was 528,826 pounds. Of that import 65 per cent came from England, not from Germany. Germany seems to have been but a small factor. The maximum post-war import was less than 3 per cent of the 1919 domestic production—3 per cent!—and yet we are to give the trusts and great concerns, who are so powerful in bringing about the enactment of this law, this tariff upon this article.

The imports in 1914 I have stated. Reading from the statistics of imports and duties in the fiscal year 1908 there were 209,925 pounds imported; in 1909, 144,462; in 1910, 306,175; in 1911, 405,007; in 1912, 454,962; in 1913, 504,383; in 1914, 528,826; in 1915, 265,193; in 1916, 71,568; in 1917, 13,666; in 1918, 17,711, showing, of course, a remarkable decline. In the calendar year 1918 the imports were 4,501 pounds; in the calendar year 1919, 10,925 pounds; in the calendar year 1920, 308,974 pounds; and in 1921, for nine months, 50,338 pounds.

Why should there be a tariff rate upon an import where the amount imported bears such a small ratio to the domestic production? Of course, the only object is to enable the domestic manufacturer to increase the price so that those who buy medicines will be compelled to pay tribute and those who buy this product for beverage purposes—and it is used in the soda fountains—will have to pay an additional price. It is tribute levied by the trust.

Mr. President, I have more regard for a robber, a brigand who goes out on the highway and holds you up with his gun, than I have for some of these trusts and corporations who exercise their tremendous influence and power to drive through tariff legislation to rob the people and increase their own illicit gains. Dick Turpin was an honest man, measured by some who are beneficiaries of this tariff law.

I have stated that under the Payne-Aldrich law this product was free, and under the Underwood tariff law it was free.

Mr. President, I appreciate that nothing that can be said will change the results. The bond has been signed, and it will be executed. The tariff bloc and others are going to put this bill through as it is before us. If an angel from heaven were to come down into this Chamber and, with flaming sword in his hand, tell the Republican reactionaries who are sponsoring this bill that it was infamous, that it was injurious to the American people, it would not change the result. We can only challenge the attention of the country to the evils of this bill and then take a roll call, and let our Republican victors go before the people to justify their course.

Mr. President, as I indicated, when we reach the free list I shall move to place phosphoric acid upon the free list.

Mr. McCUMBER. Mr. President, as no angel in heaven is telling us about this bill being infamous, but only those who are opposed to the protective principle, I wish we could have a vote upon that question as expressed in this item.

Mr. KING. Mr. President, I move to strike out, on page 3, line 2, "2 cents" and to insert in lieu thereof "¼ cent," so as to read:

Phosphoric acid, ¼ cent per pound.

I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. HARRELD in the chair). The Secretary will call the roll.

The reading clerk called the roll, and the following Senators answered to their names:

Ashurst	Harrison	McKellar	Smoot
Borah	Heflin	McKinley	Spencer
Bursum	Hitchcock	McLean	Sterling
Calder	Johnson	Myers	Sutherland
Capper	Jones, N. Mex.	Newberry	Swanson
Curtis	Kellogg	Norbeck	Townsend
Dial	Keyes	Oddie	Walsh, Mass.
Dillingham	King	Overman	Warren
France	Ladd	Page	Watson, Ind.
Gooding	La Follette	Phipps	Weller
Hale	Lodge	Sheppard	Willis
Harreld	McCormick	Shortridge	
Harris	McCumber	Simmons	

The PRESIDING OFFICER. Fifty Senators having answered to their names, a quorum is present. The question is on agreeing to the amendment offered by the Senator from Utah [Mr. KING] to the amendment of the committee.

Mr. KING. I ask for the yeas and nays.

The yeas and nays were ordered, and the reading clerk proceeded to call the roll.

Mr. HARRISON (when his name was called). I transfer my pair with the junior Senator from West Virginia [Mr. ELKINS] to the junior Senator from Rhode Island [Mr. GERRY], and vote "yea."

Mr. JONES of New Mexico (when his name was called). I transfer my pair with the Senator from Maine [Mr. FERNALD] to the Senator from Missouri [Mr. REED], and vote "yea."

Mr. McKELLAR (when his name was called). I have a general pair with the junior Senator from Indiana [Mr. NEW], which I transfer to the senior Senator from Nevada [Mr. PITTMAN], and vote "yea."

Mr. McKINLEY (when his name was called). I have a pair with the junior Senator from Arkansas [Mr. CARAWAY], which I transfer to the senior Senator from Minnesota [Mr. NELSON], and vote "nay."

Mr. STERLING (when his name was called). Transferring my pair with the Senator from South Carolina [Mr. SMITH] to the Senator from Oregon [Mr. STANFIELD], I vote "nay."

Mr. SWANSON (when his name was called). I transfer my pair with the senior Senator from Washington [Mr. JONES] to the senior Senator from Texas [Mr. CULBERSON], and vote "yea."

Mr. WATSON of Indiana (when his name was called). I transfer my general pair with the senior Senator from Mississippi [Mr. WILLIAMS] to the senior Senator from Pennsylvania [Mr. CROW] and vote "nay."

The roll call was concluded.

Mr. LODGE (after having voted in the negative). I have a general pair with the senior Senator from Alabama [Mr. UNDERWOOD]. In his absence I transfer that pair to the senior Senator from Iowa [Mr. CUMMINS] and allow my vote to stand.

Mr. DILLINGHAM. I have a general pair with the Senator from Virginia [Mr. GLASS]. In his absence I transfer that pair to the Senator from Connecticut [Mr. BRANDEGEE] and vote "nay."

Mr. SUTHERLAND. Making the same announcement as before with reference to my pair and its transfer, I vote "nay."

Mr. CURTIS. I desire to announce the following pairs:

The Senator from Florida [Mr. FLETCHER] with the Senator from Delaware [Mr. BALL];

The Senator from Oklahoma [Mr. OWEN] with the Senator from New Jersey [Mr. EDGE];

The Senator from Florida [Mr. TRAMMELL] with the Senator from Rhode Island [Mr. COLT];

The Senator from Montana [Mr. WALSH] with the Senator from New Jersey [Mr. FRELINGHUYSEN];

The Senator from Georgia [Mr. WATSON] with the Senator from Arizona [Mr. CAMERON]; and

The Senator from Kentucky [Mr. STANLEY] with the Senator from Kentucky [Mr. ERNST].

I also desire to announce the absence on official business of the Senator from New York [Mr. WADSWORTH] and the Senator from Washington [Mr. JONES].

The result was announced—yeas 15, nays 34, as follows:

YEAS—15.

Ashurst	Heflin	McKellar	Simmons
Dial	Hitchcock	Myers	Swanson
Harris	Jones, N. Mex.	Overman	Walsh, Mass.
Harrison	King	Sheppard	

NAYS—34.

Borah	Harreld	McLean	Sterling
Bursum	Johnson	Newberry	Sutherland
Calder	Kellogg	Norbeck	Townsend
Capper	Keyes	Oddie	Warren
Curtis	Ladd	Page	Watson, Ind.
Dillingham	Lodge	Phipps	Weller
France	McCormick	Shortridge	Willis
Gooding	McCumber	Smoot	
Hale	McKinley	Spencer	

NOT VOTING—47.

Ball	Ernst	Nelson	Robinson
Brandegee	Fernald	New	Shields
Broussard	Fletcher	Nicholson	Smith
Cameron	Frelinghuysen	Norris	Stanfield
Caraway	Gerry	Owen	Stanley
Colt	Glass	Pepper	Trammell
Crow	Jones, Wash.	Pittman	Underwood
Culberson	Kendrick	Poindexter	Wadsworth
Cummins	La Follette	Pomerene	Walsh, Mont.
du Pont	Lenroot	Ransdell	Watson, Ga.
Edge	McNary	Rawson	Williams
Elkins	Moses	Reed	

So Mr. KING's amendment to the committee amendment was rejected.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment.

The amendment was agreed to.

Mr. KING. Mr. President, I give notice that when we reach the free-list schedule I shall move to transfer phosphoric acid from the present paragraph to the paragraph under which the free list is found.

The PRESIDING OFFICER. The next amendment of the Committee on Finance will be stated.

The READING CLERK. Amendment passed over on page 3, line 2, after the word "acid" and the comma, insert "4 cents per pound," so as to read:

Oxalic acid, 4 cents per pound.

Mr. KING. Mr. President, I move to strike out the numeral "4" and to insert in lieu thereof the figure "1¼," so that it will read:

Oxalic acid, 1¼ cents per pound.

I am going briefly to call attention to a few facts stated in the summary furnished by the Tariff Commission to show the character of the product under consideration, and what I conceive to be the lack of reasons for the tariff.

Oxalic acid occurs in many plants, but commercial supplies are obtained by chemical processes rather than by extraction from natural sources. It is used largely for commercial laundries, for rinsing out the last traces of alkali or soap, and for removing iron stains.

It is apparent from this statement how important it is to the people of the United States, not only to those engaged in the laundry business but to the households of the land.

It is also employed in textile dyeing and printing, for bleaching leather, cork, wood, straw, and shellac, and as an ingredient in metal polishes. It serves as a reagent in chemical laboratories. Some of its salts are used in medicine and in photography.

Can there be any product that does not rise to the category of the supremely important ones that has more uses than the commodity which we are now considering? It would seem from the statement of the uses to which it is put that the great mass of the people require it more than those who might be denominated as belonging to the classes of the rich.

Why should there be a tariff placed upon this product which is so important to such a great number of people? In the Senate committee bill we find 4 cents per pound duty, and in the House bill 25 per cent ad valorem. In my opinion, if we are to consider pre-war prices, the Senate committee bill is a disadvantage over the House bill. The pre-war wholesale price in the United States was 5 cents per pound.

It is obvious that a duty of 25 per cent would be less than the rate which is fixed in the bill of 4 cents per pound. Here is an item important to the people, used by the housewives, used in dyeing and in printing, in bleaching, as an ingredient in metal polishes, and yet it is proposed to give to the manufacturers of the product a tariff of nearly 100 per cent, measured by pre-war prices.

The price on April 24 of this year was from 11½ to 13 cents per pound. Of course, the price has been forced up by the manufacturers here and by war conditions and conditions which prevail throughout the world. The wholesale price

abroad is 15 cents a pound. There can not be any reasonable ground for apprehension of competition measured by the pre-war prices. The pre-war price, as I have stated, was 5 cents per pound. The unit price abroad is 15 cents per pound. Now we propose to put a tariff on of 4 cents per pound. Why? Of course, there is only one answer. It is to swell the profits of the domestic manufacturer.

Even those who framed the Payne-Aldrich law were satisfied with a tariff rate of 2 cents per pound, but the Payne-Aldrich law did not satisfy those who made the demands for this rate, and it has been doubled.

Mr. WALSH of Massachusetts. Mr. President——

Mr. KING. I yield to the Senator from Massachusetts.

Mr. WALSH of Massachusetts. I presume the Senator will perhaps state it later, but I would like to have him state whether there were any imports of this product during the last year.

Mr. KING. Yes; there were.

Mr. WALSH of Massachusetts. What percentage of the domestic production were the importations?

Mr. KING. I do not know the domestic production for the years 1920 or 1921, but the survey from which I am reading states that in 1919 the domestic production of oxalic acid was 2,103,500 pounds and the imports for 1919 were 651,600 pounds. The imports for the first nine months of 1921 were 1,016,471 pounds.

Mr. WALSH of Massachusetts. I understand the Senator to state that the price of the foreign product is higher than the price of the domestic product.

Mr. KING. Yes; 15 cents a pound is the price of the foreign product abroad, as shown by the tariff survey.

Mr. WALSH of Massachusetts. I understand also that the imports are a small percentage of the domestic production. On what theory can a tariff be justified on such a product? What explanation can be made except the explanation of giving the American producers something more out of the pockets of the consumers?

Mr. KING. There is no explanation other than that which is implied in the question suggested by my friend. I want to be entirely accurate as far as I can in regard to the record. The imports are considerable, measured by the consumption. I presume, although I am speaking now from hearsay rather than from facts, that the imports bear about the ratio of 1 to 3. This year the production, I am told, will be more than last year. In 1919 the domestic production was more than 2,000,000 pounds and the imports for the first nine months of 1921 were 1,000,000 pounds. If the production in 1921 was the same as it was in 1919, then the imports would bear the relation of 1 to 3.

Mr. WALSH of Massachusetts. In discussing the last product, phosphoric acid, I noticed that the Senator made it very clear and beyond dispute that an amount equal to 3 per cent of the domestic production was imported into this country. I heard him ask how a tariff could be justified upon such a small importation of a product that is almost entirely produced in this country. I was surprised to find absolutely no reply from the other side.

It seems to me if the Senator can continue to show, as he is showing, that we are putting tariff rates upon chemicals which are produced almost in sufficient quantities to supply the domestic market, that some answer must be made to the theory of protection that simply permits the home producer to raise prices and protects no one.

Mr. KING. The answer is that the Republicans have the votes.

Mr. WALSH of Massachusetts. I wanted an answer also as to the last chemical referred to, phosphoric acid. The question went unanswered in the record, although only 3 per cent of that chemical consumed here was imported into the country.

Mr. KING. I may say to the Senator that before we get through with the bill I shall show a large number of items as to which the imports are less than 1 per cent, and yet the tariff rates are enormous. The less the imports—indeed when they reach the vanishing point with respect to many of the commodities covered by the bill—the higher the tariff. Of course, it can only be justified upon the theory that the Republicans have the power, that the trusts and manufacturers and the great chemical organizations of the United States have made demands and the demands were being acceded to.

Take the product of phosphoric acid, just referred to. It is the product of one of the most vicious trusts in the United States, a corporation that has a capital of more than $300,000,000, and yet we rob the poor widow and the sick child for the purpose of putting more money into the pockets of the great chemical trust whose name I mentioned when we were discussing phosphoric acid.

Take the item now under consideration, oxalic acid, which is used in such large quantities by every household in the United States; is used as a medicine; is used in photography; is used so extensively throughout the United States. It is manufactured in part by Powers, Weightman & Rosengarten, one of the large firms whose brief I find before the committee, in which there are so many suggestions as to increases in the chemical schedule. It is manufactured also by the Grasselli Chemical Co., one of the largest chemical concerns in the United States. It is manufactured by the Roessler & Hasslacher Chemical Co. and by the Victor Chemical Co.; and, by the way, the Victor Chemical Co., Mr. President, seems to have no limit to the demands which it has made upon the committees drafting the bill. It made demands as to many items. Its representative, with reference to oxalic acid, insisted upon 5 cents per pound specific duty. The committee have given 4 cents per pound. The pre-war price, as stated, was 5 cents and the Payne-Aldrich rate was 2 cents.

Mr. President, what else can be said? What should be said with domestic production so large, the product so important, and used by so many? Why should we increase the price by this enormous tariff rate?

The present price is double the pre-war price. It is obvious, with no competition from the world, because the world price is 15 cents, we are turning over this product to the cupidity of the trusts. I protest against it. It seems to me that it ought to be on the free list, but I have been content, Mr. President, to urge the adoption of the same rate which we find in the Underwood law.

Mr. WALSH of Massachusetts. Does the Senator from Utah state that this acid was on the free list in the Payne-Aldrich law?

Mr. KING. No; there was a specific duty on oxalic acid of 2 cents in the Payne-Aldrich law.

Mr. McCUMBER. Mr. President, preliminary to what I desire to say with reference to the rate on this item, let me call attention to the report of the Tariff Commission, which states:

> Production: Before the war there was only one producer in the United States, who used a process dependent on heating sawdust with caustic potash, followed by elaborate chemical treatment. This firm had severe competition from German producers, who have developed a newer and apparently cheaper process by heating caustic soda with carbon monoxide under pressure, forming sodium formate, which on further heating yields sodium oxalate, and this in turn is converted into oxalic acid. During the war several firms in the United States undertook its manufacture by the new method, but they are still in the infant-industry stage of development. In 1919 (preliminary figures) the output of oxalic acid was 2,103,500 pounds, valued at $545,600.
>
> Imports: Pre-war imports of oxalic acid, chiefly from Germany, but partly from Norway and Great Britain, varied from about seven to eight million pounds per year, despite a duty of 2 cents per pound. It is estimated that the imports were several times greater than American production.

Mr. President, I wish also to quote from the table of statistics of imports and duties from 1908 to 1918, inclusive.

Oxalic acid was free in 1908, and we imported 8,853,000 pounds. Remember that our entire consumption was only about 10,000,000 pounds, and yet we imported nearly 9,000,000 pounds. We have started to manufacture that product in the United States. Is the industry worth saving? In 1909 we imported 9,797,000 pounds, or nearly 10,000,000 pounds. The article was then free. In 1910, with a 2 cents per pound duty, we imported about 5,000,000 pounds; in 1911 we imported 7,053,000 pounds; in 1912 we imported 7,077,000; in 1913 we imported 8,046,000, in round numbers. Those importations, I repeat, were when there was a duty of 2 cents per pound on the article.

Mr. President, if we are importing over 8,000,000 pounds under normal conditions, and we consume only 10,000,000 pounds, is it not worth our while to keep the industry in the United States?

We are fast approaching the pre-war prices of the commodity; in the United States the prices are coming down rapidly. We shall probably reach the pre-war prices in a short time. Undoubtedly foreign countries must again compete and will be able to furnish practically all of the oxalic acid; but I think it is worth a little more than a 25 per cent ad valorem duty in order to maintain the production of this article in the United States.

Mr. MYERS. Mr. President, I understand that the item now before the Senate is oxalic acid. I will ask the chairman of the committee, the Senator from North Dakota [Mr. McCUMBER], if that acid is not used as one of the ingredients in the manufacture of soap?

Mr. SMOOT. Not an ounce of it is so used. It is used in dyeing and for other similar purposes, but not a pound of it goes into soap.

Mr. MYERS. Is it not used at all in the manufacture of soap?

Mr. SMOOT. Not at all.

Mr. McCUMBER. It is used to remove the effect of soap, but not in the manufacture of soap. It is used to destroy the alkali in soap which may be used in laundering, but it is not used in the manufacture of the soap itself. It is generally used, therefore, in the manufacture of fabrics.

Mr. SMOOT. Take wool, for instance. Wool is washed as clean as it can be by either soda or potash. Then, in order that the fabric may take the dye evenly it is given a bath of oxalic acid, which removes every particle of grease which may have been in the wool and which could not be washed out. Then the wool is prepared for colors, the same as is cloth or any similar goods; but not a pound of oxalic acid goes into the manufacture of soap.

Mr. MYERS. But it is largely used in laundries, is it not?

Mr. SMOOT. Not as soap.

Mr. MYERS. But is it used in the process of laundering clothing?

Mr. SMOOT. It is used by laundries to remove the grease which comes from the body and sometimes adheres to the clothing. This acid removes and destroys such stains, but it is not soap at all. It destroys whatever grease there may be in wool or in the cloth before it is dyed, and destroys the effect of the soap that is not washed out.

Mr. MYERS. Is it used in laundering ordinary clothing by laundries?

Mr. SMOOT. It is used for that purpose.

Mr. MYERS. For taking out grease spots?

Mr. SMOOT. Or for taking out iron rust or any discoloration that may occur in the clothing incident to its wear; but it is impossible to use it in soap, I will say to the Senator from Montana.

Mr. JONES of New Mexico. Mr. President——

Mr. MYERS. I yield.

Mr. JONES of New Mexico. I am sure the Senator is correct in his information as to the use of this acid. I read from the Summary of Tariff Information just a line:

> Oxalic acid has a great variety of uses, the largest probably in commercial laundries for rinsing out the last traces of alkali or soap and for removing iron stains. It is also employed in textile dyeing and printing.

So that the Senator is quite right in considering it as an important commodity in laundering. That is the greatest use for the article.

Mr. SMOOT. Oh, no, Mr. President; it is not the greatest use, although it is one of the greatest uses. Its greatest use is in connection with the textile industry.

Mr. JONES of New Mexico. I have just read this language:

> Oxalic acid has a great variety of uses, the largest probably in commercial laundries.

I read that from the Summary of Tariff Information.

Mr. SMOOT. That is what the Tariff Commission may say.

Mr. JONES of New Mexico. Of course, if the Senator from Utah has information better than that of the Tariff Commission, I can not help that.

Mr. SMOOT. There is not a woolen mill or manufacturer of any kind of textiles that does not use it, and they use it by the cask or by the carload. I have bought it many a time by the carload and I know what it is used for.

Mr. MYERS. Mr. President, I was mistaken in supposing it to be an ingredient in the manufacture of soap, but it appears that it is used by laundries in the process of laundering clothes and other fabrics to remove spots and stains. In that respect it answers the same purposes as soap and may be used for that purpose more effectively than soap. I believe that it ought to be on the free list instead of having a duty imposed on it.

Mr. SMOOT. May I say to the Senator that it would be very much better for the American people if oxalic acid was not used by laundries, because of the very fact that it has a deleterious effect upon the clothing. The reason it is used is because it affords the easiest means to remove rust stains and grease spots; but many times when clothing comes from a laundry and the owner wonders what is the matter with it, the trouble arises in large part from the use by the laundry of oxalic acid.

Mr. MYERS. If that is the result of using too much, then I think they ought to use just enough and not use too much. I presume laundries may employ improper methods as well as may other concerns. I have had some communications from my State about the tariff duty on this commodity protesting against any tariff duty on the commodity, and I have been impressed with the merits of the protests. I believe that the commodity should be on the free list instead of having a duty imposed on it.

As I understand, the Senator from Utah [Mr. KING] has offered an amendment to reduce the tariff duty to 1½ cents per pound instead of 4 cents per pound. I will inquire of the Senator in charge of the bill or the Chair if that is correct?

Mr. SMOOT. I think the motion of the junior Senator from Utah was that the rate should be reduced to 1½ cents per pound.

Mr. MYERS. Very well. I move as a substitute for the amendment, if I may, that, after the words "oxalic acid," the words "4 cents per pound," in line 2, on page 3, be stricken from the bill.

The PRESIDING OFFICER (Mr. ODDIE in the chair). That can not be done, as it is an amendment in the third degree.

Mr. MYERS. I am in favor of putting oxalic acid on the free list. Is my motion not in order, Mr. President?

The PRESIDING OFFICER. The motion is not in order because it is an amendment in the third degree.

Mr. MYERS. I was under the impression that a substitute could be offered both for the original provision and for an amendment.

Mr. KING. May I say to the Senator that heretofore, with respect to two items, the Chair has ruled that we can only offer a motion to place an article on the free list when we come to the free-list schedule. So I suggest to the Senator that when we reach that schedule his motion will be in order.

Mr. MYERS. My motion, then, is ruled out of order; and I will not say more on the subject at this time, but I will vote for the amendment offered by the Senator from Utah [Mr. KING].

Mr. SMOOT. Mr. President, just a word.

I want to say to the Senator from Montana that oxalic acid is one of the items of manufacture which was undertaken years ago to establish an industry in this country. Along in 1908 oxalic acid was being sold by the German importer for about 8½ or 9 cents a pound by the cask or carload, with a provision that he would sell whatever oxalic acid the industry might wish, providing they would buy other chemicals from him. We were not making oxalic acid in the United States, but it was conceived that perhaps at the price of 8½ or 9 cents a pound oxalic acid could be made in the United States, and one firm started the manufacture of oxalic acid from sawdust in Pennsylvania. That was where the first manufacture was started. Just as soon as the plant got into operation the German importer began to cut the price, and I know that it fell to about 5 cents a pound delivered at the mill, until the American plant was closed up, and then immediately the price began to rise.

Mr. MYERS. I will ask the Senator when that was?

Mr. SMOOT. That was in 1907 or 1908; I forget the exact date. It was before the passage of the Payne-Aldrich bill, because the reason why the duty of 2 cents a pound was put in the Payne-Aldrich bill was the very fact that this little industry had been started here for manufacturing oxalic acid in the United States, and it had been shut up entirely by the process I have just related.

When the duty of 2 cents a pound was put on oxalic acid in 1909 the owners of the little plant began to operate it again; but the German cartel, that controlled this industry for almost the whole world, made it impossible for them to operate, and just as soon as they closed up the price mounted up again sky-high.

I am not going to take the time to tell the Senator how these cartels work throughout the world. They are working to-day; but let me make the prediction that if oxalic acid is not made in the United States the American purchasers will pay a greater price than they will pay with the duty that we place upon it allowing the industry to exist here.

Mr. MYERS. Does the Senator say that oxalic acid can not be made in the United States at all without a tariff duty on it?

Mr. SMOOT. I know that it can not. I am just as sure of it as that I live. That was demonstrated under the 2-cent rate of the Payne-Aldrich law. Of course, there is a new process now, but that new process is used in Germany. They do not make oxalic acid from sawdust any more. There is a new process of making it, and that was first undertaken in Germany, but it is gradually being adopted in this country. If you want to put yourselves absolutely and completely in the power of the manufacturer of this article in Germany vote to put it on the free list, and the American purchasers will pay more than they will with this rate of duty upon it, because past history has demonstrated it.

Mr. MYERS. Mr. President, I am a believer in a tariff for revenue only. I realize that we must raise part of the revenues of our Government from the tariff. It is not practicable to dispense with that method of raising revenue altogether; but I am not much of a believer in the theory, so extensively preached, of putting a tariff duty on an article to enable people to manufacture it in this country when they claim that otherwise they can not manufacture it—putting it on as a defense against a hold-up process on the same article imported from foreign

countries. It may work to advantage now and then, once in a great while, but I think the theory and practice is subject to great abuse. Advantage has been taken of it in a great many instances in which the claim is not well founded, I think, and I am opposed to the practice altogether.

Mr. SMOOT. May I read what A. Mitchell Palmer, the Alien Property Custodian, said about this very article?

Mr. MYERS. I shall be glad to have the Senator do so.

Mr. SMOOT. I did not know the exact date, but I see that he gives the date, and I think his statement will carry out what I stated:

As to what we deem unfair practices of competitors, we are incorporating herewith an extract from the report of A. Mitchell Palmer, as Alien Property Custodian, which demonstrates clearly the methods pursued by Germany in its competition with the manufacturers of oxalic acid in the United States by the dumping of their surplus goods in this country and the sale of same at less than cost of manufacture:

"In 1901, when there was no American manufacture, it was sold by the Germans at 6 cents. In 1903, when the works of the American Alkali & Acid Co. was started, the price was immediately dropped to 4.7 cents, at about which figure it remained until 1907, when the American factory was shut down for a number of months. During the shutdown the price was instantly raised to 9 cents. When the factory reopened the price was again dropped until 1908, when the company failed."

I passed through that experience personally. I know how they held me up at the time; and not only did they hold me up for the price of oxalic acid, but they said, "You can not buy a pound of oxalic acid unless you buy our alizarin colors at the same time." That is the experience I had with oxalic acid, and that is the experience the American purchaser will have if you put it on the free list. The only thing to do is to decide what you want.

Mr. WALSH of Massachusetts. Mr. President, does the Senator mind informing us what he used oxalic acid for?

Mr. SMOOT. For a mordant in dyeing wools and in dyeing cloths in woolen mills.

Mr. WALSH of Massachusetts. In very insignificant quantities?

Mr. SMOOT. Oh, I used to buy a carload at a time.

Mr. WALSH of Massachusetts. And how long would a carload last?

Mr. SMOOT. A carload would last me about six months.

Mr. JONES of New Mexico. Mr. President, will the Senator yield?

Mr. MYERS. Yes; I yield.

Mr. JONES of New Mexico. I just want to call the attention of the Senator to the fact that the latest import price for oxalic acid is 15 cents a pound, three times the price before the war; and no matter what may have occurred some years ago, back in 1901 or 1907, that thing is not occurring now under the present duty on oxalic acid.

Mr. WALSH of Massachusetts. That is twice what the price was when the Senator from Utah was held up.

Mr. JONES of New Mexico. Three times the price. I should like to read the figures for the different years.

Oxalic acid: 1908, 6 cents a pound; 1910, 6 cents; 1912, 5 cents; 1914, 5 cents; 1916, 32 cents; 1918, 40 cents; 1920, 34 cents; 1921, the first nine months, 15 cents.

So it appears that with our laws as they are now the price in this country is three times what it was before the war, and the condition which the Senator from Utah pictured to us a moment ago has no relation whatever to existing conditions.

Mr. SMOOT. Mr. President, of course I want the Senator from Montana to know that the prices the Senator from New Mexico read were the invoice prices in the foreign country, and the price he is quoting now is the price at which the product is sold in this country.

Mr. JONES of New Mexico. No; Mr. President. What I am reading from now is the foreign price on which duties are now levied, and if the Senator wants to get some information from the Reynolds report he will find this—I believe I will withdraw what I said. The 15 cents a pound is the selling price of the foreign article in this market. I did not know about that.

Mr. SMOOT. That is what I thought the Senator had better say, and that is what I said.

Mr. JONES of New Mexico. I understood that these tables which I have stated the other price. The selling price of oxalic acid in this market in 1921 was 15 cents a pound; but the pre-war price, the foreign price on which the duty was levied, was one-third of the present selling price in the United States.

Mr. SMOOT. That is true, and that is not the only item of the kind here. The cost of everything went sky-high. There was not anything in the chemical schedule that did not advance. This does not differ from the other items of the bill. Just exactly what I have stated here will take place if we have free oxalic acid. There is not any more doubt about it than that we live. That is what is going to take place if it is done, and the only question is whether we want to undergo the experience that we have had in the past.

If I were going to criticize this schedule, I would not stop at these little things that have a duty of about 10 or 11 per cent—I mean, if I were opposed to it. I would take the items here where the rates are higher than are actually necessary, high rates. Of course, if it is just a question of taking up time, take every item, just as you are doing; but do you think the American people are going to object where an industry is given a duty of 11 or 12 per cent? I do not think so.

Mr. MYERS. Mr. President, I have already had objections from my State. I will say that I know that the Senator from Utah is a remarkably well-informed man about all matters pertaining to the tariff, on facts and figures; but I think the theory which he announces on this occasion is full of danger and in the past has been frightfully abused, and I am very shy of it.

Mr. WALSH of Massachusetts. Mr. President, I think it ought to be said that there is considerable reason for giving attention to these chemical items, though the rates appear to be small and the volume of business not large measured in dollars. An examination into these schedules tends to show the haphazard and unscientific method of fixing tariff rates in this bill. Let us examine the last two items.

In the case of phosphoric acid a very substantial tariff rate upon that product has been levied for the first time, as under the Payne-Aldrich and Underwood bills both were on the free list.

Mr. SMOOT. We decreased the House rate.

Mr. WALSH of Massachusetts. Phosphoric acid is produced in this country in sufficient quantity to take care of almost our entire consumption. It was pointed out a few minutes ago that the imports amounted to only about 3 per cent of the domestic production. Oxalic acid, which sells for about the same price as phosphoric acid, is produced in very small quantities in this country. We must go into the foreign market to supply our consumption. Yet the same increase in rates has been made in this bill for both these chemicals over those fixed in the Payne-Aldrich law. Here are two acids selling for about the same price, and the rates are increased the same amount over those of the Payne-Aldrich law, though as to one there is no competition from outside, there being no imports, practically speaking, and as to the other there is very slight production in this country and we have to depend upon foreign importations almost entirely. Upon what theory can the Committee on Finance justify an increase over the rates of the Payne-Aldrich law on a product which is not imported at all, and the same amount of increase on a product that it is necessary to import in large quantities to take care of our consumption?

Mr. SMOOT. I want to say to the Senator that the Payne-Aldrich rate of 2 cents did not save the industry in the United States, but now there are ample facilities for manufacturing all the oxalic acid that would be used in the United States. In 1919 nearly 60 per cent of the oxalic acid consumed in this country was imported.

Mr. WALSH of Massachusetts. Mr. President, in presenting the case in favor of the rate in this bill the Senator has touched upon a very important question. May I ask him if he believes that any product which it is possible to produce in this country should receive protection in order to make the manufacture of that product a prosperous industry, regardless of the necessity of importations, because of the unlikelihood of the domestic production being sufficient for our consumption?

Mr. SMOOT. Do I believe that we ought to have an embargo, does the Senator mean?

Mr. WALSH of Massachusetts. No; does the Senator contend that if we can establish an industry to produce a product in this country which will compete with the same product from foreign countries, we ought to give that product, even if we can produce only 5 per cent of the domestic consumption, a protective tariff rate?

Mr. SMOOT. No; if that is all we can produce in this country; but, as to oxalic acid, I want to say to the Senator that we have one company in the United States which testified they could make 5,000,000 pounds of it.

Mr. WALSH of Massachusetts. Does not the record show that there has been less than 25 per cent of the consumption of oxalic acid produced in this country?

Mr. SMOOT. In some years; yes.

Mr. WALSH of Massachusetts. And a good deal less than that in other years.

Mr. SMOOT. In 1919 the output of oxalic acid was 2,103,500 pounds, valued at $545,600, and the importations in the same year, in quantities, were 651,609 pounds. I will say to the Senator that if we could not make it in this country, or if we

were at a disadvantage as to the raw materials which may enter into it and are required for its manufacture, and the production was only 5 to 10 per cent, I do not think it would be justifiable to put an exceedingly high rate on it for the purpose of protecting that 5 or 6 or 10 per cent.

Mr. WALSH of Massachusetts. In the matter of providing a protective duty I am willing to consider the difference in the cost of production abroad and at home, but I am not willing to impose a protective duty when the facts produced merely show a difference in cost of production at home and abroad. I want some evidence that even with a fair protective duty the product can be sold to the American people at a fair price. If the articles will cost an unreasonable sum of money to the consuming public with a protective duty, we should put such articles on the free list. What do we have a free list for? A free list exists in tariff bills simply because Congress believes there are some commodities we can not produce in America at any price that is reasonable to demand of the American consumer.

Mr. SMOOT. This is not one of them.

Mr. WALSH of Massachusetts. Phosphoric acid was considered one of them under two laws, under the Payne-Aldrich law and under the Underwood law.

Mr. SMOOT. We have passed that item.

Mr. WALSH of Massachusetts. But when you framed this bill you picked two articles, one produced wholly in this country, the other produced here only in part, and you increase the rates on both of them over the Payne-Aldrich rate to the same extent. I can not understand how you arrive at that conclusion. What method did you use? What scientific principle did you use or apply?

Mr. SMOOT. As I remember, phosphoric acid was on the free list under the Payne-Aldrich law, and is also on the free list under existing law, but the committee has recommended a rate of 2 cents on it. That is not quite the same as advancing from 2 cents to 4 cents. That is quite different. The Senator ought to take into consideration the fact that where Germany sets out to control an industry and furnish the world with the product under her form of government and under her practices in the past she has permitted what are called cartels, and every ounce of the product is controlled by those organizations. They can raise the price to this country to a height sufficient to enable them to cut the prices to another country, and that is what they do. If the Senator's theory were correct, Germany would control the products of the world, because she would never allow any country to build up an industry, and the only way an industry could be built up would be for the countries to build up industries as against her.

Mr. WALSH of Massachusetts. It does not control the production of phosphoric acid that we just voted upon, because we do not import this product. Almost our entire consumption is produced in this country, and yet you have increased the tariff rate equal to that placed on oxalic acid, which is only produced here in small amounts.

Mr. SMOOT. The Senator does not quite catch what I mean. If we had no protection on oxalic acid in this country, or if we had protection on it to the extent of 2 cents, Germany would do just as she did before. She would kill the industry if she had to sell the product at a loss, as she did. When it was killed she raised the price from 4½ cents to 9 cents immediately. In some cases we have to look at just such a situation as that. There are very few articles in that class perhaps, but there are some, and I myself know that the report of A. Mitchell Palmer as to oxalic acid is absolutely true.

Mr. WALSH of Massachusetts. Has the American producer ever made it at less than 9 cents?

Mr. SMOOT. They tried to meet the competition until they went broke. They had to sell at less than cost, and failed.

Mr. WALSH of Massachusetts. So even the price, as increased by Germany, was less than the price at which the domestic producer was able to make and sell it?

Mr. SMOOT. There was no question about the American producer being able to make it at 9 cents, but when the Germans reduced it to 4½ cents, the domestic producers could not make it. They tried to compete until they failed, and that is what would happen to any other manufacturer who manufactured it if we did not have the duty. Under our form of government there is only one way to protect an industry in a situation like that, and that is by a tariff rate. Our form of government will not allow these cartels to be formed, and all of the profits pooled at the end of a year, and each manufacturer told by the cartel, "You shall furnish this to go to South America; you shall furnish this to go to North America; you shall furnish this quantity of this article to go to England." Then all of the gains are gathered into one pot at the end of the year and distributed according to the amount of production of that article in Germany. We can not do that in this country, and I know that the Senator from Massachusetts would not think of voting for a law granting any such power as that to any set of men living in America.

I only mentioned this because of the fact that oxalic acid was being discussed, and I had my fingers burned, and know what it means. This is the very item about which I had some experience, and was perhaps one of the very first things that caused me to begin to study what these cartels in Germany were, and what form of business honesty there was in that country which would allow such a thing to take place.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Utah [Mr. KING] to the committee amendment.

Mr. WALSH of Massachusetts. I ask for the yeas and nays.

The yeas and nays were ordered, and the reading clerk proceeded to call the roll.

Mr. HARRISON (when his name was called). I transfer my general pair with the Senator from West Virginia [Mr. ELKINS] to the junior Senator from Rhode Island [Mr. GERRY] and vote "yea."

Mr. McKELLAR (when his name was called). I have a general pair with the senior Senator from Indiana [Mr. NEW], which I transfer to the senior Senator from Nevada [Mr. PITTMAN] and vote "yea."

Mr. McKINLEY (when his name was called). Making the same announcement as before, I vote "nay."

Mr. STANLEY (when his name was called). I transfer my pair with the junior Senator from Kentucky [Mr. ERNST] to the senior Senator from Texas [Mr. CULBERSON] and vote "yea."

Mr. WATSON of Indiana (when his name was called). I transfer my pair with the senior Senator from Mississippi [Mr. WILLIAMS] to the senior Senator from Pennsylvania [Mr. CROW] and vote "nay."

The roll call was concluded.

Mr. BALL. I have a general pair with the senior Senator from Florida [Mr. FLETCHER]. I transfer that pair to the junior Senator from Delaware [Mr. DU PONT] and vote "nay."

Mr. DILLINGHAM (after having voted in the negative). I transfer my pair with the Senator from Virginia [Mr. GLASS] to the Senator from Connecticut [Mr. BRANDEGEE] and allow my vote to stand.

Mr. DIAL (after having voted in the affirmative). I have a pair with the Senator from Colorado [Mr. PHIPPS]. I transfer that pair to the Senator from Ohio [Mr. POMERENE] and allow my vote to stand.

Mr. CURTIS. I wish to announce the following pairs:

The Senator from Arizona [Mr. CAMERON] with the Senator from Georgia [Mr. WATSON];

The Senator from Rhode Island [Mr. COLT] with the Senator from Florida [Mr. TRAMMELL];

The Senator from New Jersey [Mr. EDGE] with the Senator from Oklahoma [Mr. OWEN];

The Senator from New Jersey [Mr. FRELINGHUYSEN] with the Senator from Montana [Mr. WALSH]; and

The Senator from South Dakota [Mr. STERLING] with the Senator from South Carolina [Mr. SMITH].

The result was announced—yeas 17, nays 34, as follows:

YEAS—17.

Ashurst	Jones, N. Mex.	Robinson	Underwood
Dial	King	Sheppard	Walsh, Mass.
Harris	McKellar	Simmons	
Harrison	Myers	Stanley	
Heflin	Overman	Swanson	

NAYS—34.

Ball	Harreld	McKinley	Sutherland
Borah	Johnson	McLean	Townsend
Bursum	Jones, Wash.	McNary	Wadsworth
Calder	Kellogg	Newberry	Warren
Capper	Keyes	Oddie	Watson, Ind.
Curtis	Ladd	Page	Weller
Dillingham	Lodge	Shortridge	Willis
Gooding	McCormick	Smoot	
Hale	McCumber	Spencer	

NOT VOTING—45.

Brandegee	Fernald	New	Reed
Brousse	Fletcher	Nicholson	Shields
Cameron	France	Norbeck	Smith
Caraway	Frelinghuysen	Norris	Stanfield
Colt	Gerry	Owen	Sterling
Crow	Glass	Pepper	Trammell
Culberson	Hitchcock	Phipps	Walsh, Mont.
Cummins	Kendrick	Pittman	Watson, Ga.
du Pont	La Follette	Poindexter	Williams
Edge	Lenroot	Pomerene	
Elkins	Moses	Ransdell	
Ernst	Nelson	Rawson	

So Mr. KING's amendment to the committee amendment was rejected.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment.

The amendment was agreed to.

The PRESIDING OFFICER. The next amendment of the Committee on Finance will be stated.

The READING CLERK. On page 3, line 3, after the word "acid" and the comma, insert "12 cents a pound," so it will read:

Pyrogallic acid, 12 cents per pound.

Mr. KING. Mr. President, I move to strike out the numerals "12" in line 3, after the word "acid," and insert in lieu thereof the numeral "6," so that it will read:

Pyrogallic acid, 6 cents per pound.

I wish to occupy but a brief time on this amendment. The House bill provides 25 per cent ad valorem and the Senate committee bill 12 cents a pound specific rate. The Payne-Aldrich law provided 25 per cent ad valorem and the Underwood-Simmons law 12 cents per pound specific. The reasons which might have justified the rate in the Underwood-Simmons law or in any other preceding measure do not now exist. It was shown during the discussion of gallic acid that pyrogallic was germane to that acid. It is produced by the heating of gallic acid. The survey states that it is the oldest photographic developer and is probably used more than any other; that it is employed in medicine and for the dyeing of fur and hair, and in the manufacture of dyes; and that it is an important reagent in the chemical laboratory as an absorbent for oxygen gas in gas analyses.

It will be observed that this product, as well as many others in the chemical schedule, constitutes a basis for other industries and is employed in manufacturing plants and in industrial developments. The reason why this chemical schedule is so important arises from the fact that practically all of the commodities found therein enter into the composition of commodities developed in the various manufacturing industries of the United States. Of course, if we raise the prices of these primary products, they must be carried to intermediates or finished products, and pyramided as they are carried on until finally the ultimate consumer must bear the entire burden.

When a tariff is added to one of the fundamentals employed in the manufacturing business of the United States, as stated, that is added to the cost of the first product of which it forms a component part. That product, finding refuge in some other schedule in the bill, looks for a tariff and profits, and the first tariff which was attached to the fundamental or primary product is carried into that manufactured product, and that product perhaps becomes the basis of some other enterprise or some other commodity in a more highly finished state, and that tariff is carried into that product and in turn passes on to the ultimate consumer. In this way these small items in the aggregate constitute an enormous burden placed upon the people.

Complaints may be made that we are attacking small items. The distinguished Senator from North Dakota [Mr. MCCUMBER] complained because we criticized the tariff upon a number of medicines. Because they are consumed in small quantities by individuals he felt that the people should bear with equanimity the burdens which were thus imposed upon them. It is the small additions and accretions incident to the sustenance of the families of the people, Mr. President, which in the end place upon them such oppressive burdens.

We are pleading for reasonable prices for primary and basic products, because in so doing we are ministering to the welfare of the great mass of the people and are stimulating home industries and larger production. As we stimulate production we increase the demands for labor and augment the prices which are paid to laboring men. It seems to me as plain as the light which shines upon us through the beautiful skylights above that as we burden the primary product we are burdening the development of the industrial life of the people.

When we throw bowlders into the stream they constitute impediments to the moving waters. If they are huge bowlders they may, if we cast a sufficient number into the stream, divert the waters which pass beyond the banks and carry danger and destruction to life and property. We want a free current—and by that I am not speaking of free trade. We want, so far as possible, to have an unobstructed current for the development of the industries of this great land. We can dominate the world in manufactured products and can sweep the nations with a great flood of commodities produced in our own land, and send by sail and by steam and railroads our commodities to bless the world and to benefit the people of the United States.

Now, Mr. President, here is a product not in itself of great importance and still it is one of the essentials in the industries of the land. Yet we are to put a tariff upon it. During the first nine months of 1921 we imported 22 pounds. I have no doubt under the construction of the embargo act the importation has been somewhat interfered with. Let me repeat what I said once before, that the embargo act was a fraud; it was a deception upon the Senate as well as upon the American people. Under the construction placed upon it there are thousands of commodities which are embargoed. Seeking to help the dye monopoly, we have aided the chemical industry by giving them a monopoly upon hundreds and hundreds of articles which are denominated synthetic chemical products.

In 1920 we imported 888 pounds of pyrogallic acid. The foreign unit value of this product for last year was $2.05; that is, this product is being sold abroad at $2.05 wholesale. The price in the United States on the 24th of April, as I get the figures from the publications relating to drugs and medicines, was $1.20 to $1.35 per pound—that is, for the crystals—and the resublimate was $1.60 to $1.75 per pound. We are producing it and selling it in the domestic markets at less than it is being produced and sold for in the foreign market. As stated, the foreign price during the first nine months of 1921 was $2.05 and in the United States from $1.20 to $1.75, dependent upon the grade. What reason is there for a tariff on this commodity?

There is only one reason. It is to increase the price for the domestic producer. It is manufactured by the Mallinckdrodt Chemical Works, to which I have referred heretofore, by Powers, Weightman & Rosengarten, and by the Eastman Kodak Co., and by Zinsser & Co. Let me say that the latter corporation sent a representative, as I recall, who, if he did not testify, filed a brief in which he asked that the tariff be 40 cents per pound. The brief of Zinsser & Co. is found on page 66 of the House hearings. Forty cents per pound was asked as a tariff duty.

Mr. President, I think the rate which I have suggested is more than ample for protection, if protection is needed, and if revenue is desired that rate will afford some little revenue.

Mr. MCCUMBER. Mr. President, this acid bore a rate of 25 per cent under the Payne-Aldrich law; it bore a rate of 12 cents per pound under the Underwood-Simmons law. We have given it the same rate as the present law, namely, 12 cents per pound. The present price quotations are $1.20 and $1.75 per pound, American valuation. On the $1.20 per pound price the rate would be equal, of course, to 10 per cent ad valorem. The prewar import price was about 90 cents per pound, and on the basis of 90 cents per pound the rate of 12 cents per pound would be equivalent to about 13 per cent. That I regard as an extremely light ad valorem duty; and I think that the rates in the Underwood-Simmons law were practically right in this instance.

The PRESIDING OFFICER. The question is on the amendment of the Senator from Utah [Mr. KING] to the committee amendment.

The amendment to the amendment was rejected.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment.

The committee amendment was agreed to.

The next amendment of the Committee of Finance was, on page 3, line 4, after the words "stearic acid," to insert "1½ cents per pound," so as to read:

Stearic acid, 1½ cents per pound.

The PRESIDING OFFICER. The question is on the amendment reported by the Committee on Finance.

Mr. JONES of New Mexico. Mr. President, I have been looking over some of the information regarding this item and I find that it is very meager; yet stearic acid is a very important commodity and is consumed to a very large amount. I merely wish to give to the Senate all the information that there is on this subject which can be found in any of the documents which have been furnished from the Tariff Commission or in the hearings. There was not a word of testimony about this item before either the Committee on Ways and Means in the other House or in the Finance Committee of the Senate.

The only statements we have in regard to stearic acid is comprised in a little over one-half page in the "Summary of Tariff Information." The Tariff Commission has made no survey so far as this item is concerned that I know anything about; at any rate, there is no reference to it.

All that we find is that there is about 1 inch giving a description of stearic acid as being "a hard, white, waxlike substance"; that it "is a fatty acid obtained from the same sources as oleic acid." Its color is given, and also the form in which it is found. It includes two grades, medicinal and technical. Then this statement tells the purposes for which it is used. The chief use of it is "for making candles, with or without the addition of paraffin." The summary speaks of the production in the United States, and I will read what is here stated:

Production: Stearic acid is obtained simultaneously with oleic acid or "red oil" from various oils and fats. The domestic production has not been so constant as that of oleic acid, but has ranged from

3,773,000 pounds in 1912 to 18,571,000 pounds in 1918. The output increased to 24,372,395 pounds in 1920, but during the first nine months of 1921 amounted to only about 12,000,000 pounds.

Then the summary tells us about the imports of stearic acid and states:

Imports of stearic acid increased from 36,610 pounds, valued at $3,451, in 1911, to 119,519 pounds, valued at $12,160, in 1913. Only 538 pounds were imported in 1917.

Then it gives us the statistics for the later years. In 1919 the importations were 3,737 pounds; in 1920 they were 2,350 pounds; in 1921 they were 27,678 pounds.

The unit value of the imported product is given for the year 1919 as 21 cents, for 1920 as 20 cents, and for 1921 as 89 cents. I can not understand how the figures "89 cents" are arrived at; but that is the information furnished here. It must have been a peculiar class or kind of commodity.

Mr. McCUMBER. Mr. President, let me call the Senator's attention to the fact that that figure is an error in printing. It should be 8.9 cents instead of 89 cents.

Mr. JONES of New Mexico. I thought there must have been some error, because I could not understand how 89 cents could be correct.

That is the only information we have on this subject. Here we have a production in the highest year, 1920, of over 24,000,000 pounds, and in that year we imported only 2,350 pounds of a value of $466. It is true that in the first nine months of 1921 the quantity imported was 27,678 pounds, but the American production for the same nine months in 1921 was 12,000,000 pounds; so the importations are absolutely negligible.

The duty imposed upon this commodity is 15 per cent under the present law. The Committee on Finance proposes to make it 1½ cents per pound. I think that the action of the committee is merely an attempt to convert the ad valorem duty into a specific duty; but do the figures given justify the retention of such an article on the dutiable list? I think that the proposed specific rate which we find reported from the committee is just about the same as the present ad valorem rate. The price of the commodity, I think, is around 10 cents per pound; but in such cases it seems to me that the only function which a duty upon the article can perform is to enable the American producer to raise his price, or, in other words, it seems to me that, in effect, it is a gift to the American producer.

There is not a line of testimony as to the cost of production of this article. During all these years there have been no importations of consequence. The American manufacturer has controlled the situation, and little of the acid has been imported, so little, in fact, that it could not affect the market.

In addition to that, I may say that in 1921 we produced probably 17,000,000 pounds, while the domestic consumption was only 5,655,000 pounds, clearly indicating that we must be great exporters of this commodity.

What justification is there on the 12,000,000 pounds produced in the first nine months of 1921 to impose a duty of 1½ cents a pound? At the rate of 12,000,000 pounds for nine months we would produce 16,000,000, in round numbers, for the whole year. The actual production for the whole year was 17,000,000 pounds; but I have based my figures on a production of 16,000,000 for the year. On that production, 1½ cents a pound would amount to $240,000. There are only a few concerns in this country producing this commodity, and we simply make them a present, it seems to me, of $240,000 a year. I can not understand why we should make those concerns a present of a quarter of a million dollars a year. If it does not work out in that way I can not understand why it does not. To make a present of a quarter of a million dollars a year to one or two concerns, the few which manufacture this product, is a very nice little inducement to create a friendly feeling around election time.

I do not know that these people would contribute anything to a campaign fund because of this present, but I think they would be justified in doing it; but that is not for the good of the people of the United States who consume this product. It goes into the manufacture of candles, a commodity used in the humblest homes in the land. It is bound to enter into that price. It is true that the members of the Finance Committee may say: "What difference does it make to add a cent to the price of a candle, or a cent to the price of a dozen candles?" but I want to say that the people who use candles know the value of the penny, and the good women of this country who spend the incomes of these humble homes know the value of these little pennies, these dimes which are taken from them through such processes as this.

Mr. President, I can not understand upon what principle such a duty is levied. I do not believe that at this time it is a sufficient answer to say that under the existing law there is a duty of about this amount upon this item. Conditions in the United States have changed. People are measuring the cost of these things. The world's trade has changed; and it seems to me that since this tariff bill has been in the committee of the House and in the Finance Committee of the Senate during all these months some attempt should have been made to work out these duties in the economic interest of the people of this country. These are times of oppression; these are times when prices are high; these are times when there are millions out of employment, and is not this the time to get down to a reasonable basis?

I mention this one item, making these remarks in regard to it; but when we realize that hundreds and even thousands of articles covered by this great tariff bill are affected in like manner, the situation becomes a serious one, and one which ought to be given consideration by the Senators in a conscientious way and in a sympathetic way.

This bill carries these numerous items. As I say, many of them are surrounded with just such circumstances as these I have been enumerating and are dealt with in like manner. If there is any reason why this duty should remain, I think it is due to the Senators and due to the people of the country that they be told what it is.

Mr. McCUMBER. Mr. President, the Payne-Aldrich law carried a duty of 25 per cent ad valorem on this product. The Underwood law carried a duty of 15 per cent ad valorem. This bill carries a duty of 1½ cents per pound. The present quotation in the United States is from 9 to 10 cents per pound. At 10 cents per pound, the duty of 1½ cents per pound is equivalent to 15 per cent ad valorem. If I turn to the pre-war import value, I find that that was 10 cents per pound; so we have gotten down in the United States to exactly the pre-war foreign value, and the rate that we have fixed is exactly in ad valorem the same as the present rate of the Underwood-Simmons law. If by our bill, which fixes an equivalent of 15 per cent, we are making a gift of $240,000 a year to these people, then since 1913 we have been paying $240,000 a year to them.

I do not believe that that rate was fixed in the Underwood tariff bill for electioneering purposes. I do not believe any such thought has entered into the mind of anyone in the consideration of this bill. It will bring us a little income, perhaps very little, but the amount is small; and for the same reason that a 15 per cent ad valorem rate was placed on this article under the Underwood bill, we are placing its equivalent in a specific duty under the present bill.

Mr. JONES of New Mexico. Mr. President, may I ask the Senator if he expects that the levy of this duty will increase the price of the domestic producers to the consumers of this country?

Mr. McCUMBER. No; I do not think it will, Mr. President.

Mr. JONES of New Mexico. Then may I ask what is the purpose of levying the duty? I was disturbed when the Senator was speaking, and it may be that the Senator has answered the question. If so, I am sorry to have to ask him to answer it again.

Mr. McCUMBER. I think it can be produced abroad and will be produced abroad for less than 10 cents a pound, and I think they can pay the little 15 per cent ad valorem duty and still compete in the American market.

Mr. JONES of New Mexico. Then the Senator does not think, under those circumstances, that that would have a tendency to increase the price in this country?

Mr. McCUMBER. No, Mr. President; I have answered that question.

Mr. JONES of New Mexico. On other commodities I have understood that the duty was levied for the purpose of enabling the American producer to increase his price; and I do not see why the duty here would not operate in the same way.

Mr. McCUMBER. With the same rate of duty, a 15 per cent ad valorem duty, the price has been going down, down, down, until it has reached the pre-war price already; so I do not think it is going to raise it.

Mr. JONES of New Mexico. Mr. President, I shall not discuss this matter further. I will bring up the same proposition in connection with a more important item.

The VICE PRESIDENT. The question is on agreeing to the amendment of the committee.

Mr. JONES of New Mexico. I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The roll was called, and the following Senators answered to their names:

Ashurst	Calder	Curtis	Fletcher
Ball	Capper	Dial	France
Bursum	Caraway	Dillingham	Gooding

Hale	Keyes	Oddie	Sutherland
Harreld	Ladd	Overman	Swanson
Harris	Lodge	Page	Townsend
Harrison	McCormick	Poindexter	Underwood
Heflin	McCumber	Robinson	Wadsworth
Johnson	McKellar	Sheppard	Walsh, Mass.
Jones, N. Mex.	McKinley	Shortridge	Warren
Jones, Wash.	McLean	Simmons	Watson, Ind.
Kellogg	McNary	Smoot	Weller
Kendrick	Newberry	Spencer	Willis

The VICE PRESIDENT. Fifty-two Senators have answered to their names. A quorum is present. The question is on agreeing to the amendment of the committee.

The amendment was agreed to.

The next amendment of the committee was, on page 3, line 14, to strike out the words "isopropyl, and," and insert in lieu thereof the words "and propyl, 3 cents per pound."

Mr. McCUMBER. I ask unanimous consent that we may pass over the fourth paragraph for the present.

The VICE PRESIDENT. Without objection, it is so ordered.

Mr. KING. Does the Senator desire to take that up to-morrow or not for several days?

Mr. McCUMBER. It will not be taken up before to-morrow, anyway. I expect to have a meeting of the majority members of the committee to go over it again, and I do not know whether I shall be ready to take it up to-morrow or not.

Mr. KING. If I shall not be ready to-morrow, will there be any objection to passing it over for another day?

Mr. McCUMBER. There will not be.

The next amendment was, on page 3, line 19, to strike out "All chemical elements and all chemical and medicinal compounds, preparations, mixtures, and salts, and combinations thereof," and to insert "All chemical elements, all chemical salts and compounds, all medicinal preparations, and all combinations and mixtures of any of the foregoing," so as to make the paragraph read:

PAR. 5. All chemical elements, all chemical salts and compounds, all medicinal preparations, and all combinations and mixtures of any of the foregoing, all the foregoing obtained naturally or artificially and not specially provided for, 25 per cent ad valorem.

Mr. KING. Mr. President, I appreciate the fact that perhaps this amendment, in view of the agreement to dispose of the committee amendments first, might not be subject to amendment, although the phraseology of the general provisions is changed. Nevertheless, the rate is the same in the Senate committee bill as in the bill as it passed the House, and I am inclined to think that perhaps technically under the rule I could not offer an amendment at this time. I give notice, however, that later on, when we return to the offering of amendments to the text, I shall offer an amendment to this provision.

Mr. LODGE. The Senator certainly has the right to offer an amendment to the amendment.

Mr. KING. Not to the rate.

Mr. LODGE. No; not to the rate.

Mr. KING. I do not know that I shall object to the basket clause. This provision contains a large number of articles.

Mr. LODGE. I thought the Senator was referring to the part in italics.

Mr. KING. No; I am referring to the ad valorem rates. This basket clause changes the rates of existing law from 15 per cent to 25 per cent ad valorem. I would like to ask the Senator from North Dakota, however, before we leave this provision, if I may have his attention, what the reason was for making this change. Let me ask two questions in one: How many items does the Senator figure are covered by this basket clause?

Mr. McCUMBER. Mr. President, I could not tell. I am not sufficiently well versed in chemistry to contemplate the thousands of admixtures, and changes of one chemical substance into another, which might possibly come under this clause.

Mr. KING. Under this basket clause there would be various compounds, hundreds of articles.

Mr. McCUMBER. There might be.

Mr. KING. The rate upon those hundreds or thousands or scores of articles, whatever the number may be, is changed from 15 per cent ad valorem to 25 per cent ad valorem?

Mr. McCUMBER. It is.

Mr. SMOOT. The only reason I could give to the Senator is that there are not nearly as many items falling in this basket clause as there were falling in the basket clause in the act of 1913, because we have taken so many out.

Mr. KING. So many have been transferred to other basket clauses.

Mr. SMOOT. No; others have had imposed on them specific rates and ad valorem rates.

Mr. KING. Let me say to the Senator, if I may crave his indulgence for a moment, that you have exhibited a disposition, in framing the bill, to take from the basket clauses large numbers of items and attach to them specific rates, thereby increasing the rates in many instances, though not in all.

Mr. SMOOT. I think, if the Senator will look it up, he will find that there are more decreases where the articles are taken from the basket clause than there are increases.

Mr. KING. I think the Senator is in error. I think the increases will be found to be greatly in excess of the decreases. But may I inquire of the Senator why the committee deemed it necessary to make an increase of 10 per cent ad valorem in perhaps hundreds of articles, many of which are medicines, or relate to medicines, or to things essential for the health and welfare of the people?

Mr. SMOOT. Take stearic acid, for instance. That is in the basket clause to-day. We take it out and put a duty of 1½ cents upon it, and that is lower than when it was in the basket clause. Take oleic acid. That falls to-day in the basket clause. I am quite sure the statement I made was correct, although I have not actually gone over the details. The items which have been taken from the basket clause and specifically provided for in this schedule are at lower rates than they would bear in the basket clause.

Mr. McCUMBER. The junior Senator from Utah asked me why the changes were made in the descriptions. They were made in conformity with the recommendation of the experts of the Tariff Commission. We have followed the exact language suggested by those experts in order properly to describe the particular articles which are intended to be brought under that schedule.

The VICE PRESIDENT. The question is on agreeing to the committee amendment.

The amendment was agreed to.

The next amendment was, on page 4, line 4, before the words "1 cent per pound," to insert "three-fourths of," and in line 12, before the word "compounds," to insert "salts and," so as to read:

PAR. 6. Aluminum hydroxide or refined bauxite, one-half of 1 cent per pound; potassium aluminum sulphate or potash alum and ammonium aluminum sulphate or ammonia alum, three-fourths of 1 cent per pound; aluminum sulphate, alum cake or aluminous cake, containing not more than 15 per cent of alumina and more iron than the equivalent of one-tenth of 1 per cent of ferric oxide, three-tenths of 1 cent per pound; containing more than 15 per cent of alumina or not more iron than the equivalent of one-tenth of 1 per cent of ferric oxide, three-eighths of 1 cent per pound; all other aluminum salts and compounds not specially provided for.

The amendment was agreed to.

The next amendment was, on page 4, line 13, to strike out "25" and insert in lieu thereof "35," so as to read:

All other aluminum salts and compounds not specially provided for, 35 per cent ad valorem.

Mr. KING. I would like to inquire of the Senator with respect to this item if refined bauxite is not the basis of a large number of the salts which are covered by this paragraph?

Mr. SMOOT. No; it is not.

Mr. KING. I think the Senator is in error.

Mr. SMOOT. Crude bauxite is the raw material, and that is not included in this paragraph.

Mr. KING. Mr. President, according to my recollection bauxite is not only used in the production of metallic aluminum—indeed, it is the basis of the Aluminum Trust of the United States—but there are developed out of some processes applied to bauxite medicinal salts of an aluminum character. My opinion is that this paragraph is of very great importance, and that if we adopt it in its present form it will operate to the advantage of the Aluminum Trust, as well as to the advantage of corporations more or less connected with it, although they may claim independent action.

May I just call attention to a few observations I have written down bearing upon this item? I will say to the Senator that I did not think it would be reached this evening, and I am not able to elaborate the discussion of the paragraph as it should be presented because of its importance.

Mr. SIMMONS. Mr. President——

The VICE PRESIDENT. Does the Senator from Utah yield to the Senator from North Carolina?

Mr. KING. I yield.

Mr. SIMMONS. I want to ask the senior Senator from Utah if this paragraph includes metallic aluminum?

Mr. SMOOT. No; it does not. If my colleague will give his attention just a moment, perhaps there may be no further objection when I call his attention to the fact that this is reported as an increase from 25 to 35 per cent. That throws out the basket clause in this connection, and it ought to be 25 per cent. We are going to ask that that amendment be disagreed to.

Mr. KING. And that we accept the House rate?

Mr. SMOOT. Twenty-five per cent on the foreign valuation instead of the American valuation. We want it to conform to

the other part of this schedule, and we ask that that be disagreed to, and that the House provision be adopted.

Mr. KING. Let me ask the Senator if it is the purpose of the committee to ask that the Senate committee amendment be disagreed to at this time?

Mr. SMOOT. Yes; because we do not want to pass it over.

Mr. McCUMBER. Rather than bring it up again, we want to have that action taken.

Mr. KING. May I say to the Senator that the rate of three-quarters of a cent a pound, and one or two others which are proposed, increasing the specific rates, I may desire to call up to-morrow, and, reserving the right to do so, I have no objection to taking a vote upon it now.

Mr. SMOOT. The Senator has no objection to a vote on the pending amendment?

Mr. KING. No; reserving that right, I have no objection to taking a vote upon the amendment as suggested.

The VICE PRESIDENT. The question is on agreeing to the amendment.

Mr. SIMMONS. Mr. President, I beg the Chair not to press us too hard about this matter. Let us get an understanding of what we are talking about. I want to ask the Senator from Utah another question.

The first duty that is imposed, three-quarters of a cent, is upon refined bauxite.

Mr. SMOOT. Yes; that is correct.

Mr. SIMMONS. Refined bauxite is made of a clay, is it not?

Mr. SMOOT. A great deal of the bauxite is produced in Kentucky and——

Mr. SIMMONS. And in Arkansas and Tennessee.

Mr. SMOOT. Principally Arkansas.

Mr. SIMMONS. I am not asking these questions in a controversial spirit, but I want to understand it. Are we not now producing practically all the bauxite we consume in this country? I know that at one time we did import a considerable quantity of it.

Mr. SMOOT. We are producing now about all we use in the United States.

Mr. SIMMONS. And there are no longer any importations of bauxite to speak of?

Mr. SMOOT. Not to speak of.

Mr. SIMMONS. Then why should there be a duty upon bauxite?

Mr. SMOOT. Mr. President, this is not the raw bauxite as it is taken from the earth. This is the refined product, and the House gave it a rate of a cent a pound; but the Finance Committee thought the industry could get along with three-quarters of a cent, and cut the rate to three-quarters of a cent.

Mr. SIMMONS. The Senator says this rate is not upon raw bauxite, but upon refined bauxite?

Mr. SMOOT. Refined bauxite.

Mr. SIMMONS. Is there any information available which would show that we can not produce and are not producing refined bauxite in this country as cheaply as they are producing it anywhere else in the world, and that we do now produce all the refined bauxite we consume in this country?

Mr. KING. Mr. President——

The VICE PRESIDENT. Does the Senator from North Carolina yield?

Mr. SIMMONS. I asked the senior Senator from Utah a question.

Mr. McCUMBER. If it is agreeable, I would like to suggest to the Senator that we accept the suggestion that we disagree to the Senate amendment raising the rate from 25 to 35 per cent, and then I will ask that this matter may go over until to-morrow. I think there is a palpable error in another item in the paragraph, and I would like to look into it further.

Mr. SMOOT. The Senator is not objecting to the rate of three-quarters of a cent on the refined bauxite?

Mr. KING. I am objecting to it.

Mr. SIMMONS. Yes; I objected to it.

Mr. SMOOT. I mean, the Senators are not objecting to its consideration?

Mr. McCUMBER. That has been adopted.

Mr. SIMMONS. If it was adopted, it was adopted without our understanding, and I did not know it was adopted.

Mr. McCUMBER. If it has been adopted through a mistake, I will ask that the vote by which it was adopted may be reconsidered at the proper time. But I would like to have the other amendments agreed to, and then let the matter go over, so that I can look into the one proposition a little further.

Mr. SMOOT. The Senator from North Carolina asked about the importations. If this is going over, I will not take the time now to give them to him, or the reason why the importations beginning with 1909 were so small, but if he will turn back to the figures of the importations of 1910 and the pre-war period he will see that there were considerable importations.

Mr. SIMMONS. That is true. I am not questioning the statement; at that time there were considerable importations of refined bauxite to this country. My impression is that at this time we are producing in this country practically all of the refined bauxite that we consume.

Mr. SMOOT. Yes. I will not take the time now to discuss the reasons why. We will do that when the item comes up again.

Mr. KING. Mr. President, in order that the Senator may be advised of the position of some of us upon this matter and in view of the fact that he is to consider it further, I wish to call his attention very briefly to one or two points which I think may have some influence in determining the final action of the majority upon the item.

Mr. LODGE. Mr. President, I do not wish to interfere with the Senator's argument, but I wish to ask whether the point is made that the rate is 1 cent per pound on bauxite?

Mr. SMOOT. The point is, I presume, that they disagree to the amendment of the Senate wherein the Senate committee reduced it from 1 cent to three-fourths of a cent on refined bauxite.

Mr. LODGE. That is not the duty on refined bauxite. The duty on aluminum hydroxide, or refined bauxite, is one-half of 1 cent per pound. That is the House rate. The next rate is three-quarters of 1 cent per pound on potassium aluminum sulphate, or potash alum, and ammonium aluminum sulphate, or ammonium alum. It has nothing to do with bauxite.

Mr. SMOOT. The Senator from Massachusetts is right. I understood we began with paragraph 6, and I had not read the first bracket.

Mr. LODGE. The rate on refined bauxite is the same as the House rate.

Mr. SMOOT. I had glanced at the bottom of the other page, and in turning it over thought it took in the whole thing.

Mr. LODGE. That is what caused the confusion.

Mr. SIMMONS. The Senator is right about that. I did not notice that there was a semicolon between the items.

Mr. DIAL. Mr. President, may I ask some member of the committee if this is aluminum out of which they make wire for the transmission of electric current?

Mr. SMOOT. Not refined bauxite. Aluminum is made from bauxite, but not from the item which we have under consideration to-night.

Mr. KING. Mr. President, my position is with respect to the three-quarters of 1 cent. Of course, I do not object to a reduction. My opinion is that we ought to strike it all out.

Mr. LODGE. My only point was that the three-quarters of 1 cent per pound had nothing to do with refined bauxite.

Mr. KING. I think probably the Senator may be right about it.

Mr. LODGE. Oh, absolutely. The Senator will see that if he will read it.

Mr. KING. With respect to the other provision and hoping that the committee may reduce the three-quarters of 1 cent to a still lower rate, I was about to submit a few observations, but if the committee will consider it more fully I shall pretermit any further discussion at this time.

The VICE PRESIDENT. The question is on agreeing to the amendment in line 13, which will be stated.

The ASSISTANT SECRETARY. On page 4, in line 13, it is proposed to strike out "25" and insert in lieu thereof "35," so as to read:

All other aluminum salts and compounds not specially provided for, 35 per cent ad valorem.

The amendment was rejected.

The VICE PRESIDENT. The Secretary will state the next committee amendment.

The ASSISTANT SECRETARY. On page 4, line 14, after the words "ammonium carbonate," insert the words "and bicarbonate," so as to read:

Ammonium carbonate and bicarbonate, 1½ cents per pound.

Mr. JONES of New Mexico. Mr. President, I would like to get some information on this item. There is very little that I can find about it in any of the data furnished by the committee.

Mr. SMOOT. I will say to the Senator that both items, ammonium carbonate and bicarbonate, are used for exactly the same purpose.

Mr. JONES of New Mexico. I think so, too, but the committee increases the duty 100 per cent above what it is now. From the information I have upon the subject, I believe it is used for a very important purpose. If we are increasing the duty upon it 100 per cent, I thought we ought to have some explanation of it. It is a product that is used in the scouring of

wool and the duty is increased 100 per cent. The tariff commission apparently has very little information on the subject. I read in their data that the domestic output is unknown—that is, the ammonium carbonate—and now it is proposed to insert bicarbonate, which I am told by the Senator from Utah is used for the same purpose.

There is nothing in the information here about ammonium bicarbonate. There is nothing to indicate why the duty should be increased 100 per cent above the present rate. Unless there is some one who can throw some light on the subject I would be inclined to indulge in a little speculation as to why it is done. We would have to do that. Has the senior Senator from Utah any information about it?

Mr. SMOOT. I will say to the Senator that ammonium bicarbonate is used, I will not say principally, but largely, in baking powder. In fact, we put bicarbonate in with ammonium carbonate for the very reason that they are used for nearly the same purpose. Chemically they are not exactly the same, but the purposes for which they are used in this country are nearly the same. It is true that ammonium carbonate is used for scouring wool, but it is not used to a great extent for that purpose, I will say to the Senator. It can be used and many manufacturers use it in cleansing certain kinds of wool, where there is exceedingly heavy, greasy wool; but it is not a material that is absolutely necessary in the cleansing of wool.

Mr. JONES of New Mexico. Has the Senator any information as to the domestic production?

Mr. SMOOT. No; I can not state just what the production is, but it is quite large, I will say to the Senator. I have not any doubt that they can produce sufficient to supply the demands of the United States.

Mr. JONES of New Mexico. Is it not a fact that ammonium bicarbonate used in baking powder is exported from the United States all over the world? There is nothing said in the information about it; but that is my understanding.

Mr. SMOOT. The baking powder is exported to many parts of the world, but not the ammonium bicarbonate.

Mr. JONES of New Mexico. I understand that; but the baking powder itself is exported. Will the Senator from Utah advise us why the duty on ammonium bicarbonate has been increased 100 per cent, and why it is the Finance Committee reports to the Senate a bill increasing the duty on ammonium carbonate 100 per cent above the present law?

Mr. SMOOT. The Senator will notice that the importations are increasing very rapidly. The committee were advised that so far as the quotations of to-day are concerned, they have gotten so low now that the producers can hardly make ends meet. The Senator will notice from the report of the importations that they are increasing, and particularly are they increasing this year.

Mr. JONES of New Mexico. Where does the Senator get that information?

Mr. SMOOT. On page 37 of the Summary of Tariff Information, as follows: In 1919 there were 147,952 pounds, in 1920 there were 298,126 pounds, and in the first nine months of 1921 there were 327,792 pounds.

Mr. JONES of New Mexico. That was ammonium carbonate?

Mr. SMOOT. I thought that was what the Senator was asking about.

Mr. JONES of New Mexico. Of course, I have the information which the Senator has just read. I have that much information right before me, but I particularly wanted to know about ammonium bicarbonate, which is the amendment which the committee proposes.

Mr. SMOOT. I will say to the Senator that I have not the figures here, nor were they given to the committee, other than figures showing that the importations were greatly increasing. This is all the information I can give the Senator.

Mr. JONES of New Mexico. I am satisfied the Senator has given us all the information that any member of the Finance Committee could give. Upon that kind of information it is proposed to increase the duty 100 per cent. That is all the information we have. We do not know anything about how much is produced in this country. We have nothing as to the prices. We have nothing as to the exports, and so far as bicarbonate is concerned we know nothing about the imports.

Why was this thing done? I call attention to this for the purpose of directing attention not only to this item alone but to this item as typical of a large number of such items in the bill. It seems that wherever there was an item about which the committee had no information, and if the rate in the existing law was lower than the Payne-Aldrich rate, they automatically increased the duty to the old Payne-Aldrich law rate. The Payne-Aldrich rate, if I am not mistaken as to this particular matter, was——

Mr. SMOOT. The Payne-Aldrich rate was 1½ cents. The Senator is correct in that, and the rate in an equivalent ad valorem would be about 24 or 25 per cent.

Mr. JONES of New Mexico. The present rate on ammonium carbonate is three-fourths of 1 cent per pound, and in the act of 1909 it was 1½ cents per pound. The present bill proposes to keep it at 1½ cents per pound. That is just the idea I had in mind.

There is an increase proposed of 100 per cent, and the only reason which I can discover for it is that that was the rate under the Payne-Aldrich law. We have no information here as to how much of it is produced in this country. We know nothing about how much of it is imported into the country. It is a useful commodity, and yet they increase the rate 100 per cent.

Mr. FLETCHER. Mr. President, can the Senator tell us how much revenue we are getting out of it now?

Mr. JONES of New Mexico. About the ammonium carbonate we have absolutely no information.

Mr. FLETCHER. What concerns are manufacturing it?

Mr. JONES of New Mexico. We have no information on the subject.

Mr. FLETCHER. Does the Senator know whether there is one big organization controlling the output or whether there are a number of them?

Mr. JONES of New Mexico. All we have from the Tariff Commission is the statement that the domestic output is unknown. There is no testimony on the subject before the Ways and Means Committee of the House or the Finance Committee of the Senate that I know anything about, yet we are increasing the duty 100 per cent by the present bill. If anybody is being hurt under the present law we do not know anything about it.

Mr. SMOOT. I do not know whether the Senator wants me to read a letter from the Manufacturing Chemists Association of the United States in reference to this matter or not. I thought the Senator had reference to any information that would be received from the Tariff Commission. This is the condition that exists to-day.

Mr. JONES of New Mexico. What is the date of the letter to which the Senator is referring?

Mr. SMOOT. The date of the letter is January 24, 1922. It reads:

May we submit, in addition to our brief of August 8, 1921—

I do not want to take the time to refer to that brief, because this virtually gives in substance what the brief contains in detail. The letter is as follows:

May we submit in addition to our brief of August 8, 1921, additional facts quite recently developed to the great detriment of our industry.

Importations of bycarbonate of ammonia and carbonate of ammonia have increased since 1918 from nothing to the approximate quantity imported in 1914. Selling prices of this imported product are less to-day than before the war.

The imported product is offered at about one-half of the price at which the domestic product can be sold. The foreigners have and are closing contracts to supply American consumers with a year's requirements, and we have lost during the past month nearly 50 per cent of our contract trade for the ensuing year.

Our production of carbonate of ammonia and bicarbonate of ammonia has been discontinued since May of last year, and the plant is now operated at less than 20 per cent of its former output. Unless adequate tariff protection is given, the industry will disappear from this country, and the large financial investment will become a total loss.

Your favorable consideration in conjunction with our brief of August 8, 1921, is most earnestly asked.

Very respectfully,

MICHIGAN AMMONIA WORKS,
GEORGE OSINE,
Secretary and Treasurer.

DETROIT, MICH.

Mr. JONES of New Mexico. Mr. President, of course the letter which the Senator from Utah [Mr. SMOOT] has just read was not published in the evidence. It is possible that some other members of the majority of the Finance Committee have a number of letters of a similar character. I think, however, that the Senate is entitled to know it if they have. The other day the Senator from Massachusetts [Mr. LODGE] read us a letter which he had presented to the Finance Committee on some subject. The Senator from Utah now has a letter regarding this matter. It is not given out in a public way; it contains information about which nobody can know except the members of the Senate who are favored with receiving a copy of that private letter or being shown that private letter.

However, take that letter as it is, what does it mean? Here is an industry that is closed down. There are hundreds and thousands of industries in this country which are closed down, but is that because the tariff on the goods which they manufacture is not high enough?

Mr. SMOOT. It is if the importations are mounting day by day, and foreign manufacturers are taking the contracts away from the American producers at prices with which they can

not compete. That will close down any concern. The Senator from New Mexico knows that American manufacturers can not proceed when they can not make an article at the price at which it is offered in the American market by foreign manufacturers.

Mr. JONES of New Mexico. Mr. President, if it be assumed that an increase of duty is all that is necessary to start an industry going, then the Senator from Utah is justified in the remark which he has just made; but we do not know what the production in the United States of this article is. In this instance just a few pounds of the commodity are being imported. I do not know whether the requirements of the United States are 100,000 pounds or 10,000,000 pounds. Apparently the Senator from Utah does not know; the Tariff Commission does not know. We are not told what would be the effect of 327,000 pounds of an article being brought in here if the consumption were 20,000,000 pounds, and we do not know whether it is or not; but considering all that we are told in the letter which has been introduced by the Senator from Utah, of which we have had no opportunity to get information until now—take everything that is stated in the letter—and I submit that anybody who is using the great taxing power of this Government ought not to use it without more information than is contained in that letter. To increase this duty by 100 per cent when we do not know what is the production in this country and when we do not know what the consumption is in this country would be wholly unjustifiable.

Mr. HEFLIN. Mr. President——

Mr. JONES of New Mexico. I yield to the Senator from Alabama.

Mr. HEFLIN. Mr. President, the Senator from Utah [Mr. SMOOT] has suggested to the Senator from New Mexico [Mr. JONES] that some industry had closed down. The Senator from New Mexico, however, knows that the tariff rates on imports had nothing on earth to do with the closing down of that industry. The contraction of the currency and the deflation of credits caused many industries to be closed down and caused 7,000,000 of American workingmen to be thrown out of employment. Now, the Senator from Utah wants to tax the people to enrich somebody who is manufacturing something. I want to ask him or any other Senator on that side of the Chamber what the Republicans propose to do for the farmer whose industry is closed down, who has had his mortgage foreclosed and his home and farm taken from him, who has moved away and is now trying to earn a living by working for wages? What is the Senator from Utah doing for the farmer? What is his side undertaking to do for this man, the farmer, to whom I have referred, multiplied, runs into the millions? Republican Senators rush to the rescue of certain manufacturers who want to tax the American people for their particular benefit; but what are you doing for the common mass of the people, the human beings who have a right to live, to have something to do, and to have a measure of the prosperity that the country is able to produce? I repeat, what are you doing for them?

Mr. SMOOT. If the Senator from Alabama will merely wait until we get to schedule 7 of the bill we shall tell him what we are doing for the farmers of the country; but I will say to the Senator that the farmer, I think, is absolutely satisfied with what we are doing for him in this tariff bill.

Mr. HEFLIN. Mr. President, the farmers of the United States, East, West, North, and South, are not satisfied with what the Republican Party is doing for them. What the Senator's party has done for the farmer up to this time is "a plenty." The Senator says that the farmer is satisfied with what the pending bill has done for him, and tells us not in this schedule but in some schedule which is to follow further on they will do something for the farmer. That has always been the policy of the Senator's party, but they have never yet reached the time where they have really delivered the goods to the farmer.

Mr. SMOOT. Does the Senator from Alabama really think that protection for the farmer's products is to be found in the chemical schedule of the pending bill?

Mr. HEFLIN. Certainly. A tax has been imposed on fertilizer ingredients in this schedule; the tax on potash has been increased; and that will increase the price of the farmer's fertilizer. That is what the Senator's party is doing for the farmer.

Mr. SMOOT. When we reach the schedule to which I have referred I think it will be time enough to discuss that matter. The Senator from Alabama, however, asked me the question, and I answered that if he will wait until we get to schedule 7 he will find there just exactly what rates of duty are given by the bill to the farmer's products. I will say that so far as the rates of duty are concerned—and I am not going to talk of Wall Street or about the currency——

Mr. HEFLIN. I know the Senator is not. Wall Street is doing too much to finance the Senator's party's political campaigns for him to say anything against Wall Street.

Mr. SMOOT. Oh, well——

Mr. HEFLIN. The Senator is very touchy about Wall Street.

Mr. SMOOT. No; but there is no necessity of talking about Wall Street so long as the Senator from Alabama is here.

Mr. HEFLIN. The Senator is right about that, and so long as I am able to enter my protest against wrongdoing and crooked conduct I shall oppose the control of Congress by Wall Street. I would not permit Wall Street to tell Congress what it can or can not do.

Mr. SMOOT. Nor would I.

Mr. HEFLIN. Nor would you. Why, the Senator is bowing and smiling now and defending Wall Street against my criticisms.

Mr. SMOOT. I am not defending Wall Street.

Mr. HEFLIN. The Senator injected Wall Street into this discussion. He said the Senator from Alabama will say something about Wall Street.

Mr. SMOOT. Is that defense?

Mr. POINDEXTER. Mr. President——

Mr. HEFLIN. Wall Street is a tender spot with the Senator and others of his faith. Now, if the Senator will take his seat the Senator from Washington [Mr. POINDEXTER] would like to get into this.

Mr. SMOOT. Mr. President, the Senator from Alabama can not tell the Senator from Utah when he can take his seat.

Mr. HEFLIN. I suggested that because I saw the Senator from Washington arise. I was only jesting about that. I am always glad to hear the Senator, even when he is defending Wall Street.

Mr. SMOOT. Mr. President, the Senator lives with Wall Street; he sleeps with Wall Street; he sings Wall Street. When we enter the doors, if he is on the floor we know that it will not be a minute until he reaches Wall Street, and when he reaches the foot of Wall Street we know just about how long it is going to take him before he gets out of Wall Street onto Broadway. The Senator has Wall Street for breakfast, he has Wall Street for dinner; he thinks of nothing but Wall Street during the recesses, and I never saw him but that Wall Street was on his lips or on his mind.

Mr. HEFLIN. Oh, Mr. President, my criticism of Wall Street has upset the Senator's equilibrium and thrown him into a nightmare. [Laughter.] I will trouble his dreams to-night with the demand for the deliverance of legislative authority from the control of Wall Street, and he is not the only one that I will trouble here and on the hustings this fall about Wall Street.

The man who comes down here, the captain of industry, and takes off his kid gloves and lays them down on the table before your Finance Committee behind closed doors, where Democratic members are not permitted to sit, and tells you how much he wants you to tax the people for the purpose of putting money into his pocket, gets exactly what he wants. We are going to tell the people who are thus held up and robbed, people who are not able to pay their way on the railroads to come to Washington, just how you draw the line between them and the purse-proud plutocrats of Wall Street. Let the Senator from Utah put that in his pipe and smoke it.

This Government does not belong to Wall Street, although there are those in Wall Street who believe that it does, and when they can manipulate it as they want to manipulate it they feel that it is their private property. I know they despise and hate me; every agent they have in public life here in Washington or in the public press here in Washington despises me and those like me; but I have a duty to perform as much as any soldier ever had who shouldered his gun and bared his breast to the enemy to fight in the cause of right. I declare to you to-night that the greatest battle that this country has been called upon to fight is the battle which will be fought this year at the polls.

Thousands of our boys died in France to preserve our liberty. What are we going to do here at home to safeguard and preserve it inviolate? There are those who would use the instrumentalities of the Government for their own personal benefit and employ them to the hurt and injury of the masses of the people.

You have brought in here a tariff bill written exactly as selfish and greedy interests would have it written. It looks as if they wrote it themselves. You have here schedule after

schedule which you are unable to explain or justify; and you are laying taxes upon people who are unable to pay them. What are you doing for the poor fellow who roams the streets, begging somebody to give him employment in order that he may eat and live? What are you doing for the farmer who produces the wherewith to feed and clothe the world? You have made a bankrupt of him. What are you doing to the local merchant, the little fellow? You have strangled his business to death. What are you doing with the country bankers, those mighty agencies for good in the business life of the Nation? You have strangled them; you have literally turned over the money supply of the Nation to the money lords of Wall Street. There is where it is. The Senator from Utah can not laugh this grim evil out of existence. Thirty-four thousand six hundred copies of the CONGRESSIONAL RECORD go out of this building each day, and go into the homes of the people, so there are people who can read the RECORD and get the truth as it is.

You can not buy all the newspapers. You have bought a great many of them. The country has already suffered because of that. We see the truth stifled and a free press badly hampered. Is this country to be ruled by a subsidized press?

Senators, somebody has got to fight this evil, and fight before it is too late. The soldier who would cowardly slink away from his duty at the front and surrender his country's cause to the enemy ought to be put up against a wall and shot. Why should a man be permitted to stay in this body who flinches and fails in the discharge of his duty? Are we not expected to cry out against dangers that threaten our free institutions?

What do you see here each day? You are doing nothing to help millions of farmers in distress. You have injured the farmer, the merchant, and the banker in the agricultural sections. You have struck labor a body blow, and you have denied adjusted compensation to the soldier who saved that flag on the foreign battle field. But these purse-proud tariff barons come in here and, as I said, take off their kid gloves and lay down their silk hats and their gold-headed canes on the table and say: "Gentlemen, you recall that we contributed liberally to your campaign fund in 1920. Look at your books and you will find our names written there. We want our profits increased by taxing the people." Then you smiled and responded, "It shall be done," and you have done it.

Where is SIMMONS, of North Carolina, the brave and gallant knight who opened this fight in the interest of the people? Where are JONES of New Mexico and KING, of Utah, brave warriors who have so ably opposed these indefensible schedules? They were not allowed to be present at your sacred meetings. The Republican members of the Finance Committee sat behind closed doors and framed this monstrous thing. The distinguished Democratic leader, my able colleague, OSCAR UNDERWOOD, gets up here and strongly condemns this terrible thing. You can not answer his argument, and you simply say: "Why, you are filibustering; you are delaying the passage of this bill."

These Senators say, "Why, we are on the committee," some of them, "and we never had a chance to hear the testimony that came in, as you sat behind closed doors. We do not know what you agreed to do, but here is the proposition, and we want now to know something about it. Is there anything unreasonable about that? Have we not the right to demand that you give a reason for increasing the tax burden of the American people? We want to tell our people what these things are, and what they mean"; and you taunt us each day with the suggestion that we are guilty of filibustering—filibustering!

You have a proposition in this bill to tax potash, and every farmer in America is interested in potash. When you tax potash you increase the price of fertilizer to the farmer, when you know that he is already in dire distress.

Mr. President, the people of this country are going to wake up finally to just what is going on here. They are not going to submit indefinitely. I do not believe the intelligent American people will stand for it much longer. Here you are. The farmer is producing cotton to-day far below the cost of production. Here is the Mississippi Valley overflowed with water, a cotton crop in the Delta almost impossible, the cotton supply short, inadequate, and we are facing a cotton famine between July 1 and September, and yet cotton is selling under the cost of production to-day, under the reign of the Republican Party. We have exported and consumed considerably more cotton in 12 months than the entire crop of 1921, and still cotton is selling under the cost of production. There are farmers in my State who are unable to make a crop; they can not get the money with which to make it. Think of that, Mr. President! That is true of other cotton-producing States.

What are you going to do with this man? Here is his little home of 20 acres on the hillside. He owned it in 1920, and now his home is gone, his 20 acres are gone, his all is gone, and he is still in debt. He has rented a house and is working on small wages, eking out a miserable existence, because he has been crushed to death by the deflation policy of the Republican Party. What are you doing for him? Nothing, absolutely nothing.

What are you doing for the poor man who walks out of a little shack in the morning looking for work, having had but little to eat? His wife and children are hungry. His wife says, "John, don't you think you will find something to do to-day?" and John says, "I don't know. I am trying very hard to find something to do." What are you doing for this unfortunate man and his family? Nothing!

But you are ready to employ the taxing power and impose heavy burdens upon the people in order to enrich those who contribute to your campaign funds.

Senators, does your sympathy ever go out to the man who has been struck down and robbed by your policies? There are millions of them in the United States. But here is a man, a manufacturer, who comes and says, "Come across with this for me. I am not satisfied with the profit I am now making; I want more"; and then you use the taxing power of the Republic to increase his fortune. You are doing nothing to extend a helping hand to millions who are drowning in the sea of financial disaster.

The Senator from Utah [Mr. SMOOT] may smile and talk about having Wall Street in the morning, at noon, and in the evening. He never uttered a truer saying in his life. It has got your party by the throat morning, noon, evening, all night, every night. Wall Street is its master.

Mr. President, do you know how I account for this thing? I beg the pardon of my good friend from New Mexico [Mr. JONES], who has fought here so bravely and so ably, hour after hour and day after day, for trespassing thus much upon his time; but I desired to say a word at this juncture, when he appealed to your side for information, which you refuse to give, hour after hour and day after day. You do not have upon an average five Senators over there who remain here all day. Why is it that you will not stay here? Why will you not discuss the provisions of this bill?

Mr. President, I attribute it to what we heard here in the spring of 1921. Every time we made a suggestion about what ought to be done in the interest of the people of the Nation, some full-chested Republican would get up over there and say to us: "Why, we beat you 7,000,000 majority. Why should we worry?" I told them that Mr. Taft went in by 1,000,000 majority and went out by unanimous consent [laughter], and you are going to beat that. Now, just look how sick my friend from Utah [Mr. SMOOT] looks. He knows what I am saying is true. He does not have to run again for four years more, and we have postponed the day of judgment for him for exactly four years. They said: "We beat you 7,000,000 majority," and you now have 24 majority in the Senate, and here is the way you feel about it: You say: "Why should we waste time? Why should we tell the people? What have they to do with it? The captains of industry will take care of us. They understand it. They came before us behind closed doors; we agreed with them as to what we would give them, and we have got to live up to our contract or our campaign funds for 1922 are gone." So, with your 24 majority and your 7,000,000 in the popular election, you are resting on your oars. You have had enough done to you recently in the primaries in your own party to tell you which way the wind is blowing.

Senators, these are strange times in which we are living. You have come in here with a tax bill, with schedule after schedule increasing the taxes of the people, and when you pass it they can not help it. They will have to pay it; but what did you do for the farmer, when it cost him 40 cents to make a bushel of corn and you beat down the price to 17 cents? You did not extend a helping hand to him to bring up the price and make the public help bear his loss, but you suffered his business to be destroyed. When wheat was beaten down below the cost of production, you never extended a helping hand to the wheat grower. You permitted him to suffer heavy losses. When the cotton producer of the United States sold his cotton below the cost of production, I never heard you open your mouths in his behalf. You refused to help him. You permitted him to go down. But when the manufacturer comes in with his figures and tells you that unless you tax the farmer and make the farmer pay him more for potash his business will not prosper as much as he wants it to, you lay the tax upon the farmer. How are you going to explain that when we close these doors in the summer time and you go out on the hustings, when the man sits in front of you upon whom you have levied these taxes? How are you going to defend them? And yet you stand here and ask us to quit filibustering!

I want to say that I am not in favor of a filibuster on this bill. I want a reasonable time in which to discuss it. I think the people are entitled to have these obnoxious schedules explained. I think a month's time will be long enough, perhaps, and then let you vote, let you marshal your 24 majority, and put this thing upon the people, and let us be able to say to them: "You can find in the CONGRESSIONAL RECORD the objections to this robber scheme. Pass judgment upon the merits of the case as jurors. You are to do the voting; you are to decide whom you are going to send back to this body in the fall election and whom you are going to elect to the other House in the fall election."

Mr. President, I know that we are undertaking a big task when we fight these crafty, avaricious interests. It has been true since predatory interests first marshaled their forces to control national legislation that they who dared to beard the lion in his den and fight for the right and for justice for the people incurred the displeasure of those who are willing to bow the knee to Baal and to court favor with special interests, and who shape their creed for their cravings, and swallow their convictions for a job.

Mr. President, somebody has to fight, and I want to pay this tribute to-night, before I take my seat, to the great Democratic Party, old as the Government. Jefferson, the father of the Declaration of Independence, is the founder of the Democratic Party. His political teachings have been translated into the language of every civilized country on the globe, and the good work of this great father of democracy is still marching on, and this great party now battling with intrenched privilege has never yet lowered her arm. She has always been on the side of the people. She is the party of the people. She has always fought special privilege. She has always fought plutocracy. She has always been for the eternal principles of right and justice, and under the leadership of the able minority leader she plants her colors upon the Ararat of those principles and reconsecrates herself and her all to the highest and best interest of the American people.

Mr. JONES of New Mexico. Mr. President, I want to call attention somewhat in detail to this letter which has been presented to us by the Senator from Utah. Bear in mind that this is the only information which anybody has, which anybody knows anything about, in connection with the imposition of this duty of 1½ cents a pound on ammonium bicarbonate. I have not been able to find that in the past there has been any duty on it. If I am mistaken about that, I should like to be corrected. There has been a duty on ammonium carbonate, but I have not found ammonium bicarbonate mentioned thus far in the different schedules. If I am in error, I should be glad to be corrected.

Mr. SMOOT. The Senator is in error. It has been carried at 15 per cent in paragraph 5. It falls under chemical compounds, in the basket clause, in existing law, in paragraph 5, and is taxed at 15 per cent.

Mr. JONES of New Mexico. I thank the Senator for the information. It has been covered in the basket clause at 15 per cent. Does the Senator mean to say that the duty proposed is greater than in the present law?

Mr. McCUMBER. Mr. President——

The VICE PRESIDENT. Does the Senator from New Mexico yield to the Senator from North Dakota?

Mr. JONES of New Mexico. I yield.

Mr. McCUMBER. I merely wish to ask unanimous consent at this time that when the Senate closes its session on this calendar day it shall take a recess until to-morrow at 11 o'clock.

The VICE PRESIDENT. Is there objection? The Chair hears none, and it is so ordered.

Mr. JONES of New Mexico. I would like to know whether this is an increase of that duty or not?

Mr. SMOOT. I have not the quotation on bicarbonate, but the rate on ammonium carbonate is from 7 to 8 cents a pound, and 15 per cent, if the price were 8 cents, would be 1.2 cents instead of 1½. So it is a little increase over the rate carried in the Underwood-Simmons law.

Mr. JONES of New Mexico. I am at a little loss, then, to know about this change, and why it was made. If that is all there is to it, that will not save this industry. The Senator read the letter awhile ago as if it appealed to the committee to increase the duty on this commodity and save a great industry of the country. But I want to make this observation, that it was assumed, at least, that this would increase the duty, and I stated awhile ago that there was an increase of 100 per cent over the present duty, thinking that it was under the same kind of a duty as ammonium carbonate, and was not corrected about it. I am not satisfied with the information which we have now, and I confess that I do not know, but there is nothing here except this letter.

I would just like to call attention to the fact that the Senator from Utah in presenting this letter said that this was the information on which they acted.

Mr. SMOOT. No, Mr. President, I gave that information to the Senator at his request. Even in the letter it refers to a brief that had been filed with the committee. The letter itself refers the Senator to that, and I told the Senator then that I was not going to take the time to read the brief, that he could do that. The letter refers to the brief.

Mr. JONES of New Mexico. Yes, Mr. President; but let me read this letter, and I think the Senator, if he will hunt up the brief, will find that the brief says nothing about this item. At any rate, I am so led to believe by the statement in this letter. This is what the letter says:

> May we submit in addition to our brief of August 8, 1921, additional facts quite recently developed to the great detriment of our industry.

I have looked through the index of the hearings, and in the hearings in the House, and find that ammonium bicarbonate is not mentioned in either index. If there is any brief in this record which mentions ammonium bicarbonate, I do not know anything about it. It certainly is not indexed, and I think this paragraph of the letter which I just read means that they did not say anything about ammonium bicarbonate in that brief. If there are any other facts about it, they certainly ought to be presented. The absence of facts is quite significant. I read further:

> Importations of bicarbonate of ammonia and carbonate of ammonia have increased since 1918 from nothing to the approximate quantity imported in 1914.

In other words, the foreign trade in this commodity is reaching normal proportions so far as importations are concerned. They are about the same as in 1914, when the present law was in operation. Is that any reason why you should now increase the tax, simply because importations have gotten back to those of normal times? There is not a line in this letter which says anything about the cost of production of this commodity. But it is said here:

> The imported product is offered at about one-half of the price at which the domestic product can be sold.

When we read that in connection with the fact that importations have just about reached the pre-war normal amount, it must mean that the prices of this commodity in this country are 100 per cent higher than they were in 1914. He says they are offered for sale at about one-half of their price, and the importations are just about normal. If that means anything, it means that the price of that commodity to-day, as asked by this concern, is 100 per cent higher than in 1914.

Is it the purpose to say to anybody who comes before the Finance Committee, and wants to retain the present prices for their production, that we are going to put a higher price upon that commodity simply because they ask it? Are we going no further, when anybody comes before the committee and makes a request; but, without further inquiry, without further information, will the Finance Committee rush to the rescue of the industry? It applies this one remedy; it does not even make any inquiry as to other symptoms of the disease; it does not care anything about the other symptoms; it does not care anything about the prices which are exacted from the American people; it does not inquire into the question of other products being manufactured by the same concern.

This same letter says that their plant is only running at about 20 per cent of its capacity. It is a producer of ammonium sulphate, which goes into fertilizer. We know the condition of that industry to-day. We know that the farmers of this country who demand fertilizer are unable to buy, but I suppose when we reach the item of ammonium sulphate we will find that the tariff upon that has been raised, and upon what information? Just a bare statement that as to two of the products of this great chemical plant they closed down the production of them. They do not say how much supply there is on hand. They say nothing about the demand, but they do say that importations have reached just about what they were in 1914.

What do they ask? They ask the committee to help them out. I want to read the balance of this letter. It says:

> The imported product is offered at about one-half of the price at which the domestic product can be sold. The foreigners have and are closing contracts to supply American consumers with a year's requirements, and we have lost during the past month nearly 50 per cent of our contract trade for the ensuing year.
>
> Our production of carbonate of ammonia and bicarbonate of ammonia has been discontinued since May of last year, and the plant is now operated at less than 20 per cent of its former output. Unless adequate tariff protection is given, the industry will disappear from this country, and the large financial investment will become a total loss.
>
> Your favorable consideration in conjunction with our brief of August 8, 1921, is most earnestly asked.

The brief of 1921, so far as I can learn from an examination of the evidence in the case, has never been printed. If it was printed, it does not refer to these two items marked carbonate of ammonia and bicarbonate of ammonia. This letter is the evidence. They simply ask protection. They state no facts which would justify the levying of a tax upon this item, and imposing this burden upon the consumers of the country.

As I said a moment ago, they do not inquire into anything surrounding the industry. They know nothing about the amount consumed in the country. They know nothing about the cost of production in the country. This product, or rather these two items, produced by this concern are not now being manufactured. They have stopped the manufacture of these items since May of 1921. Upon that meager information, without inquiry as to the probably 1,500 or 1,600 other chemical items produced by this concern, without any inquiry as to the other branches of its business, they come here and propose this duty, this tax upon the people.

I say that the same thing has been done in hundreds of cases in the bill and upon evidence of no greater importance than the things which I have read. These people are interested, and have gone privately to members of the Finance Committee, made their requests, and, without investigation, without information, the majority members of the Finance Committee have applied this one remedy.

Whether a business closes down for one reason or another makes no difference. If they are in a business that is not prospering, they apply simply the one remedy, the old patent nostrum—and that is, the imposition of a tariff tax or a duty. They apparently do not care how much of this patent medicine the patient takes. Evidently they go upon the theory that if the medicine is good at all, the more they get the better. So they keep prescribing this one thing, regardless of any symptom except that there is a sick patient with an affliction of some kind.

Mr. President, when, with the great power of this Government, we impose taxes upon the people and take money out of their pockets which they may need for food, and do it upon such testimony as this, it seems that ordinary humanity and the consciencies of the people would be stirred upon a consideration of such a situation as this.

Mr. President, I do not believe the amendment is justified.

Mr. McCUMBER. Mr. President, ammonium carbonate carries a duty under the present law of three-fourths of 1 cent per pound. The bicarbonate goes under the basket clause, under the present law, which would be 15 per cent ad valorem. Under the bill as reported by the Senate committee ammonium carbonate is given a duty of 1½ cents per pound; 1½ cents per pound is about the equivalent of 25 per cent ad valorem.

Bicarbonate is inserted. If bicarbonate were left out it would go under the basket clause at 25 per cent ad valorem. If it falls in this clause it will carry 1½ cents per pound duty, which, on not only the pre-war price but also on the present price, is the equivalent of 25 per cent ad valorem. So we have kept the same relation between those two articles in this bill as was kept in the previous laws, but the rate, as is suggested, goes from 15 per cent to 25 per cent ad valorem.

The products are used interchangeably for the same purposes It makes no great amount of difference, but the only question is whether it falls in the basket clause with 25 per cent ad valorem or whether it remains here with 1½ cents per pound, which is the equivalent of 25 per cent ad valorem.

I am not at all particular, but I think we might pass upon this subject to-night, and then I shall ask for a short executive session, to be followed by a recess.

The VICE PRESIDENT. The question is upon agreeing to the committee amendment.

The amendment was agreed to.

EXECUTIVE SESSION.

Mr. McCUMBER. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After five minutes spent in executive session the doors were reopened, and (at 10 o'clock and 10 minutes p. m.) the Senate took a recess under the order previously made until to-morrow, Thursday, May 11, 1922, at 11 o'clock a. m.

NOMINATIONS.

Executive nominations received by the Senate May 10 (legislative day of April 20), 1922.

RECEIVER OF PUBLIC MONEYS.

Peter G. Johnston, of Idaho, to be receiver of public moneys at Blackfoot, Idaho, vice Charles E. Harris, whose term will expire May 13, 1922.

REGISTER OF THE LAND OFFICE.

Bartlett Sinclair, of Idaho, to be register of the land office at Boise, Idaho, vice Frank S. Heer, whose term will expire June 24, 1922.

POSTMASTERS.

ALABAMA.

Edward C. Barnes to be postmaster at Evergreen, Ala., in place of E. C. Barnes. Incumbent's commission expired July 21, 1921.

ARKANSAS.

Robert E. Love to be postmaster at Hughes, Ark. Office became presidential October 1, 1920.

CALIFORNIA.

George A. Herdeg to be postmaster at Riverside, Calif., in place of K. D. Harger, deceased.

Jessica H. Wright to be postmaster at Sierra Madre, Calif., in place of G. B. Morgridge, resigned.

FLORIDA.

Rhea W. Pherigo to be postmaster at Kissimmee, Fla., in place of B. B. Simpson, resigned.

ILLINOIS.

Harley L. Miles to be postmaster at Elburn, Ill., in place of A. A. Dobson. Incumbent's commission expired February 4, 1922.

Norman Jefferson to be postmaster at Hinsdale, Ill., in place of J. G. Bohlander. Incumbent's commission expired January 10, 1920.

William J. Dobberstein to be postmaster at Lombard, Ill., in place of W. H. Meyer, resigned.

J. Mac. Duncan to be postmaster at Mackinaw, Ill., in place of J. E. Caley. Incumbent's commission expired September 11, 1921.

Glenn W. Weeks to be postmaster at Tremont, Ill., in place of B. L. Greeley. Incumbent's commission expired February 4, 1922.

H. Malcolm Leighty to be postmaster at Vermont, Ill., in place of C. B. Schroder. Incumbent's commission expired February 4, 1922.

Charles O. Selfridge to be postmaster at Good Hope, Ill. Office became presidential April 1, 1921.

INDIANA.

Winona Newsom to be postmaster at Carthage, Ind., in place of O. O. Griffin. Incumbent's commission expired May 20, 1922.

George H. Thomas to be postmaster at Fortville, Ind., in place of Q. A. Wright. Incumbent's commission expired July 21, 1921.

Charles F. Porter to be postmaster at Hagerstown, Ind., in place of Eddy Mason. Incumbent's commission expired July 21, 1921.

LOUISIANA.

Joseph H. Hebert to be postmaster at Addis, La. Office became presidential April 1, 1922.

MASSACHUSETTS.

James H. Jenks, jr., to be postmaster at West Dennis, Mass. Office became presidential April 1, 1922.

MINNESOTA.

Henry M. Burtness to be postmaster at Spring Grove, Minn., in place of O. C. Vaaler. Incumbent's commission expired August 7, 1921.

NEBRASKA.

Herbert M. Hanson to be postmaster at Clay Center, Nebr., in place of F. A. Thompson, removed.

NEW JERSEY.

William Jeffers to be postmaster at Hackensack, N. J., in place of J. W. Binder, resigned.

Harold Chafey to be postmaster at Point Pleasant, N. J., in place of W. K. Blodgett, removed.

NEW YORK.

Eugene H. Ireland to be postmaster at Palatine Bridge, N. Y. Office became presidential April 1, 1922.

Jul Johnson to be postmaster at Kinderhook, N. Y., in place of G. W. Tracey. Incumbent's commission expired January 24, 1922.

Albert D. Ritchie to be postmaster at Saratoga Springs, N. Y., in place of L. W. Noland, declined.

Harry C. McNamara to be postmaster at Valatie, N. Y., in place of J. J. Glynn. Incumbent's commission expired July 21, 1921.

OHIO.

James C. Kelley to be postmaster at Clarksville, Ohio. Office became presidential April 1, 1921.

Harold A. Carson to be postmaster at Bergholz, Ohio, in place of J. M. Poplin, resigned.

Hilton C. Hart to be postmaster at New Waterford, Ohio, in place of W. C. Ferver, resigned.

OKLAHOMA.

Leroy D. Harding to be postmaster at Pryor, Okla., in place of W. H. Bell. Incumbent's commission expired April 30, 1922.

William C. Yates to be postmaster at Comanche, Okla., in place of F. O. Weldon. Incumbent's commission expired February 25, 1922.

Leon K. Dail to be postmaster at Cherokee, Okla., in place of J. H. Blythe, declined.

PENNSYLVANIA.

John E. Showalter to be postmaster at Terre Hill, Pa. Office became presidential April 1, 1922.

John H. Ammon to be postmaster at Beaver, Pa., in place of J. W. U. McBride. Incumbent's commission expired August 7, 1921.

Sylvester D. R. Hill to be postmaster at Charleroi, Pa., in place of J. K. Smith. Incumbent's commission expired February 4, 1922.

Isaac H. Detweiler to be postmaster at Perkasie, Pa., in place of O. F. Weiand. Incumbent's commission expired February 4, 1922.

TENNESSEE.

Charles A. Ogan to be postmaster at Dresden, Tenn., in place of R. E. L. Brasfield. Incumbent's commission expired July 25, 1921.

Clarence L. Shoffner to be postmaster at Shelbyville, Tenn., in place of Eugene Blackemore. Incumbent's commission expired September 14, 1921.

TEXAS.

William W. Sloan to be postmaster at Falfurrias, Tex., in place of W. W. Sloan. Incumbent's commission expired July 21, 1921.

George P. Harden to be postmaster at Groom, Tex., in place of C. R. Slay, resigned.

Alice M. Smith to be postmaster at Livingston, Tex., in place of June Hickman. Incumbent's commission expired January 24, 1922.

VIRGINIA.

William R. Sparks to be postmaster at Clinchco, Va. Office became presidential April 1, 1921.

William R. Moose to be postmaster at Glasgow, Va. Office became presidential January 1, 1921.

Robert V. Richardson to be postmaster at Hampton, Va., in place of F. W. Sheild. Incumbent's commission expired January 24, 1922.

Jesse R. Skinner to be postmaster at Kenbridge, Va., in place of W. F. Kennedy. Incumbent's commission expired July 21, 1921.

Maud Duffy to be postmaster at Stonega, Va., in place of C. N. Davidson, resigned.

WASHINGTON.

Jacob Vercler to be postmaster at Opportunity, Wash. Office became presidential July 1, 1920.

WISCONSIN.

Harry V. Holden to be postmaster at Orfordville, Wis. Office became presidential October 1, 1920.

Clyde C. Ellis to be postmaster at Elkhart Lake, Wis., in place of Robert Horneck. Incumbent's commission expired January 24, 1922.

Lewis W. Cattanach to be postmaster at Owen, Wis., in place of F. C. Watson. Incumbent's commission expired January 24, 1922.

Guy G. Nelson to be postmaster at Palmyra, Wis., in place of Joshua Thayer. Incumbent's commission expired March 16, 1921.

CONFIRMATIONS.

Executive nominations confirmed by the Senate May 10 (legislative day of April 20), 1922.

POSTMASTERS.

COLORADO.

Adelbert E. Humeston, Collbran.

ILLINOIS.

James W. Gibson, Murphysboro.

IOWA.

Adna Miller, Danville.

MISSOURI.

Jesse E. Fette, Alma.
Frank R. Evans, Armstrong.

NORTH DAKOTA.

T. H. Hulbert Casement, Fordville.
Benjamin J. Schnedar, Pisek.
Grace G. Berkness, Wolford.

OHIO.

Harry W. Randels, West Unity.

PENNSYLVANIA.

George W. Brelsford, South Langhorne.

SOUTH DAKOTA.

Jessie Norton, Armour.
James P. Turner, Faulkton.
Harold French, Letcher.
Louisa E. Prouty, Pollock.

UTAH.

George A. Murphy, Storrs.

WEST VIRGINIA.

Lairdy B. Legg, Dorothy.

WYOMING.

Nels J. Simpson, Cambria.

WITHDRAWAL.

Executive nomination withdrawn from the Senate May 10, 1922.

COLLECTOR OF INTERNAL REVENUE.

Nat Goldstein, of St. Louis, Mo., to be collector of internal revenue for the first district of Missouri.

HOUSE OF REPRESENTATIVES.

WEDNESDAY, *May 10, 1922.*

The House met at 11 o'clock a. m., and was called to order by the Speaker pro tempore, Mr. WALSH.

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

Almighty God, we give Thee praise and thanksgiving that there is a power in the world that makes for righteousness, justice, and peace. We need instruction, direction, patience, and the spirit of forgiveness. O Thou whose name is love, whose face is light, whose heart is mercy, increase our determination to grow and exercise these graces. Be with us in the inspiration of good thoughts and pure affections, in giving encouragement to every noble impulse, and in relieving us from fear and regret. Teach us to be stronger and larger. Bring in the great day when all our fellow citizens shall face the sunrise with high hope, with sincere purpose, and with a splendid sense of rectitude. In Thy name. Amen.

The Journal of the proceedings of yesterday was read and approved.

LEAVE OF ABSENCE.

Mr. RAKER, by unanimous consent, was granted leave of absence for May 9 and 10 on account of public and official business before the Interstate Commerce Commission on transportation and Nevada-California-Oregon Railway proceedings.

CONFERENCE REPORT—DEPARTMENTS OF STATE, JUSTICE, AND JUDICIARY.

Mr. HUSTED, from the committee of conference, presented a conference report on the bill (H. R. 11065) making appropriations for the Departments of State and Justice and for the judiciary, which was ordered printed under the rule.

CONFERENCE REPORT ON SUNDRY INDEPENDENT EXECUTIVE BUREAUS, BOARDS, ETC.

Mr. WOOD of Indiana, from the committee of conference, presented a conference report on the bill (H. R. 9981) making appropriations for the Executive and for sundry independent executive bureaus, boards, commissions, and offices, which was ordered printed under the rules, as follows:

CONFERENCE REPORT.

The committee of conference on the disagreeing votes of the two Houses on certain amendments of the Senate to the bill (H. R. 9981) making appropriations for the Executive and

for sundry independent executive bureaus, boards, commissions, and offices for the fiscal year ending June 30, 1923, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendment numbered 31.

Amendment numbered 21: That the House recede from its disagreement to the amendment of the Senate numbered 21, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following:

"Salaries: Comptroller General, $10,000; Assistant Comptroller General, $7,500; assistants to Comptroller General—4 at $6,000 each; chief clerk, $3,000; chiefs of divisions—7 at $3,000 each; chief of appointment division, $2,500; assistants to chiefs of divisions—3 at $2,750 each, 4 at $2,500 each; chiefs of sections—10 at $2,500 each, 13 at $2,250 each, 2 at $2,000 each; assistant chiefs of sections—11 at $2,000 each, 1 at $1,900; chiefs of subsections—3 at $2,000 each; disbursing officer, $3,000; deputy disbursing officer, $1,800; private secretary, $1,800; attorneys—1 $5,000, 4 at $4,000 each, 4 at $3,600 each, 1 $3,100; 5 at $3,000 each, 1 $2,750; law clerks—1 $2,500, 4 at $2,400 each, 4 at $2,250 each, 2 at $2,200 each, 9 at $2,000 each, 4 at $1,800 each, 1 $1,600; accountants—1 $2,500, 2 at $2,400 each, 3 at $2,100 each, 3 at $2,000 each; investigators—1 $4,000, 1 $3,000, 20 at $2,000 each; reviewers—8 at $2,100 each; principal clerks—17 at $2,000 each; clerks—164 of class 4, 218 of class 3, 255 of class 2, 267 of class 1, 56 at $1,000 each, 70 at $900 each; check assorters—4 at $1,000 each; duplicating machine operator, $900; carpenter, $1,400; foreman of messengers and laborers, $1,400; chief messenger, $1,000; messengers—1 $1,000, 15 at $840 each; assistant messengers—29 at $720 each; laborers—1 $720, 21 at $660 each; messenger boys—14 at $480 each, 1 $420; forewoman of charwomen, $660; charwomen—22 at $240 each; and temporary clerks, stenographers, typists, and other assistants, to be paid at a rate not exceeding $1,800 per annum, $375,000; in all, $2,293,190.

"Contingent expenses: For traveling expenses, rent, telephone service, purchase and exchange of books, office supplies (including stationery) and equipment, repairs and maintenance, and miscellaneous items, $175,261."

And the Senate agree to the same.

Amendment numbered 35: That the House recede from its disagreement to the amendment of the Senate numbered 35, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following:

"No officer or employee of the United States Shipping Board or the United States Shipping Board Emergency Fleet Corporation shall be paid a salary or compensation at a rate per annum in excess of $11,000 except the following: Six at not to exceed $25,000 each, and two at not to exceed $20,000 each."

And the Senate agree to the same.

WM. R. WOOD,
EDWARD H. WASON,
T. W. HARRISON,
Managers on the part of the House.

F. E. WARREN,
REED SMOOT,
W. L. JONES,
LEE S. OVERMAN,
Managers on the part of the Senate.

STATEMENT.

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on certain amendments of the Senate to the bill (H. R. 9981) making appropriations for the Executive and for sundry independent executive bureaus, boards, commissions, and offices for the fiscal year ending June 30, 1923, and for other purposes, submit the following statement in explanation of the effect of the action agreed upon by the conference committee and submitted in the accompanying conference report:

On No. 21: Appropriates $2,468,451 for the General Accounting Office in the detailed manner proposed by the House instead of $2,496,101 in a lump sum as proposed by the Senate. The detailed salaries proposed in the House bill have been reduced in amounts of individual salaries and in number of salaries in the aggregate of $400,000, of which $375,000 is made available for temporary clerks, stenographers, typists, etc., with a salary limitation of $1,800, and $25,000 is added to the appropriation of $150,261 proposed in the House bill for contingent and miscellaneous expenses. The aggregate proposed in the substitute for the House provision is $150 less than the amount carried and is $27,650 less than the amount proposed by the Senate under the lump sum.

On No. 31: Strikes out the language inserted by the Senate granting authority to the United States Shipping Board to continue to use sums received from the liquidation of assets up to $55,000,000.

On No. 35, relating to salary limitations on Shipping Board and Fleet Corporation funds: Inserts a substitute for the House and Senate provisions, which allows 6 employees at not to exceed $25,000 each, and 2 employees at not to exceed $20,000 each, instead of 13 in excess of $11,000 as proposed by the Senate, and 6 between $11,000 and $25,000 each as proposed by the House.

WM. R. WOOD,
EDWARD H. WASON.
T. W. HARRISON,
Managers on the part of the House.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Craven, its Chief Clerk, announced that the Senate had passed without amendment the bill (H. R. 4069) authorizing the Secretary of the Interior to sell certain lands on the Wind River Reservation, Wyo.

The message also announced that the Senate had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 11065) making appropriations for the Departments of State and Justice and for the Judiciary for the fiscal year ending June 30, 1923, and for other purposes.

CREDIT FOR THE GOVERNMENT OF LIBERIA.

The SPEAKER pro tempore. It being Calendar Wednesday, the Clerk will call the committees.

The CHAIRMAN (when the Committee on Ways and Means was called). Under previous order entered into, House Joint Resolution 270 will be taken up, with general debate to conclude at not later than 4.30 p. m.

Accordingly the House automatically resolved itself into the Committee of the Whole House on the state of the Union for the consideration of House Joint Resolution 270, with Mr. MADDEN in the chair.

The CHAIRMAN. The House is in Committee of the Whole House on the state of the Union for the consideration of House Joint Resolution 270, which the Clerk will report.

The Clerk read as follows:

House Joint Resolution (H. J. Res. 270) authorizing the Secretary of the Treasury to establish a credit with the United States for the Government of Liberia.

Whereas the Republic of Liberia having been established through the efforts of American citizens and having been established under the fostering care of this Government, has at various times sought the aid and counsel of this Government, and following the declaration of war made by this Government against Germany made common cause with the Government and the other allied or associated Governments in its declaration of war against Germany on August 4, 1917.

In consequence of the war the economic situation of Liberia has been imperiled and its Government has made urgent representations to the United States for financial aid and has sent its plenipotentiaries to Washington for the purpose of concluding a loan;

This Government being actuated by feelings of traditional friendship for the Republic of Liberia and solicitous for its well-being and continued independence and for the peaceful development and future advancement of the Negro race: Therefore be it

Resolved, etc., That the Secretary of the Treasury be, and he is hereby, authorized, on behalf of the United States, to establish a credit with the United States for the Government of Liberia, subject to the approval of the President and in conformity with an appropriate arrangement made under his direction for that purpose, in an amount not to exceed the sum of $5,000,000, and to the extent of the credit so established the Secretary of the Treasury is hereby authorized to purchase from that Government its obligations hereinafter issued, bearing such rate or rates of interest, maturing at such date or dates, and containing such terms and conditions as the Secretary may from time to time determine; and a sufficient sum of money is hereby appropriated, out of money not otherwise appropriated, to carry out the purposes of this resolution.

Mr. FORDNEY. Mr. Chairman, this is a very important matter, and I believe we ought to have a quorum present. I make the point of no quorum.

The CHAIRMAN. The Chair will count. [After counting.] It is evident that no quorum is present. The Clerk will call the roll.

The roll was called, and the following Members failed to answer to their names:

Anderson	Brooks, Pa.	Connell	Drane
Anthony	Browne, Wis.	Connolly, Pa.	Dupré
Aswell	Burdick	Cooper, Wis.	Dyer
Atkeson	Burke	Copley	Echols
Beck	Butler	Coughlin	Edmonds
Beedy	Campbell, Pa.	Crago	Ellis
Bell	Cannon	Curry	Faust
Benham	Cantrill	Darrow	Fess
Bixler	Clark, Fla.	Davis, Minn.	Fields
Blanton	Classon	Davis, Tenn.	Fish
Boies	Cockran	Dempsey	Focht
Brand	Codd	Dickinson	Foster
Britten	Collins	Dominick	Frear

Frothingham	Kindred	Newton, Minn.	Smith, Mich.
Funk	Kitchin	Newton, Mo.	Smithwick
Gilbert	Kleczka	O'Brien	Snell
Gorman	Kline, N. Y.	O'Connor	Snyder
Gould	Knight	Oliver	Steenerson
Graham, Ill.	Kreider	Olpp	Stevenson
Graham, Pa.	Kunz	Osborne	Stiness
Green, Iowa	Lanham	Paige	Strong, Pa.
Greene, Mass.	Lankford	Patterson, N. J.	Sullivan
Griest	Lehlbach	Perlman	Sweet
Hardy, Tex.	Little	Porter	Taylor, Ark.
Harrison	Lowrey	Rainey, Ala.	Taylor, Colo.
Haugen	Luhring	Rainey, Ill.	Taylor, Tenn.
Hays	McArthur	Raker	Tilson
Hicks	McFadden	Ransley	Treadway
Hill	McKenzie	Reavis	Walters
Hogan	McLaughlin, Pa.	Reber	Ward, N. Y.
Hudspeth	McPherson	Reed, N. Y.	Ward, N. C.
Hukriede	MacGregor	Riordan	Webster
Humphreys	Maloney	Rodenberg	Wheeler
Ireland	Mann	Rucker	Wingo
Jeffers, Ala.	Mansfield	Ryan	Winslow
Jones, Pa.	Martin	Sabath	Woodyard
Kahn	Mead	Sanders, Ind.	Wurzbach
Kearns	Michaelson	Sanders, N. Y.	
Kelley, Mich.	Montague	Sears	
Kendall	Mott	Shreve	
Kiess	Mudd	Siegel	

Thereupon the committee rose; and the Speaker pro tempore [Mr. WALSH] having resumed the chair, Mr. MADDEN, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee, having under consideration the resolution (H. J. Res. 270) authorizing the Secretary of the Treasury to establish a credit with the United States for the Government of Liberia, and finding itself without a quorum, he had caused the roll to be called, whereupon 266 Members answered to their names, and he submitted a list of the absentees for printing in the RECORD.

The SPEAKER pro tempore. The committee will resume its session.

The committee resumed its session.

The CHAIRMAN. The gentleman from Michigan [Mr. FORDNEY] is recognized.

Mr. FORDNEY. Mr. Chairman and gentlemen of the committee, I realize, to begin with, that there are several gentlemen in the House who are not in favor of the passage of this resolution. The resolution before the House provides for a loan of $5,000,000 to the Government of Liberia. The act under which the loan was agreed to was passed during the war. President Wilson at that time recommended that there be placed to the credit of the Government of Liberia $5,000,000, and that amount was placed to the credit of that Government. A small amount of that money has already been paid to the Government of Liberia, but the reason why the loan was not completed and the money paid over during the last administration is that the conditions under which the loan was to be made, prescribed by our Government, were objected to by the Liberian Government as being too severe. The principal reason why that contract was rejected and why the Liberian Government requested that the contract be modified was that the power was vested in one man. The Liberian Government thought that was too extreme, and asked for a modification of the contract. Much time was consumed in correspondence back and forth, and before the contract was completed the war was over, and consequently the authority for making the loan was also abrogated by the treaty of peace, or the declaration of our President that the war was over.

I would like very much to be permitted to make a continuous statement without interruption if gentlemen will pardon me. When this administration came into power the President of Liberia, together with a commission authorized by the Congress of Liberia, came here, and on the 28th of October last an agreement was reached between the representatives of this Government and the President of Liberia and the commission that he brought with him. The contract was agreed to, subject, of course, to the approval of the Congress of the United States. It has been approved by the Liberian Congress. At that time, I say, the authority to make the loan, vested in our Government, if at all, did not exist any more, because of the conclusion of the war.

Liberia really is a child of the Government of the United States. As far back as 1816 a society was organized in this city known as the Colonization Society, the purpose of which was to find a territory in Africa where free black men and free black women could be sent from this country in order that they might establish a government of their own and be free, because at that time, during the slave days, a free negro in this country suffered more than any other man in the country; he was not wanted anywhere. This Colonization Society was promoted, as I have it, by a religious organization in this country, very meritorious, indeed, and in 1820 a shipload of 88 negroes was sent from this country to Africa, together with a number of white men selected by the Colonization Society. They were financed by that society, and after much difficulty in that country a territory was purchased or title otherwise acquired by this society for those colored people. Other shipments of negroes were then sent from this country to Africa. Nearly all of the white people that accompanied these colored people died over there from fever. It was a very unhealthy country that they first went to. They were shifted about from one place to another until they finally landed where they now are.

Much of the territory acquired at that time by those people has been taken away from them by the English and French Governments. But in 1847 they established a republican form of government. Their capital, Monrovia, was named after one of our great Presidents, President Monroe. At the present time there are about 60,000 civilized people, negroes, in Liberia. There is a total population of 2,000,000 or more. The resources are very great in certain products.

Liberia declared war against Germany in August, 1917. The merchants of Liberia at that time were chiefly Germans. Out of a total of a dozen merchants in Monrovia nine were Germans. The only part that Liberia took in the war was to drive these German merchants from Liberia and turn over her resources to the allied governments. Among those resources was the most important of her products, palm oil, an article very necessary in the manufacture of ammunition. I have here a statement of the resources of Liberia, which I will insert in the RECORD if permission is given me to extend my remarks, and will not take up the time now to read it:

LIBERIA PRODUCTS.

PALM OIL.

Mr. O. W. Barrett, agricultural adviser of Liberia, in his report to the Government estimated that at least 40,000,000 mature oil palms exist to-day in Liberia. The average yield, mature, is around 50 pounds of fruits or nuts. From these 50 pounds gross weight, at least 8 pounds of the palm oil, or as it should be called, tallow, is available by the crude methods of the natives. Besides the tallow there should be about 4 pounds, at least of kernels, if all the nuts are cracked after the pulp has been removed in the oil extracting process. At a fairly low estimate the oil and kernels should be worth at the coast about $1. In other words, the possible output of kernels and tallow from the oil palms of Liberia should be $30,000,000 to $50,000,000 per annum. However, not more than one-fourth or possibly one-third of the total number of trees can be conveniently reached by traders under present conditions. On the other hand, if the palm forests were properly cleaned and thinned, it is quite possible that some $75,000,000 worth of those two tropical products would be available from Liberia, no political factors preventing, by 1930.

MINING.

Gold and diamond mines are believed to exist in Liberia, several gold and one diamond mine being in operation. Sapphires are also found in considerable quantity. (1921.)

Coal, asphalt, and oil-bearing sandstones are found in Liberia.

Enormous quantities of iron ore are found throughout the interior, and it is stated that a certain native tribe has found a way to reduce this ore with charcoal.

Mica of a fair quality was exported at the end of 1920.

Antimony or bismuth is found there also.

RUBBER.

Wild rubber thus far has been the only variety exported, but it is believed that it would be profitable to plant and cultivate rubber trees.

IVORY.

Ivory has always been exported more or less, but no great attention has been given to it.

COFFEE.

A very fine grade of coffee is grown there, and much of it used to be exported, but, owing to the primitive nature of the machinery for its preparation, the industry has declined until just about enough for the use of the natives is grown.

CACAO.

Cacao grows well there and some has been exported.

PRODUCTS.

PIASSAVA PALM.

Piassava, a vegetable fiber taken from a palm tree used for brooms, brushes, and rope. This fiber has been exported heavily for more than 15 years. Wine and sugar can be made from the sap of the piassava palm without endangering the fiber of the leaves at all.

CASSAVA.

Many thousands of acres in the coast belt of Liberia are adapted to cassava cultivation. It would be possible to export several thousand tons of dried cassava roots (from which tapioca is made), crushed flat and partly dried in the sun and finished over artificial heat.

Sugar cane can be grown over large areas of Liberia.

Cotton is raised in the interior of Liberia by the tribes for their own domestic use. A moderate amount of cotton could be grown for export.

MAHOGANY.

The finest mahogany stands in west Africa are in Liberia. Several million dollars worth of mahogany of the finest grade could be exported.

The civilized portion of the population of Liberia live near the coast, not in the interior. They have no railroads; I believe none at all. They have but few roads. They have no means of transportation, of bringing to the coast for shipment abroad much of the natural resources of that country. There are many kinds of oil products from the growths of the forests in

that country that can be greatly developed, and they are very valuable products for use in the world.

I notice that there are heavy importations to the United States of palm oil right now and have been for several months, but upon making inquiry I find that the raw material sent from Africa, and very largely from Liberia, goes to Great Britain, Switzerland, and Italy, and is there refined and shipped to the United States as the products of those countries. But the raw material comes from Africa, as before stated, chiefly from Liberia.

Away back in 1871 the Government of Liberia borrowed $471,000. In 1908 (Mr. Roosevelt being President at that time) a commission was established by our Government in cooperation with the Governments of Great Britain, Germany, and France, to look into the affairs of Liberia and aid her people. But little satisfaction came from the work of that commission at that time. In 1912 a loan was made, and the National City Bank of New York, I believe, was the chief agent in the negotiation of that loan, and the old debt was refunded. The debt of the Government of Liberia to-day amounts, in round figures, to somewhere between $1,500,000 and $1,700,000.

It has been stated that this loan is a scheme on the part of the bankers of the country to get their pay for the old loan. The Secretary of State announced to the committee that there was absolutely no foundation for that statement, that the banks of the country do not own the outstanding obligations of the country of Liberia. These loans are chiefly held in Great Britain, France, and Germany, and the Secretary stated that it was his information that there is but $50,000 of these loans held in this country. The gentleman from New York [Mr. MILLS], a member of the Ways and Means Committee, interrupted the Secretary by saying that his information recently obtained through some bankers in New York was to the effect that there is only $10,000 of all of the outstanding obligations of Liberia owned in this country. My recollection is that all, or practically all, these loans are in the hands of individuals, although I may be in error about that. So that the claim is wholly unfounded, nothing to it whatever. No bankers, no holders of outstanding securities appeared and made any claim in reference to making this loan, so stated by Secretary Hughes.

Now, coming down to the past administration. In 1918, under the war measure under which loans were made by this Government to foreign governments engaged in that great war against Germany, President Wilson authorized and directed that this loan be made to Liberia. The Secretary of the Treasury announced that there had been placed to the credit of the Liberian Government $5,000,000, and the Secretary of State then notified Liberia of that fact, and notified the French and English Governments that the Government of the United States had made that loan and was going to take care of these people in their financial needs. Consequently the negotiations with other Governments were discontinued and the loan looked for here. But when our Government prepared that contract and provided for the repayment to this Government for the loan, Liberia objected on the ground that the conditions set out in the contract were too severe, and the chief reason was that the power was vested by that contract in one man.

Mr. GARRETT of Tennessee. Will the gentleman yield?

Mr. FORDNEY. Briefly, although I would rather continue.

Mr. GARRETT of Tennessee. The gentleman says "power vested in one man"; that does not mean much. What were the terms upon which the loan was to be repaid?

Mr. FORDNEY. Let me say to the gentleman from Tennessee that I have not read that old contract that was rejected. I asked the State Department this morning for the chief reason for the objection on the part of the Liberian Government in that contract, and I have given you the information given me by the State Department. But the gentleman from Wyoming [Mr. MONDELL] visited the State Department this morning and perhaps he can give the gentleman the information asked for. But whatever that may be, it has nothing to do with the matter under consideration at this time, for the reason that the President of Liberia, with a commission authorized by the Congress of Liberia, came here on the 28th day of October last and entered into an agreement with our Government, and in the hearings, page 124, you will find copy of that contract. It is voluminous. I have read it all. There are 48 pages of foolscap typewritten matter.

Mr. GARNER. Will the gentleman yield?

Mr. FORDNEY. I will.

Mr. GARNER. The gentleman states that the reason the money was not delivered to the representatives of the Liberian Government was on account of the contract not being accepted. Does the gentleman know any other Government that joined in the war that received a loan and had to sign a contract?

Mr. FORDNEY. No; the loans were made on the basis of taking their bonds, and this was a contract loan.

Mr. GARNER. Why should you make a contract loan with Liberia and take the bonds of the other countries?

Mr. FORDNEY. Ask your own administration why, because they made the contract.

Mr. GARNER. Is the gentleman supporting the bill for the reason that the administration obligated the Government to make it?

Mr. FORDNEY. I am supporting the loan because the Democratic administration obligated the Government and placed a moral obligation on this administration.

Mr. GARNER. Is that the only reason?

Mr. FORDNEY. That is one reason, and I will give you the other reasons that Secretary Hughes gave you if you will give me time. He settled you when you asked him that question in committee. [Laughter.] A receivership is created by the contract by which the President of the United States is to appoint a commission to go to Liberia, subject to the approval of the President of Liberia. Their expenses are to be paid by Liberia; all expense of the transmission of the money to and from Liberia to this country is to be paid by the Liberian Government as set out in the contract. All the expenses connected with the loan are to be paid by the Liberian Government. I say they agreed to it, and the safeguards are thrown around the loan in this way: That this commission of American citizens, paid by the Government of Liberia, are to have absolute control over the expenditure of money, over the receipts of the Government of Liberia; and the amount to be spent by the Liberian Government annually is set out in the contract under full control of the commission. Beyond these sums the Government of Liberia can not go, except, of course, subject to the approval of the commission.

Gentlemen, the loan was authorized to be made, the loan was placed to their credit, they were notified of it, and other governments to which Liberia would have gone for money—and obtained it undoubtedly—were requested to stay out of the deal and we would make the loan. On the strength of that promise Liberia proceeded to declare war against Germany; she did turn over her resources to the Allies, did drive from Liberia the German merchants, did take over the German property, did perform her duty as far as she could in good faith, and in order that the Government of the United States may carry out its part, which it is in honor bound to do by the acts of our Government during the past administration, and thus keep faith with the world—not only with Liberia, but all the principal governments of this earth—to show that we are honorable people; that this Government proposes to do what it agreed to do, we are carrying out this contract.

Mr. GARRETT of Tennessee. Mr. Chairman, will the gentleman yield?

Mr. FORDNEY. Yes.

Mr. GARRETT of Tennessee. The gentleman suggests that he is carrying out the policy of the last administration. So far as I read from the report in the hearings on the Liberian loan question, certain conditions were made by the last administration as to the acceptance of that loan by the Liberian Government, and the Liberian Government declined to accede to the terms which the last administration laid down. The gentleman stated earlier in his remarks that this was a contract. It seems to me that if they failed to sign the contract and meet our stipulations the contract could not have been completed. If the gentleman will permit, I wish him to understand that he is not going to be able to unload the burden which has been imposed upon him by referring to the Democratic administration, which negotiated a loan that Liberia never accepted.

Mr. FORDNEY. Those negotiations were never concluded, and have not been yet, because of the fact——

Mr. GARRETT of Tennessee. Then we would better save this $5,000,000 now.

Mr. FORDNEY. Oh, the gentleman made quite a speech, and he ought now to let me reply to him. The negotiations that were carried on never abrogated that agreement. Secretary Hughes said that we were operating under a treaty that has never yet been concluded. I do not doubt his word. He is a good lawyer. I am not, and I take his word for it.

Mr. MILLS. Mr. Chairman, will the gentleman yield?

Mr. FORDNEY. Yes.

Mr. MILLS. Is it not true that when this administration assumed control of the Government it found awaiting it in Washington a mission from Liberia, invited here to continue negotiations which the gentleman from Tennessee [Mr. GARRETT] claims had been rejected and concluded?

Mr. FORDNEY. Yes; that is true. The President of Liberia and his commission came here, and they were here, I think, just

before President Harding was inaugurated, or about that time, at least. The President of Liberia said that he was on the way here to meet our President—not a school-teacher. I am speaking of a real President.

Mr. MILLS. It is a fact that that mission was here at the request of the Wilson administration.

Mr. FORDNEY. Yes; at the request of the past administration. Let me read to you what President Hughes said in answer to a question asked by the gentleman from Texas.

Mr. LAYTON. Secretary Hughes.

Mr. FORDNEY. Yes; Secretary Hughes. He ought to have been President. [Applause.]

Mr. OLDFIELD. Does the gentleman mean now?

Mr. FORDNEY. Oh, no. We have a high-grade man for President now, although we had an excuse for four years before Mr. Harding took office. We ought to have had a man in the chair, and if I had had my way about it we would have had. I never thought a school-teacher was very much of a man out of his line, especially as a political dictator. Let me read you the colloquy that occurred between the gentleman from Texas [Mr. GARNER] and Secretary Hughes.

Mr. GARNER. Yes, Mr. Secretary. Do you consider the correspondence in your office in the matter of making loans to foreign governments a moral obligation on the part of Congress?

Secretary HUGHES. I consider the direction of the President of the United States and the act of the Secretary of the Treasury authorizing the Secretary of State to inform foreign governments of the opening of the credit, and the action in reliance upon that, created the highest possible moral obligation, certainly when that action was taken under an act of Congress which had given that authority.

Mr. GARNER. In other words, if your office should negotiate with foreign governments with reference to a loan to any particular government, you would consider that a moral obligation on the part of Congress to appropriate the money?

Secretary HUGHES. That is as far from what I said as the east is from the west. I said nothing which would permit of such an inference, with all deference. I was considering a case where the President had acted under the authority of Congress, believing undoubtedly he had authority to act, authority couched in general terms; and I think that he certainly felt that he was basing his judgment upon the fact that the action was needed; and, after the Secretary of the Treasury had also acted under that authority, under the same authority of Congress, and the Secretary of State had communicated this to foreign governments, this action authorized by our own legislation in time of war created a moral obligation to make the promise good.

Mr. GARRETT of Tennessee. Mr. Chairman, will the gentleman yield?

Mr. FORDNEY. Yes.

Mr. GARRETT of Tennessee. Is that the only ground——

Mr. FORDNEY. Oh, bless your soul, I have 49 grounds. Does the gentleman want to know all of them? I have given him one. Let him wait a minute and I will give him the other 48.

Mr. GARNER. Will the gentleman yield to me for a question?

Mr. FORDNEY. Yes.

Mr. GARNER. Does the gentleman from Michigan believe that President Wilson had the right under the second Liberty loan act to grant money to Liberia to pay its debts contracted 40 years ago or to develop the country 15 years after the war?

Mr. FORDNEY. That is not the question.

Mr. GARNER. That is what he did, and I am asking the gentleman if he believes he had authority under that act to do it?

Mr. FORDNEY. That is not the question, but here is what was done. Whether he had authority to do that under the act, he did do it. Whether he had authority, there is a difference of opinion. I am not a lawyer and I would rather leave that to the gentleman and some good fellow on this side to advise him in the matter than to take my own judgment. Whether the President had authority or not under that act of Congress, in round numbers ten and a half billion dollars were loaned by the Democratic administration, and we have not received a cent of it back yet. I am not criticizing the President for making these loans. I think he was justified under the circumstances. We were in the midst of a great war, we did not know just what way we were going to land, we were anxious to do everything in our power to win the war, and we did it. We spent money like drunken sailors, but I felt the more money we spent the less human life would be sacrificed among our boys. [Applause.]

Mr. GARNER. Mr. Chairman, will the gentleman yield?

Mr. FORDNEY. In just a minute. The loan was made. The loan was authorized to be made to Liberia, and Liberia has an outstanding obligation of about $1,500,000 or $1,700,000, all of which is a first lien upon the revenues of Liberia, a first mortgage, and the only way that we can get a first mortgage on Liberia by making this loan is to discharge the present first mortgage which is outstanding against her revenues, and a portion of this money is to be used for that purpose, and then we will have a first mortgage on Liberia and all of her revenues and our men will be there according to the contract to see that that contract is carried out. I yield to the gentleman.

Mr. GARNER. If the gentleman can not get a first mortgage on the receipts of Liberia, would he be willing to make the loan anyway?

Mr. FORDNEY. I do not know what I might do if the conditions were different. I am talking about existing conditions. Now, my friends, Michigan is a great State.

Mr. CLARKE of New York. Next to New York.

Mr. FORDNEY. Yes; New York is a great State. We have many great States.

Why I made that remark is this. We have in round numbers 59,000 square miles of territory in the State of Michigan. We have 3,600,000 people there—good citizens, 80 per cent Republicans [laughter]. The State of Michigan has 59,000 square miles of territory, in round numbers. Liberia has 40,000 square miles of territory; and I believe the people of Liberia about equal the population of the city in which I live, a little better than 60,000, but you must remember that 88 negroes started and established that Government by the support of the people of the United States. I have in my possession a letter received only three days ago from a gentleman in New York now representing the Colonization Society in which he states that they have in their treasury $140,000 now which is used to maintain a school in Liberia.

They are above the intelligence of the other colored people of the world because of their better education. We have a young man right downstairs in the lunch room from Liberia, born in Liberia, who is here studying law and working in the restaurant of this House to pay his way through college. They are trying to make of themselves good citizens, intelligent and educated as they are. They are entitled to our protection, and by making this loan we will aid them and put them on their feet to build better roads, establish more and better schools, and establish industries through which their people can receive employment and go to commercial wealth as the people of the United States have done. If they could only get further inland, if they had means of transportation, their greater agricultural and natural resources could be developed and brought to the market, and the balance of this money, after discharging their obligations outstanding and other propositions provided for in the contract, the money is to be used for the very purpose of building roads, and so forth. We are morally bound, gentlemen, and we will be disgraced in the eyes of the world if we do not carry out that moral obligation to make this loan. I was one of those when this matter was first presented who did not believe in it. I knew nothing about the loan, but when I heard the statement made by the Secretary of State, who is familiar with all the conditions which led up to this loan at that time, I became a convert, and I am strongly in favor of the passage of this legislation and making this loan.

Mr. GARRETT of Tennessee. Will the gentleman yield?

Mr. FORDNEY. I will yield.

Mr. GARRETT of Tennessee. The gentleman has compared Michigan and Liberia as to the products of the two countries——

Mr. FORDNEY. In square miles of territory.

Mr. GARRETT of Tennessee. In square miles and products of the two countries.

Mr. FORDNEY. No; I did not.

Mr. GARRETT of Tennessee. Well, I just wanted——

Mr. FORDNEY. I only compared the two countries to show the extent of Liberia's territory. Do not try to switch me off on a sidetrack; I am not running on a gravel train.

Mr. GARRETT of Tennessee. I just want to ask the gentleman here in this blooming season, what is the prospect in Michigan for the berry crop?

Mr. FORDNEY. For the berry crop? What kind of berries does the gentleman refer to, blackberries or blueberries? If it is huckleberries, huckleberry Republicans gave Warren G. Harding 529,000 majority two years ago. [Applause.]

Mr. OLDFIELD. If the gentleman will permit, was the gentleman serious when he said 80 per cent of the people of Michigan are Democrats now?

Mr. FORDNEY. I corrected that mistake. The gentleman would not accuse me of making that mistake without correcting it.

Mr. LOWREY. Have you any school-teachers up there?

Mr. FORDNEY. None who have received their education in Virginia. [Applause.]

Mr. LOWREY. The gentleman says that a school-teacher is not much of a man outside of his own job. Now, Doctor FESS——

Mr. FORDNEY. Not unless he has considerable training in some other line. Take him direct from school to the White House and he is a glorious misfit. [Laughter.] As a political boss he worked well for awhile, but he finally overstepped himself and——

Mr. LOWREY. I am not talking about a specialist, but I understand that in the gentleman's State a school-teacher is not much of a man.

Mr. FORDNEY. Let me say in this connection, that in 1920 I made the statement that the then President was going to change his boarding house on the 4th day of March, 1921, and he did. [Laughter and applause.]

Will the gentleman from Texas use some time now?

Mr. FORDNEY. Mr. Chairman, I yield 15 minutes to the gentleman from New York [Mr. MILLS].

Mr. MILLS. Mr. Chairman and gentlemen of the committee, the gentleman from Texas [Mr. GARNER] has done me entirely too much honor in suggesting I had anything to do with the drafting or the fathering of this legislation, but when he charges I am representing those who are asking for the passage of the legislation he is entirely correct, and I am proud of the fact that in advocating the passage of this measure I am representing the wishes of the President of the United States and the Secretary of State, who say that the honor of the country is involved. [Applause.] Now, my friend from Texas has talked about Democratic solidarity in opposition, and has suggested that international bankers are back of this bill without, however, submitting any evidence. I wonder whether the real secret of this Democratic opposition will not be found in the same considerations which influenced the prior action of this Government in delaying recognition of Liberia some 50 years ago. Now, as to this international bankers proposition: Whenever some measure comes up in respect of which, by some stretch of imagination the international banker, so called, may be dragged in, he is dragged in for political purposes and as a substitute for argument. What are the facts with reference to these bankers? In 1911 or 1912 the German bankers, English bankers, and French bankers proposed to make a loan to Liberia, and our country, because of its historic interest in Liberia, suggested through the State Department that American bankers participate. They did participate in the underwriting. You could not float Liberian bonds upon the American market, and so they were offered on the London market, and with the exception of, I think, some $166,000 the entire bond issue was sold to private individuals.

Mr. GARNER. If the gentleman will yield, I was wondering why the London bankers did not underwrite what they were going to sell to the English people.

Mr. MILLS. The gentleman knows that in international loans of this character governments are interested. France would have objected to England going in alone, Germany and the Dutch would have objected to an exclusive British and French loan, and finally our Government objected to these other Governments going in without participation by the American banks——

Mr. GARNER. And we took over the whole job.

Mr. MILLS. No; it is not so. We did not. The fact is there were four American banks participating in the underwriting. Their share of the unsold balance was $10,000, or $2,500 apiece; and yet the gentleman speaks of this bill as one to reimburse the international bankers. He said that without one bit of proof in the record. In saying so he has, of course, a perfect right to challenge the statement which I made on the basis of private investigations, but I wonder whether he has the right to question the word of the Secretary of State, who appeared before our committee and testified as follows:

> Now as to the loan plan: I notice in the hearing that there was some discussion about—at least it seems to breathe through the pores of the record—that there was some idea that the bankers were back of this, as somebody wanted to get their bonds paid off. There is absolutely nothing in that. I have not had a communication in the last year, since I have been dealing with this matter, from a banker or from anyone interested in bonds.

That is the statement of Secretary Hughes, whose integrity I should think was beyond question. He says—and this is a matter of such common sense I do not see why the gentleman from Texas has not grasped it—that if the United States is to make a loan to Liberia it is perfectly obvious we must protect that loan, but we can not protect it if there is a prior mortgage outstanding. So that all the Government proposes to do is what any business man would propose to do under the circumstances, buy up the prior obligation and then become a preferred creditor with a first mortgage on all the revenues of Liberia. The purpose of paying the loan is not to reimburse the bondholders, but to protect us. [Applause.] Now, what is the basis of this whole proposition?

Mr. GARRETT of Tennessee. Will the gentleman yield?

Mr. MILLS. After I get through, if the gentleman will kindly permit.

Mr. GARRETT of Tennessee. That will be tolerably late.

Mr. MILLS. One of the reasons back of this measure is that the word of the United States Government is pledged. The gentleman from Texas [Mr. GARNER] says the word of this Government is not pledged, because the President, Mr. Wilson, did not have the legal authority to make the loan. As far as I am concerned, I say there is no question but that he did have the legal authority to make the loan, because Congress granted him the discretion to make any loan which he deemed necessary for the furtherance of the war, and it could well be argued that Liberia's entrance into the war and the assistance which might arise from her interruption of trade relations with Germany would further the prosecution of the war. Further than that, we left it to the President of the United States to decide what would further the prosecution of the war, and when he exercised that discretion, acting in good faith, he acted within the terms of that law. Whether he did or not, he had color of authority. In so far as he dealt with third parties, acting under color of authority granted him by Congress, and these third parties believed him and relying on his word changed their position, I say we as principals are bound by the pledge which he gave. And the whole argument of the gentleman from Texas, stripped of the fallacies and misstatements, is an argument in favor of the United States and of the people of this country repudiating the solemn word given by a President of the United States acting under authority granted him by Congress. [Applause.] The Democratic side of the House seems to want to make us a nation of welshers on some miserable, technical, legal point. If it was fifty times $5,000,000 and there was no security, but the President of the United States, acting under the authority of the Congress of the United States, had given his word, no matter to how poor a country and no matter how insignificant a country, I should vote to keep that word. [Applause.] There is no question about our word being given. What are the facts?

In September, 1918, we definitely stated that the credit was granted. We wired that to Liberia. We began negotiating agreements at once, not only with Liberia but with France and Great Britain, always on the assumption that the loan would be made. Secretary Lansing stated—and I want you gentlemen to listen to this statement, because this is a statement not of a Republican Secretary of State but of a Democratic Secretary of State. He said:

> I at once entered into diplomatic correspondence with the British and French Governments in an endeavor to secure their withdrawal from the international receivership. These negotiations, extending over a period of a year, have only just terminated. During their course I repeatedly based my representations for the withdrawal of the British and French receivers on the condition of an American program of financial and economic rehabilitation of Liberia. I at the same time made unreserved assurances to the Liberian Government respecting the carrying out of the economic program and even took preliminary steps looking to that end. As a result, this Government stands before the world completely committed, and committed for over a year past, to a program of economic as well as financial rehabilitation of Liberia.

That is Mr. Lansing's statement. He and Mr. Wilson definitely stated that we stood not only committed toward Liberia but committed before the whole world. And yet the leaders of one of the great parties in this country ask this House to repudiate that act. [Applause.]

What happened subsequently to that, gentlemen? Negotiations were continued, and finally, in April of 1920, our program and definite plan was submitted to Liberia. The gentlemen of the minority then make their second point: That whatever obligation existed then came to an end, because Liberia rejected our plan. This is not the fact. Liberia never rejected our plan. They suggested modifications to it. There never was a rejection. Negotiations never ceased for one minute. But as they found it difficult to come to an agreement as to details at such a long distance, the Liberians suggested, in the fall of 1920, that they would send a commission, and the then Acting Secretary of State, Mr. Davis, cabled:

> Send a commission, but send it with full authority.

Acting on his suggestions, the Liberians sent such a commission, and when the Harding administration came into power they found waiting in the city of Washington a Liberian commission prepared to complete the negotiations entered into by the preceding administration.

Mr. COOPER of Wisconsin. Will the gentleman yield?

Mr. MILLS. I can not yield just now.

The Harding administration, recognizing the obligation, then undertook the negotiations. They resulted in the final agreement signed in October, 1921. But in the meanwhile, gentlemen, the peace resolution had been adopted. By the terms of the second Liberty loan act, under which this loan with Liberia was negotiated, the authority to make loans expired when peace was declared. Therefore the legal authority had disappeared, but the moral obligation remained.

Recognizing the situation, the President of the United States and the Secretary of State, in order to live up to a moral commitment, came to this Congress for a renewal of the legal authority, and that is why this bill is before you. They did not come here asking, as has been suggested by the gentleman from Texas, to give them an unlimited power to negotiate such a loan—though I for one would be perfectly willing to trust the President and the Secretary of State—but they submitted to Congress an agreement drafted with such completeness and in such detail as to protect every interest of the United States from every possible point of view. I will ask any business man in this House to read the agreement with the Government of Liberia, and I think you will admit it is one of the most carefully prepared of business documents, looking to the protection of the interests of the United States. In any event, it is perfectly sure that the President and the Secretary of State have not come here and asked for unlimited power of attorney. They have submitted to you the actual agreement which has been signed and which, if the signature means anything, binds this Government and the Government of Liberia. I have no sympathy with the suggestion of the gentleman from Texas [Mr. GARNER] that that agreement means nothing and that if we grant the authority they will negotiate another agreement. I believe we are dealing with honorable men. I believe the signature of the Secretary of State of the United States is binding, and I for one will never question it.

Mr. GARNER. Will the gentleman yield?

Mr. MILLS. Yes.

Mr. GARNER. Why do you have in your bill a provision saying it may be changed later on?

Mr. MILLS. To what provision does the gentleman refer?

Mr. GARNER. That is, that arrangements can be made now or later, at a different time and under different conditions?

Mr. FORDNEY. Only in form of denomination. That is what it provides for, and nothing else.

Mr. HUSTED. Will the gentleman from New York yield?

Mr. MILLS. I will.

Mr. HUSTED. Pending the loan originally made at the request of Liberia, did Liberia do anything to aid the war as a consideration for receiving the loan?

Mr. MILLS. It appears that Liberia entered the war after we did, in 1917, and certainly after consultation with this Government, though it does not appear that they entered the war at our request.

Mr. COOPER of Wisconsin. Will the gentleman answer one question?

Mr. MILLS. I am just answering the question of the gentleman from New York.

The CHAIRMAN. The time of the gentleman from New York has expired.

Mr. FORDNEY. Does the gentleman wish more time?

Mr. MILLS. Just enough to answer the question.

Mr. FORDNEY. I yield three minutes more to the gentleman.

Mr. COOPER of Wisconsin. Will the gentleman answer a question?

Mr. MILLS. I first want to answer the gentleman from New York [Mr. HUSTED].

As a result of their entrance into the war after we had they found themselves in such financial difficulties that they did not know where to turn. Their principal revenues were cut off. The Germans controlled to a great extent the business interests of the country, and the Germans had been driven out. In September, 1918, the President cabled that the loan had been granted. There is not the slightest question in my mind on the record, that if they had not had that absolute assurance, which has never been questioned until the bill came before Congress, Liberia in the course of the last four years would have unquestionably gone to some other country to receive assistance and would have received it. But she placed reliance in our word, and if we now break it we will have done irretrievable damage to a small and friendly nation that for over 100 years has come to look to us for advice and protection.

Now I yield to the gentleman from Wisconsin [Mr. COOPER].

Mr. COOPER of Wisconsin. I wanted to inquire if I understood the gentleman from New York correctly. Did the gentleman say that the commission that came here to negotiate with President Harding came over at the invitation of the former administration?

Mr. MILLS. I do. The record will show that.

Mr. COOPER of Wisconsin. That is a very important statement.

Mr. KLINE of Pennsylvania. Mr. Chairman, will the gentleman yield for a word or two?

Mr. MILLS. Yes.

Mr. KLINE of Pennsylvania. Was not one chief object—and, perhaps, the great object—the fact that in that war we could not obtain palm oil for use in the manufacture of munitions?

Mr. MILLS. That was the statement of the Secretary of State before the Committee on Ways and Means.

Mr. Chairman, I yield back the balance of my time. [Applause.]

Mr. GARNER. Mr. Chairman, I yield 20 minutes to the gentleman from Georgia [Mr. CRISP].

The CHAIRMAN. The gentleman from Georgia is recognized for 20 minutes.

Mr. CRISP. Mr. Chairman, I ask leave to revise and extend my remarks.

The CHAIRMAN. The gentleman from Georgia asks unanimous consent to revise and extend his remarks. Is there objection?

There was no objection.

Mr. CRISP. Mr. Chairman and gentlemen, I am going to discuss this proposition with you in a dispassionate way. I am not going to discuss it as a political question, because I do not believe there is any partisan politics involved in it. The last Democratic administration and this present Republican administration are equally involved and equally insistent upon this loan being made.

Now, while I am a Democrat, I am an American first [applause], and when I believe that the fundamental rights of the American people are involved, when your rights as Representatives of a great people are involved, I am going, so far as I am concerned, to consider those rights paramount and follow them rather than any political party. [Applause.]

Now, gentlemen, the last administration, on September 12, 1918, just two months before the armistice, set apart this credit for Liberia of $5,000,000, but stated that it was not available to be drawn on and could not be drawn on until the terms of a contract between the United States and Liberia were agreed on. No contract for a loan based on this credit was ever completed, and that credit, of November 8, 1921, after this agreement of October 28, 1921, was made that you are now asked to ratify, was withdrawn, as will be seen from the following letter of the State Department:

COPY OF LETTER, DATED NOVEMBER 8, 1921, FROM ASSISTANT SECRETARY OF STATE DEARING TO PRESIDENT KING.

NOVEMBER 8, 1921.

MY DEAR MR. PRESIDENT: In view of the execution of the financial agreement on October 28, 1921, in terms of a proposed new credit of $5,000,000, subject to appropriate action of Congress, I have the honor to inform you, in keeping with previous verbal expressions of the Department of State, that the balance of the credit established in favor of Liberia with the United States Treasury, September 12, 1918, but not deemed available, has therefore been withdrawn.

I am, my dear Mr. President,

Sincerely yours, F. M. DEARING.

Hon. C. D. B. KING,
President of Liberia.

Mr. TEMPLE. Mr. Chairman, will the gentleman yield?

Mr. CRISP. Yes.

Mr. TEMPLE. Was any part of it ever drawn by the Liberian Government?

Mr. CRISP. There is nothing in the record to show, except $26,000 was turned over to Liberia to pay the expenses of her delegates to the peace conference at Paris.

Mr. TEMPLE. Out of this loan?

Mr. CRISP. I do not know. The record does not show.

Mr. TEMPLE. The statement of the Secretary of the Treasury is to this effect.

Mr. CRISP. If so, why are they asking for the full $5,000,000? If this $26,000 was withdrawn, why is not the administration asking for $4,974,000 instead of $5,000,000, if the State Department is urging us to authorize this loan based on the credit of September 12, 1918? The letter of the State Department just quoted shows we are asked to make this loan not on the old credit but on "a proposed new credit of $5,000,000, subject to appropriate action of Congress."

Now, gentlemen, it is conceded that there is now no legal authority for the United States to make this loan. Gentlemen contend that we are morally obligated to make it, and the record will show that they base it on three contentions. One of them is, they say, that the United States is historically interested in Liberia because some negroes from the United States first went there and settled it. Then they say we are obligated because of business relations and business reasons; and then, thirdly, they say we are obligated because President Wilson set apart this credit.

Now, gentlemen, the Government of the United States had nothing in the world to do with this colonization of Liberia or those people going there, and so no intelligent man can contend

that the United States is obligated to make this loan on account of that colonization scheme started in 1821, over 100 years ago.

Now, as to the business proposition, notwithstanding our historical interest and the so-called friendship existing between Liberia and the United States, the record shows that 85 per cent of the commerce of Liberia was with Germany; the other 15 per cent is with other countries than America, and the record does not show where we have even 1 per cent of the business of Liberia. So that contention must fall.

Then the next and only remaining proposition is: Is this Government morally obligated because of this credit? Now, I believe that every honest man must keep every moral and every legal obligation, and I believe every government must act likewise; and if I believed the United States was morally committed to make this loan I would vote for it. But I do not believe it, and I do not believe you will believe it if you will listen to the argument and read the record. Gentlemen, I only wish I had the time to go into it with you in detail.

Mr. LONGWORTH. Mr. Chairman, will the gentleman yield?

Mr. CRISP. I will yield this time, and after that I will not yield any more until I have concluded what I have to say, and then I will try to answer and questions.

Mr. LONGWORTH. Will the gentleman join with his colleague from Texas [Mr. GARNER] in the statement that there was no moral obligation unless President Wilson had the legal right?

Mr. CRISP. I do, and I am proceeding now to discuss that proposition.

Mr. LONGWORTH. And the gentleman will claim that President Wilson acted beyond the law?

Mr. CRISP. Unquestionably, and I think the gentleman from Ohio thinks so too, and I do not think the gentleman from Ohio or any other Member of this House will get up here and say that the President or any other official of the United States, acting beyond his authority or without its authority, can commit Congress to tax the people of the United States to make foreign loans. [Applause.] I do not, and I do not believe any of you do.

Now, what are the facts as to how this credit was set apart? I am going to discuss whether they had legal authority to make that credit, not for the purpose of showing that it is now illegal and not a binding obligation of the United States, because no one now contends that there is any legal obligation under the credit to make this loan, but for the purpose of showing that there was no legal authority at the time it was made; to show that there is no moral obligation following that act. If there was no authority to make the credit when it was made, surely no moral obligation can arise from it.

Mr. LONGWORTH. Mr. Chairman, will the gentleman yield again?

Mr. CRISP. I must decline.

The CHAIRMAN. The gentleman declines to yield.

Mr. CRISP. I have the greatest respect for the ability of the gentleman from New York [Mr. MILLS], but the gentleman from New York was not fair, and he attempted to evade and did not answer the question of his colleague, the gentleman from New York [Mr. HUSTED]. Mr. HUSTED asked the gentleman from New York [Mr. MILLS] if Liberia made any request for this loan. I am convinced the gentleman from New York [Mr. MILLS] knew Liberia requested this loan, but he did not give a frank answer to his colleague. Liberia asked for it, and not for the purpose of prosecuting the war, but Liberia asked for it because she said, "We are broke; we need help; we need money," and she appealed to the United States on account of the friendship existing between Liberia and the United States to lend her $5,000,000 to pay up their past indebtedness, their national bonded and floating indebtedness, amounting to $2,100,000, and the other for the purpose of organizing an army, putting in a sewerage system, extending schools, and building a railroad and good roads.

I do not ask you to take my statement as to that. If you will turn to page 112 of the hearings you will read a letter, dated January 11, 1918, from the secretary of state of Liberia to the American representative, as follows:

COPY OF LETTER, DATED JANUARY 11, 1918, FROM SECRETARY OF STATE OF LIBERIA TO AMERICAN CHARGÉ D'AFFAIRES, MONROVIA.

The AMERICAN CHARGÉ D'AFFAIRES AD INTERIM,
United States Legation, Monrovia.

MR. CHARGÉ D'AFFAIRES: I have the honor, by direction of the President, to forward you, for transmission to your Government, the inclosed memorandum on the financial situation of Liberia submitted to his excellency by the honorable secretary of the treasury.

The financial dangers at present threatening the Republic, as foreshadowed in the inclosed memorandum, are, in the opinion of the President, so imminent as to warrant his excellency's firm conviction that a strong and candid appeal should be immediately made to the Government of the United States to come to the relief of the Republic without delay by:

1. A loan of not less than $5,000,000 to enable the Republic to cancel the refunding loan of 1912 and to establish a receivership under American control alone; to take up our internal floating indebtedness; to stimulate education, agriculture, and industry, and to inaugurate such public works as will operate for the complete financial and economic rehabilitation of the country.

2. By the loan of additional American agents to assist the Government in perfecting its desires and plans for effective administration and control, both in the several departments of government and in the administration of our hinterland.

To this end, therefore, does the President desire this memorandum to be laid before the Government of the United States through your legation. Knowing as he does your warm interest and concern in the welfare and prosperity of Liberia, his excellency feels justified in relying upon your support and indorsement of this appeal now being made to your Government.

With assurances of my continued respect and high esteem, I have the honor to subscribe myself, Mr. Chargé d'Affaires,

Your humble and most obedient servant,

C. D. B. KING,
Secretary of State.

Now, gentlemen, do not you think that the gentleman from New York [Mr. MILLS] knew of that letter, and if so, did he deal frankly with you, did he lay his cards before you on the table? The Liberty loan act provided that the President could extend credit to our allies for the purpose of aiding in the prosecution of the war. Congress knew that it took money to prosecute a war. After we entered the war it was to our interest that the Allies should maintain their armies, that they should be fully supplied with money for war purposes, with food and clothing, because if they fell out we would have to send more soldiers; therefore Congress preferred to let them have money rather than to have to send greater numbers of our soldiers overseas to the fighting front, so it authorized loans to these countries for the purpose of aiding in the prosecution of the war. Congress did not have it in mind to make credit to any country except those actively fighting with us, and to them only for strictly war purposes and not for their rehabilitation and internal development. The record will show that when the proposition to make Liberia a loan came up before the Treasury Department that department doubted its authority to make a credit to Liberia under the Liberty loan act, and they were proceeding to ask the Attorney General for a legal opinion when President Wilson said that he approved of the loan, and so the credit was given, but it was expressly stated it was not to be available until a contract between the two parties regarding same was entered into. No contract based on this credit has been made up to this good hour.

You have heard it said that Liberia declared war and joined the Allies. Liberia did, but Liberia did it for Liberia's good and not for the United States. The record of this case shows that the English and allied navies had practically driven commerce off the sea that went to Liberia, and Liberia's trade was at a standstill. No ships went into her ports; they could not ship goods out or receive supplies essential for her people. The United States Government, desiring to aid and befriend Liberia, told Liberia if she would join the Allies and exclude Germans from her territory, this Government would take up with Great Britain the question as to whether she would let the Liberian commerce flow without restriction. Liberia consented to this, and our Government took up the question with our allies. Great Britain and France agreed to the request of the United States. Liberia declared war, excluded the few Germans that were there, and thereafter ships went into her ports and what little trade she had was resumed.

Liberia is a small negro Republic situated in Africa, with a population of between forty and fifty thousand semicivilized and 2,000,000 uncivilized negroes, many of the latter still living in the wilds of Africa in a tribal state. Her commerce consists of bartering in palm oil, dates, spices, and things of kindred nature.

She has neither army nor navy and contributed not a man, not an ounce of ammunition, to the prosecution of the war. Under these circumstances, is there a man who in his heart of hearts believes that the credit of $5,000,000 was a legal commitment, that the President of the United States had authority to make it, or that we are morally obligated to make this loan? I know what your answer is in your heart, but I do not know how you will vote.

Now, gentlemen, I have the greatest admiration for Secretary of State Hughes. He is one of the great men of the world, and it is owing to his pleasing personality and his ability that this resolution is to-day before you for consideration. This matter was before the Committee on Ways and Means for weeks. We had the Assistant Secretary of State, Mr. Dearing, and Mr. McBride before us. They had urged it, but I do not believe there were four members of the committee in favor of it. President Harding was urging the loan. So political circumstances became such that our chairman sent out an S O S call for the Secretary of State, and he appeared before us. He adduced no new facts.

He added nothing to the evidence in the case, but by his charming personality, his great ability, he swept a majority of my Republican colleagues off their feet; they went back on their judgment, went back on the views they had before expressed, and they voted to report favorably this resolution authorizing the loan. I want to say that all of them did not; some of them after the appearance of the Secretary of State still opposed it.

Now, gentlemen, do you believe if the President or any other official of this Government, acting beyond the authority vested in him, by diplomatic correspondence agrees to make a loan to some other country that we, as Congressmen, are mere automatons, rubber stamps, and must bow the knee and vote to tax our people to raise funds to carry out that agreement? I do not. That is involved in this question. Are you willing to establish such an unsound precedent? I am not, because there is this principle involved in it—representative government is at stake.

If you abrogate your right to control the money wrung from the already overburdened taxpayers and let some executive commit you to how it shall be used or appropriated, then our Government is a failure. [Applause.] That issue is at stake here.

The gentleman from Michigan, my good friend Mr. FORDNEY, recognizing the desperateness of his case, harps a great deal on the fact that the Democrats did it. "The Democrats started it." I am a Democrat, but no Democratic administration can bind me to do something that I do not believe is legal and right. Will you let an administration, Republican or Democratic, bind you to do it? [Applause.] If you do by making this loan, I want to know if you are going to carry the thing to its logical conclusion. Before the armistice this Government set apart about $8,000,000,000 to our allies, those actively engaged in war, the money being spent in the United States for war materials and supplies. After the armistice the Democratic Secretary of the Treasury, Mr. McAdoo, being of the opinion he had no longer legal authority to make foreign loans, came before the Committee on Ways and Means and requested legislation conferring upon him such authority. I quote from page 5 of Senate Executive Document 86, Sixty-seventh Congress:

Secretary McAdoo appeared before the House Committee on Ways and Means on December 12, 1918, and asked for legislation to extend his authority to make foreign loans. He stated in part:

"It seems to me the part of prudence and wisdom, as well as enlightened self-interest, to make the balance of the existing appropriation for the purchase of obligations of foreign governments available for advances for purposes growing out of war needs.

"The purposes to which I particularly refer, as growing out of the war situation, and which I had in mind in making this recommendation, are the supplying of foodstuffs and materials for such time and to such extent as may be necessary *to tide allied countries over until they are able to resume the purchase of food supplies through the ordinary channels, to aid in the reconstruction of the devastated areas of Belgium, Northern France, Italy, and elsewhere, generally to assist in restoring the economic life of those allied countries most seriously affected by the war.*

"It is impossible to determine the amount of the aid which it may be desired to give until both the extent of their requirements and the extent to which the countries themselves can be financed in other ways have been investigated. I do not recommend that one and a half billion dollars be placed at the disposal of the Allies; *I only ask that the Treasury be put in a position to make advances up to that amount for purposes which may be approved, with of course the approval of the President always,* and coming within the terms of the bill, at such times and under such conditions as the circumstances may call for. * * *

"The amount that is estimated be made available under the existing appropriation is, as indicated in my letter of December 5, 1918, about $1,500,000,000. In considering this sum, it is pertinent to observe that before the war the annual investment by Great Britain in Colonial and foreign securities and ventures was estimated at not less than $1,000,000,000. *The proposed additional advances of $1,500,000,000 constitute only a small proportion of the needs of France and Belgium for the work of restoration, but with judicious management the advances made by our Government, to the extent they may be made at all, will make possible the tiding of these nations over the period of transition.*

"Now, gentlemen, this suggestion about the *enlargement of the power to make loans out of the present available appropriation for that purpose to foreign governments is largely a counsel of prudence.* I do not know that anything will be required. Certainly if the Congress should not be in session after March next—and it won't be for a short time, at any rate, I imagine, because even if an extra session were instantly called, it would take a reasonable time for the Congress to organize—if in the interval any exigency arose where it was obviously to our interest to make *further* loans to foreign governments, certainly the Treasury ought to be put in a position to meet those exigencies. * * *

"Then, again, there are reconstruction questions which are coming up all the time and which will become more and more urgent with the return of peace, questions of food supply, etc., which will have to be decided instantly. And if the occasions should arise where it was in our own interest—even if we did not care about the interest of these other people, but in our own interest—to protect us in our economic situation, to make this advance, and we had no power to do it, we might bring some injury to ourselves. *And, therefore, I think we ought to have the power necessary, so that we can act if an exigency arises.* * * *

"The purpose of this amendment is to enlarge the power so that you may lend for other purposes than those necessitated by the war. * *

"If we are given the authority in the proposed amendment here to lend money to the allied Governments for reconstruction purposes, food, or any other purpose contemplated by the amendment to the extent such loans may be made in the fiscal year 1920, we might have to sell more bonds or war savings stamps or short-time certificates.

"Mr. TREADWAY. It is entirely indefinite at the present time; no applications have come forward from representatives of Governments which you have in mind?

"Secretary MCADOO. Belgium, Serbia, and France have all made intimations they would like to know if we would make such loans. * * *

"I have answered we have no power to consider such loans now; we have no authority to make such loans. I do not know that we shall have to at all, even if this authority is granted."

Shortly after the above testimony was given in the House Ways and Means Committee, on December 16, 1918, Secretary McAdoo resigned and Secretary CARTER GLASS took his place.

Secretary GLASS appeared before the Committee on Ways and Means of the House of Representatives February 15, 1919, on a hearing on the fifth Liberty bond bill, known as the Victory loan bill.

At the outset of his testimony before this committee he presented to the committee a tentative draft of a bill which gave him the additional authority referred to in the McAdoo testimony, namely, the authority to continue the loans authorized for war purposes during peace time for reconstruction and food relief. On page 17 of the fifth Liberty bond bill hearing Secretary GLASS states:

"For these reasons I urgently ask the authority to broaden the purposes for which the loans to foreign governments may be made. I do not ask an increased appropriation, and it would not be my purpose to avail of the authority where commercial loans or the powers of the War Finance Corporation could, in my judgment, be used to meet the requirements. I do, however, feel very strongly that before the Congress adjourns powers should be given sufficiently broad to enable the situation to be dealt with. We are creditors of the European Allies to the extent of over $8,000,000,000, and we have a very real interest in the early restoration of their economic life and their ability to enter upon foreign trade. * * *

"I am convinced that exports must be greatly curtailed unless the Government for the present emergency (and only during that emergency) lends financial aid along the lines I have indicated. I view with the greatest concern the task of raising the funds needed by the Government this year; but I am, nevertheless, willing somewhat to increase those needs for this purpose, being satisfied that the resultant effect will be such that the task as a whole will thereby be lightened."

The gentleman [Mr. FORDNEY] asked why we did not protest when the Democrats were in power and making these loans. We did. When Mr. McAdoo appeared before the Democratic Ways and Means Committee Mr. GARNER, Mr. KITCHIN, myself, and other Democratic Members protested against further foreign loans. The Democratic Secretary came before the committee and they stated that since the armistice, under the Liberty loan act, they had no authority to make other loans, and asked us to pass a law broadening their authority and giving them authority to do it. We refused to do that, and up to now there has been no law passed enlarging their authority or giving them the right to make new foreign loans.

Mr. MONDELL rose.

Mr. CRISP. I must decline to yield. I would like to yield, but the gentleman appreciates that it is rather hard to make an hour and a half speech in 20 minutes. There has been no law up to now changing or broadening the Liberty loan act regarding loans, but since the armistice the last administration has made loans or credits to the amount of a billion five hundred million dollars, and on the books of the Treasury there are to-day credits of over $129,000,000 in favor of foreign governments, besides the $262,000,000 credit set apart for Russia. Are we morally obligated because the Treasury Department set apart those credits to tax the people to-day to pay same? I want to know if the Republican administration is going to proceed, because of a moral obligation, to tax the people to loan to these people $129,000,000 more of our money simply because they have a credit, made illegally, made without due warrant of law, on the books of the Treasury Department? You may do it if you want to. The political exigencies of the case may be sufficient to force you to, but, thank goodness, I am free and independent, and I shall not do it. Let me call your attention to some of the credits made after the armistice, after the Ways and Means Committee refused to accede to the request of the Secretary of the Treasury for legal authority to make additional loans.

The CHAIRMAN. The time of the gentleman from Georgia has expired.

Mr. GARNER. Mr. Chairman, I yield 10 minutes more to the gentleman from Georgia.

Mr. CRISP. The following credits have been made: Czechoslovakia, $61,000,000; Serbia, $14,000,000; England, $330,000,000; Rumania, $20,000,000; Italy, $45,000,000; Greece, $48,000,000. And there are some others. Are we morally bound to furnish those countries with that money, and is this administration going to ask us to do it? If they do, are you going to quietly fold your arms and bow your knees and answer aye? I am not.

Great stress was laid upon the fact that they said, after we have set apart these credits, that we notified England and

France to that effect, and it would not be good faith for us to withdraw. Mr. Chairman, I have a very interesting document in my hand, entitled "Loans to Foreign Governments" (Senate Ex. Doc. 86, 67th Cong.). It is a résumé of the diplomatic correspondence in respect to our foreign loans prepared from the evidence and letters that were sent to the Senate Committee on the Judiciary by the State Department. If gentlemen will turn to page 221 of that document they will find what I am now going to read. While the war was going on, England, France, and the United States entered a tripartite agreement to furnish Greece credits. The United States furnished them money. I do not know whether the others furnished them money or not, but on the basis of that agreement Greece issued bonds and sold them.

In the course of time the Venizelos government lost out, and France and England notified the Government of Greece that they would withdraw credits, and that that Government could not draw on the balance to its credit in England and France; that those countries would not honor her drafts. The letter is as follows:

CORRESPONDENCE RELATING TO GREEK POLITICS AT THE CLOSE OF 1919 AND THE CONSEQUENT FINANCIAL POLICY OF THE ALLIES TOWARD GREECE.

[Paraphrase of telegram received.]

From: American Legation, Athens.
Dated: December 12, 1920, 8 p. m.
Received: December 13, 9.55 a. m.
No. 265.

For your confidential information:

Great Britain and France have notified the Greek Government that they will not honor any further drafts upon the unused balances of the tripartite loan to Greece still held in London and Paris. In discussing this withholding of economic support from Greece in case of the return of King Constantine the Government-controlled press speak with much confidence of the support expected from America, evidently meaning the American balance of the loan in question.

From a conference which I had with the British minister yesterday I believe that England hopes that the present reactionary movement in Greece will be very short lived if she can prove to Greece that she can not fulfill her rôle in the Near East without the good will and support of the associated powers. Bankruptcy is impending and the strongest argument possible at this time would be a financial one. Should the United States make any advances at this time I believe they would be considered as a condemnation of Venizelos and that much publicity would be given them as supporting the incoming administration. If the United States does not consider making such advances, I think it would be very desirable to clearly indicate this to the Greek Government. The French and British ministers are expecting to receive notifications that they are recalled. Have you any instructions for me in the premises?

CAPPS.

The minister of the United States telegraphed to our department to that effect, and wanted to know if we were going to withdraw ours. We did not. They got $15,000,000 of our money finally and then wanted more as late as 1920, and the Treasury Department refused to let them have the money, notwithstanding $33,000,000 remain as unexpended balance to their credit to-day. What did Greece do? The record shows that for retaliation she raised the tariff duties against the United States, some to the extent of 300 per cent, because we would not continue two years after the war to let her have money for her internal development. If England and France, after they had made a credit to Greece, and Greece depending upon that credit had sold bonds, could withdraw its agreement for financial aid, in the name of all the gods why is it bad taste or immoral or unjust or hurtful to them if we withdraw these credits to Liberia, which never were legally made? We withdrew a credit of $5,000,000 from Cuba, as will appear from the following letter:

CORRESPONDENCE WITHDRAWING UNEXPENDED BALANCE OF CUBAN CREDIT OF $5,000,000.

[NOTE.—The point raised by Mr. Rathbone in following letter seems to have applied to Cuba alone; i. e., that "termination of the fighting in Europe" also terminated the necessity of further advances by the United States to foreign countries "for the prosecution of the war."]

APRIL 21, 1919.

DR. CARLOS MANUEL DE CÉSPEDES,
Envoy Extraordinary and Minister Plenipotentiary,
the Cuban Legation, Washington, D. C.

DEAR MR. MINISTER: In view of the fact *that the termination of the fighting in Europe has made it unnecessary for the Government of the United States to make further advances to your Government,* the Secretary of the Treasury has directed me to advise you that the unexpended balance to the credit established in favor of the Cuban Government in the amount of $5,000,000 has been withdrawn by the Secretary of the Treasury, with the approval of the President.

I am, my dear Mr. Minister,
Very truly yours,

ALBERT RATHBONE.

Mr. Chairman, it is a well-accepted legal maxim that no contract is binding until the minds of all the contracting parties unite and agree, and that has never been done up to this good hour on the credit set apart by President Wilson on September 12, but that credit has been expressly withdrawn and the Liberian Government was notified and the contract which you are to-day asked to ratify was made in October, 1921, practically three years after the armistice, after President Harding had issued a proclamation that we were at peace with Germany, and it was not ratified by Liberia until January, 1922. I am not going to discuss as to how the money shall be paid. Secretary Hughes's testimony will show that $2,100,000 is to be used to pay past indebtedness of Liberia, owing before the European war began. One million six hundred and fifty thousand dollars of the amount is to be paid over by our Treasury to J. P. Morgan & Co.; Kuhn, Loeb & Co.; the National City Bank of New York; the First National Bank of New York; Robert Fleming & Co., of Paris; and M. M. Warburg & Co., as fiscal agents for themselves and others, I know not whom, owners of Liberian bonds. The testimony is conflicting as to that. Mr. Dearing said there was $200,000 worth of bonds owned within the United States. Secretary Hughes said $58,000, and our colleague [Mr. MILLS] says $10,000. I do not know who is correct, but it is immaterial; but, gentlemen, why, oh why, should the American taxpayers be further taxed to pay old depreciated bonds and debts of some foreign Government, no matter whether an American, a German, a Frenchman, or an Englishman is the creditor? Is it not time for us to call a halt? Does not the best interest of the United States demand that we should notify all of the nations of the world that from henceforth no more will we tax our people and turn the money over to some foreign Government for its own development? [Applause on the Democratic side.] If you pass this loan you, in effect, say that you abdicate your authority as Representatives of the brave people who sent you here; you, in effect, say that the State Department can conduct a correspondence with some foreign nation, agree to make them a loan, and thus create a moral obligation, and that then we will be honor bound to tax our people to raise money to make the loan.

Now, gentlemen, we were elected to the Congress because the people in our respective districts had some confidence in us. They gave us credit for having some intelligence. They thought we did have at least a little backbone. They thought we would be true to their interests, that we would stand up and follow our convictions, that we would follow our intelligence, and that we would vote as we believed to be right no matter if a Democratic or a Republican administration wanted us to do otherwise. Now, it has given me no pleasure to make this speech. I have not minced matters. I have not injected partisanship in it. I have called a spade a spade, and I have given you the truth as to the history of this case.

Mr. LINTHICUM. Will the gentleman yield. I desire to ask the gentleman two questions. As I understand the agreement upon which this credit was to be extended, that the prerequisite was never complied with?

Mr. CRISP. That is correct.

Mr. LINTHICUM. Another thing I want to ask. If this credit were legal there would be no necessity for this legislation.

Mr. CRISP. None whatever. It is not contended, I will say to the gentleman from Maryland, by the Secretary of State or anyone else, that they now have a legal authority to make this loan. Therefore they ask now that you authorize them to do it.

Mr. FAIRFIELD. Will the gentleman yield?

Mr. CRISP. I will yield.

Mr. FAIRFIELD. Do I understand the gentleman to assert advances were made to the other countries which were also illegal?

Mr. CRISP. I say that $1,500,000,000 worth of credits were established after the fighting stopped, after the armistice, and therefore I think those credits extended after that time, amounting to some $1,500,000,000, were without authority of law.

Mr. FAIRFIELD. One further question. Would it be true that if we pass this bill we will practically take Liberia over as a mandate?

Mr. CRISP. I will say to the gentleman under the terms of this contract, if the United States makes this loan we will have an official commission and we would send men down there at salaries of $15,000——

The CHAIRMAN. The time of the gentleman has again expired.

Mr. CRISP. I yield myself five minutes additional to be charged to our side.

Mr. MONDELL. Will the gentleman yield?

Mr. CRISP. All right, but I have only five minutes; please make the question short.

Mr. MONDELL. In order to make the gentleman's case good, that the $5,000,000 loan was not justified, the gentleman has stated that his administration gave credits in the sum of a billion and a half that were not legal and justified. Does not the gentleman realize that that is a pretty serious indictment?

Mr. CRISP. The difference between the gentleman and myself is that I am telling the whole truth and bringing out all the facts connected with this and our foreign loans without caring where it hits, and the gentleman does not always deal with that candor with the House. [Applause.] Now, answering the question of the gentleman from Indiana, under the terms of this agreement there would be a commission of three to go to Liberia at salaries of $15,000, $10,000, and $6,000. They shall have practical control of the affairs of Liberia. Liberia can not grant a concession to anybody unless this commission approves it.

Under the agreement four officers of the United States Army are sent to Liberia. Liberia becomes an absolute vassal in the hands of the United States. Gentlemen, history often repeats itself. We made a loan to Haiti. We have marines down there now running governmental affairs and there has been considerable in the newspapers about it. If you make this loan—I am not the prophet or the son of a prophet—but I venture the assertion that in a short time you will have marines in Liberia. Gentlemen, I have trespassed upon your patience longer than I intended. Each man votes as he pleases. He is only responsible to his God and himself and his constituents. I know not how you may vote, but I know so far as I am concerned I am not going to be a party to the establishment of any precedent which in effect says that the executive branches of this Government can do something beyond law and then say we must approve it. If you do this you have surrendered the right to say when, where, and to whom the money of the taxpayers of the United States, for whom we are trustees, shall be paid. I for one shall not do it. [Applause.]

Mr. GRIFFIN. I would like to ask the gentleman a question.

Mr. CRISP. I will be glad to answer it.

Mr. GRIFFIN. I think it is pertinent. It seems to me the chief issue in this case is whether the people of Liberia are to get the money or whether the money is going to the credit of international bankers who, perhaps, have bought some stock for individuals?

Mr. CRISP. I will answer frankly what this record shows, and I have read it time and again. It was my privilege to write the minority report, and two million one hundred thousand and some odd dollars is to be paid for old past-due indebtedness of Liberia; $1,600,000 to be paid to the international bankers, to be distributed to the owners of Liberian bonds, but who they are, so far as the record discloses, the Lord only knows. This committee and this House do not, because the evidence is silent on it.

There is about $250,000 that is to be used to pay floating international indebtedness of Liberia and about three hundred thousand dollars and some odd to be used to pay the funded intebtedness of Liberia.

The CHAIRMAN. The time of the gentleman has expired.

Mr. CRISP. Under the permission given me to extend my remarks, I am inserting the minority report, which I had the honor to prepare.

Mr. CRISP, from the Committee on Ways and Means, submitted the following minority views to accompany H. J. Res. 270:

We are unalterably opposed to the passage of this joint resolution, for we do not believe that the United States is either legally or morally obligated to loan to the Republic of Liberia $5,000,000. The State Department contends that we are morally committed to this loan, but to this we do not agree. In our opinion, neither the President of the United States nor any other official of the Government, when acting without authority of law, can create either a moral or legal obligation requiring the legislative branch of the Government to tax the citizens of the United States to obtain money to loan to a foreign nation. If this loan is made, in our judgment such a precedent will be established, and to the establishment of such an unsound precedent we will under no circumstances or conditions become a party.

Under the second Liberty loan act, approved September 24, 1917, the President was authorized to extend credits to certain of the Allies of the United States engaged in the prosecution of the war against Germany, for the purpose of more efficiently providing for our national security and defense and the prosecution of the war, "with the limitation that this authority should cease upon the termination of the war between the United States and the Imperial German Government." Under this authority, on September 12, 1918, the last administration set aside a credit of $5,000,000 for the Republic of Liberia, but said sum was never made available and could not be drawn on by the Republic of Liberia, because that Republic never agreed to all the terms and conditions required by the United States Department of State; and, in fact, no agreement has ever been reached by the United States and Liberia as to this credit, but this credit was expressly withdrawn from Liberia when the agreement of October 28, 1921, was reached. Confirmation of this fact can be had by reading the letter of the Assistant Secretary of State, Dearing, addressed to the President of Liberia, dated November 8, 1921, found on page 140 of the hearing.

It is a well-settled principle of law that no contract or agreement is binding until all of the contracting parties have agreed to all the terms and conditions of the agreement.

Hearings before the Committee on Ways and Means show conclusively that this credit of $5,000,000 to Liberia was not intended to be used by Liberia for the purpose of equipping an army or navy, nor for the purchase of war material, nor to be used in any way in the prosecution of the war against Germany, but was to be used in paying up old bonded and floating indebtedness of Liberia, a large part of which was owed in 1912, long before the European war began. On page 125 of the hearing you will find excerpts from the agreement of October 28, 1921, showing how the larger part of this $5,000,000 is to be used, to wit:

"3. Two hundred and thirty-three thousand dollars, or such less amount as shall be sufficient to enable the Government of Liberia to pay its internal funded debt and the interest due thereon.

"4. Three hundred and fifty thousand dollars, or such less amount as shall be sufficient to enable the Government of Liberia to pay its internal floating debt.

"5. One million six hundred and fifty thousand dollars, or such less amount as may be necessary for the purpose of enabling the Government of Liberia to purchase or redeem all of its bonds now issued and outstanding, representing the 5 per cent sinking fund gold loan, due July 1, 1952, under the agreement for refunding loan dated March 7, 1912, between the Republic of Liberia, of the first part, and J. P. Morgan & Co., Kuhn, Loeb & Co., the National City Bank of New York, and First National Bank of New York, acting for themselves and for Robert Fleming & Co., Banque de Paris et des Pays Bas, M. M. Warburg & Co., and such payments of interest, costs of notices, and other payments or deposits, as well as payments which may be due from the Government of Liberia, under the fiscal agency agreement dated March 7, 1912, between the Republic of Liberia, of the first part, and the National City Bank of New York, of the second part, as shall be necessary to terminate all obligations of the Government of Liberia under all of said bonds or under the agreement for refunding loan or the fiscal agency agreement above mentioned, as shall entitle the Government of Liberia in accordance with the terms of said agreement to the cancellation and destruction of all said bonds held by the fiscal agents in the sinking fund mentioned in said agreements. Advances for this purpose shall be made at such times and in such amounts as shall be determined by the Secretary of State of the United States. It is understood that the Secretary of State of the United States may determine the best method for acquiring part or all of the aforesaid bonds, but in no event shall more than par and accrued interest be paid therefor.

"6. Such amounts as may be necessary to enable the Government of Liberia to make improvements in transportation and communication facilities, sanitation, and other public works, in accordance with plans which shall have received the approval of the financial commission."

Liberia is a small Republic, located in Africa, thousands of miles from us, with a population of 60,000 civilized and 2,000,000 uncivilized Africans. She has neither army nor navy, did not furnish any men or supplies to the Allies during the war, and, in our judgment, in no wise contributed toward the national security and defense of the United States or aided in the prosecution of the war against the Imperial German Government. It is true that Liberia on August 4, 1917, entered the war at the request of the United States, but we are convinced that this action was for her benefit and not to aid the United States in the prosecution of the war. The British Navy controlled the freedom of the seas, shipping along the coast of Africa was practically suspended, and Liberian trade was inactive because ships could not freely enter and leave her ports. On page 114 of the hearings before the Ways and Means Committee appears the following statement:

"Shortly after the outbreak of the European war, Liberian trade became disorganized, owing partly to the British black list operating against the German traders in Liberia and partly to the fact that the British coastwise traffic had been greatly restricted. After the United States entered the war the conclusion was reached that it would be desirable for Liberia to rid herself of the German population in Liberia, in order that she might be free from German intrigue and commercial domination. This Government communicated with the British Government and obtained its assurance that all restrictions on Liberian trade would be withdrawn, provided that all Germans were removed from Liberia and that the Liberian Government took such measures as would effectively prevent German business from being carried on by persons who would merely act as representatives and restore them to their original owners in statu quo as soon as the war was over. The Liberian Government declared war upon Germany and shortly after such a declaration was made the German residents were removed."

It is true the able Secretary of State, Hon. Charles E. Hughes, in his testimony before the committee when urging this loan, said that, in his judgment, Liberia contributed toward the successful prosecution of the war by furnishing palm oil and excluding Germans from her territory; but, undoubtedly, Liberia received much greater benefits by entering the war on the side of the Allies than she bestowed.

We are clearly of the opinion that neither the last administration nor the present was authorized legally under the Liberty loan act or any other act of Congress to extend any credit to Liberia. It is a recognized legal axiom that anyone dealing with a special agent must investigate the agent's authority, and if the agent acts without authority the principal is not bound either morally or legally to carry out the agreement. As hereinbefore stated, the agreement to make this loan of $5,000,000 to Liberia, which Congress is now asked to approve, was not consummated until October 28, 1921, long after the termination of the war with the Imperial German Government. The President of the United States, acting under an act of Congress, in July, 1921, issued a proclamation declaring the war at an end. Therefore the establishing of the original credit proposed in September, 1918, never having terminated into a legal agreement for a loan until long after the war had ended, even if the State Department originally had authority under the Liberty loan act to make it (which we deny), was null and void when consummated, because such authority had ceased to exist at the time the minds of the two parties met and final agreement was concluded. The distinguished Secretary of State, recognizing this fact, that neither the President nor the Secretary of State, nor any other Government official was at that time (October 28, 1921) authorized to make a loan to Liberia, has appealed to Congress for legislation ratifying the action of the State Department in agreeing on October 28, 1921, to make the loan.

Liberia was most anxious for financial assistance from the United States, so negotiations for a loan continued from September 12, 1918, until October 28, 1921, at which time the Liberian Government consented to all the terms and conditions imposed by the United States Government as conditions precedent to granting a loan; but undoubtedly no one had authority at this time to bind the United States to make such a loan. On October 27, 1920, the Liberian Government, not yet having agreed to the terms and conditions necessary to make available to it the credit of $5,000,000 set apart for their benefit on September 12, 1918, but still desiring to obtain a loan for its own domestic and national purposes, inquired of the United States Government whether it would be agreeable to our Government for the

Liberian Government to send a commission to the United States to resume negotiations for the purpose of obtaining a loan of $5,000,000. The United States Government expressed to the Liberian Government its willingness to receive such a commission, provided the commission was duly authorized to act for Liberia. Pursuant to this diplomatic correspondence a commission headed by President King, of Liberia, came to the United States and continued to negotiate with the State Department for the purpose of obtaining the loan. These negotiations finally resulted in the agreement of October 28, 1921, for a loan of $5,000,000 for Liberia, the terms of which agreement the Liberian Government assented to by act of its legislature under date of January 26, 1922; but no one authorized to legally commit the United States has ever agreed to same.

We can not give our consent to any legislation that may be construed as establishing a precedent whereby either the President of the United States or the State Department can enter into negotiations with a foreign country with a view to making it a cash loan from the Public Treasury that will bind Congress or require it to pass laws further burdening our already overburdened taxpayers to raise money to loan to a foreign government to pay its existing national indebtedness or for the purposes of rehabilitating or developing the country. "Charity begins at home." We believe, if our Government has any surplus funds, it will best subserve the interests of its own citizens by expending such funds in rehabilitation and development work in our own country instead of doing it in a foreign land.

In view of the statement which Secretary Mellon made public on the 19th of April, to the effect that there would be a $500,000,000 deficit in the Treasury of the United States for the fiscal year 1923, we think it is time to call a halt on all extravagant expenditures, and that the Government should practice the strictest economy in governmental activities.

The loan agreement provides that a commission of American citizens, at high salaries, shall go to Liberia and act as fiscal agents. We are opposed to our Government supervising the running of foreign Governments by commissions composed of American citizens or Army and naval officers. Our sad experience in regard to the Haitian Republic is a case in point. We loaned Haiti several millions of dollars some years ago, and for the last several years we have had marines there collecting customs, taxes, and running that Republic. Many conflicts between our marines and the natives have resulted; much bloodshed has resulted; and there have been frequent investigations of conditions in Haiti—some conducted by courts-martial; others by congressional investigating committees. We fear, if this loan is made to Liberia and an American commission is sent there to supervise governmental affairs, at large salaries, as provided for in this agreement, history may repeat itself, and a few years hence we may be forced to have thousands of marines stationed in Liberia.

In the United States to-day there are thousands of men out of employment, and we feel it unjust to them and to the countless multitudes of taxpayers in the United States to further tax them to make loans to any foreign nation. We believe it decidedly to the best interest of the United States to notify all the nations of the world that we have ceased to be a "Lady Bountiful" and that from henceforth no foreign nation can obtain a loan from the United States Treasury. In our judgment, it is wrong in principle and indefensible to further tax the people of the United States for such a purpose; and we know of no better way to make public expression of this conviction than by entering this our protest against making this loan to Liberia.

CHARLES R. CRISP.
CLAUDE KITCHIN.
JNO. N. GARNER.
J. W. COLLIER.
W. A. OLDFIELD.
JNO. F. CAREW.
WHITMELL P. MARTIN.
PETER F. TAGUE.

Mr. FORDNEY. Mr. Chairman, I yield to the gentleman from Wisconsin [Mr. FREAR].

Mr. FREAR. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. FREAR. Mr. Chairman, it would take an hour or an hour and a half, as the last speaker [Mr. CRISP] stated, to cover any reasonable argument on this Liberian question, because we have had many hearings, and there are many different angles to the proposition, as has been demonstrated to the House in the discussion. For instance, take the question just asked by the gentleman from New York [Mr. GRIFFIN] of the last speaker in regard to what amount of money the people of Liberia have received from their loans? They received 26 cents on the dollar from the loans that were made them by Great Britain, and these loans will be worth 100 cents on the dollar the hour this bill becomes law. The question of whether we should make this proposed loan of $5,000,000 is not one of legal liability. That has been demonstrated and is conceded. There is no legal liability and nothing approaching a breach of faith, legal or moral, on our part, in my judgment. It has been stated there is a moral obligation on the part of our Government to make the loan.

I will simply say for the record that the declaration of war by Liberia was made in August, 1917. The motive for that declaration is immaterial for the purposes of this discussion. In September, 1918, a year afterwards, credit was placed on the Treasury books of $5,000,000, but not one dollar was ever drawn on that credit because Liberia never complied with conditions precedent to paying the money. In November, 1921, all rights to the loan were withdrawn by this Government. A gift or loan of $26,000, without conditions, to enable a delegation of Liberians to go to Paris has no bearing on the loan except by an extravagant stretch of imagination. That is the situation. It has been stated here by gentlemen in discussion that if the loan credit by the Treasury had been $50,000,000 they would feel that they ought to stand by any commitment made by an Executive. They are liberal with the taxpayers' money, if so. Only $2,100,000 is to be used to pay off the loans now held by British, Dutch, German, and American bankers who hold securities issued by Liberia that have little value, and have been of little value to Liberia. The other $3,000,000 is for the development of Liberia. Only eight white people live in Liberia. About 50,000 civilized black people, men, women, and children, and 2,000,000 uncivilized live in that country after 80 years of settlement, yet we are asked to appropriate nearly $3,000,000 for the development of Liberia notwithstanding we could only loan one-third of that amount for seed grain to the thousands of farmers in the drought sections of this country.

Mr. CRISP. I would just like to state that this Government set apart a credit for Cuba, and in 1919 they withdrew that credit of $5,000,000, because they said fighting had ceased in Europe and they had no authority to make that loan.

Mr. FREAR. Yes; over three years after the war we are asked to appropriate $5,000,000 out of the Federal Treasury simply because Liberia without a soldier or a sailor or a gunboat declared war against Germany back in August, 1917. I am not going to discuss that question at length, because the time is too brief, but I wish to give one reason affecting the precedent we are called upon to establish by this Liberia loan in view of the fact that there is no legal nor, to my mind, moral liability. I do not believe there is any moral liability after a full examination of the witnesses who were called, in which examinations I participated, and if you will read the hearings I believe you will determine the matter the same way.

On page 37 I called attention to a fundamental question, when Mr. Dearing, Assistant Secretary of State, was before the committee, and he said that the Government of the United States was "interested in the matter." I then asked him this question:

Let me inquire right there if that is not also true with all the investments of American citizens in Haiti, San Domingo, and many other southern Republics?

These are among the countries that have been referred to by the gentleman from Georgia [Mr. CRISP] who preceded me.

On page 38 Mr. Dearing responded to my question that it was true, but the situation is different and "we have a historical interest in Liberia." Financial interests and not historical interests embroil people and nations in war where the American flag follows the dollar, and I am not ready to extend our business interests to Africa to be financed by American taxpayers.

Again, on page 43, and this is also an important question when we are asked to establish a precedent:

Mr. FREAR. If we attempted to enforce payment, we would have to carry it out by force, through naval operations; otherwise we would not be able to enforce collection under this agreement.
Mr. DEARING. I think that ordinarily that would be the condition.

And the chairman of our committee then said:

There is no way of forcing people to pay, another nation to pay, except by military force.

These, briefly, are my reasons for differing from the majority of my colleagues on the committee, much as I regret doing so.

I will not discuss the matter further, because the facts are set forth fully in the hearings and you may read the record for yourselves and decide for yoursleves a proposal that has been hanging fire for many weeks in committee.

There is a matter of great importance I would refer to, although of an entirely different character. There is a proposition throughout the country to-day to repeal the direct-primary election law, and I desire to discuss it briefly.

For many years the railroads in practically every State of this country controlled legislation, and they controlled many public officials to a great extent. Able, honest men were elected under the old system but the majority needed in legislative bodies was always to be found, as shown by State and national legislation enacted. About 20 years ago we commenced passing State primary election laws in this country, and such laws were thereafter adopted in many of the States.

Objection is now raised in high places to the primaries. In one State recently both conventions, Republican and Democratic, repudiated the primary, and sought to have it repealed in that State, showing that the same force is behind the repeal movement, no matter whether it be in Republican or Democratic conventions. It is acting effectively and without concealment. The power that seeks control is far more important than all the railroad interests that have controlled political conventions and legislative bodies in the past, because this power now owns the railroads and owns the banks. It owns a large part of the press, and owns many magazines that used to do muckraking and exposure of corruption. That power will again be in full control of legislative bodies when

you repeal the primary and transfer all political control, which they will easily have through the caucus convention system. It is a matter of public knowledge under the old caucus and convention system that the same political influences frequently nominated both Democrat and Republican candidates. It is a bipartisan control under the old caucus convention system, if it can again be put in force. I believe in the right of the people to express themselves in voluntary bodies, if they choose, indicating their preferences, but the selection of candidates should not be taken away from the people nor should the direct primary system of nominations be weakened. In the State of Indiana 390,000 votes were cast in a primary election for candidates of one political party a few days ago. That is twice as many votes as were cast in all the States in the Union in caucuses and conventions under the old caucus convention method.

Mr. MOORE of Virginia. Will the gentleman permit me to interrupt him?

Mr. FREAR. Surely. I yield to the gentleman from Virginia.

Mr. MOORE of Virginia. Has the gentleman's attention been drawn to a recent and very powerful defense of the primary system contained in a speech delivered by Mr. Hughes in Indiana before he entered the Cabinet, in which he combats all the arguments brought against the primary system and contends for its maintenance?

Mr. FREAR. I was not aware of the fact. I will say to the gentleman that if so I shall be pleased to follow the leadership of the Secretary of State on his primary-election views.

Mr. GRIFFIN. He was the father of the primary law of New York State.

Mr. FREAR. No one will question his great ability.

Mr. COOPER of Wisconsin. I have an excerpt from that speech of Mr. Secretary Hughes, delivered in Indianapolis, in which he defended the primary system as the only system to be maintained in this country for safeguarding the rights of the people in the nomination of candidates.

Mr. FREAR. I thank my colleague from Wisconsin and am glad to insert in the RECORD an extract from the remarks of Charles E. Hughes, Secretary of State, former candidate for the Presidency, and recognized world-wide as a man of ability, uprightness, and logical reasoning, who spoke before the national municipal league convention at Indianapolis on the advantages of the direct primary, as follows:

First, it places a weapon in the hands of the party voters which they can use with effect in case of need. They are no longer helpless. This fact puts party leaders on their best behavior. It is a safeguard to the astute and unselfish leader who is endeavoring to maintain good standards in line with sound public sentiment. It favors a disposition not to create situations which are likely to challenge a test.

Second, the fact of this control gives the voter a consciousness of power and responsibility. If things do not go right, they know that the trouble lies with them. The importance of this assurance should not be overlooked in any discussion of the apathy of the electorate.

In a few short sentences Secretary Hughes gives unanswerable and fundamental ground for the retention of the primary with its powers inviolate. If any apathy exists with the electorate, excepting when an important issue arouses voters to action, it is equally true that the old caucus-convention system chloroformed the electorate on every and all occasions, however important the issue.

RIGHTS THAT ARE THREATENED.

Representative government, Federal and State, is regulated by constitutional provisions as to electors and terms of office. No method of securing nominations, however, is provided in fundamental law, and individuals without party affiliation or candidates of parties are equally eligible to nomination and election, subject to statutory provisions. No sacred right attaches to caucuses or conventions or to the primary system as such, and men of high attainments and unimpeachable honor have been chosen under both systems.

The present primary method of nominations makes direct accountability to the people more certain, diminishes opportunities for bribery or corruption, secures laws beneficial to the masses of the people, and guarantees representative government by placing both nomination and election ballots in the hands of those to be represented. This was the issue that brought about the Australian secret ballots and the direct primary law.

The power, once gained, should not be relinquished by the people through superficial arguments as to blessings of party solidarity or political exigency from sources however high, nor weigh in the balance against the right to direct representation now secured under the primary system.

Party principles and party issues do not depend upon nominating or election methods. Principles and issues become real and sharply drawn when the voter speaks direct rather than when he speaks through caucuses or conventions that offer obstacles and blind alleys to frank, open declarations of policy.

VOLUNTARY CONVENTIONS.

The right to assemble through voluntary convention or by any other gathering or organization is not infringed nor limited under the primary law.

Through the medium of the direct primary every organization, whether educational, social, economic, or political, is protected in this right of direct expression, and its combined influence, however great or small, may be made effective. Under the old caucus, convention system, however, the right is negatived, because voluntary organizations, whatever their titles or numbers, are then subordinated to veteran wire pullers, who were familiar figures at every old-time political convention, men who will be reinstated by any repeal of the primary.

In other words, 80 per cent of the electors, men and women, may desire a particular candidate for office, but those who control the nominating machinery year after year ordinarily will name a slate covering all officers. The influence then that determines results is not affected by numbers, as it is at primaries or elections, but rests with a small group of men whose relation to campaign purse strings of special privilege is generally intimate and who manipulate delegates with the skill of seasoned chess players.

RAILWAY CONTROL OF NOMINATIONS.

Mr. Chairman, years ago railway blocs controlled many State legislatures. Railways, including the Boston & Maine, New Haven, New York Central, and Pennsylvania Railways in the East and the Southern Pacific System and the Union Pacific in the West, we are told, directed railway representative government, with caucus and convention trimmings. Governors, State legislators, and Members of the United States Congress, at both ends of the National Capitol, were weighed in the balance by those who stood behind the railways, and candidates who had liberal views on railway earnings, railway methods, railway land grants, and railway property rights in general were given official O. K.'s. Republicans and Democrats were weighed by such interests impartially and placed among eligibles for office, or, if found too independent, were driven from public life where possible by the then powerful railway influences. All were not so controlled, but the record votes of State legislatures generally disclosed a safe majority when a bipartisan railway measure was involved.

Candidates magnificently fought over tariff schedules, imperialism, and other isms that were baubles with which to engage the public eye, but those who contributed free passes or special favors to delegates and currency to impecunious heelers stood in the background and controlled conventions and nominations, and eventually asked that favors be reciprocated. Not all candidates were thus chosen, nor all conventions thus manipulated, but a safe majority could be relied upon in practically every State, and political scandal was at its height when Bryce wrote his scathing description of political control in our American Commonwealth.

DIRECT PRIMARY NOMINATIONS.

About 20 years ago a public revolt, originating among laboring classes and farming communities, led to the enactment of State-wide primary laws throughout the United States. The people had grown weary of corrupt caucuses and unrepresenting conventions; of coercion, bribery, and indefensible practices; of recriminations among candidates; of disappointing legislative promises; and so they overturned the army of ward heelers who had been a necessary part of the old discredited system and adopted direct primary laws throughout the country.

Magazines and occasional newspapers helped arouse public sentiment by muckraking exposures until the old order was uprooted and railway passes, private cars, preferential rates, and other favors formerly granted to private individuals and public officials were made unlawful, while rebates and railway rates were prohibited or controlled by law and lives of employees and of the public received adequate protection.

This reform was made possible through the primary system, because the public could then keep close to its representatives, whether State or Federal, and in like manner political opponents became watchful of those who represented them.

Railways have ceased to control politics. The old lobbyist, with a pocket full of passes, and the caucus ward heeler have disappeared, but so have the journals and magazines that helped bring about the reform. With rare exceptions, these educational mediums have been purchased by powerful interests they now represent.

The magazines have ceased digging up corruption and graft that had been disclosed in many States and in nearly every large city from New York to Pittsburgh and St. Louis to San Francisco, and these same magazines are now filled with achievements by captains of industry, whose accumulated mil-

lions through consolidations, watering of stock, railway rebates, and destruction of rivals have encouraged ambitious imitators on every hand.

But the primary has remained with its direct accountability to the people, and grafting is unpopular because the public's iron hand through the primary compels more respect than the command or whip of any party, political, or business boss.

THE POWER THAT NOW SEEKS CONTROL.

Evolution in business methods has centralized power since the advent of the primary until to-day a handful of men control the wealth and large business of the country. Rockefeller's meteoric rise from a clerk at $8 a month to $2,000,000,000 or more is a shining example of possibilities of railway rebates, monopoly, and other practices that have inspired thousands of money-mad imitators. As the railways of the land first joined hands in a common cause 40 years or more ago when scrutinizing candidates in municipal, State, and national legislative bodies, including "safe" executives, so to-day these modern vast business interests of the country that control the magazines and great metropolitan journals would reach out to seize the same political control once exercised by the railways before the enactment of the primary.

Tax reduction or tax shifting, cancellation of foreign debts, thereby enhancing private holdings aggregating billions of dollars, appropriations for railways, for shipping, and countless other special privileges and projects are of great moment, but not easily manipulated when a "farm bloc" or people's bloc carries the record back to the people under the primary. The independence of the State legislator is also becoming a matter of concern to great business interests.

Money is now in politics to remain, and great financial interests will strenuously urge their choice of candidates according to recent political history, when over $1,000,000 was expended—a preconvention campaign—for the candidacy of one man for President. Repudiated because of excessive expenditures exposed in Senate hearings, these influences then transferred their support to other candidates and made the enactment of a general sales tax a tentative promise by both great political parties. That promise has not yet been kept nor will it be kept if Congress can defeat the powerful influences that urge this unconscionable tax on the people.

EFFORTS TO REPEAL THE PRIMARY.

Only one course is now open to give the new power full sway, to wit: Repeal of the primary and taking from the people the direct right they now possess of protecting their own interests against private interests that never sleep. Railways formerly controlled legislatures, but to-day a few powerful combinations of capital control practically all the railways, the shipping, the great banking interests, and are of immeasurably greater influence than all other interests combined. That power is not limited to State boundary lines.

Manipulated conventions are being held by both Republican and Democratic organizations under State laws where supposedly spontaneous utterances are offered repudiating the primary. By a remarkable coincidence this declaration occurred in both Republican and Democratic platforms adopted two weeks ago in Maine. Both platforms ask for a repeal of the primary law enacted in 1911. The same bipartisan influences controlled both party conventions even as they controlled under the old caucus-convention system. In other words, the people of the country, the women, the farmers, laborers, the clerks, and mechanics, in fact the great mass that represents nine-tenths of the voters of the land are urged by misrepresentation and appeal to party organization to renounce rights they now possess of naming their own candidates, and are asked to turn the job over to self-appointed political leaders or bosses as of old. Not railway bosses who have been dethroned, because long ago the railways were milked dry, but to forces that control a large part of the business and public press of the land, that instigate powerful propaganda, able, if need be, to force nations to declare war or to shift billions of income taxes to "painless" sales taxes, a proposed heritage of war. These are past and proposed achievements of the primary repeal program. In several States modifications have taken the teeth out of the primary and already have removed direct accountability from the people over to the "party organization," as of old.

Mr. Chairman, a repeal of the primary may seem improbable, but those advocating the old caucus and convention system long ago learned that men will sign petitions to hang themselves and that constant reiteration of hypocritical professions and propositions, like vice, is first rejected, then pitied, then embraced.

I have no desire to discuss the comparative strength or weakness of candidates under the caucus-convention system, compared with the primary. This is a large subject, nor do I question those who conscientiously defend the old system, nor does any man claim that improvements may not be found in present primary laws, but is it not noteworthy that practically every believer in the spoils system, in the divine right of politics and power, in discredited manipulation methods which recognize ward workers, bosses, and leaders rather than principles, that all these elements favor taking the powers away from the people and returning to the caucus-convention system, and in many States they are selecting legislative candidates to carry out their purposes?

OBJECTIONS URGED AGAINST THE PRIMARY—ATTENDANCE.

Objections are urged against the primary insidiously and assiduously by these influences. The primary, they say, is not a public expression of choice, because sometimes only about one-half of the voters participate. Granted for sake of argument, depending on importance of issues, yet under the old-time caucus system a half dozen tried and true political wire pullers ordinarily made up the average caucus with not 5 per cent of the total registered vote attending. On immaterial matters delegates and offices were traded in conventions like huckster offerings at a fish market, having in mind primarily particular candidates or interests concerned. Ten voters now attend the average primary, as evidenced by the recent Indiana primaries, compared with every voter who formerly went to the old-fashioned caucus, because voters now have a direct voice in the final result and are interested in candidates selected. They only served as spectators under the manipulated caucus and convention system. That is the position to which they would again be consigned by those advocating any material "modification" or repeal of the primary.

Within less than a fortnight we have seen nearly 400,000 votes cast in the primary in one politically close State for candidates of one party without one disturbance or voting scandal. This occurred in the same State where "blocks of five" once set the standard for political manipulators throughout the country. It is safe to say that more votes were cast in the recent Indiana primaries twice over than in all the caucuses of all the parties in all the States combined under the old system of closely organized political machine manipulation.

ACQUAINTANCE WITH CANDIDATES.

An objection offered to the primary urges lack of intimate knowledge by the electorate of the qualifications of candidates, many of whom are unknown even by name to the average voter. Admitted for sake of argument, it is equally true that candidates selected at conventions are often slightly known to a majority of the convention, because nominations frequently occur through trades and manipulation of party bosses and candidates of the different States, nor is knowledge of the delegate knowledge to the elector, who frequently does not even know the delegate and would not trust his judgment if he did know him.

The primary purpose of the primary is to secure honest, certain representation of the will of the constituency and the record of performance of every official is more certain than promises and professions in advance. That record is subject to review and approval or rejection under the primary.

EXPENSE LEGALLY RESTRICTED.

The primary is expensive to candidates, we are told. That is true if attempts are made to buy the electorate, but this is hazardous, rarely attempted, frequently disappointing, and an objectionable practice that should be discouraged by legal restrictions.

Bribery and corruption, scandals without number, accompanied the old caucus and convention system, made possible by centralized power lodged with the delegate and surrounded by temptations too strong to resist, whereas not one man or woman in a hundred can be purchased under the primary system. People may be temporarily misled, hoodwinked, and deceived at the primary or election, but where all sides are compelled to play the game openly the public soon learns the truth because of Lincoln's truism that you can not fool all the people all the time. If the old caucus and convention system is to return, the people will be called upon to accept old secret methods of persuasion, coercion, and manipulation at a time when human rights, moral, economic, educational, and social questions are overshadowing the tariff and old-time issues. Under which system will the public's rights be preserved?

PARTY ORGANIZATION NOT ALONE IMPORTANT.

Mr. Chairman, party organization may not be as closely knit by the primary as under the caucus or convention system, and independence of action can more easily be rebuked under the caucus, yet independence is not an unmixed evil. Party responsibility is needed, but when special interests by powerful propaganda or manipulation seek to seize legislative reins through appeals to party organization, the only safeguard is through in-

dividual official responsibility that may be directly reviewed by constituents and not controlled by interests concerned.

All good or all evil is not embodied in any one party, and with the great mass of State and National legislation not specially mentioned in party platforms men of all parties always may find common ground for agreement when framing laws.

Party organizations, party conventions, and party platforms are desirable, but protection of constitutional rights and laws affecting economic justice are of more vital importance. During the past session of Congress party divisions have been sought on the dye embargo, on nearly every tax bill, and on many other matters, indicating the purpose of powerful interests concerned to force an iron-bound caucus rule, if possible, the handmaid of the caucus and convention system.

I make no claim to special knowledge on the subject of the primary, but the first State-wide primary law ever adopted in this country I helped draft and pass in the Wisconsin Legislature of 1903. The law was adopted by a State referendum.

Personally I have been the recipient of political nominations in convention and primary without rejection by either system, so my judgment of the two systems is not affected by disappointment in conventions, but we well remember methods and practices affecting legislation popular under the caucus and convention system were directed by concealment because then politics became a business, and to many minds no difference existed between the purchase of delegates or the purchase of railroad stocks.

Constitutional amendments affecting income tax and woman's suffrage have been passed during the existence of the State-wide primary, and whatever difference in judgment may exist over constitutional provisions or legislation, the right to meet changing conditions with complete control by the people is maintained and preserved under the primary.

CURTAILING WOMAN'S INFLUENCE ON LEGISLATION.

Woman's suffrage greatly enlarged the political power of women throughout the land. It was gained by them after many years of hard, strenuous battling for equal political rights. What will be their influence in the old-fashioned discredited caucus convention with its trickery, bribery, and notorious methods that were the subject of charges and countercharges of fraud years ago when secret government was all-powerful?

Woman's influence in legislative matters has uniformly been thrown on the right side of moral, educational, and social justice, and as regularly it is opposed by selfish money-making interests that are always active in the halls of legislation.

The woman who saves and economizes at home also scrutinizes closely explanations offered for new unjust tax burdens, and her influence is equally valuable on taxation and economics.

Women, however, do not like political wire pulling or caucus convention methods, nor distasteful practices that are ordinarily comprehended in the old-time methods of nominating candidates. Possibly they do not appreciate that due to these facts their influence through the selection of candidates will be largely eliminated if the direct primary law is repealed throughout the country. I can not believe the women of the land understand the purpose and effect upon legislation that is at stake with the proposed repeal of the primary, nor that their officials if chosen under the caucus system are to be removed from direct responsibility to their constituencies and must look for support to local political leaders as of old. A repeal of the direct primary will nullify the influence woman now has in the nomination of candidates—a right more important than the right to vote at elections when secret powers dictate bipartisan nominations.

THE PRIMARY AN OBSTACLE TO SECRET CONTROL OF LEGISLATION.

In legislation the primary gives expression to the popular will. Ignoring war's added burdens, the growth of profiteering, and the enormous increase in private fortunes, heavy tax payers still demand the right to unlimited profits and yet ask that taxes be shifted to those least able to pay. In this legislative program they have met opposition which they declare would not occur under a convention system where men are chosen to represent particular interests. That statement may be correct, but let me ask would it have been preferable to permanently saddle a $1,000,000,000 annual sales tax on the people, which was squarely defeated, or to have repealed the proposed half billion dollars retroactive excess-profits tax of 1921, which was also defeated during the session and would have compelled the immediate imposition of an unjust consumption tax proposed at double that figure by consumption tax proponents?

This unjust tax would have been passed in Congress under the convention system of nominations according to these authorities. It did not occur under the present primary system. It may occur if the primary is modified or repealed so as to take from the people the power of direct selection of candidates and direct action they now have.

The issue is sharply drawn in many States and a secret campaign is being waged throughout the country to select candidates for legislative office pledged to destroy the primary law and to destroy the direct power that now rests in the hands of the people. That direct power will be taken away under the caucus convention system and we will then surrender to a more powerful and unscrupulous political master than the railways of old.

MEASURES, NOT MEN, ARE IMPORTANT.

It is not of great importance what man is chosen to represent providing he is faithful to his trust, but it is of vital importance that the interests of the people and not special interests be represented in State legislatures, in halls of Congress and in administrative positions. Under the old convention nominations many questionable laws were passed and good measures defeated at the direction of the party boss or by hidebound party caucus pronouncements where failure to obey meant party ostracism and removal from public life. That is not likely to occur under the primary. Men may be no abler, of no higher integrity, nor of greater vision than 20 years ago, but they now carry their records back to constitutents who pass in judgment and those officials who fail properly to represent are cast aside as weighed and found wanting.

The danger throughout the country that the direct primary will be repealed is real and certain. It has occured in several States and the law has been weakened in others. Its repeal has been urged by men in high places who believe in the old-fashioned system. Its repeal has been demanded by powerful interests that find in it an obstacle to their plans and purposes. Many reputable men will be swayed by superficial arguments to return to the old discredited system once repudiated throughout the land, but the people who recognize control of government is drifting far from the promises and purposes set forth in the Constitution; who hope and believe in popular government and in the preservation of human rights guaranteed by that same Constitution; who find selfishness and greed on the one hand and bitter, impotent resentment on the other to be great conflicting elements to-day in the body politic; who realize that progressive laws for the betterment of men and women secured in the past have been made possible under the primary; to all these people the danger will be manifest of turning over the reins of government to bipartisan powerful business and political interests that demand absolute control through a repeal of the primary. I submit that the question commands the serious consideration of every citizen.

Mr. CRISP. Mr. Chairman, I yield 20 minutes to the gentleman from Arkansas [Mr. OLDFIELD].

The CHAIRMAN. The gentleman from Arkansas is recognized for 20 minutes.

Mr. OLDFIELD. Mr. Chairman and gentlemen, I was interested in the statement of my friend from Wisconsin [Mr. FREAR], who is usually sound and progressive on public questions, and he is right on this question. He is also right on the primary election question. But I wish to call his attention to the fact that the leaders of the Republican Party on this floor are asking Congress to follow the President's lead on this question, and they may later be asking the Congress to follow his lead upon the repeal of the primary election laws throughout the country, because I am advised that President Harding only a short time ago made the statement that he wanted to see effected the repeal of the primary election laws in this country and go back to the old boss-controlled convention system. There is no question about that, and if any of you doubt it you ought to ask the President whether or not he does want to repeal the primary election laws and whether or not he made the statement a few days ago to a group of leading Republicans of this House.

Now, gentlemen, this is a very simple question to my mind. Of course you gentlemen are just taking on additional trouble, and from all the reports that come from the various States and districts of the country you have just about as many troubles already as you can carry in the fall campaign. You must remember that Mr. Hughes, the Secretary of State, is not running this fall, neither is the President of the United States running this fall. Nobody contends here that there is a legal obligation on the part of this Government to lend Liberia $5,000,000 or any other amount. I do not believe there is any moral obligation.

For example, suppose I should go to a bank and say to the banker, "Mr. Banker, I want to borrow a thousand dollars from you. I am away from home," just as this commission was that wanted to get this $5,000,000. I am a thousand miles away from home, and I want to borrow $1,000, and I say, "If you will lend me enough money to get home on, $100, I will send you my note for $1,000 signed by these two gentlemen here, the gentle-

man from Delaware [Mr. LAYTON] and the gentleman from Colorado [Mr. TIMBERLAKE], and on my return home, and when you receive the note properly indorsed in accordance with our understanding by these two gentlemen, you can send me a cashier's check for the $900 balance." He says, "I will send you the check for the $900 when you comply with your agreement," but when I get home I find that you gentlemen will not sign my note. I get some other people on my note and send it to the banker. Do you think there is any moral obligation on the part of the banker to send me the balance, or $900? No. That is the situation in this case.

Mr. FORDNEY. Oh, no.

Mr. OLDFIELD. Yes; it is, absolutely. This commission came here and wanted $5,000,000; a credit of $5,000,000 was placed to them. They got $26,000, and did not comply with the conditions of the State Department and of the President of the United States. [Applause.] They never complied with the conditions.

They never have complied with them to this minute, if you please. You have changed the contract. You have changed the contract to suit them and to suit yourselves, and now you say a moral obligation dates away back to 1918.

Nobody contends now that there is any legal obligation. Can any man seriously contend—is there a Republican here to-day who would vote for this proposition if President Harding did not want you to vote for it? Is there a Republican here to-day who would vote for this proposition if Secretary Hughes and Mr. Harding did not ask you to vote for it? No. Suppose President Wilson and Secretary McAdoo were asking you to do it. Would you think there was any moral obligation to lend this $5,000,000? No. But you are running true to form. That is all there is about this bill. Somebody said that President Harding has opened the doors of the White House. He certainly has. He has opened them wide to every special interest in America; he has opened them to the tariff robbers and barons, to the railroad magnates, and to the ship subsidists, and to the sales-tax propagandists. Yes; he has opened the doors of the White House. One gentleman says, "This commission was here waiting for him when he was inaugurated." I am not surprised. The international bankers saw to that. They saw to it that they were waiting here for this administration. Why did not the international bankers insist upon the other administration doing it?

Now, then, I do not know except what this record shows; neither do you; neither does anybody else. You do not go out here and ask bankers over the telephone what their interests are on certain matters. If you did they would not tell you. Their business is to make money.

You can not blame them for that. But here is what the record shows. We are trying this case, gentlemen, on what the record shows. Here is what they want to do with the money, and I read from page 125 of the hearings—$233,000 to pay Liberia's internal funded debt; $350,000 to pay her internal floating debt; $583,000 goes to internal indebtedness.

Let us see what the rest of it is—$1,650,000, or a less amount, if necessary, for the purpose of enabling the Government of Liberia to purchase or redeem all the bonds now issued and outstanding, representing the 5 per cent sinking fund gold loan due July 1, 1952, under the agreement for refunding loan dated March 7, 1912, between the Republic of Liberia, of the first part, and J. P. Morgan & Co., Kuhn, Loeb & Co., the National City Bank of New York, and the First National Bank of New York, acting for themselves and for Robert Fleming & Co., Banque de Paris et des Pays Bas, M. M. Warburg & Co., and Hope & Co., and for others, of the second part.

There is the contract between the Liberian Government and the international bankers, and nobody denies that. I do not know what their interests are, but they are in the contract for $1,650,000, and that $1,650,000 is not due for 30 years—not due until 1952. These international bankers are not overlooking anything. They are going to get theirs while the getting is good. There are many other people in the country, possibly a few on the floor of the House, who need money to pay their debts, but if the debts are not due until 1952 you are not worrying much about it. Not due until 1952, and yet the international bankers got this administration to look after it, and the majority of Republicans, and so you are going to pay the $1,650,000 now, this minute; you are not going to wait until 1952. The record shows that these brokers got these bonds for about 20 cents on the dollar—the Liberian people got only 20 cents on a dollar, and the brokers got 80 cents on the dollar.

Mr. LAYTON. Will the gentleman yield?

Mr. OLDFIELD. Yes.

Mr. LAYTON. Suppose the bill is passed; would any part of the money be used to purchase these outstanding obligations of Liberia at par?

Mr. OLDFIELD. Certainly; they are at par now. They were not worth 10 cents on the dollar a little while ago.

Mr. LAYTON. There are a whole lot of people in the United States who are holding securities that they can not get par value for and will not for some time.

Mr. OLDFIELD. Well, you want to get the international bankers and the administration behind them. [Laughter.]

Mr. MONDELL. Will the gentleman yield?

Mr. OLDFIELD. Yes.

Mr. MONDELL. Was it the international bankers that persuaded the President to make the loan and Secretary Lansing to approve it?

Mr. OLDFIELD. I am not defending Secretary Lansing. What was the gentleman's question?

Mr. MONDELL. The gentleman says that the international bankers are entirely responsible for what has been done in regard to this loan, and I ask him if the international bankers persuaded President Wilson to make the loan and Secretary Lansing to approve it?

Mr. OLDFIELD. There is this difference about that. When that happened this country was at war. Now, if Wilson and Lansing had ever asked me or anybody else in this House to make this loan after the war was over, or after the armistice had been signed, they could not have gotten my support and they could not have gotten your support.

Mr. MONDELL. The approval of the President and of the Democratic Secretary of State continued down to the end of the Democratic administration.

Mr. OLDFIELD. They never did agree with the Liberian commission.

Mr. MONDELL. They invited the Liberian commission over here.

Mr. OLDFIELD. But they did not get together.

Mr. TEMPLE. They never saw the Liberian commission, because it did not get here.

Mr. DENISON. Will the gentleman yield?

Mr. OLDFIELD. I will.

Mr. DENISON. If the agreement had been completed and carried out as the President started it, does the gentleman think the international bankers would have got the advantage?

Mr. OLDFIELD. Absolutely; no question about it.

Mr. DENISON. Then, what difference is there in principle between that and now?

Mr. OLDFIELD. During the war there was a moral obligation.

Mr. DENISON. Does the gentleman think there is any difference in principle between doing something for the international bankers during the war and during the time of peace?

Mr. OLDFIELD. We were lending money to the Allies especially to prosecute the war, and for no other purpose.

Mr. FAIRFIELD. Will the gentleman yield?

Mr. OLDFIELD. Certainly.

Mr. FAIRFIELD. Who invited the Liberian commission to come over here?

Mr. OLDFIELD. I presume both administrations have invited the commission.

Mr. FAIRFIELD. The statement has been made that the commission was invited here by the Wilson administration but that it did not arrive here until after the Harding administration had come in. Are those the facts?

Mr. TEMPLE. I can read to the gentleman from the record.

Mr. OLDFIELD. I yield.

Mr. TEMPLE. Here is an extract from a cable, dated November 2, 1920, from Acting Secretary of State Davis to the American Legation, Monrovia, in which it says:

> This Government would be glad to see the commission headed by President King, and would accord him a cordial reception.

I have also a copy of the resolution authorizing the President of Liberia to come to the United States as the head of the commission appointed by him and granting plenary powers to that commission. That, of course, was under the Wilson administration.

Mr. OLDFIELD. Of course, but that does not put any moral obligation on us, because they never did agree on the terms.

Mr. TEMPLE. But the gentleman said a moment ago he did not know whether the Wilson administration had invited the commission or not.

Mr. CONNALLY of Texas. Will the gentleman yield?

Mr. OLDFIELD. Certainly.

Mr. CONNALLY of Texas. The gentleman from Pennsylvania says he has a copy of the cable from the Secretary of State to the American Legation at Monrovia.

Mr. TEMPLE. From the Assistant Secretary of State.

Mr. CONNALLY of Texas. If the gentleman will look above in a copy of the hearings, page 119, he will see a telegram, dated

October 27, from Liberia indicating that they desired to come to the United States, and the United States said they could come if they wanted to.

Mr. OLDFIELD. They wanted to get the $5,000,000, and the international banks wanted them to get it to pay back the $1,650,000 not due until 1952.

Mr. LINTHICUM. Will the gentleman yield?

Mr. OLDFIELD. Yes.

Mr. LINTHICUM. Does not the fact that the commission wanted to come here indicate that no contract was ever agreed upon and that the conditions had not been complied with?

Mr. OLDFIELD. Certainly.

Mr. LINTHICUM. There would be no need for a mission if the conditions had been complied with.

Mr. MOORE of Virginia. Mr. Chairman, will the gentleman yield?

Mr. OLDFIELD. Yes.

Mr. MOORE of Virginia. The gentleman was diverted awhile ago by so many partisan suggestions that he was unable to elaborate a statement which interested me very much. He says that the outstanding bonds of the Republic of Liberia have been boosted by this resolution in a short time from 10 cents on the dollar to practically par.

Mr. OLDFIELD. Certainly. Some proofs show that they were not worth 2 cents on the dollar, and they will be taken up at par, with accrued interest.

Mr. TAGUE. Will the gentleman kindly tell the committee how much actual money Liberia received of this $1,650,000?

Mr. OLDFIELD. The proof shows she received about 20 cents on the dollar.

Mr. NORTON. When was that?

Mr. OLDFIELD. Away back yonder, a good many years ago. Mr. Chairman, there are two propositions here. One is that these international bankers want to get their money and the next is that their friends want to exploit Liberia, just as they are doing down in Haiti. The same international bankers are controlling the situation in Haiti to-day that are trying to get this law now, together with two or three big sugar corporations. They have created an international scandal down there, and my administration was partially responsible for it. They gave the reason at that time, however, that the war was approaching, and they took charge of Haiti and Santo Domingo to keep Germany out of those countries, but now it looks as if you can not get them out. Also you have a scandal in Porto Rico. If what the gentleman from Mississippi [Mr. HUMPHREYS] says is true, if what Mr. CORDOVA DAVILA, of Porto Rico, says is true, you ought to remove E. Mont Reily, Governor of Porto Rico, and replace him with some honest man. I do not know whether these statements are true or not, but Mr. HUMPHREYS and Mr. DAVILA have produced a lot of evidence which indicates strongly that the charges are true. And instead of taking on another dependency or colony we ought to be getting rid of the Philippine Islands. This commission will go to Liberia, at an expense of $80,000 a year to Liberia, to collect this debt, but they will probably never collect it. If you gentlemen wanted to do something for Liberia, if you love Liberia so much, and if the people of this country can stand the additional taxation, then you ought to give them the $5,000,000 instead of putting them into the hands of a receiver, putting them into the bankruptcy courts and taking advantage of them and exploiting the natives over there, civilized and uncivilized, and the exploiters care little whether they are civilized or not.

Mr. FORDNEY. Mr. Chairman, will the gentleman yield?

Mr. OLDFIELD. Yes.

Mr. FORDNEY. The gentleman has just stated that the Liberian bonds before this loan was authorized sold for 10 cents on the dollar. There is no such thing in the hearings. The question was asked by the gentleman from Texas, I think, Mr. GARNER, and the Assistant Secretary of State said that they were held at 75 to 80 cents on the dollar.

Mr. OLDFIELD. How were they before the loan was authorized?

Mr. FORDNEY. There is nothing in the record to show.

Mr. OLDFIELD. Somebody made the statement; I do not know whether or not it was Mr. McBride, that they were worth practically nothing.

Mr. FORDNEY. There is nothing in the record to that effect.

Mr. OLDFIELD. Yes; it is somewhere in the record. He might have cut it out. I notice Secretary Hughes cut out some of the questions that I asked him, and also the answers, although I am not complaining about that. I do know that when these hearings are sent out for correction, a great many things are cut out of the hearings by these departmental heads. Why you want to pass this bill is beyond my comprehension, when everyone in the country except the international bankers and Wall Street is broke. The farmers are broke, the small business men are broke, the 5,000,000 men out of employment are broke. One million ex-service men out of employment are broke. If you are going to lend $5,000,000 to everyone who is broke you will have to start up the printing presses, as they do in Russia, in order to get the money with which to do it.

It was suggested by Secretary Hughes that some other nation wanted to make this loan to Liberia, because they wanted that dependency. That was the inference. If some other nation wants a dependency in Africa, let that nation have it, but for God's sake let us not add another dependency to those that we already have. [Applause on the Democratic side.] This Republic was not established for that purpose.

I do not believe that any nation, any government, can govern an alien people justly, because there are too many selfish people put in control of various parts of the various governments, and especially is that true with regard to a republic. We ought not to have more dependencies; we ought to have fewer. If we go into Liberia, if we lend this money, what will happen? Within two or three or five years you will have our marines in Liberia, and for what purpose? To protect those fellows who go over there to exploit Liberia. You will have our Navy in African waters not to protect Liberia but to protect the people who are exploiting Liberia, the people who build railroads, the people who establish sugar plantations. If they find oil, then you will have our Navy there to protect the Standard Oil Co. and these other big oil companies, not to protect Liberia. Not only that, but in a little while longer you will likely have our Army over there.

The CHAIRMAN. The time of the gentleman from Arkansas has expired.

Mr. OLDFIELD. Mr. Chairman, I yield myself five minutes more.

Mr. FORDNEY. Mr. Chairman, will the gentleman yield?

Mr. OLDFIELD. Yes.

Mr. FORDNEY. I just want to correct the record. It was the gentleman from Wisconsin [Mr. FREAR] instead of the gentleman from Texas [Mr. GARNER] who asked the question of Mr. McBride, who said that these securities were selling from 98 to 99 cents. Then the question was asked, "When did they sell at that?" Mr. McBride replied:

> They have been at that figure as a matter of fact since the $5,000,000 loan was first announced to Liberia. Before that, I think, they were selling at for about 75 to 80, and sometimes going up as high as 85.

Mr. OLDFIELD. They would be paid off at par anyway. I wonder how much the gentleman from Michigan would pay for some of these bonds if he knew this resolution was not going to become a law.

Mr. FORDNEY. I have no money. I am a poor man and I do not invest in foreign bonds.

Mr. GARNER. That is since 1912, when the New York bankers underwrote the first $1,600,000, and Liberia only got 20 cents on the dollar of that.

Mr. LONGWORTH. Does the gentleman agree with his colleague from Texas that in case this resolution be not passed either France or England would within 24 hours loan $10,000,000 to Liberia?

Mr. GARNER. I did not say that. I did not say either France or England—I mentioned no names—but I call to the attention of the gentleman from Ohio, and will repeat what occurred in the committee hearings—and if it is not in the printed hearings the gentleman knows the reason why—that there are other countries standing ready to take this loan. Is not that true?

Mr. LONGWORTH. In other words, the question of whether the United States makes it or not has not affected the bonds outstanding.

Mr. FORDNEY. There were other countries ready to make the loan within 24 hours.

Mr. OLDFIELD. Then, for God's sake, let them make it and do not further tax the already overburdened taxpayers of America to make it. [Applause.]

Mr. FORDNEY. We did not want to let them make the loan.

Mr. OLDFIELD. You want this Government to make the loan, so that the friends of these international bankers can exploit Liberia.

Mr. JOHNSON of Mississippi. Does not that very thing show it is for the purpose of the bankers to exploit Liberia and not to help Liberia?

Mr. OLDFIELD. Certainly; they do not care to help anybody except special interests and exploiters of helpless peoples. They want to help the big business interests and nobody else, and that is all they have done since this administration started. I notice in the papers this morning the President stands out for

a sales tax or no bonus. He is more generous with the international bankers than he is with the ex-service men.

Mr. Chairman, I noticed in the Washington Star recently an article by Will P. Kennedy in which he states that Doctor FESS of Ohio, chairman of the Republican congressional campaign committee, expects to visit the various States, get the Republican campaign spellbinders together, and open up a school for their benefit—that is, to tell them what to say in the campaign this fall. Doctor FESS is a wonderful teacher, I understand. I am wondering if he is going to tell these schools about this bill and tell them how to defend it. There are other issues that he ought to discuss in his political class as he goes from State to State. However, I doubt very much whether he will have them dwell on very many of the things that this administration has done. There are a good many issues in this campaign. Of course, the chief issues would be the revenue bill that you passed, the tariff bill when you pass it, because as it is written to-day it is the highest tariff law ever placed upon the statute books of this country. Every special interest was represented at the Ways and Means Committee when the bill was being written. I recall that one of the ablest of the woolen manufacturers was present practically all of the time during the hearings and I understand was present when the bill was being written by the Republican members of the Ways and Means Committee. Colonel Woods was his name, from Philadelphia, I think. When the bill went to the Senate the Steel Trust had its representative in the Finance Committee room of the Senate, and as a result the bill to-day, and as it will probably become a law, will be much higher than the Payne-Aldrich law, which all but destroyed the Republican Party.

You will be called upon to explain just why you passed the transportation act in 1920, a bill which the railroad companies themselves wrote, under which the shippers of the country have been robbed of hundreds of millions of dollars in freight rates. Every farmer who had a bushel of corn to ship to the market, a car of cattle or hogs, a car of hay, a few thousand feet of lumber to go into a home for his family, a bale of cotton, as also all of those necessaries he has to use in the course of a year to sustain those that are dependent upon him, will want you to tell them why he was the object of the wrath of the Republican Party, who enacted this infamous Esch-Cummins bill, and how will Teacher FESS explain the action of your party in placing this bill on the statute books? The only honest answer, of course, is that you are controlled by the railroad and other special interests and opposed to the interests of those who produce and toil in this country.

You will probably be called upon to explain just why the President of the United States and the Republican leaders want to pass a ship subsidy bill, taking out of the Treasury the people's tax money, anywhere from $50,000,000 to $100,000,000 annually and giving it to the shipowners of the country in order that their business may be prosperous.

You may have difficulty in explaining just why your President and many of your leaders are insisting that the Congress shall pass a general sales tax, so that the burden of the great war debt may be shifted from the shoulders of the rich to the backs of the poor. You may find it difficult to explain just why your President and the leaders of your party insist that we appropriate nearly $300,000,000 for the Navy the coming year, whereas we only appropriated $147,000,000 in 1916, when we were really preparing for war. Naval appropriations have been doubled notwithstanding the fact that you have sent broadcast through the country the proposition that your Limitation of Armaments Conference has been the greatest thing in the history of the world.

You may also find it difficult to explain to the people just why your President and the leaders of your party are insisting upon a big standing army in this country. Of course, you are going to be called upon to explain just why you repealed the excess-profits tax, by which you lost $450,000,000 to the Treasury and relieved the big profiteering corporations who made during the war $38,000,000,000 net above all taxes and expenses of every kind. Of course, you are going to be called upon to explain just why you relieved the millionaires and the multimillionaires of the high surtaxes, by which you lost $90,000,000 to the Treasury. You lost $540,000,000 by repealing these two taxes upon the rich corporations and rich individuals; and now Secretary Mellon tells us that we have a $500,000,000 deficit staring us in the face. If you had just left these taxes you would have avoided this deficit, but the Republican leaders think more of rich corporations and multimillionaires than they do of the Treasury and the people of the United States. Yes; the White House doors have been wide open to every special interest in the country since that day early in his administration when President Harding called in his best minds, headed by J. P. Morgan, to advise him, and this bill shows that the same best minds are still on the job; and that the President is still doing their bidding; and yet gentlemen have said on this floor that the President of the United States is more popular than his party, that he is stronger in the various districts of the country than you are. I deny it; and just as soon as the voters of this country get a chance to express themselves as to the President's popularity you will not hear the Republican leaders here boasting of the President's popularity in the country. In fact, you have not heard much about his popularity since Beveridge defeated NEW for the Senate in Indiana the other day.

Mr. Chairman, I trust every Democrat in this House, and I hope, of course, a majority of the Republicans, will vote against this bill, because if you pass it you are going to vote to subjugate the negro Republic of Liberia. You are going to vote to permit international and investment bankers and their friends to exploit this negro Republic. You ought not to vote this $5,000,000 loan in order to help these international bankers out of a hole. [Applause.]

Mr. FORDNEY. I yield 10 minutes to the gentleman from Pennsylvania [Mr. TEMPLE].

Mr. TEMPLE. Mr. Chairman, an orderly discussion of this question, beginning at the beginning and carrying the whole story through to the present, is of course impossible in 10 minutes. I expect, then, to take up merely some of the miscellaneous matters. I want to call attention, if I can have the attention of those who are interested in it, to a statement in the minority report. I do not know who wrote this report——

Mr. CRISP. I desire to say I wrote that, and I assume the responsibility for everything in it.

Mr. TEMPLE. I want to call attention to one phrase. The report asserts:

> Under the second Liberty loan act, approved September 24, 1917, the President was authorized to extend credit to certain of the allies of the United States—

I would like to read in that connection the language of the act itself for the purpose of showing that the authority was not to extend loans to "certain of the allies" but to "any foreign government then engaged in war with the enemies of the United States."

Mr. CRISP. If the gentleman will permit, that is an inaccurate expression. I did not intend to create the impression it authorized loans only to any particular allies.

Mr. TEMPLE. I know the gentleman did not intend it, and would not intentionally deceive. The gentleman is the soul of honor and is one of the frankest and fairest men in debate that I have ever known. Yet the language I have quoted from the minority report is likely to convey the impression to the reader that loans were authorized only to "certain of the allies" and to raise the suspicion that perhaps Liberia was not one of them. The authorization contained in the act of September 24, 1917, reads as follows:

> That for the purpose of more effectually providing for the national security and defense and prosecuting the war the Secretary of the Treasury, with the approval of the President, is hereby authorized, on behalf of the United States to establish credits with the United States for any of the foreign governments then engaged in war with the enemies of the United States.

We had no allies in that war, we had no agreement that made us an ally of any nation. All the treaties of peace speak of the "allied and associated powers." We were associated with other countries in the war.

Now, the question has been raised also several times here whether the loan had actually been made. The last gentleman who spoke insisted that the loan had never been made. I wish to read a copy of a telegram dated September 12, 1918, signed "Lansing," addressed to the American Legation in Monrovia:

> COPY OF TELEGRAM DATED SEPTEMBER 12, 1918, FROM THE SECRETARY OF STATE TO THE AMERICAN LEGATION AT MONROVIA.
>
> AMLEGATION, *Monrovia:*
>
> Treasury has established credit of $5,000,000 in favor of Liberia. Before any part of this money is available, however, department must have the following:
>
> (A) Copy of portion of Liberian constitution providing for legislation authorizing the Liberian Government to borrow money.
>
> (B) Copy of law authorizing loan enacted in accordance with said provision of constitution.
>
> (C) Copy of proceedings on the part of the executive branch of the Liberian Government in accordance with said law.
>
> (D) Copy of full powers given Liberian representative in United States authorizing him to sign such obligations as may be necessary, and to receive the advances or take such other steps as the Liberian law may require.
>
> You are instructed to inform the Liberian Government immediately of the establishment of this credit and the legal formalities this Government considers necessary.
>
> LANSING.

A MEMBER. What page is that?

Mr. TEMPLE. Page 115 of the hearings held March 22 and 24, 1922. The American chargé reported to the State Depart-

ment that he had received from the President of Liberia thanks to the United States Government for having made the loan, and forwarded to Washington the letter written by the President of Liberia:

SEPTEMBER 19, 1918.

THE AMERICAN CHARGÉ D'AFFAIRES AD INTERIM,
American Legation, Monrovia.

SIR: I am in receipt of your communication of the 17th instant informing this Government that the Government of the United States had established, through its Treasury, a credit of $5,000,000 in favor of Liberia. In reply, I take the opportunity to request you to be good enough to convey to the Government of the United States my most grateful sentiments of appreciation, as well as those of the Government and people of Liberia, for its prompt and generous response to the earnest appeal of the Republic for the financial aid so urgently needed.

This benevolent action on the part of the United States, taken at a moment when the Republic is confronted with very grave problems arising from its financial embarrassment due to war conditions, has profoundly impressed the Liberian people with the cordial good will and sympathetic interest of the Government of the United States toward the welfare and perpetuity of Liberia.

Cordially and sincerely yours.

D. E. HOWARD, *President.*

We had notified Liberia that the credit had been established and had received formal thanks from the Liberian Government for the establishment of that credit.

Mr. GARRETT of Tennessee. Will the gentleman yield?

Mr. TEMPLE. Not until I have read another document. I have here a copy of a memorandum from our Department of State, dated November 19, 1918, handed to the British chargé d'affaires and to the French ambassador. The first paragraph of this communication from the Government of the United States to the Governments of Great Britain and France reads as follows:

In connection with the credit of $5,000,000 which has been established by the Treasury Department of the United States for the Republic of Liberia, it is planned by the Government of the United States to take the following financial steps in converting the Liberian loan of 1912 and administering the affairs of Liberia.

That was on November 19, 1918, two years before Mr. Harding was elected and two years and several months before he was inaugurated. Great Britain and France were formally notified of our plan to make this new loan and incidentally converting the Liberian loan of 1912 and administering the affairs of Liberia.

Mr. JOHNSON of Mississippi. Now, what authority did they have?

Mr. TEMPLE. The authority I have already quoted, the second Liberty loan act, approved by the President of the United States on September 24, 1917.

Mr. JOHNSON of Mississippi. May I ask you this question?

Mr. TEMPLE. I shall not yield further. I have only 10 minutes, and I want to confine myself to facts, and I do not want to be led into bypaths, as so many have been, in discussing the question.

The credit was established; the Liberian Government was notified that it had been established. The Liberian Government thanked the United States for it. The British Government and the French Government were notified that the credit had been established. How can any question arise now as to whether or not it was done?

Mr. GARRETT of Tennessee. Because Liberia never accepted the terms.

Mr. TEMPLE. And Liberia never rejected the terms. The transaction was still incomplete when President Wilson's administration came to an end. Liberia accepted the loan and thanked us for it. The credit was established and Liberia was notified that it had been established. Terms were discussed afterwards and discussion was still going on when President Harding was inaugurated.

Mr. McLAUGHLIN of Michigan. Is it not true that the making of the terms continued through Wilson's administration and into the Harding administration?

Mr. GARRETT of Tennessee. Not as to Liberia.

Mr. TEMPLE. I have not yielded the floor, Mr. Chairman. I hope this will not be taken out of my time.

Now, we say also—and I am quite willing to say it—that Liberia entered the war at the instance of the United States. The German cable station in Monrovia, the one seaport in Liberia, was the means of communicating—not only the cable station but the German merchants there—between Germany and the German submarines. Liberia declared war and drove the Germans out, and the German submarines got no more information through Monrovia. The Allies did get the palm oil, which was used—though some persons here do not seem to know it—in certain processes of the manufacture of tin plate, so essential not only for making containers for much of the rations of our troops but for other war purposes.

Some of the by-products also are used in manufacturing explosives. We needed these products. Fats and oils were in great demand, and we could not get all we wanted of them. We obtained a large amount from Liberia. Having broken off her commerce with Germany—and Germany had 85 per cent of the foreign commerce of Liberia—things went into decay, and this loan was made to set Liberia on her feet. It was a new loan of about $3,500,000 for that purpose, and in order to make the United States the one creditor, so that she would not be interfered with by other creditors, we proposed to take care of the other debt and make the loan large enough to cover that as well as the amount immediately wanted. This arrangement was not in the interest of the "international banker," as has been charged, or for the people who hold the bonds, but for the good of our own country as the sole creditor of Liberia after the proposed arrangements should be made. It was for our own protection and not for anything else.

The CHAIRMAN. The time of the gentleman has expired.

Mr. FORDNEY. I yield five minutes more to the gentleman.

Mr. TEMPLE. I wish to call attention to one thing further. The Liberian Government made in the meantime certain drafts on that credit. The credit had been established and the Liberian Government had been permitted to draw $26,000 against it. It is noted that that was not drawn until after the armistice was signed. The purpose for which it was used by the Liberian Government was to pay the expense of the delegation they sent to the peace conference in Paris. Whether they were a valuable contingent at that peace conference I do not know; but what I am calling your attention to now is this: Not only had the credit been established but Liberia was actually permitted to draw upon it. It is true that the amount was small—only $26,000—but the draft was made and the Treasury of the United States honored it, paid it. This was done in spite of the fact that Liberia had not accepted the terms proposed by the United States, and no terms at all had yet been agreed upon. Gentlemen say now that Liberia's failure to accept the terms of the loan amounted to a complete rejection of the loan. If that was the case, why did President Wilson and his Secretary of the Treasury permit Liberia to draw and use $26,000 of the amount?

The statement was made a little while ago that no provision exists in the new contract to take care of the $26,000 already obtained by Liberia as a part of the loan arranged for but not completed under the Wilson administration. This statement was made by a very prominent leader of the Democratic opposition, but he could not have made it if he had been acquainted with the document which he was discussing. Let me call his attention to section 1 of Article I of the contract. It reads as follows:

The advances which shall be requested by the Government of Liberia shall be as follows:

1. Thirty thousand dollars, or such less amount as shall be sufficient to enable the Government of Liberia to repay the advances heretofore made to it by the Secretary of the Treasury of the United States under the act of September 24, 1917, known as second Liberty bond act, as amended and supplemented, and the interest thereon.

Now, on October 27, 1920, the Monrovian Government asked permission to send a commission over here to arrange these terms that had been hanging fire for over two years. They asked permission to send a commission over here. In a cable dated November 2, 1920, which I would like to print in full, the Acting Secretary of State authorized the coming of that commission.

Mr. COLLIER. Will the gentleman yield right there? That is the invitation?

Mr. TEMPLE. That is a permission; not an invitation. The Liberian Government asked if we would receive the commission, and on November 2, 1920, we told them to come. On January 19, 1921, a resolution was passed in the Liberian Legislature granting credentials to the Liberian commission, and they came.

When President Harding's administration came into power he found here this commission from Liberia, the coming of which had been arranged for by the previous administration. All that we are asked to do now is to complete an unfinished transaction. Practically all the Democrats in the House of Representatives are opposing it. In this case, as in many others, we Republicans are tying up the loose ends and rents and tears of the other administration. We have got to do it. The President of the United States, whether he was a Democrat or a Republican, established this credit. We notified other great powers that it had been established. Liberia drew on it. We are in for it, whether we like it or not.

Mr. GARRETT of Tennessee. Mr. Chairman, will the gentleman yield?

Mr. TEMPLE. Yes.

Mr. GARRETT of Tennessee. Then the gentleman predicates the support of this resolution upon the contention that the last administration committed the country to it?

Mr. TEMPLE. No. I predicate it upon the whole situation, of which the agreement by Mr. Wilson's administration is one element. I have not time to state the whole thing in 10 minutes, as I said when I began. I predicate it upon the whole situation, and I have only been calling attention to one element in it.

Mr. GARRETT of Tennessee. Well, the gentleman has said and every gentleman who has spoken has always gone back to the proposition that the Wilson administration committed the Government to the loan.

Mr. TEMPLE. It did.

Mr. GARRETT of Tennessee. But it committed it under terms which Liberia never accepted.

Mr. TEMPLE. Just wait a minute; the loan was made and the Liberian Government was notified of it, and the French and the British Governments were notified of it, and afterwards we began to discuss terms. That is an exact statement of the facts.

Mr. GARRETT of Tennessee. No. But conditions were laid down. There was an advancement of $26,000.

Mr. TEMPLE. That was long afterwards. That was a relaxation of the conditions.

Mr. GARRETT of Tennessee. The gentleman is always candid. Let us get it very clearly in mind now: The gentleman does not now propose to rest his support solely upon the ground that the Wilson administration committed the country to it?

Mr. TEMPLE. If the gentleman will permit, I would very much prefer to make my own speech and state my own position. I can not permit the gentleman to state my position for me. [Applause.]

The CHAIRMAN. The time of the gentleman from Pennsylvania has expired. The Clerk will read.

Mr. GARNER. Does the gentleman from Michigan desire to use more time?

The CHAIRMAN. The Clerk will read if nobody else cares to speak.

Mr. GARNER. If no one else desires to yield time, I will use some.

Mr. FORDNEY. I yield 10 minutes to the gentleman from Ohio [Mr. BURTON].

The CHAIRMAN. The gentleman from Ohio is recognized for 10 minutes.

Mr. BURTON. Mr. Chairman, in my deliberate judgment it would be a burning reproach to the United States if we should fail to make this loan. I do not care whether you term it a legal obligation or a moral obligation. The adjective employed is a matter of entire indifference.

Let us see what the situation is, and let us brush aside that which is immaterial. There has been a good deal of dust stirred up here in regard to this transaction. A statute was passed authorizing, in the most comprehensive terms, loans to be made to countries cooperating with us in the war. In pursuance of that statute President Wilson in the autumn of 1918, under the recommendation of the Secretary of the Treasury, directed that a loan of $5,000,000 be made to Liberia. That loan of $5,000,000 was set apart for Liberia on the books of the Treasury. Twenty-six thousand dollars was actually paid, thereby confirming the transaction.

We went much further than that. We notified France and England to step aside; that we intended to make this loan. Afterwards the question arose as to the terms. Liberia was dangled along from the autumn of 1918 to June, 1920. It is running in the teeth of fact to say that Liberia did not accept, because we delayed until that later date, June 15, 1920, the making out of a contract containing the provisions for payment. Those provisions were regarded by Liberia as severe, as impracticable, and they asked for consultation upon the subject. Our Government invited a commission to come to this country to consider. So far from showing this transaction was canceled, or saying, "We will not make a loan," we invited the commission to come from Liberia to the United States.

Mr. GARRETT of Tennessee. Mr. Chairman, will the gentleman yield?

Mr. BURTON. I would prefer to proceed for about five minutes before yielding.

That commission came here and were engaged in negotiations until the termination of the Wilson administration.

Now, if that is not a contract, I am ignorant of what the provisions of a contract may be. The loan is the principal fact. The loan was the substantive transaction. The details of the manner in which security could be obtained were incidental to the one main fact that stands out prominently as a loan of $5,000,000.

That transaction with Liberia is supported by traditional relations with that Government. In pursuance—and we might just as well admit it—of our own delinquency in maintaining the institution of human boudage, it was found that there were some thousands of free negroes in this country who were treated with despite. A refuge was desired for them. Provision was made that they might go to Liberia. And I will mention one fact to which reference has not yet been made, that during the early years of the administration of President Monroe an appropriation of $100,000 was made to promote that migration to Liberia.

Emigrants went there. They have been very appropriately termed "foster children of the United States." We have had a peculiar interest in them. There was only one break. When Liberia declared herself a republic in 1847 the United States, alone among the nations of the earth, refused to recognize that republic. But President after President, including the great names of Roosevelt and Taft and Wilson, have expressed the especial interest of the United States in Liberia.

I do not wish to be a party to the closing of the door of hope and opportunity for the colored race. In Heaven's name give them a chance. They have a country there on the coast of Africa, rich in resources, surpassing all of the rest of the West Coast in its forestry, full of resources, palm oil, rubber, coffee, and other articles which this country very much needs.

Now, what is the situation? Other countries—France, England—stand ready and no doubt are anxious to jump into the breach and make this loan if we do not. Why? Because they know that that relation which exists between a stronger country and a weaker one arising from the making of a loan would give them a great advantage in the trade with that country, because it will create a relation of special advantage to them and incidentally it will shut out the United States from the relations that would naturally exist between us and Liberia. Every call of self-interest, as well as of the obligation of good faith, dictates that we should make this loan.

Mr. GARRETT of Tennessee. Will the gentleman now yield?

Mr. BURTON. I will.

Mr. GARRETT of Tennessee. The gentleman does not think that we ought to keep ourselves clear from European entanglements?

Mr. BURTON. There is no entanglement in this, the making of a loan to Liberia; it is unlike Haiti.

Mr. GARRETT of Tennessee. The gentleman has made the trade, the commercial argument; that is to say, that we ought to make this loan in order that we may control the trade——

Mr. BURTON. I did not say control the trade, but that it would aid in promoting trade.

Mr. GARRETT of Tennessee. And that if we did not do it, England and France, or some other country will.

Mr. BURTON. I have heard so much argument this morning of self-interest that I thought it was proper to interject something pertaining to a special interest of the United States, but I do not regard that as the strongest argument for making the loan.

Mr. GARRETT of Tennessee. Then the gentleman does not think we should become involved in European entanglements?

Mr. BURTON. I do not care to go into that question; I am for peace and cooperation with all the world. I deprecate all of this talk about the international bankers having an interest in it. That is an appeal to the galleries, and I do not think it should appeal to Members on the floor of the House of Representatives. We have about $10,000 of these bonds held in this country, and no doubt they will be paid, whatever may happen, but that has nothing to do with this case.

Mr. GARRETT of Tennessee. Will the gentleman yield further?

Mr. BURTON. If the gentleman from Michigan will give me some more time.

Mr. GARRETT of Tennessee. Whether it is right or not, the deprecation which the gentleman just expressed—it seems to me the gentlemen who have been arguing in favor of the loan and have attempted to predicate their argument on the proposition that a former administration was committed to it have been making the disingenuous argument of the day.

Mr. BURTON. Having in mind the Government in its policy of loaning to the Allies, the Wilson administration committed itself to make this $5,000,000 loan to Liberia.

Mr. GARRETT of Tennessee. The gentleman stands on that, and for that reason favors it?

Mr. BURTON. That is a sufficient reason. There are other reasons besides that.

The CHAIRMAN. The time of the gentleman from Ohio has expired.

Mr. BURTON. Will the gentleman from Michigan give me five minutes more?

Mr. FORDNEY. My time is all promised, and more than promised. I will yield the gentleman two minutes more.

Mr. NORTON. Will the gentleman yield? Every northern colored man resents going to Liberia and considers it the same as the sending of Napoleon to Elba. [Laughter.]

Mr. BURTON. Oh, no; there may be some misinformed colored people as well as misinformed white people. Those who oppose the loan are to be numbered among those who are misinformed, whatever their color may be.

I think further, Mr. Chairman, it is about time for us to depart from that selfish policy which I have often heard advocated on this floor and to maintain a larger degree of altruism. The nations of Europe are criticizing us because we are gathering in great hoards the gold of the world. If I may again stray into consideration of what I think a selfish policy, we had better utilize that gold in making advances to other countries, not in the way of Government loans but in dividing up that great surplus which is not beneficial to this country and unnecessary for its credit. It has a tendency to increase the high cost of living because of the immense stock of money in this country. I especially oppose the idea that we should build up this great hoard like that of Midas. Let us cooperate in the development of the rest of the world; let our people make advances to them for their rehabilitation and growth. This will not only be our duty as a member of the great family of nations, but will be for our own interest as well, and especially does that apply when this promise has been definitely made that we would make a loan and the money has been set aside.

I am not in favor of making any more loans like this to foreign governments. I am not in favor of this Government making further loans to other countries. There is plenty of money in the country, however; our investors loaned $100,000,000 to Canada and the loan was oversubscribed. Gentlemen speak of destitution. If you want to relieve the destitution, let us aid other countries in their development and let them buy of us. Here is Liberia, with her splendid resources, almost unlimited, without roads, without harbors, without improvements; and this loan, or the largest share of it, would be applied to building up that country and giving them an opportunity to come nearer to the rank of civilized nations of the earth.

Mr. LINTHICUM. Will the gentleman yield?

Mr. BURTON. Yes.

Mr. LINTHICUM. Will the gentleman state the manner in which he would divide up the gold reserve?

Mr. BURTON. I did not say divide up the gold reserve. I said pursue a general policy of disposing of the abounding surplus, a policy of generosity—and I do not think generosity is the word—but judicious financial management actuated by the idea that we owe certain obligations to the rest of the world. I am not influenced so much by sentimental arguments, but Liberia was a refuge and a haven made for those who wished to go there from the United States.

There was an idea at one time—not well grounded—that it might solve the great question of human slavery. That failed; but for now a hundred years Liberia has been a protégé of ours. We can not leave her helpless. Our standing among the nations of the earth is at stake. If after making such a promise as this we turn that promise down and refuse to do what was agreed to, the whole world will condemn us because we have neglected a weak and struggling nation. [Applause.]

Mr. GARNER. Mr. Chairman, I yield two minutes to myself in order to make a statement. I think we owe a debt of gratitude—the entire House—to the gentleman from Ohio, Mr. BURTON. Heretofore we have understood it was a moral obligation, and now the real facts have come out. It is a question of whether we are going to trade with and exploit Liberia or are going to yield to some other nation the privilege of doing that thing. That is the whole proposition, and it has been the whole proposition, in its entirety, from first to last. If gentleman will remember, they will recall that I asked in the beginning the gentleman from Michigan [Mr. FORDNEY], "If you are not morally obligated, would you make this loan," and that he would not answer. No one else has answered that question. You will not get an answer from the Republican side to that question. They will not say that if they were not morally obligated they would not make the loan, because the very crux of this thing is whether or not we shall do it and exploit Liberia or whether some other country shall do it.

Mr. BURTON. If the gentleman will yield, he has entirely misapprehended my argument.

Mr. GARNER. I yield to the gentleman from Ohio—I see two of them there, and I ask the gentleman from Ohio, Mr. LONGWORTH, if the statement is not correct, that either it is the United States makes the loan of this money or some other country loans it for the purpose of controlling the trade of that country.

Mr. BURTON. I would be glad if he would yield to me first.

Mr. LONGWORTH. I yield to my colleague. [Laughter.]

Mr. BURTON. That argument did not approve itself to me as the principal argument in this connection, but, in view of the fact that the argument of selfishness has been so exploited, I made it as an appeal to others. Whether that appeals to the gentleman from Texas or not I do not know.

The CHAIRMAN. The time of the gentleman from Texas has expired.

Mr. GARNER. I yield myself three minutes more. I probably was a little more selfish than the gentleman. I am not willing to tax all of the people of the United States and loan their money to other Governments; and if that is selfishness, then I am selfish. The gentleman talks about unselfishness and of the sentiment there is in this matter, stating that we sent these people—a few of them—over there a hundred years ago. So we did; and now we propose to send a lot of white people over there to exploit them. That is what you intend to do; that is why now you have got to the point where you want to pay the international bankers $2,000,000 and you want to take $3,000,000 more to exploit those poor people over there, who have not enough money to build a railroad or a dirt road or a harbor or anything else.

You propose to send a bunch of people over there at their expense, to the tune of $80,000 a year, to exploit them, and then talk about your obligations and the duties to these people on account of the fact that we sent a few of them over there some hundred years ago! If you will refuse to pass this bill, tomorrow another country will take your place. I never mentioned any country this morning. There is not a member of the Committee on Ways and Means who does not know exactly why this resolution was reported, and that that is the reason. The gentleman from Ohio [Mr. LONGWORTH] mentioned it. I did not, because I think those things ought not to be mentioned. But that is the exact crux of the whole matter—whether we are to exploit and get the trade of Liberia or some other country is to get it. I said this morning, and I repeat now, we do not want to start over there with a commission which we will have to follow up with our Navy and our Marine Corps in order to collect the debts of the people who get the benefit of this exploitation.

Mr. LONDON. Mr. Chairman, will the gentleman yield?

Mr. GARNER. If I have the time.

Mr. LONDON. So long as nations fight for the privilege of loaning money, then the loaning of money is not a favor but an advantage.

Mr. GARNER. I do not want to tax the American people like the gentleman from Ohio [Mr. BURTON] in order to be so generous as to loan our money all over the world, so that we may trade with them. I am not willing to do that. I am quite willing to enter into commercial relations with them, under which we can trade with them, but I do not want to collect money from the people and send it over there to exploit those people.

I yield to the gentleman from Virginia [Mr. MOORE] for five minutes.

Mr. MOORE of Virginia. Mr. Chairman, in the course of this interesting debate very illuminating statements have been made by two gentlemen from Ohio [Mr. LONGWORTH and Mr. BURTON]. The gentleman from Ohio [Mr. LONGWORTH] tells us that other nations are ready to make this advance to Liberia.

Mr. LONGWORTH. Oh, the gentleman will pardon me. It was the gentleman from Texas [Mr. GARNER] who said that. I did not say it.

Mr. MOORE of Virginia. The gentleman concurred in that statement?

Mr. LONGWORTH. I did not. I simply called attention to the remarks of the gentleman from Texas.

Mr. MOORE of Virginia. I understood the gentleman actually to name the nations, as the gentleman from Texas did. So that by some member or members of the Committee on Ways and Means we are advised that other nations stand ready and willing to make the loan. The gentleman from Ohio [Mr. BURTON] now tells us that he thinks a good reason for the proposed action is that if it is not taken other nations would let Liberia have the money it desires. So there is announced by the latter gentleman a very remarkable principle that is to enter into the control of our conduct here, and that is that it is right and proper and, of course, in his estimation legal, for the Govern-

ment of the United States to go into the business of loaning to other nations money derived from taxation. We are deliberately to fix a precedent that will say that we are justified in making loans to any nation for the purpose of binding that nation to us in governmental, political, commercial way, or trade relations. Is that to be the future policy of the United States?

Coming to the merits for a moment, if France or England, whose people are said to hold the outstanding Liberian bonds, is prepared to make the loan how will we discredit ourselves in the estimation of the world by allowing them to do it and refraining from doing it ourselves? The law allows a party to a contract to subrogate somebody else to his rights. The law likewise allows a party to a contract to subrogate somebody else to his duties, if the other party to the contract is willing. Liberia wants money. Liberia is not concerned about the source from which she obtains money; and, nevertheless, it is argued that it will be reprehensible in us to permit her to obtain it from some other nation than the United States.

I have considered the matter carefully and wish to inquire what disgrace would attach to us, what ground of criticism there would be, should we permit England and France, one or both of them, or any other nation, to make the $5,000,000 advance which this bill contemplates? You can talk in a sentimental way the rest of the day about the matter without giving a sufficient answer to that practical question.

Now, it may seem a little bit old-fashioned to say that we are undertaking to do an unconstitutional thing.

The Constitution is devoid of any expression or any implication that warrants this action. The Secretary of State has said positively that the legal obligation has disappeared, and he is only claiming that a moral obligation remains. There is no moral obligation remaining; but if there were the Constitution does not recognize a moral obligation as a basis for the expenditure of the revenue of the Government. [Applause.]

Under the Constitution the right of Congress to expend revenue that is raised by taxation is limited to the payment of the debts of the United States and to those activities that will "provide for the common defense and general welfare of the United States." The most liberal construction can not bring this measure within the scope of the power thus clearly defined.

Since there was no loan made during the war, since the negotiations in reference to a loan were not carried to a conclusion while the war was in progress but were discontinued, and since we are acting after the termination of the war, physically and technically, I do not see how it can be argued that Congress is now attempting to exercise the war power, and how the measure can be placed on that basis.

The CHAIRMAN. The time of the gentleman has expired.

Mr. MOORE of Virginia. I ask unanimous consent to revise and extend my remarks.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. GARNER. Mr. Chairman, I yield five minutes to the gentleman from Oklahoma [Mr. HERRICK].

Mr. HERRICK. Mr. Chairman and gentlemen of the committee, I am awfully sorry to say that I have to disagree with the first speaker this morning, because he is one of my best friends in the House, but notwithstanding that fact I can not afford to let friendship interfere with a duty as I see it. My friend stated that in Liberia they had a population of 2,000,000 or over, of which 60,000 were civilized, or about 3 per cent. He further stated that the remainder were uncivilized. Another statement he made which I think has a good deal of truth in it, and which I do not think he intended to make [laughter], was that 85 per cent of the population were Democrats. Well, now, if that is true—I am not saying it is—it might be an incentive for the passing of this legislation, because from the statements which have been made in behalf of this legislation it is for the development of the resources of Liberia, and I wondered whether it is to be used to develop that 85 per cent into Republicans. [Laughter.] There is another little discrimination, however, as I figure it out. There are 60,000 civilized. Of the remaining uncivilized 1,940,000 there is about 12 per cent of whom we have not got the definite facts of what they are. So much for humor. What I rose to say is this: That I will never, so long as I am a Member of this Congress, vote to pay out of the pockets of our hard-pressed farming constituencies to loan to some uncivilized nation or any republic in darkest Africa or any other outlying out-of-the-way corner of the world. [Applause.] If we have so much money with which to afford relief, we had a lot better afford a little relief to our own hard-pressed citizenship, for I have received in the last four or five weeks about a bushel and a half of letters from farmers out in my constituency in which they give an itemized statement of what it cost them to put in their entire crops last spring, what the crops amounted to in the fall, with an itemized statement of how much they owed, and generally their statement showed that from the total amount of the valuation of their crops it just paid interest and taxes last year, or not quite interest or taxes. So I think we would be doing a great deal better if we devoted a little more time and a little more attention to ameliorating the conditions in our own United States and affording a little more relief to our own people than running over the earth and looking for a chance to make some international loan that may be handled by J. Pierpont Morgan or Kuhn, Loeb & Co. and the international bankers. So much for that. Now, there is one other little point on which I wish to dwell. There has been some consideration given to the so-called moral obligation, the heritage, so called, left over from the Democratic administration, and I would like to remind the proponents of this legislation that among the heritage which was left over by the late Democratic administration was the League of Nations, and who among the Republican Party had a good word to say for the League of Nations and who among the Republican Party would venture to carry out that so-called moral obligation? [Applause.]

The CHAIRMAN. The time of the gentleman has expired.

Mr. GARNER. Mr. Chairman, I yield five minutes to the gentleman from Mississippi [Mr. QUIN]. [Applause.]

Mr. QUIN. Mr. Chairman, this question has come up wearing a false face before this House, in my judgment. There is not a man on this committee who brought this bill out who, in my judgment, can in his conscience believe and state that there is a legal obligation on the part of the United States Government to loan one dime of this Government's money to the Republic of Liberia. You predicate that upon the proposition that since this little Republic entered the war against the Imperial German Government, under the act of this Government, passed through the American Congress, the President, the Secretary of State, and the Secretary of the Treasury went out of their way to promise a loan of $5,000,000 to the little African Republic, a Republic that, under the evidence you have before you, never furnished a soldier or a dollar, and your excuse is that it sold a few gallons of palm oil to France and England. Now, then, after this war is over three years, you come up with a proposition for this Government, that is already hard pressed to meet its obligations, to reach down in the Treasury and take out $5,000,000—to do what? To give Wall Street bankers and European international bankers at least 80 per cent of the $1,600,000 bonds which they bought from the Liberian Government for 20 cents on the dollar. You are fixing to make them a present of the other 80 cents on the dollar.

This administration should know that these international bankers, under the guise of building roads and developing this Liberian Republic, about the size of the State of Mississippi, will get big concessions of lands and other franchises to exploit and plunder the 60,000 civilized negroes and the 2,000,000 savage black people of that Republic.

It is for the purpose, according to your own hearings, of making good $1,600,000 that your Wall Street bankers placed upon the ignorance and helplessness of this little African Republic, holding them up for the amount and letting these poor people that you are praying us and imploring us to vote for have 20 per cent of. This same scheme depends upon the advancement of the $1,600,000 to make good the bonds bought at 20 cents on the dollar by four Wall Street banks and the international bankers of London and of Holland. How can you men play this game of false face against the American people? This is not a partisan measure. This is a measure that every true man who recognizes under the Constitution of this Republic what his obligation is and what his oath means, whether Republican or Democrat, should vote to defeat. That is my judgment of what this matter means, and this Congress can not afford in the existing circumstances to pass this bill and advance $5,000,000 down yonder in Africa, where there is hardly any civilization, and you could not hope to get a dollar of it back within 100 years. If the Government has any money to give away, I favor giving it to the poor distressed people here at home. One gentleman, and I have great respect for him, the gentleman from Ohio [Mr. BURTON], said that we had a selfish interest, and that we ought to do it for trade. What are you going to get out of Liberia? Do you want some of that palm oil? Those people have no money to buy anything that our people produce in the United States. Who ever heard of making money out of a pauper? [Applause.]

The CHAIRMAN. The time of the gentleman has expired.

Mr. GARNER. Mr. Chairman, I yield five minutes to my colleague from Texas [Mr. GARRETT].

Mr. GARRETT of Texas. Mr. Chairman and gentlemen of the House, I have been wondering from this discussion whether this resolution should not be changed. Instead of reading—

Resolved, That we shall extend credit to the Republic of Liberia—

I have been wondering whether or not we had better not resolve to help some of the people who are suffering in our own country. If you gentlemen will pardon me a moment, you will see how I feel about it, if you will let me read to you some telegrams from my constituents. They are as follows:

RICHMOND, TEX., *May 8, 1922.*

Hon. DANIEL E. GARRETT,
Washington, D. C.:

Brazos River overflowed farms inundated second time this year. Farmers unable financially to buy more seed. Third year failure. Assistance badly needed and will be appreciated.

RICHMOND CHAMBER OF COMMERCE,
A. M. DAMERON, *Secretary.*

—

HEMPSTEAD, TEX., *May 9, 1922.*

Hon. DANIEL E. GARRETT,
Washington, D. C.:

At a representative meeting citizens Waller County conservative estimate for seed needed for replanting flooded area, 500 tons cotton seed, 4,000 bushels fast-maturing corn. This aid must be had. Farmers have exhausted their credits and must be had at once. We solicit your most earnest cooperation at once.

A. G. LIPSCOMB,
County Judge Waller County.

—

NAVASOTA, TEX., *May 10, 1922.*

Hon. DANIEL E. GARRETT,
Member of Congress, Washington, D. C.:

People urge that you insist on aid for flood sufferers.

R. M. WEST.

—

NAVASOTA, TEX., *May 10, 1922.*

Hon. DANIEL E. GARRETT, M. C.,
Washington, D. C.:

Supplementing my telegram, citizens urge King cotton seed for this flooded area account of known quick maturity. Delivery must be quick for results.

R. M. WEST, *County Judge.*

—

NAVASOTA, TEX., *May 10, 1922.*

Hon. DANIEL E. GARRETT, M. C.,
Washington, D. C.:

For the information of our people, can quick Government distribution cotton and corn planting seed for flood area this territory be definitely relied upon? Answer.

THE FIRST NATIONAL BANK.

Now, down yonder, up and down the Mississippi River, up and down the Brazos River, are good American citizens who have been working hard through the years, whose houses have been washed away, whose farms have been inundated. The rivers have poured down on them, their money is gone, and the banks can not extend many of them further credit. And, like the farmers of the great West that were here the other day asking for help, these people of mine come and say to the Government of the United States, "Can not you loan money to buy some corn and cotton seed with which we can grow cotton to help clothe the people of New England, of the North, and West, and make bread to help feed a hungry world?" What are you going to say to them? We are spending five hours here to-day discussing whether or not we will let the Liberian Government have $5,000,000 and not a minute of time has been spent in discussing whether or not we will help our own people. When droughts and famine had blasted the farmers of the West we came forward and said, "Yes; extend them credit." Now, this flooded district runs away up yonder into the North almost as far as the Mississippi River goes. It reaches far into the southland where the waters of the Brazos flow.

There is no party politics involved in it. It is simply a question of giving it to our own people, to your people and mine. And now we come here at the close of this day, still discussing whether or not we will send $5,000,000 away to Liberia, that has after all the centuries only 60,000 civilized and 2,000,000 uncivilized who are yet sitting in absolute darkness and ignorance. If you were going there as missionaries it might be well and good, but that is not the purpose of your legislation. Why this loan of $5,000,000 to the people of Liberia, who live thousands of miles away, while our own people suffering from flood disaster are asking our aid?

I see the gentleman from Illinois [Mr. DENISON] before me. His committee has reported out a bill authorizing an expenditure of $1,000,000. Will you please, when you dispose of this Liberian loan, rise up and give him a special rule to consider his bill and get it through this House and give our people the needed relief?

Mr. DENISON. The gentleman did not state it exactly accurately. It was not my committee. I introduced the bill to appropriate $1,000,000 to reseed the crops, and that bill has been favorably reported by the Committee on Agriculture and is now pending in the House for consideration.

Mr. GARRETT of Texas. I thank the gentleman for the correction. I thought he was a member of the committee.

The CHAIRMAN. The time of the gentleman has expired.

Mr. GARRETT of Texas. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. FORDNEY. Mr. Chairman, I yield 10 minutes to the gentleman from Iowa [Mr. TOWNER].

Mr. TOWNER. Mr. Chairman, I am very sure—and I am proud of the fact—that there will be no refusal on the part of the United States to respond to the appeal which the gentleman from Texas [Mr. GARRETT] makes. There is no Government on earth that has been more generous than the United States in answering these humanitarian appeals. And, gentlemen of the committee, there is no Government in the world that has been more careful to observe its obligations than the United States of America, and you are asked here to-day to fulfill an obligation of the United States. Call it either legal or moral, there is no possible question but it is an obligation; and it seems to me there is no justification for us now under existing circumstances to refuse or postpone that obligation.

I want to call attention in the first place to the law under which this obligation was, in fact, incurred. We passed a law in 1917, in the latter part of that year, after we had entered the war, by which we agreed to extend credit to those who should aid in the war against Germany, and this is the language that was used:

That for the purpose of more effectually providing for the national security and defense and prosecuting the war, the Secretary of the Treasury, with the approval of the President, is hereby authorized, in extending on behalf of the United States, to establish credits of the United States for any foreign Government thus engaged in war with the enemies of the United States.

We requested Liberia to enter the war. We requested it because of certain conditions that existed that made it important that Liberia should enter the war. Liberia was controlled in her trade relations, both domestic and foreign, by Germany. Eighty or eighty-five per cent of it was in the hands of Germany, and they were furnishing to Germany the aid that we desired to secure for the Allies. And so we requested Liberia to enter the war. Liberia did so; and immediately thereupon German control of both the domestic conditions in Liberia and her foreign relations ceased, because of the fact that the Allies sent their vessels to protect the coast of Liberia and to prevent the continuance of further trade relations between Liberia and Germany. That was the condition that existed when the Allies requested and secured the aid of Liberia.

The reason for that was that Liberia at the time was the principal source of supply for palm oil which was needed in the various chemical and mechanical operations of the war, and which it is not necessary for me now further to explain, and we secured that help.

Now, under this authority and under this law I ask gentlemen to remember that it was not declared that we should extend help specifically to those nations that took part in the war or that did anything in particular in carrying on the war, or were required to do anything in particular in the war. We had a right to give and extend credit to any nation, whether she took part in the war or not, if it was for our benefit. It was left in the discretion of the Secretary of the Treasury and the President to determine whether it would be of benefit to us particularly or otherwise in the war.

Gentlemen say, "Oh, this was for the purpose, and was determined for the purpose, and was secured for the purpose of paying off some old foreign debts." It makes no difference whether it was or not. If it was for the benefit of the Allies and the United States, then we had the right to make the loan. Did we do so? We did. We extended this credit to Liberia. It is true that it was not used to the extent that it was intended to be used, but that makes no difference regarding the obligation. We did specifically extend the credit. It was upon the request and approval of the President of the United States and the leader and Commander in Chief of our Army and Navy that this was done. It was done at the request and by the approval of the entire administration. No man objected at that time, either a Republican or a Democrat, to this extension of credit that was granted. We specifically granted the extension of credit in the most explicit terms, and it was just as explicitly accepted as it was granted. Both internationally and upon every possible ground otherwise and by every rule of justice and right we are bound to carry out that obligation. It is true we can neglect to do so, and have the right to neglect

to do so, but we will then find ourselves in this condition: We would be both violating our obligation and placing Liberia under obligation to other countries than ourselves, and this we have always refused to do.

Gentlemen say that the Government desires this action for the purpose of the exploitation of Liberia. I deny that charge. The United States has never exploited any foreign country or any country that was a dependency of hers. It is to her glory that in the Philippine Islands and in Porto Rico and wherever we have gone we have not exploited these countries, but we have aided them and assisted them; and as to this little colony that we, in fact, established, we were under an obligation at least equal to any of those that I have mentioned to see that they have a fair chance in the world in so far as we could properly do so. Does any gentleman think that the President of the United States or the Secretary of State, or does any gentleman think that anybody else in the United States who has any official position, desires to exploit the little Government of Liberia? It seems to me, gentlemen, that this is a forced and unreasonable view of the situation. What benefit can it be to the United States in that way? It seems to me that none can be imagined. Are we expecting to send favorites of the administration over there to exploit that country? Do gentlemen not know that we can, however, through the operation of this loan, aid those people to become self-respecting, to become self-supporting, to become able to fulfill their international relations without help? They have abundance of material; they have abundance of resources. All that they need is the help that the United States has and ought to give them. And why should we not do so? If we have incurred this obligation, if it is ours to refuse or to fulfill, why should we not fulfill it? The debt will be paid. It will impose no charge upon the people of the United States. Gentlemen say it will not be repaid. They have no authority for any such statement. I assert that it will be paid to the uttermost dollar and cent. [Applause.]

The CHAIRMAN. The time of the gentleman from Iowa has expired.

Mr. FORDNEY. Mr. Chairman, I yield one minute to the gentleman from West Virginia [Mr. GOODYKOONTZ].

The CHAIRMAN. The gentleman from West Virginia is recognized for one minute.

Mr. GOODYKOONTZ. Mr. Chairman, my honored and distinguished friend and colleague, the Member from the fourth West Virginia district, Mr. HARRY C. WOODYARD, has recently written and published as an editorial in the Times-Record, a newspaper controlled by Mr. WOODYARD and printed at Spencer, W. Va., a very able and interesting discussion of international affairs and foreign relations. Mr. WOODYARD is opposed to entangling alliances with European nations, and in this view I fully agree with him. I ask unanimous consent to extend my remarks by printing the editorial in the usual RECORD type.

The CHAIRMAN. The gentleman from West Virginia asks unanimous consent to extend his remarks by printing the editorial referred to in the usual 8-point type. Is there objection?

There was no objection.

Following is the editorial referred to:

EUROPE AND AMERICA—A WARNING.

[From the Times-Record, Spencer, W. Va., Thursday, May 4, 1922.]

The undisguised efforts and apparent determination of certain European statesmen and diplomats to involve this Republic in the political broils and traditional hatreds of Europe are matters of the gravest concern to every citizen in this land.

Toward the nations of Europe our people entertain not only no ill will but the most cordial and friendly feeling, but each and every one of them should be given to understand that the American people will tolerate no treaty or agreement that carries with it an obligation, direct or implied, that would involve us in any adjustment of the political affairs of continental Europe.

To my mind the overwhelming repudiation by the American people of the League of Nations should have been ample notice to Europe that our course was clear and determined in this respect. Yet every method known to Old World diplomacy is being used to influence our course against the expressed wish and well-known attitude of the American people.

Let our people not be deceived by appeals coming to us through the press and elsewhere that Europe looks upon us as a nation of high ideals and purposes, and the esteem in which we are held by all of them would serve to bring about good feeling and stable conditions in those countries. History records the undisputed fact that nations are dominated by self-interest. Unfortunately love of one nation for another up to this time has never existed, and the deplorable situation in Europe to-day verifies the fact that this condition still prevails to a marked degree.

Not since the formation of this Republic have our people been so courted by continental Europe as they have since the signing of the armistice. Scarcely a week has passed without a visit to our shores by statesmen—and women—high in the political councils of Europe. At the present time we have with us Marshal Joffre, of France, and Lady Astor, a member of the British Parliament. Lady Astor, the American wife of the son of William Waldorf Astor, who repudiated his American citizenship to become a member of the English nobility, tells us we should be at Genoa; that, in substance, we have no moral right to withhold our great influence in solving the problems of continental Europe.

Let us respectfully recall to Lady Astor's attention the fact that "Pussy-foot" Johnson publicly expressed to the people of London that they should stop the legalized sale of intoxicating liquors. "Pussy-foot" was treated to a ride on a rail for the frank expression of his views.

With no discourtesy toward Lady Astor, it should be impressed upon her, and others of the same mind, that the American people do not look for advice or counsel upon so vital a question as the one involved from one who gave up her American citizenship and owes her allegiance to the British Empire.

Again, Mr. Lloyd-George, speaking at Genoa, states that:

"The world must recognize the fact that Russia and Germany combined contain two-thirds of the people of Europe. Their voice will be heard, and the Russo-German treaty is the first warning of it.

"I wish America were here. Some people think we want the United States for some selfish purpose. This is not true. We want America because she exercises a peculiar authority; her very aloofness gives her the right to speak.

"America could exercise an influence no other country could command. She could come here free and disentangled, and with the prestige which comes from her independent position she would come with the voice of peace."

How flattering! And what an appeal to our national pride! We must be convinced that our participation in this and other conferences would solve the political troubles of Europe and cause the dove of peace to hover over every European country.

True it is that America could go to this conference "free and disentangled," but she would not come away so. Let the people know the truth. The words of Lloyd-George show beyond any question that Europe is at the present time a seething mass of jealousy, intrigue, and preparation for war.

Aside from the conditions referred to by the Premier, it is a well-known fact that England and France are almost at the breaking point.

Lack of space prohibits the naming of all the deplorable conditions that prevail in Europe. For this Republic to actively participate in affairs over there is unthinkable and intolerable. No government must, for a moment, entertain the idea that we are going to be led from the traditional policy handed down to us by our forefathers, which has made America a great and flourishing Nation.

So easily, and with the best of motives, we can entangle ourselves with the political affairs of Europe. But in doing so we obligate to one nation, or group of nations possibly, the lives of our precious sons and the resources of our great country, both of which were so lavishly given in the late World War.

Fathers and mothers of the sons whose cherished lives were lost in the horrible carnage of the late war, parents of thousands of boys whose bodies lie buried on European soil, take notice and sound the alarm against any entangling alliances or foreign influences!

HARRY C. WOODYARD.

Mr. GOODYKOONTZ. On my own account, Mr. Chairman, I wish to say that I am in favor of the measure now pending before the committee, and I ask unanimous consent to extend my remarks on that subject.

The CHAIRMAN. The gentleman from West Virginia asks unanimous consent to extend his remarks on the pending resolution. Is there objection?

There was no objection.

Mr. GARNER. Mr. Chairman, I yield five minutes to the gentleman from New York [Mr. LONDON].

The CHAIRMAN. The gentleman from New York is recognized for five minutes.

Mr. LONDON. Mr. Chairman, the most unusual thing about this debate is the talk about "moral obligations." When international usurers begin to talk about "moral obligations" it is time to be on the alert. There is no moral obligation to put a noose around Liberia, for that is what a loan means.

If you will examine the history of the colonization of the African Continent since the eighties you will find that na-

tions have been fighting each other for the privilege of making loans to helpless peoples in Africa. There are instances where war was carried on against African rulers to compel them to accept big loans. Big loans in the end mean complete ownership by the lending nation.

This loan is nothing but an effort to get a strangle hold on Liberia and her resources. An appeal is being made to a supposed historical interest of the United States in Liberia. There is nothing to that. The $100,000 expended 106 years ago by the Government of the United States to help a mere handful of freedmen to return to that part of Africa is the only expenditure to date and is the only material manifestation of sympathy toward Liberia that has ever been given. The fact is that this country refused to recognize the Republic of Liberia for a long time after other countries had recognized it. When you analyze the situation you will find that it is purely and simply an attempt on the part of American capital to shut out English or French or Dutch capital from Liberia.

What are the facts regarding the promise made by this Government?

During the war Liberia was induced to drive out the few German merchants she had, and to declare war against Germany. Liberia is supposed to have helped the allied cause by having furnished palm oil, which is used as an ingredient in certain ammunition. The American Government promised during the war a loan of $5,000,000 to Liberia, informed France and England to abstain from making a loan to her, and entered into a discussion of the conditions of the loan. This discussion was going on when the war ended, and a final understanding as to what the terms of the loan should be was not reached until 1921, more than three years after the armistice.

It is now proposed to take $5,000,000 out of the Treasury of the United States and to pay off, out of this sum, $1,700,000 of bonds now outstanding and presumably in the hands of bankers, so that foreign capital may not get hold of Liberia. There would be some sense in your talking about a moral obligation if it was not accompanied by the statement that other nations are ready to make the loan. They are. Why resort to these high-sounding phrases; why talk about sympathy for an oppressed people; whom can you fool with that kind of talk?

One of the most insidious methods of getting hold of a weak country and its resources is the loaning of large sums of money. Loaning money to a weak people is not a favor; it is a steal. But it is very clear. You are all the time talking in high phrases, employing noble expressions about the ethics of aiding the oppressed, and all the while you are looking out for only one thing—how to enable capital to exploit weaker countries.

The gentleman from Arkansas [Mr. OLDFIELD] pointed out the real situation; he saw in this enterprise merely an attempt to get a new colony in Africa and to keep other countries out. France is on the north and the east, England is on the west of Liberia, and it does not require very much knowledge of history to understand that both England and France will absorb her resources unless the United States is ready to fight that American capital may take possession of the resources of Liberia. It will be a comparatively easy task to dominate the Government of Liberia and her wealth. How much of a government will Liberia have left after she will have accepted the loan from the United States? Her revenues will be under the control of Americans; her expenditures will be under American control; her police department will be under American commanders. An examination of the conditions of the loan proves clearly that Liberia will have become an American dependency as soon as Congress will permit this loan to be completed.

I object to the enslavement of a people, though the chains be of gold. I protest against the establishment of an American Congo.

Mr. GARNER. Mr. Chairman, I yield to the gentleman from Maryland [Mr. LINTHICUM] such time as he desires.

Mr. LINTHICUM. Mr. Chairman, I shall vote against this resolution providing a loan of $5,000,000 to the Republic of Liberia with a great deal of discomfort, largely because it was a distinguished Marylander and Baltimorean, the Hon. John H. B. Latrobe, who was the head and inspiration of the American Colonization Society, which undertook and assisted in establishing this Republic by the emigration of many of the Negro race from our American States. In fact, so marked was the work of distinguished Marylanders that a part of the country was named Maryland.

I also dislike to vote against any proposition which might be of aid and assistance to those who need better educational and health conditions. If the inhabitants of the Republic of Liberia were in want of food and sustenance, for clothing and other necessaries of life, I should vote for the loan for that purpose just as I did for an appropriation to aid the starving and needy of Russia.

This, however, is an entirely different proposition. This launches our National Government into the realm of national loans to nations desiring funds for various purposes. It is the camel getting his head in the tent. It is a precedent to which I am opposed, because it, no doubt, will be followed by loans to other countries for similar purposes. This resolution is but the trying out of a balloon. If it is successful, others of a larger and less sympathetic nature will be launched. It is true we advanced a very considerable sum as loans to our allies, but that was entirely for the prosecution of the war in which we were also engaged; but never have we permitted ourselves to make loans which could and should be handled by private bankers handling international loans. The people of our country have seen too many departures from the time-honored principles of our Government to undertake to finance nations. The fiscal policy established by the act of April, 1917, was for the purpose of war, and enabled the President to make loans to better carry on the same. Had it even been suggested that it would authorize a loan such as contemplated by the resolution under discussion, I am quite sure Congress would never have enacted the same.

It is intended by this resolution to loan to Liberia, a country located on the west coast of Africa with scarcely 60,000 civilized inhabitants and over 2,000,000 uncivilized, this fund to enable that Republic to pay $233,000 for its internal funded debt and the interest due thereupon; to enable it to pay $350,000 for its internal floating debt; to enable it to pay $1,650,000 to purchase or redeem outstanding 5 per cent bonds which are not due until July 1, 1952, and which were floated by international bankers, out of which Liberia received only about 20 cents on the dollar. They were selling on the market around 26 cents on the dollar when this resolution was introduced, but with the propects of the United States redeeming them, they have jumped almost to par. This would, indeed, be a very gratifying profit to those parties so directly interested in their redemption at the expense of the American taxpayers. The balance of the $5,000,000 would be used to make improvements in transportation and communication facilities, sanitation, and other public works. It seems to me that with the present unemployment of so many of our people, the depression in business, the stagnation of affairs generally, it is certainly not the proper time for this Government to make loans for the purposes enumerated.

The supporters of this resolution contend that President Wilson extended the credit during his administration and so have published to the country. Mr. Wilson, when President, did authorize such a credit upon certain terms and conditions, but the terms and conditions never having been acceded to nor complied with by Liberia, the credit was absolutely withdrawn. There never was that meeting of minds which is so absolutely essential to create a contract. The Hon. Charles E. Hughes, Secretary of State, in his testimony admitted that we were under no legal obligation to make this loan. It is contended that President Wilson, having created a credit in favor of Liberia for the $5,000,000—which I have shown was upon certain conditions never complied with and subsequently withdrawn—then we should make the loan because we are morally bound to do so. If this were really a part of the Wilson policy, which I deny, then I would, indeed, dislike to assist in thwarting the desire of the Republican administration in carrying it out, because the only bright spots in its horizon have been obtained through the adoption of Wilson policies founded on true Democratic doctrine. For example, here are a few of those already approved by President Harding, through his able Secretary of State, Mr. Hughes, and the Senate of the United States.

COLOMBIAN TREATY.

Rectification of the wrong done to the Government of Colombia by the illegal seizure of the Panama Canal right of way by President Roosevelt was a "Wilson policy." There has been an approval of this policy, a complete reversal of the Republican policy of opposition to reparation. On April 20, 1921, the treaty providing for a payment of $25,000,000 to Colombia was ratified by a Republican Senate, which had refused to ratify during the Democratic administration.

MEXICO.

Nonrecognition of the unstable and illegal de factor government of Mexico was a "Wilson policy." There has been an approval of this policy. It has been consistently pursued by President Harding and his Secretary of State.

RUSSIA.

Nonrecognition of the barbarous Bolshevik government of Russia under Lenin and Trotski was a "Wilson policy." There

has been an approval of this policy. It has been steadily maintained by President Harding and his Secretary of State.

CHINA.

The principle of the open door in China was one of the "Wilson policies." There has been an approval of this policy. It was reiterated by President Harding in a note of his Secretary of State dated July 8, 1921, and later confirmed by the Washington conference in a formal agreement.

HAITI AND DOMINICAN REPUBLIC.

The temporary occupation of Haiti and the Dominican Republic by American marines was a "Wilson policy." Charges of cruelty were made, Senator Harding during the campaign going so far as to severely criticize Mr. Franklin V. Roosevelt and promising a change of policy and program. There has been no reversal of the Wilson policy. On the contrary, Secretary Denby and a senatorial committee, after investigation on the spot, have failed to find substantial basis for the Republican slander and have approved the continuance of the present policy.

GERMAN REPARATIONS.

The appointment of Mr. Roland W. Boyden to a seat on the Reparations Commission was a "Wilson policy." There has been an approval of this policy. Mr. Boyden was reappointed by President Harding and took his seat May 10, 1921.

AMERICAN REPRESENTATIVES ON WORLD COUNCILS.

The designation of the American ambassador to Great Britain as representative on the supreme council and of the American ambassador to France as representative on the council of ambassadors was a "Wilson policy." There has been an approval of this policy. President Harding on May 6, 1921, accepted the invitation of the allied conference to reappoint both officials.

MESOPOTAMIA.

Equality of treatment for the citizens of all nations, including, of course, the United States, in mandated territory was a "Wilson policy." His Secretary of State, Mr. Colby, on November 20, 1920, sent a note to the British Government asserting this principle and taking exception to the San Remo agreement between Great Britain and France relating especially to petroleum resources in Mesopotamia. There has been an approval of this policy. President Harding had his Secretary of State, Mr. Hughes, dispatch a note of protest almost identical with Secretary Colby's.

YAP.

Objection to the assignment of the island of Yap to Japan by the great powers on the League of Nations' council was a "Wilson policy." His Secretary of State, Mr. Colby, on November 9, 1920, sent a formal note of protest to Japan and to the other allied powers, in which he referred to the rights of the United States as one of the "allied and associated powers." A second note of similar tenor was addressed to the council of the League of Nations on February 21, 1921. There has been an approval of this policy. On April 6, 1921, President Harding had his Secretary of State, Mr. Hughes, dispatch to the powers—Great Britain, France, Japan, and Italy—a note almost identical in character and in argument to the Colby note, since which time the question has been settled by treaty growing out of the Washington conference.

SECTION 34 OF THE JONES SHIPPING ACT.

Executive refusal to comply with the instructions of Congress, contained in section 34 of Public Law No. 261, Sixty-sixth Congress, approved by Congress June 5, 1920, "authorizing and directing the President within 90 days to give notice" to those Governments with which we have commercial treaties containing the "most-favored nation" clause, that we will terminate those treaties, was a "Wilson policy." There has been an approval of this policy. President Harding, in his address to Congress December 6, 1921, likewise refused to comply and said:

> Frankly, Members of House and Senate, eager as I am to join you in the making of an American merchant marine commensurate with our commerce, the denouncement of our commercial treaties would involve us in a chaos of trade relationships and add indescribably to the confusion of the already disordered commercial world. * * *
>
> It is desired only to say to you that the executive branch of the Government, uninfluenced by the protest of any nation, for none has been made, is well convinced that your proposal, highly intended and heartily supported here, is so fraught with difficulties and so marked by tendencies to discourage trade expansion that I invite your tolerance of noncompliance."

There are many other instances where those of the present administration have found after much criticism of the Democratic administration that efficient government requires the approval of many of its policies but I shall not attempt to enumerate more at this time. [Applause.]

Mr. GARNER. Mr. Chairman, I yield five minutes to the gentleman from Mississippi [Mr. LOWREY].

Mr. LOWREY. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD.

The CHAIRMAN. The gentleman from Mississippi asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

Mr. LOWREY. Mr. Chairman, with the gentleman from Georgia [Mr. CRISP], I should certainly say that if we are under moral obligation in this matter we ought to meet the obligation, though it cost us $50,000,000 instead of five millions. No man or government can afford to violate an obligation for the sake of political or economic expediency, and nothing that is morally wrong can be politically right.

But I fail to find the moral obligation; and since we are not bound, we can not afford to lend a foreign nation money to pay its debts and build its roads and schools, while our own people are bending under a burden of debt and struggling almost hopelessly with road and school problems.

I also congratulate the gentleman from Georgia on bringing this discussion up from a partisan wrangle to a sane, candid, and kindly debate of a public question. As a Member of this House I like the work I am in and I like the gentlemen I am working with. Yet there are a few pernicious evils which I think we will all agree ought to be corrected. One of the chief of these is the way in which vital issues are often clouded and prejudiced by partisan strife.

But in my brief space of five minutes I wanted especially to express my regret that the usually genial gentleman from Michigan [Mr. FORDNEY] in the exercise of his customary ardor for the abuse of Woodrow Wilson should have indulged in a vicious attack upon members of the honorable profession from which Mr. Wilson came. He asserts that "a school-teacher is not much man outside of his profession" and regales us with the ribald doggerel:

> Good-by scholars, good-by school,
> Good-by teacher, you darned old fool.

It is to be lamented that a man who gives himself to business and makes money or who gains political honors sometimes becomes so engrossed in these things as to speak scornfully of the men and women as a class who give their lives to the work of building character and promoting culture in the world. The teachers of this country are dedicating their lives to making the men and women who must make everything else that is worth while. Why, then, tell me, should they be ridiculed on the floor of the American Congress?

If a teacher is "not much man," then certainly we must have some very shoddy men disgracing the floor of this House; some of them, strange to say, members of the party which the gentleman from Michigan champions. FESS, of Ohio; FAIRCHILD, of Indiana; ANDREWS of Nebraska; BROOKS of Illinois; TEMPLE, of Pennsylvania; TOWNER, of Iowa, and others, all former educators, and most of them former college professors or presidents. Likewise there are a few of the despised minority, such as ASWELL, of Louisiana; OLIVER, of Alabama; and TILLMAN, of Arkansas. Does the gentleman from Michigan consider that because they come from the teaching profession, forsooth, these men are "darned old fools"? Again, the biographies of the Presidents of the United States show that Woodrow Wilson was not the only teacher among them. I think the gentleman will find, if he will inform himself, that it is the rule rather than the exception for Presidents to be ex-pedagogues. Something like three-fourths of the men who have been raised to that high position once taught school. And I believe that a similar proportion of Members of Congress and of the Supreme Court have likewise been teachers at some time in their lives.

But above all are the country teachers, who have ever been the heroes and the martyrs of our educational work and before whose consecrated service the college president and the high political official should alike stand with uncovered head.

When I asked the gentleman from Michigan whether they had any teachers in his State, he replied, still thinking of Woodrow Wilson, I presume, "None educated in Virginia, thank God!" Which reminds me of an incident that occurred while the unique Davy Crockett was a Member of this House. A certain Pennsylvania Congressman, having seen a drove of Tennessee mules in the street, said to Crockett, "I saw a big lot of Tennesseeans down town awhile ago—constituents of yours. You'd better go down and look them up." Crockett hurried out in search of his constituents and found the mules. He came back smiling. "Well, Crockett, did you find out where your constituents were going?" asked the Pennsylvanian. "Yes," said Crockett, "they are all going to Pennsylvania to teach school." [Laughter.]

Some of them must have gone on to Michigan, judging from the asinine opinion which some Michigan statesmen seem to have of teachers, and from the asinine attitudes into which some of them seem to have been educated. [Applause and laughter.]

Mr. CRISP. Mr. Chairman, acting for Mr. GARNER, I yield five minutes to the gentleman from Texas [Mr. CONNALLY], and I desire to state that we will have only one other speech after that.

Mr. CONNALLY of Texas. Mr. Chairman, the gentleman from Mississippi [Mr. LOWREY] has ably defended the school-teachers against the charges of the gentleman from Michigan [Mr. FORDNEY].

The gentleman from Michigan, as is often the case when he addresses the House, this morning embraced an opportunity to indulge in coarse, unkind, and undignified references to the ex-President of the United States, Woodrow Wilson. The gentleman from Michigan made the following statement on this floor to-day:

> The President of Liberia said that he was on the way here to meet our President—not a school-teacher, but I am talking about a President.

Of course, it does not take a school-teacher to understand that the gentleman from Michigan intended by that language to take a nasty fling at the great ex-President, who is not able to come here on this floor and defend himself against vulgar insults that are from time to time heaped upon his head. That great man is ill. He is stricken. It is not seemly nor becoming in the chairman of a great committee, the gentleman from Michigan, to regale the galleries and his partisan audience with such low, mean, cruel flings at an ex-President of the United States. What else did he say?

Mr. McSWAIN. He cast a fling at the profession of school-teaching.

Mr. CONNALLY of Texas. Yes; but the profession of school-teaching can take care of itself. It has a number of able representatives here on this floor. I quote further from his remarks this morning:

> Mr. FORDNEY. Oh, no; we have a high-grade man there now—

He was then referring to the Presidency—

> Oh, no; we have a high-grade man there now, although we had an excuse for four years, before Mr. Harding took office. We ought to have had a man in the chair, and if I had had my way about it we would have had.

In other words, the gentleman from Michigan makes the statement that for four years preceding the present administration we did not have a man in the President's chair, but that we had an excuse, and that if the gentleman from Michigan had had his way we would have had a man in the chair. I suppose the gentleman from Michigan will cut those remarks from his printed speech, but I requested the reporter to give me a copy of the remarks of the gentleman from Michigan, and I hold them in my hand. I hold no commission, political or otherwise, to speak for the ex-President of the United States, but I am impelled as a Member of this House to resent, when made on the floor of this House, cheap but bitter and unjust attacks on a man who is unable to defend himself here.

Mr. CARTER. Mr. Chairman, will the gentleman yield?

Mr. CONNALLY of Texas. In a moment. There was a time when the gentleman from Michigan would not have made those statements.

Mr. CARTER. That is what I was going to ask, whether during six years of Woodrow Wilson's life, when he was able to defend himself, there were any of these ribald, jocular remarks made about him?

Mr. CONNALLY of Texas. There was a time when the now ex-President of the United States was able to take care of himself in his own proper person, and during that time the gentleman from Michigan and other gentlemen who have seen fit from time to time to hurl at his defenseless head these insinuations and insults, would not have dared to use such language. It is said that after the hopes and fortunes of Napoleon had been crushed at Waterloo and the British had seized him and placed him on a warship and started on the journey to St. Helena, his enemies trembled with fear until the vessel was far out at sea.

Then kings and emperors heaped opprobrium and scorn upon the caged conqueror, who when he was unchained and unfettered made their thrones totter and their boastful spirits quail with terror. So it is with Woodrow Wilson in dignified retirement, with Woodrow Wilson stricken, with Woodrow Wilson without opportunity to meet the jibes and sneers and thrusts of those who once feared him. There are those who now view his misfortunes with no evidence of regret and who hurl their denunciations and insinuations at him in his defenseless condition without shame or remorse.

So far as the school-teachers are concerned, let me say that the school-teachers of the future, as they lead the minds of their students along through the pages of history, may possibly somewhere stumble upon the name of the gentleman from Michigan, but if they do it will be only because his name is linked with the Fordney tariff bill, one of the most indefensible pieces of legislation that was ever offered on the floor of this House. Yet those same teachers, as they move through the illustrious pages of American history—yes; as they turn the pages of the history of the world—will find the picture, the distinguished career, and the mighty works of the man who yonder lies stricken and against whom the gentleman from Michigan has hurled his ribald jests and the poisoned darts of his anger. [Applause on the Democratic side.]

Mr. FORDNEY. Mr. Chairman, I yield 15 minutes to the gentleman from Ohio [Mr. LONGWORTH].

Mr. LONGWORTH. Mr. Chairman, the gentleman from Texas [Mr. CONNALLY], who just preceded me, has taken the gentleman from Michigan [Mr. FORDNEY] to task for certain alleged slurring remarks made this morning about the ex-President of the United States. The fact of the matter is that the really important, the vital attacks that have been made upon ex-President Wilson have come from the Democratic side of the House. More than one gentleman has said that ex-President Wilson, in advancing this credit of $5,000,000 to Liberia, deliberately violated the law and acted under ignoble motives. It is a strange anomaly to-day that the men who are upholding the hands of Woodrow Wilson, acting in his capacity as Commander in Chief of the Army and Navy, are on the Republican side of the House, while the men who are repudiating him are on the Democratic side of the House.

Mr. BARKLEY. Mr. Chairman, will the gentleman yield?

Mr. LONGWORTH. I can not yield for the moment. I shall later.

Mr. BARKLEY. I may not want to ask the question later.

Mr. LONGWORTH. I do not care to answer a question at this moment. Imagine these gentlemen who are criticizing Woodrow Wilson to-day for things that he did in 1918 criticizing him then! Why, there is not a man on the Democratic side of the House who would have dared rise in his place and say the things about President Wilson at the time he made this loan that they have said here to-day. It remains for us on the Republican side of the House to justify Woodrow Wilson's act as Commander in Chief of the Army and the Navy.

Mr. JOHNSON of Mississippi. Will the gentleman say who said he felt that Wilson acted from ignoble motives?

Mr. LONGWORTH. I will say that the whole attack that has been made upon this measure, outside of its illegality, is that it is due to influence of some sort by international bankers. When was that influence exercised? It was exercised in the last administration if at all, and not in this, and the man who would do such things as this, in the face of the law for international bankers necessarily must, according to their own statement, be under the influence of ignoble motives.

Mr. JOHNSON of Mississippi. Is that the gentleman's answer?

Mr. LONGWORTH. That is my answer. Possibly there may be something else in the whole matter that influenced——

Mr. GARRETT of Tennessee. And they did not get the money.

Mr. LONGWORTH. Possibly there may be some other motives which actuated that side of the House, as suggested by the gentleman who just interrupted me, the gentleman from Mississippi [Mr. JOHNSON], who opposed this bill because it may at some time or place do some negro some good.

Mr. JOHNSON of Mississippi. No; that is not what I said.

Mr. LONGWORTH. That is what the gentleman said. I do not assert that is the motive which actuates any other gentleman than the gentleman from Mississippi.

Mr. JOHNSON of Mississippi. No; I said the bill was for the purpose of enabling bankers to exploit the negro in Liberia.

Mr. LONGWORTH. That is not what the gentleman said. For myself, I defend the act of President Wilson not only in its legality, but because it was the proper thing for him to have done at that time. The gentleman from Iowa [Mr. TOWNER] made an elaborate argument to show that this loan in 1918 of this sum to Liberia was within the purview of the second Liberty loan act, but I am not going to go into that in any detail. We all knew when we passed that act that it was a loan for the benefit of those who were acting with us in the war against Germany. Very broad powers were given under that act.

Now, when it comes down to a legal opinion as to whether that loan in 1918 was made legally or not, much as I respect the legal ability of my friend from Georgia and my friend from Texas, and in spite of the high regard I have for their opinion, they will pardon me, I know, when I say I respect even more the

opinion of Charles E. Hughes, Secretary of State, who says very plainly, speaking of the legality of this act:

No court in this country would have considered for a moment, in my judgment, any question of lack of authority on the part of the President of the United States to support the Republic of Liberia as an ally in this war, and to make arrangements to secure to the allies access to that great source of necessary war supplies.

There was one very vital necessity for war munitions, palm oil, of which Liberia had a very large supply. That alone would have justified the establishment of a substantial credit with Liberia.

Mr. GARNER. Will the gentleman yield for a question?

Mr. LONGWORTH. I will.

Mr. GARNER. When the gentleman voted for the second Liberty loan act did he contemplate then the Government would be loaning to other governments for the purpose of paying their debts back for 40 years prior to the war, or for the development of the country 15 years after the war was over?

Mr. LONGWORTH. Not at all.

Mr. GARNER. That is what this is for.

Mr. LONGWORTH. That is exactly what it is not for. Secretary Hughes says further:

I do not think that there is any question of legal authority that would survive an analysis or argument before any judicial tribunal.

The Secretary of State, who is known to be one of the most eminent lawyers in this or any other country, could not have gone further than that in justifying the legality of the act of President Wilson.

Mr. JOHNSON of Mississippi. Will the gentleman yield for a question?

Mr. LONGWORTH. I can not for the moment; I will yield a little later. Now, what occurred? On August 4, 1918, President Wilson informed the Secretary of State that he was in sympathy with the proposition of loaning $5,000,000 to Liberia. Liberia a year before had entered the war, much to her financial disadvantage, and practically at the request of this Government. On August 27 the Secretary of the Treasury informed the Secretary of State that the President had approved and established a credit in favor of the Liberian Government in the amount of $5,000,000, and on September 12 the Secretary of State directed our consular officials in Monrovia to so inform the Government of Liberia. Every responsible official of President Wilson's administration had indorsed this proposition. From that on, gentlemen, until within only the last four or five months, there has been on the books of the United States Treasury a credit in favor of Liberia for $5,000,000.

Mr. HERRICK. Will the gentleman yield?

Mr. LONGWORTH. I can not yield. The negotiations have been continued since that time. The gentleman from Texas and others, including the gentleman from Tennessee, have tried to show that the contract now agreed upon is an altogether different proposition from the one to which Liberia originally objected. Now, the fact is, gentlemen, that it differs only in very slight detail. I have here a memorandum from the State Department giving those details of difference, which I will ask unanimous consent to place in the RECORD.

Mr. GARRETT of Tennessee. Will the gentleman yield?

Mr. LONGWORTH. I will.

Mr. GARRETT of Tennessee. I did not intend to indicate their difference, because I have never seen either. What I tried to say was that the Liberian Government never accepted the terms which were fixed by the Wilson administration, upon which they were to accept the loan.

Mr. LONGWORTH. Upon that exact subject Secretary Hughes said before the Ways and Means Committee:

The Liberian Government did not like the terms of that plan—

To wit, the plan proposed as contingent for the creation of a credit.

The Liberian Government did not like the terms of that plan, and made certain objections. That was within their competency. Because we had offered to grant the loan did not mean that they had to submit to anything that was proposed, and there was correspondence on the point—insistence on one side and opposition on the other side.

Negotiations lasted for several years, and at the request of the Wilson administration a deputation came from Liberia to confer, and they were here when President Harding was inaugurated.

Mr. GARRETT of Tennessee. Did they come at the request of the Wilson administration or did they come at the invitation of the Wilson administration?

Mr. LONGWORTH. I will put it that Secretary Lansing sent an invitation; the word "invite" was used. I do not care to quibble over little technical details.

Mr. GARRETT of Tennessee. It amounts to quite a good deal when you are making a money contract.

Mr. LONGWORTH. It amounts to nothing. They came here at the invitation of this Government.

Mr. GARRETT of Tennessee. Did they not ask if they could come?

Mr. LONGWORTH. And, as I say, the final agreement differs only in slight detail.

Mr. CRISP. I know that the gentleman wants to be accurate. The Liberian Government cabled here and asked if our Government would receive a commission to continue the negotiations, and our Government replied they would, provided the delegates had full authority to act for Liberia.

Mr. LONGWORTH. That is the way under diplomatic usage that every government approaches another government. We never send an ambassador to another government unless we send an inquiry as to whether or not he will be received.

Mr. GARNER. The crux of the whole matter is that the Liberian Government initiated it.

Mr. LONGWORTH. The fact is that they did come here. These negotiations were continued, and the differences were very slight. The principal objection that Liberia had was that they did not want the functions of financial adviser and general receiver of customs to be combined in one office. They thought that that was giving too much power to one man. They wanted them divided into two offices, and subsequently we agreed, as we agreed to every one of their differences.

Mr. GARRETT of Tennessee. That is, the present administration agreed.

Mr. LONGWORTH. The present administration. There were various other very immaterial things, which I will put in the RECORD. For instance:

(2) The allotment of funds under the plan for the maintenance of the Liberian Government was considered to be insufficient, and they desired that this allotment should be increased to a sum which would enable them adequately and efficiently to carry on the administration of the Government of Liberia. Upon investigation by the Department of State it was found that their contention in this regard was well founded.

(3) The original draft did not contemplate the retirement of the internal funded debt of Liberia, amounting to approximately $233,000. This internal funded debt arose through the inability of the Liberian Government to pay, at certain times, the salaries and other current administrative expenses. In lieu of money there were given certificates of indebtedness, and it was felt that a part of the proceeds of the $5,000,000 credit should be used for the repayment to Liberian citizens of money justly due them.

(4) In the original draft the Liberian Government considered that the general receiver of customs and financial adviser was not sufficiently amenable to any authority higher than himself, and the Liberian Government desired that there should be some method arranged for submitting, in case of disagreement, to some higher authority any vital financial matter that might possibly arise, and they asked that they might be allowed to appeal in certain instances to the Government of the United States.

(5) The Government of Liberia felt that the original draft was not specific enough with reference to the American experts who would be sent to help the Liberians handle their finances, public works, etc. Not only did they find the original draft indefinite in this regard but it was also felt that the provisions made for the supervision by these experts was not adequate to meet the needs of the country.

The fact was, as this memorandum from the State Department says:

These points were so justifiably taken by the Liberian Government that after a great deal of discussion at the time that the Liberian commission was in the United States arrangements were made in the final financial agreement eliminating the objections of Liberia.

The gentleman from Tennessee [Mr. GARRETT] lays great stress on the fact that these modifications were agreed to by the present administration. Does the gentleman think that when President Wilson issued this invitation for that commission to come here that he was absolutely certain then that he was to be succeeded by a Republican?

Mr. GARRETT of Tennessee. If the gentleman will permit me to state clearly and succinctly my own position, it is this, that the terms that were fixed under the Democratic administration were not accepted by the Liberian Government. Therefore the loan was not made. Other conditions, and any obligation, legal or moral, fell with the failure of the acceptance on the part of the Liberian Government. All since then is a matter of new negotiations and concerning that we are entitled to judge of the obligation.

The CHAIRMAN. The time of the gentleman from Ohio has expired.

Mr. FORDNEY. Mr. Chairman, I yield five minutes more to the gentleman.

Mr. LONGWORTH. The objection of the gentleman from Tennessee—and I think the objection of most of the leaders on that side—is purely technical.

The action taken by Mr. Wilson, Mr. Lansing, and the then Secretary of the Treasury—I have forgotten for the moment who was Secretary then—is enough to bind us in honor now when the opportunity comes to carry out that agreement. It

is precisely what any business man would do under those circumstances. Shall the Government of the United States be bound by any less delicate sense of honor than a business man?

Mr. MILLS. Would the gentleman say that he considers it fair in any sense of the word to say that a suggested modification of a detail of a plan was equivalent to rejecting that plan? That is the opposition of the gentleman from Tennessee.

Mr. LONGWORTH. The mere fact that the Treasury Department, up to very recently, carried this credit on their books shows that it has always contemplated a final settlement, and that these differences were merely matters of detail.

Mr. CAMPBELL of Kansas. Was this credit on the books of the Treasury Department after the failure of the Liberian Government to accept the old agreement?

Mr. LONGWORTH. It was carried until about five months ago. Here is the situation in which we find ourselves. This Government has stated not only to Liberia but it stated to all other Governments that have been interested in Liberia that it intends to make this loan itself. We invited England to stay out; we invited France to stay out. We said it was an American policy and we wanted to confine it to America in accordance with the well-known history of our liking for Liberia—our feeling, so to speak, of a sense of responsibility toward Liberia for the last 100 years.

Why, as long ago as 1843 Daniel Webster, in speaking of Liberia, in correspondence with the British Government, said:

> Founded principally with a view to the amelioration of the condition of an interesting portion of the great human family, this colony has conciliated more and more the good will, and has from time to time received the support of this Government. Without having passed any laws for their regulation, the American Government takes a deep interest in the welfare of the people of Liberia, and is disposed to extend to them a just degree of countenance and protection.

And other Secretaries of State have said practically the same thing—Secretary Bayard, Secretary Blaine, and Secretary Knox—have all iterated and reiterated our historical friendship for that country.

The CHAIRMAN. The time of the gentleman has expired.

Mr. LONGWORTH. Mr. Chairman, I ask permission to revise and extend my remarks.

The CHAIRMAN. The gentleman from Ohio asks unanimous consent to revise and extend his remarks. Is there objection? [After a pause.] The Chair hears none.

Mr. FORDNEY. Mr. Chairman, I yield to the gentleman from Illinois [Mr. MADDEN] such time as he desires.

Mr. MADDEN. Mr. Chairman and gentlemen of the committee, under the provisions of the second Liberty loan act the President was authorized to make loans to countries at war with Germany. Liberia declared war with Germany, turned the German merchants out of Liberia, and turned her resources over to the Allies. President Wilson notified Liberia that he had placed a credit of $5,000,000 at the disposal of Liberia, and in fact $26,000 of the amount was paid to Liberia. The terms on which the remaining credit should be paid continued to be a matter of negotiation between the United States and Liberia until the close of the Wilson administration and these negotiations were continued after Mr. Harding became President. Prior to the conclusion of the negotiations peace had been declared by the Congress, thus the war power of the President ended, otherwise this bill would not be here. It is here only because we are bound by every consideration of justice to carry out the contract virtually made by the President under the authority of the second Liberty loan act. The establishment of the Republic of Liberia was not only encouraged but assisted by the United States. It was intended to be a haven for the free Negroes of America in the dark days of slavery here. The Republic of Liberia has existed for 100 years; during that time this country has watched over her with friendly solicitude. Liberia has an existing debt of about $1,500,000. It is proposed to take up this indebtedness and to merge it into the $5,000,000 loan provided for in this bill, to have Liberia issue its bonds and turn them over to the United States and to pledge its revenues toward their payment. Moreover, it is provided in the contract between the United States and Liberia that the money advanced under this authority is to be expended under the jurisdiction of an American commission to be appointed by the President. Thus the passage of the bill will carry out an obligation assumed by the President during the war on behalf of the Nation, do an act of simple justice to a people who aided to the best of their ability during the war, and at the same time assist in the perpetuation of one of the world's oldest republics by enabling its people to develop the country's resources without placing a single dollar of the loan in jeopardy.

Mr. COLLIER. Mr. Chairman, I ask unanimous consent to extend and revise my remarks.

The CHAIRMAN. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

Mr. FORDNEY. Mr. Chairman, I yield to the gentleman from Pennsylvania.

The CHAIRMAN. The gentleman from Pennsylvania is recognized.

Mr. VARE. Mr. Chairman, the peculiar position the United States holds in relation to Liberia and the moral obligation we have held since the founding of that small Republic of Africa prompts me to give my whole-hearted support to the proposed loan of $5,000,000 to that country.

Liberia was founded as a place where colored persons, not slaves, but free negroes, of the United States could go that they might not be forced to face the conditions confronting free Negroes in the United States prior to the Civil War. At that time a free negro was far worse off here than his slave brother.

An expedition of less than 100 Negroes and six white men left for the African coast. The white men died, and a handful of the negroes returned for more. A second expedition started out, and the free Republic of Liberia was formed. Since then the United States has had a moral obligation to protect that little country.

It might be said that we have not been as efficient in our protection as we might have been. But now we have the opportunity to show that we meant it when we asked that little Republic to join the allied forces during the Great War and turn all Germans from its shores.

England and France were eager then to lend financial aid to Liberia. They wished to obtain the advantages of the natural resources of Liberia. They wished to have the great supply of palm oil, which is used in large quantities in the manufacture of munitions of war. The United States asked England and France to maintain a more distant attitude and refrain from making financial loans to Liberia. We wished to do it.

In good faith the previous administration made a loan to Liberia. President King, of that country, and his legislative officials did not believe the terms on which the loan was to be made were just. Negotiations followed. They were continued during the present administration. Peace between the United States and Germany terminated the previous credit to Liberia extended during the former administration. Further legislation is made necessary now.

Primarily this is a moral obligation to a country made up of former Americans. It is our child among nations. After our insistent request that other nations should not help Liberia we can not afford to withhold the aid we promised. As a business proposition I am confident that this country's money, lent to Liberia, is as safe if not safer than much of the money which has been lent to other nations. The great resources of that country guarantee the repayment of the loan.

Let us adopt this extension of credit that Liberia may be placed on a sound financial footing, and that our pledge of 100 years ago to those who left our shores that they might live as they wished with equal opportunities with their neighbor may be fulfilled. Let us support this measure, which has the unqualified earnest support and approval of our Secretary of State, Mr. Hughes, and the President, that our national honor might be maintained in the eyes of the world. [Applause.]

Mr. Chairman, I ask unanimous consent to extend my remarks.

The CHAIRMAN. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. FORDNEY. Mr. Chairman, I yield the remainder of my time to the gentleman from Wyoming [Mr. MONDELL].

The CHAIRMAN. The gentleman from Wyoming is recognized.

Mr. MONDELL. Mr. Chairman, the second Liberty loan act provided "that for the purpose of more effectively providing for the national security and defense and prosecuting the war the Secretary of the Treasury, with the approval of the President, is hereby authorized on behalf of the United States to establish credits with the United States for any foreign government then engaged in war with the enemies of the United States."

In the fall of 1918 the Republic of Liberia was at war with the Central Empires, and President Wilson, in the belief that a loan to Liberia would aid in the prosecution of the war, notified the Government of Liberia of a credit of $5,000,000. The

reasons for this credit were strongly and forcefully set out by Acting Secretary Polk and in a communication addressed to the President by Secretary Lansing. President Wilson in a short, sympathetic note stated that in his judgment the loan should be granted.

Unlike my friends on the Democratic side, I believe that the Democratic administration acted in good faith, and I believe the administration acted within the law. Down to the last day of President Wilson's administration that credit remained on the books of the Treasury to be drawn upon by Liberia, and continuously negotiations were in progress for the purpose of settling the details of the contract under which the loan was to be made available. At one time Liberia objected to some of the details of the contract. These objections were presented to our Government and given consideration. France and England, who up to that time and up to this time, as far as I know, have a joint relationship with the United States touching the finances of Liberia, were notified that Liberia had been granted the loan and that the American Government proposed to take over full and complete control of Liberia's finances. And so the Wilson administration went out of power leaving this Liberian loan question on our doorstep. It is one of the heritages of the war. Some consider it an unhappy heritage, as many of these war heritages are unhappy.

As far as we are concerned on our side, if the heritage is a legitimate one—and the parentage can not be denied or the responsibility questioned—we propose to keep the faith, even though the commitment was made by the Wilson administration. [Applause.]

Gentlemen on the other side in order to justify their opposition to this loan have gone so far as to say that in their opinion President Wilson's administration loaned of the good money of the burdened taxpayers of America one and a half billion dollars without warrant or authority of law. I do not believe that. I am one of those who have questioned the judgment exercised by the last administration in many of the loans which were made, but I believe they were all of them made within the law. Their judgment was bad; but I refuse either to question the legality of the acts or, as gentlemen on the Democratic side have done, impugn the motives which actuated them. They have impugned the motive, for they have declared and reiterated on the floor time and again that the efforts on behalf of the Liberian loan was all a miserable conspiracy hatched up by the international bankers for the purpose of relieving them from securities they did not desire to carry.

If that is true, if that is the character of influence that was behind the loan, then it is the influence that controlled President Wilson and Secretary Lansing and Acting Secretary Polk. They all of them made mistakes, but I refuse to join with the Democratic minority in denouncing them as men who disposed of the resources of this country not only in violation of law but actuated by unworthy motives.

Our administration came into power with this obligation, legal as well as moral, on its hands. It only lost its legal standing by the act of Congress in declaring a state of peace. But you can not remove, or lessen, or shorten a moral obligation by changing the terms of a law. The legal authority no longer existed, but the moral obligation remained to do what the Wilson administration for two years had steadily planned and purposed to do. What are we to do about it? Liberia is a child of this Republic. For years it was a settlement of American freedmen; then it became a Republic with a constitution almost identical with ours, with a flag in the image of our flag, with a government patterned after ours.

During all the years that the Government has existed its leaders have looked to us for inspiration and moral guidance. At one time England on one side and France on the other were encroaching upon the boundaries of Liberia and the affairs of the Republic were in so desperate a situation that President Roosevelt felt called upon and was authorized by Congress to appoint a commission to inquire into conditions there. The encroachments on Liberian territory have ceased, her boundaries are fixed and established. An agreement was entered into under which her debt was funded and the United States, Great Britain, and France appointed representatives to manage her finances. At our suggestion Liberia entered the war. Because of that action her seaport towns were bombarded by German gunboats, her commerce was for the time largely destroyed. She did her part. She was entitled to the consideration given her by President Wilson, and the question is, Shall we keep the obligation. The gentleman from Texas [Mr. GARNER] complains because some have said that in the keeping of this obligation we shall not lose financially. Is it any argument against doing your duty that in the doing of it you shall suffer no financial loss?

The loan is good, the security is first class. Under the conditions of the contract we become the managers of Liberia's income and aid in the development of her resources. Liberia is a rich region about the size of the State of Ohio, with abundant resources, with a considerable population of educated, civilized people, and with probably the best class of African natives anywhere in that section of the Black Continent—natives who are inclined to be peaceful and, according to their lights, industrious. We are proposing to help them on their way. When gentlemen on the Democratic side were asked what the money loaned was to be used for, why did they not read the clear and lucid statement of the purposes of the loan presented to the committee, rather than attempt to create the impression that most of the $5,000,000 was to be used for the liquidation of outstanding obligations. We become the first and only creditor by paying off Liberia's obligations, amounting to a little over $2,000,000. The balance is to be expended under our direction for the purpose of developing and making available her resources. We purpose to help her build roads and to establish and maintain order, to make possible the development of her commerce. In the doing of that we shall improve the opportunities of the new American merchant marine, for the possibilities of development are great and Liberia will be the one place on the Dark Continent where our flag shall be more welcome than that of any other nation. In meeting this obligation we are doing our duty, and in doing it we are laying up for ourselves the rich reward which comes to those who keep the faith. It in no wise detracts from our credit if we are also benefited by helping develop resources that will be useful to us in the future. We shall meet our obligation and aid Liberia; we shall also help ourselves. [Applause on the Republican side.]

The CHAIRMAN. The time of the gentleman from Wyoming has expired. All time has expired. The Clerk will read the resolution for amendment.

The Clerk read as follows:

Resolved, etc., That the Secretary of the Treasury be, and he is hereby, authorized, on behalf of the United States, to establish a credit with the United States for the Government of Liberia, subject to the approval of the President and in conformity with an appropriate arrangement made under his direction for that purpose, in an amount not to exceed the sum of $5,000,000, and to the extent of the credit so established, the Secretary of the Treasury is hereby authorized to purchase from that Government its obligations hereafter issued, bearing such rate or rates of interest, maturing at such date or dates, and containing such terms and conditions as the Secretary may from time to time determine; and a sufficient sum of money is hereby appropriated, out of money not otherwise appropriated, to carry out the purposes of this resolution.

Mr. HUSTED. Mr. Chairman, I move to strike out the last word. I have been very much impressed in connection with the consideration of this resolution with the fact that four American Presidents—Roosevelt, Taft, Wilson, and Harding—have all been in agreement that we as a Nation have a special and particular interest in the destiny of Liberia and owe her our protection. I have also been greatly impressed by the statement of ex-Secretary Lansing and by the statement of Secretary Hughes that we stand committed before the world in honor to carry out this obligation. I always had great respect for the ability and character of Secretary Lansing, and I have the highest regard for the character and ability of Secretary Hughes. He is one of the strongest men in this country. He is one of the great men of the country, and nobody has ever accused him, or I think ever will accuse him, of mawkish sentimentality. Secretary Lansing and Secretary Hughes know more about the facts of this matter than any of us here can know, because in their department are all of the records, and they were concerned with the negotiation of this business.

What are the facts? During the war when it was of vital interest to America and to the civilized world that we should have the resources of Liberia and that she should be on our side in that great struggle Liberia came to us and asked for a loan. We agreed to make the loan. We not only agreed to make the loan, but we asked France and Great Britain to step out of the situation and let America control it. By that very act we prevented Liberia from getting the loan from anybody else, which everybody here must believe she could easily have obtained upon her own terms. But they say now that if we do not make the loan France and Great Britain stand ready to make it. Oh, yes; they undoubtedly stand ready to make the loan, but not upon the terms and conditions upon which they would have made the loan during the war. If they make the loan now, when they are under no legal or moral obligation to make it, they will make it for their own selfish benefit by the exploitation of Liberia. Gentlemen have said that we want to make the loan in order that we may take selfish advantage of Liberian resources, but I challenge the gentlemen to name a single nation which America in all of her history

has selfishly exploited against the interest of that nation. [Applause on the Republican side.] Oh, no; America does not want to exploit Liberia, and she does not intend to permit any other nation to exploit Liberia, but America does intend to make her word good before the world. [Applause on the Republican side.]

Mr. GARRETT of Tennessee. Mr. Chairman, if I were convinced that there were an obligation, legal or moral, engendered by any act of any administration, whether Democratic or Republican, I should be the last man who as a Representative would try to avoid the fulfillment of that obligation, but I am convinced no obligation, either legal or moral, exists in this case. Gentlemen say that the administration of Mr. Wilson in 1918 made a commitment of $5,000,000 to be loaned to Liberia, and because of the fact—and this is the logic of the argument which they make—that that commitment was made it became a continuing obligation, which now, almost four years after the date named on which the alleged commitment was made, must be carried out. Let me ask gentlemen this simple, plain question: The Wilson administration lasted until March, 1921. This tentative commitment was made in 1919. Why did not the Liberian Government get the money within that time? The reason the Liberian Government did not get the money within that time was because the Liberian Government refused to comply with conditions laid down during the Wilson administration for the obtaining of the loan.

Mr. CAMPBELL of Kansas. Mr. Chairman, will the gentleman yield?

Mr. GARRETT of Tennessee. Yes.

Mr. CAMPBELL of Kansas. If that be true, then why was not the amount placed to the credit of Liberia upon the books of the Treasury Department withdrawn from her credit?

Mr. GARRETT of Tennessee. That, of course, I do not know. Possibly the question was left for negotiation; but how does that affect the moral or the legal obligation resting upon us? The fact that the money was left there to be loaned if terms could finally be agreed upon means nothing to us. This is a commercial transaction. If I go to a bank and want to borrow money and the bank says that it will let me have the money under certain conditions put in the note, and I refuse to comply with those conditions or fail to comply with them, and the bank still holds the money, leaving it there subject to further negotiations until after the period has passed when there is a legal possibility of the bank performing its part of the contract, why certainly the bank is under no obligation to loan me the money thereafter.

Mr. CHINDBLOM. Mr. Chairman, will the gentleman yield?

Mr. GARRETT of Tennessee. Yes.

Mr. CHINDBLOM. Did not Liberia perform the part in the war which she agreed to perform and which she was expected to perform?

The CHAIRMAN. The time of the gentleman from Tennessee has expired.

Mr. GARRETT of Tennessee. Mr. Chairman, I ask unanimous consent to proceed for five minutes more.

The CHAIRMAN. Is there objection?

Mr. FORDNEY. I will not object, but I move that all debate on the resolution close in 10 minutes. The gentleman from Kansas [Mr. TINCHER] wants five minutes.

Mr. GARRETT of Tennessee. All right; I will yield the floor now.

Mr. SUMNERS of Texas. I want two minutes.

Mr. GARRETT of Tennessee. Though I would like to answer the question.

Mr. GRIFFIN. Will the gentleman withhold his motion? I have an amendment at the desk.

Mr. GARNER. Mr. Chairman, the motion made by the gentleman from Michigan does not preclude the offering of amendments and speaking on them. He merely moved that debate on the resolution close and did not mention amendments.

The question was taken, and the motion was agreed to.

Mr. GARRETT of Tennessee. I yield to the gentleman from Illinois.

Mr. CHINDBLOM. I want to ask if Liberia on her part did not perform her part in the war, whether she did not do the things which were expected when this loan was promised to her by our Government?

Mr. GARRETT of Tennessee. I do not know. I do not know about that, but I do know this, that Liberia never during the Democratic administration complied with the terms which would have enabled her to obtain this loan. What she did in the war I do not know.

Mr. BURTON. Will the gentleman yield?

Mr. GARRETT of Tennessee. I will.

Mr. BURTON. Is it not true that after this $5,000,000 had been set aside in the Treasury, $26,000 advanced, our Government postponed until June, 1920, nearly two years, a year and nine months, the presentation of the terms relating to the loan?

Mr. GARRETT of Tennessee. Well, I do not know; that does not appear in the hearings.

Mr. BURTON. It appears in the letter of Secretary Hughes, which is a part of the record.

Mr. GARRETT of Tennessee. Does the gentleman mean postponed conditions? The conditions, as I understand it, were definitely laid down to the Liberian Government by the Secretary of the Treasury at the time they sought the loan, and the Liberian Government refused to comply with those conditions.

Mr. BURTON. It is on the right-hand page of the statement by Secretary Hughes. And is it not true——

Mr. GARRETT of Tennessee. What page?

Mr. BURTON. And is it not further true that after that, after Liberia had complained of the terms, our Government, during the administration of President Wilson, so far from considering the transaction as canceled and the loan as withdrawn, invited a commission to come from Liberia?

Mr. GARRETT of Tennessee. Oh, Mr. Chairman, it seems to me, if the gentleman will pardon me, that is an effort to take an undue advantage of diplomatic language. This Government did not invite a commission to come from Liberia. The Liberian Government asked if it would be agreeable for a commission to come, and this Government politely said yes, if they came with authority. And it is not fair for the gentleman from Ohio, Mr. LONGWORTH, and the gentleman from Ohio, Mr. BURTON, to continue to fill the CONGRESSIONAL RECORD full of statements that this Government invited the representatives of the Liberian Government to come here, because it did not invite them to come. At least, no Democratic administration did.

Mr. BURTON. But this is, however, true, that they continued in consultation with them. I read the statement made on page 155 from a letter of Secretary Hughes:

> Because of unavoidable delay a plan to control the application and administration of this credit was not submitted to the Liberian Government until June 15, 1920.

The CHAIRMAN. The time of the gentleman has expired.

Mr. TINCHER. Mr. Chairman, to my mind the proceedings of to-day are ridiculous. I think the Democratic side of the Chamber, where the opposition to the bill comes from, is in the most ridiculous attitude conceivable. The first gentleman who opposed it is the ranking Member on the minority side of the Ways and Means Committee. He rather generalized, and we all know by reason of his good fortune and location he will oppose every measure that is reported by the Ways and Means Committee so long as there is a Republican Congress, and this regardless, and purely as a politician, and so long as President Harding is President we know he will claim there is no good in this Government. There can be no question about that; he will do that; the country may not know it and may take some of his sayings seriously. The other gentleman, for whom I have the highest regard, always goes into things thoroughly. The gentleman from Georgia [Mr. CRISP] said that he opposed this measure, and in the same speech said that since the signing of the armistice the Democratic administration has paid out on war loans unauthorized by law $1,500,000,000. No voice on the Democratic side of the Chamber since I have been in this House has ever been raised against one dollar of that expenditure. Why did the Democrats give one billion and a half to the other countries which you now claim you had no lawful right to give them, and leave out Liberia? You only agreed to give her 2½ per cent of that amount. Some of you say it is not because they are Negroes. Then why? But what do you hope to do? This is the most political and most unheard-of fight that there has been in this House in two years that I remember. Do you think, with the testimony of Secretary Hughes, with the report from the President, that you can embarrass your Nation by denouncing your own administration as a bunch of crooks and deprive the Secretary of State of making this little $5,000,000 loan to Liberia and thereby discredit this country with the whole world?

Most of you thought the first thing this Government sent to Liberia should not be there and should not be freemen but slaves, and you are willing, in order to make political capital, in order to discredit the Secretary of State of this Government, in order to embarrass him in our diplomatic relations with other countries, you are willing to proclaim to the world that your own administration expended $1,500,000,000 unauthorized by law and not one of you, then Member of the House, ever raised a word of protest of that outrage against your Government.

Why this sudden morality? Why this sudden anxiety for the taxpayers? Every one of you knows the carrying out of this loan will not affect taxes one penny.

Mr. GARRETT of Tennessee. Will the gentleman yield?

Mr. TINCHER. No; I will not yield. I have only five minutes, and under the motion no way to get another moment.

You say, too, that if we do not make this loan England and France will. Well, if they do they probably will not pay us what they owe until after they collect it from Liberia. So what is the financial difference or condition? We will get better security perhaps from Liberia than we will from some of our other debtors. It is not a matter of principle; it is not a matter of economics. It is a matter of politics, pure and simple, in that you are willing to have the national administration embarrassed in our standing with the whole world, even at the expense of denouncing and discrediting your administration during the last four years. [Applause.]

Mr. Chairman, I yield the floor.

Mr. SUMNERS of Texas. Mr. Chairman, I move to strike out the last two words:

The CHAIRMAN. The Chair would like to state that under Rule XXIII it is provided:

> The committee may, by the vote of a majority of the Members present, at any time after the five minutes' debate has begun upon proposed amendments to any section or paragraph of a bill, close all debate upon such section or paragraph or, at its election, upon the pending amendments only (which motion shall be decided without debate); but this shall not preclude further amendment, to be decided without debate.

Amendments are now in order, but debate is closed.

Mr. GRIFFIN. Mr. Chairman, I have an amendment at the desk there, which I will ask the Clerk to report.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

> Amendment by Mr. GRIFFIN: Page 2, after the word "resolution," in line 17, strike out the period, insert a comma, and add the following: "*Provided*, That no part of the credit herein established shall be used for paying or acquiring any bonds issued by the Republic of Liberia prior to August 1, 1917."

Mr. GRIFFIN. Mr. Chairman and gentlemen: If this resolution were honestly intended to render financial help to the little Republic of Liberia, I think that all fair-minded Americans would give it hearty indorsement. On this issue there can be no partisanship and I regret that an effort seems to have been made to becloud the real issue by the injection of partisan recriminations.

My amendment aims to sift from the resolution the only feature against which there has been hurled any substantial or meritorious objection. Personally, I do not care whether the original grant of a credit of $5,000,000 for the Republic of Liberia, made on September 12, 1918, by the last administration, was or was not in conformity with the Liberty loan act. The fact is that the United States and Liberia never came to any agreement as to how the credit should be extended. If a valid grant were made, there would be no occasion to come to Congress with the present resolution. Neither does it make any difference whether the overtures for reestablishment of the credit came from Liberia or from the United States.

Support of the present resolution should depend upon its own merits. Its position here to-day is the result of an agreement signed by the Secretary of State and the Liberian Plenary Commissioner on October 28, 1921.

That agreement recites that the Government of Liberia shall require the Secretary of the Treasury of the United States to make to the Government of Liberia certain advances against a credit of $5,000,000 for certain purposes set forth in the agreement. Among these we find a provision for the advance of $1,650,000 "to purchase or redeem all of its bonds now issued and outstanding, representing the 5 per cent sinking fund gold loan due July 1, 1952," and reference is made to the agreement dated March 7, 1912, under which this loan was issued. The agreement in question was between the Republic of Liberia and J. P. Morgan & Co., Kuhn, Loeb & Co., the National City Bank of New York, and the First National Bank of New York, acting for themselves and for Robert Fleming & Co., Banque de Paris et des Pays Bas, M. M. Warburg & Co., and Hope & Co., and for others.

The total issue of bonds under the agreement was $1,700,000, and although the agreement of October 28, 1921, sets out $1,650,000 as the amount remaining unliquidated, there is actually outstanding $1,458,000.

It is interesting to note that the interest on this bond issue due January 1, 1921, has not been paid. This circumstance is significant and indicates very clearly the real purpose concealed behind this measure. There is evidently some solicitude on the part of the international bankers, not only as to the interest but perhaps as to the principal as well.

It is also interesting to note that the Republic of Liberia only realized upon the original bond issue, manipulated by the international bankers in question, about 26 cents on the dollar. It is bad enough that they should have overreached the little Republic of Liberia. I do not think we ought to allow them to overreach the United States of America.

I call your attention particularly to the last sentence of the sixth paragraph of this extraordinary agreement:

> It is understood that the Secretary of State of the United States may determine the best methods for acquiring part or all of the aforesaid bonds, but in no event shall more than par and accrued interest be paid therefor.

If this means anything at all, it means that the United States Government is to be saddled with the entire bond issue which it is naïvely restrained from acquiring at "not more than par." This is, of course, only an indirect way of giving an inflated value to bonds whose value is probably very much below par at the present time, and whose future, without extraneous assistance, is likely to be very uncertain.

The reanimation of this bond issue for the benefit of the international bankers is no part of our duty as a friend of Liberia. If we want to render a substantial aid to that struggling Republic, it seems to me that the wisest as well as the fairest and kindliest thing to do is to give it credit for the amount necessary to carry on those internal improvements which will tend to enhance its prosperity. If that is done, its creditors can very well look out for themselves. It is quite evident, however, that there is more solicitude here to-day for the investments of the international bankers than there is for the welfare of Liberia.

If I am wrong in that, the amendment which I offer will put the question to the test. My amendment proposes to add to the resolution the proviso that no part of the bond issues of Liberia prior to August 1, 1917, shall be paid or acquired by the United States. This will test the sincerity of the gentlemen who profess to be interested in the welfare of Liberia and will give the Members of this House an opportunity to help the struggling little Republic without pulling the chestnuts out of the fire for a coterie of international bankers.

The CHAIRMAN. Debate is out of order. The question is on agreeing to the amendment.

Mr. GARNER. Mr. Chairman, will the Chair hear me for a moment? I desire to submit a point of order. The gentleman from Michigan moved that all debate on the resolution close at the end of 10 minutes, but he does not include the amendments thereto. Now, does the Chair hold that the mere motion to close debate on the resolution precludes offering amendments and debating those amendments?

The CHAIRMAN. The Chair does not wish to be understood as saying that it would preclude the possibility of offering amendments. But article 6 of Rule XXIII provides that while such a motion as the gentleman from Michigan made shall not preclude amendments, such amendments must be decided without debate.

Mr. MONDELL. Mr. Chairman, if the Chair will allow me, the gentleman from Michigan [Mr. FORDNEY] I thought made a motion to close debate on the paragraph and amendments. But when the motion was put by the Chair the gentleman from Texas [Mr. GARNER] insisted that the amendment was simply an amendment to close debate on the paragraph, and that it did not close the debate on amendments. Now, I think in fairness to the statement then made and not challenged we can not now close debate on this amendment.

Mr. FORDNEY. Mr. Chairman, my intention was to close, as the gentleman has said, because I understood there was an amendment to be offered. I move that all debate on amendments——

The CHAIRMAN. Let the Chair make a statement. It seems to the Chair that we have reached the case that is now before the House—that is, of asking unanimous consent—and the gentleman has asked unanimous consent.

Mr. CAMPBELL of Kansas. The decision of the Chair is undoubtedly correct according to the rules of the House, and I ask unanimous consent that debate on the amendments offered may proceed under the five-minute rule.

The CHAIRMAN. Is there objection?

Mr. CAMPBELL of Kansas. For and against. That means five minutes for and five minutes against.

Mr. MONDELL. Mr. Chairman, I ask unanimous consent that the gentleman from New York [Mr. GRIFFIN] be allowed to debate his amendment for five minutes.

Mr. BEGG. Mr. Chairman, reserving the right to object, is that going to be the method of procedure for every amendment that is offered or only for this amendment? I will say that if it is going to be continuous I shall object to this.

Mr. MONDELL. Of course, with the understanding that there will be 10 minutes' debate on this amendment. But may I suggest this, that the better procedure is the one suggested by the gentleman from Michigan [Mr. FORDNEY]?

Mr. Chairman, I move that all debate on the resolution and all amendments thereto close in 10 minutes.

The CHAIRMAN. The committee has already decided that question by vote of the committee.

Mr. GRIFFIN. Mr. Chairman, will the Chair permit me to say a word?

The CHAIRMAN. The Chair is powerless to do anything except to observe the rules of the House.

Mr. MONDELL. My motion is certainly in order on the resolution and all amendments.

The CHAIRMAN. The Chair must rule——

Mr. GRIFFIN. Will the Chair indulge me for a moment?

The CHAIRMAN. Let the Chair make a statement. The gentleman from Wyoming moves that all debate on the resolution and all amendments thereto close in 10 minutes, if the Chair understood it.

The committee has already decided that question by vote, and there is no way to reach the question that he submits except by reconsideration of the vote that has already been taken or by unanimous consent. It can not be reconsidered in committee, and there is only one way to do it, and that is by unanimous consent. The Chair can not entertain a motion to consider a proposition that has been already decided.

Mr. MONDELL. Mr. Chairman, I ask unanimous consent that debate on the amendment now pending may be allowed for 10 minutes.

The CHAIRMAN. The gentleman from Wyoming asks unanimous consent that debate on the amendment now pending, offered by the gentleman from New York [Mr. GRIFFIN], may continue for 10 minutes. Is there objection?

Mr. BEGG. I object, Mr. Chairman.

Mr. GRIFFIN. Mr. Chairman, I ask unanimous consent to proceed for five minutes.

The CHAIRMAN. The gentleman from New York asks unanimous consent to proceed for five minutes. Is there objection?

Mr. MONDELL. I object, Mr. Chairman.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York [Mr. GRIFFIN].

The question was taken, and the amendment was rejected.

Mr. FORDNEY. Mr. Chairman, I move that the committee do now rise.

Mr. STAFFORD. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. STAFFORD. What becomes of the preamble?

The CHAIRMAN. That will be acted on in the House.

Mr. FORDNEY. Mr. Chairman, I move that the committee do now rise and report the resolution to the House with a recommendation that it do pass.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. MADDEN, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee having under consideration the joint resolution (H. J. Res. 270) authorizing the Secretary of the Treasury to establish a credit with the United States for the Government of Liberia, had directed him to report the same back to the House with the recommendation that the same do pass.

Mr. FORDNEY. Mr. Speaker, I move the previous question on the resolution.

The SPEAKER. The gentleman from Michigan moves the previous question on the resolution.

Mr. GRIFFIN. Mr. Speaker, I make the point of order that there is no quorum present.

The SPEAKER. The gentleman from New York makes the point of order that there is no quorum present. The Chair will count.

Mr. GRIFFIN. Mr. Speaker, I withdraw the point.

The SPEAKER. The gentleman from New York withdraws the point. The question is on the motion for the previous question.

The previous question was ordered.

The SPEAKER. The question is on the engrossment and third reading of the joint resolution.

The joint resolution was ordered to be engrossed.

Mr. WALSH. Mr. Speaker, is it intended to vote upon the preamble?

The SPEAKER. The Chair was not aware that there is a preamble. The question is on agreeing to the preamble.

The preamble was agreed to.

The SPEAKER. The question is on the third reading of the joint resolution.

The joint resolution was ordered to be read a third time, and was read the third time.

The SPEAKER. The question is on the passage of the resolution.

Mr. GARNER. Mr. Speaker, I make a motion to recommit.

The SPEAKER. The gentleman from Texas makes a motion to recommit, which the Clerk will report.

The Clerk read as follows:

Mr. GARNER moves to recommit House Joint Resolution 270 to the Committee on Ways and Means, with instructions to report the same back instanter with an amendment providing that no part of the moneys loaned to the Republic of Liberia under this resolution shall be used in paying any indebtedness of the Republic of Liberia which existed prior to August 1, 1914.

Mr. FORDNEY. Mr. Speaker, I move the previous question.

Mr. GRIFFIN. Mr. Speaker, I make the point of order that there is no quorum present. No; I will withdraw that.

The SPEAKER. The question is on ordering the previous question.

The previous question was ordered.

The SPEAKER. The question is on the motion to recommit. On that the gentleman from New York [Mr. GRIFFIN] makes the point of order that there is no quorum present.

Mr. GRIFFIN. I withdraw the point.

Mr. CAMPBELL of Kansas. I suggest to gentlemen on the other side to go to a school in parliamentary procedure. [Laughter.]

Mr. GARNER. We can not keep track of what is going on on account of the interruptions of the gentleman from Kansas. [Laughter.] Mr. Speaker, I call for the yeas and nays.

The SPEAKER. The gentleman from Texas calls for the yeas and nays.

The yeas and nays were ordered.

The SPEAKER. Those in favor of the motion to recommit will, when their names are called, answer "yea"; those opposed will answer "nay."

The question was taken; and there were—yeas 123, nays 166, answered "present" 2, not voting 139, as follows:

YEAS—123.

So the motion to recommit was lost.

The following pairs were announced:

On the vote:

Mr. Ward of North Carolina (for) with Mr. Graham of Pennsylvania (against).

Mr. Stevenson (for) with Mr. Darrow (against).

Mr. Cockran (for) with Mr. Treadway (against).

Mr. Snell (for) with Mr. Rosenbloom (against).

Mr. Beck (for) with Mr. Porter (against).

Mr. Linthicum (for) with Mr. Blakeney (against).

Mr. Cantrill (for) with Mr. Kirkpatrick (against).

Mr. Dominick (for) with Mr. Bixler (against).

Mr. Wingo (for) with Mr. Siegel (against).

Mr. Brand (for) with Mr. Griest (against).

Mr. Hawes (for) with Mr. Butler (against).

Mr. Collins (for) with Mr. Focht (against).

Until further notice:

Mr. Morgan with Mr. Sears.

Mr. Kiess with Mr. Martin.

Mr. Sanders of Indiana with Mr. Logan.

Mr. Winslow with Mr. Ten Eyck.

Mr. Dowell with Mr. Fields.

Mr. Johnson of South Dakota with Mr. Kitchin.

Mr. Dickinson with Mr. McSwain.

Mr. Hawley with Mr. Montague.

Mr. Boies with Mr. Raker.

Mr. McArthur with Mr. Taylor of Colorado.

Mr. Langley with Mr. Clark of Florida.

Mr. Osborne with Mr. Kunz.

Mr. Snyder with Mr. Humphreys.

Mr. Davis of Minnesota with Mr. Sullivan.

Mr. Kahn with Mr. Favrot.

Mr. Ramseyer with Mr. Mead.

Mr. Gorman with Mr. Gilbert.

Mr. Shreve with Mr. Taylor of Arkansas.

Mr. Beedy with Mr. Blanton.

Mr. Kopp with Mr. Smithwick.

Mr. Browne of Wisconsin with Mr. Drane.

Mr. McPherson with Mr. Hudspeth.

Mr. Patterson of New Jersey with Mr. Kindred.

Mr. Coughlin with Mr. Rainey of Alabama.

Mr. Connell with Mr. Campbell of Pennsylvania.

Mr. LINTHICUM. Mr. Speaker, I voted "aye." I am paired with the gentleman from Maryland, Mr. BLAKENEY. I therefore withdraw that vote and answer "present."

Mr. HAWLEY. Mr. Speaker, I voted "aye," but I have a general pair with the gentleman from Virginia, Mr. MONTAGUE. I wish to withdraw my vote and answer "present."

The result of the vote was announced as above recorded.

The SPEAKER. The question now is on the passage of the joint resolution.

Mr. MONDELL and Mr. GARNER demanded the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 148, nays 139, answered "present" 7, not voting 136, as follows:

YEAS—148.

Ackerman	Elliott	Lee, N. Y.	Pringey

So the resolution was agreed to.

The Clerk announced the following additional pairs:

On this vote:

Mr. Graham of Pennsylvania (for) with Mr. Ward of North Carolina (against).

Mr. Darrow (for) with Mr. Stephenson (against).

Mr. Treadway (for) with Mr. Cockran (against).

Mr. Rosenbloom (for) with Mr. Snell (against).

Mr. Porter (for) with Mr. Beck (against).

Mr. Blakeney (for) with Mr. Linthicum (against).

Mr. Kirkpatrick (for) with Mr. Cantrill (against).

Mr. Bixler (for) with Mr. Dominick (against).

Mr. Siegel (for) with Mr. Wingo (against).

Mr. Griest (for) with Mr. Brand (against).

Mr. Focht (for) with Mr. Collins (against).

Until further notice:

Mr. Rhodes with Mr. Gallivan.

Mr. Dowell with Mr. Fields.

Mr. Hawley with Mr. Montague.

Mr. Ramseyer with Mr. Mead.

Mr. FITZGERALD. Mr. Speaker, I voted "yea," but I understand that I am recorded "nay," and I desire to be recorded "yea." I was present during the vote on the motion to recommit and intended to vote "nay," but I understand that I am not recorded. I desire to be recorded as voting "nay" on the motion to recommit.

The result of the vote was announced as above recorded.

On motion of Mr. MONDELL, a motion to reconsider the vote by which the resolution was agreed to was laid on the table.

LEAVE OF ABSENCE.

By unanimous consent, leave of absence was granted to—

Mr. REED of West Virginia, for to-day, on account of sickness in his family.

Mr. MORGAN, for four days, on account of important business.

ENROLLED BILLS PRESENTED TO THE PRESIDENT FOR HIS APPROVAL.

Mr. RICKETTS, from the Committee on Enrolled Bills, reported that this day they had presented to the President of the United States for his approval the following bills:

H. R. 11547. An act making an appropriation for additional hospital facilities for patients of the United States Veterans' Bureau;

H. R. 10941. An act authorizing the Postmaster General to grant permission to use special canceling stamps or postmarking dies; and

H. R. 4382. An act to provide for the application of the reclamation law to irrigation districts.

EXTENSION OF REMARKS.

Mr. GRIFFIN. Mr. Speaker, I ask unanimous consent to extend my remarks upon the amendment which I offered to the resolution which has just been passed.

The SPEAKER. Is there objection?

There was no objection.

ADJOURNMENT.

Mr. FORDNEY. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; and accordingly (at 5 o'clock and 52 minutes p. m.) the House adjourned until to-morrow, Thursday, May 11, 1922, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

609. Under clause 2 of Rule XXIV, a communication from the President of the United States, transmitting, with a letter from the Director of the Bureau of the Budget, a supplemental estimate of appropriation for the War Department for the fiscal year ending June 30, 1922, for payment to Louis Leavitt, $620,623.33 (H. Doc. No. 313), was taken from the Speaker's table, referred to the Committee on Appropriations, and ordered to be printed.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII,

Mr. BURTNESS: Committee on Indian Affairs. H. R. 10211. A bill authorizing an appropriation to meet proportionate expenses of providing a drainage system for Piute Indian lands in the State of Nevada within the Newlands reclamation project of the Reclamation Service; with amendments (Rept. No. 998). Referred to the Committee of the Whole House on the state of the Union.

Mr. TINCHER: Committee on Agriculture. H. R. 5823. A bill providing for establishing shooting grounds for the public, for establishing game refuges and breeding grounds, for protecting migratory birds, and requiring a Federal license to hunt them; with amendments (Rept. No. 999). Referred to the Committee of the Whole House on the state of the Union.

Mr. HAYDEN: Committee on Irrigation of Arid Lands. H. R. 10248. A bill to amend the act of April 16, 1906, and the act of February 24, 1911, relative to the lease of surplus electric power on Federal irrigation projects; with amendments (Rept. No. 1000). Referred to the Committee of the Whole House on the state of the Union.

Mr. MONTOYA: Committee on the Public Lands. S. 2014. An act to provide for the settlement of small holding claims on unsurveyed land in the State of New Mexico; without amendment (Rept. No. 1001). Referred to the Committee of the Whole House on the state of the Union.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. CABLE: A bill (H. R. 11604) to amend an act entitled "An act to limit the immigration of aliens into the United States," and to provide for the transportation of said aliens in vessels of the United States; to the Committee on Immigration and Naturalization.

By Mr. KAHN: A bill (H. R. 11605) to amend the provisions of section 127a of the national defense act, as amended; to the Committee on Military Affairs.

By Mr. HAMMER: A bill (H. R. 11606) to provide daylight saving for the District of Columbia; to the Committee on the District of Columbia.

By Mr. PETERSEN: A bill (H. R. 11607) to establish a commission to inquire into cost conditions in the coal industry; to the Committee on Mines and Mining.

By Mr. TIMBERLAKE: A bill (H. R. 11608) to continue the land office at Sterling, in the State of Colorado, and for other purposes; to the Committee on the Public Lands.

By Mr. LAYTON (by request): Resolution (H. Res. 345) directing the Sergeant at Arms of the House of Representatives to purchase for the use of the House 1,000 copies of a book entitled "History and Validity of Federal Constitutional Amendments"; to the Committee on Accounts.

By Mr. BURDICK: Memorial of the General Assembly of the State of Rhode Island, urging the Government of the United States of America to formally recognize the present status of the Jewish people in Palestine and thus to approve the fulfillment of its yearning desire for a national home in the land of their forefathers; to the Committee on Foreign Affairs.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BOWERS: A bill (H. R. 11609) for the relief of Adah Lee Mapel; to the Committee on Claims.

By Mr. CARTER: A bill (H. R. 11610) granting a pension to Essie Moore; to the Committee on Pensions.

By Mr. CROWTHER: A bill (H. R. 11611) granting a pension to Elmira Bauer; to the Committee on Invalid Pensions.

By Mr. ELLIOTT: A bill (H. R. 11612) granting a pension to Clifford Baldwin; to the Committee on Pensions.

By Mr. KENDALL: A bill (H. R. 11613) granting an increase of pension to Lizzie M. Drayden; to the Committee on Invalid Pensions.

By Mr. LINTHICUM: A bill (H. R. 11614) granting a pension to Annie Rheb; to the Committee on Invalid Pensions.

By Mr. MOTT: A bill (H. R. 11615) granting an increase of pension to Thomas Devine; to the Committee on Pensions.

By Mr. PAIGE: A bill (H. R. 11616) granting a pension to Angelina B. Newell; to the Committee on Invalid Pensions.

By Mr. REECE: A bill (H. R. 11617) for the relief of David E. Goodwin; to the Committee on Military Affairs.

Also, a bill (H. R. 11618) granting a pension to Dudley J. Howell; to the Committee on Pensions.

Also, a bill (H. R. 11619) granting a pension to Lucy C. Range; to the Committee on Pensions.

Also, a bill (H. R. 11620) granting an increase of pension to Charles M. Lusby; to the Committee on Pensions.

Also, a bill (H. R. 11621) granting a pension to James Alford; to the Committee on Pensions.

Also, a bill (H. R. 11622) granting a pension to Benjamin Hammonds; to the Committee on Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

5544. By Mr. ANSORGE: Petition of Charles Frederick Carter, opposing bonus legislation and any tariff increases; to the Committee on Ways and Means.

5545. By Mr. BARBOUR: Petition of residents of Exeter, Calif., protesting against H. R. 9753, H. R. 4388, or S. 1948, known as the Sunday laws; to the Committee on the District of Columbia.

5546. Also, petition of residents of Stanislaus County, Calif., protesting against the enactment of H. R. 4388, H. R. 9753, or S. 1948, known as the Sunday observance bills; to the Committee on the District of Columbia.

5547. By Mr. FRENCH: Petition of E. W. Porter and other residents of Idaho, protesting against the enactment of H. R. 9753 and other Sunday bills; to the Committee on the District of Columbia.

5548. By Mr. GLYNN: Petition of Zionists of the State of Connecticut, favoring the Lodge and Fish resolutions, for a Jewish homeland in Palestine; to the Committee on Foreign Affairs.

5549. By Mr. KAHN: Petition of 2,689 citizens and residents of Missouri, in favor of the modification of the Volstead law on prohibition so as to allow the manufacture and sale of light wines and beer; to the Committee on the Judiciary.

5550. By Mr. KISSEL: Petition of the New York Post Office Chauffeurs and Mechanics' Union, Local No. 2, New York, N. Y., relative to certain conditions in the New York post office; to the Committee on the Post Office and Post Roads.

5551. Also, petition of the United Mine Workers Journal, of Washington, D. C., relative to the conditions of coal miners; to the Committee on Labor.

5552. By Mr. LINTHICUM: Petition of Harry L. Henry, of Saranac Lake, N. Y., urging favorable action on Treasury ruling 57; to the Committee on Interstate and Foreign Commerce.

5553. Also, petitions of Cahn Coblens Co., of Baltimore, protesting against proposed increased tariff on linens; W. T. Grieves & Co. and others, of Baltimore, urging protective tariff on certain canned goods; and Nicholas G. Penniman and the Davison Chemical Co., of Baltimore, opposing tax on potash; to the Committee on Ways and Means.

5554. Also, petition of the National Canners' Association, of Aberdeen, Md., opposing Senate bill 3509; to the Committee on Labor.

5555. By Mr. SUMMERS of Washington: Petition of numerous voters of Yakima, Granger, and Zillah, all in the State of Washington, protesting against the passage of House bill 9753 or Senate bill 1948; to the Committee on the District of Columbia.

5556. By Mr. TAYLOR of Colorado: Petition of citizens of Fort Collins, Colo., urging passage of the bill to restore Palestine to the Jewish people as a national homeland; to the Committee on Foreign Affairs.

5557. Also, resolution of the Lions Club of Salida, Colo., protesting against repeal of section 422 of the transportation act; to the Committee on Interstate and Foreign Commerce.

5558. By Mr. TINKHAM: Resolutions adopted by the Massachusetts Commandery of the Naval and Military Order of the Spanish-American War, relative to the strength of the Army; to the Committee on Appropriations.

SENATE.

THURSDAY, *May 11, 1922.*

(Legislative day of Thursday, April 20, 1922.)

The Senate met at 11 o'clock a. m. on the expiration of the recess.

THE TARIFF.

The VICE PRESIDENT. The unfinished business, House bill 7456, will be proceeded with.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 7456) to provide revenue, to regulate commerce with foreign countries, to encourage the industries of the United States, and for other purposes.

The VICE PRESIDENT. The Secretary will state the pending amendment.

The ASSISTANT SECRETARY. The next amendment of the Committee on Finance is, on page 4, line 16, where it is proposed to strike out the words "ammonium nitrate" and the comma.

The VICE PRESIDENT. The question is on agreeing to the committee amendment.

Mr. HARRISON. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The reading clerk called the roll, and the following Senators answered to their names:

Ball	Frelinghuysen	McCormick	Simmons
Borah	Glass	McCumber	Smoot
Brandegee	Gooding	McKellar	Spencer
Bursum	Hale	McLean	Stanley
Calder	Harreld	McNary	Sterling
Capper	Harris	Nelson	Sutherland
Caraway	Harrison	Newberry	Swanson
Colt	Heflin	Nicholson	Townsend
Culberson	Johnson	Oddie	Underwood
Curtis	Jones, Wash.	Overman	Walsh, Mass.
Dial	Kellogg	Page	Warren
Dillingham	Kendrick	Phipps	Watson, Ga.
du Pont	King	Poindexter	Watson, Ind.
Edge	Ladd	Pomerene	Weller
Elkins	La Follette	Rawson	Willis
Fletcher	Lenroot	Robinson	
France	Lodge	Sheppard	

Mr. HEFLIN. I wish to announce that the Senator from Nebraska [Mr. NORRIS], the Senator from New Hampshire [Mr. KEYES], and the Senator from Illinois [Mr. MCKINLEY] are engaged at a hearing before the Committee on Agriculture and Forestry with reference to the Muscle Shoals project.

Mr. DIAL. I desire to announce that my colleague [Mr. SMITH] is unavoidably detained. I ask that this announcement may continue through the day.

The VICE PRESIDENT. Sixty-six Senators have answered to their names. A quorum is present. The question is on agreeing to the committee amendment.

PETITIONS AND MEMORIALS.

Mr. WILLIS presented petitions of W. G. Dressel and sundry other citizens of Convoy and Ed Delaet and sundry other citizens of Paulding, all in the State of Ohio, praying for the imposition of a tariff duty of $2 per hundred pounds on imported Cuban sugar, which were referred to the Committee on Finance.

He also presented a resolution of the Builders' Exchange, of Akron, Ohio, favoring the enactment of legislation transferring the functions of the Railroad Labor Board to the Interstate Commerce Commission or the creation of a new board of five members, to be appointed by the President, all of whom shall represent the public and whose decisions shall be reviewable by the Interstate Commerce Commission, which was referred to the Committee on Interstate Commerce.

Mr. CAPPER presented a resolution adopted by the convention of the Eastern Osteopathic Association at Atlantic City, N. J., favoring the enactment of legislation for the promotion of physical education in the United States, which was referred to the Committee on Education and Labor.

He also presented a petition of sundry citizens of Dodge City, Kans., praying for the passage of the Dyer antilynching bill, which was referred to the Committee on the Judiciary.

Mr. PAGE presented the memorial of John W. Dow and sundry other citizens of Reading and Felchville, in the State of Vermont, remonstrating against the enactment of legislation providing for compulsory Sunday observance in the District of Columbia, which was referred to the Committee on the District of Columbia.

Mr. SHEPPARD presented petitions of sundry citizens in the State of Texas, praying for the enactment of legislation to control the traffic in narcotic drugs, which were referred to the Committee on Finance.

Mr. NEWBERRY presented a resolution adopted by the Detroit (Mich.) Federation of Labor, favoring the enactment

of legislation permitting the manufacture and sale of beers and light wines, which was referred to the Committee on the Judiciary.

He also presented petitions of sundry citizens of Vassar, North Branch, Silverwood, Clifford, Caseville, Pigeon, Owosso, Linwood, Saginaw, Ashley, Shepherd, Capac, Au Gres, and Caro, and also sundry other citizens, all in the State of Michigan, praying for the imposition of a tariff duty of $2 per hundred pounds on imported Cuban sugar, which were referred to the Committee on Finance.

REPORTS OF COMMITTEES.

Mr. POINDEXTER, from the Committee on Public Lands and Surveys, to which was referred the bill (H. R. 7812) to extend the time for cutting timber in the Coconino and Tusayan National Forests, Ariz., reported it without amendment and submitted a report (No. 699) thereon.

Mr. McKELLAR, from the Committee on Military Affairs, to which was referred the bill (S. 99) to correct the military record of Edgar Durfee, reported it with amendments and submitted a report (No. 700) thereon.

Mr. CAPPER, from the Committee on Claims, to which was referred the bill (H. R. 6628) for the relief of the owners of the British steamship *Clearpool*, reported it without amendment and submitted a report (No. 701) thereon.

ENROLLED BILLS AND JOINT RESOLUTION PRESENTED.

Mr. SUTHERLAND, from the Committee on Enrolled Bills, reported that May 10, 1922, they presented to the President of the United States the following enrolled bills and joint resolution:

S. 1813. An act for the relief of the owner of the steamer *Mayflower;*

S. 1814. An act for the relief of the owner of the steam lighter *Cornelia;*

S. 1817. An act for the relief of the owners of the schooner *Horatio G. Foss;* and

S. J. Res. 132. Joint resolution to authorize the printing of journals, magazines, periodicals, and similar publications, and for other purposes.

BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. McCUMBER:

A bill (S. 3580) to extend the time for the construction of a bridge across the Red River of the North at or near the city of Pembina, N. Dak.; to the Committee on Commerce.

A bill (S. 3581) to provide for the expansion and development of Sullys Hill National Park, N. Dak.; to the Committee on Public Lands and Surveys.

By Mr. LADD:

A bill (S. 3582) granting amnesty in certain cases; to the Committee on the Judiciary.

By Mr. NICHOLSON:

A bill (S. 3583) to amend section 9 of the act entitled "An act to provide for stock-raising homesteads, and for other purposes," approved December 29, 1916; to the Committee on Public Lands and Surveys.

By Mr. CALDER:

A bill (S. 3584) authorizing the erection of a public building at St. George, Richmond County, N. Y.; to the Committee on Public Buildings and Grounds.

By Mr. SMOOT:

A bill (S. 3586) to authorize the leasing of public lands in the Territory of Alaska for grazing and fur-farming purposes; to the Committee on Public Lands and Surveys.

THE MUSCLE SHOALS PROJECT.

Mr. NORRIS. Mr. President, I introduce a bill by request. It does not originate with me. I did not draw it, although I am told that it is a modification of a bill I introduced which is now pending before the Committee on Agriculture and Forestry.

In the hearings which have taken place before the committee on the Muscle Shoals proposition Mr. Lloyd, a former Representative in Congress from Missouri, appeared and made a very interesting contribution to our hearings in the way of suggested modifications to the bill, and in order to get it properly before the committee and give the Members of the Senate also an opportunity to examine it he prepared a bill. I am introducing it by request, so that it can be better considered. I ask to have it referred to the Committee on Agriculture and Forestry.

The bill (S. 3585) to provide for the manufacture of explosives for the use of the Army and Navy, to provide for the manufacture of fertilizer for agricultural purposes, to incorporate the Federal Chemical Corporation, and for other purposes, was read twice by its title and referred to the Committee on Agriculture and Forestry.

TARIFF BILL AMENDMENTS.

Mr. LODGE submitted an amendment intended to be proposed by him to House bill 7456, the tariff bill, which was ordered to lie on the table and to be printed.

Mr. SPENCER submitted an amendment intended to be proposed by him to House bill 7456, the tariff bill, which was ordered to lie on the table and to be printed.

Mr. TOWNSEND presented four amendments intended to be proposed by him to House bill 7456, the tariff bill, which were ordered to lie on the table and to be printed.

AMENDMENTS TO RURAL HOMES BILL.

Mr. PHIPPS submitted three amendments intended to be proposed by him to the bill (S. 3254) to encourage the development of the agricultural resources of the United States through Federal and State cooperation, giving preference in the matter of employment and the establishment of rural homes to those who have served with the military and naval forces of the United States, which were referred to the Committee on Irrigation and Reclamation and ordered to be printed.

AMENDMENT TO NAVAL APPROPRIATION BILL.

Mr. FLETCHER submitted an amendment proposing to eliminate from the naval appropriation bill the following paragraph, "The authorization contained in section 2 of the naval appropriation act for the fiscal year 1921 for the employment of 500 reserve officers in the aviation and auxiliary service is hereby repealed," intended to be proposed by him to House bill 11228, the naval appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

ELECTION OF SENATORS.

Mr. McKELLAR submitted the following resolution (S. Res. 289), which was referred to the Committee on Rules:

Resolved, That the Standing Rules of the Senate be, and the same are hereby, amended by inserting, after Rule VI, an additional rule, as follows:

STATEMENT OF RECEIPTS AND EXPENDITURES OF CANDIDATE FOR NOMINATION FOR UNITED STATES SENATOR.

Every person who shall be a candidate for nomination at any primary election or nominating convention, or for indorsement at any general or special election, as Senator in the Congress of the United States, shall, not less than 10 nor more than 15 days before the day for holding such primary election or nominating convention, and not less than 10 nor more than 15 days before the day of the general or special election at which he is seeking indorsement, file with the Secretary of the Senate at Washington, D. C., a full, correct, and itemized statement of all moneys and things of value received by him or by anyone for him with his knowledge and consent, from any source, in aid or support of his candidacy, together with the names of all those who have furnished the same in whole or in part; and such statement shall contain a true and itemized account of all moneys and things of value given, contributed, expended, used, or promised by such candidate, or by his agent, representative, or other person for and in his behalf with his knowledge and consent, together with the names of all those to whom any and all such gifts, contributions, payments, or promises were made for the purpose of procuring his nomination or election.

Every such candidate for nomination at any primary election or nominating convention, or for indorsement or election at any general or special election, shall, within 15 days after such primary election or nominating convention, and within 30 days after any such general or special election, file with the Secretary of the Senate a full, correct, and itemized statement of all moneys and things of value received by him or by anyone for him, with his knowledge and consent, from any source, in aid or support of his candidacy, together with the names of all those who have furnished the same in whole or in part; and such statement shall contain a true and itemized account of all moneys and things of value given, contributed, expended, used, or promised by such candidate, or by his agent, representative, or other person for and in his behalf with his knowledge and consent, up to, on, and after the day of such primary election, nominating convention, general or special election, together with the names of all those to whom any and all such gifts, contributions, payments, or promises were made for the purpose of procuring his nomination, indorsement, or election.

Every such candidate shall include therein a statement of every promise or pledge made by him, or by anyone for him with his knowledge and consent, or to whom he has given authority to make any such promise or pledge, before the completion of any such primary election or nominating convention or general or special election, relative to the appointment or recommendation for appointment of any person to any position of trust, honor, or profit, either in the county, State, or Nation, or in any political subdivision thereof, or in any private or corporate employment, for the purpose of procuring the support of such person or of any person in his candidacy, and if any such promise or pledge shall have been made the name or names, the address or addresses, and the occupation or occupations of the person or persons to whom such promise or pledge shall have been made shall be stated, together with a description of the position relating to which such promise or pledge has been made. In the event that no such promise or pledge has been made by such candidate that fact shall be distinctly stated.

No candidate for Senator of the United States shall promise any office or position to any person, or to use his influence or to give his support to any person for any office or position, for the purpose of procuring the support of such person, or of any person, in his candidacy; but such candidate may, within the limitations and restrictions and subject to the requirements of this rule, contribute to political committees having charge of the disbursement of campaign funds.

No candidate for Senator of the United States shall give, contribute, expend, use, or promise, or cause to be given, contributed, expended,

used, or promised, in procuring his nomination and election, any sum in the aggregate in excess of the amount which he may lawfully give, contribute, expend, or promise under the laws of the State in which he resides: *Provided*, That no candidate for Senator of the United States shall give, contribute, expend, use, or promise any sum in the aggregate exceeding $10,000 in any campaign for his nomination and election: *Provided further*, That money expended by any such candidate to meet and discharge any assessment, fee, or charge made or levied upon candidates by the laws of his State, or for his necessary personal expenses, incurred for himself alone, for travel and subsistence, stationery and postage, writing or printing (other than in newspapers), and distributing letters, circulars, and posters, and for telegraph and telephone service, shall not be regarded as an expenditure within the meaning of this rule and shall not be considered any part of the sum herein fixed as the limit of expense and need not be shown in the statements herein required to be filed.

The statements herein required to be made and filed before the general election at which such candidate seeks election need not contain items of which publicity is given in a previous statement, but the statement required to be made and filed after said general election shall, in addition to an itemized statement of all expenses not theretofore given publicity, contain a summary of all preceding statements.

Every statement herein required shall be verified by the oath or affirmation of the candidate, taken before an officer authorized to administer oaths; and the depositing of any such statement in a regular post office directed to the Secretary of the Senate, duly stamped and registered, within the time required herein, shall be deemed a sufficient filing of any such statement under this rule.

This rule shall not be construed to annul or vitiate the laws of any State, not directly in conflict herewith, relating to the nomination or election of candidates for the offices herein named, nor to exempt any such candidate from complying with such State laws.

Nothing contained in this rule shall limit or affect the right of any person to spend money for proper legal expenses in maintaining or contesting the results of any election.

No person willfully violating any of the foregoing provisions shall be deemed qualified to become a Member of the Senate.

Upon a petition being filed with the Secretary of the Senate, duly sworn to by not less than five citizens of the State in which it is alleged that this rule has been violated, such petition setting forth the particular facts upon which the alleged violation is based, it shall be the duty of the said Secretary of the Senate to deliver said petition to the Presiding Officer of the Senate, who shall at once lay the petition before the Senate, and it shall be printed in the RECORD and referred to the Committee on Privileges and Elections, which shall hear testimony as to its allegations, reach its conclusions, and report its findings and recommendations to the Senate. Should the Senate by majority vote find that any of the provisions of said rule have been willfully violated, the person claiming the certificate of election shall be deemed to have been disqualified from the beginning and never to have been a Member of the Senate.

DUTY ON SUGAR.

Mr. NICHOLSON. I present a communication which I have received from Mr. C. C. Hamlin, a citizen of Colorado Springs, in my State, which contains a great deal of valuable information. It has relation to sugar production in Cuba and the United States. I ask that it may be printed in the RECORD in the usual 8-point type.

There being no objection, the communication was ordered to be printed in the RECORD in 8-point type, as follows:

COLORADO SPRINGS, COLO.,
April 27, 1922.

Hon. SAMUEL D. NICHOLSON,
United States Senate, Washington, D. C.

MY DEAR SENATOR: I have been following with some concern the propaganda with which Congress is being flooded, the purpose of which is to have the duty on sugar fixed so low that Cuba's war increase in production may find a market here. If this war increase is to be absorbed in the United States it is obvious that it must displace an equal quantity of our domestic production, and this would mean the destruction of the home industry, as I will later attempt to show.

This propaganda had its origin with the seaboard refiners. They have always been the enemies of the domestic industry. Through their influence sugar was placed on the free list in the Simmons-Underwood bill, although the war intervened and prevented its becoming effective. Their position is easily understood. Every ton of beet sugar produced means one less for them to refine, and the competition of beet sugar prevents their control of prices and markets.

Recently this propaganda of the refiners has been taken up by another group of men who are seeking the same end, but for different reasons. I speak of certain New York bankers, promoters, and speculators, who extended unwarranted credits on Cuban sugars at war prices and who took advantage of the "sugar boom" to expand Cuba's production beyond all reasonable limits and foist on the American public tens of millions of stock on the glowing promise that war-time prices and profits would continue indefinitely.

These companies are "war babies" in the fullest sense of that term, and now these gentlemen ask that we kick our own children out of the house to make way for theirs.

I use the term "war babies" advisedly. Prior to the war the price of sugar was low, but the industry was reasonably prosperous, both in this country and in Cuba. Supply and demand were well balanced. Cuba was prospering as she had never prospered before, and we were enjoying a valuable export trade to the island, although the balance of trade was steadily against us. At that time we were consuming some 4,000,000 tons annually, approximately half of which was produced, in about equal proportions, by the continental United States and her insular possessions. Due to the preferential tariff granted to her under the reciprocity treaty, Cuba enjoyed a monopoly in the furnishing of the other half. Competition between the two, or rather the three sources of supply, maintained fair prices to the consumer.

During the war, however, conditions changed. In 1913 Cuba produced 2,597,732 tons, in 1919 she produced 3,971,776 tons, an increase of over 50 per cent.

The favorite argument advanced by these propagandists is that the tariff imposes an undue burden on the consumer. They assume that the full duty is added to the price.

It is not my purpose to enter upon a discussion of the economic features of a tariff or its effect on prices. Experience shows, however, that this effect is different under different circumstances, and that the full tariff is not necessarily or usually added to the cost. When six-tenths of a cent per pound was added to the sugar duty under the emergency tariff the price declined. Some one had absorbed the increase. The seaboard refiner fixes the price of sugar based on the c. i. f. cost of Cuban raws, New York. Beet sugar sells 20 cents below this price. Here again is an absorption of the tariff to that extent. Porto Rico often undersells Cuba, which she can do by reason of the fact that her sugars enjoy free admission into the United States. This affects all sugars in our markets and results in a tariff absorption to the extent of the cut.

The effect of a tariff varies at different times and under different circumstances, and while to contend that prices are not affected by it would be to admit the futility of a protective tariff, still no general rule can be applied which will accurately measure such effect.

There is, however, another element in price making which is more potent and more to be feared than the tariff. I refer to the power to fix prices and control distribution.

We can reach and control monopolies and combinations within our boundaries. Beyond them we are powerless.

It is not necessary to indulge in speculation or theory to establish this fact with respect to sugar. Recent history teaches us what could and doubtless would be done in this direction were the domestic industry destroyed.

We entered the war in April, 1917. On August 10 of that year the food control act went into effect. The domestic crop of sugar had been marketed and the country had to look solely to Cuba for its supplies. On August 22, in a memorandum to the President calling attention to the difficulties confronting him, Mr. Hoover, who had been appointed Food Administrator, said:

Certain Cuban sugar producers—who are out of our reach—have combined to force up the price of the remaining 1917 Cuban crop, prior to the new crop in December, and have lifted the price of raw sugar in New York from 5 cents in June to 7.5, duty paid, on August 16, and this against a three-year pre-war average of 4.2 cents. The recent advance of 1.6 cents alone would represent an added tax upon the American people of over $30,00,000 by the end of December.

Soon after this the producers of sugar in the United States and its possessions voluntarily placed their output in the hands of Mr. Hoover at a price 1¾ cents below the price of Cuban sugar. By reason of his control of this crop, then in the making, and because of the ability of the Government to regulate shipping the Food Administrator was able to purchase the 1918 Cuban crop and thereby supply our people with sugar at a reasonable figure so long as this sugar lasted.

In 1919 Attorney General Palmer succeeded Mr. Hoover, and while still regulating the price of the domestic product he refused to purchase the 1919 Cuban crop.

What happened in 1920 and the early part of 1921 constitutes one of the most fantastic episodes in the history of speculation in a food necessity. A world shortage of sugar was heralded though none existed, and raw sugars advanced rapidly. They reached the unheard-of price of 23 cents per pound, while in the East, where Cuba supplies the market, granulated sugar sold as high as 35 cents per pound. During this period the manufacturer of beet granulated was receiving from 10 cents to 12 cents per pound for his product.

It has been estimated by reliable authority that this debauch of speculation and manipulation cost the American consumer some $600,000,000, and from what I know of the situation, it is my opinion that this estimate is conservative.

Were the speculators in Cuban sugars satisfied with this stupendous price? Not at all. They saw no top, and held their supplies off the market for still higher prices.

In the late spring of 1921 the bubble burst and Cuba awakened to the fact that while she was holding back her supplies 800,000 tons of dull duty-paying sugars from 44 countries

had found their way into our markets. This sugar Cuba should have supplied. Had she done so at the price allowed by the Attorney General to Louisiana for her crop—which was from 5 cents to 7 cents above that which the producers of beet sugar were allowed—she would have had some $400,000,000 of American money with which to meet her obligations here and maintain her financial house in good order at home. As it was, she went into the grinding campaign of 1922 with a carry over of 1,200,000, and during the month of January Cuban raws sold c. i. f. New York as low as 1⅞ cents per pound. It is this surplus which has demoralized the sugar industry and will continue to do so until normal production is again reached. This time does not seem near, as the estimate on the present Cuban crop is 3,600,000 tons, which, with her carry over of 1,200,000, is much more than enough to supply all of the requirements of the United States after excluding her own production, and that of Hawaii, the Philippines, and Porto Rico.

Cuba not only pulled down her own house but destroyed that of her neighbor as well. The control of the price of beet sugar by the Attorney General was not relinquished until August, 1920. The manufacturers were about to enter upon their manufacturing campaign. At the instance of the Government in the spring of that year, they had contracted with the growers of beets to pay $12 per ton, more than twice the pre-war price. While the sugar-beet crop was probably the only profitable one which the farmer produced in 1920, the manufacturers, caught in the Cuban jam, were compelled to market their output at a loss estimated at $50,000,000. Some were forced to the brink of bankruptcy, and all were compelled to exercise their credit to the limit. Owing to the Cuban surplus, the 1921–22 crop of beet sugar is now being marketed at a loss in many cases, and in all at a ridiculously narrow margin of profit, under the present tariff of 1.6 cents on Cuban sugar.

The control of the sugar supply necessary to supply our needs by those, to repeat the words of Secretary Hoover, "who are out of our reach," cost the American consumer some $50,000,000 in 1917 and $600,000,000 in 1920–21. This is more than the entire duty which the Government will realize from sugar import under the present tariff in 10 years at the present rate of importation.

In continental United States 700,000 acres of our best agricultural lands are devoted to the production of sugar beets. One hundred thousand farmers are engaged in growing them. Eighty-five thousand field workers and 35,000 mill operatives are employed in the industry. They give to our people a war ration of sugar which can always be depended on. They furnish the competition which is necessary to prevent monopoly and insure reasonable prices to the consumer. They introduce the element of crop rotation which is so necessary to our agriculture. They keep at home millions of dollars which would otherwise be sent abroad to pay for foreign supplies. It is hardly fair to ask that this industry be destroyed to cover Cuba's economic blunders, and surely the American Congress will never again place it in the power of any set of men to monopolize a great food necessity, fix its price, and control its distribution.

The importance of this question is my excuse for writing you at such great length.

Very truly yours, C. C. HAMLIN.

DUTY ON POTASH.

Mr. FLETCHER. I desire to have inserted in the RECORD, in 8-point type, an article by W. A. McRae, Commissioner of Agriculture of Florida, on the subject of potash.

There being no objection, the matter referred to was ordered to be printed in the RECORD in 8-point type, as follows:

WHO OUGHT TO FEED THE BABY?

It is proposed by the tariff bill now before Congress, with prospects of its passing, that a new "infant industry" be adopted and reared exclusively by the farmers. It is generally understood that it will prove to be an expensive rascal to bring up and that it will have no gratitude for its "raising" after the job is done.

In effect, the bill proposes to penalize the farmers of this country, who have just raised two crops at a loss, for trying to reach maximum production with greatest efficiency. A sliding scale of tariff on potash is proposed that will mean that millions of dollars annually must be poured into the subsidized potash producers of the United States by the farmers exclusively.

When a tax is placed on commercial business or manufacturing the tax is merely passed on to the ultimate consumer, and the consuming public pays it. This can not be done by the farmer. He does not mark his goods with a cost price and a selling price and hold it till he gets it. Neither does he send out paid drummers to take orders for goods before they are made, so that he can calculate cost and add the profit before a wheel turns, as do manufacturers. He takes chances on the weather, insects, and fungi as to production and goes into the market asking, "What will you give?" How can he pass on to the consumer a special tax? Not at all.

The farmers of the United States use about 7,000,000 tons of fertilizers a year. One of the essential constituents of all complete fertilizer is potash. The cost of producing potash in the United States has been from $100 a ton to $125 a gross ton, and the output is entirely inadequate to supply the demand, the maximum being slightly over 200,000 gross tons of crude potash, representing 54,000 tons of K_2O. The importations from Germany in 1913 were a million tons, valued at $13,000,000.

Taking 1913 as a normal year, the imports of potash are approximately 1,000,000 gross short tons, containing 250,000 short tons of available potash (K_2O).

According to the schedule of the proposed tariff the potash content of 250,000 tons will carry a duty of 2½ cents a pound for the first two years, totaling $11,400,000 for each year, or $22,800,000 for the two years. The third year it will carry a 2 cents a pound duty, or $10,000,000. The fourth year the rate is 1½ cents a pound, or $7,500,000. The fifth and last year it will have a 1 cent a pound rate, or $5,000,000. Using round numbers only, the grand total for the five years would be $45,300,000.

This is more than has been imported annually since the beginning of the World War, and the only thing that will keep it from going back to normal will be a continuance of the general depression.

Here is a $45,300,000 wall of protection thrown around an "infant" industry for the first five years of the hothouse process, the worst feature of which is that this $45,300,000 tribute is to be exacted from a comparatively few people, who have no way of distributing the burden to the whole population. The advocates of the bill take great pains to figure out how much per acre or per capita this amounts to and dwell upon the smallness per acre unit or inhabitant. If it is really good policy to feed this infant at public expense it ought to be done by all the people and not by a select few. No one pays it but the farmer; so that in effect this tax is in reality a vocational tax. The great bulk of it is paid by the Southern States; so that it is in effect a sectional tax. Approximately 40 per cent of it is paid by those who do not own the land they till; so that in effect it is to a large extent a bonus to be extracted from the poorest class of tenant farmers. Eighteen million dollars is rather high tribute to be levied on the tenant farmers to build up an industry in five years that is supposed to be a benefit to 120,000,000 people.

If this infant must be fed from a silver spoon for five years, there is only one way to do it honestly, and that is by subsidy. "But," says some one, "the tariff will get money into the Treasury and the subsidy will take it out for the benefit of the potash manufacturers."

In answer to this it is only necessary to point to the fact that if the law accomplishes its purpose very little of the tribute exacted from the farmer in the way of higher price potash will go to the Federal Treasury, as the production in this country will rapidly develop to where it can supply the demand. In this case all the tribute paid by the farmer goes directly to the manufacturers of potash and not to the Government.

If this enormous tax of $45,300,000 is paid by subsidy, by all of the people, then the Nation as a whole will be interested and will stop paying the subsidy at the end of five years. But if it is heaped on the farmers alone it is doubtful, indeed, if they can get rid of this tax in five years.

If past experience is any criterion, whether this tax is paid by subsidy or paid by the farmers, we may expect that this pampered infant will be in position to show Congress at the end of five years that to fail to extend the protecting arm a few more years will be equivalent to stabbing to the heart the splendid child of its past good treatment.

The picture to be held up to view will be ghastly. An industry nurtured to life and vigor only to be deliberately murdered in cold blood. Those behind the business will be no kinder of heart than are the gang that is now fighting the proposal to lease Muscle Shoals plant for the purpose of making atmospheric nitrogen, which is a companion element of phosphoric acid and potash in commercial fertilizer.

There has not been such depression and despondency among the farmers of this country in 50 years, and to add this burden to them just at this time will be adding insult to injury by penalizing them for trying to make it possible for the world to live.

W. A. MCRAE,
Commissioner of Agriculture.

TALLAHASSEE, FLA., *May 5, 1922.*

FLOOD CONTROL IN THE MISSISSIPPI VALLEY.

Mr. McKINLEY. I ask unanimous consent to have printed in the RECORD and appropriately referred a letter from the general manager of the New Orleans Association of Commerce, with a copy of a letter inclosed which President Harold W. Newman, of the New Orleans Association of Commerce, wrote to the Mississippi River Commission.

There being no objection, the letters were referred to the Committee on Commerce and ordered to be printed in the RECORD, as follows:

NEW ORLEANS ASSOCIATION OF COMMERCE,
May 9, 1922.

Hon. WM. B. McKINLEY,
Senate Office Building, Washington, D. C.

DEAR SENATOR McKINLEY: I attach copy of a letter which President Harold W. Newman, of the New Orleans Association of Commerce, has to-day written the Mississippi River Commission.

Please read it. It will open your eyes to some important facts which were not brought out during your trip on the Mississippi River.

Please also cause this letter to the commission to be printed in the CONGRESSIONAL RECORD. The country ought to have access to this information.

Very truly yours,

WALTER PARKER, *General Manager.*

NEW ORLEANS ASSOCIATION OF COMMERCE,
SECOND PORT, U. S. A.,
May 8, 1922.

THE WAY OUT.

The Mississippi River Commission has jurisdiction over the Mississippi River from Rock Island, Ill., to the Gulf. It has no jurisdiction over the tributaries and source streams of the Mississippi River. Consequently it can deal only with the floods after they have formed. Result—a restricted policy of relying on levees alone.

The people of the Mississippi Valley need a comprehensive policy, which will, in fact, and all the time protect them from the flood menace, and they have launched a campaign through the organized trade bodies, chambers of commerce, and the public generally throughout the valley to develop and make effective a new vision, a new enterprise, and a great vigor, which will not be denied for the elimination of the flood menace.

The attached letter to the Mississippi River Commission makes the situation clear.

—

MAY 8, 1922.

To the honorable Mississippi River Commission, St. Louis, Mo.

GENTLEMEN: At a conference held last Saturday between New Orleans business men and the United States Senators and Representatives composing the congressional flood investigating committee, Congressman BEN HUMPHREYS, speaking for the members of the committee, said in effect:

"Federal engineers, beginning in 1822 and extending to the present day, since 1879 through the Mississippi River Commission, have investigated and reported on the flood problem in the Mississippi River, and the consensus of their opinion is that levees alone must be relied on for the protection of life and property in the Mississippi Valley.

"Down here we recognize the absolute necessity for the best levee system that can be built. But we are not content to stop there, as the Mississippi River Commission has done. We want the best levees. We also want all else that can be done to control the floods, regulate stream flow, and reduce the pressure of the floods on these levees, and we are preparing now to draw to our support in this most just cause all of the aid and assistance we can rally.

"We have been told the Mississippi River Commission stands for levees and levees alone.

"We have reached the conclusion such a policy can only result from restricted authority and limited jurisdiction. In no other way can we account for so restricted a policy with relation to so great a menace and so great a problem.

"Great floods form in the Ohio, the Missouri, and other tributaries and join in the Mississippi. There and there only they become a responsibility of the Mississippi River Commission. Your commission has no jurisdiction over the source streams, nor the drainage basins of these source streams, therefore can not take such action as may be necessary to check flood formation in the smaller streams high up, thus in some measure reducing the flood menace lower down.

"Under these circumstances we can understand your past policy of levees only, as levees alone are possible as a means of flood control between Cairo and the mouth of Red River.

"We can not, however, understand your reluctance to consider the installation of spillways on the lower reaches of the river, where tidewater outlets are near at hand. It seems to us that regulated and controlled relief to the river down here would protect us and at the same time be far better for the river itself than the invariable crevasses which the river itself makes in the levees whenever it chooses.

"We have watched the denudation of our forest areas throughout the source-stream country and the consequent hastening of the flood run-off. Thus far nothing adequate has been done by any agency of the Federal Government to replant the forests, thus retarding the run-off and creating an opportunity for the rainfall and melting snows to soak into the ground.

"We have known for many years that the ground-water level throughout the great valley is dropping all the time, and that the reserve moisture supply in the soil is now so limited as to be the cause of serious concern to agriculturists throughout the upland region of the valley. Yet no adequate move has been made by any agency of the Federal Government to start the restoration of the most necessary reserve supply of moisture in the agricultural soil of the valley. We are told that contour plowing when generally resorted to will restore this moisture supply, check soil erosion, and reduce flood formation in the source streams of the Mississippi.

"In 1912 the Pittsburgh Flood Commission, supported solely by the citizens of Pittsburgh, made its report showing that by building a few dams in the streams feeding the Monongahela and Allegheny Rivers, which form the Ohio at Pittsburgh, the flood level at Pittsburgh can be greatly reduced and the floods there be brought under control. It is reasonable for us to assume that other works on other tributaries of the Ohio can be made to so far control the flood peak in the Ohio as to greatly reduce the volume of water passing into the Mississippi at any one time during great flood flow.

"We are assured by men who have made a study of Missouri River conditions that a great deal of the surplus flood waters which now reach the Missouri from its source streams can be diverted and soaked into dry lands far removed from the Mississippi. In this way untillable lands may be made available for agriculture, and the flood flow of the Missouri be brought under some sort of control, to the end that in times of maximum flood flow there will be a reduced peak load to join the peak load of the Ohio at Cairo.

"While these matters are of the gravest concern to the people of all the valley, as well as to ourselves, we understand that the Mississippi River Commission can not concern itself with them because the Mississippi River Commission's jurisdiction is limited to the Mississippi River proper from Rock Island to the Head of the Passes.

"We must have relief from an intolerable condition.

"We insist that the Federal Government admit its responsibility for interstate flood flow.

"We will therefore insist that our Senators and Representatives in the National Congress obtain for us a broader treatment of this problem than seems possible by the Mississippi River Commission under its limited jurisdiction.

"We ask that your commission join in our effort to obtain this broader treatment of a very old problem.

"We must have a new vision and a new enterprise brought to bear.

"You gentlemen have much information and many facilities. You also desire to see this problem solved. Your powerful cooperation will be of the greatest value, and we sincerely trust that we will have it.

"We are determined to leave nothing undone to get this broader treatment. To this end we are asking the help of the Mississippi Valley Association, of all the chambers of commerce in the 27 States between the two great mountain ranges, Canada and the Gulf, of all the investors in the valley, and of the business men and people generally.

"We have reached the conclusion a 'levees only' policy is a hopeless policy and one not worthy of this splendid country, and we want it changed.

"May we have your assurance of cooperation at the earliest possible moment?"

Very truly yours,

NEW ORLEANS ASSOCIATION OF COMMERCE,
HAROLD W. NEWMAN, *President.*

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. Overhue, its enrolling clerk, announced that the House had passed a joint resolution (H. J. Res. 270) authorizing the Secretary of the Treasury to establish a credit with the United States for the Government of Liberia, in which it requested the concurrence of the Senate.

DEFLATION POLICY OF FEDERAL RESERVE BOARD.

Mr. WATSON of Georgia. Mr. President, in the New York Herald of this morning there appears, in what is called a "box," a statement which should not go unchallenged, and which I now challenge. I will read what appears in the Herald:

ENOUGH CASH CIRCULATING TO GIVE EVERYBODY $48.89.

(Special dispatch to the New York Herald.)

NEW YORK HERALD BUREAU,
Washington, D. C., May 10.

If all money in circulation in the United States were equally distributed your share would be $48.89.

The Treasury Department to-day announced that figure as the per capita circulation on May 1. It is 92 cents less than it was on April 1. Total money of all kinds in circulation is $5,352,255,730. On April 1 it was $5,446,161,844. On May 1 1921, the total in circulation was $6,158,170,819.

The per capita figures are based upon an estimated population of 109,468,000.

In 1879 the total amount of money in circulation was only $816,266,721. At that time the country, with a population of 48,231,000, had a per capita circulation of $16.92.

Mr. President, that statement is absolutely false. There are not $20 per capita in circulation. The money has been destroyed by the infamous Federal Reserve Board. I will not now consume the time of the Senate, because I have no desire to delay the Republicans in passing the pending bill, which they have a right to pass because they have a majority; let them take the responsibility and pass it; but at some future time I intend to go into the financial question and show up to the country the shameless and ruinous policy of the Federal Reserve Board.

LIBERIAN LOAN.

The joint resolution (H. J. Res. 270) authorizing the Secretary of the Treasury to establish a credit with the United States for the Government of Liberia was read twice by its title.

The PRESIDING OFFICER (Mr. WILLIS in the chair). The joint resolution will be referred to the Committee on Foreign Relations.

Mr. McCUMBER. Mr. President, I am doubtful if the joint resolution should go to the Committee on Foreign Relations. It came from the Committee on Ways and Means of the House, and I understand the papers relating to it are with the Committee on Finance. In the absence of the chairman of the Committee on Foreign Relations, I suggest that it lie on the table for the present.

The PRESIDING OFFICER. In the absence of objection, the previous order will be vacated and the joint resolution will lie on the table.

THE TARIFF.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 7456) to provide revenue, to regulate commerce with foreign countries, to encourage the industries of the United States, and for other purposes, the pending question being on the amendment of the committee, page 4, line 16, to strike out the words "ammonium nitrate."

Mr. KING. Mr. President, I wish to inquire of the chairman of the committee, the Senator from North Dakota [Mr. McCUMBER], if the purpose of the amendment is to transfer ammonium nitrate to the free list or to assign it to some basket schedule, where it would carry an ad valorem duty of 25 per cent?

Mr. McCUMBER. Ammonium nitrate is one of those items which are found in the twilight zone and it was a serious question with the majority of the committee whether it should be placed upon the free list or have a duty. I must admit the committee has wobbled a little upon that matter; first taking the duty off and placing it upon the free list, and then afterwards suggesting an amendment to place it back with a duty of 1 cent per pound.

Mr. KING. Is that the purpose now?

Mr. McCUMBER. A motion will be made to place a duty of 1 cent a pound, taking it off the free list. So the Senator may discuss it from that viewpoint.

Mr. KING. I assume some of the "wobblers" on the other side will move to amend by putting a 1 cent duty upon it. For that purpose I yield the floor.

Mr. McCUMBER. I stated that it was a serious question with the committee whether it should be placed upon the free list or whether it should bear a duty of 1 cent per pound. Of course, in the bill as passed by the House it bore a duty. The Senate committee placed it upon the free list and reduced some of the other duties to correspond with it. There is a question whether or not the committee may have made a mistake about it.

Mr. KING. I am sure when the committee decided to put it on the free list they did the right thing, and I am sorry they yielded to the demands of the trusts when they decided to put a duty on it.

Mr. FRELINGHUYSEN. Mr. President, I am not a "wobbler" on this question. The committee to-day voted to place a duty of 1 cent a pound on ammonium nitrate. It is not in response to the demand of any trust. It is in response to no single interest whatsoever. The question is one of policy, whether we are going to have an ammonium-compound industry in this country or whether we are going to buy all of this product from Germany. It has a direct relation with the Muscle Shoals project. If the Muscle Shoals project is operated at any time in the future, these products will be manufactured there.

Prior to the war ammonium nitrate was not an important product, and if it were not for German war-time development, which made it easy for her to produce cheaply the huge quantity of either the nitrate or the sulphate, the tariff on nitrate would not be important.

The consumption of ammonium nitrate is about 26,000 tons annually in explosives. The consumption of ammonium sulphate is 400,000 tons in fertilizers. The aim of the protection is against the German air nitrogen plants, which were subsidized and developed because Germany was cut off from the ocean and could not obtain Chilean nitrate. We are all familiar with that situation and the effort to make these nitrates in this country and how Germany became independent through a special process. The German plants were war built; they were government subsidized. Over 90 per cent of Germany's production and sales is controlled by a trust, the Stickstoff Syndicate. The German air nitrogen plants cost over $400,000,000, and because they represent a war-time subsidy no interest on the investment need be charged to the manufacturing costs. This gives the Germans an unnatural and unfair advantage over the American producer. The ammonium nitrates of this country have been produced through the great coke industry, and the question is whether we are going to encourage and stimulate the industry in this country, which has developed through a varied number of sources and by varied interests. The protection which we seek is against one German trust, the Stickstoff Co., which controls this nitrate process.

The imports have increased since the World War. In 1917 they were 77,000 pounds; in 1919 they were 509,000 pounds; in 1920 they were 28,000,000 pounds; and for nine months in 1921 they were 31,000,000 pounds.

The whole question is whether we are going to put 1 cent per pound duty upon ammonium nitrate and encourage its production here, or whether we are going to put it on the free list and purchase it from the German trust. I know of no trust in this country controlling this product; there is no monopoly here. It comes, I repeat, from varied sources. I say I had rather have it purchased, controlled, manufactured, and produced here through an American industry than through a German trust. That is a simple question involved here: Whether this great chemical commodity, which was so necessary for war purposes and the production of explosives, and which is now so necessary in time of peace, is to be protected or not? I am in favor of its protection.

Mr. EDGE. Mr. President, will the Senator yield for a question?

The VICE PRESIDENT. Does the Senator from New Jersey yield to his colleague?

Mr. FRELINGHUYSEN. I yield to my colleague.

Mr. EDGE. Does the Senator know approximately how many separate industries in this country manufacture this particular product?

Mr. FRELINGHUYSEN. I know that there were $100,000,000 expended in this country to develop the coke industry in order to produce ammonium nitrate. I do not know whether the manufacturers are now operating; but I know that with adequate protection they can operate. I know that 30,000,000 pounds are being imported into this country from Germany, and if we give the American manufacturers the protection which is proposed our manufacturing plants will be operated and the article will be produced in this country.

Mr. KING. Mr. President, the Senator from New Jersey has made a very strong and passionate appeal for the amendment which he has offered to the bill as reported by the Committee on Finance. I think that some of the views expressed by the Senator from New Jersey are founded upon a reasonable attitude toward the development of home industry, but I believe that some of the facts to which he has referred have not been quite accurately stated by him. By that I mean we have in the United States all of the elements and conditions under which this industry, if it has not been developed, may be developed to very large proportions.

The Senator from New Jersey alluded to the fact that the Germans had a process of nitrogen fixation. I suppose the Senator referred to what is known as the Haber process, but we know that that process is utilized in the United States to-day. Indeed, if I am not mistaken, under the seizure and confiscation act of the Alien Property Custodian, so far as the ownership and the right to use the Haber process in the United States is concerned, that right has been denied to Germans and is vested in the Chemical Foundation.

I will digress for a moment to repeat what I have heretofore stated upon the floor of the Senate, that 4,500 patents were confiscated by Mr. Garvin as the Alien Property Custodian and were sold to the Chemical Foundation; that is, it was a pretended and fraudulent sale. One thousand other patents were confiscated and sold to the Bayer interests. I may be in error, but my present recollection is that the Haber process of nitrogen fixation from the atmosphere was included within the 4,500 German patents which were illegally confiscated by the Alien Property Custodian. However, the sale not having been attacked, carries with it, undoubtedly, some sort of a title, either equitable or legal. Probably the legal title passed to the Chemical Foundation which holds it mala fides in trust for the owners. However that may be, the Chemical Foundation Co. is asserting title to it. The courts, until the sale shall be set aside by appropriate action, will undoubtedly affirm the validity of its acts. Therefore we have nothing to fear from Germany by reason of the manufacture of nitrogen under the Haber process, for, having the patent here, the moment that any nitrogen of that character was brought to the United States an action in equity would lie to enjoin the disposition of the proceeds or the utilization of the patent because it would be an infringement of the rights of the American owners.

So Germany is prevented from coming to our shores with her products made under the Haber process.

My good friend, the able Senator from New Jersey, has alluded to the fact that Germany has $400,000,000 invested in what he denominates these nitrogen plants. Of course, the Senator does not mean that the $400,000,000 is devoted to the manufacture of nitrogen or the nitrogenous compounds covered by the amendment which he has offered. Germany had——

Mr. FRELINGHUYSEN. Mr. President——

The VICE PRESIDENT. Does the Senator from Utah yield to the Senator from New Jersey?

Mr. KING. Let me complete the sentence, and then I will be glad to yield. Germany had a considerable amount of money

invested in chemical works. Some of those chemical works, as the Senator knows, produce various chemical products, some nitrogenous products, some carbon products, some aluminum products, some various forms of acids, and some of them are devoted to the manufacture of explosives; but the amount of capital invested in Germany in all of her chemical works has been grossly exaggerated by the Chemical Trust in the United States and its indefatigable agents, some of whom, like Doctor Herty, went to Germany and came back here and spread false reports relative to industrial conditions obtaining in Germany. I now yield to the Senator from New Jersey.

Mr. FRELINGHUYSEN. The information that I have—and it does not come from Doctor Herty any more than it comes from Doctor Pickerell—is that the German air-nitrogen plants cost over $400,000,000.

Mr. KING. I regret that the Senator should go to fountains of information that are so inaccurate. I can only repeat what I said a moment ago, that Germany did not have $400,000,000 of property or capital devoted to the manufacture of nitrogen per se, or to the product covered by the amendment offered by the able Senator from New Jersey.

Mr. FRELINGHUYSEN. Mr. President——

Mr. KING. I yield.

Mr. FRELINGHUYSEN. Does the Senator challenge the statement I have made that we imported 30,000,000 pounds in the first nine months of 1921?

Mr. KING. I will come to that in due time. The Senator must not get impatient. I will take one statement of the Senator's at a time when I am addressing myself to his remarks, and I will approach them in due order. I repeat what I was about to say when interrupted by my learned friend.

Mr. SIMMONS. Mr. President, if the Senator will pardon an interruption, I think perhaps I can throw some light on the question asked by the Senator from New Jersey with reference to the importations.

Mr. KING. I am glad to yield.

Mr. SIMMONS. Mr. President, before the war we were producing in this country practically no ammonium nitrate, which is nothing in the world but what we call nitrogen in connection with its use as a fertilizer.

Mr. KING. Mr. President, if the Senator will pardon me, he means that we did not produce it in that form. We produced ammonium, and we had nitrogenous products as the result of the operations of coke ovens and their chemical activities in large quantities.

Mr. SIMMONS. Undoubtedly. If that is what the Senator was discussing, I misunderstood him.

Mr. KING. I shall be very glad to have the Senator conclude the point he had in mind.

Mr. SIMMONS. I will wait until the Senator has finished.

Mr. KING. I think I assent, Mr. President, to what my leader, under whose banner I am so happy to fight, has said.

Mr. SIMMONS. The Senator was discussing one thing when I thought he was discussing another.

Mr. KING. I think I assent to what he says, that this particular form of nitrogen, ammonium nitrate, perhaps, was not manufactured to any great extent in the United States, but we all know that carbon, which we have in such great quantities, is the basis of a large number of products. It may not be utilized in the production of some compounds of which it forms, perhaps, the base or an important constituent at a given time, and yet it is here, and the other elements which would make the compound of which carbon might be the base also exist, and, as the needs of business or trade demand, those elements are brought together to form the compound; call it a synthetic compound, or any other term that may be employed. So we were producing in the United States large quantities of nitrogen. We had nitrates in the United States. We have, as everybody knows, large quantities of coal, and we are developing now and have been developing for a number of years what we call the coke-oven by-products. I have no doubt that we are producing to-day more of the by-products of the coke oven than almost any other, if not any other, nation in the world; and since Germany has been so stripped of her coal mines, it is obvious that she can not begin to compete with the United States in the productions where carbon is the base, or the productions in which the products of the coke ovens form any important or constituent part.

Our bituminous coal, rich in carbon and possessing nitrogenous elements, is being converted, largely through the instrumentality of the coke ovens, into coke; and the by-products of the coke ovens, from which we obtain our coal tars and our intermediates and nitrogenous products, are becoming of enormous importance and advantage in our economic and industrial development. So, Mr. President, we have nitrogen here; we have in rich abundance the elements that would constitute ammonium nitrate. No country in the world is so rich in ammonium and ammonium compounds as the United States.

My friend referred to the secret process, the Haber process. That is being employed at Syracuse, N. Y., by the Allied Chemical Co., which, as I have asserted over and over again, is a trust, a corporation which has absorbed 10 or 15 or 20 of the large chemical concerns of the United States, and possesses a capital exceeding $300,000,000. That corporation is interested in this tariff; that trust wants this tariff which has been suggested by the able Senator from New Jersey. It has this Haber process. It is making nitrogen as other chemical companies are making nitrogen in the United States.

Mr. President, this product is used in the making of explosives, as was said by my friend. Did any country in the world approach the United States in its capacity to manufacture explosives during the recent war? I take off my hat, in the language of the street, to the skill, the genius, the ability, the organizing capacity of the Du Pont Trust and of other chemical organizations in the United States. We manufactured in the United States millions of pounds of explosives before we entered the war and shipped them across the Atlantic to the allied nations. Some of these great chemical companies made millions, tens of millions of dollars in their trans-Atlantic explosives business. They manufactured powder, and sold it at an enormous profit, and other explosives needed in the war. When we entered the war we were equipped to manufacture explosives of a very large volume. The United States expended considerable money in the erection of factories and plants to increase the output of our munitions, the output of our explosives, poison gases, and so forth. It is a matter of common knowledge that a certain gentleman in the Bureau of Mines discovered helium, and some of the chemists connected with that branch of the Government service gave to the world explosives, I was about to say, of a higher character—I will let that word stand—than those which had been developed over the sea.

I have heard the statement made upon the floor of the Senate, repeating in part the words which were used by Mr. Secretary Baker, that if the war had not ended as it did—that is to say, if it had continued for a very short time longer—we had perfected explosives and poison gases to such a degree that we could have dropped a few bombs upon Berlin or upon other German cities and practically destroyed them, and killed all of the people residing therein.

Mr. McCUMBER. Mr. President——

The VICE PRESIDENT. Does the Senator from Utah yield to the Senator from North Dakota?

Mr. KING. I yield.

Mr. McCUMBER. Possibly the Senator will come to the point concerning which I am about to ask him; but in order that he may, I just want to suggest in a sentence or two what are the principal features in the matter which actuated the committee.

I stated some time ago that the majority of the committee were on a little uncertain ground as to whether they should put a duty upon this product or whether they should place it upon the free list; that they wobbled, as I say, from the one view, and changed their minds and came to another view.

Mr. KING. Let me ask the Senator a question: Does the Senator think the majority of the committee will have enough votes on the other side to adhere to the view which was exhibited in the bill when you moved to transfer this product to the free list? If so, I will not talk.

Mr. McCUMBER. No; I will state that just the contrary is the case. The majority at the meeting this morning determined in favor of the 1-cent duty which I stated to the Senator; and I will explain to the Senator the reason for the action of the committee at a former meeting, or at least a majority. Sometimes the majority is determined by the number that are present at the meeting and may vary if one Senator is gone or another one comes or is absent.

Mr. KING. Oh, I appreciate that.

Mr. McCUMBER. The Senator can therefore understand that the action taken does not always represent even the absolute majority view of all of the majority members; but this product was placed upon the free list in the beginning because there seemed to be a strong expression of view at the time, at least, that any other course would be placing too heavy a duty upon explosives. In other words, if we added a cent or three-quarters of a cent a pound to nitrate, we would have to give a compensatory duty to the explosives which are made from nitrate, and those explosives are used to a great extent over the entire country, and in making these explosives from 25 to 80 per cent of nitrate is used. Probably there would be an average of 75 per cent of nitrate used, and the question was

whether we should sustain the industry in the United States or put this product on the free list in order to prevent this extra tax upon the industries of the country which must use the blasting element.

We use in this country about 30,000,000 pounds of this material annually. That is the consumption. In the first nine months of 1921 we imported a whole year's supply, and that is evidence that we can not manufacture it in competition with the foreigner. The foreigner is now supplying us entirely with the product; and the question is whether we should continue this industry, giving the wages of the industry to our laborers and the profits to the American manufacturer, or whether we had better surrender it entirely to the foreigner and say that it is one of those cases in which we are not justified in retaining the home industry because of the cost to the other industries. That was the real question for and against which, as I say, the committee wobbled to some extent.

Mr. SIMMONS. Mr. President——

The VICE PRESIDENT. Does the Senator from Utah yield to the Senator from North Carolina?

Mr. KING. I do.

Mr. SIMMONS. I want to make an inquiry of the Senator from North Dakota. I am a little bit troubled about this. Where is this product made in this country?

Mr. McCUMBER. It is made in the coke ovens as a by-product, according to my understanding. I am not sufficient of a chemist to say positively.

Mr. SIMMONS. Can the Senator advise me how much is now being produced in this country? The Senator just said that we require about 30,000,000 pounds annually.

Mr. McCUMBER. During the war we made considerable, but we are making practically none now—almost none—and, as I have stated, in the first nine months of 1921 we imported more than enough to supply American consumption for a full year, so practically there is none being made in the United States.

Mr. SIMMONS. Was not that increased importation of the total necessary supply of the country because we were not making the material in this country?

Mr. McCUMBER. Why, yes.

Mr. SIMMONS. Because we had ceased to make it in this country?

Mr. McCUMBER. It was because we are not making it in this country, and we are not making it in this country because the importations can come in at such a price that we can not compete. If the Senator will look back in 1920, he will see that we imported 28,476,000 pounds, or almost enough to supply the American market for that year.

Mr. SIMMONS. I want to say, if the Senator from Utah will pardon me, that for years before the war we were not making any of this article in this country; that we were relying entirely upon the coke ovens of other countries, while our coke ovens that could supply the same material were not making it. During the war, of course, we began to make it to some extent, but I had supposed that the manufacturers of this country, finding its manufacture not quite satisfactory or profitable, had decided that they would lapse back to the condition that existed before the war, when they refused to adopt the appliances that were necessary to enable them to save this waste of the coke ovens, and that the present situation was the result of that attitude of mind on the part of the manufacturers of this country.

Mr. McCUMBER. My understanding is that it is simply a question of cost of manufacture in this country, and the importing cost of the same product.

Mr. KING. Mr. President, I was not quite sure from the remarks of the Senator whether he was more concerned in protecting the explosive industry than in protecting the ammonium nitrate industry per se.

Mr. McCUMBER. If we allow the nitrate to be put upon the free list, of course it will not be necessary to give any compensatory duty to the explosive industry. The question in my mind was whether the added cost to the user of the explosive would be greater than the benefit to be derived from manufacturing it in the United States.

Mr. KING. Then, as I understand the Senator, if you add a duty to ammonium nitrate you must add a compensatory duty to all the products into which it enters as a constituent part, whether explosives or anything else.

Mr. McCUMBER. Probably 90 per cent of it is used in explosives, and even on a basis of 80 per cent there would be eight-tenths of 1 cent added to every pound of explosive. If it were 75 per cent, of course, it would be a little less than that. So, taking everything into consideration, if we give a duty of a cent a pound we shall have to give practically a cent a pound additional on the explosives, or very near that.

Mr. KING. I invite the Senator's attention to the fact that whenever you add a duty to what might be denominated the raw material or an intermediate and you seek to add compensatory or equivalent rates to the product of which that first product forms a part, you are not satisfied with adding to the other articles seeking a compensatory duty merely the first duty, but there are pyramiding processes employed in the meantime which are carried forward, and the man who uses in the finished product raw material upon which a tariff has been fixed wants a higher tariff than that which was attached to the raw material.

Mr. McCUMBER. Of course, the manufacturer may increase his price, and ordinarily he will fix the price at as high a figure as he can and yet supply the market.

Mr. KING. As high as he can and as high as you let him by your tariff bill.

Mr. McCUMBER. The rule which would govern the committee in the laying of a compensatory duty would be simply to allow, as a compensatory duty, a rate on the finished product proportionate to that laid on the raw material, and if it were eight-tenths of a cent, not more than eight-tenths of 1 cent a pound should be given upon the explosive as a compensatory duty.

Mr. KING. In theory that is very beautiful, but in practice it does not work out that way. When you add a duty to raw material or to an intermediate product which is employed in the process of completing the manufactured product, the last person who gets the tariff is not satisfied to have merely the first tariff which was laid upon that primary product, but he wants, first, his tariff; then he goes back and ascertains the tariff upon the primary product and wants that added, plus various other elements and factors which, in the end, swell the price of the finished product to the great mass of the American people, who ultimately have to bear all these burdens.

That is one of the evils of our tariff system, Mr. President. Those who desire reasonable protection must feel the inequalities and the injustices and the wrongs and the oppressions which are perpetrated in a tariff bill, and they are compelled to make departures from reasonable positions which they have assumed. They postulate a condition which may be ideal, but in the realization of their desires they are compelled to abandon the position which their better judgment and their conscience directs that they should assume.

Just a word now in reply to my good friend the Senator from North Dakota. It is evident, Mr. President, that the Senator intends to give a tariff to the great Powder Trust of the United States. That is true, is it not?

Mr. McCUMBER. Mr. President, I have stated that if we give a duty of 1 cent per pound upon nitrate, out of which explosives are manufactured, we ought to give an equivalent duty on the explosives. If 80 per cent is used we ought to give a duty of eight-tenths of a cent upon the explosives. Otherwise the nitrate would come in in the form of explosives instead of in the form of nitrate. That, of course, necessarily follows.

Mr. SMOOT. It does not apply to powder; it refers to high explosives.

Mr. McCUMBER. It will have little effect on the price of powder; it will generally apply to the price of explosives.

Mr. FRELINGHUYSEN. I understand the compensatory duty would be on dynamite and blasting powder.

Mr. SMOOT. And no other.

Mr. KING. That is, on explosives.

Mr. McCUMBER. When the Senator said powder I understood him to mean blasting powder.

Mr. KING. I did not mean powder used for shooting in a gun, but I understood it to apply to explosives used by farmers, used by miners, and used by contractors. Indeed, you can not build your railroads without it. Even in New York, where they are building houses right in the city, they have perfected their explosive methods so that now they put in explosives and break the rock without destroying contiguous buildings.

Mr. McCUMBER. As I stated, the real question before the committee was whether it was proper to add this duty to the cost to all the producers or let the industry be destroyed in the United States. It is a question of policy, as to which course is the best in the long run.

Mr. KING. I want to thank the Senator for his frankness, and I am sure that if he continues to assume that same frank attitude in the discussion of these questions, as I know he will, we shall get along very much better.

Mr. FRELINGHUYSEN. Mr. President——

The PRESIDING OFFICER (Mr. WILLIS in the chair). Does the Senator from Utah yield to the Senator from New Jersey?

Mr. KING. I yield.

Mr. FRELINGHUYSEN. In order that the direct question may be before the Senate, I present for the committee the following amendment to the amendment.

The PRESIDING OFFICER. The Secretary will state the amendment to the amendment.

The READING CLERK. On page 4, line 16, in lieu of striking out the words "ammonium nitrate" insert:

Ammonium nitrate, 1 cent per pound.

Mr. KING. Mr. President, I have not quite concluded, but the junior Senator from Idaho [Mr. GOODING] wants to speak at this time, and if I yield the floor to accommodate him I desire to ask the chairman of the committee if he will invoke the rule on me when I resume my discussion in a few moments.

Mr. McCUMBER. I certainly shall not do so.

Mr. KING. Then I yield the floor for the present to the Senator from Idaho.

Mr. GOODING addressed the Senate. After having spoken for a few minutes,

Mr. McNARY. Mr. President——

The PRESIDING OFFICER. Does the Senator from Idaho yield to the Senator from Oregon?

Mr. GOODING. I yield.

Mr. McNARY. Mr. President, I think the speech of the Senator from Idaho is of unusual importance. I know the Senator from Idaho has given a great deal of thought to the subject, which he is treating in a very interesting historical manner. I am certain many Senators who have no knowledge of the fact that the Senator from Idaho is addressing the Senate would like to be present to hear him. I therefore suggest the absence of a quorum.

The PRESIDING OFFICER. The absence of a quorum is suggested. The Secretary will call the roll.

The roll was called, and the following Senators answered to their names:

Borah	Heflin	Nelson	Simmons
Brandegee	Hitchcock	Newberry	Smoot
Capper	Johnson	Nicholson	Spencer
Colt	Jones, Wash.	Norbeck	Sterling
Culberson	Kendrick	Oddie	Sutherland
Curtis	Keyes	Overman	Swanson
Dial	King	Page	Townsend
Dillingham	Ladd	Phipps	Underwood
du Pont	Lenroot	Pittman	Wadsworth
Edge	Lodge	Poindexter	Walsh, Mass.
Fletcher	McCumber	Pomerene	Warren
Gooding	McKellar	Rawson	Watson, Ga.
Hale	McKinley	Robinson	Weller
Harris	McLean	Sheppard	Williams
Harrison	McNary	Shortridge	Willis

Mr. SHEPPARD. The Senator from Montana [Mr. WALSH] is detained on official business.

Mr. KEYES. I have been requested to announce that the Senator from Nebraska [Mr. NORRIS] is detained on official business.

The PRESIDING OFFICER. Sixty Senators have answered to their names. A quorum is present.

Mr. GOODING. Mr. President, I hope I may be allowed to conclude my remarks without interruption.

You may search down through the annals of the past as far back as authentic history tells the story of the rise and fall of other civilizations, but nowhere can you find a nation that can be compared, even in the smallest way, with that of our own great country.

For since the Declaration of Independence first proclaimed the birth of a new nation, we have made more progress and advancement and given more to humanity than all of the Old World combined. As I grow older and come in closer touch with this great Government of ours, I marvel at the wisdom and forethought of the founders of this Republic, and I am impressed with one thought, that in their great work they asked and received the guidance of that all-wise Providence that shapes and directs the destiny of nations. Through that inspiration they laid the foundation of this Government, which will live as long as life, liberty, and the pursuit of happiness are accepted as the cardinal principles of this Republic.

In their wisdom they created this Senate, a legislative body that never dies, and how well this Senate has met the responsibilities imposed upon it by the founders of this Republic is best told in the greatness of our country.

Mr. President, the life work of the Senators upon this floor has been along many different lines. In some cases their pathways have been far apart, surrounded by different conditions and environments. So it is not strange that Senators have different viewpoints on many of the great questions that come before this body for consideration. In the discussion of the new tariff bill, that is now before the Senate, we shall hear these different views amplified to the fullest degree.

It has been my hope for many years that, in my lifetime, the American people would come to accept the great principle of protection as a permanent policy of this Government, but in this I fear I shall be disappointed, for the Democratic Party is more of a free-trade party to-day than ever before in its history. And I am going to prove that statement, Mr. President, so far as agriculture is concerned, when I take up the Underwood-Simmons bill for discussion. The leader of the minority [Mr. UNDERWOOD] makes it very clear that the Democratic Party is opposed to protection. In reply to a question asked by the Senator from Michigan [Mr. TOWNSEND] when the lactic-acid amendment was under consideration the Senator from Alabama [Mr. UNDERWOOD] said:

Of course, the Senators on this side of the Chamber are not in favor of protective tariff. If we were levying a revenue tariff, I think 1½ per cent would be sufficient, but from the standpoint of a protectionist, if we are to levy a protective tariff, if the basic rate on the 30 per cent concentration is to be 2 cents a pound, I can not see how a rate above 6 cents a pound can be justified on the higher concentration.

So, Mr. President, the issue between the two great political parties on the tariff question is squarely and clearly drawn, the same as it has been ever since the birth of the Republican Party. The Republican Party is fighting for protection to American labor and American industries. The Democratic Party is fighting against protection to American industries and American labor, or for free trade or for a tariff for revenue only. That is the issue, Mr. President, between the two great political parties, and it must not be misunderstood here in the Senate or by the American people.

Henry Clay said a hundred years ago that the question of free trade and protection would never be settled until it was settled on the side of protection. I do not believe it is going to take another hundred years to settle that question, Mr. President, for I believe the people of America are coming to understand that this country can not exist without proper protection to all of our industries.

Mr. President, for more than 250 years, with the exception of a few years in the early history of this Republic, the American people have been discussing the question of free trade and protection in some form or other. The question of free trade and protection has overshadowed all other public questions in America. Upon this question political parties have divided, and for many years it threatened the destruction of the Union. We fought the Revolutionary War for political independence, that we might have the right to protect our own industries, to trade with our own people, and to sell our products in every market of the world without British domination.

England's attitude toward the Colonies for more than a hundred years before the Revolutionary War was one of enforced slavery. The Colonies were permitted to till the soil and furnish raw material for the British manufacturers, but beyond that they were forbidden to go. William Pitt, a friend of America, declared in the British Parliament that the American Colonies had not even the right to manufacture a horseshoe nail except by permission of the British Government. As early as 1699 the British Parliament, upon the complaint of the English manufacturers, prohibited the American Colonies from exporting any wool, woolen yarns, or cloth produced in the Colonies to any other country.

In 1732 the British Parliament prohibited the exportation of hats from one colony to another, and no hatter was allowed to have more than two apprentices at a time. The Carolinians were forbidden to cut down the pine trees of their vast forests in order to convert the wood into staves or the juice into turpentine and tar for commercial purposes. "To print an English Bible would have been an act of piracy."

In 1750 the British Parliament passed an act which provided that iron should be admitted to Great Britain without duty, but prohibited the erection in the Colonies of slitting or rolling mills or steel furnaces. Such establishments as were already in operation were allowed to continue. The intention of the law was to confine the iron works of the Colonies to the production of iron for the British manufacture.

Lord Chatham said in Parliament that he would not have the Americans make a hobnail. Another noble lord added, "nor a razor to shave their beards." Lord Brougham said in the House of Commons in 1816, "It is well worth while to stifle in the cradle those rising manufactories in the United States which the war had forced into existence." Mr. Robertson, another member, speaking of the British policy, confessed that it "was nothing more nor less than for us"—the English—"to get a monopoly of all markets for our manufacture and to prevent other nations, one and all, from engaging in them."

And so for more than a hundred years the American Colonies had free trade forced upon them with a vengeance. They saw a country before them rich in natural resources beyond descrip-

tion, and they knew and understood that those countries which did not turn their raw materials into the finished product never reached a high state of development or accumulated great wealth.

They knew and understood that England's policy, which denied them the right to turn their raw materials into the finished product, meant enforced servitude to Great Britain. England is far more diplomatic to-day with her trade of the world than she was a hundred years ago. But the English manufacturers leave nothing undone to stifle industries in other countries when they have an opportunity to flood that country with their cheap manufactured products. What is true of England is true of other great commercial nations.

Mr. President, there has never been a time in the history of our country when we needed protection more than we do to-day to safeguard our ports from importations of cheap foreign products, for from the beginning of our existence as a Government we have always paid a higher price for labor than any other country on earth. The difference in the price paid for labor to-day in America and that paid in foreign countries is greater than at any time in our existence as a Nation.

The Hon. C. J. Hannon, member of Parliament from Birmingham, in an address to the members of the National Union of Manufacturers at Birmingham on December 7 of last year quoted the following prices paid for labor at that time in the leading countries of the world:

An ounce of gold purchases 17.22 hours of labor in the United States; 50.16 hours in Great Britain; 95.5 hours in Japan; 117.3 hours in France, and 201.66 hours in Germany.

Mr. President, I wish to submit for the consideration of Senators a comparative statement of earnings and living costs in six different countries for carpenters, plasterers, painters, bricklayers, machinists, and shoemakers. It takes an average of 45 States in the Union in making the comparison with the other countries and all the figures given are based upon the American gold dollar. I ask that the table may be printed in the RECORD as a part of my remarks.

The PRESIDING OFFICER (Mr. WILLIS in the chair). The Senator from Idaho asks to have printed in the RECORD the table which he has described. In the absence of objection, the order is made.

The table is as follows:

	Average daily wage.					
	Germany.	Italy.	Japan.	France.	England.	United States.
Carpenters	$0.72	$0.90	$1.30	$1.38	$3.38	$6.62
Plasterers	.72	.76	1.53	1.66	3.38	8.47
Painters	.72	.80	1.53	1.71	3.08	6.80
Bricklayers	.75	.76	1.53	1.55	3.38	8.72
Machinists	.72	.82	1.50	1.38	2.90	6.40
Shoemakers	.64	.72	1.23	1.20	2.40	6.00
Average	.71+	.79+	1.43+	1.46½	3.08+	7.17+
Cost of food:						
Beef, per pound	.18	.20	(1)	.21	.28	.29
Pork, do	.20	.22	(1)	.30	.30	.38
Horse meat, do	.10	.15	(1)	.18	None.	None.
Rice, do	.04	.05	.07	.07	.08	.09
Cost of clothing:						
Men's suits, ready made	8.00	10.00	(2)	18.00	15.00	20.00
Men's suits, made to order	10.00	12.00	(2)	22.00	18.00	30.00
Rent: Average per week for family house	1.56	2.00	2.80	3.00	3.50	8.75

[1] Little or none used.
[2] Nearly all Japanese workers make their own clothing.

Wages, food, clothing, and rent are average figures. Some localities will show higher figures and others lower than these.

American wages are the average in 45 cities. All wages based on 8 hours' work and pay, excepting in Japan.

WHAT THE WORLD'S WAGES WILL BUY.

This table shows the purchasing power of the average wages paid in 31 trades. Each figure represents the equivalent in food of an average day's wage in the country specified.

To illustrate, a German worker could buy with his day's wage 3¾ pounds of beef or 3¼ pounds of pork, whereas an American worker with his wage could buy 21 pounds of beef or 15½ pounds of pork. Very much the same ratio applies to other foodstuffs.

Purchasing power of an average day's wage (pounds).

	Germany.	Italy.	Japan.	France.	England.	United States.
Beef	3¾	4	None.	6½	9¾	21
Pork	3¼	3½	None.	4½	9	15½
Horse meat	6¾	5	None.	6½	None.	None.
Rice	17	15	16	19	34	65

Mr. GOODING. Mr. President, unless we have courage enough to give these industries the difference in the cost of production here and abroad we shall not start the wheels of industry, nor give an opportunity for employment to the millions of men who have been idle for more than a year, many of them depending largely upon charity for existence.

Mr. President, I am going to review briefly the history of free trade and protection from the close of the Revolutionary War down to the present time. I shall have no trouble in proving that protection to American industries is responsible for our mighty growth and development. I shall have no trouble in proving that protection to American labor is responsible for our American standard of living, our American standard of wages, and our American standard of citizenship that is the best in all the world. On the other hand, I shall have no trouble in proving that free trade or any tariff law that has reduced the duties below the line of protection always brought poverty, hardships, and privations. And to this rule there is no exception, regardless of what political party made the reduction.

At times the disastrous effects of our free trade laws have been delayed owing to wars in Europe or wars in which our own country was involved, but without exception before those free trade laws were repealed, free soup houses had to be established in all of our great cities, and charity forced to feed the poor to prevent death from starvation.

No period in American history, Mr. President, describes more fully the disastrous result of free trade than the eight years following the Revolutionary War, during which time this country existed under the Articles of the Confederation. Those years that we lived under the Articles of Confederation were the nearest approach to free trade of any period in the history of this Republic, and this period has been named by some of our historians as the period of the greatest crisis in our history.

Under those articles each State reserved the right to regulate its own commerce, not only with other States but also with foreign countries. After peace was restored, foreign nations, by playing one State against the other, succeeded in securing for their goods admission into this country practically free of duty.

With our ports wide open to foreign importations and England's fixed policy of waging war on America's industries, it is easy to understand how those manufacturers that had developed during the Revolutionary War were practically destroyed.

In a speech at Pittsburgh on July 8, 1833, Daniel Webster tells the story of how well the British succeeded in their work of destruction. He said:

From the close of the War of the Revolution there came on a period of depression and distress on the Atlantic coast such as the people had hardly felt during the sharpest crises of the war itself. Shipowners, shipbuilders, mechanics, artisans, all were destitute of employment, and some of them destitute of bread. British ships came freely and British products came plentifully, while to the American ships and American products there was neither protection on the one side nor the equivalent of reciprocal free trade on the other. The cheaper labor of England supplied the inhabitants of the Atlantic shores with everything. Ready-made clothes, among the rest, from the crown of the head to the soles of the feet, were for sale in every city. All these things came free from any general system of imposts. Some of the States attempted to establish their own partial systems, but they failed. Voluntary association was resorted to, but that failed also.

Washington, writing to Edmund Randolph, under date of November 19, 1786, said:

Our affairs seem to be drawing to an awful crisis; it is necessary, therefore, that the abilities of every man should be drawn into action in a public line to rescue them, if possible, from impending ruin.

David H. Mason, in his short tariff history of the United States, has this to say of the eight years of free trade under the Articles of Confederation:

Had there been no free trade, there would have been no inundation of foreign goods; had there been no inundation of foreign goods, there would have been no drain of specie; had there been no drain of specie, there would have been no distress from lack of a circulating medium; had there been no such distress, there would have been no impulse toward insubordination to the State. * * * As there was the closest approach to absolute free trade ever tried by this country, so there was the largest harvest of calamities and dangers ever experienced by the American people. That awful crisis at the outset of our career as an independent Nation should be regarded as a monument erected by the sufferings of our forefathers to warn posterity against the delusive and mischievous plausibilities of the free-trade policy.

But in the United States, Mr. President, posterity has not been guided by the lamp of experience on the question of free trade and protection, and I doubt very much if the hard times during those eight years we lived under the Articles of Confederation were any worse than some of those years we have lived under Democratic administrations in the past with their free-trade policies controlling the ports of our country.

To-day we are fighting the same old fight that we have fought for more than a hundred years. It is an old, old story, over and over again, and we find the Democratic Party is opposing

the best protective-tariff measure that has ever been reported to any Congress; a measure that gives protection to all lines of industry in the North, in the South, in the East, and in the West. We find them predicting that dire calamity will come to the country, just as the free trader has been doing for more than a hundred years, and not once have their predictions come true, for history teaches us without exception that almost before the ink was dry on those revenue bills which gave proper protection to all of our industries prosperity returned to bless the American people.

It is not strange, Mr. President, that the First Congress of the United States, after the Constitution was adopted and necessary laws were enacted providing for the machinery of the Government, should pass a protective-tariff measure as its first general law. This act was signed by President Washington on the 4th of July, 1789.

In discussing our first protective tariff bill in Congress, Fisher Ames, of Massachusetts, said:

I conceive, sir, that the present Constitution was dictated by commercial necessity more than any other cause. The want of an efficient Government to secure the manufacturing interest and to advance our commerce was long seen by men of judgment and pointed out by patriots solicitious to promote our general welfare.

To prove the truth of my statement, Mr. President, that free trade has always meant poverty and distress, and that protection has always brought prosperity and happiness to the American people, I am going to read extracts from the messages of our Presidents and from the speeches of some of our great statesmen giving a description of the conditions that have existed under free trade and protection in America.

I especially want to call the attention of the Senate to the condition of our country during the first 27 years of our existence as a Government, when ample protection was given to all lines of industry. President Washington said in his seventh annual message to Congress, in 1795:

Every part of the Union displays indications of rapid and various improvements; and with burdens so light as scarcely to be perceived, with resources fully adequate to our present exigencies, with government founded on the genuine principles of national liberty, and with mild and wholesome laws, is it too much to say that our country exhibits a spectacle of national happiness never surpassed if ever before equaled?

John Adams was elected President in 1796. In his third annual message to Congress he said:

The flattering prospects of abundance from the labors of the people by land and by sea; the prosperity of our extended commerce, notwithstanding interruptions occasioned by the belligerent state of a great part of the world; the return of health, industry, and trade to those cities which have lately been afflicted with disease, and the various and inestimable advantages, civil and religious, which, secured under our happy frame of government, are continued to us unimpaired, demand of the whole American people sincere thanks to a benevolent Deity for the merciful dispensations of His providence.

Thomas Jefferson was elected President in 1800. In his sixth annual message to Congress he said:

The question therefore now comes forward, to what other objects shall these surpluses be appropriated, and the whole surplus of impost, after the entire discharge of the public debt and during those intervals when the purposes of war shall not call for them? Shall we suppress the impost and give that advantage to foreign over domestic manufacture? On a few articles of more general and necessary use the suppression in due season will doubtless be right, but the great mass of the articles on which impost is paid are foreign luxuries, purchased by those only who are rich enough to afford themselves the use of them. Their patriotism would certainly prefer its continuance and application to the great purposes of the public education, roads, rivers, canals, and such other objects of public improvement as it may be thought proper to add to the constitutional enumeration of Federal powers.

Jefferson, it is said, in his young manhood was a free trader, but became a strong protectionist as President, when he understood and knew the necessity of protection to American institutions and American labor.

In a letter to his friend, Colonel Humphries, dated January 2, 1809, Jefferson said:

My idea is that we should encourage home manufactures to the extent of our own consumption of everything of which we raise the raw materials.

In the same year, in a letter to Thomas Leiper, he said:

I trust the good sense of our country will see that its greatest prosperity depends on a due balance between agriculture, manufacture, and commerce.

I especially call the attention of my Democratic friends to the expression "due balance between agriculture, manufacture, and commerce," because there is no due balance between manufacture and agriculture in the Underwood-Simmons tariff law, practically everything produced by the farmer being placed on the free list under that law or a duty so low provided that it is not even a revenue duty.

In a letter to Benjamin Austin, under date of January 9, 1816, Jefferson said:

We have experienced what we did not then believe, that there exists both profligacy and power enough to exclude us from the field of interchanges with other nations; that to be independent for the comforts of life, we must fabricate them ourselves. We must now place our manufacturers by the side of the agriculturist. The former question is now suppressed, or rather assumes a new form. The grand inquiry now is, shall we make our own comforts or go without them at the will of a foreign nation? He, therefore, who is now against domestic manufactures, must be for reducing us either to a dependence upon that nation or be clothed in skins and live like beasts in dens and caverns. I am proud to say that I am not one of those. Experience has taught me that manufactures are now as necessary to our independence as to our comforts.

James Madison was elected President of the United States in 1808 and again in 1812. In a special message to Congress, May 23, 1809, he said:

The revision of our commercial laws, proper to adapt them to the arrangement which has taken place with Great Britain, will doubtless engage the early attention of Congress. It will be worthy at the same time to their just and provident care, to make such further alterations in the laws as will more especially protect and foster the several branches of manufacture which have been recently instituted or extended by the laudable exertion of our citizens.

In his special message to Congress February 29, 1815, he said:

But there is no subject which can enter with greater force and merit into the deliberations of Congress than a consideration of the means to preserve and promote the manufactures which have sprung into existence and attained unparalleled maturity throughout the United States during the period of the European wars. This source of national independence and wealth I anxiously recommend to the prompt and constant guardianship of Congress.

The years from 1789 to 1816, the first 27 years of our existence as a Government, were years of prosperity and happiness for the American people. During those 27 years a number of tariff bills were passed, all adding increased duties to agriculture and manufacture. The wonderful change from conditions which existed during the years this country operated under the Articles of Confederation won for protection a place in the hearts of the American people which will endure until that great principle becomes a permanent policy of our Government.

In 1816 there was a demand for the reduction of the high duties that had been enacted in 1812. The pendulum swung too far, and the duties were reduced so low as not to give proper protection to our industries. It is said by some writers that it was not the intention of the Government at that time to have reduced the duties below the line of protection, but nevertheless it had the same deadly effect that all of our tariff laws have had when the rates have been reduced below the line of protection. This reduction brought about a severe panic, in which there was great suffering and distress.

James Monroe was elected President of the United States in 1816, and again in 1820. In his first inaugural address, March 4, 1817, he said:

Our manufactures will likewise require the systematic and fostering care of the Government. Possessing, as we do, all the raw materials, the fruit of our own soil and industry, we ought not to depend in the degree we have done on supplies from other countries. While we are thus dependent the sudden event of war, unsought and unexpected, can not fail to plunge us into the most serious difficulties. It is important, too, that the capital which nourishes our manufactures should be domestic, as its influence in that case instead of exhausting, as it may do in foreign hands, would be felt advantageously on agriculture and every other branch of industry. Equally important is it to provide at home a market for our raw materials, as by extending the competition it will enhance the price and protect the cultivator against the casualties incident to foreign markets.

President Monroe calls attention to excessive importations from foreign countries, and refers to the condition of the country after the protective tariff had been reduced below the line of protection.

The serious condition brought about by reducing the duties in the act of 1816 below the line of protection gave the protectionists the election in 1824, and John Quincy Adams was elected President. In his fourth annual message to Congress, December 2, 1828, he said:

The great interests of an agricultural, commercial, and manufacturing nation are so linked in union together that no permanent cause of prosperity to one of them can operate without extending its influence to the other. All these are alike under the protective power of legislative authority, and the duties of the representative bodies are to conciliate them in harmony together.

Is the self-protecting energy of this Nation so helpless that there exists in the political institutions of our country no power to counteract the bias of this foreign legislation; that the growers of grain must submit to the exclusion from the foreign markets of their products; that the shippers must dismantle their ships, the trade of the North stagnate at the wharves, and the manufacturers starve at their looms, while the whole people shall pay tribute to foreign industry, to be clad in a foreign garb; that the Congress of the Union are impotent to restore the balance in favor of native industry destroyed by the statutes of any realm?

The administration of John Quincy Adams was one of great national prosperity. A protective tariff measure, known as the American system, was enacted. In 1832 Henry Clay, in describing the serious conditions which existed under the act of 1816 and the prosperity which followed the enactment of a protective

tariff measure during Adams' administration, said in the United States Senate:

Eight years ago it was my painful duty to present to the other House of Congress an unexaggerated picture of the general distress pervading the whole land. We must all know that the people were then oppressed and borne down by an enormous load of debt; that the value of property was at the lowest point of depression; that ruinous sales and sacrifices were everywhere made of real estate; that stop laws and relief laws and paper money were adopted to save the people from impending destruction; that a deficit in the public revenue existed, which compelled the Government to seize upon and divert from its legitimate object the appropriations to the sinking fund to redeem the national debt; and that our commerce and navigation were threatened with a complete paralysis.

In short, sir, if I were to select any term of seven years since the adoption of the present Constitution which exhibited a scene of the most widespread dismay and desolation, it would be exactly that term of seven years which immediately preceded the establishment of the tariff of 1824.

I have now to perform the more pleasing task of exhibiting an imperfect sketch of the existing state of the unparalleled prosperity of the country. On a general survey we behold cultivation extended, the arts flourishing, the face of the country improved, our people fully and profitably employed, and the public countenance exhibiting tranquillity, contentment, and happiness.

And if we descend into particulars we have the agreeable contemplation of a people out of debt; land rising slowly in value, but in a secure and salutary degree; a ready though not extravagant market for all the surplus productions of our industry; innumerable flocks and herds browsing and gamboling on 10,000 hills and plains, covered with rich and verdant grasses; our cities expanded, and whole villages springing up, as it were, by enchantment; our exports and imports increased and increasing; our tonnage, foreign and coastwise, swelling and fully occupied; the rivers of our interior animated by the perpetual thunder and lightning of countless steamboats; the currency sound and abundant; the public debt of two wars nearly redeemed; and, to crown all, the Public Treasury overflowing, embarrassing Congress, not to find subjects of taxation, but to select the objects which shall be liberated from impost.

If the term of seven years were to be selected of the greatest prosperity which this people have enjoyed since the establishment of their present Constitution, it would be exactly that period of seven years which immediately followed the passing of the tariff of 1824.

This transformation of the conditions of the country from gloom and distress to brightness and prosperity has been mainly the work of American legislation, fostering American industry, instead of allowing it to be controlled by foreign legislation cherishing foreign industry. The foes of the American system in 1824, with great boldness and confidence, predicted, first, the ruin of the public revenue and the creation of a necessity to resort to direct taxation. The gentleman from South Carolina, General Hayne, I believe, thought that the tariff of 1824 would operate a reduction of revenue to the large amount of $8,000,000. Secondly, the destruction of navigation; thirdly, the desolation of commercial cities; and, fourthly, the augmentation of the price of objects of consumption and further decline in that of the articles of our exports.

Every prediction which they made has failed, utterly failed. Instead of the ruin of the public revenue, with which they then sought to deter us from the adoption of the American system, we are now threatened with its subversion by the vast amount of the public revenue produced by that system. Every branch of our navigation has increased.

That it should be necessary to defend a system of policy which had produced such decidedly beneficial, such magical, such stupendous effects on all the great and minor interests of the country, public and private effects which everybody knew, everybody saw, is indeed a just subject of wonder.

Yet we have been doing the same thing for a hundred years, Mr. President.

ANDREW JACKSON A PROTECTIONIST IN 1824.

In a letter to Dr. L. H. Coleman, of North Carolina, General Jackson said:

* * * Heaven smiled upon us and gave us liberty and independence. The same Providence has blessed us with the means of national independence and national defense. If we omit or refuse to use the gifts which He has extended to us, we deserve not the continuance of His blessing. He has filled our mountains and our plains with minerals—with lead, iron, and copper—and given us a climate and soil for the growing of hemp and wool.

These being the great materials of our national defense, they ought to have extended to them adequate and fair protection that our manufacturers and laborers may be placed in a fair competition with those of Europe and that we may have within our country a supply of these leading and important articles so essential to war.

I will ask, What is the real situation of the agriculturist? Where has the American farmer a market for his surplus produce? Except for cotton, he has neither a foreign nor a home market. Does not this clearly prove, when there is no market at home or abroad that there is too much labor employed in agriculture? Common sense at once points out the remedy—take from the agriculture in the United States 600,000 men, women, and children and you will at once give a market for more breadstuffs than all Europe now furnishes us with.

In short, sir, we have been too long subject to the policy of British merchants. It is time we should become a little more Americanized, and instead of feeding paupers and laborers of England feed our own; or else, in a short time, by continuing our present policy we shall be paupers ourselves.

It is therefore my opinion that a careful and judicious tariff is much wanted to pay our national debt and to afford us the means of that defense within ourselves on which the safety of our country and liberty depends; and last, though not least, give a proper distribution of our labor, which must prove beneficial to the happiness, wealth, and independence of the community.

Andrew Jackson was elected President in 1828, and again in 1832. In his first annual message to Congress, December 9, 1829, he said:

The agricultural interest of our country is so essentially connected with every other, and so superior in importance to them all, that it is scarcely necessary to invite it to your particular attention. It is principally as manufactures and commerce tend to increase the value of agricultural productions and to extend their application to the wants and comforts of society that they deserve the fostering care of the Government.

The Democratic Party has changed its attitude materially since Andrew Jackson's time, as far as agriculture is concerned.

The period between 1820 and 1832 saw a most remarkable change in the sentiment on the great question of free trade and protection in America. Cotton had become king in the South and the slave traffic a thriving business. Two million four hundred and eighty-six thousand two hundred and twenty-six slaves were the chattels of southern planters.

With no manufacturing industries in the South and no labor to protect, the South believed its interests would be best served by free trade. John C. Calhoun, who had been a strong protectionist, became a free trader, as well as the rest of the great men of the South at that time.

McCleary, in his work entitled "Protection our Proper Permanent Policy," says of the great contest of 1832:

Andrew Jackson still favored a protective tariff. In 1832 he was renominated for the Presidency. Calhoun having gone over to the antiprotectionists and having been elected as United States Senator from South Carolina, Martin Van Buren, of New York, was nominated for Vice President. Jackson and Van Buren were elected.

As soon as the result of the election was known the antiprotectionists of South Carolina met in convention and declared that "the tariff acts of 1828 and 1832 were unconstitutional, null, and void, and not binding on the State, its officers, or its citizens," and that it should be unlawful for any officer of the State or of the United States to collect duties under those laws within the limits of South Carolina, and declared that any attempt of the National Government to enforce these laws would be inconsistent with the longer continuance of South Carolina in the Union, and that military resistance should be made if necessary. This was South Carolina's nullification ordinance of 1832. The argument on which it was based, written by Calhoun, was the basis of the actual secession a generation later.

South Carolina's threat of secession was vigorously answered by Andrew Jackson's famous announcement, "The Union must and shall be preserved." This proclamation of December 10, 1832, ending with the words, "The Constitution and the laws are supreme and the Union indissoluble," are among the ablest and most interesting of our State papers. Congress passed a bill empowering the President to enforce the laws. But Jackson was naturally reluctant to use force, especially against his native State. "To preserve the Union," a compromise on the tariff was effected under the leadership of Henry Clay. Jackson signed the force bill and the tariff bill on the same day, March 2, 1833. Two weeks later South Carolina repealed her nullification ordinance.

The tariff law of 1832 was taken as the basis of the compromise. All duties exceeding 20 per cent were to be reduced by "one-tenth part of such excess" on January 1, 1834; by another tenth part on January 1, 1836; and so continuing each alternate year until January 1, 1842, when "one half of the residue of such excess" was to be deducted, and the other half on July 1 of the same year. So that beginning July 1, 1842, there would be a uniform duty of 20 per cent.

In 1834, after the first reduction in rates of duty, the customs revenue fell off nearly 50 per cent. But the revenues from the sales of public lands were sufficient to more than make up for the deficiency. There was still a surplus in the National Treasury, part of which was loaned to the States. In 1836, however, the second reduction took effect, and in 1837 there was a financial panic. Shortly after Van Buren's inauguration as President a committee of New York merchants visited Washington and told him that their city was lying "prostrate in despair, its credit blighted, its industry paralyzed."

Protectionists do not charge the panic of 1837 entirely to the reductions in the tariff. The financial panic was no doubt partly due to the destruction of the United States bank, to consequent wildcat banking, and to the specie circular. But the deficiency in the National Treasury, after the loans to the States, and the business depression following the panic, must be charged chiefly to the failure of the tariff law after 1834 to furnish either sufficient revenue or adequate protection. This view is confirmed by the fact that the hard times continued until after the enactment of the tariff law of 1842. * * *

The extent of the business depression throughout the country prior to the enactment of this law is shown by the following extract from Colton's Life of Henry Clay:

"In Ohio, with all her abundance, it was hard to get money to pay taxes. The sheriff of Muskingum County, as stated by the Guernsey Times, in the summer of 1842, sold at auction 1 four-horse wagon at $5.50; 10 hogs at 6½ cents each; 2 horses (said to be worth $50 to $75 each) at $2 each; 2 cows at $1 each; one barrel of sugar for $1.50; and a store full of goods at the same rate.

"In Pike County, Mo., as stated in the Hannibal Journal, the sheriff sold: Three horses at $1.50 each; 1 large ox for 12½ cents; 5 cows, 2 steers, and 1 calf, the entire lot for $3.25; 20 sheep for 13½ cents each; 24 hogs for 25 cents for the lot; 1 eight-day clock for $2.50; 1 lot of tobacco (7 or 8 hogsheads) for $5; 3 stacks of hay at 25 cents each; 1 shock of fodder at 25 cents."

The advocates of protection carried the country in 1840, and William Henry Harrison was elected President. He died soon after his inauguration. The Vice President, John Tyler, became President, and a strong protective tariff measure was passed on August 20, 1842, which was almost magical in its effect. Prosperity was restored, and protection again proved all that its advocates had claimed for it.

In 1844, former President John Quincy Adams said:

The tariff of 1842 has wrought wonders for the purposes for which it was enacted—the procurement of an adequate revenue and of protection for the native industry and free labor of the land. It has fully performed its promises to the Nation, filled the coffers of the Treasury, provided ample means for defraying the current expenses of the years 1842, 1844, and 1845, and already paid off a large proportion of the heavy debt contracted by the preceding administration.

In 1844 the Democrats won the election, and James K. Polk was elected President. On July 30, 1846, a revenue bill, known

as the Walker Act, was passed. It gave very satisfactory protection to the agricultural interests, but failed to give proper protection to the manufacturers, which resulted in large importations of foreign goods. Before the end of President Polk's administration the business of the country was in a most serious condition.

In President Polk's second annual message, December 8, 1846, he said:

In resuming your labors in the service of the people, it is a subject matter of congratulation that there has been no period in our past history when all the elements of national prosperity have been so fully developed. Since your last session no afflicting dispensation has visited our country. General good health has prevailed, abundance has crowned the toil of the husbandman, and labor in all its branches is receiving an ample reward, while education, science, and the arts are rapidly enlarging the means of social happiness. The progress of our country in her career of greatness, not only in the vast extension of our territorial limits and the rapid increase of our population, but in resources and wealth and in the happy conditions of our people, is without an example in the history of nations.

When President Polk delivered his second annual message on December 8, 1846, he described very fully the conditions that existed in the country during the four years of the protective tariff act of 1842. While the Walker Tariff Act was passed July 30, 1846, it did not go into effect until December 1 of that year. Thus it is seen that when President Polk's message was delivered, the Walker Tariff Act had been in effect only six days, not long enough, I am sure, to be responsible for the wonderful growth and development of our country so well described by President Polk.

In 1848 the Whigs carried the election and Taylor was elected President with Fillmore Vice President. In his first annual message to Congress, December 4, 1849, President Taylor said:

I recommend a revision of the existing tariff and its adjustment on a basis which may augment the revenue. I do not doubt the right or duty of Congress to encourage domestic industry, which is the great source of national as well as individual wealth and prosperity.

I look to the wisdom and patriotism of Congress for the adoption of a system which may place home labor at last on a sure and permanent footing, and, by due encouragement of manufactures, give a new and increased stimulus to agriculture and promote the development of our vast resources and the extension of our commerce. Believing that to the attainment of these ends, as well as the necessary augmentation of the revenue and the prevention of frauds, a system of specific duties is best adapted, I strongly recommend to Congress the adoption of that system, fixing the duties at rates high enough to afford substantial and sufficient encouragement to our own industry and at the same time so adjusted as to insure stability.

On July 9, 1850, President Taylor died and Vice President Fillmore became President. In his third annual message to Congress, December 6, 1852, recommending increased protection, President Fillmore said:

In my first annual message to Congress I called your attention to what seemed to me some defects in the present tariff, and recommended such modifications as in my judgment were best adapted to remedy its evils and promote the prosperity of the country. Nothing has since occurred to change my views on this important question.

Without repeating the arguments contained in my former message in favor of discriminating protective duties, I deem it my duty to call your attention to one or two other considerations affecting this subject. The first is the effect of our large importations of foreign goods upon our currency. Most of the gold of California as fast as it is coined finds its way directly to Europe in payment for goods purchased. In the second place, as our manufacturing establishments are broken down by competition with foreigners the capital invested in them is lost, thousands of honest and industrious citizens are thrown out of employment, and the farmer to that extent is deprived of a home market for the sale of his surplus produce.

In the third place the destruction of our manufactures leaves the foreigner without competition in our market, and he, consequently, raised the price of the article sent here for sale, as is now seen in the increased cost of iron imported from England. The prosperity and health of every nation must depend upon its productive industry.

In 1852 the Democrats carried the election and Franklin Pierce was elected President. The country was afire with the question of slavery, as it had been throughout the administration of Taylor and Fillmore. The bitter struggle to extend slavery into the free-soil States overshadowed all other questions, and no attempt was made to revise the tariff until almost the last months of the administration. On March 3, 1857, a revision of the tariff was made; from 25 to 30 per cent reduction was made on practically all farm products. The tariff bill of 1857 was as unfair to agriculture as the Walker bill had been to the manufactures.

The war with Mexico in 1846, the discovery of gold in California in 1848 and 1849, and the Crimean War, which ended in 1856—all these mighty factors were not enough to save the country from another panic, which had been steadily growing on the country since the passage of the Walker Tariff Act in 1846. With a revenue act that was unfair to both agriculture and manufacturing, the country was ripe for another panic.

In 1856 the Democrats carried the election again and James Buchanan was elected President. In his first annual message to Congress, December 8, 1857, he told the story of the hardships and privations of the American people in this land of plenty, the same story that other Presidents and other great men have told when describing the conditions of the country under revenue laws that did not afford proper protection to all of our industries. He said:

In the midst of unsurpassed plenty in all the production of agriculture and in all the elements of national wealth we find our manufactures suspended, our public works retarded, our private enterprises of different kinds abandoned, and thousands of useful laborers thrown out of employment and reduced to want. The revenue of the Government, which is chiefly derived from duties on imports from abroad, has been greatly reduced.

It is not strange, Mr. President, that the country should witness another panic after the radical reduction of the protection to farm and range products, and so in the year of 1857 the country was again cursed with a dreadful panic for its folly for reducing the tariff below the point of adequate protection from the cheap products of foreign countries.

Horace Greeley, in an editorial in the New York Tribune, had this to say of the panic of 1857:

Who is hungry? Go and see. You that are full fed and know not what it is to be hungry, perhaps never saw a hungry man, go and see. Go and see thousands of men and women, boys and girls, old and young, black and white, of all nations crowding and jostling each other, almost fighting for the first chance, acting more like hungry wolves than human beings in a land of plenty, waiting until food is ready for distribution. Such a scene may be seen every day between 11 and 2 o'clock around the corner of Orange and Chatham Streets, where charity gives a dinner to the poor.

In 1860, Abraham Lincoln was elected President, and the bitterness over slavery and free trade, which had been growing for more than 30 years, brought on secession of the Southern States. Very properly South Carolina led off and was followed in rapid succession by the other Southern States.

In February, 1861, delegates from South Carolina, Mississippi, Florida, Alabama, Georgia, Louisiana, and Texas met in convention at Montgomery, Ala., and adopted a constitution, which was subscribed to later by the States of Virginia, Arkansas, North Carolina, and Tennessee. Article 8 of the Confederate constitution reads as follows:

The congress shall have power to lay and collect taxes, duties, imposts, and excises for revenue necessary to pay the debts, provide for a common defense, and carry on the Government of the Confederate States; but no bounties shall be granted from the treasury, nor shall any duties or taxes on importations from foreign nations be paid to promote or foster any branch of industry, and all duties, imposts, and excises shall be uniform throughout the Confederate States.

And so if the Southern States had succeeded in the Civil War they would have been a free-trade country by constitutional provision. As a result of the Civil War slavery perished, and by every right free trade should have perished with slavery, for slavery is responsible for free trade in America, but the southern politicians have stuck doggedly to their free-trade policy, and as far as agriculture and its affiliated industries are concerned the Democratic Party is nearer a free-trade party to-day than at any time in its existence.

In 1867 the Republican Party passed a general tariff bill which gave adequate protection to all our industries, and the country responded with great growth and prosperity. Grant was elected President in 1868, but unfortunately the Republican Party listened to a demand for a revision of the tariff downward. In 1870 and 1872 it allowed a material reduction in the protection afforded practically all of our industries.

In 1873 the country was visited by a severe panic. There is no doubt that other conditions which existed in the world at that time contributed to the mistake the Republican Party had made in reducing the tariff below the line of protection. But it is the old, old story of panic when our industries are not properly protected.

In 1875 the Republican Party materially increased the protection to many of our industries. Prosperity returned to again prove the statement that without adequate protection there can be no prosperity.

I pass over the period from 1875 to Grover Cleveland's second administration. I am sure all will agree that the country enjoyed great development and prosperity. I know of no better example of what free trade and protection mean to the prosperity of the country than Grover Cleveland's two administrations. In his first administration the Republican Party had control of the Senate. During those four years not a Democratic law was passed. A free-trade measure passed the House, but was defeated in the Senate, and the country continued its prosperity during those four years when Grover Cleveland operated this Government under Republican protective tariff laws. During those four years when Grover Cleveland operated this country with Republican protective tariff laws he paid off $260,000,000 of the national indebtedness.

President Harrison was elected in 1888, and the country continued in its line of development, with prosperity in every State

in the Union. Then Grover Cleveland was elected again in 1892, and how well I remember one of their campaign songs. It ran something like this:

Grover, Grover,
Four more years of clover.

Well, they got Grover, but if anybody was in clover during those four years I never heard of it.

In that campaign they boasted of the splendid prosperity of the country under Grover Cleveland's first administration, and they succeeded in fooling the people and elected a Democratic House and a Democratic Senate. The Republican protective tariff laws were repealed and a free-trade measure known as the Wilson-Gorman Act was passed.

No human tongue can tell the story of the misery and sufferings of those four years when Grover Cleveland tried to run this Government under free trade laws. Instead of paying off any of the national indebtedness, he was forced to borrow $230,000,000 to pay the running expenses of the Government. One hundred and seventy-seven railroads, with mileage enough to reach twice around the earth, could not meet their obligations and were forced into the hands of receivers. Those four years witnessed 60,000 commercial failures, with liabilities amounting to $1,000,000,000. One hundred and seventy-five national banks closed their doors, and the balance of trade turned ruinously against us. If capital alone had suffered, it would have been bad enough; but the real suffering came to the army of unemployed in the great cities, where free soup houses had to be established to prevent death from starvation.

The saddest thing I know of in this life is to see a man who has struggled for almost half a century to accumulate a little property for his old age, then to find himself, through no fault of his own, a pauper in his declining years. Such a condition came to hundreds of thousands of our citizens during that panic in Grover Cleveland's second administration.

With all these terrible lessons before us, how the American people can go on and submit to these outrages every time the Democratic Party gets control of the Government is beyond my understanding.

In 1896, William McKinley, the great champion of protection, was elected. He convened Congress into special session and repealed those Democratic free trade laws, an act known as the Dingley bill was passed, which gave protection to American industries and American labor. Out of the gloom and misery and suffering of those four years of Grover Cleveland's second administration came a period of great growth and development and prosperity unequaled in the history of the whole world. The country continued its onward march of progress through the Roosevelt administration and the Taft administration, and then came the election of 1912. With the Republican Party divided, the industries of this country again fell prey to another Democratic administration.

Woodrow Wilson was elected President in 1912. He convened Congress in special session and passed a free trade measure known as the Underwood-Simmons bill. Of all the unjust, unfair, and discriminatory revenue bills passed in this country the Underwood-Simmons bill is by far the worst in its treatment of agriculture and its affiliated industries. When I study the free-trade list in the Underwood and Simmons bill, I shudder when I think what might have happened had it not been for the great World War. Even with Europe preparing for war, storing up a surplus for the greatest struggle civilization has ever known, the deadly effect of the Underwood-Simmons bill was making itself felt upon the industries of the country.

Speaking of the conditions that existed before the war, the New York Tribune, in an editorial on August 12, 1920, had this to say:

> When the war came to Europe this country, as the business world generally recognized, was headed for an industrial crash. The Underwood tariff bill went into effect on October 3, 1913. In the beginning of 1914 its effect began to show. For six months the tide of imports rapidly rose, and incidentally American factories began to close. Is there doubt of what would have happened if Europe had not been compelled to turn to making war supplies? The tariff question is now little discussed, but men of foresight are making guesses as to what will happen here when Europe reaches the full production toward which she is swiftly moving.

That is a question, Mr. President, which no man can answer. With a new world before us, and with new conditions, only time can solve the mighty problems which confront the world to-day. I want to see my country in the future, as in the past, continue to be the great beacon light of civilization for the whole world, but if we open our ports to the pauper conditions which exist in some of the European countries to-day, or reduce the duty below the line of protection, we shall soon reduce the laborers of this country to their standard of living and their standard of wages. This, in my judgment, we should not do. There is too much intelligence in America among the workingmen in our factories, in our mines, and on our farms to submit quietly to the standard of living and the standard of wages which exist in any European country to-day.

But without proper protection to our industries the difference in the cost of production here and abroad must be wiped out very largely or the factories, the mines, and the farms to a large extent must stop their production. For after all the question of free trade and protection is the laboring man's question. If he is willing to accept the same wages and the same conditions which exist in foreign countries, no industry in America will need any protection.

I should be glad to see the standard of the laborers of Europe brought up to our own standard of living and our own standard of wages. Those who believe in protection, however, will never permit our standard to be forced down to the level of that which exists in any European country.

In 1920 Warren G. Harding was elected President, and in February of 1921 the emergency tariff bill was passed. It is said that one of the last official acts of President Wilson was to veto the emergency tariff bill.

In President Harding's first message to Congress, speaking of agriculture, he said:

> One who values American prosperity and maintained American standards of wage and living can have no sympathy with the proposal that easy entry and the flood of imports will cheapen our costs of living. It is more likely to destroy our capacity to buy. To-day American agriculture is menaced, and its products are down to pre-war normals, yet we are endangering our fundemental industry through the high cost of transportation from farm to market and through the influx of foreign farm products, because we offer, essentially unprotected, the best market in the world. It would be better to err in protecting our basic food industry than paralyze our farm activities in the world struggle for restored exchanges.

The same emergency tariff bill that was vetoed by President Wilson was passed by a Republican Congress and signed by Warren G. Harding on the 27th day of May, 1921. The emergency tariff bill was fought by the Democratic Party with the same bitterness that all other protective tariff bills have been fought. They charged the Republican Party with playing a bunko game on the farmers. How well I remember the tears that were shed by some of the Senators on the other side of the Chamber for the poor farmers. They insisted that the emergency tariff bill would only add to the burdens of the farmer. One of their pet sayings was:

> The farmer asks for bread and the Republican Party give him a stone.

They were sure that the emergency tariff bill would increase the farmer's burdens. Like every other protective tariff bill that has ever been passed, Mr. President, it has been almost magical in its effects. It not only saved the live-stock industry from destruction but materially benefited every other industry to which it gave protection.

Believing that the farmers and those interested in industries protected by the emergency tariff bill are the best judges of its effects, I sent out a few telegrams and asked them to advise me by wire what effect the emergency tariff bill had had on their industries.

I shall not take up the time of the Senate to-day in discussing the benefit of the emergency tariff bill to the farmer, but I send to the desk and ask to have read 134 telegrams which I have received. I believe that they answer very fully the resolution submitted by the junior Senator from Mississippi [Mr. HARRISON] and the inquiries which he has made as to the effect of the emergency tariff bill. Ever since the passage of the emergency tariff bill Senators on the other side have been demanding to know what benefits have accrued from it.

Mr. KING. Does the Senator desire to have them read now?

Mr. GOODING. I desire to have them read, and I should like to have the Senator from Utah listen to them. I wish to say that the telegrams come from 29 different States in the Union, and I think they tell the story very fully.

Mr. KING. If I may be pardoned, I will say to the Senator that I have a great many telegrams upon all sorts of questions, and I am sure some of them would be exceedingly instructive to the Senator from Idaho.

Mr. GOODING. It is the Senator's privilege to present them. If there is one thing that is sacred to the American people, it is the right of petition, for that is about the only way the American people can be heard. I ask that one telegram from each State may be read from the desk and that the remainder of the telegrams may be printed in the RECORD.

There being no objection, the telegrams were read as requested, and all the telegrams were referred to the Committee on Finance and ordered to be printed in the RECORD.

The telegrams will be found following the conclusion of Mr. GOODING'S speech, May 16.

The PRESIDING OFFICER (Mr. WELLER in the chair). The pending question is on agreeing to the amendment offered by the Senator from New Jersey [Mr. FRELINGHUYSEN] to the committee amendment on page 4, line 16.

Mr. KING. Mr. President, when I yielded the floor at the request of the Senator from Idaho [Mr. GOODING] I was discussing the amendment which was offered by the Senator from New Jersey [Mr. FRELINGHUYSEN].

Before proceeding to a discussion of that I want to call attention very briefly to an item which appears in this morning's New York Times. There has been a great deal of talk about foreign trade, and the distinguished Senator from Idaho, who has just delivered an historical address, as I am advised, though I have not had the pleasure of hearing it except now and then a sentence as I came into the Chamber, discussed the importance of what he denominated the home industry.

We have a good many people in the United States, as I have had occasion heretofore to remark, who conceive that the prosperity of the American people is dependent solely upon the home market, and that if there shall be any foreign market it will be disastrous to the home market. It is remarkable that many of those persons who are so solicitous for the home market are profoundly interested in finding foreign markets for our surplus products, appreciating, of course, as every sensible person must appreciate, that unless there shall be an outlet for the surplus goods produced in the United States there will be a subsidence of the wave of prosperity in the United States until it shall reach the level of a dead calm.

Some business men, I should judge from this article which appears in the New York Times of this morning, convened yesterday in Philadelphia. There were bankers, manufacturers of locomotives, and farmers at the Ninth National Foreign Trade Convention, and they agreed, the article says, "that the nations of the world were economically interdependent." That view must be a shock to the tariff bloc and the agricultural bloc in the Senate. The troglodytes constituting the tariff bloc have insisted upon a policy which forbids exports and forbids imports. Their view has been and still is that there is no interdependence between nations; that each nation is a unit, standing isolated, like some great peak capped in snow and lost in the icy atmosphere of the ethereal blue.

We have those narrow, provincial people nowadays, Mr. President, who want the United States to be isolated as one of the peaks of the Himalayan Mountains is isolated. They do not believe in the interdependence of nations. They do not want to export any of our products, and, of course, it is anathema to them to suggest the possibility of importing anything from other lands.

I wonder how it is that some of these lobbyists—one of whom at least is now in the galleries, who is not an American citizen—have come here in the interest of these extortionate rates; I wonder why some of them left their home countries and came to America. Why did they not stay in other countries? Why not carry to its logical sequence the policy of national isolation? Why did some of the aliens who have been lobbying in the Capitol come to this country? Why did some of our German friends, our English friends, and others from foreign lands, who now seem so solicitous for what they denominate the home market, come to this country? They seem to assume we make a nice distinction between foreigners and foreign goods.

One of these lobbyists recently went down to North Carolina and met there with some of the manufacturers of the textile mills. The manufacturers were opposed, as all patriotic Americans ought to be opposed, to embargoes. This lobbyist, representing the du Ponts and the Dye Trust, secured a reversal of the policy of the organization and an indorsement of the damnable and iniquitous policy of embargo. I should think Mr. Herty would enjoy the distinction he has of being a lobbyist for corporations and combines engaged in such nefarious business.

But to return:

Speakers at the opening session, attended by some 2,000 delegates from all sections of the United States and a number of foreign countries, found themselves in accord on their diagnosis of the causes of the world's trade depression. Their suggested remedies were based upon the necessity of "a return to normal world trade conditions."

Attempts to minimize the importance of the foreign trade of the United States by asserting that it was only 10 or 15 per cent, as compared to domestic trade of 85 or 90 per cent, were declared "dangerously fallacious" by James S. Alexander, president of the National Bank of Commerce of New York.

"The difference between normal business conditions and depression is no more than 15 or 20 per cent in volume," Mr. Alexander declared. "Those who consider the mere ratio of foreign and domestic trade lose sight of the fact that without the foreign trade the domestic consumption would shrink and national prosperity wane."

Our farmers ought to know about that. Our farmers ought to know that if the foreign markets were closed to their wheat and their corn and their live-stock products, their prosperity, whether it be great or only moderate, would shrink to the vanishing point and ruin inevitably would overtake them. Of course, as I have indicated repeatedly, we can attain a certain degree of prosperity, a certain degree of wealth, by having a domestic market and having it all to ourselves. If I could obtain a franchise from the State of New York for the construction of any commodity; if I had a monopoly for that purpose; if New York were an independent State, so that it might exclude products; and, pursuant to the monopoly, an exclusive act were passed, I could grow immensely rich under that monopolistic policy which had been, under this supposititious case, adopted by the State of New York.

But what about the people? It is much the same in connection with the State of Connecticut, to which I referred the other day. I concede that protection, protection per se, to the extent of excluding all products, may be beneficial, and undoubtedly will be beneficial, at least temporarily, to those who have the monopoly. If I have the monopoly to carry passengers between Albany and New York, I will grow very prosperous in the exercise of that monopoly.

So, Mr. President, a manufacturing State may build up a tremendous business, giving employment to a large number of people by supplying the home market with certain products; but if there shall be any competition at home or competition from abroad, prices necessarily would be reduced, and that reduction would be reflected in cheaper prices to the great consuming public. Everybody wants the manufacturer and the farmer to obtain a reasonable price. What we are protesting against is the policy which puts it in the power of any individual or any corporation or any class or any group to impose burdens upon the people which are unjust, through the instrumentality of tariff or any other laws.

But I was calling attention to the views of the business men and farmers who recognize the importance of foreign exports, of foreign business, and who recognize the interdependence of nations. I continue the reading:

In conclusion, Mr. Alexander said:

"The welfare of other nations is so closely interwoven with that of the United States that if the question of our foreign trade is to be interpreted with any degree of breadth whatever it should be considered in the light of the trade of these other nations. There can be no final recovery of the domestic trade in any nation until the normal international trade relations, which alone support the great international division of labor, can be reestablished."

Mr. Julius H. Barnes, of Duluth, in a discussion of the effect of the collapse of foreign currency upon American markets, stated—this is not in quotation marks, and probably is the reporter's deduction or interpretation of Mr. Barnes's remarks:

America depends upon the export market to dispose of 60 per cent of her cotton, 50 per cent of her tobacco, and 20 per cent of her wheat, he declared, and unless these commodities could be sold to foreign consumers the American farmer must suffer in a decline in the prices of the stuff he raises.

"Greater prosperity through greater foreign trade" was the slogan sounded by James A. Farrell, president of the United States Steel Corporation and chairman of the national council, in opening the convention.

The views of these distinguished men from various walks of life—bankers, manufacturers, representatives of agricultural interests—seem to me to be sound and should commend themselves to the judgment of the Senators when they are framing tariff legislation.

Mr. President, I have upon a number of occasions adverted to the fact that usually when we have heavy protective tariffs to the exclusion of any possible competition then behind those tariff walls combinations are formed. My good friend the junior Senator from New Jersey [Mr. EDGE] has been making some very enlightening speeches to the business men of the Nation, to trade organizations, and to chambers of commerce. His purpose is entirely praiseworthy, but I do not quite agree with his conclusions or his deductions. I believe that the policy which he is so earnestly promoting and which was exemplified in the resolution which we had before us a few days ago and which we silently laid in the tomb by our votes, if it were carried into execution, would be exceedingly dangerous to the American people.

Mr. President, there are organizations which have patterned themselves according to the Eddy formula, and they have trade associations and open-price organizations, ostensibly for collecting information to be of advantage to them in trade; but, as the Supreme Court of the United States said in the Hardwood Lumber Association case, that organization—and, of course, all which come within the same category—was an organization in violation of the Sherman antitrust law and was subject to disintegration as a monopoly, and those who effectu-

ated the organization were subject to prosecution as criminals for violating the Sherman antitrust law.

The trouble with many of the corporations of the United States is that they want to take advantage of the high tariff laws to control the domestic market and to form combinations in restraint of trade. I want all American business men to be prosperous. I want them to have a reasonable profit upon their capital, but I protest against these bulwarks erected through tariff laws and then, when foreign competition is destroyed, to permit organizations in the domestic market to combine in order to force the prices of commodities which the people must have to heights which make living almost unbearable and life oppressive to the great mass of American people. We have these hundreds of organizations. About a year or a year and a half ago I went in as an interested spectator and saw a meeting of some of the oil men. I have attended the meetings of a number of these organizations or groups. Ostensibly they get together for the purpose of talking over prices and giving information, but the result of it was, and the result always will be, that by some subtle influence, if not by some direct agreement, prices are fixed or conditions are so stabilized, to use a favorite expression, as that prices will either be raised to the injury of the people or prices will be prevented from falling.

Adam Smith knew a good deal about human nature, and he said whenever people get together who are engaged in the same trade they will always conspire and combine for the purpose of their own profit. Now, I believe in competition. I believe in a competitive system because—and I want to say this in good faith to the business men of the United States, whose friend I am—unless we do have competition we are going to have Government regulation and Government ownership. The best friend of the business men of the United States is the man who tells them to quit combinations and quit organizations for the purpose of maintaining prices. The best friend that the business man has in the United States is the one who tells him that there must be competition—honest competition, legitimate competition. The trouble has been with the business men that they do not want competition and they have conspired and combined, just like the Du Pont dye trust, which swallowed up a large number of organizations until to-day it has a capital of hundreds of millions of dollars, just like the allied chemical and dye organization which swallowed up a score or more of chemical organizations until it has become a colossus in size and a giant in the power which it exercises in the industrial life of the country.

I have no objection to big business. Perhaps there are some economies which may be effectuated through large business organizations, and yet, as was pointed out by Mr. Justice Brandeis, of the Supreme Court, before he went upon the bench, there are disadvantages in large organizations and in the end they may become top-heavy, and smaller organizations, efficiently managed, where genius has free play, will displace them, in part at least, in the market in which the big corporation felt that it was unchallenged and unchallengeable; that it was supreme.

Mr. President, I notice in this morning's New York Times a statement which shows that building materials, brick and all those commodities which are necessary for the construction of houses, are again going up in price, not as the result of legitimate competition but because of combinations in restraint of trade. It is reported that the main obstacle to the $10,000,000 building project by the Metropolitan Life Insurance Co. was the high cost of materials. Because of the practices of Wood, Wire, and Metal Lathers, No. 6, of Brooklyn, which were criminal and illegal, it was understood that the attention of the grand jury would be called to their operations.

Mr. President, the Senator from Idaho [Mr. GOODING] had a telegram read at the Secretary's desk in reference to the lumber industry in the Northwest. I have not yet had occasion to examine the lumber schedule, but my able colleague [Mr. SMOOT], if I make any observation respecting it, will correct me if I am not right; but I was about to observe that I doubt whether the attention of his committee was called to the findings which I think the Federal Trade Commission recently filed with the Senate, a copy of which I asked be sent to the Attorney General, if one had not been sent to him, with respect to the operations of the lumbermen in the Northwest.

My understanding of the findings of the Federal Trade Commission is that that lumber organization had been guilty of the same practices as those followed by the Hardwood Lumber Co., whose case came before the Supreme Court of the United States. Members of the Hardwood Lumber Co., and I have no doubt members of the lumber organizations of the Northwest, have been insisting upon high tariff rates upon their products. I am not going to pause to discuss whether tariff rates are necessary upon those products; I am only calling attention to the fact, Mr. President, that there is a tendency to-day in the United States, which is unfortunate, upon the part of so many of our business men to form associations and combinations to restrict competition or to destroy competition.

I wish that my Republican friends upon the other side, whose voice will be more potential with those business interests than mine will be, and I wish my able colleague [Mr. SMOOT] and the Senator from North Dakota [Mr. MCCUMBER] would tell the business men of the United States, and especially those who are to be the beneficiaries of this proposed tariff act, "If you exploit the people, if you charge rates for your commodities and products that are unjust, if you seek to form combinations in restraint of trade, if you violate the Sherman law and the Clayton Act, then the very temple of your industry will be pulled down over your heads and industrial ruin and chaos will come to the American people." Senators on the other side of the Chamber ought to tell the business men of the United States that. The American business men who are to profit by these proposed tariff rates ought to be told, in the language of the able Senator from North Dakota in his opening speech, that they ought to be satisfied with "meager profits." If they will do that, if the American business men will be fair, we are going to enter upon an era of prosperity, Mr. President, no matter which party is in power; no matter whether we have the Simmons-Underwood law or this proposed law. My opinion is that this proposed law, however, will prove very injurious to the economic and industrial development of the country; that it will impede rather than advance; that it will limit the wide circle of prosperity which we should enjoy to narrow and more circumscribed limits. Of course, there is a difference of opinion, and my brethren upon the other side of the Chamber are entitled to their judgment, and it may be just as good as mine.

Mr. GOODING. Mr. President——

The PRESIDING OFFICER (Mr. CAPPER in the chair). Does the Senator from Utah yield to the Senator from Idaho?

Mr. KING. I yield.

Mr. GOODING. I want to ask the Senator from Utah, does he believe if the Underwood-Simmons law, with wool and other agricultural products on the free list, were in force to-day there would be any prosperity at all in the West?

Mr. KING. Mr. President, I have stated to the Senator from Missouri and to the Senator from California that when we come to the wool schedule and the sugar schedule and the metal schedule, if I have an opportunity, I shall have something to say upon those schedules. I will say to the Senator that, in my judgment, the emergency tariff law, to which he has referred and with the enactment of which he doubtless had much to do, does not affect the result at all. I want to say further, Mr. President, as I have stated on this floor, at least I have said so in public, that I have not accepted the view of some that tariff duties, either for revenue or for incidental protection, must be laid upon raw materials. I have never taken that view at all, nor was that ever the Democratic view. It is the view of some Republicans; it is the view of some Democrats. I have found more Republicans—I am not saying this by way of criticism at all; I am merely stating what I regard as a fact which has come under my observation—who have advocated free raw materials than I have Democrats. I do not say there are more Republicans who do so, but I have had the good fortune to meet a large number of able Republicans who have favored free raw materials. I do not want to enter upon a discussion of those matters, as I desire to get through with this bill as soon as possible. If, however, the Senator wishes to ask me a further question I will yield.

Mr. GOODING. Mr. President, I merely wish to say that those Republicans whom my friend from Utah has met who were in favor of free raw materials never served in the Senate or in the House of Representatives to frame Republican free-trade measures when the Republican Party was in power. The Republican Party has always given protection to what our Democratic friends call raw materials.

Mr. KING. Mr. President, the able Senator from Idaho, I suppose, is competent to interpret the platform of his party, and the policies of his party. I might differ from him as to what his party had stood for, and what his party stands for now; but that is neither here nor there.

Mr. President, I was about to advert to an observation or two made by the Senator from North Dakota and the Senator from New Mexico. The Senator from North Dakota, as I understood his explanation of this item, said, in substance, that the committee had first reached the conclusion that ammonium nitrate should be placed upon the free list. Later

the committee wobbled, to use his expression, and now a member of the committee, the senior Senator from New Jersey, offers an amendment asking that a duty of 1 cent a pound be placed upon ammonium nitrate. He would treat ammonium nitrate as if it were a delicate medicine. It is sold by the ton, and a duty of $20 a ton is what he desires upon ammonium nitrate. Why did the committee wobble? Of course, it is clear. Representatives of some corporations in the United States who are here in the Capitol, here in Washington, brought pressure to bear, undoubtedly, upon one or more of the Republican members of the committee for the purpose of transferring this commodity from the free to the dutiable list at the high rate of $20 per ton, 1 cent per pound.

I wish to make one observation here as a result of the statement made by the Senator from New Jersey, if I understood him correctly, in which he alluded to the War Department.

There are some men down in the War Department—in the chemical-warfare section of it—who are so closely related to the Du Ponts and the lobbyists of the dye monopoly here that you can not tell one from the other. The Chemical Foundation, and the American Dyes Institute, and the Du Pont corporation, through its agencies, collaborating and conniving with some of those officers in the chemical-warfare section, have tried to bring the pressure of the War Department to bear in behalf of some of these schedules. If some of the officials of the Government in the War Department would attend to their business a little more and cease their lobbying activities they would be doing better service to their country. Some of them ought to be driven out of the chemical-warfare section of the War Department and turned over to the Du Ponts, where they belong, and to the dye monopoly, whose brand apparently they seem to desire to wear. Some of those members of the chemical-warfare section have lobbied, or have attempted to develop public sentiment by going through the country making exhibitions of the products of the dye industry.

I think that the Du Pont corporation—the Allied Chemical and Dye Corporation—and the other trusts and combinations that are to be the beneficiaries of this chemical schedule do not need the War Department as allies to effectuate their purposes, but they have been getting very generous support from some of the officers of the War Department. They have been fooled and imposed upon by the dye lobby as they have tried to impose, ignorantly, their views upon others.

Mr. President, I ask again, why did the committee wobble? Why did the committee put this item on the free list and then submit to a change to 1 cent per pound, or $20 per ton? I am sure the members of the committee did not do it of their own volition. The initiative was by some interested party. Who was the interested party or parties? I will leave it for the Senators and for the country to determine. I make no complaint whatever against the committee. I am not attempting in any wise to criticize their actions. I am merely reciting a fact which was disclosed in the honest and frank and courageous statement of the able chairman of the committee.

I know the pressure to which this committee is subjected, Mr. President; and I believe that the members of the committee feel constrained, because of their positions on the committee, after action has been taken, to support schedules or items or rates which, if they were left to their own judgment, they would not support in the form in which those schedules or items or rates appear in the pending bill. Probably I should do the same if I were upon the committee. There is a sort of a comradeship, I suppose, and a solidarity of action that it is felt must be maintained; and yet, when we come to consider these things vital to the interest of the American people, it does seem to me that we ought to act upon our independent judgment. However, I make no comment upon that, other than to say that it has been disclosed now that after action was taken—action which undoubtedly was correct—we are forced to consider a proposition in the interest of certain manufacturing concerns in the United States.

The Senator from North Dakota made another observation, and I want to call that to the attention of the chairman of the agricultural bloc, and to the attention of the chairman of the tariff bloc, the junior Senator from Idaho [Mr. GOODING]. I do not see him here now. These distinguished gentlemen profess to have supreme interest in the agriculturist, and they have. They are absolutely sincere in their desire for the development and welfare of agriculture; but the Senator from North Dakota has stated that if you put this duty of 1 cent a pound, or $20 a ton, upon ammonium nitrate, you must have a compensatory duty upon dynamite and other explosives, which are largely used now by the farmers in the removal of stumps, in the removal of stone and rock from their fields, and for various other purposes; and, of course, in our mining operations and railroad building and in the digging of foundations for our buildings we use millions of pounds of dynamite and other explosives annually in the United States.

The compensatory duty, my good friend from North Dakota says, will be eight-tenths of a cent per pound. I do not know how much it will be. I do not think the Senator knows. I have no doubt that the committee will recommend that, but we do not know what form it will assume before we get through. The committee may be called together again to consider the question of a compensatory duty with respect to these commodities, and the same pressure which has caused the committee to wobble upon this item, or other pressure, may cause them to wobble upon the compensatory duty, and it may be 1 cent or 1⅛ cents. No one knows. I repeat, however, that, even if this compensatory duty shall be fixed at eight-tenths of 1 cent, we do not know what additions or accretions will be made to the price of the finished product as it is carried on to the ultimate consumer.

No one can tell that. It is a mere conjecture, and I shall waste no time in making speculations. I only say this to our farmer friends here, whom the Senator from New Hampshire [Mr. MOSES] has designated in a rather facetious way, most of them lawyers, one farmer, I think; I want to say to these Senators who love the farmers: When you vote for this eleventh-hour amendment offered by the Senator from New Jersey you are voting to increase the price of dynamite and other explosives to the farmers, to the miners, to the builders, and to a large number of the people of our country. You are striking at American industry. By this tariff you are putting more money into the pockets of the trust.

But they say—and the Senator from North Dakota is right—we have not manufactured very much ammonium nitrate in the United States. I have here a part of a page from the Tariff Summary which deals with this subject. I read that this product, in addition to being used for explosive purposes and in explosive mixtures, is used as an anesthetic, as laughing gas. Production was greatly increased during the war to supply the demand for explosives. The imports in 1915 were more than 3,500,000 pounds, and they have greatly increased, so that for the last nine months they aggregate more than 30,000,000 pounds, with a unit value of 6 cents per pound. That would mean the foreign export price. I might add that the pre-war price was 5½ cents per pound, and the present domestic price is only from 5½ to 6½ cents per pound.

Mr. McCUMBER. Mr. President——

Mr. KING. I yield.

Mr. McCUMBER. Would the Senator object to bringing his figures down now to the latest data we have on the importations?

Mr. KING. I have it right here, and I was going to put it in, but the Senator may put it in.

Mr. McCUMBER. I was going to say that the imports for the nine months ending March, 1922, amounted to 44,290,786 pounds, and the imports during the nine-months period ending as I have stated, if continued for a year, would amount to 59,000,000 pounds a year; and inasmuch as in previous years our consumption has been about 30,000,000 pounds per year, the Senator can see the immense amount that is coming in over our former use.

I am of the opinion that we are getting a much broader use, which justifies the greater imports; but the Senator can easily see that where the opinion of the committee might be very much divided a month ago, for instance, with this additional information brought down to date they might very well take a view that would lean to the other side, to the protection side of the case.

If the Senator will allow me right there, in reference to one remark that he made about people being here and influencing the committee——

Mr. KING. Yes.

Mr. McCUMBER. I will say to the Senator that no one has been before the committee at all except a member of the committee upon this subject, and that the Senator from New Jersey [Mr. FRELINGHUYSEN] at all times from the very beginning has insisted upon the 1-cent duty. Of course, what ones of his own constituents may have visited him I can not say, but he has been consistent throughout.

Mr. KING. Mr. President, the accurate figures for the year 1921—and I was about to give them when the Senator interrupted me—are 50,163,622 pounds.

Mr. McCUMBER. I carried that to March of 1922, and took the year ending at that time.

Mr. KING. I have secured these figures from the Department of Commerce.

Mr. President, may I make one observation, not quite germane to what the Senator has said, but his position, I think, warrants it? Some people take the position that whenever it is disclosed that there is an importation, some evil has come to the United States, or is about to come to the United States. I wonder what we would think if other nations took that view when they witness the tremendous importations from our country to theirs, or the exportations from our country which constitute importations into their country?

Mr. McCUMBER. I will state to the Senator about the view they take. They wish that that were not so, but they say to themselves, "This is the cheapest market that we can get the article in, and therefore we have to purchase it from the United States," not through love of us but because they can get it cheaper here. If they could get it cheaper somewhere else, they would get it there.

Mr. KING. I think that the Senator, and many of my other Republican friends, as well as some of our American political economists—Professor McLoughlin, for instance, and others—have taken too narrow a view of this question. They have not taken into account the fact that we are in what might be denominated a transitory state. We were a young country, with enormous undeveloped resources. Naturally, soon after the establishment of this Republic, and for an indefinite period thereafter, the attention of the people would be taken in the development of the agricultural resources of the country. That is always the case. Agriculture precedes manufacture.

Then, as the lands are taken possession of and cultivated and cities are founded and urban population is created the people turn to manufacturing. We had immense deserts to cross, prairies to inhabit, railroads to be constructed, bridges to be built, mountains to be tunneled, and for years the great constructive genius of the great American people, perhaps the greatest in the world, was devoted largely to the big enterprises of which I have spoken. Some of our political economists, when they see that we have been importing a good many things, as well as exporting, rush to the conclusion that that is wrong, that we ought to stop at once, and they jump to the conclusion that we must put a high tariff duty on in order to compel the diversion of capital from some industries which are remarkably profitable into other less profitable lines of industry.

The Senator from North Dakota is a practical man, as well as a student of world conditions and of political economy, and he knows that whenever capital is glutted in a given market it seeks an outlet in some other. When we had harnessed the East and the West with iron rails and the railroad business ceased to be profitable, then capital, which had been invested in railroads, went into other things.

So it will be that, as the needs of the people demand, capital which formerly was engaged in one line of business will be diverted and employed in another. We do not build our industries overnight; there is no Aladdin's lamp which will touch an industry and cause it to spring full fledged from the brow of Jove as Minerva, the pagan goddess, did; but we build our industries as we need them. The great industries of Connecticut, the industries of Pennsylvania, and of the other manufacturing States, were not built overnight, but as the needs of the people require capital goes to satisfy those needs, and development ensues.

So I do not regard it as a calamity or as a misfortune that we find some industry in the United States that is not as fully developed as it is in some other countries; that we do not find manufacturers here making many little articles which are manufactured in other countries.

As I indicated the other day, American business men and manufacturers have preferred quantity and big things to the little things. So Irish lace and Belgian lace, and originally Swiss watches, and things upon which a vast amount of hand labor was applied, we have rather spurned, preferring that the technician, the slow, plodding German, as we have been pleased to denominate him, and others overseas, with their patience, might have, I will not say, undisputed sway in those fields, but that they might have rather a free field. But whenever we see others profit in anything, we will apply capital for the development of the products which belong to that particular industry.

Mr. President, coming to this particular item, we have in the United States such vast quantities of the primary articles, if I may use that expression, which enter into ammonium nitrate that we can beat the world. The Haber process, of which the Senator from New Jersey spoke, we have here. The American Cyanamid Co. is now operating, and if not using the Haber process for making cyanamid, is employing some other nitrogen fixation process, which it regards as superior to the Haber process.

We can manufacture all sorts of nitrogenous substances, produce all sorts of aluminum substances, compounds, and salts in the United States as cheaply as they can be produced anywhere else in the world, if not cheaper. There is no necessity for this tariff. It will swell the profits of big concerns, notably the General Chemical Co., which is a branch of the great Allied Chemical & Dye Corporation, of which I have spoken. It is manufactured by Powers, Weightman & Rosengarten, and by others. They would be the beneficiaries of this amendment.

In my opinion, Mr. President, the Senate ought to reject the amendment offered by the Senator from New Jersey.

Mr. SIMMONS obtained the floor.

Mr. KING. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The reading clerk called the roll, and the following Senators answered to their names:

Borah	Glass	McCumber	Sheppard
Brandegee	Gooding	McKellar	Shortridge
Broussard	Hale	McKinley	Simmons
Calder	Harreld	McLean	Smoot
Capper	Harris	McNary	Stanley
Caraway	Harrison	Nelson	Sutherland
Colt	Heflin	Newberry	Swanson
Culberson	Johnson	Nicholson	Townsend
Curtis	Jones, N. Mex.	Norris	Underwood
Dial	Jones, Wash.	Oddie	Wadsworth
Edge	Kellogg	Overman	Walsh, Mass.
Elkins	Kendrick	Page	Watson, Ga.
Fletcher	Keyes	Phipps	Watson, Ind.
France	King	Pittman	Weller
Frelinghuysen	Ladd	Poindexter	Willis
Gerry	La Follette	Pomerene	

The VICE PRESIDENT. Sixty-three Senators having answered to their names, a quorum is present.

Mr. SIMMONS. Mr. President——

Mr. McCUMBER. Mr. President, I wish to ask the Senator from North Carolina, if there is no one else to speak on this question, if he will not let us vote upon it at this time?

Mr. SIMMONS. I yield for that purpose.

Mr. KING. Let the amendment be stated.

The VICE PRESIDENT. The amendment to the amendment will be stated.

The READING CLERK. On page 4, line 16, in lieu of the word "nitrate," proposed to be stricken out, insert "ammonium nitrate, 1 cent per pound."

The VICE PRESIDENT. The question is on agreeing to the amendment to the amendment.

Mr. KING. On that I call for the yeas and nays.

The yeas and nays were ordered, and the reading clerk proceeded to call the roll.

Mr. McKELLAR (when his name was called). I have a general pair with the junior Senator from Indiana [Mr. NEW], which I transfer to the senior Senator from Tennessee [Mr. SHIELDS], and vote "nay."

Mr. WATSON of Georgia (when his name was called). I have a general pair with the junior Senator from Arizona [Mr. CAMERON]. Being unable to obtain a transfer, I refrain from voting.

The roll call was concluded.

Mr. COLT (after having voted in the affirmative). I have a general pair with the junior Senator from Florida [Mr. TRAMMELL]. I transfer that pair to the junior Senator from Delaware [Mr. DU PONT] and allow my vote to stand.

Mr. GLASS. I have a general pair with the senior Senator from Vermont [Mr. DILLINGHAM], who is necessarily absent. I therefore withhold my vote.

Mr. WATSON of Indiana (after having voted in the affirmative). I transfer my general pair with the senior Senator from Mississippi [Mr. WILLIAMS] to the senior Senator from Pennsylvania [Mr. CROW] and permit my vote to stand.

Mr. EDGE. I transfer my general pair with the senior Senator from Oklahoma [Mr. OWEN] to the junior Senator from Pennsylvania [Mr. PEPPER] and vote "yea."

Mr. UNDERWOOD (after having voted in the negative). I understand the senior Senator from Massachusetts [Mr. LODGE] has not voted.

The VICE PRESIDENT. That Senator has not voted.

Mr. UNDERWOOD. I have a general pair with the senior Senator from Massachusetts. I transfer that pair to the Senator from Montana [Mr. MYERS] and let my vote stand.

Mr. GLASS. I find that I can transfer my general pair with the Senator from Vermont [Mr. DILLINGHAM] to the senior Senator from Nebraska [Mr. HITCHCOCK], which I do, and vote "nay."

Mr. JONES of New Mexico. I transfer my general pair with the senior Senator from Maine [Mr. FERNALD] to the senior Senator from Missouri [Mr. REED] and vote "nay."

Mr. FRELINGHUYSEN. I transfer my general pair with the Senator from Montana [Mr. WALSH] to the junior Senator from Oregon [Mr. STANFIELD] and vote "yea."

Mr. STANLEY. I have a general pair with the Senator from Kentucky [Mr. ERNST]. I transfer that pair to the senior Senator from Arizona [Mr. ASHURST] and vote "nay."

Mr. SIMMONS. I wish to announce that if the senior Senator from Missouri [Mr. REED] were present, he would vote "nay."

Mr. SUTHERLAND. I transfer my general pair with the senior Senator from Arkansas [Mr. ROBINSON] to the junior Senator from Missouri [Mr. SPENCER] and vote "yea."

Mr. JONES of Washington (after having voted in the affirmative). Has the senior Senator from Virginia [Mr. SWANSON] voted?

The VICE PRESIDENT. That Senator has not voted.

Mr. JONES of Washington. The Senator from Virginia stated that he might have to be away and I promised to take care of him with a pair if he could not be present. I find, however, that I can transfer my pair with the Senator from Virginia [Mr. SWANSON] to the junior Senator from Iowa [Mr. RAWSON], which I do, and let my vote stand.

I wish to announce that the Senator from South Dakota [Mr. STERLING] is paired with the Senator from South Carolina [Mr. SMITH].

I also wish to announce that the senior Senator from Kansas [Mr. CURTIS] is detained on business of the Senate.

The result was announced—yeas 35, nays 24, as follows:

YEAS—35.

Brandegee	Gooding	McCumber	Poindexter
Broussard	Hale	McKinley	Shortridge
Bursum	Harreld	McLean	Sutherland
Calder	Johnson	Nelson	Townsend
Colt	Jones, Wash.	Newberry	Wadsworth
Edge	Kellogg	Nicholson	Watson, Ind.
Elkins	Kendrick	Oddie	Weller
France	Keyes	Page	Willis
Frelinghuysen	Ladd	Phipps	

NAYS—24.

Borah	Gerry	King	Pomerene
Capper	Glass	La Follette	Sheppard
Caraway	Harris	McKellar	Simmons
Culberson	Harrison	Norris	Stanley
Dial	Heflin	Overman	Underwood
Fletcher	Jones, N. Mex.	Pittman	Walsh, Mass.

NOT VOTING—37.

Ashurst	Hitchcock	Pepper	Sterling
Ball	Lenroot	Ransdell	Swanson
Cameron	Lodge	Rawson	Trammell
Crow	McCormick	Reed	Walsh, Mont.
Cummins	McNary	Robinson	Warren
Curtis	Moses	Shields	Watson, Ga.
Dillingham	Myers	Smith	Williams
du Pont	New	Smoot	
Ernst	Norbeck	Spencer	
Fernald	Owen	Stanfield	

So Mr. FRELINGHUYSEN's amendment to the committee amendment was agreed to.

The VICE PRESIDENT. The question is on agreeing to the amendment of the committee as amended.

Mr. KING. Mr. President, I wish to congratulate the agricultural bloc and Senators upon the other side of the Chamber upon their fidelity to the interests of the American people and the farmers. I hope the newspapers will carry the joyful news that the Republicans by this vote have stated to the farmers, to the miners, to the road builders, to those who use explosives and dynamite that they have made a present of 8 cents per pound to the vested interests and the trusts. I congratulate the people upon having such splendid representatives on the other side of the Chamber.

Mr. FRELINGHUYSEN. Mr. President, the Senator from Utah should extend his congratulations to those who believe in protecting American industry and keeping independent in this country those products which are necessary for national defense and not turning over the domination of this industry to Germany.

Mr. TOWNSEND. Mr. President, I wish to ask the Senator having charge of the bill with reference to an item on which we voted yesterday, when the Senate added "bicarbonate," in line 14, on page 4. Does that still leave the matter in such form that when we get through with the committee amendments a Senator can offer an amendment relative to the rate agreed upon on that item?

Mr. McCUMBER. Of course, the Senate can change any rate when the bill comes into the Senate or after we have passed upon the committee amendments. I stated yesterday that bicarbonate is interchangeable with ammonium carbonate and that the prices are about the same, and therefore it was inserted so as to take it out of the basket clause and give it practically the same rate.

Mr. TOWNSEND. I realized that. I simply wanted it understood that later, when we get into the Senate, we can propose a change in the rate on ammonium carbonate.

Mr. KING. Mr. President, a parliamentary inquiry.

The VICE PRESIDENT. The Senator will state the inquiry.

Mr. KING. Is it necessary to reserve a vote in the Senate upon this matter?

The VICE PRESIDENT. The Chair understands that it is not necessary.

Mr. KING. I desire to give notice that I shall move, when we reach the free list, to transfer this item to the free list, and if defeated in that I shall ask for a separate vote upon the action of the Senate as in Committee of the Whole.

Mr. SIMMONS. Mr. President, I shall take but a brief time to discuss the two items in this paragraph designated as ammonium phosphate and ammonium sulphate. Both of these items are used very largely, and one of them chiefly as a fertilizer, the first item, ammonium phosphate, not being used to quite such a great extent as the second item, ammonium sulphate.

I will first direct attention to ammonium phosphate. The Tariff Commission, referring to that product, says:

> There are two important ammonium phosphates, the monammonium phosphate and the diammonium phosphate. These are of little commercial importance compared with the other ammonium compounds, but are used in the manufacture of fireproof cloth and paper and for medicinal purposes. The sodium salt of acid ammonium phosphate has important analytical uses. There is a fertilizer known as Ammo-Phos sold in two grades; one grade contains 13 per cent ammonia and 47 per cent "available phosphoric acid," the other contains 20 per cent ammonia and 20 per cent "available phosphoric acid."

That product, I say, is very largely used as a fertilizer. In fact, in the sections of country where tobacco, cotton, and potatoes are raised that product, with ammonium sulphate, constitutes probably the largest element that enters into the fertilizer that is used.

The usual formula of the fertilizers that are chiefly used in the southern section of the United States is designated as 8–3–3 or 8–4–4. The 8 per cent represents acid phosphate, the 4 per cent ammonia, and the 4 per cent potash. Before the World War the prices of fertilizer in this country were very high. They advanced to exceedingly high levels during that war, but for some reason, I do not know exactly why, it has been very difficult for the users of fertilizer to resort to any method by which they have been able to induce or to coerce the producers of fertilizers to reduce their prices to the same level, or anything like the same level, to which the prices of agricultural products have been reduced. So, to a very large extent, we are paying now for fertilizers prices upon one level—and a very high level—and we are getting for the crops which we raise through the use of those materials a very low price.

In the year 1920 the tobacco growers of the South, in many instances, were not able to sell their tobacco for enough to pay for the fertilizers used in cultivating the plants, and in many instances during that year the receipts from the cotton crop were not much more than sufficient to pay the fertilizer bill. I do not know of anything, therefore, that is so essential to the development of the agriculture of the United States, especially in that part of the country from which I come, as cheap fertilizer. I raise both cotton and tobacco, and use large quantities of fertilizer. I raised cotton and tobacco before we began to use fertilizer to any considerable extent, and I can state as a fact from personal knowledge that we have been able practically to double the yield of our lands planted in cotton by the use of a moderate amount of fertilizer, and we have been able to add at least one-third to the yield of our tobacco lands.

Mr. TOWNSEND. What kind of fertilizer is used in the Senator's section of the South?

Mr. SIMMONS. The fertilizer which we generally use consists of 8 parts of acid phosphate, 4 parts ammonia, and from 3 to 4 parts potash. As I have stated, the formula is 8–3–3 or 8–4–4 generally; but the proportion of the ingredients may be changed as desired. What I have stated, however, is the ordinary formula which is used in the production of cotton and tobacco.

Mr. DIAL. Mr. President——

The VICE PRESIDENT. Does the Senator from North Carolina yield ot the Senator from South Carolina?

Mr. SIMMONS. I yield.

Mr. DIAL. I should like to ask the Senator from North Carolina is it not more important now than heretofore that farmers should use fertilizer on cotton in order to rush the crop to maturity before the ravages of the boll weevil become so serious? Is not the boll weevil much worse later in the season?

Mr. SIMMONS. What the Senator from South Carolina stated is unquestionably true. The advent of the boll weevil

makes it necessary for us to use a large quantity of fertilizer in order to advance the crop as rapidly as possible, to the point where the boll weevil can not so successfully attack it. The boll weevil arrives rather late in the season, and if we can get our cotton bolls well matured before its arrival it does not do much damage. In order to stimulate the crop and to obtain a rapid growth it is necessary that we shall use more fertilizer than heretofore has been the custom.

There are some States where so much fertilizer is not used, but I state it as an undoubted fact with reference to agriculture in the South that the use of fertilizer in liberal quantities has nearly doubled the yield of the staple crops which we produce. If we can get the necessary fertilizer at a reasonable price it will mean prosperity, but if we have to pay a high price for the fertilizer and the crops are largely absorbed in paying for it, of course it will mean adversity to the southern farmer. I suppose the same is to some extent, but not to so great an extent, true of the farmers in other sections of the country where fertilizers are used. The price of fertilizer is too high now, and there is a crying need that its price be reduced instead of increased.

Mr. President, this is a proposition to increase the price through the tariff on one of the chief elements that enter into the fertilizer which we use in a large section of the United States. I have had a calculation made with reference to the increase that will probably result from the additional duty proposed in this item. The total consumption in 1920 of ammonium sulphate alone for fertilizer use was about 433,000 short tons. The proposed Senate increase in duty of $5 per ton will therefore cost the American farmers at least $2,165,000 per year additional.

Mr. President, there seems to be no necessity for an increase in the duty on this commodity.

Mr. SMOOT. The rate proposed in the bill is a decrease.

Mr. SIMMONS. What is a decrease?

Mr. SMOOT. The duty on ammonium sulphate is decreased from three-fifths of a cent to one-fourth of a cent.

Mr. SIMMONS. Does the Senator mean a decrease from the present law?

Mr. SMOOT. I mean from the House bill.

Mr. SIMMONS. Will not the Senator understand that I am not talking about the House bill? I am talking about the present law. Under the act of 1913 the duty on ammonium phosphate was 1 cent a pound. Under the act of 1909 it was 25 per cent, while under the Senate amendment it is 1½ cents a pound; that is to say, the proposed duty is a half a cent a pound more than that of the present law. I will explain, if necessary, to the Senator from Utah that that is what I meant a little while ago when I said the duty had been increased; it constitutes an increase over the present law of one-half of 1 cent per pound. That means, of course, $10 a ton. Ammonium phosphate is not a very high-priced element as compared with the price of some of the elements out of which fertilizer is made, but the duty proposed amounts to $10 a ton.

I thought I had the consumption figures here, but I find I have not, but, according to my recollection of these two commodities, there are consumed about 433,000 tons, or probably something in excess of that. At any rate, according to my recollection—and I am speaking now from recollection—the additional amount which by reason of the increased duty will be added to the cost of the two elements which I am now discussing, phosphate of ammonia and sulphate of ammonia, runs into millions of dollars. That, of course, is a very serious matter to the farmers in certain sections of the country where fertilizers are extensively used.

What is the justification for the proposed duty? According to the statistics the imports of ammonium phosphate decreased from a maximum of 68,039 pounds—not tons, but pounds—in 1911 to about 7,000 pounds in 1913. Seven thousand pounds is only 3½ tons, which is not enough fertilizer for 25 acres of cotton or of tobacco. The imports increased sharply to 205,742 pounds in 1914. That would be equivalent to about 100 tons, which would not much more than fertilize 500 or 600 acres of land. In 1920 the imports of this product fell to 12,917 pounds, a quantity equal to 6½ tons, valued at $1,509. During the first nine months of 1921 the imports of this product, the duty on which it is now for some mysterious reasons proposed to increase by adding $10 to every ton that the farmer uses, were 1,976 pounds, not quite 1 ton.

I should like very much to be advised why, in the face of those figures, it has been thought necessary to increase the duty. There never have been more than a hundred tons imported at best, and the importations have gradually worked themselves down, under the 1 per cent duty of the present law, to the point where importations do not amount to 1 ton in nine months.

Now, Mr. President, I pass from that item, and I take up ammonium sulphate.

The Tariff Commission says, speaking about ammonium sulphate:

> The largest use in normal times is in the manufacture of fertilizers.

And I think that is absolutely true.

The changes with reference to that in the rates of duty are as follows:

In the act of 1913 this product was on the free list. In the act of 1909, the Payne-Aldrich Act, this product was on the free list. This product always has been on the free list in our tariff bills. This is the first time it has ever been suggested that this great base of the fertilizer used by the farmers of this country should be put on the dutiable list. It is true that the duty carried in the Senate bill is not a high duty. It is one-fourth of a cent per pound. That would amount to $5 a ton. I ask the question there that I asked before, and I am doing it in perfect good faith: Why the necessity? It certainly does not grow out of past import conditions or present import conditions. There must be something behind these increases, moving the committee to impose this duty, besides the conditions growing out of our import trade in these products; and I should like very much to know what it is.

Mr. SMOOT. Mr. President, as far as ammonium sulphate is concerned, it will make no difference whatever to the farmer, because if there is a duty upon ammonium sulphate the farmer will not buy ammonium sulphate, but he will buy nitrate of soda.

Mr. SIMMONS. Why, certainly.

Mr. SMOOT. Because the only element of value as far as the fertilizer is concerned is the nitrogen content, either in the nitrate of soda or in the ammonium sulphate.

Mr. SIMMONS. True.

Mr. SMOOT. So, if Congress imposes a duty upon ammonium sulphate, then, as far as the users of fertilizer are concerned, they will not buy ammonium sulphate but they will buy nitrate of soda.

Mr. SIMMONS. Nitrate of soda made out of ammonium phosphate. That is one of the elements.

Mr. SMOOT. No; it is the nitrogen content of the nitrate of soda.

Mr. SIMMONS. I understand that.

Mr. SMOOT. Therefore, if a duty is put upon ammonium sulphate, then, of course, the fertilizer manufacturers, as I have said, will not buy ammonium sulphate; they will buy nitrate of soda.

Mr. SIMMONS. Yes.

Mr. SMOOT. Because the value of either one of them is only in the content of the nitrogen in the finished product.

Mr. SIMMONS. Does the Senator think that he can put a duty upon any element of a finished product that does not enter into the cost of the production of that product?

Mr. SMOOT. Why, no; but the Senator says that the purchaser of the fertilizer in one case may buy ammonium sulphate just as he would to-day if the price of ammonium sulphate is lower than that of nitrate of soda, but if nitrate of soda is lower as to the nitrogen content then he will buy the soda instead of the ammonium; and I say that there is an inconsistency here, because one is on the free list and one is dutiable.

Mr. SIMMONS. I have told the Senator that the Tariff Commission has stated that the largest use of this product, ammonium sulphate, is in the manufacture of fertilizer.

Mr. SMOOT. It has, and that is true.

Mr. SIMMONS. And I have told the Senator that the fertilizer we use is a fertilizer manufactured very largely out of this product.

Mr. SMOOT. Yes; but I wanted to call the Senator's attention to the fact that ammonium sulphate competes with nitrate of soda, and when one is higher than the other, of course they will not purchase the one that is higher, and we have left nitrate of soda on the free list.

Mr. SIMMONS. Oh, that may be so, Mr. President, but why place a duty on ammonium sulphate when the competing article, nitrate of soda, is left on the free list? Why not safeguard the farmer by placing both ammonium sulphate and nitrate of soda on the free list, when there is absolutely no sound reason to place a duty on either?

Mr. SMOOT. The Senator can not consider what is going to happen to an industry which uses one of the articles without taking into consideration the question of the other article, and what I said was not by way of criticism of what the Senator said. I simply wanted to call his attention to the fact that the situation existing in the law to-day is that nitrate of soda is on the free list, and it competes with sulphate of ammonium,

used for exactly the same purpose as far as fertilizer is concerned, and the value of either one of them depends upon the nitrogen content.

Mr. SIMMONS. And what I want to do is to put them both on the free list, as I have stated to the Senator.

Now, Mr. President, I simply want to give—I said I would take only a few minutes—the imports of this product, so that it may be clearly seen that there is nothing in the import situation that calls for this duty upon this element of fertilizer:

Imports reached a maximum of 103,251 short tons in 1911, then decreased steadily to 3,983 tons in the fiscal year of 1918.

Then they give the later statistics. The later statistics show that in 1920 the quantity imported was 1,993 tons; in the first nine months of 1921, 3,089 tons; showing a falling off since 1911 of 100,000 tons, or 3,000 tons imported now as against 103,000 tons imported in 1911.

Mr. President, imports have not only fallen down to a minimum, a perfectly negligible quantity, but we have been exporting and are now exporting this product in large quantities.

Exports are not shown prior to 1920, in which year (calendar) they were 66,714 short tons, valued at $7,433,350, and for nine months of 1921, 67,422 tons, valued at $4,119,858.

That is to say, Mr. President, we are exporting twenty times as much of this product as we are importing. If the Senators representing the majority think they can justify taking this product from the free list and putting a duty upon it to protect the American producer against foreign competition in the face of these figures, I say, let them go to it, but it will be an absurd act and a useless tax upon the American farmer.

Mr. President, I wish to suggest to the Senator in charge of this bill that as these two products have a very important connection with fertilizer, one of them being chiefly used as fertilizer, and as there is later in the bill an item relating to potash, which is one of the chief elements of fertilizer, it might save time and it might lead probably to more satisfactory results if we should postpone the consideration of this matter until we reach the paragraph dealing with potash, and then discuss together these three items, all relating to fertilizer.

Mr. McCUMBER. Mr. President, I should be disposed to do almost anything that I thought would facilitate the final disposition of this bill. If the Senator feels that it will assist, as I admit that the potash schedule and this schedule are somewhat related to each other, I have no serious objection to passing to the next proposition; but I should like to have all the discussion that Senators are ready to present at this time.

Mr. SIMMONS. I will say to the Senator that if we take up this subject now I think it will lead to an extensive discussion of the fertilizer question, and when we get to potash we will go over exactly the same ground, and the discussion can be directed to all three of the items at one time instead of two of them now and one of them later.

Mr. LODGE. Mr. President, exactly what paragraphs or what items does the Senator wish to pass over?

Mr. SIMMONS. The two relating to ammonium phosphate and ammonium sulphate.

Mr. LODGE. Those two?

Mr. SIMMONS. Those two.

Mr. LODGE. The Senator does not propose to pass over the liquid anhydrous ammonia?

Mr. SIMMONS. There is no change in that.

Mr. LODGE. No change in the House rate?

Mr. SIMMONS. No change in the House rate; no.

Mr. LODGE. It is only those two?

Mr. SIMMONS. That is to say, there is no amendment as to that, and we are dealing now with amendments, as I understand.

Mr. LODGE. The Senator wants to pass over those two items?

Mr. SIMMONS. Yes; that is all.

Mr. FRELINGHUYSEN. Mr. President, a parliamentary inquiry. I offered an amendment making the duty on ammonium nitrate 1 cent per pound. I understand that the committee amendment as amended has not been agreed to, while my amendment has been agreed to. I should like to have that voted on and settled, because it bears no relation to this.

Mr. SIMMONS. I thought we had voted on that this afternoon.

Mr. FRELINGHUYSEN. No; the committee amendment as amended has not been agreed to.

The PRESIDING OFFICER (Mr. WILLIS in the chair). The Chair understands that the question is on agreeing to the committee amendment as amended.

Mr. SIMMONS. I have no objection to a vote on that.

Mr. LODGE. What is that vote?

Mr. FRELINGHUYSEN. That is the ammonium nitrate, 1 cent per pound.

Mr. LODGE. I only want to get at what we are doing. We have stricken out the words "ammonium nitrate."

The PRESIDING OFFICER. The Secretary will state the amendment as amended.

The ASSISTANT SECRETARY. The committee amendment has been amended by adding after "ammonium nitrate" and the comma the words "ammonium nitrate, 1 cent per pound."

Mr. LODGE. As the bill reads, with amendments, the committee proposes to strike out the words "ammonium nitrate," and then "perchlorate" to get the change of a comma, so that it would read:

Ammonium perchlorate and ammonium phosphate, 1½ cents per pound.

The PRESIDING OFFICER. The Chair understands that the amendment that was adopted, offered by the Senator from New Jersey, comes in after the words "ammonium nitrate." Let the Secretary state the amendment.

Mr. LODGE. The words "ammonium nitrate" have to be replaced in the bill at that point. Of course, I do not pretend to know what is proposed, except what is shown by the print before me. We do not want to say "ammonium nitrate" twice.

The PRESIDING OFFICER. Let the Secretary again report the amendment offered by the Senator from New Jersey to the committee amendment, which amendment to the amendment has been agreed to.

The ASSISTANT SECRETARY. The Senator from New Jersey proposed——

Mr. LODGE. I am aware of what he proposed. What I am trying to find out is what has been done with the amendments in their order.

The PRESIDING OFFICER. The Chair understands the question now is on the committee amendment as amended by the amendment offered by the Senator from New Jersey. If the motion shall prevail, the words "ammonium nitrate" will be stricken out, and in lieu thereof will be inserted the words "ammonium nitrate, 1 cent per pound."

Mr. LODGE. That is all right; that is perfectly comprehensible.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the committee as amended.

Mr. SIMMONS. I thought we had voted on it, but I understand the Senator from New Jersey to say we have not.

Mr. FRELINGHUYSEN. I said my amendment to the amendment had been agreed to, but the committee amendment as amended has not been agreed to. I ask that the committee amendment as amended be agreed to.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment as amended.

Mr. UNDERWOOD. Mr. President, I have no desire to interrupt, or throw a monkey wrench into the machinery at this stage of the proceedings, but I understood we were acting only on committee amendments. The committee amendment was merely to strike out the words in reference to ammonium, but this is an amendment to insert a rate, which is entirely new matter. It is an individual amendment. I merely want to call attention to that fact. I am not going to disturb the Senator from New Jersey. He need not be alarmed.

Mr. FRELINGHUYSEN. The Senator can not disturb me, because it is not my amendment, but a committee amendment.

Mr. UNDERWOOD. The committee amendment fixed no rate. I was not in the Chamber when the amendment to the amendment was originally offered. The Senate had a right to pass on the committee amendment so far as it went, but the Chair ruled the other day that it is not in order to strike an item from a section of the bill and put it on the free list. There is no difference in principle between that and putting a different rate on an item, which is an individual matter.

Mr. LODGE. This is a committee amendment.

Mr. UNDERWOOD. I think the Senator is mistaken.

Mr. FRELINGHUYSEN. It was reported from the committee. It was a committee amendment.

Mr. UNDERWOOD. I understand the committee approved the amendment.

Mr. LODGE. They had a right to offer it.

Mr. UNDERWOOD. But it was offered by the Senator from New Jersey.

Mr. FRELINGHUYSEN. For the committee.

Mr. UNDERWOOD. I did not understand that the Senator had offered it for the committee.

Mr. LODGE. Mr. President, I am in favor of the amendment as amended. I simply want to say that I have an amendment, which I can not offer at this point because it is not a com-

mittee amendment, and which is intended simply to make the classification more definite. It is to insert, after the word "phosphate" the words "nitrogenous material manufactured from leather or tannery wastes." I merely give notice of my intention to offer an amendment to insert after the word "phosphate," if the Secretary will be kind enough to take it down, the words "nitrogenous material manufactured from leather and tannery wastes." "Ammonium phosphate" does not strictly include it, although it was believed that it was intended to do so. I shall refer the letter which I have on the subject to the committee, and ask them to consider it before it becomes in order for me to offer the amendment.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment as amended.

The amendment as amended was agreed to.

The PRESIDING OFFICER. The Secretary will state the next amendment passed over.

The ASSISTANT SECRETARY. The next items passed over were ammonium phosphate——

Mr. SIMMONS. Mr. President, I do not understand whether the Senator from North Dakota has agreed to the proposition I made in reference to the items to go over.

Mr. McCUMBER. Yes; as far as I can, I agree to it.

The ASSISTANT SECRETARY. Ammonium phosphate and ammonium sulphate are to be passed over.

Mr. LODGE. Until potash is reached.

Mr. SMOOT. There is one amendment before that which has not been acted upon—the provision in reference to perchlorate.

The PRESIDING OFFICER. The Secretary will state the amendment.

The ASSISTANT SECRETARY. On line 16, page 4, the committee proposes to strike out the word "perchlorate" and the comma, and to insert the same word "perchlorate" in the same way, without a comma after it.

The amendment was agreed to.

Mr. LODGE. Now, I understand we are going to agree to put over phosphate and sulphate until potash is reached?

Mr. SIMMONS. That is the understanding.

Mr. LODGE. Where is the item of potash found in the bill?

Mr. SMOOT. In paragraph 1635.

The PRESIDING OFFICER. The Secretary will state the next amendment.

The ASSISTANT SECRETARY. The next amendment is, on page 4, line 21, paragraph 8, after the words "Antimony: Oxide," and the comma, where the committee proposes to strike out "2 cents per pound" and insert in lieu thereof "1½ cents per pound and 25 per cent ad valorem," so as to read:

Antimony: Oxide, 1½ cents per pound and 25 per cent ad valorem.

Mr. JONES of New Mexico. Mr. President, I have been investigating this item to some extent, and I am impressed with the importance of this amendment. It is quite an increase over the present duty, and I have not found any evidence in the hearings which seems to warrant this increase.

Under the existing law the duty is 25 per cent ad valorem. Under the old Payne-Aldrich law it was 1½ cents per pound and 25 per cent ad valorem. In the bill as it came from the House the 25 per cent ad valorem rate was not made to apply to this item, but the item carried a 2 cents per pound rate and there was no ad valorem duty on it. The Senate committee recommends going back to the Payne-Aldrich rate.

I have not found anything in the hearings which seems to warrant that, except a mere request from one witness, and that witness proceeded to talk about the metallic antimony and the manufacture of that from the ore. This particular commodity is used at this time principally in the coloring of glassware. I find that this one witness, Mr. Hoguet, president of the Antimony & Compounds Co. of America, who gave his address as New Brunswick, N. J., appeared before the committee and asked that this be done. If I have interpreted his testimony correctly, he gave no reason as to why it should be done. He wanted the duty put upon the antimony metal, and it was that which he was principally discussing. He said:

I appear on behalf of this company and wish to ask for an increase in the duty as formulated by the Fordney bill on two articles. One is antimony oxide, paragraph 8 of the bill.

If you will permit me, I wish to discuss closely similar substances, though they may not all be mentioned in the bill itself.

Antimony is taken care of in paragraph 376 of the bill. May I say at this point that regulus and metal mean the same thing. They are pure metallic antimony.

If the committee please, this is an infant industry which, after years of perseverance and effort, has been unable, because of the inadequate tariff protection, to gain any foothold in the country.

The company which I represent is outfitted to produce about 1,200 tons per annum.

Senator WALSH. Of oxide?

Mr. HOGUET. Of oxide and antimony.

Under the Payne-Aldrich bill regulus or metal was taxable at the rate of 1½ cents per pound. In addition, there was a rate of 25 per cent ad valorem.

The Fordney bill proposes to reenact the rate of 1½ cents on regulus and gives 2 cents per pound on oxide of antimony.

It is respectfully submitted that these duties are not sufficient, and in order to protect the industry and to enable it to function each of these articles in question should receive the benefits of a duty of 4 cents per pound specific.

I guess I misunderstood him as making the request that the committee adopt the Payne-Aldrich rate, but he wanted 4 cents a pound. Then he proceeded to discuss the production of the metallic antimony, and I should like to inquire if there is any further testimony upon the subject. This is all I have been able to find.

Mr. FLETCHER. Mr. President——

Mr. FRELINGHUYSEN. I can not hear the Senator.

The PRESIDING OFFICER. Does the Senator yield to the Senator from Florida?

Mr. JONES of New Mexico. I yield to the Senator.

Mr. FLETCHER. May I ask the Senator if the 25 per cent ad valorem rate——

Mr. FRELINGHUYSEN. Mr. President, on this side of the Chamber we can not hear the discussion.

The PRESIDING OFFICER. The Senate will be in order.

Mr. FLETCHER. It is proposed to make this duty 1½ cents a pound, and 25 per cent ad valorem. What would the 1½ cents a pound amount to as an ad valorem duty?

Mr. JONES of New Mexico. There is no testimony upon that point. My information is that the price of oxide ranges from 7 to 9 cents a pound. So a 25 per cent ad valorem duty would be about 2 cents a pound, and this 1½ cents per pound would be equivalent to about 12½ per cent additional, which would make 37½ per cent per pound, or 3¾ cents per pound. That would be about the result of it so far as I have been able to ascertain.

Mr. FRELINGHUYSEN rose.

Mr. JONES of New Mexico. Does the Senator from New Jersey wish to make an inquiry?

Mr. FRELINGHUYSEN. I am willing to analyze it as far as I understand it. I asked for a duty of 1½ cents per pound on regulus or metal and then three-quarters of 1 cent per pound on needle or liquated antimony. In paragraph 376 the duty on liquated antimony is three-quarters of a cent a pound. As I understand it, there are several stages of refinement. Fusing the ore gives antimony sulphate. That is the liquated antimony. Further refining gives oxide. Now, we gave them 1½ cents per pound and, as a compensatory duty for the 1 cent duty on the liquated, a 25 per cent ad valorem protection.

I understand in my State there is an industry which has been built up—I think the Senator mentioned it—which produces about 1,200 tons of regulus and alloying metal, the oxide also being used as a basis for dye. Before the war the ore was mined in China and in England, being imported to the United States. Since the war China has no smelters, and is now shipping to the United States directly.

The American cost is 8 to 9½ cents per pound. The Chinese cost is 2.5 cents per pound. Antimony content is 25 to 30 per cent of ore. Chinese labor receives from 5 to 40 cents per day, and American labor receives from $3 to $4 per day. This industry will be lost unless a moderate rate is given. They asked 4 cents. We gave them 1½ cents plus 25 per cent ad valorem.

The whole question is whether the Refining Compound Co. in New Jersey, which takes the ore and completes the refining of it, is to be protected or not. At the present time the industry is absolutely in the control of the Chinese monopoly. China is the only country from which we can get antimony. The industry asked for 4 cents and the committee gave them 1½ cents plus 25 per cent ad valorem. I will say to the Senator from New Mexico that this is practically the same as the House rate. The House added the liquated antimony rate.

Mr. JONES of New Mexico. If I understood the Senator aright, and if he is correct, I have been laboring under a wrong impression. Do I understand the Senator to say that oxide is made from the sulphide? I do not understand that to be the case.

Mr. FRELINGHUYSEN. As I understand the process, they make the metal first and then the oxide from the metal.

Mr. JONES of New Mexico. Yes. The metallic antimony is made first, and then that is oxidized. That is my understanding of it. The other item, in the other paragraph of the bill, as I take it, does not enter into this equation at all. I think the Senator from New Jersey must be mistaken about that.

Mr. FRELINGHUYSEN. I understand that it does, and this is a compensatory rate of three-fourths of 1 cent per pound on

liquated antimony. The liquated is the raw material with the metal and the oxide and all the other antimonies.

Mr. FLETCHER. The House rate is 2 cents per pound, and that would be about 10 per cent ad valorem, whereas it is proposed here to make the rate 32½ per cent ad valorem. It seems to me there is quite a difference. The House rate is specified at 2 cents per pound, and the unit value is 5 cents and 10 per cent ad valorem, whereas the Senate committee proposes to make it 32½ per cent ad valorem.

Mr. JONES of New Mexico. In looking at paragraph 1509 of the bill I find that antimony ore is on the free list. I observe there that the words "and needle or liquated antimony, but only as to the antimony content," are stricken out. I would like to have some explanation from the Senator from New Jersey.

Mr. FRELINGHUYSEN. It is made dutiable under paragraph 376 at three-fourths of a cent per pound.

Mr. JONES of New Mexico. Then, it seems to me, if these items are related in any such way, the item now under consideration ought to go over until we can discuss the other item along with it.

I do not understand why antimony, the generic term, should be on the free list and antimony as a regulus or metal should be 2 cents per pound and needle or liquated antimony three-fourths of 1 cent per pound. I do not understand why antimony itself, the broad term, should be kept on the free list and these particular kinds of antimony brought over to this schedule and a tax placed upon them. I do not see what would be left on the free list.

Mr. FRELINGHUYSEN. I will try to explain it to the Senator.

Mr. JONES of New Mexico. I am seeking information.

Mr. FRELINGHUYSEN. I will try to explain the various processes of conversion. They begin with antimony ore. Then they get the liquated antimony, which is the ore taken out, and antimony sulphide. That is the first conversion. Only the ore is on the free list; but the first conversion, needle or liquated antimony, is dutiable at three-fourths of 1 cent per pound. The next conversion is the metal, which is a further process, and takes a compensatory duty of three-fourths of 1 cent. The needle or liquated antimony we give three-fourths of 1 cent per pound, while the other we give 1½ cents per pound and 25 per cent ad valorem.

That is the protection which the Refining Compound Co., in my State, asked. That is an explanation of the duty. The various stages or processes of conversion I have given. They can be traced down right straight through all other metals; but the process is a conversion process, and on those we seek protection.

Mr. JONES of New Mexico. Then we have developed here an entirely new proposition regarding the antimony schedule. We are confronted here with a duty upon metallic antimony, which heretofore has been on the free list. Metallic antimony is now made dutiable, and the oxides and other compounds of antimony have their duty increased because of the new duty placed upon the metallic antimony.

Mr. President, it is necessary for us to examine that question——

Mr. FRELINGHUYSEN. Mr. President, may I interrupt the Senator?

Mr. JONES of New Mexico. I gladly yield.

Mr. FRELINGHUYSEN. Antimony as a metal has not been free since 1909. There has been a 10 per cent ad valorem duty on the metal.

Mr. JONES of New Mexico. It was free under the bill as it came over from the House under section 1509.

Mr. FRELINGHUYSEN. I think not. The duty on metal was 1½ cents per pound.

Mr. JONES of New Mexico. What I am talking about is the general term "antimony."

Mr. FRELINGHUYSEN. I think the Senator is confusing it with the ore.

Mr. JONES of New Mexico. I will find out about it. The antimony ore is still on the free list.

Mr. FRELINGHUYSEN. That is correct.

Mr. JONES of New Mexico. But the metallic antimony is made dutiable under section 376, as I understand it, and the duty there, according to the pending bill, has been increased from 1½ cents per pound to 2 cents per pound.

Mr. FRELINGHUYSEN. That is right.

Mr. JONES of New Mexico. The Senator suggests that as a reason for the increase under paragraph 8 which we are now considering.

Mr. FRELINGHUYSEN. Liquated antimony was taken off the free list and made three-fourths of 1 cent per pound. That is the reason why the metal has been increased to 2 cents.

Mr. JONES of New Mexico. Is that done because there is three-fourths of 1 cent per pound put upon liquated antimony?

Mr. FRELINGHUYSEN. That is correct.

Mr. JONES of New Mexico. By reason of that, then, we increase the duty on the metal from 1½ to 2 cents per pound.

Mr. FRELINGHUYSEN. That is right.

Mr. JONES of New Mexico. And that is the cause of the other increase?

Mr. FRELINGHUYSEN. Yes.

Mr. JONES of New Mexico. So it is the duty upon the metal, the so-called liquated metal, that is the cause of the whole trouble?

Mr. FRELINGHUYSEN. That is it.

Mr. JONES of New Mexico. Mr. President, that brings up for consideration an entirely different question from the one presented by the paragraph of the bill now under consideration. The paragraph now under consideration relates to the manufacturing of antimony oxide and the duty on that is increased because this metal has had a duty put upon it which it did not have before. It was previously on the free list. The Senator from New Jersey proposes then to have a duty put upon the reduction of the ore into that particular kind of metal. That involves the history of the antimony industry not only in this country but elsewhere.

There is no ore produced in this country to any great extent. The very concern which has the capacity of 1,200 tons a year, to which the Senator from New Jersey has just referred, is, I believe, the only concern in the United States which is smelting the antimony ore and making the antimony metal.

Mr. FRELINGHUYSEN. That is quite true. The Senator from New Mexico states the fact correctly. The ore comes from China, and that is practically the only place from which it comes. This industry has been established in my State. Formerly the ore was smelted in England, as it still is; but the industry was started here during the war, and, of course, there will be opportunity under this proposed protection for other smelters to operate and smelt a certain amount of ore. The Senator is quite right that the plant in New Jersey smelts only about 1,200 tons; that is their capacity; but they ask for protection on the conversion costs, the manufacturing costs, against England and against China, whence the ore is shipped to England for smelting. It is also smelted in China. The question simply is, Shall we protect this smelting industry in this country? The ore is on the free list.

Mr. JONES of New Mexico. Mr. President, will the Senator tell us the quantity of metallic antimony which is used in this country?

Mr. FRELINGHUYSEN. This commodity is used as a metal alloy. The production of antimony metal from domestic ores and antimony metallic compounds and antimony alloy by domestic smelters was 3,898,000 pounds in 1912 and 6,000,000 pounds in 1917.

Mr. JONES of New Mexico. I will ask the Senator from New Jersey to figure out how many tons that is.

Mr. FRELINGHUYSEN. The Senator from New Mexico can figure it as well as I can, if he wishes to do so.

Mr. JONES of New Mexico. Very well. Then I will give the Senator some more figures. In the tariff survey regarding this item, on page 21, the Senator will find that the antimony imported into this country for consumption in the year 1920 amounted to 9,817 tons. The company in the Senator's State has a capacity of only 1,200 tons. It is proposed to increase the duty on this commodity to $15 a ton. I wonder if the Senator from New Jersey has ever pondered upon the proposition as to how much it is going to cost the people of the United States to enable that one concern in his State to begin the business, practically, of producing metallic antimony. That is the situation. We have the testimony of but one man, the president of that concern, and he stated in his testimony that the capacity of his plant was about 1,200 tons a year.

Mr. FRELINGHUYSEN. Mr. President, I do not want the Senator from New Mexico to proceed in error. I said that there was one of these smelting plants in my State, but I understand that there are four or five others throughout the country which operate on antimony ores alone. Of course there are other smelting concerns which operate on various kinds of ore. The Chapman Smelting Co., of San Francisco, opened up in 1917. The Antimony Smelting Refining Co. built a plant at Seattle and manufactured oxide for a time. The Western Metals Co. built an antimony smelter at Los Angeles, which now smelts Chinese ores. It has drawn a part of its supply from Colorado and Nevada and Mexico as well as ores from its own mines in California. I find there is another plant. The Mongolia Metal Co. has a plant at Matawan, N. J., purchasing ores from various sources. The Nichols-Laygn Chemical Co. operates a plant at

San Francisco, and the Antimony & Compounds Co. operates a plant at Piscataway, N. J.

It seems as if these plants are now shut down owing to the fact that they have no protection as against the Chinese and English smelters.

Mr. JONES of New Mexico. That was my understanding. During the war these other plants were built up in order to meet war conditions, and they have been shut down since that time. I do not know whether that is the history of the plant in New Jersey; I do not know when it was established, but the Senator from New Jersey, doubtless, can inform us about that. I have not seen anything upon that subject.

Mr. FRELINGHUYSEN. I do not think the New Jersey plant was a war plant. I think it was operating before or at the beginning of the war. However, I have no information with regard to that.

Mr. JONES of New Mexico. Is not this the only concern, then, that was in operation prior to the war engaged in reducing foreign ores?

Mr. FRELINGHUYSEN. I do not know. I hardly think so. In view of the quantity of ore imported, I presume some other smelters must have been smelting antimony.

Mr. JONES of New Mexico. I do not claim to have made a thorough study of the subject, but from the study which I have been able to make I think the situation is about like this: The antimony ores found in the United States are of no considerable consequence. The lead smelters of the country produce a considerable quantity of antimony as a by-product from the smelting of lead ores, but merely as a by-product. The concerns which have been built up for the purpose only of smelting antimony ores have been compelled to go to other countries for their ore and bring it to this country. I understand the Senator from New Jersey is contending that the smelter in New Jersey should be permitted to smelt the imported ore and make antimony as a primary product, although the lead smelters of the country produce antimony as a by-product. The concern in New Jersey must bring the ore from China or from Bolivia or from Mexico. Those are the only three countries of which I know where the ore can be found in any considerable quantity. The reason the ore is not smelted in Bolivia is that coal can not be imported into that country so as to build up a smelter, and so some of the ore has been coming from Bolivia to this country and is smelted here. The one great country, however, where the ore is found is China, and we must import from China either the ore or the metallic antimony.

The consumption of this commodity in the United States, I judge from all that I have read, is around 10,000 tons a year, which is obtained from China or from lead smelters producing it as a by-product. Now, it is proposed to put a duty of $15 a ton upon the 10,000 tons of metal consumed in this country. I am not trying to be exact about the figures, but that would amount to a considerable bill for the American consumers to pay.

The only person who appeared before the committee and asked that such a duty be placed upon this commodity was one man from New Jersey. He did not undertake to give his costs, except in a mere general way, but he did talk about the low labor cost in China. Not a word, however, was said as to the cost of transporting the ore as compared with the cost of the metal itself, or how much of an economic loss there would be, how much of an economic waste there would be by importing the ore rather than importing the metal.

Much has been said about production costs. The Tariff Commission obtained considerable data regarding the cost of production in China. It seems also that England prior to the war was competing with China in the smelting of this ore and the production of the metal. I do not believe that any case can be made out here that warrants this duty upon metallic antimony. Of course, if we are going back to the ore, then I think the Senator from New Jersey is quite right in saying that the duty on the oxide should be increased; but there is where the trouble comes. If we go back to the foundation of different industries and put a tariff on the raw product, then as we begin to make compounds of that product, which is the raw material, for something else, we have got to impose higher tariffs on the compounds than are imposed upon the basic product, and so on up. It is like an inverted pyramid; starting with the one item it begins to spread out and out, until it finally reaches the consumer in a very much inflated form, and the little three-fourths of a cent per pound upon metallic antimony when it reaches the consumer in the textile industry and the glass-making industry of the country in the making of war materials is expanded in those industries until the costs are beyond anything which it seems to me would be reasonable. And all of this in order to help out one concern in New Jersey which has a capacity for smelting 1,200 tons of antimony per annum, when the consumption of the country of this product is not less than 10,000 tons. In other words, to enable that concern to go ahead producing about 10 per cent of a commodity you would make the people of this country pay not only what that concern would get out of it but nine times more. It would be far better to pay the manufacturer in question three-fourths of a cent per pound for his product than to charge the people of this country ten times that amount so to enable him to smelt some antimony ore in New Jersey. It is not a question of developing a home product. The ore is not here.

Mr. FRELINGHUYSEN. Mr. President, I do not want to be unjustly attacked on this question. The question is whether this industry shall be protected; and the Senator's own party made a rate of 25 per cent ad valorem on this material in the Underwood bill. It was the intention to make it 25 per cent, but by reason of a mistake, the dropping of a comma in that bill, it was thrown in the basket clause; but the Underwood tariff bill, which the Senator has praised here as being perfect, had a duty of 25 per cent on antimony oxide; and so the charge that this duty is made to protect only this industry is false, because the Underwood bill protected the industry as a whole.

Mr. JONES of New Mexico. Mr. President, I hope the Senator will not hold me responsible for the so-called Underwood bill.

Mr. FRELINGHUYSEN. I withdraw that, then.

Mr. JONES of New Mexico. I was just stating what I thought to be the situation here. It is quite probable that in order to raise some revenue the Underwood bill did impose a duty of 25 per cent upon the importation of that commodity, and for revenue purposes I think it would be a pretty good thing. I mean by that that the amount of revenue derived in proportion to the amount of the tax on the community would be relatively large.

Mr. FRELINGHUYSEN. Mr. President, may I ask the Senator a question?

Mr. JONES of New Mexico. I shall be very glad to have the Senator do so.

Mr. FRELINGHUYSEN. Does the Senator consider 25 per cent ad valorem a revenue duty?

Mr. JONES of New Mexico. We have a good many revenue duties much higher than 25 per cent; but the bill as it comes from the House has this item—I mean the cruder material—upon the free list, and the Senator from New Jersey himself said that this was placed where it is for the specific purpose of enabling his concern to live. I am discussing this matter from the standpoint of the Senator from New Jersey. What I was going to say is that you are not developing an industry in this country. The ore is not here. It can not be made an independent industry. There must be an importation of something, and the only question is whether it shall be an importation of the smelted or metallic product, or whether it shall be an importation of the ore. That is the question; and it seems to me that it is an economic waste to talk about putting a tariff upon these metals which are made from the ore itself to enable these concerns to smelt the ore in this country, when they have to import something from somewhere anyhow.

Mr. FRELINGHUYSEN. Mr. President, I am quite sure the Senator is discussing this matter in good faith.

Mr. JONES of New Mexico. I certainly am.

Mr. FRELINGHUYSEN. There are many raw materials that we import that we convert in this country, and this is one of them. This is a smelting concern in New Jersey. The other industries throughout the country are smelting concerns also. If you put protection upon the manufactured product when the raw materials are available, is it not a sound policy to protect the industry in this country when you can get the raw materials and convert them here, rather than convert them in China or in England?

Mr. JONES of New Mexico. Mr. President, as far as this particular item is concerned, I say "No," and I will tell the Senator why. You have to import something from China. It is an economic waste to import the ore over here and have it smelted here if it can be done over in China as cheaply as it can be done here. It seems to me this is just one of the cases where this very distinguished constituent of the Senator from New Jersey ought to try to find some other business in which he can engage.

Mr. FRELINGHUYSEN. Does the Senator believe that if cloth can be manufactured in England cheaper than it can be manufactured here, it would be an economic waste to manufacture cloth here?

Mr. JONES of New Mexico. Mr. President, if the cotton were grown in England, I would say "Yes"; but it is not;

it is grown in the United States. We can build up there an industry from the field to the clothing on the individual; but you can not do it here. It is an entirely different situation.

Mr. President, I think this item ought to go over and be discussed in connection with the free-list item and paragraph 376 of the bill. They ought all to be discussed together, and if we are going to amend the free list in the way that is proposed of course these follow; but the free-list item is the trouble in this situation, and that ought to be passed on first, because the Senator from New Jersey, I think, very correctly says that the item we are now discussing is based upon the action taken regarding these other items in the bill.

Mr. FRELINGHUYSEN. Of course the committee is desirous of cleaning up these paragraphs as quickly as possible; but, if the Senator desires it, I will consent to have it go over until paragraph 376 is reached.

Mr. JONES of New Mexico. Mr. President, I think this paragraph and paragraph 376 should go over until paragraph 1509 is considered.

Mr. FRELINGHUYSEN. No; I will not consent to that. I am willing that it shall go over until we reach paragraph 376.

Mr. JONES of New Mexico. I think that would be even better than the other, because paragraph 376 is the one which determines whether that duty shall be put on the metallic product or not; so I join in the request of the Senator from New Jersey that that paragraph be deferred for consideration in connection with paragraph 376.

Mr. FRELINGHUYSEN. Does the Senator wish the whole paragraph to go over?

Mr. JONES of New Mexico. I think it all goes together. They are different compounds of the same basic material.

The VICE PRESIDENT. Is there objection? The Chair hears none, and it is so ordered. The Secretary will state the next amendment of the committee.

The next amendment was, on page 5, at the end of line 6, after the word "bitartrate," to insert "5 cents per pound"; so as to make the paragraph read:

PAR. 9. Argols, tartar, and wine lees, crude or partly refined, containing not more than 90 per cent of potassium bitartrate, 5 per cent ad valorem; containing more than 90 per cent of potassium bitartrate, 5 cents per pound; cream of tartar, Rochelle salts or potassium-sodium tartrate, 5 cents per pound; calcium tartrate, crude, 5 per cent ad valorem.

Mr. KING. Mr. President, may I inquire of the Senator whether the committee considered that that was any change from the House bill?

Mr. FRELINGHUYSEN. It is no change from the House bill, as I understand.

Mr. KING. The purpose was to clarify the meaning of the section?

Mr. FRELINGHUYSEN. Yes.

Mr. KING. I was not sure, but it seemed to me that must have been the purpose of the committee.

Mr. FRELINGHUYSEN. That was the purpose; yes.

Mr. KING. Mr. President, under the rules I can not attack that paragraph now. When we reach the free list I shall move to transfer to the free list argols, tartar, and wine lees, and the action taken by the Senate respecting that motion will determine the course to be pursued as to the other items found in paragraph 9; so I suppose we may assent to that amendment. I have no objection to it.

The VICE PRESIDENT. The question is on agreeing to the amendment of the committee.

The amendment was agreed to.

The next amendment was, on page 5, after line 14, to insert:

PAR. 10a. Gums: Amber, and amberoid unmanufactured, not specially provided for, $1 per pound; arabic or senegal, one-half cent per pound.

Mr. KING. Mr. President, I should like to ask the chairman of the committee whether the object in the introduction of this new paragraph was to impose a tariff upon items not heretofore subject to tariff for the purpose of obtaining revenue, or whether it is designed to help some companies engaged in the manufacture of pipes and pipestems to develop their industry, or to strike down the competition of the whale that swims in the ocean and persists in producing amber as a part of its anatomy?

Mr. McCUMBER. I do not know exactly how much revenue we will get out of it, but it is for revenue purposes only. They are the same rates that the other would take.

Mr. KING. Was it treated of in the House bill? Was consideration given to it in the House?

Mr. McCUMBER. It was on the free list.

Mr. KING. On the free list in the House?

Mr. McCUMBER. In the House bill, and it was transferred from the free list and placed as paragraph 10a, because it belonged about that section or paragraph.

Mr. KING. Does the Senator think—and I am asking for information—that the tariff of $1 a pound is the fairest and the best as a revenue producer?

Mr. McCUMBER. I do not think we get a great deal of revenue out of it anyway, but we get some, and I think it will fairly bear that rate.

Mr. KING. Mr. President, I confess to no great familiarity with amber and amberoid, and, so far as I am now advised, it might be denominated a luxury; and, believing as I do that we must have some revenue—indeed, a considerable revenue—from tariff rates, and that so far as possible the levy should be made upon luxuries, I do not think I shall make any objection.

Mr. McCUMBER. Before we pass on the committee amendment, I would like to correct it by striking out the comma after the word "amber" on line 15.

The VICE PRESIDENT. Without objection, that correction will be made.

The amendment was agreed to.

The next amendment of the committee was, on page 5, line 18, to strike out "1 cent" and insert in lieu thereof "1¼ cents," so as to read:

Barium carbonate, precipitated, 1¼ cents per pound.

Mr. KING. Mr. President, in the Underwood law barium carbonate, precipitated, carried a 15 per cent ad valorem duty. The Payne-Aldrich Act levied a duty of 25 per cent ad valorem upon this item, as I recall, it being found in the basket clause.

In the pending bill, as it came from the House, the rate is a specific duty of 1 cent per pound, so that the Senate committee rate is a considerable increase over the specific rate found in the House text, an increase of about 25 per cent. Barium and barium compounds are important articles in the commercial and industrial activities of the people. Barium chemicals, indicated in this paragraph, are made chiefly from barytes, which is made dutiable under paragraph 64. The domestic production, it is stated by the Tariff Commission, was chiefly in Missouri, which supplied the market for ground or crude barytes. During the war there was an enormous increase. It has been stated that the production was quadrupled. The demand for barytes in the lithopone and rubber industries was enormously increased.

Now, there is a vast amount of this product produced in Georgia. Germany and England are large producers of barytes and barium chemicals, and if we encounter any competition from abroad, it will be from those countries.

I am not quite able to determine the reason for this great increase over the rate found in the Underwood law. This item is used largely by many of the chemical companies. If you regard it as a primary product, to that extent you are adding to the costs of the intermediate products or the finished products. This would entail larger costs upon the part of the chemical companies in purchasing it, which would have to be passed on to the ultimate consumer.

Mr. WILLIS. Mr. President——

The VICE PRESIDENT. Does the Senator from Utah yield to the Senator from Ohio?

Mr. KING. I yield.

Mr. WILLIS. Will the Senator from Utah permit me to call his attention also to the fact that if this increase in bicarbonate is made from 1 cent per pound to 1¼ cents per pound it will necessitate a considerable increase, in all fairness, in the item barium dioxide and barium peroxide, as I am advised that it takes about 1½ pounds of barium carbonate to produce 1 pound of barium peroxide? If the tariff on the raw material is increased over the rate fixed by the House, as it is here, to 25 per cent, it will necessitate, in fairness, a very considerable increase in the tariff on barium peroxide, the second item below.

Mr. KING. Undoubtedly the Senator is right. If we increase the rate on the raw material—and I am using that term rather broadly—under the policies which have been adopted in the drafting of these bills, that increase is carried to the product which is compounded from the article, or of which it forms a constituent part, and compensatory duties are demanded by the manufacturer of the intermediate or the finished product. So what the Senator has stated is true—you will have to raise the tariff rate upon the other items.

Mr. McCUMBER. Mr. President——

The VICE PRESIDENT. Does the Senator from Utah yield to the Senator from North Dakota?

Mr. KING. I yield.

Mr. McCUMBER. I can give, in a few words, the justification for the raising of the duty by the committee.

Barium carbonate, as the Senator will remember, was almost wholly imported prior to 1914; there was very little produced in this country. The imports increased from 2,700 short tons in

1915 to 8,200 short tons in 1917, and in 1920 the production was 7,500 short tons. In 1912 the imports amounted to 950,000 pounds and increased in 1914 to 5,000,000 pounds. In the first nine months of 1921 the imports amounted to 1,973,000 pounds and the average value was 2 cents a pound.

It is claimed that the actual cost of production in the United States to-day is about 3 cents a pound; that it is being placed in our markets at 2 cents a pound, and that what would be given here, a difference of 1 cent, would be the actual difference in the cost of the landing and to equalize the cost of manufacture, and that would allow the fourth of a cent for other overhead charges and for marketing in the United States. It was thought that it about equalized the situation and would allow the continuance of the American industry.

Mr. KING. Mr. President, I do not think the explanation which has been offered by the chairman of the committee warrants this enormous increase. As I figure it hastily it is an increase of 75 per cent over the present law as based upon 1914 values. It seems to me that increase may not be justified in view of the fact that our country is so rich in barium ores. Perhaps no other country in the world has larger deposits of barium ores than the United States. If we can not manufacture the products of barium with the enormous advantages which we possess in competition with every country in the world, then, Mr. President, it seems to me there is nothing we could produce in competition with the world.

As I indicated when we were discussing another item just a few moments ago, the mere fact that the production in the United States anterior to the war was limited in my opinion is no justification for an enormous tariff rate. As I indicated, and I repeat, many articles from year to year are produced in the United States now which were not produced here in the past. As our wants increase, as our attention is directed to these new commodities and their use becomes more important capital is invested in their production. The American business man, the American manufacturer, and the man who has capital will make these investments so soon as the needs of the people require, and the mere fact that we have not produced in large abundance many of the commodities which enter into our lives is no sufficient reason for the imposition of high tariff rates, which would enable the manufacturers here to charge the people prices entirely disproportionate with world values or with the values to the American people themselves.

I think my friends on the other side emphasize too much the fact that some products have not been produced in the United States before. We are producing thousands of commodities which have not been produced in other lands, and if the same unwise, not to say foolish, policy were pursued by other countries which we persist in pursuing if we adopt all of the schedules in this bill, we would be shut out of the markets of other nations; our products would have to rot upon the wharves, in the warehouses, upon the shelves, in the granaries, and in the various depositories and receptacles in which they are placed by the producers in the United States.

Fortunately for us, other people are not frightened because they do not produce everything in their countries. We should not be frightened because we do not produce every article which enters into the consumption of the people or which is essential to the welfare of the people. The Senator from New Mexico [Mr. JONES] very properly indicated a moment ago in the discussion of the oxide question that we must have some products and some imports, and that it was absurd to import ores from China, where they were produced, for the purpose of refining them, when they could be refined there and the refined product shipped without taking up so much cargo space and, of course, so much cheaper to the consumer here.

If we adopt the theory that everything which is consumed by the people must be produced in the United States and must have a tariff applied to it, not for revenue purposes but for protection purposes, we will be adopting an economic view which will be destructive of the development of our industries, which in the end must react to the disadvantage of the American people.

I protest against this high rate, Mr. President, an increase of 75 per cent upon a product which we produce in the United States in such large quantities, in a raw state at least, the cost of reducing to the finished product being rather negligible, measured by the chemical costs and other costs, with respect to other items of a chemical nature.

Mr. WILLIS rose.

Mr. KING. Does the Senator from Ohio wish to interrupt me?

Mr. WILLIS. I do not wish to ask the Senator to yield. I desired to make some observations along the same line when he has concluded.

Mr. KING. I shall be through in a moment or two and yield the floor to the Senator.

Let me call attention to the simple process employed in the production of the article under consideration. I read now a line or two from the Tariff Survey:

> Precipitated barium carbonate is a white powder practically insoluble in water. It is used chiefly in the ceramic industry in making face brick to prevent a white efflorescence, for optical glass and some kinds of enameled ironware, in the preparation of other barium chemicals, in flat wall paints, and as a rat poison.

It is apparent that this mineral is the basis of a large number of commodities which are important in our daily life. It is important for use as a poison for rodents, important in the making of wall paints, important as an enamel for ironware, important in the manufacture of optical glasses.

I venture the assertion by way of parentheses that when we reach the glassware schedule and the subject of optical glasses is found there, if it is found in that schedule, there will be an irresistible demand made that a tariff wall be erected with respect to optical instruments, and insisted that we shall establish the optical-instrument industry here. If we want to establish that industry or other industries in which this commodity is used, it is important that we furnish the article as a sort of primary product and at as reasonable price as is possible. The cheaper it is the more easy it will be for the manufacturer of the other articles to which I have referred to manufacture in competition with domestic producers and then cheapen prices, and foreign producers, if there should be foreign competition.

The process, as I started to say a moment ago, is simple. Barium carbonate is produced by passing carbon dioxide over heated barium sulphide or by treating a solution of barium sulphide or barium chloride with soda ash.

Everybody knows that the products essential to the production of carbon dioxide are found in the United States in rich abundance. Sulphur ores, from which all forms of sulphides are obtained, are inexhaustible in all parts of the United States. We have in the West our sulphide ores, and sulphur becomes a waste product. In the reduction of the ore sulphur escapes into the atmosphere as a dioxide or as a sulphur trioxide to the extent of millions of tons per annum.

A few years ago a suit was brought in the State court of Tennessee, later in the Federal court, because the smelter, which was emitting large quantities of sulphur dioxide, it was alleged was causing the destruction of vegetation. The State court dismissed the bill. An action was brought in the Federal court and an injunction granted, because the large quantities of waste sulphur passing out in the atmosphere, coming in contact with hydrogen, H_2O in the atmosphere, formed sulphur trioxide, which when it came in contact with vegetation burned, to use a common expression, the vegetation and destroyed it. The trees for miles around, as the evidence showed, were destroyed.

We produce millions of tons of sulphur, which is liberated and goes out into the atmosphere and is a waste product, to the injury, too often, of vegetation, if not indirectly the injury of animal and human life.

In stating the uses I omitted to state what is shown in another part of the tariff survey, that crude barium, out of which the carbonate is made, results from roasting the barytes with coal, and when that is done the product is known as coal ash.

Now, Mr. President, if I were a high protectionist and seeking to surround the country by a wall which was almost impenetrable, I do not think I could justify the rates upon many of these items, the result of which inevitably must be to enhance the prices of the raw materials which are imperative in the construction or manufacture of the finished product. If we want to develop into a great producing and manufacturing Nation and to dominate the world, then we must encourage, by giving cheap primary products, the development of the manufacturing plants. If we impose these great tariff rates, thus increasing the prices of the raw materials, of these crude materials, they will be reflected upon the finished product and act as a deterrent to the development of home industries.

Mr. President, I move—and when I have made that motion I shall be glad to hear from my friend the Senator from Ohio—to amend the committee amendment found on page 5, in line 18, by striking out the numeral "1," so that it will read:

> Barium carbonate, precipitated, one-fourth of 1 cent per pound.

Mr. WILLIS. Mr. President, I desire to discuss, not directly but only indirectly, the amendment offered by the Senator from Utah. While I am not quite able to agree with the reasoning of my friend, I am able to agree in part with his conclusion that there is, it seems to me, an inconsistency, an incongruity,

between the rate that is proposed on barium carbonate and the rate provided on barium dioxide.

As I pointed out a moment ago, it takes about 1.3 pounds of carbonate to make a pound of the peroxide. If we are to increase the tariff on the raw material, by every theory of tariff making that I have ever heard anything about, there ought to be a compensatory duty on the more finished product. So if this shall be adopted as reported by the committee, when it is in order to do so I shall offer an amendment to the item relative to barium dioxide.

Mr. SMOOT. Mr. President, before the Senator does that——

Mr. WILLIS. That would not be in order now, and I do not propose to do it now.

Mr. SMOOT. I would like to call his attention to the fact that it takes 1½ pounds of barium carbonate to make 1 pound of barium dioxide.

Mr. WILLIS. One and three-tenths pounds, I am informed; but that is not material.

Mr. SMOOT. Even with the waste. I give absolutely everything that could be conceived of in making it into dioxide. With 1½ pounds, it would be one and one-half times one and one-fourth, which would be a little less than 2 cents. So the Senator sees that we are taking care of the dioxide manufacturers by a $40 per ton protection. I will say to the Senator that that is ample and there is no doubt of it at all. The House differential was all out of proportion. It is true that if the House differential had been correct, the Senator's statement would be correct, and that we would have to amend the dioxide item.

Mr. WILLIS. The Senator is proceeding in his argument on the theory that the House arrangement of the rate was incorrect?

Mr. SMOOT. The House differential was altogether too large.

Mr. WILLIS. I can not discuss that, because I am not advised as to it. The Senator knows that I have the very greatest respect for his learning and opinions.

Mr. President, while I am on my feet I desire to bring to the attention of the Senate some rather significant facts which I have been able to secure. In my State there is a little concern that manufactures barium peroxide. There is no use being mealy-mouthed about it. That is how I came to be interested in it.

Mr. McCORMICK. Peroxide?

Mr. WILLIS. Yes; I will say to the Senator; peroxide or dioxide; they are the same. That concern operated during the war, but has been closed for some time. I have taken the pains to get some figures which I think are accurate.

Using all American material, barium carbonate can be manufactured in the United States for 14.5 cents per pound. Using the German carbonate, it can be laid down here at 4.84 cents per pound. I ask permission to have inserted in the RECORD at this point a detailed table showing these facts.

The VICE PRESIDENT. Without objection, it is so ordered.

The table is as follows:

The cost of barium peroxide manufactured in the United States from all-American material, barium carbonate at $90 per ton f. o. b. J. H. R. Products Co. plant at Willoughby, Ohio:

Using 1½ pounds of carbonate to produce 1 pound of barium peroxide	$0.06
Other materials used in process	.05
Actual labor used in process	.03½
Absolute cost without overhead per pound	.14½
German carbonate at $30 per ton, Coblenz, using:	
1½ pounds of carbonate to produce 1 pound barium peroxide	.02
Other materials used in process	.0167
Labor actually used in process	.0117
Cost without overhead in Germany	.0484

Mr. WILLIS. Bear in mind, what I called attention to was not counting overhead. The lowest at which this plant, about which I know something, located at Willoughby, Ohio, can produce it is 14.5 cents per pound. Incidentally they are giving it at even lower than the figures given by the Tariff Commission. The cost of producing barium dioxide in 1919, as shown by the investigation of the Tariff Commission, was 19.7 cents per pound. The figures I have show that this company can produce it more cheaply than that—or 14.5 cents per pound. Taking that figure, I find that there is a German company offering the product here in our market now at 12½ cents a pound, which is 2 cents below the cost of production here. There is a Dutch company offering its product at 10½ cents a pound, a French company at 10.6 cents per pound, a Danish company at 7.9 cents per pound, and another French company at 12.9 cents per pound. In other words, these foreign companies are able to offer their products here below our cost of production. Prior to the war Germany supplied all the barium dioxide, but when imports from that country ceased we started to develop in our own country a barium chemical industry. It developed rather rapidly, but it is going back just as rapidly, as is shown by all these facts.

Mr. KING. Mr. President——

Mr. WILLIS. I yield to the Senator from Utah.

Mr. KING. Undoubtedly the Senator from Ohio is aware of the fact that the foreign wholesale value of barium dioxide prior to the World War was approximately 5.8 cents per pound, while in the United States it was somewhat higher.

Mr. WILLIS. I was not aware of that, but I accept the Senator's statement, if he knows that to be a fact.

Mr. KING. Now the price is substantially 100 per cent greater than was the foreign value prior to the war.

Mr. WILLIS. Does the Senator refer to the price at which we can produce it here or the prices quoted in the foreign market?

Mr. KING. The price in the foreign market prior to the war was substantially 5.8 cents, or 5½ cents per pound. Now the price in the foreign market is substantially 10 cents per pound. It varies.

Mr. WILLIS. I think that would be about correct.

Mr. KING. And the American producer wants a tariff that will operate to the extent of about 100 per cent.

Mr. WILLIS. No; I think the Senator from Utah has placed that too high.

Mr. KING. It will not be less than between 75 and 100 per cent, I think. Of course, we can produce tea in the United States; we can produce in hothouses almost anything that is produced in tropical climes. If we will use enough coal and enough glass and enough sunlight and enough of other commodities, we can produce almost anything in the world here if the question of cost is not to be considered.

I merely call the attention of the Senator from Ohio to the foreign prices so that he may know he is now asking for a tariff of from 75 to 100 per cent. Of course, I know that does not frighten a Republican at all.

Mr. WILLIS. No. I think the Senator is slightly mistaken, but I will not canvass that question just now. It is not a question of what we might produce. The Senator says we might produce tea and various other articles. Of course, that is an interesting subject upon which to speculate; but it is a fact that during the war when we had no trade with Germany we did produce this needed material, a very necessary war material, and we induced our people to go into that business.

The plant in my State was built up and men invested their money in that plant, which employed a large number of workingmen who are now out of employment. We can produce this material, barium peroxide, here, as I have shown, at 14 cents a pound, while the foreign producer is laying it down in our market at 10, 11, and 12 cents a pound. I think that it is good policy to place upon that product a tariff sufficient to enable us to continue the industry in this country. So at the proper time I shall offer an amendment to the barium peroxide item.

Mr. SHEPPARD. Mr. President——

Mr. WILLIS. There is just one further fact to which I desire to call attention, and then I will yield to the Senator from Texas. We imported in 1920 of barium peroxide or dioxide 200,000 pounds; in 1921 we imported 1,005,000 pounds, or five times as much. That means the opening up of the plants in Germany and the closing of the plants in America. I believe, Mr. President, it is worth while to impose a sufficient duty upon this material to equalize the difference between 14 cents, the cost of production here, and the rates I have quoted at which this material may be laid down here by the foreign manufacturer. I now yield to the Senator from Texas.

Mr. SHEPPARD. Mr. President, I should like to inquire for what purposes is this material used in time of peace?

Mr. WILLIS. That is a very proper question. The Senator understands, of course, that this article is very useful in time of war. I will read him what is given here in the book, which he not doubt has, entitled "The Summary of Tariff Information." It is used chiefly in the production of hydrogen peroxide, which, as the Senator knows, is largely used in various manufacturing processes, and also as a bleaching agent and as source of oxygen. It was used during the war in the manufacture of tracer bullets and in various other ways. So it is a necessary industry not only in time of war but in time of peace, and we have demonstrated that we can produce it here if we have this little margin.

Mr. McCUMBER. Mr. President——

Mr. WILLIS. I yield to the Senator from North Dakota.

Mr. McCUMBER. Do I understand the Senator is discussing barium dioxide?

Mr. WILLIS. I explained when I began that I am discussing barium dioxide, and I served notice that when we get to that item I will offer an amendment. I understand that the Senate is now considering barium carbonate. I am not taking issue with the Senator's committee upon that.

Mr. McCUMBER. I understood the Senator to say the foreign cost was about 10 cents a pound.

Mr. WILLIS. It is perhaps a little beyond that.

Mr. McCUMBER. And the cost here is 14 cents a pound.

Mr. WILLIS. Yes.

Mr. McCUMBER. There is a duty in this bill of 4 cents a pound given, which exactly covers the difference, does it not?

Mr. WILLIS. We will fight that out when we come to that item. I thank the Senator, however, for the suggestion.

Mr. KING. Mr. President, I wish to call attention very briefly to the fact that the production of barium carbonate increased greatly during the war, and that it is being produced by, as I hastily glance at the Senate hearings, the Eagle-Picher Lead Co., of New York; Krebs Color & Pigment Co., of Cleveland, Ohio—I think, perhaps, that is the company to which the Senator from Ohio has referred——

Mr. WILLIS. The company to which the Senator from Ohio referred is the J. H. R. Products Co., of Willoughby, Ohio.

Mr. KING. And by the New Jersey Zinc Co. and the Grasselli Chemical Co.

Mr. SMOOT. Mr. President, the Senator is referring to the wrong names.

Mr. KING. I am speaking of barium compounds generally.

Mr. SMOOT. The companies named by the Senator manufacture lithopone.

Mr. KING. I know that the Du Ponts produce lithopone.

Mr. SMOOT. But the names the Senator has just read are concerns that produce lithopone in the United States.

Mr. KING. And lithopone is a product of barium.

Mr. SMOOT. Yes; that is true; but the Senator will find that the Alton Chemical Co., the Chicago Copper & Chemical Co., and the Consolidated Chemical Products Co. are the principal producers of the barium carbonate.

Mr. KING. The Du Pont and other great companies are largely interested in barium products.

Mr. SMOOT. That is true; but the companies whose names the Senator read are manufacturers of lithopone.

Mr. KING. I am willing that a vote be taken. I ask for the yeas and nays.

The VICE PRESIDENT. The question is on the amendment offered by the Senator from Utah to the amendment reported by the committee on which the yeas and nays are demanded.

The yeas and nays were ordered, and the reading clerk proceeded to call the roll.

Mr. JONES of New Mexico (when his name was called). I transfer my pair with the Senator from Maine [Mr. FERNALD] to the Senator from Missouri [Mr. REED] and vote "yea."

Mr. STERLING (when his name was called). I transfer my pair with the Senator from South Carolina [Mr. SMITH] to the Senator from Iowa [Mr. CUMMINS] and vote "nay."

Mr. WATSON of Indiana (when his name was called). Making the same announcement with reference to my pair and its transfer as on the previous ballot, I vote "nay."

The roll call was concluded.

Mr. SUTHERLAND. Making the same announcement as on the previous vote with reference to my pair and its transfer, I vote "nay."

Mr. McKELLAR. I have a general pair with the junior Senator from Indiana [Mr. NEW], which I transfer to the senior Senator from Tennessee [Mr. SHIELDS] and vote "yea."

Mr. SIMMONS. I wish to announce that if the Senator from Missouri [Mr. REED] were present he would vote "yea."

Mr. FRELINGHUYSEN. I transfer my general pair with the Senator from Montana [Mr. WALSH] to the junior Senator from Oregon [Mr. STANFIELD] and vote "nay."

Mr. ELKINS. I transfer my pair with the Senator from Mississippi [Mr. HARRISON] to the junior Senator from Pennsylvania [Mr. PEPPER] and vote "nay."

Mr. CURTIS. I wish to announce the following pairs:

The Senator from New Jersey [Mr. EDGE] with the Senator from Oklahoma [Mr. OWEN]; and

The Senator from Vermont [Mr. DILLINGHAM] with the Senator from Virginia [Mr. GLASS].

The result was announced—yeas 15, nays 41, as follows:

YEAS—15.

Caraway	Harris	McKellar	Simmons
Dial	Heflin	Myers	Swanson
Fletcher	Jones, N. Mex.	Overman	Underwood
Gerry	King	Sheppard	

NAYS—41.

Ball	Hale	McCumber	Sterling
Borah	Harreld	McKinley	Sutherland
Brandegee	Johnson	McLean	Townsend
Broussard	Jones, Wash.	McNary	Wadsworth
Bursum	Kellogg	Nelson	Warren
Calder	Kendrick	Newberry	Watson, Ind.
Curtis	Keyes	Oddie	Weller
Elkins	Ladd	Phipps	Willis
France	La Follette	Poindexter	
Frelinghuysen	Lodge	Shortridge	
Gooding	McCormick	Smoot	

NOT VOTING—40.

Ashurst	Ernst	Norris	Shields
Cameron	Fernald	Owen	Smith
Capper	Glass	Page	Spencer
Colt	Harrison	Pepper	Stanfield
Crow	Hitchcock	Pittman	Stanley
Culberson	Lenroot	Pomerene	Trammell
Cummins	Moses	Ransdell	Walsh, Mass.
Dillingham	New	Rawson	Walsh, Mont.
du Pont	Nicholson	Reed	Watson, Ga.
Edge	Norbeck	Robinson	Williams

So Mr. KING's amendment to the amendment of the committee was rejected.

Mr. KING. Mr. President, I suppose now that the question will recur on the committee amendment; and upon the adoption of that I ask for the yeas and nays.

The VICE PRESIDENT. The question is on the amendment of the committee. On that question the yeas and nays are demanded.

The yeas and nays were ordered; and the reading clerk proceeded to call the roll.

Mr. ELKINS (when his name was called). Making the same transfer as before, I vote "yea."

Mr. FRELINGHUYSEN (when his name was called). Making the same announcement as before, I vote "yea."

Mr. McKELLAR (when his name was called). Making the same announcement as to my pair and its transfer, I vote "nay."

Mr. STERLING (when his name was called). Making the same transfer as on the last roll call, I vote "yea."

Mr. SUTHERLAND (when his name was called). Making the same announcement as before with reference to my pair and its transfer, I vote "yea."

Mr. WATSON of Indiana (when his name was called). Making the same announcement as before, I vote "yea."

The roll call was concluded.

Mr. JONES of New Mexico. Making the same announcement as on the previous vote regarding my pair, I vote "nay."

Mr. CURTIS. I have been requested to announce the following pairs:

The Senator from Arizona [Mr. CAMERON] with the Senator from Georgia [Mr. WATSON];

The Senator from Rhode Island [Mr. COLT] with the Senator from Florida [Mr. TRAMMELL];

The Senator from Vermont [Mr. DILLINGHAM] with the Senator from Virginia [Mr. GLASS]; and

The Senator from New Jersey [Mr. EDGE] with the Senator from Oklahoma [Mr. OWEN].

The result was announced—yeas 38, nays 15, as follows:

YEAS—38.

Ball	Hale	McCumber	Sterling
Brandegee	Harreld	McLean	Sutherland
Broussard	Johnson	McNary	Townsend
Bursum	Kellogg	Nelson	Wadsworth
Calder	Kendrick	Newberry	Warren
Curtis	Keyes	Oddie	Watson, Ind.
Elkins	Ladd	Phipps	Weller
France	Lenroot	Poindexter	Willis
Frelinghuysen	Lodge	Shortridge	
Gooding	McCormick	Smoot	

NAYS—15.

Ashurst	Gerry	La Follette	Simmons
Borah	Harris	McKellar	Swanson
Dial	Jones, N. Mex.	Myers	Underwood
Fletcher	King	Sheppard	

NOT VOTING—43.

Cameron	Fernald	Norris	Shields
Capper	Glass	Overman	Smith
Caraway	Harrison	Owen	Spencer
Colt	Heflin	Page	Stanfield
Crow	Hitchcock	Pepper	Stanley
Culberson	Jones, Wash.	Pittman	Trammell
Cummins	McKinley	Pomerene	Walsh, Mass.
Dillingham	Moses	Ransdell	Walsh, Mont.
du Pont	New	Rawson	Watson, Ga.
Edge	Nicholson	Reed	Williams
Ernst	Norbeck	Robinson	

So the amendment of the committee was agreed to.

The VICE PRESIDENT. The next amendment of the committee will be stated.

The ASSISTANT SECRETARY. On line 19, page 5, after the words "barium chloride" and the comma, the committee pro-

poses to strike out "1¼" and insert "1⅛," so that it will read:

Barium chloride, 1⅛ cents per pound.

Mr. KING. Mr. President, I move to amend the committee amendment by striking out "1⅛" and inserting in lieu thereof "one-fourth" so that it will read:

Barium chloride, one-fourth of 1 cent per pound.

The PRESIDING OFFICER (Mr. FRANCE in the chair). The amendment to the amendment will be stated.

The ASSISTANT SECRETARY. On page 5, line 19, it is proposed to strike out "1⅛ cents" and insert "one-fourth of 1 cent."

Mr. KING. Mr. President, briefly in support of that motion, the pertinent facts relative to this item are these:

The House bill gives a rate of 1¼ cents a pound; the Senate bill a rate of 1⅛ cents a pound. That is to say, the Senate raises the specific rate found in the House bill one-half cent a pound. The Payne-Aldrich bill in the basket clause, paragraph 3, fixes a rate of 25 per cent ad valorem, and the Underwood-Simmons bill gives a specific rate of one-fourth of a cent per pound. The pre-war price of this product was 1.2 cents, according to the survey which was made by the Department of Commerce, as I recall it, which we find in series 82. The price in 1914, as found by that survey, was 1.2 cents. Of course, I am speaking now about the price based upon the imports, and I think my colleague will agree with me now that I state it accurately. The foreign import price was 1.2 cents, and the domestic price was 1.6 cents per pound.

I hope Senators will keep that in mind—that the pre-war domestic price was 1.6 cents per pound. The price now is 5¼ cents per pound; so Senators will see that there has been an increase of over 300 per cent, as I hastily figure it in my mind. That product is manufactured quite extensively by the Grasselli Chemical Co., one of the large chemical manufacturing companies of the United States, and it is produced by other companies, too.

Mr. President, it seems to me that the rate which has been suggested by the Senate committee is too high. It is unwarranted. It is not justified upon any theory of protection, but it must be defended upon the thought that a monopoly is to be granted to the beneficiary of this provision. I should make no controversy at all if a reasonable rate were provided in this bill; but when you provide a rate that will permit between 300 and 400 per cent increase over the pre-war domestic prices, to say nothing of the pre-war foreign price, then I most respectfully raise my voice in protest against the procedure.

Mr. President, I said a moment ago with respect to barium that it is a product in which the United States is supreme. By that I mean that barium ore is a product which is found in various parts of the United States. It is not a synthetic product. The barium ores which are the basis of the products which are found in this schedule exist here in great abundance. The ore is mined cheaply; it is produced cheaply; it is reduced cheaply; the processes which are needed to transmute or transform the raw material into the various forms of the finished product are simple, not complex, not complicated, not difficult, or costly.

I appeal to my friends on the other side in no critical spirit, knowing that most of them are wedded to protectionism, and protectionism of rather an extreme sort, not to carry their views too far, and not to announce to the manufacturing interests and the trusts and the combines in the United States who are the beneficiaries of tariff rates that all they need to do is to knock at the door of Congress and they will be admitted gladly and willingly.

I am afraid, Mr. President, that too many of the manufacturing institutions, and those who have sought these high rates, have felt that they were not only welcomed but that they were controlling factors in the formulation of some of these tariff schedules.

Let me briefly call attention to the simple process by which this item, of which we are now speaking, may be prepared. First, let me state that it is employed not only as a mordant in manufacturing, in the textile processes, but it is employed in the purification of salt, as a water softener, as an analytical reagent in sulphur determinations, and to some extent in the ceramic industry. There is scarcely a household which does not use some form of this product for the softening of lime water, of hard water, which we know is so common in many parts of the United States.

In the mountain regions, from which I come, lime is one of the principal constituents of the soil, and the water which flows down from the mountain sides through the valleys and gorges is impregnated with the lime, and holds large quantities in solution. We are compelled to use this or some similar product for the softening of the water. It is used not only in the bathroom, but it is used by the housewives, and it is used by the laundries for the same purposes.

It is produced in a very simple manner, by treating the barium carbonate with hydrochloric acid, or by heating barium sulphide with calcium sulphide. We all know the prodigality with which nature has blessed us with sulphide ores. Everywhere we have sulphur, sulphur with our copper ore, sulphur which goes to waste by the thousands and tens of thousands of tons annually in our metallurgical and reduction-of-ore processes. There is not a smelter in the United States which smelts sulphide ores—I am not speaking now particularly of carbonate ores—which does not pour out into the atmosphere daily hundreds of tons of sulphur as a waste product. So we have sulphur here in abundance, and cheap. It is so cheap that it is thrown away. The same is true as to sulphuric acid, which is the product, or can be made the product, of our smelters. So that this product can be made in the United States cheaply, because all of its constituent parts are here in inexhaustible quantities, and can be mined and reduced here more cheaply than perhaps in any other place in the world.

I conclude that there are imports and that the imports for nine months of last year amounted to 2,798,700 pounds. If the argument is to be made, and is to be controlling, that wherever there are any imports there must be an exclusive tariff, I can say nothing. If that is the policy to be pursued, then, of course, that is equivalent to the announcement that we shall turn over the American public to be plundered by the manufacturing and industrial concerns of the United States.

Our Republican friends in the past have found some justification, from their standpoint, for the rates which have been included in many of their bills. They have urged the fact that the industries were infant industries. They have urged the difference of cost between the United States and other countries. They have urged the fact that they wanted to give a reasonable profit to the manufacturer here, and in determining the reasonable profit that there should be taken into account the cost of production here, including the cost of labor, and the cost of production abroad, including the price of labor abroad, and many fanciful figures have been submitted, and many illogical and sophistical arguments and many inaccurate statements have been made and suggested to buttress the bills which have been offered by our Republican friends in the past.

But now those arguments, which have been so weighty with so many Republicans and with the American people in the past, are abandoned. Now the theory seems to be that if anything is imported from abroad, even if the amount is infinitesimal, we must impose a tariff duty. So we find in this bill many, many items, the importations of which are less than 1 per cent, where high tariff rates are imposed.

It is found in the report made by the Department of Commerce for 1914 that there were more than 4,000 items the imports of which did not exceed in any case more than 1 per cent, and we find that the tariff rates upon many of those articles are two, three, four, five, and six hundred per cent. Not only were the imports less than 1 per cent, but they were less than $100. Notwithstanding that fact, however—and I wish the American people could understand it—our Republican friends are putting many of those items upon the dutiable list and fixing specific duties, which raise the rates to one, two, three, or four hundred per cent and more, with imports of less than $100.

How do Senators justify that? They can not do it. It can not be justified in reason, in logic, in common sense, or upon any theory of political economy which obtains among civilized people. You have the power; the trusts want it; the big manufacturing concerns demand it; and the Republican Party is going to do just as they are told by these concerns. Think of granting these enormous tariff rates where the importations are less than 1 per cent, less than $100 per item.

Mr. President, the Republicans can not defend their conduct here, and do not attempt to; and they can not defend their conduct before the American people. We will challenge them upon all appropriate occasions and call attention to these infamous schedules and to these rates, which may not be defended here or in any forum.

I ask for the yeas and nays.

Mr. McCUMBER. Mr. President, all of these barium products are war babies. Everything in this paragraph was imported prior to the war. During the war these infant industries came into existence. The only question now is whether we shall allow them to be strangled or whether we shall give them this support and allow them to live.

It is a simple question of policy. If we wish to go back to the old conditions, importing all these products and allow our own industries to be destroyed, of course we can do so. We who believe in the protective policy can not agree that this is an infamous policy. We have already by a vote put barium carbonate on the protective list at 1¼ cents a pound. All of these articles are made from barytes ore. The barytes ore is produced in foreign countries very much more cheaply and of a better grade than we can produce it here.

The Senator from Utah declared several times that we could produce these commodities more cheaply than they could be produced in any other country. We created the Tariff Commission for the very purpose of giving us the necessary information, from an unbiased standpoint, upon which we could base our judgment in arriving at a conclusion, first, as to whether we ought to place a duty upon a product, and secondly, if we placed a duty, what that duty should be.

Let us see whether or not we can produce either the ore itself or any product from it in the United States as cheaply as the foreigner can produce it. I read from page 28 of the Tariff Information Surveys of 1921, in which the Tariff Commission, speaking of byrites ore, say:

> The German deposits are of vein formation and require only drilling and blasting to make the ore available for shipment. The known domestic deposits, on the other hand, are of such a character that the ore-bearing material, after mining, requires washing and mechanical separation from foreign rock material—a process which involves additional equipment—before the ore is ready to be marketed as crude barytes. Prior to the war the freight rate from German mines to Atlantic ports was about $3 per ton as compared with the freight rate from Georgia and Tennessee to the eastern markets of about $4.45 a ton. In view of the difference in mining methods and the difference in freight rates, it would appear that competition would be difficult under normal conditions.

That is the finding of the Tariff Commission. As I have stated, we have given 1¼ cents per pound upon the carbonate. Barium chloride is made from the carbonate, and, taking the amount that is required, it is found that it will be necessary to give 1¾ cents per pound upon the barium chloride. I think it proper to suggest the figures as to the importations and a few facts relating to barium chloride.

This barium chloride is made, as I have stated, from barium carbonate. The cost of production in the United States in 1919 was 5 cents per pound. The average import price for 1920 and for the first nine months of 1921 was 5 cents per pound. The present quotations are 4 cents per pound.

The imports prior to 1914 were practically constant at about 2,800,000 pounds per year, increasing in 1914 to 6,000,000 pounds.

The imports during the first nine months of 1921 amounted to 2,800,000 pounds. Prior to the war barium chloride was practically all imported from Germany, but after a domestic industry was established the production increased from 2,100 tons in 1915 to 4,900 tons in 1917. But 4,500 tons were made in 1918 and 1919. In 1920 the output declined to 3,000 tons.

Now, about 50 per cent of the domestic consumption is produced in our own country and about 50 per cent is imported. If we are to keep the carbonate upon the present basis, of course we must give the differential or else the same product will come in, not in the carbonate but in the chloride form. I repeat, it is simply a question whether or not the policy of the country is to continue the manufacture of that product in the United States.

The PRESIDING OFFICER. The question is upon the amendment offered by the Senator from Utah [Mr. KING] to the amendment of the committee.

Mr. KING. Mr. President, I desire to modify my amendment by striking out the rate fixed and inserting in lieu thereof "three-fourths of 1 cent," so that it will read: "Three-fourths of 1 cent per pound."

The PRESIDING OFFICER. The proposed amendment to the amendment will be stated, as modified.

The ASSISTANT SECRETARY. On page 5, line 19, strike out "1¾ cents" and insert in lieu thereof "three-fourths of 1 cent," so that it will read:

> Barium chloride, three-fourths of 1 cent per pound.

Mr. KING. Mr. President, may I add just a word? The principal manufacturers of these barium chemicals in the United States are the E. I. du Pont de Nemours & Co., Durex Chemical Corporation, Consolidated Chemical Products Co., J. H. R. Products Co., Alton Chemical Corporation, and the Oakland Chemical Corporation.

I ask for the yeas and nays on my amendment to the amendment.

The yeas and nays were ordered, and the Assistant Secretary proceeded to call the roll.

Mr. McKELLAR (when his name was called). Making the same announcement as to my pair and its transfer as heretofore, I vote "yea."

Mr. SUTHERLAND (when his name was called). Making the same announcement as before with reference to my pair and its transfer, I vote "nay."

Mr. WARREN (when his name was called). Has the junior Senator from North Carolina [Mr. OVERMAN] voted?

The PRESIDING OFFICER. That Senator has not voted.

Mr. WARREN. I have a general pair with that Senator, which I transfer to the Senator from Vermont [Mr. PAGE], and vote "nay."

Mr. WATSON of Indiana (when his name was called). Making the same announcement as before with reference to my pair and its transfer, I vote "nay."

The roll call was concluded.

Mr. LODGE (after having voted in the negative). I have a general pair with the senior Senator from Alabama [Mr. UNDERWOOD]. I do not see him on the floor. I transfer that pair to the junior Senator from Delaware [Mr. DU PONT] and let my vote stand.

Mr. KELLOGG (after having voted in the negative). I have a general pair with the senior Senator from North Carolina [Mr. SIMMONS]. I transfer that pair to the senior Senator from Iowa [Mr. CUMMINS] and let my vote stand.

Mr. FRELINGHUYSEN. Making the same announcement as before as to my pair and its transfer, I vote "nay."

Mr. CURTIS. I wish to announce the following pairs:

The Senator from Vermont [Mr. DILLINGHAM] with the Senator from Virginia [Mr. GLASS];

The Senator from Arizona [Mr. CAMERON] with the Senator from Georgia [Mr. WATSON];

The Senator from Rhode Island [Mr. COLT] with the Senator from Florida [Mr. TRAMMELL];

The Senator from New Jersey [Mr. EDGE] with the Senator from Oklahoma [Mr. OWEN]; and

The Senator from South Dakota [Mr. STERLING] with the Senator from South Carolina [Mr. SMITH].

The result was announced—yeas 13, nays 36, as follows:

YEAS—13.

Ashurst	Harris	La Follette	Walsh, Mass.
Caraway	Harrison	McKellar	
Dial	Jones, N. Mex.	Myers	
Fletcher	King	Sheppard	

NAYS—36.

Ball	Frelinghuysen	McCormick	Rawson
Brandegee	Gooding	McCumber	Shortridge
Broussard	Harreld	McKinley	Sutherland
Bursum	Johnson	McLean	Townsend
Calder	Kellogg	McNary	Wadsworth
Capper	Kendrick	Nelson	Warren
Curtis	Keyes	Oddie	Watson, Ind.
Elkins	Lenroot	Phipps	Weller
France	Lodge	Poindexter	Willis

NOT VOTING—47.

Borah	Glass	Overman	Smoot
Cameron	Hale	Owen	Spencer
Colt	Heflin	Page	Stanfield
Crow	Hitchcock	Pepper	Stanley
Culberson	Jones, Wash.	Pittman	Sterling
Cummins	Ladd	Pomerene	Swanson
Dillingham	Moses	Ransdell	Trammell
du Pont	New	Reed	Underwood
Edge	Newberry	Robinson	Walsh, Mont.
Ernst	Nicholson	Shields	Watson, Ga.
Fernald	Norbeck	Simmons	Williams
Gerry	Norris	Smith	

So Mr. KING's amendment to the committee amendment was rejected.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment.

The amendment was agreed to.

The PRESIDING OFFICER. The next amendment of the Committee on Finance will be stated.

The ASSISTANT SECRETARY. On page 5, line 20, after the words "per pound" and the semicolon, near the center of the line, insert "barium hydroxide, 1¾ cents per pound."

Mr. KING. Mr. President——

Mr. McCUMBER rose.

Mr. KING. Does the Senator desire to take the floor?

Mr. McCUMBER. I did not know but that the Senator desired some explanation of the next item.

Mr. KING. I was about to offer an amendment to strike out——

Mr. McCUMBER. Before the Senator offers his amendment, may I make a very brief statement?

Mr. KING. I shall be glad to hear the Senator.

Mr. McCUMBER. Barium hydroxide, we are informed, is a product of very little use, so little that it is not quoted at all

on the market. It does not come in at all under any quotation, and if it does come in it comes under the basket clause.

Mr. KING. It was under the basket clause in the Underwood law and the Payne-Aldrich law?

Mr. McCUMBER. Yes; it would come in under the basket clause. It has very little use. We are informed, however, that it costs to produce just about what the barium chloride costs and, therefore, that it should bear the same rate of duty. We are informed by the chemists of the Tariff Commission that this is correct. I think the whole thing is scarcely a matter of calling for a yea-and-nay vote. It is very unimportant.

Mr. KING. Mr. President, I shall occupy but a moment discussing this item. The Senator is correct in stating that barium hydroxide has not specifically been named in the tariff laws heretofore enacted, but it has been classified in various groups and assigned to what have been called the basket clauses.

In the Underwood law it bore a rate of 15 per cent ad valorem. In the Payne-Aldrich law the rate was 25 per cent. The House in the pending bill did not name it, and it would fall, therefore, in one of the basket clauses of the House bill, and that clause to which it would properly be assigned would bear the ad valorem rate of 25 per cent. The Senate Finance Committee have taken it from the basket clause, as they have done in so many other instances, and given it a specific rate which, of course, as I have heretofore stated with respect to so many items, amounts to an enormous increase over the basket ad valorem rate. So far as I can discover, there are no imports of this product, nor are there any exports. While the item is of some importance, its consumption is limited. The tariff survey shows that it has but little commercial value, but during the period of high prices for caustic potash this product, barium hydroxide, was used to convert sulphate of potash into caustic potash. It is used to some extent in Europe in the production of beet sugar. I presume it is used in the beet-sugar factories in the process of extracting the saccharine from the beet pulp.

Mr. President, the pre-war unit value—that is, the foreign value—was 1½ cents a pound; the present price is 7 cents a pound; so that the price, as will be seen, has been enormously raised, from 1½ cents a pound to 7 cents a pound, 300 or 400, yes, perhaps 500 per cent over pre-war prices. The question is, Shall we perpetuate these prices, for that will be the effect of the adoption of the committee amendment? Perhaps the article ought to be on the free list, or, at most, the rate ought not to exceed one-fourth of 1 cent per pound; but on page 5, line 20, in the committee amendment, I move to strike out "1¾ cents" and to insert "three-fourths of 1 cent" so as to read:

Barium hydroxide, three-fourths of 1 cent per pound.

I ask for the yeas and nays on my amendment to the committee amendment.

The PRESIDING OFFICER. The question is on the amendment offered by the Senator from Utah [Mr. KING] to the amendment reported by the Committee on Finance, upon which he asks for the yeas and nays.

The yeas and nays were ordered, and the principal legislative clerk proceeded to call the roll.

Mr. FRELINGHUYSEN (when his name was called). Making the same announcement as to my pair and its transfer as on previous votes, I vote "nay."

Mr. JONES of New Mexico. Making the same announcement as heretofore regarding my pair and its transfer, I vote "yea."

Mr. KELLOGG (when his name was called). Making the same announcement as before with reference to the transfer of my pair, I vote "nay."

Mr. McKELLAR (when his name was called). Making the same announcement as to my pair and its transfer as heretofore, I vote "yea."

Mr. SUTHERLAND (when his name was called). I transfer my general pair with the senior Senator from Arkansas [Mr. ROBINSON] to the junior Senator from Pennsylvania [Mr. PEPPER] and vote "nay."

Mr. WATSON of Indiana (when his name was called). Making the same announcement as heretofore with reference to my pair and its transfer, I vote "nay."

The roll call was concluded.

Mr. LODGE (after having voted in the negative). I desire to make the same announcement regarding the transfer of my pair with the Senator from Alabama [Mr. UNDERWOOD] to the Senator from Delaware [Mr. DU PONT] that I have made heretofore, and with that announcement I allow my vote to stand.

Mr. McKINLEY (after having voted in the negative). I have a general pair with the junior Senator from Arkansas [Mr. CARAWAY], who seems to be absent. I transfer that pair to the Senator from Colorado [Mr. NICHOLSON] and allow my vote to stand.

Mr. CURTIS. I desire to announce the following pairs:

The Senator from Arizona [Mr. CAMERON] with the Senator from Georgia [Mr. WATSON];

The Senator from Rhode Island [Mr. COLT] with the Senator from Florida [Mr. TRAMMELL];

The Senator from Vermont [Mr. DILLINGHAM] with the Senator from Virginia [Mr. GLASS];

The Senator from New Jersey [Mr. EDGE] with the Senator from Oklahoma [Mr. OWEN];

The junior Senator from Kentucky [Mr. ERNST] with the senior Senator from Kentucky [Mr. STANLEY]; and

The Senator from South Dakota [Mr. STERLING] with the Senator from South Carolina [Mr. SMITH].

The result was announced—yeas 12, nays 40, as follows:

YEAS—12.

Ashurst	Harris	King	Myers
Dial	Harrison	La Follette	Sheppard
Fletcher	Jones, N. Mex.	McKellar	Walsh, Mass.

NAYS—40.

Ball	Gooding	McCumber	Shortridge
Brandegee	Hale	McKinley	Smoot
Broussard	Harreld	McLean	Spencer
Bursum	Johnson	McNary	Sutherland
Calder	Kellogg	Newberry	Townsend
Capper	Kendrick	Norbeck	Wadsworth
Curtis	Keyes	Oddie	Warren
Elkins	Lenroot	Phipps	Watson, Ind.
France	Lodge	Poindexter	Weller
Frelinghuysen	McCormick	Rawson	Willis

NOT VOTING—44.

Borah	Fernald	Norris	Simmons
Cameron	Gerry	Overman	Smith
Caraway	Glass	Owen	Stanfield
Colt	Heflin	Page	Stanley
Crow	Hitchcock	Pepper	Sterling
Culberson	Jones, Wash.	Pittman	Swanson
Cummins	Ladd	Pomerene	Trammell
Dillingham	Moses	Ransdell	Underwood
du Pont	Nelson	Reed	Walsh, Mont.
Edge	New	Robinson	Watson, Ga.
Ernst	Nicholson	Shields	Williams

So Mr. KING's amendment to the amendment of the committee was rejected.

The PRESIDING OFFICER. The question now is on agreeing to the amendment reported by the committee.

The amendment was agreed to.

The next amendment was, on page 5, line 21, after the word "nitrate," to strike out "2" and insert "2½," so as to read:

Barium nitrate, 2½ cents per pound.

Mr. KING. Mr. President, I move to amend the amendment reported by the committee by striking out the numerals "2½" and inserting in lieu thereof "1½." I am going to be so generous in this motion that the amendment ought to satisfy everybody on the other side.

Mr. President, just a word in regard to barium nitrate. Let me call attention to the fact that the price on April 24 of this year was from 6½ to 7 cents per pound. The pre-war import price—that is, the unit value—was 3 cents per pound. The Payne-Aldrich bill placed this item in a basket clause, with a rate of 25 per cent ad valorem. The Senate bill, as stated, imposes a specific duty of 2½ cents per pound, so that the increase above the Payne-Aldrich bill is enormous and probably amounts to between 100 and 200 per cent, as I hastily figure it as I am speaking. The very heavy duty carried by the Payne-Aldrich bill is not deemed adequate, but it must be increased now from 100 to 200 per cent. The House bill gave a specific rate of 2 cents per pound, but the Senate committee, notwithstanding the enormous increase above the Payne-Aldrich Act and the Underwood-Simmons law, have increased the duty, as indicated, from 2 to 2½ cents under a specific rate.

In the Underwood law this item is found in paragraph 3 of the basket clause and carries an ad valorem rate of 15 per cent. The article is used in explosives and railroad signals and for other purposes. I have referred heretofore to barium and its products. This commodity is made by the Du Pont trust and by some of the other large chemical companies of the United States. Of course, it is important that they be cared for and that the rates be fixed as desired by the trust. So I presume, Mr. President, that my amendment will not prevail; but I offer it and ask for a vote.

The PRESIDING OFFICER. The question is on the amendment offered by the Senator from Utah [Mr. KING] to the amendment reported by the committee.

Mr. McCUMBER. Mr. President, I think I ought to make a very brief statement.

Barium nitrate is an important compound, imported in large quantities before the war, and now being made in the United

States. The imports in 1914 were over 1,000,000 pounds. In 1915 the United States produced 971 tons. In 1919 the United States produced 784 tons, which was equivalent to about 1,500,000 pounds. In 1914, as stated, the importations were about 1,000,000 pounds. We undoubtedly could very easily go back now to the importations wholly from a foreign country. This again, I repeat, is one of the war babies, and the only question is whether its life is worth the milk in the bottle, and we are offering it here to protect its life. We believe that it is better to keep the industry in the United States; and because of the increase which we have made in the rate on barytes ore, on barium carbonate, from which it is made, it will require a one-half cent higher duty per pound than is given in the House bill.

Mr. KING. Mr. President, just one word.

The Senator from North Dakota seems solicitous for milk for the babies which he seems to have taken under his wing. I am afraid that the babies are so large, however, that they will deny their paternity and claim to be, like the Cæsars of old, immortal in origin and eternal in duration. The du Pont trust, with its enormous capital, and other chemical concerns the aggregate value of the capital of which is more than $1,000,000,000, can not be called babies—war babies or pre-war babies or any other kind of babies. They are colossal giants, and their earnings are stupendous, as the Senator knows.

Mr. President, the only possible business or industrial competitor of the United States in normal times would be Germany, and, of course, I am referring to a pre-war Germany. I have indicated that barium is produced in the United States; that it is a metal which is found in large quantities in the United States. I know what the Tariff Commission has stated here with respect to the large deposits in Germany. There are large deposits of barium in the United States which can be mined as cheaply as the deposits anywhere can be mined. In the reduction of the barium ore for the production of these barium compounds large quantities of coal are required, metallurgical processes which require heat are important; and we, with our enormous coal deposits and with our facilities for the production of coal and for the manufacture of chemicals, in my opinion, can produce this article cheaper than Germany can produce it.

I called attention yesterday to the fact of the enormous increase in the wages in Germany, to the increase in freight rates in Germany, and to the remarkable change which has occurred in the last few weeks in prices. I have here a large number of reports and figures, which I shall not take the time to call to the attention of the Senate to-night, but upon some appropriate occasion I shall refer to the changes which have occurred in the manufacturing processes and in the industrial activity of Germany since the time the Reynolds report was prepared in 1921. Indeed, radical changes are taking place every day—40 per cent increase in wages on the first of January of this year is but an illustration of the transitory or mutable situation thus found. But I am not going to discuss that situation now.

I call attention to the fact that the item under consideration is a product which can be manufactured in the United States, and that we have practically everything that forms a constituent part of barium nitrate. In view of that fact I can perceive no necessity for this enormous duty.

The PRESIDING OFFICER. The question is on the amendment offered by the Senator from Utah [Mr. KING] to the amendment of the committee.

Mr. KING. I call for the yeas and nays.

The yeas and nays were ordered, and the reading clerk proceeded to call the roll.

Mr. FRELINGHUYSEN (when his name was called). Making the same announcement as before, I vote "nay."

Mr. KELLOGG (when his name was called). Making the same announcement as before, I vote "nay."

Mr. WARREN (when his name was called). I transfer my standing pair with the Senator from North Carolina [Mr. OVERMAN] to the Senator from New Hampshire [Mr. MOSES], and will vote. I vote "nay."

Mr. WATSON of Indiana (when his name was called). Making the same announcement as before, I vote "nay."

The roll call was concluded.

Mr. LODGE (after having voted in the negative). I omitted to repeat the transfer of my pair with the Senator from Alabama [Mr. UNDERWOOD] to the Senator from Delaware [Mr. DU PONT]. I now do so, and will let my vote stand.

Mr. SUTHERLAND. Making the same announcement as before, I vote "nay."

Mr. McKELLAR. Making the same announcement as heretofore as to my pair and its transfer, I vote "yea."

Mr. JONES of New Mexico (after having voted in the affirmative). I had made no announcement of my pair. I make the same announcement as on the previous roll call, and will allow my vote to stand.

The result was announced—yeas 13, nays 39, as follows:

YEAS—13.

Ashurst	Harris	La Follette	Walsh, Mass.
Caraway	Harrison	McKellar	
Dial	Jones, N. Mex.	Myers	
Fletcher	King	Sheppard	

NAYS—39.

Ball	Gooding	McKinley	Smoot
Brandegee	Hale	McLean	Spencer
Broussard	Harreld	McNary	Sutherland
Bursum	Johnson	Newberry	Townsend
Calder	Kellogg	Nicholson	Wadsworth
Capper	Keyes	Norbeck	Warren
Curtis	Lenroot	Oddie	Watson, Ind.
Elkins	Lodge	Page	Weller
France	McCormick	Phipps	Willis
Frelinghuysen	McCumber	Shortridge	

NOT VOTING—44.

Borah	Gerry	Overman	Simmons
Cameron	Glass	Owen	Smith
Colt	Heflin	Pepper	Stanfield
Crow	Hitchcock	Pittman	Stanley
Culberson	Jones, Wash.	Poindexter	Sterling
Cummins	Kendrick	Pomerene	Swanson
Dillingham	Ladd	Ransdell	Trammell
du Pont	Moses	Rawson	Underwood
Edge	Nelson	Reed	Walsh, Mont.
Ernst	New	Robinson	Watson, Ga.
Fernald	Norris	Shields	Williams

So Mr. KING's amendment to the amendment of the committee was rejected.

The PRESIDING OFFICER. The question now is upon the committee amendment.

The amendment of the committee was agreed to.

The PRESIDING OFFICER. The Secretary will state the next amendment of the committee.

The next amendment was, on page 5, line 22, after the word "powders," to insert "liquids," so as to read:

PAR. 12. Blackings, powders, liquids, and creams for cleaning or polishing, not specially provided for, 25 per cent ad valorem.

Mr. KING. Mr. President, for information, may I inquire of the Senator whether he construes the paragraph without the word "liquids" as sufficiently comprehensive to embrace liquids within its terms?

Mr. McCUMBER. The word "liquids" was inserted there to make it absolutely certain that the paragraph would include liquids; that is all. It might have included them without the word. We have blackings, powders, and liquids. Of course, the blackings might be liquid blackings; but the committee thought it was better to be safe and include the word "liquids," so that it would not be construed in any way as embracing only the powders.

Mr. KING. Does the Senator think that it was included within the brackets or basket clauses of either the Payne-Aldrich law, the Underwood law, or the House bill?

Mr. McCUMBER. No; I think it probably would fall under paragraph 12, under the head of "blackings," even though it was a liquid; but I wanted to make certain.

Mr. KING. I am inclined to think the Senator is right, and for that reason I do not intend devoting any time to the consideration of the amendment. If upon further consideration of the subject the Senator and the experts should reach a different conclusion, I shall be glad if they will advise the Senate, and in that event it might be that either the Senator or somebody on this side of the Chamber would desire to have a vote upon that item.

The PRESIDING OFFICER. The question is upon agreeing to the committee amendment.

The amendment was agreed to.

The next amendment was, on page 6, line 3, after the word "lime," to strike out "three-fifths" and to insert "one-fifth," so as to make the paragraph read:

PAR. 13. Bleaching powder or chlorinated lime, one-fifth of 1 cent per pound.

Mr. WADSWORTH. Mr. President, this committee amendment is apt to give rise to considerable discussion, I think. It is one with which I can not agree myself, and I think others feel the same way. I was going to ask the chairman of the committee if he insists on taking it up this evening.

Mr. KING. May I appeal to the Senator from New York? It would be very gratifying to me if it could be taken up and could receive considerable discussion at the hands of others this evening.

Mr. WADSWORTH. I have no doubt the Senator feels that way, and it was my knowledge of his desires in that regard which led me to ask the Senator from North Dakota to let the paragraph go over.

Mr. KING. Then it is clear that the Senator from New York does not desire to accede to my wishes in the matter.

Mr. WADSWORTH. I would like to have the item go over until I can discuss it at greater length with some of the members of the committee.

Mr. KING. I think the Senator ought to discuss it with us, so that we may be advised.

Mr. WADSWORTH. When it does come up I shall do so.

Mr. McCUMBER. I have no objection to its being passed for the time being, if the Senator desires.

Mr. WADSWORTH. That is all I ask, that it be passed over temporarily.

The PRESIDING OFFICER. The amendment will be passed over.

The next amendment was, on page 6, line 16, before the words "per centum," to strike out "30" and insert "45," so as to make the paragraph read:

PAR. 16. Calomel, corrosive sublimate, and other mercurial preparations, 45 per cent ad valorem.

Mr. JONES of New Mexico. Mr. President, this is a very important item, and it should be discussed in connection with another paragraph of the bill, that relating to quicksilver. That is the basic commodity, and I believe the chairman of the committee will recognize the propriety of having this passed over until we reach that paragraph of the bill. The duty on quicksilver, the basic material, is very materially increased by the committee amendments, but not so much, however, as by the provision of the bill as it comes from the House, and as, according to the testimony, that constitutes 90 per cent of the manufactured commodity, I suggest that it go over until we reach that paragraph in the bill, which I believe is paragraph 383.

Mr. McCUMBER. Mr. President, of course the increased duty that is given upon calomel is dependent to some extent upon the quicksilver; I agree with that. But why not go right to quicksilver, if the Senator desires it, discuss it, and then come back to calomel?

Mr. JONES of New Mexico. I will state that at least one other Senator makes the request that it go over until quicksilver can be reached. He is not ready to discuss the matter to-night.

Mr. McCUMBER. Of course, it is as broad as it is long, either to put this over until we reach the quicksilver item, or take the quicksilver item up now, settle that, and then go right back to this.

Mr. JONES of New Mexico. Yes; that is true.

Mr. McCUMBER. We would arrive at the same result.

Mr. JONES of New Mexico. But it will be more convenient, I may say to the Senator, to let it be passed over until we reach quicksilver. I make that suggestion at the request of another Senator.

Mr. McCUMBER. It will be a long time before we get to the quicksilver item and as there are quite a number of these items. I dislike to pass too many of them over until we reach some other matter which may or may not be placed upon the free list. So, if the Senator would just as soon, I would like to take up the question of quicksilver now and dispose of it.

Mr. JONES of New Mexico. There is an amendment, and, of course, the matter can be again discussed when we come to consider the bill as amended; and if the Senator insists upon it, of course, we will proceed with the discussion.

Mr. McCUMBER. I will say this, if it is satisfactory: Suppose we pass it over temporarily, at least, and then we will see when we can bring it up.

The PRESIDING OFFICER. If there is no objection, the amendment will be passed over temporarily.

Mr. TOWNSEND. Mr. President, I offer certain amendments to the bill which I ask to have printed and lie on the table.

The PRESIDING OFFICER. Without objection, it is so ordered.

The next amendment was, on page 6, line 18, before the word "cents," to strike out "8" and insert "6"; and in line 19, before the words "per centum," to strike out "25" and insert "50"; so as to make the paragraph read:

Paragraph 17. Carbon tetrachloride, 2½ cents per pound; chloroform, 6 cents per pound; tetrachloroethane and trichloroethylene, 50 per cent ad valorem.

Mr. KING. I would like to ask the chairman of the committee to give some explanation as to the reason for fixing "6" as the specific rate on this item. As the Senator perceives, it relates to chloroform, a commodity of very great importance to the people. I understand the price has increased considerably over pre-war prices.

Mr. McCUMBER. The 6 cents per pound rate is equivalent to an ad valorem rate of between 15 and 20 per cent, which is a very low ad valorem rate. The pre-war price was 15 cents a pound, based on the foreign unit value.

Mr. KING. Mr. President, this product is made by the Albany Chemical Co.; the Dow Chemical Co., one of the large chemical concerns of the United States; the Mallinckrodt Chemical Works, of St. Louis, Mo.; the Powers, Weightman & Rosengarten Co., of Philadelphia; and the E. I. Squibbs Co., of New York, as well as other companies. None of these organizations or corporations is a little concern. None of them is a war baby. None of them needs the fostering hand of the Government to aid it in the establishment of an industry.

Senators know that there are many commodities which grow out of the production of other commodities to which they may be related in a crude fashion, or between which there is rather a tenuous relation. Many of these big chemical concerns and drug manufacturers are so equipped as that they produce not one but a multitude of articles and commodities and products, and, to use the common language, they dovetail in such a manner as to make great economies in the production, and quantity production can be cheaply effectuated.

I concede that there are many commodities which, standing alone, not related to other commodities made by the same corporation, might not be able to be produced at the same cheap price or at the same level of prices, as the same commodity when it is made by concerns which are engaged in the production of various products. So we find that chloroform is made by a number of corporations which are engaged in the production of various medicines, medicinal products, and chemical products.

Powers, Weightman & Rosengarten manufacture a very large number of chemical products, chloroform being among the list. Why chloroform should bear any duty will be, it seems to me, somewhat difficult to explain. If it is to have a duty, then it should be reduced to the lowest possible level, because of the importance of chloroform in the medical world. It is so important for the people. If there is anything which should be cheap it is those medicines which are so indispensable for the people.

Let me read a word or two as to the character of this product. I read from the Tariff Surveys. After describing its physical qualities, they proceed:

Chloroform is employed as a solvent and as an antiseptic, about 1 per cent of grain alcohol being used to prevent decomposition.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. WELLER in the chair). The Secretary will call the roll.

The reading clerk called the roll, and the following Senators answered to their names:

Ball	Harreld	McKinley	Smoot
Brandegee	Harris	McLean	Spencer
Broussard	Harrison	McNary	Sutherland
Bursum	Johnson	Myers	Swanson
Calder	Jones, Wash.	Newberry	Townsend
Capper	Kellogg	Norbeck	Wadsworth
Curtis	Keyes	Oddie	Walsh, Mass.
Dial	King	Overman	Warren
Fletcher	Ladd	Page	Watson, Ind.
France	Lenroot	Phipps	Weller
Frelinghuysen	Lodge	Rawson	Willis
Gooding	McCumber	Sheppard	
Hale	McKellar	Shortridge	

The PRESIDING OFFICER. Fifty Senators have responded to their names. There is a quorum present. The question is on agreeing to the committee amendment.

Mr. KING. Mr. President, so far as I am able to discover there was no testimony before the committee of the House or the committee of the Senate which would afford any information as a basis for this particular rate. I know that many items appearing in the bill have no testimony to support them.

It is quite likely that numerous paragraphs in the bill were drawn because of extraneous evidence brought to the attention of the committee but not committed to writing or made available for other Senators, or perhaps upon information which they obtained in reading former tariff laws. Anyone who reads the three volumes dealing with the chemical schedule will be surprised at the paucity of information as a basis for an intelligent framing of an intricate and complex tariff schedule.

Perhaps there is no schedule in the bill more intricate than Schedule 1. Perhaps there is no schedule which involves so much of technical knowledge in its preparation or in an understanding of its items as does Schedule 1, and yet I repeat that the information which we find in these three volumes—and one volume is a supplement and contains testimony relative to many other items—is wholly inadequate to justify these rates; nor is it of sufficient merit or clarity to enable anyone to understand the bill or to justify its provisions.

It seems as if the bill were drawn upon the theory of hop, skip, and jump. "We will give the demandants and the corporations whatever they want. We will make the rates large

enough to suit the cupidity of the most avaricious and greedy and soulless corporations." Measured by that intelligent(?) standard of drafting tariff bills, I must pronounce the one before us, Mr. President, the ne plus ultra of perfection. It is the apotheosis of wisdom. chemical wisdom, tariff wisdom—but it is remarkable for its devotion to special interests and large corporations who will greatly profit by its provisions.

I think in the days which are to come, if we shall be remembered and if the tariff bill shall be remembered, it will be looked to as something unique in the history of tariff legislation, something that can not be defined in any terms of political economy.

I repeat, there is nothing in the testimony with reference to many of these items, and one searches in vain for a rational basis upon which can be rested some of the schedules. I ask my distinguished friend from North Dakota now whether, in writing the rate which we find with respect to this item, chloroform, he took into account the capital invested, wages to be paid, difference in cost in production in European nations and in the United States, or what other real or imaginary reasons or bases may be submitted for our consideration as a justification for this rate?

Mr. McCUMBER. Mr. President, does the Senator want me to answer?

Mr. KING. I yield.

Mr. McCUMBER. I do not think that big adjectives or "cuss" words are going to help us a great deal in solving the problem of attempting to get a fair tariff measure passed.

I have again and again stated the general rules that governed us in trying to secure what we considered a protective tariff bill; I have stated again and again that the pending tariff bill is for both revenue and protection. There may be some instances where we need the revenue even though there be little necessity for the protection; but, Mr. President, I do not think that a 15 or 20 per cent ad valorem duty or its equivalent is an excessive protective measure. When we compare foreign prices with home prices, when we compare foreign wages with home wages, I think that when we give the American the benefit even of a 20 or 25 per cent ad valorem duty we have not imposed upon the American people, nor have we placed any great hardship upon the importers.

The Senator from Utah [Mr. KING] stated a short time ago that the pre-war price of this article was about 15 cents per pound, but I have been unable to ascertain where he obtained those figures. According to the Tariff Information Surveys, the unit value of the imports in 1907 was 47 cents a pound; in 1908, 55 cents a pound; in 1909, 70 cents a pound. Then the price jumped up in 1910 to $1.54 a pound; in 1911, to $1.76; 1912, it declined to $1.66; in 1913, the unit value was $1.74; and in 1914, it was $2.48.

The American price in 1912 ranged from 23 to 28 cents per pound; in 1913—I am taking the month of January—from 25 to 30 cents per pound; in 1914, from 25 to 30 cents per pound; and in 1915, from 30 to 35 cents per pound.

I assume that the imports with the unit value of $1.54 and $1.73 must have come in some kind of special cases or bottles or vials which increased the price to that very high figure, because it is much above the American price.

Mr. KING. May I inquire of the Senator when the price reached the great heights he has mentioned?

Mr. McCUMBER. I have given the prices several years—from 1907. The high price could not have been merely by reason of the duty, for the duty was only 10 cents a pound at that time.

However, Mr. President, turning to the present price, we find that chloroform, technical, is now quoted at 35 cents a pound; and the United States Pharmacopœia brand is quoted at 33 cents a pound. So it will be seen that we are within a very few cents of being down to the pre-war price in the American article, and that upon this basis the specific duty which the committee have imposed is equivalent to an ad valorem duty of 20 per cent, which I consider very low from both the protective standpoint and the revenue standpoint.

Mr. KING. Mr. President, the Senator from North Dakota has expressed some surprise at the figures which I gave showing the pre-war price of this article. I will say to him that I myself was somewhat surprised, and yet those figures were furnished me by the Tariff Commission. They may, however, be inaccurate, but I give to the Senator the authority for the statement. I am inclined to think, though, Mr. President, that my figures must be correct. The Senator from North Dakota has given the present prices and has argued that because the prices now are approximately from 24 to 32 or 33 cents per pound——

Mr. McCUMBER. The price now is 35 cents per pound.

Mr. KING. Yes; because the price now is approximately 35 cents a pound, the Senator argues that there has been a great reduction from former prices, and, I suppose, attributes that reduction to the development of the industry here.

Mr. McCUMBER. If the Senator will allow me, I gave also the American prices during preceding years, ranging from 24 to 30 cents per pound, 30 cents a pound being only 5 cents less than the present price.

Mr. KING. I am inclined to think that the pre-war prices were as I have indicated. The information which I have is that the pre-war foreign price was 15 cents and that the foreign price now is, approximately, 14 cents. That would be the wholesale price. I do not vouch for that information. I only tell the Senator the source from which I obtained it.

Mr. President, I was calling attention to the Tariff Survey, which shows that the production in 1914 of this article was more than one and one-third million pounds; in 1919 the preliminary figures of the Tariff Survey show that the production was 1,677,600 pounds. It is obvious to those who are familiar with chemistry that chloroform requires chlorine in its manufacture, and that the United States is rich in chlorine, sodium compounds, carbon, and various primary products that might contribute to the making of chloroform or any of the compounds of chloroform, two of which, as I recall, are embraced in the pending bill.

In 1914 our imports of chloroform were only 2,444 pounds. Since the World War our imports have been less than 100 pounds annually, while before the war, as I have indicated, they were limited to 2,444 pounds in the fiscal year ending June 30, 1914.

May I be pardoned for directing the attention of the Senate to the fact, which I have heretofore mentioned, that if Germany was ever supreme in the chemical world it was in 1914, before the Great War broke out? I concede that Germany for a number of years prior to the war had been devoting her energies—I will not say to the preparation for war, but for the development of those industries which might be contributory to the war or which would aid in the prosecution of war in the event such an awful calamity as war came to the world. Germany's chemists were particularly interested, perhaps largely through the interposition of the Government, in explosives and making products which we denominate chemical-war products. So Germany was then at the acme of her chemical power and greatness. Yet at that time Germany was unable to compete—or, at any rate, did not compete—with the producers of this article in our own country. According to the figures which I have the foreign price of chloroform at that time was 14 cents and the domestic price 15 cents per pound.

One cent a pound, however, would not measure the differential between the German article and that produced in the United States, for, in order to bring chloroform into the United States, it would have to be carefully packed, and the cost would be considerable, measured by the wholesale price. Then there would be the insurance and the freight and the brokerage and the commissions; so that Germany obviously could not compete in the American market with the United States in the manufacture of chloroform. It would seem, therefore, that we had a monopoly; that we had no foreign competition. Our production, as I have stated, aggregated from 1,300,000 pounds to 1,667,000 pounds.

Now, Mr. President, the cost in the United States is approximately from 24 to 35 cents per pound, depending upon the grade. If it is the United States Pharmacopœia grade, the price is from 33 to 35 cents per pound, as was stated by my distinguished friend. In other words, the prices now are more than double the pre-war prices. That ought not to be the case, particularly with reference to a medicine which is so important to the people. I do not think that we can justify doubling and more than doubling the prices of chloroform as we find the situation to-day. If 15 cents was the pre-war price, and profits doubtless were realized at that price, we may not justify a price of 35 cents per pound now; but, notwithstanding that fact, and notwithstanding the fact that we have no competition, we are asked to impose a tariff upon this article of 6 cents a pound.

I have examined the hearings, as I indicated a moment ago, and I find that a Mr. Pardee appeared before the House committee. Mr. Pardee is vice president of the Dow Chemical Co., one of the large chemical companies of the United States. Ah, Mr. President, it seems to me that the chemical companies have been too potential in the formulation of these schedules, and that we have paid more attention to their interests than we have to the interests of the people. The Dow Chemical Co. is a powerful organization, rich in resources and competent to meet and challenge successfully almost any competitor.

Mr. GARNER asked Mr. Pardee this question:

Are the rates in the so-called Longworth bill, passed here and now pending in the Senate, satisfactory?

It is not a question of what is right. "Is it satisfactory?" That is the question too often asked those who are beneficiaries of tariff legislation: "What do you want? Are the rates satisfactory to you?"—not to the people.

I do not want to characterize as being prejudiced witnesses who came before the committee. Many of them undoubtedly attempted to state the facts; but many of them, I am satisfied, allowed their prejudices, their cupidity, their desire for gain and for unjust profit to influence their testimony. They were interested parties.

Mr. President, in our courts, both in civil and in criminal cases, we have recognized for many years the fact that human nature, where it is interested, is apt to color the testimony given; and so our courts, when interested parties appear and testify, instruct the jury that they may take into account the interest of the witnesses or their lack of interest, their fairness, and their bearing upon the witness stand, and deduce from all of the circumstances attending their testimony whether or not they have told the truth. Most of these witnesses who appeared were interested witnesses, and I regret to say that many of the witnesses were not subjected to what I would call a cross-examination. Many of them merely filed briefs, prepared by learned counsel or by technicians or by skilled representatives, chemists, and otherwise, of the corporations who were seeking these benefits. Testimony of that character is not worth much. It is ex parte. A searching cross-examination of many of these witnesses would have disclosed their unfairness, their prejudice, and the lack of merit with respect to much of their testimony.

I remember reading the cross-examination by the Senator from Missouri [Mr. REED] of one witness, whose name I have forgotten. He asked for costs. He asked if the witness, who had testified as to conditions in Germany, knew anything about the conditions in Germany. In other words, he sought to probe the witness to see how much there was to his testimony and how much credibility should be ascribed to it. That witness's testimony before a fair jury would have had but little weight. It was manifest that he was testifying from his prejudices and from his desires, inspired by a desire for gain and for profit rather than by a desire to present all of the facts to the committee.

How few of the witnesses who testified gave any costs of production! How few of them were willing to bring their books! Indeed, I think I may say without contradiction that but one or two witnesses out of the multitude who appeared during the hearings in the House and in the Senate brought their books to the committee or submitted to a searching cross-examination as to the costs of production or to the returns upon the capital invested. I submit that a large number of the representatives of corporations disclosed, directly or indirectly, that the capital which they had invested in the enterprise was not an original investment, if I may be permitted that term, but that it grew out of the earnings after dividends were paid; and instead of distributing all of the earnings and all of the profits, large as those distributions would have been, they were converted into capital and became a capital investment upon which they subsequently drew dividends, and which they have counted in all of their bookkeeping processes, either for income tax or otherwise, as original capital investment. It is unfair in a sense, but it is permitted and is justified by our business conscience.

So, Mr. President, with respect to this item, the only man who testified was the representative of a large chemical concern, and he said:

> On chloroform the Payne-Aldrich law provided for 10 cents a pound, and we are asking for 33⅓ per cent ad valorem, which would be an increase of 3 or 4 cents a pound over the Payne-Aldrich law.

Most of the witnesses wanted more than the Payne-Aldrich law; and I have called atention heretofore to the fact that this bill is higher in its rates by more than 100 per cent than the discredited, and I was about to say damned—I will say condemned—Payne-Aldrich law.

Mr. SMOOT. Mr. President, the rate on this item is 40 per cent less than the rate carried by the Payne-Aldrich law.

Mr. KING. I concede that this is somewhat less.

Mr. SMOOT. And, of course, the Senator does not mean that statement to apply to the whole bill.

Mr. KING. Oh, no. The Senator will recall the figures which I put in the RECORD. I do not care to refer to them again at this time, unless the Senator desires.

Mr. SMOOT. No; I do not desire it, of course. I think, on the whole, this bill is a very much less protective bill than the Payne-Aldrich bill was.

Mr. KING. I must differ with my friend in that regard.

Mr. SMOOT. I helped to make both, I will say to my colleague.

Mr. KING. Yes; I know that the Senator did, and I believe that if the Senator had had his way both bills would have been better than they are; but I can not think that my distinguished colleague, with all his ability and all his splendid patriotism, will be so very proud of this bill in years to come. My colleague calls attention to the fact that the rate on chloroform is less than the rate in the Payne-Aldrich bill. Of course, there must be a little flower here and there in the great desert. We have an oasis now and then; and we have struck one of those flowers, one of the oases in the great desert of disappointment which we are traversing in the consideration of this bill.

But I return now to what was said by Mr. Pardee. He says:

> We have asked for a duty of 33⅓ per cent ad valorem on chloroform with the expectation that some provision will be made in the administration of the same to provide for the great difference in exchange rates between this country and foreign countries. If, however, it is found impossible or unfeasible to make such provision we ask that a specific duty of 7 cents per pound be levied on chloroform in addition to 33⅓ per cent ad valorem.

As I have indicated, Mr. President, the Senate has reduced the rate of the House bill from a specific 8 cents per pound to 6 cents per pound. But little more need be said in regard to this item. There is no competition. The primary products from which it is made we have in rich abundance, and therefore any duty can not be for revenue purposes, can not be for the purpose of protecting the home industry, can not be for the purpose of measuring the cost of production abroad and the cost of production at home, or for any of the reasons heretofore assigned as a basis for the protective system.

Let me just call attention briefly to what the Tariff Commission says respecting this item:

> It is made from three different raw materials—carbon tetrachloride, acetone, or grain alcohol—all of which are produced in the United States in sufficient quantities. The war demand for acetone greatly stimulated the production of chloroform from carbon tetrachloride.

The imports in 1914 were valued at only $990, and since the war they have been less than 100 pounds annually.

You can not get any revenue from this item. We have no competition with respect to this item. Why the tariff? We have grain alcohol; we have all of the compounds that go into the production of this important commodity. Therefore, there is no reason in the world for a tariff. We know that we are shipping grain abroad. The European nations do not produce sufficient grain at the present time, and in the past did not, for the needs of their people. With our plethora of cereal supplies, with our enormous carbon supplies, and the raw materials which may constitute a part of this finished product, I submit again that there can be no real reason, no sound reason, for this tariff.

I shall move at the proper time to transfer this item to the free list. However, in order to obtain a vote upon it now, I move to strike out the figure "6" and insert in lieu thereof the figure "2." If that amendment shall be defeated, at the proper time I shall move to transfer this item to the free list.

Mr. SMOOT. Mr. President, just for the RECORD, so that we may show why the committee proposed a duty of 6 cents a pound on chloroform, I want to call attention to the history of chloroform in the United States.

In the Dingley Act there was a duty of 20 cents a pound on chloroform, and at that time the foreign price of the chloroform imported into the United States was 55 cents. That was in 1908.

The Payne-Aldrich Act was enacted in 1909, with a 10-cent-a-pound duty, and the foreign value of chloroform advanced from 55 cents up to $1.54 in 1910. That was not the American price, but the foreign price.

In 1911 it was $1.76; in 1912 it was $1.66; in 1913 it was $1.74; in 1914 it jumped to $2.48. That was on account of the war. Then in 1915 it dropped to $1.65; in 1918 it was 76 cents; in 1919 it was 50 cents; and then in 1920 it went to $2, for some unknown reason, in the foreign country. I suppose it was some special kind, a few pounds of which was coming into this country. To-day the price is 35 cents a pound.

So when the 10-cent-a-pound rate was put upon it, the foreign price was about four times or over what it is to-day. I have no doubt but that if we had had chloroform on the free list chloroform never would have been made in this country, but with a duty of 10 cents a pound on it they could hardly destroy the industry in the United States. The industry became established in the United States, and when established the price began to fall. If to-day we had free chloroform, Germany would be charging us at least $1.50 a pound.

I prefer to have a 6-cent rate on chloroform and sell it to the American people for 35 cents than to have it on a free list and kill the industry in the United States and then pay a dollar and a half a pound. That is about the whole situation, as it

appears to the committee, and this is one of the items of all the items it seems to me which ought to have at least fair protection. We have decreased the Payne-Aldrich rate 40 per cent. Under that rate the industry was established. To-day it is established, and we think it can live with a 6-cent rate. The House thought it would take 8 cents, but I think that is too high. So did your committee, and they reduced it from 8 to 6 cents. I am perfectly willing to have the Senate decide whether the committee was right or not.

Mr. KING. Mr. President, the argument of my friend upon this matter, it seems to me, would justify the imposition of a tariff upon every article, whether there was possible any competition from abroad or not. I called attention to the fact, before my colleague come into the Chamber, that in 1914, according to the figures which have been furnished me by the Tariff Commission, the price of chloroform in the United States was 15 cents a pound, and the price in Europe was 41 cents a pound. Those figures may be wrong. I merely state the source of my authority.

Mr. SMOOT. If that is the case, then the duty did them no good at all, and did not hurt the American consumer.

Mr. KING. I concede that to be true, Mr. President, and I think a duty will not do them any good, so far as interfering with foreign competition is concerned, because there can not be foreign competition at the prices indicated; but it will give them a pretext and an excuse to swell the price above what would be just and fair.

I insist that whenever you lay a duty upon an article you may consider that the temptation will be so great that when opportunity is afforded the beneficiaries, the domestic producers, they will increase their prices up to the limit which the duty permits. That is not the object of laying tariff duties.

I had supposed that tariff duties, under the protective theory of our Republican friends, rested upon the conception, first, of a revenue; and, second, permitting a domestic industry which was new, which was an infant, to get firmly established in order that it might meet the storms and tempests of competition as they might rage about it. But, Mr. President, the evidence is incontrovertible that there has been no competition in this article from abroad, and there can be no competition from abroad, and the domestic prices will be such as the cupidity or the honesty of the domestic manufacturers, whichever term you prefer, may determine. There is no reason for this duty.

The prophecies of my learned friend as to what will happen, or may happen, without this duty, I do not assent to. Mr. President, if it be true that when there is no competition we may lay duties because there may possibly in the future arise some contingency when there may be competition, then all we want to do is to put the rates at such arbitrary figures as we may name, without taking into consideration any of the factors which heretofore have been regarded as essential in framing our tariff legislation.

Mr. SMOOT. I would agree with my colleague if there were no competition; but after an industry is established, like that of the manufacture of chloroform, in the United States and the product is made by so many establishments, then the domestic competition will regulate the price. I will admit that if there were only one or two people making the article and they should make it in insufficient quantity to furnish all of the demands of this country, they could get together and raise the price as much as the tariff rate would allow; but there is such competition to-day in this item that I doubt very much whether there is any concern in the United States making an undue profit upon the production of chloroform. What my colleague says would be absolutely right if it were possible for all manufacturers in this country to get together to make one article and fix the price. In that case I would agree with the Senator that the amount of the tariff then would be open to attack, but that does not happen once in ten thousand times.

Mr. FLETCHER. If you fix the duty so high as to keep out importations, then they will get together.

Mr. SMOOT. But this is not so high; and if it were too high, then the domestic competition would bring it down. There is no doubt about that, if the demand in this country is sufficient to require a great number or a reasonable number of makers in the United States. The American people can hardly ever get together upon any kind of a question if they are fighting for trade.

Mr. KING. Where there is an industry firmly established, as the evidence shows this industry to be, with no possibility of any cloud arising in the sky portending foreign competition, with the primary product essential for its construction at the very door of the manufacturing institutions, then I submit there can be no justification for tariff rates, whether high or low.

The senior Senator from Utah ascribed to all of the manufacturers and industrial magnates of our land rather more of the altruistic spirit and the spirit of justice and fairness in their dealings with the public and in the sale of their products than many people are willing to credit them with possessing. I have no doubt that many of the manufacturers and business men of the United States measure up to the highest standards of ethics and justice and attempt to carry on their business enterprises in the way that will be for the best interests of their country. But there are too many who are selfish and who seek undue profit and are willing to employ the powers of government to promote their selfish ends.

I have attempted to learn industrial conditions in the United States and to properly appraise the industrial movements and developments which have occurred and are now taking place in our country. I have discovered a tendency to amalgamation and consolidation for the purpose of stifling competition and forcing higher prices or preventing legitimate reductions in prices. Many of these consolidations have been oppressive of labor and have been inspired not by a proper social spirit or with a desire to promote the welfare of the people. There have been frequent violations of the Sherman antitrust law, of the Clayton law, and of State statutes prohibiting monopolistic conspiracies and combinations. I am somewhat familiar with those conditions, and I affirm that they indicate an unhealthy condition and are unmistakable symptoms of this monopolistic tendency of which I speak. It is unfortunate that the Government and the States do not enforce the antitrust laws and break up the combinations which restrain trade and destroy competition.

There are combinations and monopolies to-day which are in part responsible for the industrial depression, for inequitable prices, and for evil conditions existing in our economic life, and I regret that the Attorney General of the United States and district attorneys and State attorneys seem to be unaware of the many flagrant violations of Federal and State statutes which deal with the questions of monopolies. We must strike down these monopolistic conspiracies against the public. If we do not, then there will be such discontent develop among the industrial masses as will culminate in a formidable assault upon our industrial if not upon our social and economic system. The permanency of the Government in its present political form, the perpetuity of our institutional life depend upon the maintenance of the law of competition. That is the reason I am so much against extortionate tariffs; I perceive in them a menace to the integrity of this Republic. I see in them a menace to the social and industrial forms under which we live, and if they were destroyed the Republic would be shaken. I see in them disturbers of the peace of the people and the peace of the land. If the corporations and the big business concerns are satisfied with reasonable profits, contentment will reign in the land, and there will be no demand for oppressive paternalism or for dangerous and destructive socialism.

I repeat, Mr. President, there is no reason for this rate. This item should be placed upon the free list, and I regret that my distinguished friends upon the other side, in dealing with an article so important to the people as chloroform, needed by the sick, needed by the poor, needed in our hospitals, would be willing to put a tariff upon it, and thus give the opportunity to domestic manufacturers to increase their prices beyond what reason and justice demand.

Mr. FLETCHER. Perhaps the Senator has already observed and commented upon it, but, if so, I failed to hear him. The Summary of Tariff Information shows that the imports of chloroform in 1914 were 2,444 pounds, of a value of $990.

Mr. KING. I have called attention to the fact that 2,444 pounds were imported as a maximum, and that the domestic pre-war price was 15 cents and the foreign price was 14 cents.

Mr. FLETCHER. Since the war the imports have been less than 100 pounds annually. By increasing the duty I do not see that we will obtain any revenue.

Mr. KING. Mr. President, I suggest the absence of a quorum for the purpose of obtaining the presence of Senators in order to have a vote upon my amendment to the committee amendment.

The PRESIDING OFFICER (Mr. LADD in the chair). The Senator from Utah suggests the absence of a quorum. The Secretary will call the roll.

The reading clerk called the roll, and the following Senators answered to their names:

Ashurst	Capper	Frelinghuysen	Jones, N. Mex.
Ball	Curtis	Hale	Jones, Wash.
Brandegee	Dial	Harreld	Kellogg
Broussard	Elkins	Harris	Keyes
Bursum	Fletcher	Harrison	King
Calder	France	Johnson	Ladd

La Follette	Myers	Robinson	Underwood
Lenroot	Newberry	Sheppard	Wadsworth
Lodge	Norbeck	Shortridge	Walsh, Mont.
McCormick	Oddie	Smoot	Warren
McCumber	Overman	Spencer	Watson, Ind.
McKellar	Page	Stanley	Weller
McKinley	Phipps	Sutherland	Willis
McLean	Pittman	Swanson	
McNary	Rawson	Townsend	

The PRESIDING OFFICER. Fifty-eight Senators having answered to their names, a quorum is present. The question is on the amendment offered by the Senator from Utah [Mr. KING] to the committee amendment.

Mr. KING. May we have the amendment stated?

The PRESIDING OFFICER. The amendment will be stated.

The READING CLERK. On page 6, line 18, in the committee amendment, the Senator from Utah proposes to strike out the numeral "6" and insert "2," so that it will read:

Chloroform, 2 cents a pound.

Mr. KING. I ask for the yeas and nays.

The yeas and nays were ordered, and the reading clerk proceeded to call the roll.

Mr. MCKINLEY (when his name was called). I have a general pair with the Senator from Arkansas [Mr. CARAWAY], which I transfer to the junior Senator from Washington [Mr. POINDEXTER] and vote "nay."

Mr. WATSON of Indiana (when his name was called). Making the same announcement as heretofore regarding my pair and its transfer, I vote "nay."

The roll call was concluded.

Mr. MCKELLAR. Making the same announcement as heretofore as to my pair and transfer, I vote "yea."

Mr. KELLOGG. I transfer my pair with the Senator from North Carolina [Mr. SIMMONS] to the junior Senator from Delaware [Mr. DU PONT] and vote "nay."

Mr. JONES of New Mexico. Making the same announcement as heretofore regarding my pair and its transfer, I vote "yea."

Mr. STANLEY. I transfer my general pair with the junior Senator from Kentucky [Mr. ERNST] to the senior Senator from Texas [Mr. CULBERSON] and vote "yea."

Mr. CURTIS. I desire to announce the following pairs:

The Senator from Arizona [Mr. CAMERON] with the Senator from Georgia [Mr. WATSON];

The Senator from Rhode Island [Mr. COLT] with the Senator from Florida [Mr. TRAMMELL];

The Senator from Vermont [Mr. DILLINGHAM] with the Senator from Virginia [Mr. GLASS];

The Senator from New Jersey [Mr. EDGE] with the Senator from Oklahoma [Mr. OWEN]; and

The Senator from South Dakota [Mr. STERLING] with the Senator from South Carolina [Mr. SMITH].

The result was announced—yeas 18, nays 41, as follows:

YEAS—18.

Ashurst	Jones, N. Mex.	Overman	Swanson
Dial	King	Pittman	Underwood
Fletcher	La Follette	Robinson	Walsh, Mont.
Harris	McKellar	Sheppard	
Harrison	Myers	Stanley	

NAYS—41.

Ball	Hale	McKinley	Spencer
Brandegee	Harreld	McLean	Sutherland
Broussard	Johnson	McNary	Townsend
Bursum	Jones, Wash.	Newberry	Wadsworth
Calder	Kellogg	Norbeck	Warren
Capper	Keyes	Oddie	Watson, Ind.
Curtis	Ladd	Page	Weller
Elkins	Lenroot	Phipps	Willis
France	Lodge	Rawson	
Frelinghuysen	McCormick	Shortridge	
Gooding	McCumber	Smoot	

NOT VOTING—37.

Borah	Ernst	Nicholson	Smith
Cameron	Fernald	Norris	Stanfield
Caraway	Gerry	Owen	Sterling
Colt	Glass	Pepper	Trammell
Crow	Heflin	Poindexter	Walsh, Mass.
Culberson	Hitchcock	Pomerene	Watson, Ga.
Cummins	Kendrick	Ransdell	Williams
Dillingham	Moses	Reed	
du Pont	Nelson	Shields	
Edge	New	Simmons	

So Mr. KING's amendment to the committee amendment was rejected.

The VICE PRESIDENT. The question is on agreeing to the committee amendment.

The amendment was agreed to.

The VICE PRESIDENT. The next committee amendment will be stated.

The READING CLERK. The next amendment is on page 6, line 18, in the same paragraph, to strike out "25" and insert "50," so as to read:

Tetrachloroethane and trichloroethylene, 50 per cent ad valorem.

Mr. SMOOT. Mr. President, I ask that the balance of paragraph 17, on page 6, the amendment just stated, may go over temporarily.

The VICE PRESIDENT. Is there objection? The Chair hears none, and it is so ordered.

Mr. MCCUMBER. Mr. President, I ask that paragraph 18, chalk or whiting or Paris white, may be passed over temporarily.

The VICE PRESIDENT. Without objection, paragraph 18 will be passed over.

The next amendment of the Committee on Finance was, on page 7, line 5, before the words "per cent," to strike out "15" and insert "25," so as to make the paragraph read:

PAR. 19. Chemical compounds, mixtures, and salts, of which gold, platinum, rhodium, or silver constitutes the element of chief value, 25 per cent ad valorem.

Mr. JONES of New Mexico. Mr. President, it seems to me this item would call for some statement from the proponents of the amendment. I pause to inquire if any member of the majority of the committee desires at this time to make an explanation. [After a pause.] Apparently no explanation is forthcoming. I think that the time is opportune——

Mr. SMOOT. Mr. President, I will simply say to the Senator, so that he may know really why we put this rate at 25 per cent, that in the first place, of course, the House based the 15 per cent rate on the American valuation. That was the real reason why we changed it to 25 per cent. All of the items in this paragraph, being chemical compounds, mixtures, and salts, of which gold, platinum, rhodium, or silver constitutes the element of chief value, are used very little, indeed. Twenty-five per cent is carried through the bill in the basket clauses and is applied to many of the items which are seldom used. The Senator will remember that only last night I asked that a decrease be made in one of the chemical compounds from 35 to 25 per cent. This simply means that we are carrying on all chemical compounds 25 per cent to make them uniform throughout the bill.

I think that the Senator will bear me out that as far as the result in revenue on these items is concerned it is very meager, indeed, but it will be a uniform rate, and if there is any question whether it is a compound, no matter under what paragraph it falls, it will carry the same rate.

Mr. JONES of New Mexico. I was under the impression that we were considering paragraph 18.

Mr. SMOOT. No; that paragraph was passed over.

Mr. JONES of New Mexico. I did not know that it had been passed over.

Mr. SMOOT. Yes. I understood the chairman of the committee to ask that it be passed over.

Mr. MCCUMBER. That paragraph has gone over.

Mr. JONES of New Mexico. I repeat that I did not know that the paragraph had gone over.

Mr. SMOOT. I thought the Senator from New Mexico had reference to paragraph 19, and my remarks had reference to that paragraph.

Mr. JONES of New Mexico. I had reference to paragraph 18 of the bill. Paragraph 18 has been passed over for what purpose, may I inquire?

Mr. MCCUMBER. It was passed over for further consideration of the duty of 35 per cent ad valorem, which is therein proposed to be imposed.

Mr. JONES of New Mexico. The idea is that the committee will further consider the matter?

Mr. MCCUMBER. Yes.

Mr. JONES of New Mexico. I am very glad to get that information. I hope the committee will ask to have some other items passed over as well. I suppose that as to the pending paragraph we have had all the information that is deemed necessary. There is very little information upon this subject which has been furnished to us; but if the Senator from Utah is perfectly content to let the matter go that way I feel that it is useless to make any further comment upon it, and I do not intend to discuss the matter further at this time.

The VICE PRESIDENT. The question is on agreeing to the committee amendment to paragraph 19.

The amendment was agreed to.

The next amendment of the Committee on Finance was, on page 7, line 6, paragraph 20, to strike out the word "preparations" and to insert "mixtures," so as to read:

PAR. 20. Chemical compounds, salts, and mixtures of bismuth.

Mr. JONES of New Mexico rose.

Mr. SMOOT. I will simply say to the Senator from New Mexico that the reason for the proposed increase from 25 to 35 per cent recommended by the committee in line 7 is that we

have put a duty on metallic bismuth, and the increase here is simply to compensate the manufacturers of these chemical compounds, salts, and mixtures of bismuth for the rate of duty that has been put upon metallic bismuth.

In addition to that I may add that the House provision was 25 per cent on the American valuation, and this provision is for a 35 per cent duty on the foreign valuation, which really is a lower rate than the House duty imposed upon metallic bismuth.

Mr. JONES of New Mexico. May I inquire why the duty was put upon the metallic commodity?

Mr. SMOOT. I ask the Senator from New Mexico to turn to paragraph 376-a, which imposes an ad valorem duty of 7½ per cent on bismuth.

Mr. JONES of New Mexico. It seems to me that this same situation occurs in a number of cases in the bill. There seems to be nothing at all stated in the information we have regarding that item. There is no information of which I am aware anywhere in these documents as to why bismuth itself should be put upon the dutiable list. The item is transferred from the free list, but there is no information as to why that has been done.

The placing of a duty upon the item which we are at present considering in this paragraph of the bill is excused by the fact that some action has been taken somewhere else in the bill, but there is no explanation of why the first step was taken.

The article was free under the act of 1909, and it is also free under the present law. It is a mere by-product, as I understand, of the lead industry. Now, will the Senator from Utah explain to us why the article is put upon the dutiable list?

Mr. SMOOT. If the Senator wants me to answer that question now, I will say that bismuth was put upon the dutiable list at a rate of 7½ per cent ad valorem because the committee deemed necessary in that way to protect the industry in the United States. I think when the Senator from Utah takes into consideration the smelting of lead ores in other countries and the fact that they have the markets of the world, as well as the American market, he will admit that we ought at least to allow a duty of 7½ per cent on the article.

I will say to the Senator from New Mexico that I have not any doubt that the duty of 7½ per cent will find its way back to the man in the United States who produces the ore carrying bismuth, and I think that there is no real danger to any consumer of bismuth in the United States in a 7½ per cent ad valorem rate on the foreign valuation of the article.

Mr. JONES of New Mexico. The only information we have regarding bismuth I intend to read. Under the act of 1909 it was on the free list; under the present law it is o.. the free list. In the Summary of Tariff Information there are just two paragraphs regarding it which describe the commodity and give its uses:

Description and uses: Bismuth, one of the minor metals, is soft, reddish-white, and highly crystalline. It is a component of many easily fusible alloys which are used in manufacturing automatic fire sprinklers, electric fuses, and solders. Since it expands on solidifying from the molten state, it is used in some form of type and in metal bearings. The principal uses of bismuth, however, are in certain medicines and to some extent in the manufacture of cosmetics.

Now, on the subject of production the summary has the following to say:

Production is about 300,000 pounds annually, practically all as a by-product from the smelting of lead, copper, gold, and silver ores in Utah. Bolivia produces most of the bismuth of the world; some ore is also produced in Australia and Tasmania, which is mostly refined in Great Britain. Considerable bismuth ore has been produced in conjunction with tungsten in China, which promises to be of increasing importance.

Mr. President, that is all the information there is in this record, so far as I have been able to find, regarding bismuth. Apparently it is only a by-product of an industry in the State of Utah. The Senator from Utah has told us, "We thought that a duty of 7½ per cent on bismuth would be about right." About right for what? The "for what" is not disclosed. Here is a mere by-product, derived from smelting certain ores in the State of Utah, and we are complacently and good humoredly told "We thought that duty was about right to be put upon it." Then we are told when we come to the compounds of bismuth that because a duty of 7½ per cent was put on bismuth it was necessary to increase the duty on the compounds. Mr. President, that is all the information we have.

Mr. SMOOT. Mr. President, the Senator evidently has not read the hearings or he would not make that statement.

Mr. JONES of New Mexico. I asked the Senator to give us the information, and I think I have stated all that he gave.

Mr. SMOOT. The Senator from Utah is not going to take the time of the Senate to answer in detail every question the Senator from New Mexico asks. I know for what purpose the Senator from New Mexico asks the question. The Senator already has the information if he has examined the hearings, and knows very well what the testimony before the committee was. So far as concerns the Senator's insinuation that the duty was placed on the commodity because it is a by-product of smelting in Utah, that had nothing whatever to do with it. The Senator from Utah did not ask for any duty on bismuth. If the Senator from New Mexico wants to know the reason for the action of the committee, I can tell him what the testimony before the committee was or I can read it to him or he can read it for himself.

Mr. JONES of New Mexico. I asked the Senator a while ago for information on this point.

Mr. SMOOT. Mr. President, I am not going to take the time to go into detail, because I did not think the Senator was really trying to get any information on a duty of 7½ per cent ad valorem.

Mr. JONES of New Mexico. Why, Mr. President, that is just exactly what I wanted, or I would not have asked the Senator from Utah for it.

Mr. SMOOT. The Senator has asked the same question about every item that he has ever risen on this floor to speak about; and after the question was answered, if it was answered in detail, I do not care how long it was, if it took 30 minutes to do it, the Senator would then proceed to demolish that, and also to express himself as to why he thought it should not be. There is not any question at all that every Senator who has been here very long knows the earmarks of a filibuster, and I think we have them, and I think we have had them; and, if I know them, I know what has been going on of late.

Mr. JONES of New Mexico. Mr. President, it seems to me that the best evidence of a filibuster is when a Senator rises on this floor and undertakes to give information, and then, later on, confesses that he simply gave enough to confuse the situation.

Mr. SMOOT. Oh, no; any statement I might have made would not have influenced the Senator one iota. The Senator has made up his mind what he will do; he has made up his mind what he will say; and anything that can be said upon this side of the Chamber will not change him in the least, and he will take just so much time.

Mr. JONES of New Mexico. Mr. President, I think the Senator may be right. I have not seen anything in this bill yet, nor has anything developed in the discussion of this bill, which leads me to believe that there is any reason why I should change my mind about any of these items. But I want to say this to the Senator: I think it is due to the Senators who are going to vote for this increase of tax to know why it is done. I asked the Senator from Utah awhile ago why it was done. He made his statement, and then I commented upon that slightly, and then the Senator arises here and accuses us of a filibuster when there is nothing of the sort; but we are determined that some light shall be thrown upon this bill. It seems to me that this is just in keeping with the policy of the majority of the Finance Committee to increase these taxes, give no reasonable justification for doing it, but just simply say that they think this is about enough.

This does not encourage any industry. It is a by-product, according to the statement of the Tariff Commission from which I have read, and yet you put a tax upon it which is going to increase the cost of medicines which the people of this country must consume.

Mr. SMOOT. Mr. President, it is a by-product just exactly the same as waste from wool is; and I shall notice very carefully how the Senator votes upon wool when we reach that, and then he will see whether the waste from wool that goes into clothing is a by-product or not. There are a good many by-products that come from hides, and I shall want to know whether or not those by-products are to be considered by the Senator when we reach hides.

Mr. JONES of New Mexico. Then I will ask the Senator why we have not had a duty on this item before?

Mr. SMOOT. A good many things have been taken from the dutiable list and put on the free list, and some have been taken from the free list and put on the dutiable list. The Senator knows—I think he does, because he has lived in a mining country—that Bolivia, China, and Australia are the countries where the great mines are found carrying high percentages of bismuth in their ore; and, in fact, many of the mines in Bolivia are worked for the bismuth alone, some of the ores running as high as 30 per cent. The Senator knows that that ore can be worked and the bismuth produced at a great deal less cost than it can be produced in this country.

The Senator says that bismuth is a by-product. It is in many cases, but it costs the man who takes it out and saves it a great deal more to produce it here than it does to produce it in a foreign country. There is not any doubt about that, and I think the Senator will admit it.

As to this 7½ per cent duty, as far as I am personally concerned I do not care whether this material goes on the free list or whether it remains at 7½ per cent; but the testimony shows that the importations are already about a third of all that is produced here, no matter whether it is a by-product or not. Therefore the committee thought that with the testimony that was given there they would impose a duty of 7½ per cent ad valorem on bismuth.

Mr. JONES of New Mexico. Mr. President, we have been given a number of different theories as to how these rates were based, such as the difference in the cost of production here and abroad. We have heard nothing about that until just now the Senator has made some general statements about it; but the Senator does not believe that putting this duty on this product will increase the domestic production, does he?

Mr. SMOOT. Why, Mr. President, it may increase it a little, but not very much, I think.

Mr. JONES of New Mexico. It is a mere by-product which comes from the smelting of so much ore of a certain kind.

Mr. SMOOT. The Senator knows that when the amount of bismuth gets so low that it does not pay even to save it in the smelting of ores it goes entirely to waste and is not gathered at all by the smelters; so if the price is 7½ per cent higher of course a lower grade of ore can be saved and will be saved if it is profitable to do so.

Mr. JONES of New Mexico. It has never stopped the production in the past under free trade, has it? And yet now they want a duty on bismuth, a mere by-product of smelting ore in the State of Utah. Of course, it is a mere coincidence that it happens to be in the State of Utah, from whence the Senator comes, and I want to absolve him from all intimations or innuendoes in that connection.

Mr. SMOOT. Of course the Senator knows, if he knows anything about it, that the ores come not only from the State of Utah but they come from Nevada. I do not think they come from Arizona, but they come from Colorado. I think Montana has her own smelter there and takes care of the bismuth that is there; but the ores that come to the great smelting center at Salt Lake City—I do not care whether they are bismuth or other ores—of course are smelted there in the State of Utah, because that is the great smelting center of the intermountain country.

Mr. JONES of New Mexico. In perfectly good faith, I want to avoid any inference or innuendo that any personal interest of the Senator from Utah is involved here. I know that he is not treating the matter from that standpoint at all. It just happens to be a coincidence, but I am sure that the matter has been treated from a very broad point of view.

This duty will not increase the production, because that bismuth will be saved if it can be saved. Nobody had thought heretofore to put a tax upon it, and, of course, there are a great many items still on the free list. Coffee, I believe, is left on the free list, and some other things are on the free list. Perhaps spices from Arabia are on the free list; but I have had a very difficult time in finding anything on the free list which is produced in this country at all, even though we may produce a great surplus and export a surplus to the world. Of course, there are a few items; I understand that; but time and again we have come across items in this bill, and they are here by the hundred, where the importations amount to practically nothing, and yet a tax is put on, and it can not be for any other purpose than to create monopolies in this country, absolutely to shut out competition from the rest of the world, and in doing this they are exercising the great power of taxation. It seems that if there is an article on the free list that might give somebody a chance, if a tax were put upon it, to increase his prices, they have imposed the tax; and if a subject comes up where apparently they know nothing about it, without investigation they increase the rate which exists under the present law, and apparently without any reason for it except that they have gotten in the habit of increasing these rates.

I want to say that I think that is a vicious habit. These things ought not to be done as a habit. They ought to be done only after careful thought. To use the power of taxation without a serious consideration of the situation, unless there is real consideration of it, to my mind is a betrayal of the public interest.

I do not like to dwell upon these things in connection with such an item as this. It is not much, and yet you take a little here, you take a little there, you help this industry here and another industry there, and while I do not know that political friendships are considered in all this, it doubtless brings about a good feeling of friendship, and "one good turn deserves another."

Mr. President, it is inevitable what the result is going to be. There has not been a vote yet but that the vote in this Chamber has been always just the same, whether any reason exists or not, and in but very few instances has anyone on the other side of the Chamber attempted to give any explanation for these great increases of duty. It is expected that each one shall promptly vote according to the way the leaders tell him to vote. There has been no attempt by the great number of Senators on the other side of the Chamber who are voting with the majority of the Finance Committee to learn anything about this bill. There has been no serious proffer of information by anybody on the other side regarding the bill. Apparently there is a determination to put the bill through precisely as it is written. I apprehend that there will be no deviation on the other side of the Chamber.

That is what we are coming to, without any information, and I do not blame Senators on the other side who are trying to crowd this bill through, to jest about questions being asked, to say something about a filibuster, when they must realize that an effort must be made somehow to let the people of this country know what this thing means. I do not blame you for talking about filibusters. I do not blame you for not wanting questions asked. This bill will not stand the test of examination. We want to have the people of this country understand what this means, and that is the only object I have had in view up to this date. But I do think the people ought to understand just what these proceedings mean.

Mr. WALSH of Montana. Mr. President, I do not think there is any just cause for complaint on the part of anyone interested in the speedy passage of this bill when a demand is made for information concerning matters upon which Senators are obliged to vote.

My understanding is that whatever changes were made in the bill as it came from the House were made upon consideration of the bill by the majority members of the committee, without any participation in the sittings by the minority members. If the bill had been framed as bills ordinarily are, if those who were advocating the measure had an opportunity to participate in such changes as the committee might recommend, the minority members, or those opposed to the passage of the bill, would be there, and would hear the reasons which were urged for or against the action taken by the committee; but with reference to this bill, that course, as I understand, has not been taken.

Mr. SMOOT. Mr. President, will the Senator yield?

Mr. WALSH of Montana. I yield.

Mr. SMOOT. Does not the Senator know that there never has been a tariff bill prepared in any other way than that followed in this case?

Mr. WALSH of Montana. I am not complaining about that. That is entirely irrelevant to the matter I am presenting. I am saying that if it were so framed, those of us who do not look with a very high degree of favor on the bill would confer with those who were not like us opposed to the measure, and ascertain what reasons, if any, there were for the changes made by the committee, or at least what reasons were urged.

Here is an amendment which is offered by the committee. The House seemed to think that an ad valorem duty of 25 per cent on bismuth was adequate. We all know perfectly well that the gentlemen of the House who framed this bill are in favor of very high protective duties; but that does not seem to be quite satisfactory to the Senate committee, and they fixed the duty at 35 per cent on bismuth, and we are asked now to sustain the committee in increasing this rate, but it seems to me that we may fairly ask what reason is assigned for this, and that we may fairly ask for some information concerning it.

I supposed I knew something about the mining industry in the West, but this is a new one to me. I have before me a late copy of the Mining and Engineering Association Journal, which gives a general review of the mining industry throughout the United States and takes up the specific mineral productions. I do not find bismuth canvassed in it at all. It is not a product of any of the ores of our State. If it is found in the ores at all, it either goes up in slag or goes off in fumes, and no effort is made to save it. It is news to me that there is any product of this ore incidental to the smelting of ores in the State of Utah.

I should like before I vote on this matter, either for the amendment or against the amendment, to have some information about this mineral product. With what ores is it found in combination?

Mr. SMOOT. It is found in lead.

Mr. WALSH of Montana. By what process? We have the leading lead smelter in the world in my home town, Helena. The American Smelting & Refining Co. smelts all the ores that are smelted from the Coeur d'Alene country. The most phenomenal deposit of silver ores in the world is smelted at my home town. We do not produce any bismuth there from those ores. If it is found that we obtain it on analysis, it will be news to me. Of course, in my experience in that country for 30 years I have seen multitudinous chemical analyses of ores, and I do not now recall ever having seen mention even of a trace of bismuth.

Mr. SMOOT. I do not know what the condition is in Montana——

Mr. WALSH of Montana. I was speaking of Idaho as well as of Montana.

Mr. SMOOT. I think the Senator is wrong about Idaho. I do know that bismuth is found in gold ore, it is found in silver ore, it is found in copper ore, and it is found in lead ore. In the State of Utah it is found more in lead ore, though there is a great deal in copper. In western Utah copper we find bismuth sometimes running quite high—that is, higher than in other sections of the State. If the Senator will ask the Geological Survey, they will tell him where it is found in different parts of the United States.

Mr. WALSH of Montana. Yes; I have no doubt of that.

Mr. SMOOT. The report shows that it is found in copper ore, in gold ore, in silver ore, and in lead ore. I will say, as far as the State of Utah is concerned, it is found more in lead ore and in copper ore than in silver or gold.

Mr. WALSH of Montana. I do not undertake to dispute the Senator. His information about the matter may be very much more complete and more exact than mine. I am looking for information about the matter. I would like to know how much is produced in the State of Utah, how it is produced, what the price is, and, if possible, what the relative cost of production is, where the competition comes from, and some facts upon which anyone can form some conclusion as to whether there ought to be any duty put upon bismuth at all, or, if there should be a duty on bismuth, whether it should be 25 per cent or 35 per cent.

Mr. SMOOT. The production of bismuth in the United States from 1912 to 1920 has been as follows:

	Pounds.		Pounds.
1912	122,080	1917	318,187
1913	213,554	1918	266,499
1914	251,481	1919	342,749
1915	316,716	1920	269,834
1916	245,667		

The price of it to-day is running from about $1.90 to $2 a pound. The competition comes from Bolivia, China, and Australia; and in some parts of the world, I think in Bolivia, the highest content in ores runs from 25 per cent up to 70 per cent. In the western country it runs, perhaps, from about 3 to 4 per cent in our lead ores; sometimes in copper ores even a little less than that.

As far as the question of the comparative cost is concerned, the Senator knows there would be a great difference of cost of production between a 25 per cent ore and a 4 per cent ore. He is perfectly familiar with the smelting business, and therefore, if we are going to put this business on any kind of an equality, it seems to me, and also to the committee, that they ought to have a 35 per cent ad valorem rate.

Mr. WALSH of Montana. What amount has been imported?

Mr. SMOOT. I will read the figures as to the importations to the Senator, if he wants them. The imports for the years 1909 to 1920 have been as follows:

	Pounds.		Pounds.
1909	176,720	1915	34,000
1910	200,000	1916	64,000
1911	178,000	1917	88,000
1912	166,000	1918	85,000
1913	151,000	1919	76,000
1914	133,000	1920	72,771

Mr. WALSH of Montana. Then it would appear that under free-trade conditions, with this metal upon the free list, the importations usually ran about 50 per cent of the American production.

Mr. SMOOT. That is about right; sometimes a little more, and now they are less.

Mr. WALSH of Montana. Now it is proposed to have a duty of 35 per cent ad valorem on that product, which the American producer seems able to compete with upon the basis of about two to one. What is the reason for assuming that under those circumstances, when the American producer, under free trade, is able to market twice as much as the foreign producer is able to market in the United States, that it can be produced more cheaply abroad than in the United States? How could that condition exist?

Certainly the Senator will not contend that in foreign countries—Bolivia and Brazil, for instance—they will be able to compete on any more favorable conditions than we in the United States. They are meeting exactly the same conditions there that we are meeting, namely, the cost of mining is increasing all the time.

I must say, Mr. President, that some further explanation seems due for this particular duty than that which has been given to us.

Mr. SMOOT. Mr. President, the Senator knows very well that ore carrying 70 per cent bismuth can be smelted and produced at a great deal smaller price than when it is carrying 3 or 4 per cent. The Senator knows that, of course.

Mr. WALSH of Montana. Of course, there is no doubt in the world that the higher percentage the ore carries, the more cheaply it can be produced.

Mr. SMOOT. The Bolivia ore carries a higher percentage of zinc ores than any other ore.

Mr. WALSH of Montana. That is only one element.

Mr. SMOOT. You would not want any other element if you had 70 per cent bismuth in the ore. With that bringing $2 a pound, I would rather mine it than gold.

Mr. WALSH of Montana. If your ore were solid bismuth you probably would be able to produce it less expensively than if the ore carried only 3 per cent of bismuth.

Mr. SMOOT. If it were solid bismuth it could be mined a great deal cheaper than the 70 per cent, and if it was 70 per cent it could be mined cheaper than the 50 per cent, and if it were 50 per cent it could be mined cheaper than the 40 per cent.

Mr. WALSH of Montana. But we have no such conditions.

Mr. SMOOT. We have not, but the ores run as high as 70 per cent, so our Geological Survey say.

Mr. WALSH of Montana. Mr. President, that does not show anything, either. That does not signify anything at all, as anyone who is familiar with the mining business knows. The rule about that, so far as gold mining is concerned, and as applied to copper, too, for that matter, is that the cheapest kind of mining is the mining of the low-grade ores. The great Utah Consolidated, in the State the Senator so ably represents, is a case in point. The ore there is exceedingly low grade, so low that for years and years it was considered as practically valueless, and a number of developers actually failed through their efforts to make it profitable. But by high engineering skill it has become one of the great copper mines of the world, so that it does not signify anything at all to say that the ores of Bolivia carry a higher percentage of bismuth than the ores of Utah. That is only a very small element of the cost of production.

Mr. SMOOT. The Senator from Montana does not want me to believe anything like that. The Senator knows that there is not any bismuth in the Utah copper ores. They are moving one mountain and putting it into a valley, Mr. President, and during the transfer of that mountain to the valley they are taking out copper ore. It is not mined by hand at all; it is handled by steam shovels, and the Senator knows that the ore in Bolivia carrying bismuth is not mined by steam shovels.

Mr. WALSH of Montana. That is what I was trying to explain, that the bare fact that the compounds of Bolivia carry a higher percentage of bismuth than do the ores of Utah does not show that they can not mine bismuth in Utah just as cheaply as they can in Bolivia.

Mr. SMOOT. The Senator knows there is not a pound of ore carrying bismuth that is mined in Utah or anywhere else that I know anything about in the world that is mined with a steam shovel. They mine the same way in Bolivia that they do in Utah or any other place.

Mr. WALSH of Montana. I pleaded my ignorance at the outset. I do not know that.

Mr. SMOOT. I know it, and I will say to the Senator that is the fact.

Mr. WALSH of Montana. Of course, I do not know from just what kind of veins the bismuth smelted in Utah comes.

Mr. SMOOT. The Senator knows we are not mining gold with steam shovels.

Mr. WALSH of Montana. We did in Montana.

Mr. SMOOT. Ah, that was a dredge. They never used a steam shovel.

Mr. WALSH of Montana. No. We do our gold mining in glory holes in Montana. However, I seem to have all the information the Senator from Utah has in the matter.

Mr. UNDERWOOD. Mr. President, I desire to present a few comments to the Senate, not because I think the item before the Senate is a very important item, however. I think the

last statistics I have show that the production of bismuth in this country for 1919 was 502,300 pounds, valued at $1,235,500. That may seem to be small, small in commerce, small in industry, but it is not small in principle. There is either a right principle or a wrong principle about this matter.

The only reason I have to discuss it at all is not in regard to the item itself but because I think this item is illustrative in a very clear way of the difference in the principle on which the two great parties of the country levy their taxes at the customhouse. Of course, in one way it is of importance. All manufactured bismuth—not the metal compounds from which it is made but the manufactured bismuth, the item under dispute—is a medicine. It is sold as a medicinal preparation.

Even if I were a protectionist and believed in the doctrine of protection as my friends on the other side of the aisle believe in protection, it seems to me there are some places where I would draw the line of levying taxes for the purpose of producing money for industry. I think I would draw the line at fertilizers, which are necessary to produce cheap food. I think I would draw the line so far as practicable when I entered the domain of medicine, something that the rich and the poor alike must have, something for which the rich and the poor must pay the same price.

What do we find in reference to this particular item? It is not important in reference to the number of pounds produced, not important in the value of the product in this country, but only of great importance because the American people have to use it as a medicine. There may be differences on that score.

Mr. SMOOT. They had to use alcohol.

Mr. UNDERWOOD. The Senator from Utah says they had to use alcohol, but certainly bismuth is not to be excluded from use as a medicine on the same ground on which the Senator would include alcohol.

Analyze the situation. Analyze what is being done. In the past the compound of bismuth, the medicine that we have under consideration, bore a tax of 10 per cent, a tax that produced some revenue to the Government of the United States as a revenue producer. It was one of those little items which, dropped into a tariff bill where not a very excessive rate was levied, gathered in some revenue. It had been carried in the tariff laws of the past, in Republican tariff laws as a rule at 15 per cent ad valorem and in Democratic tariff laws at 10 per cent ad valorem. Now we find, when the present bill is written, that the tax on this medical compound is increased from the present rate of 10 per cent to 25 per cent ad valorem. In other words, if the whole industry responds to the tax at the customhouse, and that is the way our protectionist friends levy the tax in order to make it respond, then when the man who needs this preparation presents his doctor's prescription at the counter he is to be met with a tax of 25 per cent so far as the bismuth is concerned. It is true there may be water in the compound.

Mr. SMOOT. A thousand per cent profit, no doubt.

Mr. UNDERWOOD. The Senator from Utah says a thousand per cent of water in the compound. That is some exaggeration.

Mr. SMOOT. No; I said a thousand per cent profit on the prescription. That is about the way it runs.

Mr. UNDERWOOD. That is probably true, and that is all the more reason why you should not add to that profit a tax.

Mr. SMOOT. It does not make a particle of difference in the retail price.

Mr. UNDERWOOD. If the retailer can make 1,000 per cent, then it goes without saying that the wholesaler has a market for the product on which he can realize.

We ask why the bill increases the tax, and we are told the reason for it is that metallic bismuth, a compound which in this country is a by-product of mining lead, copper, silver, and gold, a refuse matter that has to be thrown off to purify the metals, has been taxed at the customhouse 7½ per cent by this committee. A tax of 7½ per cent has been levied on metallic bismuth at the customhouse, and metallic bismuth is the raw material of the article that is now under discussion—compounds of bismuth for medicinal purposes.

Why should that happen? Metallic bismuth for many years past has been on the free list. It has been untaxed. There is not much coming into this country. I listened to what the Senator from Utah said awhile ago and my information about it is that in metallic bismuth the imports amounted to about one-third of the American production.

Mr. SMOOT. From over 50 per cent down to one-third.

Mr. UNDERWOOD. But at one time less than that, though it is one-third now according to the last figures given. The war did not have much to do with this importation, because, if I am informed correctly, practically all of it came from South America, which was not affected by war conditions. Metallic bismuth has been on the free list during the life of the present law, and if I recollect right it was on the free list under the Payne-Aldrich law. Am I correct about that, may I ask the Senator from Utah?

Mr. SMOOT. The Senator is correct.

Mr. UNDERWOOD. That is my recollection. So that for 15 years, and it may be longer, metallic bismuth has been on the free list. It has not destroyed any industry. It could not destroy the industry, because in this country the product is only gathered as a by-product. Men were going on to mine silver, gold, lead, zinc, and copper, and they had to throw the bismuth out as they would throw the slag out of the iron ore to make a ton of pig iron. There is nothing here to show that the entire production of metallic bismuth was not consumed in the American market. We imported about one-third of all we consumed.

But a new era faces the American people, not growing out of war conditions in Europe, not growing out of war prices, not growing out of the protection of labor, but growing out of the new principle that is about to be established in these United States of protecting profits—protecting the profits of the producers of lead, copper, silver, and gold in the far western mines and their by-products of metallic bismuth, allowing them to raise the price a little higher in order that they can put a little more money in their pockets. That is the reason why this tax is levied.

In the past there have been a number of importations; but it is a small commodity, and if this tax is to be levied for revenue we could not greatly increase it without driving the commodity out of the market, because the imports of the commodity coming into the United States have to stand the high transportation rates into the United States, both by sea and land, to reach the ultimate market of its consumption.

But it is clear that the committee brought in the bill, as I said, not for the purpose of protecting American labor in the industry, because the labor is engaged mostly in the smelting of gold, silver, lead, zinc, and copper. This is merely a refuse which that labor throws off. It is not for the purpose of preventing this industry from being driven out of business, because, admittedly, for 15 or 16 years there has been absolute free trade in the commodity, and yet two-thirds of it continues to be made in the United States.

If you are to levy a tax, you have to let something come through. This is not depriving the American manufacturer or producer of any American market. Admittedly, he has two-thirds of the market for metallic bismuth. But in order that he may possibly have it all, in order that he may possibly be able to put up his price 7½ per cent on metallic bismuth, the Committee on Finance has reached the conclusion that it will be necessary to raise the tax on the finished product of bismuth, which is used for medicinal purposes, from 10 to 25 per cent. I know that the committee in estimating the duty on the finished product usually multiplies by two. The difference between 10 and 25 per cent is 15 per cent, and the tax on the raw material, metallic bismuth, is 7½ per cent, showing that in the estimation of the committee they expect the levying of this tax at the customhouse to put up the price of metallic bismuth 7½ per cent a pound, because they take care of the purchaser of the raw material by giving him an additional duty of 15 per cent of the value of his product.

That is an illustration of the way tariff bills are framed by the party on the other side of the aisle. This tax is admittedly not to protect labor, because the tariff duty has not increased production, and an additional duty will not increase production; admittedly it is not for the development of home production in America, but is solely for the purpose—and it can not be for any other purpose—of protecting the profits of the producer of metallic bismuth in the hands of the smelters of the West. It is proposed to levy an additional tax on the medicine of the people of 15 per cent ad valorem.

Mr. SMOOT. The tax is 7½ per cent ad valorem.

Mr. UNDERWOOD. A duty of 7½ per cent on metallic acid is proposed to be levied, but the duty on medicinal bismuth has been increased from 10 to 25 per cent, which is an increased tax on the bismuth that the American people must consume as medicine of 15 cents on every dollar's worth they buy. That will not be very great; probably it is not enough to break even a very poor man. I am not contending that this is a very serious item. I am only saying that it is illustrative of the methods pursued by the party on the other side of the aisle. As to the very poorest man who carries a prescription to the drug store and has to pay a dollar for having it filled in order to protect the life of his family, the tax that he has to pay of 15 per cent more will not destroy him; but is it just that such a tax should be levied, not for the use of the Government but to increase the profits of the manufacturer not merely in his prin-

cipal line of business but on a by-product which he would otherwise have to discard and on which he is trying to make some additional profit? That is what is proposed in this case. There is the issue.

The party to which I belong is often charged with being a free-trade party. Mr President, so far as I know, from the beginning of the Government the Democratic Party has never abandoned the system of raising taxes at the customhouse. There are absolute free traders in the Democratic Party; sometimes I have known a few free traders in the Republican Party who have voted for that party for other reasons; but the Democratic Party believes that the tax levied at the customhouse should be levied for revenue purposes only; that the customhouse is a place where revenue may be obtained to run the Government; that it is a convenient way of raising a certain amount of revenue; and that if a revenue tax be levied at the customhouse in such a way that it does not unduly dam back competition from abroad, and the person who pays the tax really pays it to the Government, it is a reasonable way to raise taxes. When, however, a tax is levied so high that very few imports come in—and if imports do not pass the customhouse door they leave no taxes behind them—the result accomplished is merely that of raising the price, which goes into the pockets of the home producer.

The effect of protective tariff laws has been to tax the great mass of the American people and to swell the profits of a few. I often hear the ideas of socialism and communism condemned; such condemnation often comes from the other side of the Chamber. I do not believe in socialism or in communism myself, but it is discrimination on the part of the Government against the masses of the people for the benefit of the few that sows the seed from which the tree of socialism and communism has grown in this country. Discontent can not be brought about by unjust laws without reflecting on the whole system of Government.

This is a very small item; but there is no reason for the increased tax on metallic bismuth, which compels an increased tax of 15 per cent on the medical compound, except the greed of monopoly. That suggestion is illustrated not merely by one but by hundreds of items in this bill.

Senators on the other side complain that we are filibustering. We are not. There may be delays involved in the consideration of the bill, and I realize that they are very trying to the Senators who have charge of the bill and have to put it through; but the Republicans command a majority in the Senate; they have the right to reflect their viewpoint into the laws of the country, because the mandate of the American people gave them that power. But we as a minority also have a duty to perform, and a very imperative duty, and that is, if we think the majority are going wrong, to criticize them and let the American people know the situation. This bill is going to stay before the Senate until a sufficient number of speeches have been made, such as the one I am now making, pointing out wherein we think the majority are wrong in levying protective rates for the benefit of a few producers and imposing unnecessary burdens on the backs of millions of people, to make plain to the American people in a manner which they may understand, what is being done here. Then, when we have accomplished that result, when we have presented our case to the American people so they may understand what the majority party is doing, the party in control of the Senate will have a full and free opportunity to vote, and they can go to the American people in the fall elections and the American people may then be the judge. If I am not mistaken, if the majority go to the country on this bill, as they must if they pass it, the people will repudiate them, as they repudiated the Republican Party after the enactment of the Payne-Aldrich bill. And they should repudiate the Republican Party ten times over, because this bill is infinitely more objectionable than the Payne-Aldrich bill ever was in the rates which are levied in favor of the special interests and monopoly, and in the increased burdens which it attempts to place on the backs of the American people.

Mr. SMOOT. Mr. President, I do not want the Senator from Alabama to think that I have in any way charged him with filibustering. The Senator from Alabama has never done that since I have been in public life, and I never expect him to do it. When the Senator from Alabama discusses a question he does so in a fair, frank way; what he says, he means; what he says, he believes with all his heart. No one has ever been heard to criticize the Senator from Alabama, or even to intimate that he ever filibustered upon any kind of a bill. I desire to say that much for the Senator from Alabama.

Now, Mr. President, tears have almost been shed here at the thought of people being taxed on bismuth used as a medicine. It has been stated that in every prescription which is taken to a drug store to be filled will be found a reflex of this duty. Let us see how this works out. Bismuth is worth $2 a pound; a duty of 7½ per cent is equivalent to 15 cents a pound. Suppose there is 1 grain of bismuth in a prescription for which the purchaser pays 75 cents, although the cost of the entire prescription is not to exceed 10 cents. In other words, the purchaser is charged 75 cents for a prescription which costs 10 cents. Of that 10 cents, Mr. President, if it were made up entirely of the cost of the bismuth content, the duty proposed could not exceed one-thirteenth of 1 cent.

Does anyone believe that because of an increase of one-thirteenth of 1 cent in the cost of a prescription on which the druggist is making 750 per cent, representing the difference between 10 cents and 75 cents, the charge for the prescription is going to be 75 cents and one-thirteenth of a cent additional.

Mr. FLETCHER. The charge might be 80 cents.

Mr. SMOOT. No; the drug store would not charge 80 cents, as the Senator from Florida suggests, because it charges all it dares to charge now. So let us wipe off those tears for the person who is compelled to secure a prescription in which bismuth is an ingredient. What I have said concerning bismuth applies equally to nearly every other medicinal commodity that enters into prescriptions. We need shed no tears over the profits which will be made by the druggist, because he is making all he can to-day, particularly in the compounding of prescriptions.

Mr. FLETCHER. Mr. President——

The PRESIDING OFFICER (Mr. SUTHERLAND in the chair). Does the Senator from Utah yield to the Senator from Florida?

Mr. SMOOT. I was going to yield the floor, because I do not want to take any more of the time of the Senate.

Mr. FLETCHER. I was going to suggest that another important use for bismuth—perhaps the Senator is not so much interested in that as some other people may be—is in connection with cosmetics. What I can not understand is that in the act of 1909 the duty was 25 per cent ad valorem, and in the act of 1913 the duty was 10 per cent ad valorem. The House proposed a duty of 25 per cent ad valorem in this bill.

Mr. SMOOT. That is on the American valuation.

Mr. FLETCHER. The committee now proposes to make that 35 per cent ad valorem—in other words, a 25 per cent ad valorem increase over the duty of 1913—and the statistics show that the imports during 1914 amounted to 588 pounds, most of which came from Germany. The exports are not given, but under the duty of 10 per cent there were only 588 pounds brought into the country, and now you propose to make the duty of 35 per cent.

What is the object? You can not expect any revenue from it; that is certain. Then you must be levying this duty simply to benefit the people who are manufacturing the bismuth and to guarantee them a certain amount of profit.

Mr. SMOOT. The Senator is not speaking of metallic bismuth. The Senator is speaking of the salts of bismuth.

Mr. FLETCHER. Yes; I am speaking of this item in paragraph 20. You propose to change that.

Mr. SMOOT. That is the salts.

Mr. FLETCHER. Yes; mixtures of bismuth.

Mr. SMOOT. Yes. On the salts the House did have a duty of 25 per cent, but it was on the American valuation. The Senate say here that they will not increase the rates of duty of the House because of the fact of foreign valuation; but a duty of 7½ per cent was put upon metallic bismuth, and that is the reason why the Senate committee increased this rate of 25 per cent; and even now it is lower than the House, with free bismuth.

Mr. FLETCHER. Yes; but I am speaking of the act of 1913, where the rate was only 10 per cent ad valorem, and under that act only 588 pounds came in.

Mr. SMOOT. Yes. The Senator very likely voted for that duty, but at that time they had free metallic bismuth.

The PRESIDING OFFICER. The amendment will be stated.

The READING CLERK. On page 7, line 6, it is proposed to strike out the word "preparations" and the comma, and to insert the word "mixtures."

Mr. JONES of New Mexico. Mr. President——

Mr. UNDERWOOD. Mr. President, if the Senator before he starts in will allow me to say just one word, I have listened with much interest to what my friend from Utah has said with reference to the use of these compounds. Of course I realize that the ordinary drug store makes a pretty big profit, but it is based to a certain extent and a large extent on the cost of the medicine that comes into the shop. The Senator overlooks the fact that there is a great increase in the consumption of bismuth. It is almost necessary nowadays for all X-rays. For instance, if there is some doubt about whether a patient has an ulcer in the stomach, his intestines are pumped full of a

bismuth compound before the X-ray is applied. It is almost necessary to the life of the American people.

I said in the beginning that this was not a big item. I said that it was not going to break anybody. The only defense the Senator from Utah makes is that he says the American people will not have to pay the tax; that it will stop somewhere else. Some American person is going to pay the tax, because you are levying it; and what I say is this: I will talk about other items where the amount of the levy will be very much greater, where the burden on the American people will be very much greater, but if I talked about only one item in this bill what I said would be lost. If I am to make a speech that is going to impress the American people as to the adverse effect of this bill upon them, as I think it will be, from time to time I shall have to talk about a number of items.

I am not trying to delay the bill, but when I see a pertinent item I intend to call it to the attention of the Senate, hoping that my voice may go farther than the walls of the Senate Chamber, and this is just one. This is a very, very infinitesimal item; but, as I said in the beginning, the principle is here. The principle is absolutely clear—it rings like a bell—that the only purpose of increasing this tax is to levy it in the interest of some particular favored person, and let the rest of the people of the United States pay it.

Mr. SMOOT. Mr. President, I think the Senator is wrong in stating that this material is used in connection with the taking of X-ray photographs.

Mr. UNDERWOOD. That is my information.

Mr. SMOOT. Barium sulphate is used for that purpose.

Mr. UNDERWOOD. Also bismuth. It is a metallic substance. They have to use a metallic substance, and this is a metallic substance, and therefore they use it.

Mr. SMOOT. It may be possible, but I have never known it. I do know that they use barium sulphate for that purpose.

Mr. UNDERWOOD. Oh, I do not say this is the only thing they use, but this is one of the things they use largely.

Mr. JONES of New Mexico. Mr. President, I believe it will be enlightening for me to undertake to give some information. The information which the Senator from Utah gave did not appear to be very satisfactory, at least to me; but there is some evidence in this record which I think will clarify the situation, and, as briefly as possible, I want to call attention to it.

In the first place, I refer to the so-called Reynolds report.

Mr. SMOOT. What page?

Mr. JONES of New Mexico. Page 5. Senators will remember that a commission was appointed at considerable expense last fall to go out and ascertain the prices of these various commodities and get the comparative prices of domestic products and comparable imported products on all the items in the bill where an ad valorem duty was imposed. That commission went out, and they took up the subject of these compounds of bismuth, and they failed to find any of the imported product. They give the price here of the domestic product at $2 and $2.10 a pound, but they found no imported compounds of bismuth in the American market.

Bismuth has been on the free list under the Payne-Aldrich bill and under existing law; and, so far as I am advised, this is the first time in the history of our country when a duty has been imposed upon it, when a tax has been levied upon it which will be reflected in prices to the consumer.

There is some very enlightening testimony here. No doubt the Senator from Utah had this in his hand when he made his statement in response to my first query regarding the purposes of this item in the bill. I am going to read it, and I am going to read it all.

There are less than two pages of it. It comes from a very distinguished gentleman. I am satisfied that he is a truthful man. I am satisfied that he knew what he was talking about. He is known, perhaps, to every adult citizen of the United States. Therefore, what he says should carry great weight. It is the only testimony, so far as I know, which was submitted to the committee. Just when it was submitted I do not remember, but there are some earmarks here indicating that the figures which were presented were rather stale at the time they were presented. Nevertheless, we can get a good picture of just what this situation is.

I read the statement of William Loeb, jr., vice president of the American Smelting & Refining Co., New York City. Mr. Loeb said:

> Mr. Chairman and gentlemen of the committee, I appear before you this afternoon as spokesman for the producers of bismuth metal. It is free under paragraph 1523 of the House bill.
>
> The production of this metal in the United States in the year 1920 was 269,834 pounds. The imports were 72,771 pounds.

Mark you, without any duty, with a free opportunity to import, the importations in 1920 were 72,771 pounds, and the American production was 269,834 pounds.

Continuing:

> Direct comparison of present consumption in the United States is shown by figures which I am going to submit, with the exception that during the war smaller importations of bismuth were directly due to the consumption abroad for war purposes, and there seems to be no reason why importations should not again increase to pre-war figures.
>
> I have set forth in a table the production in the United States and the imports into the United States from 1912 to 1920, inclusive.

I call attention to the fact that the pre-war figures were just about twice what they were in 1920, according to Mr. Loeb's statement. He gives these figures of the United States production from 1912 down to and including 1920. He gives the importations from 1909 down to and including 1920, and I shall call attention to those figures a little later.

> Senator SMOOT. Those figures will be put in the record?
>
> Mr. LOEB. Yes; I can put them in the record.
>
> The United States producers are the American Smelting & Refining Co. and the United States Smelting, Refining & Mining Co. Those two concerns produce all the bismuth produced in this country and they can produce all that the United States consumes.

Referring again to the report of the Tariff Commission, these two concerns operate only in Utah, and evidently, while their names are a little different, it must be apparent that the same parties are interested in the two concerns. I may be mistaken about that; I am merely assuming it.

Mr. SMOOT. The Senator is wrong.

Mr. JONES of New Mexico. If I am wrong I am glad to have the Senator correct me. I have no doubt, however, that their business associations are very congenial.

Mr. SMOOT. I will say to the Senator that if they were congenial they would charge us a great deal more for smelting than they are charging. There is a fight there, and that is the only reason why we get a fair price.

Mr. JONES of New Mexico. It is a little interesting to me, to say the least, that one of them is called the American Smelting & Refining Co. and the other is called the United States Smelting, Refining & Mining Co.

Mr. SMOOT. It is because they have smelters in other parts of America.

Mr. JONES of New Mexico. Let that go; they are two organizations.

Mr. SMOOT. I do not know whether the Senator knows it or not, but the American Smelting & Refining Co. have smelters from New Jersey to California. I do not know where the United States Smelting Co. have their smelters, but all their smelters are not in Utah.

Mr. JONES of New Mexico. I am seeking to get information on the subject.

Mr. SMOOT. Then there is the International Smelting Co.

Mr. JONES of New Mexico. I read further from this statement of Mr. Loeb:

> As bismuth is produced in the United States entirely as a by-product, the cost of production depends upon the percentage of each operation which is charged against bismuth as compared with the other products recovered from the smelting operations. The cost of production can, therefore, only be stated approximately, as each company's figures are influenced by their accounting methods.

That is all that has been said regarding the cost of production, and the statement is necessarily true as to the cost of production of every by-product. Where you have different articles being produced by the same process, practically, it is, as Mr. Loeb says, just a matter of accounting as to how much you shall charge up as the cost of the by-product. It is a mere matter of accounting. You can not tell what it costs. It is just whatever the accountant sees fit to charge up against it in his books. Then he proceeds:

> The highest cost of production for the year 1920 was $2.14 per pound.

Of course, he does not tell us where he got that cost, whether that is the way his bookkeeper figured it at that time, or whether his bookkeeper would have been justified in figuring it some other way. He does not tell us whether that is a reasonable charge against that or not. He does not tell us how his smelters were operating in 1920. I do not know whether those smelters were busy throughout the year 1920 or not. I do not know what the overhead was that year. I do not know what the other output was, but according to his own statement, you can not tell what his costs are.

He proceeds, however, to make a very optimistic statement. He said:

> It is believed that this cost of production will be materially lowered during the latter part of 1921 and thereafter, and it is hoped to get the cost of production down to approximately $1 per pound.

That is where they hope to get it, and I wonder where the hope comes from. There can be only one source from which it comes, and that is his previous experience. Judging by his previous experience, a fair charge against this item as cost should be limited to a dollar a pound. He continues:

> The cost of production fixed by accounting in such an operation is always below the entire production cost from raw ore to finished metal.

That means that in this production, where you are charging up costs against by-products, you always charge up a less cost to a by-product than where you are making your business the production of the article as a primary product, a chief product.

So it is when you find a concern which is smelting ores for the primary purpose of getting by-products, according to its own statement, the cost must figure greater in such cases than where it is a mere by-product. I proceed with the reading:

This cost is in reality the necessary cost of the last operation of recovery. This is shown by the fact that where the price of the metal falls below the fixed production cost the smelters cease recovery of the metal, preferring to eliminate this item of cost even at the expense of loss of the metal.

Mr. SMOOT. That is what I stated.

Mr. JONES of New Mexico. That means that by their accounting system they can fix the point arbitrarily below which they will not proceed further.

Mr. SMOOT. The Senator is mistaken.

Mr. JONES of New Mexico. What I have read about the cost of the by-products becomes significant in connection with the paragraph which I am going to read now:

The cost of foreign production is unknown, but must be low due to the working of high-grade bismuth ores containing from 25 per cent to 70 per cent bismuth.

That is a little inconsistent with the statement which he had just previously made, that the high cost must come where the production of the commodity is the principal object of the action, but now he says that the cost must be relatively low because of the high percentage of bismuth which is recovered from the smelting of the ores in England. But I proceed—

These high-grade ores are found in Bolivia, China, and Australia, and are smelted in England.

Now we have that situation. England sends out to these different parts of the world for the ore, which only furnishes from 35 to 70 per cent of the metal they are trying to get. They must pay freight for bringing that ore from Bolivia, and from Bolivia to the coast they must pass over the mountains. The cost of transportation is high. The shipping cost from Bolivia to England all must be paid not only upon the metal but upon the ore. He says further:

When these figures were made up the market price was from $1.35 to $1.40 per pound. With the present high rate of exchange the price is about $1.55 to $1.60 per pound.

From that we can judge that when these figures were made up, when the English pound sterling had reached such a low level of value measured in gold, must have been back about 18 months ago, or two years ago, perhaps, in 1920, and these are the latest statistics which we have; but at that the bismuth was selling at $1.55 to $1.60 a pound. That is what they were getting for it. The wholesale price, according to the Reynolds report, was $2 to $2.10 a pound last August. I read further:

In view of the fact that bismuth is produced as a by-product only and is contained in substantial quantities in various lead ores, it is believed that the United States should conserve its raw-material assets by encouraging its smelters to recover this valuable by-product.

Of course, nobody likes to see waste in the world, but so far as the United States is concerned, I would like to know where the waste would be if the other commodity should be brought in here and sold to us cheaper than we can get it at home. As to the mere question of economic waste in the United States, Mr. Loeb is mistaken, in my judgment. He said:

There is every reason to believe that the domestic production can be increased to take care of the domestic consumption.

Not to provide protection which will assure the saving of this metal is to cause a triple economic loss: First, the loss to the industry; second, the loss to the Government in revenue; and, third, the irreplaceable loss of the metal itself.

I think we all agree that he is quite wise in enumerating those reasons in the order of their importance, and in stating that the important reason was the first—the loss to the industry. That is what he was looking after. That was the important feature—his loss, the loss to the industry, and, second, the loss to the Government in revenue. I agree with him that in this bill that is a secondary consideration.

Third. The irreplaceable loss of the metal itself.

So there it falls by the wayside as an important matter for consideration. That is the least important, this question of the waste. The next in importance is the loss of revenue to the Government, but the first consideration is the loss to the industry in which he is interested. He said further:

We ask for a specific duty of 25 cents per pound on refined bismuth metal in order to protect the American producers against the foreign low-cost producers. Bismuth salts and preparations are dutiable at 25 per cent ad valorem against former protection of 10 per cent ad valorem. We suggest that the duty on bismuth salts and other preparations be changed to 20 cents per pound, plus 25 per cent ad valorem, from the fact that 0.8 of a pound of bismuth is used in manufacturing 1 pound of the usual bismuth salt; hence, 0.8 of 25 cents per pound would be 20 cents per pound additional protection for 1 pound of bismuth salts.

Then he gives the list of the United States production for those years, and the imports, which I ask may be inserted in the RECORD as a part of my remarks without reading.

The PRESIDING OFFICER. Without objection, it is so ordered.

The table is as follows:

United States production.

	Pounds.		Pounds.
1912	122,080	1918	266,499
1913	213,554	1919	342,749
1914	251,481	1920	269,834
1915	316,716		
1916	245,667	Total	2,346,767
1917	318,187		

Imports.

	Pounds.		Pounds.
1909	176,729	1916	64,000
1910	200,000	1917	88,000
1911	178,000	1918	85,000
1912	166,000	1919	76,000
1913	151,000	1920	72,771
1914	133,000		
1915	34,000	Total	1,424,500

Mr. JONES of New Mexico. Now, I want to apply that information to what the committee has done. It decided to put a duty of 7½ per cent upon the metallic bismuth. The production of bismuth during 1920 was 269,834 pounds. At $1.60 a pound, 7½ per cent would be 12 cents for each pound of production. Remember, there are only 2 concerns producing this bismuth. It is produced as a by-product, and this means a gift to them of 12 cents a pound upon that product.

Now, let us see what the committee has done for those who make compounds of bismuth. It increased the duty. The House has a rate of 25 per cent upon compounds of bismuth. The price of that in the market is $2 per pound. Now, what does the committee do? It raises the rate of duty from 25 to 35 per cent, a difference of 10 per cent, as compensatory duty for the 7½ per cent levied upon bismuth, far greater than any compensation which would be necessary if it gave them the benefit of the whole duty levied upon the metallic bismuth. Bismuth at the present time is on the free list.

Mr. SMOOT. Mr. President, the Senator surely wants to be correct, but I do not know that it is worth while even for me to interrupt. When Mr. Loeb testified, it was on the basis of the American valuation of 25 per cent and he expected 10 per cent to be added to the American valuation. The committee did not add it. The committee changed it to the foreign valuation and only increased it 10 per cent. The Senator knows what that meant. If the Senator says Mr. Loeb is an honorable gentleman, and everybody in the United States knew him, and he wants to take his testimony in the case and abide by it, I think the Senator ought to know that that is the situation. That is what Mr. Loeb expected at the time, as almost all those who testified before the committee expected. When the Senator says this is an increase over what he asked, he knows there is a decrease as a matter of fact.

Mr. JONES of New Mexico. I would like further to understand what the Senator from Utah is trying to make out of his suggestion. All that I was seeking to make out of it was the disparity between the two rates. Whether the two rates are based upon one valuation or the other, the relative difference would remain the same. So, as I take it, it makes no difference, only if you put it upon the American valuation the relative difference would be much greater, so it would be worse under the American valuation plan.

Mr. SMOOT. The Senator's figures should just be reversed.

Mr. JONES of New Mexico. Not at all.

Mr. SMOOT. Oh, yes; they should.

Mr. McCUMBER. Mr. President, will the Senator yield to me that I may make a request?

Mr. JONES of New Mexico. Certainly.

Mr. McCUMBER. I ask unanimous consent that when we close our session for to-day we shall take a recess until to-morrow at 11 o'clock?

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. McKELLAR. May I ask the Senator if we are going to have any other vote to-night? We have been in session now over 11 hours and it seems to me——

Mr. McCUMBER. I hope we shall have a vote on this item to-night. Then I shall be ready to move to take a recess.

Mr. JONES of New Mexico. Mr. President, I believe that is all I have to say. I think it now appears in the RECORD just what this means. If Senators with this information before them desire to raise these rates, I want them to take that responsibility with full knowledge. I do not want any Senator to be able to say hereafter that he merely accepted whatever the committee suggested, that he had to rely upon the committee

because he did not have the information himself. I have taken this course to-night deliberately for that purpose and for that purpose only. I want to put the responsibility where it belongs, and I do not want Senators to hide behind the cloak of a committee. I want them to understand just the thing which they are voting when they vote on this item.

This particular item is based upon taking from the free list an article which is used as medicine and imposing a higher duty upon the compound because of this new duty, this new tariff upon metallic bismuth, which has been free in all of the past history of the country. Here is something new. No one has suggested before that this mere by-product of a smelter in Salt Lake City, Utah, which now demands for the first time a tax upon this medicine, should be taken off the free list. I want Senators to vote knowingly, so that each individual must take his individual responsibility. It amounts simply to a gift to two smelting companies of the country. It will not bring any more revenue, because by doing this they undertake to shut out the product. If they do not shut it out, how have they been benefited? On the basis of the present importations, it would amount to a revenue of $7,000 a year, but gives to these two smelting companies $27,000 a year. That is what it amounts to.

Mr. President, with these few remarks I am ready to take a vote.

Mr. McCUMBER. The first vote, I assume, is upon the question of striking out the word "preparations" and inserting in lieu thereof the word "mixtures." I suppose there is no objection to that amendment.

Mr. JONES of New Mexico. On that question the Senator from North Dakota is quite right. There is no reason why a request for the yeas and nays should be made there.

Mr. KING. The Senator from New Mexico accepts that pro forma?

Mr. JONES of New Mexico. Yes; I accept it pro forma. The next amendment is where the change is made from 25 to 35 per cent, and I think I shall move to insert, instead of 25 per cent——

The PRESIDING OFFICER. We have not reached that yet. The question is first upon the committee amendment striking out the word "preparations" and inserting in lieu thereof the word "mixtures."

The amendment was agreed to.

The READING CLERK. The next amendment is on page 7, line 7, to strike out 25 and insert 35 before the words "per centum," so as to make the paragraph read:

Chemical compounds, salts and mixtures of bismuth, 35 per centum ad valorem.

Mr. JONES of New Mexico. Mr. President, I think that I shall not offer any substitute, but shall vote against the increase from 25 to 35 per cent. It is true the House put in 25 per cent in view of what it thought would be the American valuation plan, but it just happens that the 25 per cent on the foreign valuation basis is the present duty upon that product. So I shall content myself with voting against the Senate committee amendment.

Upon the amendment, however, I ask for the yeas and nays.

The yeas and nays were ordered, and the reading clerk proceeded to call the roll.

Mr. FRELINGHUYSEN (when his name was called). I transfer my pair with the Senator from Montana [Mr. WALSH] to the junior Senator from Oregon [Mr. STANFIELD] and vote "yea."

Mr. HARRISON (when his name was called). I transfer my general pair with the Senator from West Virginia [Mr. ELKINS] to the junior Senator from Rhode Island [Mr. GERRY] and vote "nay."

Mr. KELLOGG (when his name was called). I transfer my pair with the Senator from North Carolina [Mr. SIMMONS] to the junior Senator from Delaware [Mr. DU PONT] and vote "yea."

Mr. McKELLAR (when his name was called). Making the same announcement as before with reference to my pair and transfer, I vote "nay."

Mr. McKINLEY (when his name was called). Making the same announcement as before regarding my pair and its transfer, I vote "yea."

Mr. MYERS (when his name was called). I have a pair with the Senator from Connecticut [Mr. McLEAN]. I transfer that pair to the Senator from Ohio [Mr. POMERENE] and vote "nay."

Mr. WARREN (when his name was called). I transfer my general pair with the junior Senator from North Carolina [Mr. OVERMAN] to the junior Senator from Pennsylvania [Mr. PEPPER] and vote "yea."

Mr. WATSON of Indiana (when his name was called). Making the same announcement as hitherto concerning my pair and its transfer, I vote "yea."

The roll call was concluded.

Mr. CURTIS (after having voted in the affirmative). I have a pair on this vote with the Senator from Wisconsin [Mr. LA FOLLETTE]. If he were present, he would vote "nay." If I were at liberty to vote, I would vote "yea." Being unable to obtain a transfer, I withdraw my vote, but desire to be counted for a quorum.

I announce the following pairs:

The Senator from Arizona [Mr. CAMERON] with the Senator from Georgia [Mr. WATSON];

The Senator from Rhode Island [Mr. COLT] with the Senator from Florida [Mr. TRAMMELL];

The Senator from South Dakota [Mr. STERLING] with the Senator from South Carolina [Mr. SMITH];

The Senator from New Jersey [Mr. EDGE] with the Senator from Oklahoma [Mr. OWEN]; and

The Senator from Vermont [Mr. DILLINGHAM] with the Senator from Virginia [Mr. GLASS].

Mr. UNDERWOOD (after having voted in the negative). I understand that the senior Senator from Massachusetts [Mr. LODGE], with whom I have a general pair, has not voted. I transfer that pair to the senior Senator from Nevada [Mr. PITTMAN] and allow my vote to stand.

Mr. STANLEY. I have a general pair with the junior Senator from Kentucky [Mr. ERNST]. I transfer that pair to the senior Senator from Texas [Mr. CULBERSON] and vote "nay."

Mr. JONES of New Mexico (after having voted in the negative). I desire to make the announcement as to my pair and its transfer which I have previously made this evening and allow my vote to stand.

The result was announced—yeas 33, nays 16, not voting 47, as follows:

YEAS—33.

Ball	Jones, Wash.	Newberry	Sutherland
Brandegee	Kellogg	Norbeck	Townsend
Broussard	Kendrick	Oddie	Wadsworth
Calder	Keyes	Page	Warren
Capper	Lenroot	Phipps	Watson, Ind.
France	McCormick	Rawson	Willis
Frelinghuysen	McCumber	Shortridge	
Gooding	McKinley	Smoot	
Hale	McNary	Spencer	

NAYS—16.

Ashurst	Harrison	King	Sheppard
Dial	Heflin	McKellar	Stanley
Fletcher	Hitchcock	Myers	Swanson
Harris	Jones, N. Mex.	Robinson	Underwood

NOT VOTING—47.

Borah	Elkins	Nelson	Shields
Bursum	Ernst	New	Simmons
Cameron	Fernald	Nicholson	Smith
Caraway	Gerry	Norris	Stanfield
Colt	Glass	Overman	Sterling
Crow	Harreld	Owen	Trammell
Culberson	Johnson	Pepper	Walsh, Mass.
Cummins	Ladd	Pittman	Walsh, Mont.
Curtis	La Follette	Poindexter	Watson, Ga.
Dillingham	Lodge	Pomerene	Weller
du Pont	McLean	Ransdell	Williams
Edge	Moses	Reed	

So the committee amendment was agreed to.

EXECUTIVE SESSION.

Mr. McCUMBER. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to the consideration of executive business. After five minutes spent in executive session, the doors were reopened; and (at 10 o'clock and 25 minutes p. m.) the Senate, under the order previously made, took a recess until to-morrow, Friday, May 12, 1922, at 11 o'clock a. m.

NOMINATIONS.

Executive nominations received by the Senate May 11 (legislative day of April 20), 1922.

MEMBER OF THE FEDERAL FARM LOAN BOARD.

Robert A. Cooper, of South Carolina, to be a member of the Federal Farm Loan Board, vice Asbury F. Lever, resigned.

COMMISSIONER OF FISH AND FISHERIES.

Henry O'Malley, of Washington, to be Commissioner of Fish and Fisheries, vice Hugh M. Smith, resigned.

APPRAISER OF MERCHANDISE.

George M. Jameson, of Pittsburgh, Pa., to be appraiser of merchandise in customs collection district No. 12, with headquarters at Pittsburgh, Pa., to fill an existing vacancy.

SURVEYOR OF CUSTOMS.

J. Howard Reed, of Hollidaysburg, Pa., to be surveyor of customs in customs collection district No. 11, with headquarters at Philadelphia, Pa., in place of Charles R. Kurtz, resigned.

APPOINTMENT, BY TRANSFER, IN THE REGULAR ARMY.

AIR SERVICE.

Capt. Richard Henry Ballard, Cavalry, with rank from July 1, 1920.

REAPPOINTMENT IN THE REGULAR ARMY.

Maj. Gen. Frank Winston Coe, Chief of Coast Artillery, to be Chief of Coast Artillery, with rank of major general, for the period of four years beginning May 24, 1922, with rank from May 24, 1918. His present appointment will expire May 23, 1922.

PROMOTIONS IN THE NAVY.

Lieut. Commander Claude B. Mayo to be a commander in the Navy from the 31st day of December, 1921.

Lieut. Commander Henry K. Hewitt to be a commander in the Navy from the 2d day of March, 1922.

Lieut. Commander Felix X. Gygax to be a commander in the Navy from the 19th day of April, 1922.

The following-named lieutenants to be lieutenant commanders in the Navy from the 3d day of June, 1921:

Ernest J. Blankenship.

Alfred Y. Lanphier.

Lieut. Oliver M. Read, jr., to be a lieutenant commander in the Navy from the 28th day of March, 1922.

The following-named lieutenants (junior grade) to be lieutenants in the Navy from the 1st day of July, 1920:

John A. Terhune.

Leonard Doughty, jr.

Willis M. Percifield.

Ensign Willis M. Percifield to be a lieutenant (junior grade) in the Navy from the 29th day of June, 1920.

Lieut. John B. Cooke for temporary service to be a lieutenant (junior grade) in the Navy from the 1st day of July, 1920, in accordance with a provision contained in the act of Congress approved June 4, 1920.

The following-named ensigns to be lieutenants (junior grade) in the Navy from the 1st day of July, 1920:

Julian B. Noble.

Charles E. Coney.

Surg. Charles E. Ryder to be a medical inspector in the Navy, with the rank of commander, from the 10th day of November, 1921.

Asst. Surg. Frederic L. Conklin to be a passed assistant surgeon in the Navy, with the rank of lieutenant, from the 22d day of April, 1918.

Asst. Surg. James Humbert to be a passed assistant surgeon in the Navy, with the rank of lieutenant, from the 1st day of January, 1921.

The following-named passed assistant paymasters to be paymasters in the Navy, with the rank of lieutenant commander, from the 21st day of October, 1921:

Harry T. Sandlin.

Stanley M. Mathes.

John D. P. Hodapp.

Asst. Paymaster Charls G. Holland to be a passed assistant paymaster in the Navy, with the rank of lieutenant, from the 30th day of July, 1919.

Asst. Paymaster John O. Wood to be a passed assistant paymaster in the Navy, with the rank of lieutenant, from the 1st day of July, 1920.

The following-named assistant naval constructors to be naval constructors in the Navy, with the rank of lieutenant commander, from the 21st day of April, 1922:

Walter W. Webster.

Beirne S. Bullard.

Ernest L. Patch.

The following-named machinists to be chief machinists in the Navy, to rank with but after ensign, from the 28th day of December, 1920:

George J. Blessing.

Bennett M. Proctor.

Machinist Chauncey R. Doll to be a chief machinist in the Navy, to rank with but after ensign, from the 19th day of January, 1921.

The following-named machinists to be chief machinists in the Navy, to rank with but after ensign, from the 30th day of November, 1921:

Carl S. Chapman.
Andrew C. Skinner.
John C. Richards.
William W. Wilkins.
Benjamin F. Maddox.
Frank W. Yurasko.

Machinist John J. Enders to be a chief machinist in the Navy, to rank with but after ensign, from the 8th day of March, 1922.

Lieut. (Junior Grade) Carl K. Martin to be a lieutenant in the Navy from the 8th day of June, 1918.

Ensign Alonzo B. Alexander to be a lieutenant (junior grade) in the Navy from the 1st day of July, 1920.

The following-named passed assistant paymasters to be paymasters in the Navy, with the rank of lieutenant commander, from the 21st day of October, 1921:

Arthur H. Eddins.

Charles C. Copp.

Asst. Paymaster William A. Best to be a passed assistant paymaster in the Navy, with the rank of lieutenant, from the 1st day of July, 1920.

POSTMASTERS.

ALABAMA.

William C. Starke to be postmaster at Troy, Ala., in place of Emory Folmar, declined.

FLORIDA.

Clement C. Ausherman to be postmaster at Fort Lauderdale, Fla., in place of S. M. Craig. Incumbent's commission expired August 26, 1920.

Jennie L. Cooley to be postmaster at Lynn Haven, Fla., in place of I. F. Titus. Incumbent's commission expired April 1, 1922.

GEORGIA.

Ibbie G. Pearce to be postmaster at Sumner, Ga. Office became presidential July 1, 1920.

ILLINOIS.

Henry Snow to be postmaster at Maquon, Ill. Office became presidential January 1, 1921.

INDIANA.

Herbert A. Milburn to be postmaster at Patoka, Ind. Office became presidential April 1, 1922.

KANSAS.

Anna L. January to be postmaster at Osawatomie, Kans., in place of M. V. Dunlap. Incumbent's commission expired February 4, 1922.

KENTUCKY.

Harvey H. Pherigo to be postmaster at Clay City, Ky. Office became presidential July 1, 1921.

John P. Vanzant to be postmaster at Edmonton, Ky. Office became presidential January 1, 1921.

Zephaniah Harrel to be postmaster at Rockport, Ky. Office became presidential July 1, 1921.

Robert L. Jones to be postmaster at Morganfield, Ky., in place of F. B. Brown. Incumbent's commission expired July 12, 1920.

LOUISIANA.

Levi P. Carter to be postmaster at Bunkie, La., in place of Ewell West. Incumbent's commission expired September 1, 1920.

MASSACHUSETTS.

Luke W. Hemmenway to be postmaster at Bryantville, Mass. Office became presidential April 1, 1922.

Cleon F. Forbes to be postmaster at Stoughton, Mass., in place of C. T. Farrell, resigned.

MICHIGAN.

Florence C. Curtis to be postmaster at Whittemore, Mich. Office became presidential January 1, 1921.

William Wolz to be postmaster at Three Oaks, Mich., in place of G. F. Carrier. Incumbent's commission expired January 24, 1922.

MINNESOTA.

Charles A. Allen to be postmaster at Milaca, Minn., in place of C. A. Allen. Incumbent's commission expired July 24, 1920.

MISSOURI.

Flavius A. Rumbuhl to be postmaster at Leslie, Mo. Office became presidential April 1, 1922.

Walter S. Johnston to be postmaster at Crocker, Mo., in place of W. D. Johnson. Incumbent's commission expired January 24, 1922.

NEW HAMPSHIRE.

Ervin W. Hodsdon to be postmaster at Center Ossipee (late Mountainview), N. H., in place of E. W. Hodsdon. Name of office changed.

NEW JERSEY.

Frank E. Smith to be postmaster at Ridgefield Park, N. J. Office became presidential October 1, 1921.

NEW MEXICO.

Harran H. De Lozier to be postmaster at Texico, N. Mex., in place of S. C. Hunter, resigned.

NORTH DAKOTA.

Fred Fercho to be postmaster at Lehr, N. Dak. Office became presidential January 1, 1921.

OHIO.

Albert D. Owen to be postmaster at Austinburg, Ohio. Office became presidential April 1, 1922.

Edgar R. Holmes to be postmaster at Millersport, Ohio. Office became presidential April 1, 1922.

OKLAHOMA.

Nellie E. Vincent to be postmaster at Mutual, Okla. Office became presidential April 1, 1922.

PENNSYLVANIA.

John C. Wilson to be postmaster at Mercersburg, Pa., in place of H. B. Krebs. Incumbent's commission expired February 4, 1922.

SOUTH CAROLINA.

Paul F. W. Waller to be postmaster at Myers, S. C. Office became presidential January 1, 1922.

TEXAS.

R. Kyle Cross to be postmaster at Cumby, Tex., in place of W. B. Junell. Incumbent's commission expired January 24, 1922.

Richard T. Polk to be postmaster at Killeen, Tex., in place of R. D. Tankerley, resigned.

VERMONT.

Marion C. White to be postmaster at Cavendish, Vt. Office became presidential April 1, 1922.

VIRGINIA.

Bertha Thompson to be postmaster at Ferrum, Va. Office became presidential January 1, 1921.

WISCONSIN.

Ellen E. Hamburg to be postmaster at Winegar, Wis. Office became presidential April 1, 1922.

Maud E. Johnston to be postmaster at Spencer, Wis., in place of Helen Pickett, declined.

CONFIRMATIONS.

Executive nominations confirmed by the Senate May 11 (legislative day of April 20), 1922.

RECEIVER OF PUBLIC MONEYS.

Hayward H. Schwoob to be receiver of public moneys at Lander, Wyo.

POSTMASTERS.

FLORIDA.

William W. Zipperer, Jennings.
Charles S. Williams, Key West.
Warren J. Armstrong, Valparaiso.
Leland M. Chubb, Winter Park.

ILLINOIS.

Harker Miley, Harrisburg.
Cyril E. Reed, London Mills.
Richard A. Full, Roanoke.

MASSACHUSETTS.

Myrtice S. King, Upton.

MISSISSIPPI.

George H. Flowers, Kilmichael.
Raymond H. Fairhurst, Lake.
Fred J. McDonnell, Okolona.
Charles W. Boen, Wiggins.

NEBRASKA.

Oscar L. Lindgren, Bladen.
Earl C. Rickel, Edgar.

NEW JERSEY.

Harry M. Riddle, Asbury.
Frederick W. Travis, Fair Haven.
Joseph G. Endres, Seaside Heights.

NEW YORK.

Clarence A. E. Churchill, Ellicottville.
Susie E. Garrison, Wingdale.

RHODE ISLAND.

Mary I. Cummiskey, Crompton.

VIRGINIA.

W. Ingles Harnsberger, Grottoes.
William E. Hudson, Monroe.
William G. O'Brien, Tazewell.

HOUSE OF REPRESENTATIVES.

THURSDAY, *May 11, 1922.*

The House met at 12 o'clock noon.

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

As the mountains are round about the Eternal City, so the Lord is with us, and we stand in His eternal ways. Thy mercy is a wide-open gate. Here we would breathe our thanksgiving and confess our sins. When the pool is bitter, the healing tree is nigh; in the desert-wilderness there are the gushing streams from the broken rock! O sustain us in our effort to live in the upper liberties, where are heard the tones of peace and personal satisfaction. May we express our gratitude in daily trust, in sacrificial service, and in continual beneficent industry. For Thy name's sake we ask. Amen.

The Journal of the proceedings of yesterday was read and approved.

SPEAKER PRO TEMPORE.

The SPEAKER. The Speaker expects to be away to-morrow and possibly one or two further legislative days, and designates the gentleman from Massachusetts [Mr. WALSH] to act as Speaker pro tempore during his absence.

READJUSTMENT OF THE PAY OF THE ARMY, NAVY, ETC.

Mr. McKENZIE. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 10972.

The question was taken, and the Speaker announced the ayes had it.

Mr. CLOUSE. Mr. Speaker, I was on my feet, and I suggest the absence of a quorum. There should be a quorum here, I think, when this motion is put.

Mr. GARRETT of Tennessee. Mr. Speaker, the House divided?

The SPEAKER. Yes; the Chair announced the result, but the gentleman from Indiana makes the point of order that there is no quorum present or voting. The Chair thinks there is no quorum present or voting. The Doorkeeper will close the doors, the Sergeant at Arms will notify absentees, and the Clerk will call the roll.

The question was taken; and there were—yeas 283, nays 0, answered "present" 1, not voting 146, as follows:

So the motion was agreed to.

The Clerk announced the following pairs:

Until further notice:

Mr. Maloney with Mr. Stevenson.
Mr. Atkeson with Mr. Cockran.
Mr. McPherson with Mr. Kunz.
Mr. Kiess with Mr. Martin.
Mr. Michaelson with Mr. Fields.
Mr. Sanders of Indiana with Mr. Logan.
Mr. Butler with Mr. Sullivan.
Mr. Coughlin with Mr. O'Connor.
Mr. Osborne with Mr. Brand.
Mr. Boies with Mr. Taylor of Colorado.
Mr. Graham of Pennsylvania with Mr. Sears.
Mr. Connell with Mr. Mead.
Mr. Kearns with Mr. Ward of North Carolina.
Mr. Newton of Missouri with Mr. Bankhead.
Mr. Shreve with Mr. Collins.
Mr. Snell with Mr. Goldsborough.
Mr. McArthur with Mr. Campbell of Pennsylvania.
Mr. Smith of Michigan with Mr. Wingo.
Mr. Wurzbach with Mr. Dominick.
Mr. Perlman with Mr. Kitchin.
Mr. Gorman with Mr. Sabath.
Mr. Dickinson with Mr. Kindred.
Mr. Winslow with Mr. Drane.
Mr. Bixler with Mr. Mansfield.
Mr. Kendall with Mr. Davis of Tennessee.
Mr. Patterson of New Jersey with Mr. Hardy of Texas.
Mr. Langley with Mr. Clark of Florida.
Mr. Davis of Minnesota with Mr. Humphreys.
Mr. Beedy with Mr. Gilbert.
Mr. Stiness with Mr. Taylor of Arkansas.
Mr. Reed of New York with Mr. Pou.
Mr. Darrow with Mr. Smithwick.
Mr. Roach with Mr. Blanton.
Mr. Browne of Wisconsin with Mr. Rainey of Alabama.
Mr. Kleczka with Mr. Hudspeth.
Mr. Strong of Pennsylvania with Mr. Montague.

The result of the vote was announced as above recorded.

The SPEAKER. A quorum is present. The Doorkeeper will open the doors.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 10972, with Mr. TOWNER in the chair.

The CHAIRMAN. The House is in Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 10972, which the Clerk will report by title.

The Clerk read as follows:

A bill (H. R. 10972) to readjust the pay and allowances of the commissioned and enlisted personnel of the Army, Navy, Marine Corps, Coast Guard, Coast and Geodetic Survey, and Public Health Service.

The CHAIRMAN. At the close of the consideration of this bill on a previous day the first section had been read. It is now open for amendment.

Mr. OLIVER. Mr. Chairman, I offer the following amendment.

The CHAIRMAN. The gentleman from Alabama offers an amendment, which the Clerk will report.

The Clerk read as follows:

Strike out the period and insert, on page 5, line 22, after the figures "$5,750," the following:

"*Provided*, That nothing in this section or in any other section of this bill shall authorize the retired pay for a colonel in the Army, captain in the Navy, or corresponding grades to exceed $3,750 per annum; of a lieutenant colonel in the Army, commander in the Navy, or corresponding grades, to exceed $3,375 per annum; of a major in the Army, lieutenant commander in the Navy, or corresponding grades or of any officer below the grade of major in the Army, or lieutenant commander in the Navy, or corresponding grades, to exceed $3,000 per annum."

Mr. OLIVER. Mr. Chairman, I wish to call the attention of the gentleman from Illinois [Mr. MCKENZIE] to the pending amendment, and I hope he will accept it. It seeks to continue as the maximum retirement pay the amounts now fixed by existing law, to wit, $3,750 for a colonel, $3,375 for a lieutenant colonel, and $3,000 for a major, and officers of corresponding grades in the other services. May I ask whether the gentleman has serious objection to it?

Mr. BYRNES of South Carolina. Will the gentleman yield?

Mr. OLIVER. Yes.

Mr. BYRNES of South Carolina. The purpose of the gentleman's amendment is to provide that there shall be no increase in the compensation of the officer who is now retired.

Mr. OLIVER. Or who may hereafter be retired.

Mr. BYRNES of South Carolina. Or who is to be retired hereafter?

Mr. OLIVER. Yes; the amendment simply undertakes to fix as a maximum retired pay for officers below the grade of brigadier general the maximum retired pay now allowed by law. It has relation only to retired pay, and in no way affects the pay or compensation of an officer while on active service.

Mr. BYRNES of South Carolina. I am not speaking for anybody else, and my personal view is the same as his as to those on the retired list. It should remain as it is. As to the future, I disagree with the gentleman.

Mr. NEWTON of Minnesota. It applies not only to those on the retired list but also to those who are to be retired in the future?

Mr. OLIVER. Yes. I question whether the House desires to give increased retired pay to officers at this time. This amendment fully protects the officer as to retired pay now allowed under existing law, and in no way takes from or diminishes his pay or compensation while in active service, and the amendment as drawn will not affect any increase in pay proposed by the pending bill for an officer on active service. When you recall that a large number of officers now in the service have to their credit service which heretofore has counted for longevity pay only, and when you further recall that under existing law a limitation of $1,000 is fixed on the amount of longevity pay for colonels, lieutenant colonels, and majors and officers of corresponding grades, and that under existing law longevity pay is limited to 40 per cent, whereas under this bill the longevity pay is increased to 50 per cent and the limitation of $1,000 removed, I think the House will deem it proper to limit the retired pay to the amounts now fixed by law. Unless a limitation is fixed the maximum retired pay of a colonel will be increased $750, that of a lieutenant colonel, $937.50; and that of a major, $937.50. This will occur on account of the removal of the limitation of $1,000 on longevity pay and the increased per cent from 40 to 50, and because the pending bill undertakes to give to service a further and different purpose from that it has served in the past, to wit: Instead of being counted for longevity pay only, under the terms of this bill, it will hereafter serve to

advance officers now in the service to a pay period higher than the one corresponding to the grade in which they hold commissions.

Under existing law captains of the Navy are retired at the age of 56, if not promoted, commanders at 50, and lieutenant commanders at 45.

The CHAIRMAN. The time of the gentleman has expired.

Mr. OLIVER. Mr. Chairman, I ask unanimous consent for five minutes more.

The CHAIRMAN. The gentleman from Alabama asks unanimous consent for five minutes more. Without objection, it is so ordered.

There was no objection.

Mr. OLIVER. Under the pending bill longevity pay is increased from 40 to 50 per cent and the limitation of $1,000 on longevity pay removed, and service, other than commissioned service, can be claimed by the officers now holding commissions for advancement to higher base pay, thereby increasing their base pay $500.

An examination of Table 1 attached to the minority report will show that there are many officers in the grade of colonel, a limited number in the grades of lieutenant colonel and major, and of corresponding grades who will, by reason of the changes proposed in existing law by the pending bill, be entitled to the maximum increase of retired pay, to wit: For colonels, $750; lieutenant colonels, $937.50; and majors, $937.50. Now, the highest retired pay for a civilian employee is $720, and you would, by this bill, unless this amendment is adopted, give to officers now in the service under the grade of brigadier general an increase in retired pay larger than the total amount of the annual retired pay of any civilian employee. If retired pay is to be increased, let it be done by a subsequent bill, after the pending bill has been tried, and when the House can act with fuller knowledge as to the results that may follow.

The maximum retired pay of a colonel is now $3,750, and should not be increased by this bill to $4,500; that of a lieutenant colonel $3,375, and should not be increased to $4,312.50; that of major is now $3,000, and should not be increased to $3,937.50, as the pending bill would do if not amended.

Mr. McKENZIE. Your statement is that under this bill the retired pay of a colonel would approximate $4,500, instead of $3,500 as at present?

Mr. OLIVER. The maximum retired pay of a colonel is now $3,750, and if the pending bill passes without amendment it will be $4,500.

Mr. McKENZIE. Under the law the retired officer receives three fourths of his base pay?

Mr. OLIVER. You mean three-fourths of his base and longevity pay.

Mr. McKENZIE. What would be the base pay of a colonel at its maximum under this bill?

Mr. OLIVER. The base pay of a colonel is $4,000, and, if he has had 30 years' service, under the provisions of the pending bill his longevity pay would be $2,000, thus making his pay $6,000—three-fourths of which would represent his retirement pay.

The CHAIRMAN. The time of the gentleman has expired.

Mr. OLIVER. Mr. Chairman, I ask unanimous consent for five minutes more.

The CHAIRMAN. Is there objection. [After a pause.] The Chair hears none.

Mr. McKENZIE. The sixth pay period, when they reach that after 30 years of service, the base pay, which is the maximum, is——

Mr. OLIVER. The base pay of a colonel, as I before stated, is $4,000, and where he has had 30 years' service his longevity pay under the pending bill would be $2,000 instead of $1,000 as under existing law.

There can be no possible difference between the gentleman and myself as to what is the base pay of a colonel and what under this bill his maximum longevity pay would be. Unquestionably, the limitation of $1,000 on longevity pay is removed by the pending bill, so that 30 years' service will now increase the longevity pay of a colonel to $2,000. There are more than 300 colonels and officers of corresponding grades now in the service who will be entitled on the passage of this bill, if not amended, to the maximum longevity pay of $2,000, thereby increasing the retirement pay of these colonels from $3,750 to $4,500.

Table 1 also shows that there are lieutenant colonels and majors with sufficient service to secure under the provisions of this bill, if not amended, an increase of $937.50 on their retirement pay. Is it the purpose of the House, when officers are retired from the service, to provide in this bill these large increases in present retirement pay? The very fact that the gentleman from South Carolina seems unwilling to increase the pay of the officer now retired furnishes an unanswerable reason why the officers to be hereafter retired shall not have increased retired pay. Under this bill he will be given, and should be given, if the bill passes, some increase in pay and compensation while in active service.

If, in accordance with the suggestion of the gentleman from South Carolina, an increased retired pay is given to all officers now in the service and denied to all officers now on the retired list, or who may be placed on the retired list before this bill becomes effective, then you will have an officer retiring during the present month as a colonel in the Army or captain in the Navy with $3,750, and if this bill should pass during June you might have a few days thereafter a colonel in the Army or captain in the Navy retired on a pay of $4,500.

Both of these officers now in the service have 30 years to their credit. Now, why should we make a distinction between the one who retires just before and the one just after the passage of the bill, so as to increase the retired pay of the last during the remainder of his life $750 a year over the retired pay of the one who may retire just before the bill goes into effect?

The fact is that the law in reference to retired pay has always given to retired officers the same retired pay as is provided for the officer in active service when he retires. In other words, where retired pay has been increased for the officers in the service, the law carries a like increase to those on the retired list who were retired in the same grades with the same service. Yet the gentleman from South Carolina objects to giving any increase to men now on the retired list but favors a maximum increase to colonels of $750 and to lieutenant colonels and majors of $937.50 now in the service when they are retired. I am sure that on second thought he will recognize the justice of the amendment offered and, I trust, will give it his support. No increase in retired pay should be carried in this bill for either officers on the active or retired list.

The CHAIRMAN. The time of the gentleman from Alabama has again expired.

Mr. OLIVER. Mr. Chairman, I ask unanimous consent for just two minutes more.

The CHAIRMAN. Is there objection to the gentleman's request?

There was no objection.

Mr. OLIVER. May I ask the gentleman from Illinois [Mr. McKENZIE] if there is any difference between us as to what this bill provides relative to retired pay?

Mr. McKENZIE. I have not paid very close attention to all the gentleman has said, but I think he has stated the facts very clearly. It is a question of difference of opinion.

Mr. LEA of California. Mr. Chairman, will the gentleman yield?

Mr. OLIVER. Yes.

Mr. LEA of California. I understand the differences of salary prescribed in your amendment are based on existing law.

Mr. OLIVER. No.

Mr. LEA of California. I would like to have the gentleman state the comparative relation of limitations he suggests to the law that is here proposed.

Mr. OLIVER. Under the pending bill, it is proposed to increase the maximum longevity and base pay of a colonel from $5,000 to $6,000, of a lieutenant colonel from $4,500 to $5,750, and major from $4,000 to $5,250. This amendment, if adopted, will not prevent this increase in the longevity and base pay of officers in the service, but will simply serve to limit the retirement pay of all officers under the grade of brigadier general to the maximum retired pay which they are permitted to draw under existing law. In other words, hereafter the retired pay of a colonel will be $3,750, that of a lieutenant colonel $3,375, that of a major $3,000, if the pending amendment is adopted. If not adopted, the maximum retired pay of a colonel will be $4,500, that of a lieutenant colonel $4,312.50, and that of a major $3,937.50.

The CHAIRMAN. The time of the gentleman from Alabama has again expired.

Mr. McKENZIE. Mr. Chairman, I shall not detain the committee very long on this amendment, but I want to say a few words. The fact about the case is that this bill involves many propositions, including the matter of retired pay. It does propose a certain graduated increase, reaching its maximum at the end of 30 years. It is true that in the Navy to-day and in the other services covered by this bill many things are counted to make up the length of service. These conditions are the result of legislation by Congress heretofore. We accepted the situation as we found it, and we said, "We will write a law that will require an officer to give to this country 30 years' commissioned service before he can reach the maximum of the fixed pay period of $6,000."

We also said, "We will change the law of longevity from a 10 per cent increase for every 5 years up to 20, which makes a 40 per cent increase, and we will make it 5 per cent for every 3 years over the period of 30 years, making an increase of 50 per cent." So far as that longevity pay is concerned, it does not affect the taxpayer to any great extent whether it is 40 per cent for 20 years or 50 per cent for 30 years.

Now, after having fixed the basis, after having fixed the time that these men must serve before they reach the various pay periods up to 30 years, we then said that hereafter this law shall apply to the retired list. In other words, to-day the law is that the retired officer in any of these services receives three-fourths of his base pay. It was the intention of the committee to raise the pay. Let us be frank about it. I think we are all for the proposition to raise the pay somewhat over the pay scale of 1908; and when we raised the pay scale for the men in the service over that of 1908, in order to be consistent and logical we said, "We will apply this same rule to the retired list," and we went one step further, and this is the only proposition raised by the gentleman from Alabama that may deserve criticism at all. That is where we say in this law that a man now on the retired list who had long service in the Army or Navy should have his retired pay measured by this bill rather than the old law. It will not affect all men retired who had a short time of service, but officers of long service may get some little increase under this bill. I am frank to admit to the gentleman from Alabama and to this House that as a matter of fact this is a gratuity in those cases. The Government has kept its contract with those old men. They have been living through this period when a dollar would buy only half as much as it formerly did, and they are living now on that small amount of retired pay; and we said we believed that this country would be willing and that this Congress would be willing to say that these old retired officers might have a little increase.

Mr. OLIVER. Will the gentleman yield?

Mr. McKENZIE. In a moment. The gentleman from Alabama objects to this. I am sorry that the gentleman did not bring some of these things to the attention of the committee while we were laboring long and hard to write this bill.

The CHAIRMAN. The time of the gentleman has expired.

Mr. McKENZIE. I would like two minutes more, Mr. Chairman.

The CHAIRMAN. The gentleman from Illinois [Mr. McKENZIE] asks unanimous consent that his time be extended two minutes. Is there objection?

There was no objection.

Mr. McKENZIE. But now after the bill has been prepared, after we have given our best thought to it, after we have taken into consideration all of these men in the service, recognizing the inequity that exists perhaps between some of the naval officers and the men in the Army and the Coast Guard—the gentleman from Alabama does not say anything about those in these other services—recognizing all of these things, we feel that with this law on the statute books it will do entire justice and equity to every man in all of these services. It is up to you, my colleagues, whether or not you want to say now that you are ready to say to those old men who are out on the retired list, "We will take care of the future but not of the past." So far as I am personally concerned, I stand for the provision as written in the bill and I hope the House will stand for it. [Applause.]

Mr. BLAND of Indiana. Will the gentleman yield?

Mr. McKENZIE. Yes.

Mr. BLAND of Indiana. I understood the gentleman from Alabama to say that a colonel who retired at the age of 45 under this bill would receive a salary of $4,500, whereas now he would receive $3,750. Is the gentleman in favor of that being done?

Mr. McKENZIE. I understood him to say in the Navy.

Mr. BLAND of Indiana. And at the same time the bill reduces the privates from $30 to $21. Is that a correct statement of fact?

Mr. McKENZIE. I can not say whether it is or not. I do not quite get the gentleman.

Mr. BLAND of Indiana. I understand it to be a correct statement of fact.

Mr. OLIVER. Unquestionably a colonel retiring after 30 years' service is retired at an increased pay of $750; in other words, $4,500; and a captain in the Navy corresponds to a colonel in the Army. He is supposed to retire at 56, and he performs always 30 or more years of service.

Mr. BLACK. Mr. Chairman, I can not believe for a moment that the House will agree to that provision of the pending bill which will increase the retirement pay of the officers already retired. It has not been very long since the Committee on the District of Columbia brought in just such a bill as this to increase the retired pay of all policemen here in the District of Columbia on account of the fact that a year or two ago Congress increased the salaries of policemen of the District and thereby increased the retirement pay of those now in the service when they shall retire. The contention of the proponents of that bill was that inasmuch as Congress had seen fit to increase the salaries of the policemen and firemen now in the service, therefore it ought to go back and increase the retired pay of all those who had been retired under the old law. I do not agree to the logic of that position. I am in favor of the amendment which the gentleman from Alabama [Mr. OLIVER] has offered. It does not affect the base pay provided in the bill to the officer as long as he is in the service. It does not affect the longevity pay provided by the bill; but it does say that the maximum retirement pay of a colonel shall be $3,750 and that the maximum retirement pay of a lieutenant colonel shall be $3,325, and that the maximum retirement pay of a major shall be $3,000.

Now, gentlemen of the House, I have no criticisms or derogatory statements to make concerning the record for service of our Regular Army officers or the officers of our Marine Corps or of the Navy or the Coast Guard or the Public Health Service, but I do think that one of the most liberal laws of all the laws of the United States is the retirement provision for Army and Navy officers. [Applause.] I do not know of any nation in the world that has been so generous as the Congress of the United States has been in making these retirement provisions; and at this time when the taxpayers in my district and yours are having to borrow money to pay their taxes, I can not understand why this committee should come in here with a bill that would provide large increases in retirement pay. Under this bill, as now written, colonels, if long enough in the service, could retire at $4,500 when they reached the retirement age, and a lieutenant colonel could retire at $3,750, I believe.

Mr. OLIVER. Three thousand three hundred and seventy-five dollars plus $750 was the increase.

Mr. BLACK. I thank the gentleman for the more definite figure. I can not conceive how this Republican House, which has pledged itself to economy, and how we Democrats who have pledged ourselves to support the economy program and to go even further than you are willing to go—I can not see how, in the face of these professions which we have made so often in debate, we can stand up for the present provisions in this bill with relation to retirement pay. We must defeat them. Therefore, I am going to support the amendment offered by the gentleman from Alabama, and I believe if it is adopted it will still leave these respective officers with the best retirement law of any nation in the world. [Applause.]

Mr. BYRNES of South Carolina. Mr. Chairman, I want to say a few words in relation to this amendment. I have no objection to—on the contrary, I am in favor of—an amendment providing that no officer now on the retired list shall receive compensation in excess of that which he is now receiving. The law provides that an officer is entitled to three-quarters of the pay of the grade in which he was serving at the time he retired. My contention is that this law should continue to operate, and if it continues to operate there is going to be very little difference between the position advocated by the gentleman from Alabama and myself. I would not want the minds of Members to become confused by the statement which evidently found lodgment in the mind of the gentleman from Indiana [Mr. BLAND] that a colonel who has had 30 years' service can be retired at the age of 45 and receive this enormous amount of money. It follows that if a colonel at the age of 45 can be retired, he entered the service when he was 15 years old, which is impossible.

Mr. BLACK. Will the gentleman yield?

Mr. BYRNES of South Carolina. Yes.

Mr. BLACK. It is possible for a colonel with the necessary amount of service to be retired under this bill at $4,500.

Mr. BYRNES of South Carolina. Yes; if he has completed 30 years' service, but I can not figure out, and the gentleman from Texas, who is a good mathematician, can not figure out how a colonel with 30 years' service could be only 45 years old. It can not be done.

Mr. BLACK. Is it not possible for him to draw $6,000 under this bill?

Mr. BYRNES of South Carolina. No; not for retirement. He can while in the service, provided he has served 30 years, and is a colonel.

Mr. BLACK. Thirty years?

Mr. BYRNES of South Carolina. If he is 45 and he has had 30 years' service, he must have entered the service at the age of 15, and we know he could not enter at 15.

Mr. BLACK. Will the gentleman contend that under the provisions of his bill——

Mr. BYRNES of South Carolina. It is not my bill, but the bill of the gentleman from Illinois.

Mr. BLACK. Under the provisions of this bill that it is not possible for a colonel to draw $6,000?

Mr. BYRNES of South Carolina. I do not see how he can with 30 years of service, and be only 45 years of age.

Mr. BLACK. Will the gentleman explain what this provision means when it says that this sixth period shall include colonels?

Mr. BYRNES of South Carolina. I am talking about the age limit. The gentleman was talking about the colonels going out at the age of 45 with 30 years' service.

Mr. BLACK. The gentleman did not understand my question.

Mr. BYRNES of South Carolina. I was not referring to the question of the gentleman from Texas; it was the question of the gentleman from Indiana [Mr. BLAND]. The fact is that there are only 25 captains with 30 years' service. If we conceive it possible for these officers to have this great longevity service, there would be some ground for the complaint, but their objection is based on the idea that all officers would have the maximum service. The fact is that the average service of an officer in the Army is 20 years. If my friend from Alabama will offer an amendment providing that no officer now on the retired list shall receive compensation in excess of what he is now receiving, my contention is that the Government will have kept the contract with him. He has no complaint because he receives compensation based on the grade in which he was serving at the time he was retired. That is the law, and it stands on the same principle that we apply to this bill.

Mr. OLIVER. Will the gentleman yield?

Mr. BYRNES of South Carolina. Yes.

Mr. OLIVER. The bill repeals two existing laws in order to increase the base and longevity pay of a colonel. The first is it repeals the limitation on base and longevity pay.

Mr. BYRNES of South Carolina. It does repeal it, and for the purpose of protecting the Coast Guard, where promotions have been stagnated for years, and the only way they could receive any relief would be by recognizing length of service. So far as the Army is concerned, they are not interested in it.

Mr. OLIVER. The gentleman does not understand my question.

The CHAIRMAN. The time of the gentleman from South Carolina has expired.

Mr. BLAND of Indiana. Mr. Chairman, I ask unanimous consent that the gentleman have two minutes more in order that I may ask him a question.

The CHAIRMAN. The gentleman from Indiana asks that the time of the gentleman from South Carolina be increased two minutes. Is there objection?

There was no objection.

Mr. BLAND of Indiana. The gentleman says that a man would not enter the Army at the age of 15 so that he could be retired with 30 years' service at the age of 45. They do enter at 15 and, nevertheless——

Mr. BYRNES of South Carolina. Where do they enter at 15?

Mr. BLAND of Indiana. But suppose he was to retire at the age of 46, then it is possible for him to retire with a salary of $4,500, is it not?

Mr. BYRNES of South Carolina. If he served 30 years, whatever his age in life. As a matter of fact, I do not think there is a record of a man 45, 46, or 47 retiring as colonel, or anything like it. The automatic retirement in the Army is 64. No officer in the Army can retire even though he has served 30 years, without the permission of the President.

Mr. BLAND of Indiana. I am not in favor of giving him $4,500 retirement pay.

Mr. BYRNES of South Carolina. The gentleman's objection is to the principle of retirement.

Mr. OLIVER. Mr. Chairman, I ask unanimous consent to address the committee for two minutes.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. OLIVER. Mr. Chairman, I know it is the desire of the House to at least know the facts and that it is not the purpose of my good friend from South Carolina [Mr. BYRNES] to in any way mislead the House. In order to increase the maximum of longevity and base pay this bill repeals two provisions of existing law. One fixes a limitation on longevity pay of $1,000 for a colonel, lieutenant colonel, and major, and the other limits the longevity pay to 40 per cent of the base pay. Under the pending bill the $1,000 limitation on longevity pay is removed and the 40 per cent on base pay for longevity is increased to 50 per cent. As to the number of colonels that now have 30 years' service turn to Table I, and you will find 434 colonels with more than 30 years' service. You will find 246 with more than 28 years' service and 366 with more than 25 years' service. Practically all of the colonels have had 30 years' service. My friend was entirely in error when he said that this was intended to correct a condition in the Coast Guard, because there is but one colonel in the Coast Guard, and by special provision he has been cared for and given the maximum compensation of a colonel without limitation.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Alabama.

The question was taken; and on a division, because the Chair was in doubt, there were—ayes 44, noes 31.

So the amendment was agreed to.

Mr. OLIVER. Mr. Chairman, I have another amendment which is in line with this, which I ask to have considered at this time.

The CHAIRMAN. The gentleman from Alabama offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. OLIVER: Page 6, line 5, strike out the period after the word "computation," and add the following: "for computing longevity pay, but only commissioned service shall be counted in computing service for advancement to a higher pay period."

Mr. OLIVER. Mr. Chairman, I have only prepared two amendments to section 1. The first undertook to limit retired pay to amounts now provided under existing law, which the committee has just adopted, and the second seeks to provide that for advancement to a pay grade higher than that corresponding to the grade in which the officer holds a commission, commission service only can be counted. If the facts in reference to this last amendment are made clear to the House, I feel that the amendment will meet with your approval. I know of no body of men more ready to do exact justice in matters of this kind than the Members of this House. No difference can possibly arise between those favoring the bill and myself as to the facts which lead to the offering of this amendment.

The pending bill contains the following provision, commencing on line 23, page 5, and concluding on line 5, page 6, as follows:

For officers hereafter appointed no service shall be counted for purposes of pay except active commission service under Federal appointment and commission service in the National Guard when called out by order of the President.

For officers now in the service all service which is now counted in computing longevity pay and service, as a contract surgeon serving full time, shall be included in the computation.

Service now counted in computing longevity pay and which under this provision is sought to be made available to officers now in the service to increase their base pay as well is not limited to commission service, but includes for all graduates of the academies at West Point and Annapolis prior to July, 1916, the time spent at these academies in school, and a constructive or gift service, credited to many officers appointed from civil life, prior to March 13, 1913, and also enlisted service.

After the passage of the bill, however, for officers hereafter commissioned, it will be noted that only commission service can be counted either for longevity pay or for the purpose of advancing an officer to another pay period higher than that corresponding to the grade in which he is commissioned. What good reason, may I ask, can be assigned for this discrimination in favor of officers now in the service against officers hereafter to be commissioned? In view of the rapid promotion received by so many now in the service, and the certainty of slow promotion hereafter, it would seem equitable to favor the incoming officer rather than many now enjoying high rank by reason of unusual and rapid promotion incident to the war and the favorable officer legislation subsequent thereto.

The amendment will not prevent any officer now in the service from counting all service of every character on longevity pay, and under the bill he is allowed an increase in his longevity pay of 10 per cent. He has never been allowed to count this service for any other than longevity pay purposes, and why should this bill undertake to let other than commission service advance an officer to the next high pay period, if he happens to be now in the service, and deny it to every other officer who comes into the service after the passage of the bill?

Should this bill pass, the officer hereafter entering the service will find the upper grades crowded and promotion slow, and yet he will be limited to commission service both as to longevity pay and as to advancement to pay periods. This amendment seeks to prevent something being given to the men now in the

service which they neither now have nor have ever had and which will be hereafter denied to all officers coming into the service.

The CHAIRMAN. The time of the gentleman from Alabama has expired.

Mr. OLIVER. Mr. Chairman, I ask unanimous consent to proceed for four minutes.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. OLIVER. My friend from Illinois [Mr. McKENZIE] can not consistently oppose this amendment, since he has given it his deliberate and unqualified approval on two different occasions. On pages 16 and 17 of the joint hearings the gentleman from Illinois [Mr. McKENZIE], speaking of a tentative bill in reference to the pay of officers, said:

I will allow no service to be computed in determining an officer's pay except commission service rendered under Federal commission. In other words, service as a candidate in a training camp, as a Federal Nationalized Guard, as a cadet in either the Naval or Military Academies. Any similar service would not be computed in determining an officer's pay.

Later he submitted to the committee the draft of a tentative bill, and which formed the basis for the drawing of the pending bill. In the tentative bill so prepared by the gentleman from Illinois, it was provided that nothing but commission service should now or hereafter count to advance an officer to the next pay period, and until the officers conferred in reference to the McKenzie bill no objection had been raised by anyone that advancement to pay periods should not be confined to commission service.

You will note that this amendment will in no way interfere with all service being counted for longevity pay to the officers now holding commissions, and its sole and only purpose is to do what the gentleman from Illinois [Mr. McKENZIE] on two occasions approved; that is, make advancement to a higher pay period depend on commission service only.

I submit again that no sound reason can be advanced why one rule should be applied to the officers now in the service and a different rule to those to be hereafter commissioned.

Mr. McKENZIE. Mr. Chairman and gentlemen of the committee, it is a source of considerable gratification to me to see now the gentleman from Alabama is getting around to the place where he indorses the fundamental principles, at least one of them, of this bill, for which I contended throughout all these long months. I am glad the gentleman from Alabama has reached the place where he recognizes that in the future the young officer who comes into the Army or Navy must give 30 years commissioned service to the Government before he receives the maximum pay. That is what we are trying to do by this bill, and I am glad the gentleman from Alabama indorses that proposition; but while he is willing to do that, although lamenting over the young officer who will come into the service in the years to come, shedding tears over him, he is sticking daggers in the officers now in the service. We give them credit only for the service heretofore recognized by law. He laments over this fact. I do not believe in giving men promotion on the promotion list for any service except commissioned service, and that is what we are fighting for in this bill; but there is such a thing as individual honor and there is such a thing as national honor, and I appeal to the men of this House if we are not justified in saying to these men who are now in the service, who came in with the understanding that their enisted service should count, their service at Annapolis should count, that all of these different kinds of service should count, this service should continue to count. Now, when we write a bill for the future we should say to these men, "We will keep our word with you, but as the years go by and this mighty army that my friend talks of—20,000—moves onward to the beyond, and this young army of officers comes on this country will then see a bill that is founded on the eternal principles of justice. But now in this amendment, when we are trying to make this law, the gentleman from Alabama will get up and quibble and find fault with respect to the 200 men to whom I know he is referring. He is referring to the 200 old salts who went into the North Sea with our fleet and protected our vessels carrying our boys and products, and when the war was over the gentleman was on the committee, along with our good friend Mr. PADGETT, of Tennessee, that wrote a bill which provides that those men who had spent long years of their lives riding the waves of the sea, these men who had nerve and backbone, these men who were ready to die when conflict comes, this Congress provides that the 200 or better of those old veterans should be given commissions, and they should be entitled to count their individual services, enlisted services, if you please, in the Navy. Now, my friend from Alabama comes in here and appeals to you and appeals to me, that while this bill is just for the future, let us now penalize these old men. I hope, my friends, that in the interest of justice and the integrity of our Government that you will vote down this amendment.

Mr. McSWAIN. Will the gentleman yield?

Mr. McKENZIE. I will.

Mr. McSWAIN. I do not quite understand the details. I do not understand whether or not this provision includes all the elements of the service, whether enlisted or commissioned. Is it for the benefit of these enlisted men in the Army and Navy who got commissions as the result of service, or is it for the benefit of the West Point and Annapolis graduates?

Mr. McKENZIE. I would say that the greater percentage in the Army are not from West Point. It is not so in the Navy, because a man can not come in from the cornfield and be an officer in the Navy very well, but in the Army a very small percentage of the officers are West Pointers.

Mr. McSWAIN. I agree with my friend's sentiment, if this is to benefit the emergency officers who got permanent commissions in the establishment.

Mr. McKENZIE. Absolutely.

Mr. McSWAIN. It is for their benefit?

Mr. McKENZIE. Absolutely. It is for the benefit of the 5,000 men that we put in after the World War and for the benefit of about 3,000 that we put in after the Spanish-American War, men who really won our battles for us.

I want to say that I hope the Members of this House will vote down this amendment. I do not claim that this bill is perfect——

Mr. BYRNES of South Carolina. Will the gentleman yield?

Mr. McKENZIE. I will.

Mr. BYRNES of South Carolina. Is not this a fact: That under this amendment the service of an enlisted man could not be counted in determining the period of his pay?

Mr. McKENZIE. Yes. That is, under our bill as written.

Mr. BYRNES of South Carolina. Would not this amendment provide that a man should not compute the service in the enlisted ranks, and every officer who came from the ranks would be denied the compensation which he is now receiving and based on the service in the enlisted rank?

The CHAIRMAN. The time of the gentleman has expired?

Mr. OLIVER. Mr. Chairman, I would like to ask unanimous consent that the gentleman have two minutes more. I would like to ask him a question.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. OLIVER. The gentleman understands that the service which he has referred to will amount, notwithstanding this amendment, for the purpose of increasing the longevity pay, to from 40 to 50 per cent. That is correct?

Mr. McKENZIE. Yes.

Mr. OLIVER. It in no way interferes with the provision which gives longevity pay based on all kinds of service, and increases it from 40 to 50 per cent?

Mr. McKENZIE. I will say——

Mr. OLIVER. Did not the gentleman state in two bills that he prepared that it was right that in order to advance to another pay period only commissioned service should be counted?

Mr. McKENZIE. That is my position.

Mr. OLIVER. And that is all this amendment says, absolutely.

Mr. McKENZIE. I beg to differ with the gentleman.

Mr. OLIVER. This is the same amendment that General Spaulding said before the committee he thought was right, and even the chairman of the committee, Mr. WADSWORTH, thought was right.

Mr. McKENZIE. The way I feel is simply this, that it is a mere matter of justice to the men that are now in the service, and this amendment of my friend from Alabama does not destroy the thing entirely. It is a good deal like picking one pocket and letting the other pocket go.

The CHAIRMAN. The time of the gentleman has expired.

Mr. CONNALLY of Texas. Mr. Chairman, I ask unanimous consent that the gentleman's time be extended two minutes.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. CONNALLY of Texas. Let me ask the gentleman from Illinois if it is not true that at present an enlisted man that becomes a captain receives the pay of a captain—$2,400? Then he receives longevity pay based upon the length of time he served as an enlisted man. Now, is it not true that the amendment offered by the gentleman from Alabama [Mr. OLIVER] will leave that condition exactly where it stands now?

Mr. McKENZIE. It would, so far as counting longevity pay is concerned.

Mr. CONNALLY of Texas. If to-morrow an enlisted man should be appointed a captain he would receive the pay of a captain?

Mr. McKENZIE. Yes.

Mr. CONNALLY of Texas. And he would receive the longevity pay for the period during which he was an enlisted man, but under this bill an enlisted man that had been in the Army 10 years and is appointed a captain to-morrow would receive the same pay as a man who had been 10 years a commissioned officer and was promoted at the same time as the enlisted man? Is that true?

Mr. McKENZIE. It is true. But if you will permit me to state, this bill now before us is drawn on the basis that length of commissioned service alone shall count hereafter.

Mr. CONNALLY of Texas. If he is a captain, he is assigned to a regular place, whether he has been in the Army a day or a year.

Mr. McKENZIE. It being based on length of service, that places these officers in the pay period in which they would come by the length of service they have. For instance, if a man has had 14 years of service he is in the period with a major, and so on. That is the theory of the bill.

Mr. CONNALLY of Texas. So far as there being any unfairness is concerned, under the amendment offered by the gentleman from Alabama the man would get exactly what he does now?

Mr. McKENZIE. Except that it takes away from him half of his right, you might say. It takes away from him the right to be placed in the pay period to which the length of his service would entitle him.

Mr. CONNALLY of Texas. The only right he would have would be to be classified as other officers under this bill. This bill provides that new officers that come in shall not have any increase by reason of enlisted service.

Mr. McKENZIE. You are right.

Mr. CONNALLY of Texas. Now, under the present law he is not entitled to an increase of base pay by reason of enlisted service, is he?

Mr. McKENZIE. Under existing law?

Mr. CONNALLY of Texas. Not to base pay?

Mr. McKENZIE. No.

Mr. CONNALLY of Texas. This amendment, instead of discriminating absolutely, puts him on an equality?

Mr. McKENZIE. The rank now fixes the pay.

Mr. CONNALLY of Texas. Yes.

Mr. McKENZIE. The theory of this bill is that length of service shall fix the pay.

Mr. CONNALLY of Texas. You make an exception. You say any man who comes in hereafter shall not have the credit for enlisted service.

Mr. McKENZIE. But that is keeping faith.

Mr. PADGETT. Mr. Chairman, I move to strike out the last two words.

I sincerely hope that this amendment will not be agreed to. In my opinion it will produce very great inconvenience, very great injustice, and very great confusion, especially in the Navy. They have in the Navy the line, and then they have the various staff corps, the Medical Corps, the Construction Corps, and the Pay Corps. In order to equalize and to adjust it as far as possible, we have on the statute books legislation that establishes what we call the "running-mate" provision. This will very seriously discommode and interfere with and destroy the working of that "running-mate" provision.

It will do a very great injustice to the men who have an honorable and long enlisted service, coupled with a commissioned service, and war service as enlisted men, coupled with war service as commissioned men.

Mr. BLACK. Mr. Chairman, will the gentleman yield?

Mr. PADGETT. No; let me finish my statement, please.

Now, this proposed amendment will bring confusion and will do very great injustice to the various staff corps, because they have their rank based upon not altogether their length of service, but upon this running-mate provision under existing law, and also being credited with constructive service that they had in preparing themselves for admission to the service. It will do some injustice to the line of the Navy, but especially to the Staff Corps and to the enlisted personnel; and, in view of the confusion and the conflict with existing law and the injustice that it will do, I certainly hope that the House will not agree to the amendment. [Applause.]

The CHAIRMAN. The time of the gentleman from Tennessee has expired. The vote comes on the amendment of the gentleman from Alabama [Mr. OLIVER].

The question was taken, and the Chairman announced that the ayes seemed to have it.

Mr. JEFFERS of Alabama. A division, Mr. Chairman.

The CHAIRMAN. A division is demanded.

The committee divided; and there were—ayes 18, noes 74.

So the amendment was rejected.

Mr. JEFFERS of Alabama. I offer an amendment.

The CHAIRMAN. The gentleman from Alabama offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. JEFFERS of Alabama: Page 6, line 3, after the word "pay," insert "all commissioned service in the National Guard and Organized Militia, whether in State or Federal service, or both."

Mr. JEFFERS of Alabama. Mr. Chairman and gentlemen of the committee, this amendment is one which is designed simply to do justice to a group of officers now in the Army who are ex-National Guard officers and who had actual experience in the National Guard as commissioned officers, and who as such National Guard commissioned officers did give their time and their money, to their own detriment in many cases, for the upkeep of the guard. Officers of this class brought into the service in time of war constitute a large proportion of our first and most valuable fighting men. You will find that it says "all commissioned service in the National Guard and Organized Militia"; "commissioned service."

It is my belief that Congress wants to be fair to those men who went into the service of the National Government through the National Guard.

Mr. STAFFORD. Mr. Chairman, will the gentleman yield?

Mr. JEFFERS of Alabama. Yes.

Mr. STAFFORD. Do I understand the gentleman's contention to be that where a present officer of the Army had prior service as an officer of the National Guard or the Organized Militia the length of service in the National Guard, or number of years, regardless of the number of days he has given each week to the service, shall be computed in the longevity pay and increased pay?

Mr. JEFFERS of Alabama. Yes.

Mr. STAFFORD. At present, as the National Guard is organized under the Army reorganization act, an officer of the National Guard is only obliged to give one day in the week to the work, and yet you propose, in case he goes into the Regular service, to give him credit for the full seven days in the week in increased pay and also longevity pay?

Mr. JEFFERS of Alabama. Yes. But when that man is supposed to give only one day a week to the service in the National Guard he is as a matter of fact giving a great deal more of his time than that, and any man who has ever struggled to keep alive a real efficient National Guard organization knows that he has to give to it so much of his time and so much of his personal expenditure at times to keep the thing going, to properly keep up all its activities, that in a great many cases he can hardly have time to make a living for himself.

Mr. STAFFORD. Mr. Chairman, will the gentleman permit another question in that connection?

Mr. JEFFERS of Alabama. No; I regret that I can not yield.

The CHAIRMAN. The gentleman declines to yield.

Mr. BLAND of Indiana. Mr. Chairman, will the gentleman yield?

Mr. JEFFERS of Alabama. Yes.

Mr. BLAND of Indiana. I understand the gentleman proposes to count the commissioned service in the actual service, whether rendered in the National Guard or in the Regular Army?

Mr. JEFFERS of Alabama. Yes. I do not mean to be discourteous to the gentleman from Wisconsin [Mr. STAFFORD]. I know of my own personal knowledge that a great many officers of the National Guard do, to their own detriment, make a great deal of personal expenditure of money and an expenditure of their time; and when trouble comes, as was the case in the late war, they bring into the service, at very little expense to the Government, a great body of young men ready to take up arms and fight.

Now, when the United States became involved in the World War the guard furnished more than 12,000 officers and 367,000 men. Of the first five divisions sent overseas three were National Guard divisions. These organizations had been organized and kept alive and made ready for service largely by the efforts and personal expenditures of these officers for whom this amendment makes provision now and without much expense to the Government. The nucleus of these organizations had been kept alive under most trying conditions in local communities through the loyality and devotion of these officers. Of the eight divisions cited by the Commanding General American Expeditionary Forces in August, 1918, as demonstrating

their fitness for fighting divisions, four were National Guard divisions.

Now, I want to call attention to this point seriously: The bill, in section 3, makes provision for the officer now in the National Guard and provides that whenever he is on any kind of duty he shall receive just what this amendment provides for.

The CHAIRMAN. The time of the gentleman from Alabama has expired.

Mr. JEFFERS of Alabama. Mr. Chairman, I ask unanimous consent to proceed for five minutes more.

The CHAIRMAN. Is there objection to the request of the gentleman from Alabama?

There was no objection.

Mr. JEFFERS of Alabama. The bill makes provision for the officers now in the National Guard in this respect, and this amendment would, as I have stated, simply give credit to the ex-National Guard officers now in the Regular Establishment for their former commissioned service in the Guard.

These officers are, in my opinion, amongst the very best officers in the Army. They followed the game before the war on account of their loyalty and on account of their love of the game. They are not so far removed from civil life, and they know and understand the relationship which should exist between the Army and the civilian population better than any other class of officers we have. Having gotten into the game during the war, these men decided after the war to continue in the service and are now officers of the Regular Establishment.

During the war, by the way, they were allowed longevity for both enlisted and commissioned service in the National Guard. That shows what Congress then thought they were due. This amendment now gives them credit only for their commissioned service.

During their service with the National Guard as commissioned officers was when they made their greatest sacrifices, both in time and in money, for the upkeep of the guard, and so this amendment will allow them to figure their former commissioned service only.

When the trouble came they stepped into the Army with their companies and battalions and regiments of men behind them, and that was made possible by their long-continued loyalty and effort.

I have compiled a list of officers affected by States, and they come from practically every State in the Union. I want to state right here that the idea that 50 or 60 per cent of the officers in the Army would be affected by this amendment is preposterous. When you come to examine the register and directory and go through it man by man you will find, as I have found, about 496 officers. Only about 5 per cent would be affected, and some of them have only about one year or a few months or two years, or some such short time as that, for which they would be allowed credit.

The States are represented as follows:

Alabama	26	Montana	2
Arizona	4	Nebraska	6
Arkansas	6	New Hampshire	2
California	19	New Jersey	4
Colorado	7	New Mexico	5
Connecticut	6	New York	34
Delaware	5	North Carolina	10
District of Columbia	11	North Dakota	4
Florida	6	Ohio	18
Georgia	15	Oklahoma	6
Idaho	5	Oregon	8
Illinois	19	Pennsylvania	27
Indiana	11	South Carolina	5
Iowa	8	South Dakota	9
Kansas	13	Tennessee	35
Kentucky	12	Texas	23
Louisiana	1	Utah	1
Maine	6	Vermont	5
Maryland	18	Virginia	7
Massachusetts	22	Washington	9
Michigan	6	West Virginia	5
Minnesota	16	Wisconsin	3
Mississippi	3	Wyoming	2
Missouri	21		

These officers, a total of 496, are scattered through these various States. In figuring their longevity they would simply get credit for their commissioned service in the National Guard, in which service, as I said before, they do not simply give up one night or two nights a week, but they labor from one end of the year to the other, as I know, and as every ex-National Guard officer in this House knows, to keep a real, live, efficient National Guard organization ready to step into the breach at any time in case of trouble.

Mr. BURTNESS. Will the gentleman yield?

Mr. JEFFERS of Alabama. I yield to the gentleman from North Dakota.

Mr. BURTNESS. Are not these National Guard officers given credit for service in the National Guard when actually called out for duty?

Mr. JEFFERS of Alabama. The bill itself does that for the National Guard officers when the National Guard are called out, but I am talking of the ex-National Guard officers now in the regular service, and want credit given to them for their National Guard service.

Mr. BURTNESS. I understand that the gentleman wishes to cover officers in the regular service who were formerly National Guard officers; but my question is whether the present bill does or does not give them credit for such time as they may have put in when the National Guard was actually called out for national defense.

Mr. JEFFERS of Alabama. It does.

Mr. NEWTON of Minnesota. As I understand it, if an officer served 10 years in the National Guard, then he would be entitled to 10 years' service credit in connection both with base pay and longevity pay.

Mr. JEFFERS of Alabama. I will read the section. It is all in this sentence:

For officers now in the service all service which is now counted in computing longevity pay—

And I insert the words—

all commissioned service in the National Guard and Organized Militia, whether in State or Federal service, or both—

And then it goes on—

and service as a contract surgeon serving full time shall be included in the computation.

Mr. NEWTON of Minnesota. So it puts National Guard service on a direct parity with service in the Regular Army.

Mr. JEFFERS of Alabama. Remember, that service, when a boy, is at West Point, is counted as a part of a commissioned officer's service.

Mr. NEWTON of Minnesota. Not since 1912.

Mr. JEFFERS of Alabama. But the man who takes his own time and money and develops and builds up a National Guard company, and who was educated at his own expense, not at Government expense, is entitled to as much credit for his services as the other fellow is entitled to, because the officer of the National Guard has actually produced something without much expense to the Government. He is certainly entitled to credit for time spent in doing that.

Mr. STAFFORD. Is it not a fact that since 1912 service at the Military or Naval Academy has not been credited in computing longevity pay?

Mr. JEFFERS of Alabama. How is it in the proposed bill?

Mr. STAFFORD. And now by your amendment, even though the bill gives credit to a man for commissioned service in the National Guard when under Federal appointment, you now intend to extend it to any kind of service before there was any federalized service.

Mr. JEFFERS of Alabama. The service which a captain or lieutenant or other officer in the Organized Militia performed in keeping those organizations together and to bring them into the service ready to fight, a service which he performed at his own expense and out of his own time, is something for which credit should be given him.

The CHAIRMAN. The time of the gentleman from Alabama has again expired. The question is on the amendment of the gentleman from Alabama.

The question being taken, on a division there were—ayes 29, noes 49.

Mr. JEFFERS of Alabama. Mr. Chairman, I demand tellers.

Tellers were refused, not a sufficient number seconding the demand.

Mr. NEWTON of Minnesota. Mr. Chairman, I offer an amendment.

Mr. OLIVER. Will the gentleman yield to me just a moment?

Mr. NEWTON of Minnesota. Yes.

Mr. OLIVER. I should like to offer an amendment in line with the one which the gentleman from Alabama offered, so that the House may at least——

Mr. NEWTON of Minnesota. I do not yield to the gentleman to offer an amendment. I thought he wished simply to make a statement.

The CHAIRMAN. The gentleman from Minnesota offers an amendment, which the Clerk will report.

The Clerk read as follows:

Mr. NEWTON of Minnesota moves to amend in line 5, page 6, by striking out the period after the word "computation," in line 5, and inserting in lieu thereof a semicolon and the following language:

"*Provided*, That every officer whose first appointment in the Regular Army was in a grade above that of second lieutenant shall receive as

much pay as the junior officer of the same grade in the same pay period, originally appointed in the Regular Army in the grade of second lieutenant, whose commission ranks from the nearest date to that of the officer so originally appointed in a grade above that of second lieutenant."

Mr. NEWTON of Minnesota. Mr. Chairman, we have just had up for consideration an amendment in reference to the National Guard officer who has entered the Regular Army and who is now a Regular Army officer. The purpose of many of those who voted for that amendment was to deal justly by the man who in civil life had believed in preparedness to the extent that he was willing to devote his time and his money in preparing not only himself but the youth of the land for military service.

No one in this House wants to discriminate against a man who entered the Army from civil life as a National Guard officer or as an ordinary civilian who entered during the war, either from a military school or a training camp or otherwise. And yet this very bill we are now considering discriminates against the man who entered the Army from civil life whether as a graduate of a training camp, a military school, or from the National Guard. For example, we have this question of longevity pay. We had it under the 1908 pay law. An officer could get so much money as base pay, and every five years he would get longevity pay in addition, the limit of longevity being $1,000. So the emergency officer who, during the war, entered the service and because of ex-service remained, after the war finds himself doing the same work as the regular in the same rank but at less pay. We had a right to expect that this joint committee that has been working on the question of Army and Navy pay would at least try to equalize the pay and not to emphasize the difference already existing between the emergency officer, the National Guard officers, and the man who went into the Army early to make a military career his life's work.

Let me state some of the differences. Here is a colonel in the Regular Army. Under the 1908 schedule as colonel he would draw $4,000 base pay, and his longevity pay would be $1,000. The allowances for heat, light, and extras would be $1,334, making a total under the old 1908 base pay of longevity and allowances to a colonel $6,334. Now, under this present bill the old regular colonel would be entitled to $7,472, but there is a limitation placed in the bill so that no colonel under any circumstances can get more than $7,200. So you have the old colonel under the present bill now before us drawing $7,200. The increase is about $1,000.

Now, what about the emergency colonel; what is he getting? He is the man that was called in because of his special fitness. He is doing the same work. We authorized in the Army reorganization act of 1920 the putting in of men from civilian life into the Army, and only five colonels were appointed. That shows what discrimination there was on the part of the examining board in admitting men in that high office into the Army. There were something like 17 lieutenant colonels, a little over 100 majors. The examining boards were extremely careful, admitting only the best qualified men to the service.

Mark you, these men passed an examination and were admitted under these circumstances. We find, then, a colonel, for example, draws pay under the proposed bill as follows: Base pay, $4,000; longevity pay, $200; and allowances, $1,872; or a total of $6,072. So you have two colonels, one an old-timer in the service and another who came in during the war, both doing the same work, both having the same responsibilities, one educated at Government expense, the other educating himself, with a difference in pay in favor of the old officer of about $1,200.

Now, it seems to me, gentlemen of the House, that this is not fair. There was a discrimination under the 1908 base pay, and it caused criticism all over the country; it created ill feeling in the Army. Now, we are about to pass a bill which is supposed to establish a new base pay. It seems to me the first thing we ought to do is to remove the present discrimination. Certainly we ought not increase it.

Mr. KRAUS. Will the gentleman yield?

Mr. NEWTON of Minnesota. I will.

Mr. KRAUS. I fear that the gentleman from Minnesota is overlooking the theory on which this bill is framed—that it is in the main the length of service and not the character or quality of the service.

Mr. NEWTON of Minnesota. I am glad the gentleman calls attention to that, because I am not omitting that. I believe in the general principle of the bill in basing pay on length of service, but I say where the Army thinks sufficiently well of a man to induce him to leave civil life and enter the Army to do important work that it owes to that man the same compensation it gives to the regular who is performing the same service. We should recognize the fact that they have had the experience and that they are doing the same work as the old-timer, with the same responsibilities, and give them the same pay. [Applause.]

The CHAIRMAN. The time of the gentleman from Minnesota has expired.

Mr. NEWTON of Minnesota. Mr. Chairman, I ask for five minutes more.

The CHAIRMAN. The gentleman from Minnesota asks that his time be extended five minutes. Is there objection?

There was no objection.

Mr. LAYTON. Will the gentleman yield?

Mr. NEWTON of Minnesota. Certainly.

Mr. LAYTON. The gentleman's idea is that if a member of the Supreme Court of the United States should happen to die, the new appointee should have the same salary as his predecessor.

Mr. NEWTON of Minnesota. I do; and I think that is the law now. It seems to me that we must not as we make new legislation for the Army discriminate to the extent of $1,000 to $2,000 a year in the compensation given to the emergency officer and the National Guard officer who is entering the Army.

Mr. VAILE. Mr. Chairman, will the gentleman yield?

Mr. NEWTON of Minnesota. Yes.

Mr. VAILE. Under the proposed bill an officer in the lower grade, if the gentleman's amendment be not adopted, might actually receive higher compensation than an officer in the higher grade?

Mr. NEWTON of Minnesota. If I had the time, and I tried to get it under general debate, but there was no time left, I could show where a major under this bill would draw more pay than an emergency colonel will get, although the emergency colonel is doing in every way the work of a colonel, and was induced to enter the Army because of solicitation on the part of the officers of the Army and because of our passage of the reorganization act.

Mr. WILLIAMSON. Mr. Chairman, will the gentleman yield?

Mr. NEWTON of Minnesota. Yes.

Mr. WILLIAMSON. It seems to me that the gentleman's argument is against the principle of longevity altogether, and if we are not going to recognize the principle of longevity, what incentive is there for a man to remain in the Army anyway? The gentleman's argument seems to be against that proposition.

Mr. NEWTON of Minnesota. Oh, my friend is misinterpreting what I am saying. I believe in the general principle of longevity, but the principle of longevity is one thing when we have an Army where no one is permitted to enter except as a second lieutenant. That is the way it used to be. It is another thing where men enter from the ranks, the National Guard, or from civil life after having previously demonstrated their fitness. These generally do not start in as second lieutenants. Their experience has been such that they are wanted in a higher capacity. Such a man ought not to be penalized because he has the qualifications for entering the Army as a captain or a major or a colonel. Upon entering the Army he should receive the same general compensation as for his rank as the man who had made the Army his profession, because the man who comes in from civil life must work with the others and he must bear similar responsibility.

Mr. MADDEN. Mr. Chairman, will the gentleman yield?

Mr. NEWTON of Minnesota. Yes.

Mr. MADDEN. I suppose the gentleman's idea is that the education received by the man who comes in from civil life is received at his own expense, and that it ought to be counted as much as the education received by the man who went to the Military Academy at the expense of the Government, where his longevity service begins from the time he enters the academy. Here you are handicapping the man who pays his own expense of education in favor of the man who is educated by the Government, and the qualifications of the man who is self-educated may perhaps be higher than those of the man who has been educated at the expense of the Government.

Mr. NEWTON of Minnesota. Exactly. The gentleman has it exactly. Here is an engineer, for example, who has gone through college at his own expense, who has taken a post-graduate course at some highly technical school at his own expense, and who goes into civil life and engages in great construction work. Along comes the war. He forgets his own business. He turns his whole service over to his country, and he is put into the Army as an engineer, as many of them were, and many of them did the greatest kind of work in this country and in France. The Army liked him; they want to keep this man in the service. They induce him to stay. We pass legislation permitting him to stay, and then along comes a

committee engaged in revising the pay of the Army, and that committee gives an old Regular $7,200 a year, and then takes this civilian engineer and gives him $6,000 a year. Is there any equity in that?

Mr. SUMNERS of Texas. Mr. Chairman, will the gentleman yield?

Mr. NEWTON of Minnesota. Yes.

Mr. SUMNERS of Texas. Does the gentleman also have in contemplation the fact that the man who comes in from civil life with that ability has been compelled to scrap all of the business that he has built up prior to the time he changes from civil to military life?

Mr. NEWTON of Minnesota. Yes.

The CHAIRMAN. The time of the gentleman from Minnesota has expired.

Mr. NEWTON of Minnesota. Mr. Chairman, I ask unanimous consent to proceed for three minutes more.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. NEWTON of Minnesota. Mr. Chairman, this is a situation that I have attempted to correct. Here is the general proviso with reference to this kind of pay:

Provided, That every officer whose first appointment in the Regular Army was in a grade above that of second lieutenant—

That takes in the exceptional man; that takes in the man from civil life whose qualifications are such that they do not let him start at the bottom. I seek to provide that every officer who starts in a grade above that of second lieutenant shall receive as much pay as the junior officer of the same grade in the same period. That does not mean his senior officer. He does not receive as much pay as the senior officer, but he receives as much as the junior officer of the same grade in the same pay period who was originally appointed in the Regular Army in the grade of second lieutenant. Suppose that two men entered the service as colonels. One of them starts in from civil life on the 1st day of May as a colonel without going through these lower grades, while the other is commissioned on the same day by promotion from the grade of lieutenant colonel to the grade of colonel. These two men, both holding the same rank, one from civil and the other from military life, they would then receive the same pay. That is all this amendment does, and it is something that this Congress in enacting this new legislation ought to do.

We ought not to discriminate against the accomplished and qualified emergency officer. I hope the amendment will prevail. I almost hope that my good friend from Illinois will do what he really ought to do, and that is to join with me in this amendment.

Mr. OLIVER. Will the gentleman yield?

Mr. NEWTON of Minnesota. I will yield.

Mr. OLIVER. What credit does the amendment seek to give to these officers?

Mr. NEWTON of Minnesota. It gives them the pay of the officers of the Regular Army possessing the same rank and whose commission bears practically the same date. For example, we will take the rank of a colonel, which I used. If a regular who gets a commission as colonel on the 1st day of May has 20 years to his credit, then the civilian would get pay based upon 20 years of credit.

Mr. McKENZIE. Mr. Chairman, I dislike very much to find myself not in agreement with my good friend from Minnesota, but on this proposition I think he is entirely wrong. I appreciate the force of personal friendship. I know what it means to have a good friend who wants you to do something for him. We all go as far as we can to do those things which give us a certain gratification in helping out some one whom we think has been misused. But, gentlemen of the House, it is a most important question he is raising, and I want you to bear with me a few moments until I undertake to make it clear to you. This complaint does not come nor has it come from the men who faced the German bullets on the front. This complaint has not come from the men who spent long weary years on the Mexican border. It has not come from any man who has started in perhaps as an enlisted man and finally gets a commission as a second lieutenant and through long years of service got up to the grade of colonel. That is not it. That complaint and this demand that asks this amendment comes from a department over which our old friend General Crowder presided so long. This demand comes not from soldiers, not from men of iron. It comes from men who for long years of their lives were, as my friend suggested, coining money as engineers or as lawyers in some courtroom where it was possible to make more out of a week's work than an officer of the Army could make out of a year's work.

Mr. NEWTON of Minnesota. Will the gentleman yield?

Mr. McKENZIE. Yes.

Mr. NEWTON of Minnesota. Does not the gentleman appreciate this fact, that there are men in the office of the Judge Advocate General and Engineer Corps who saw service as combatants over in France during the late war?

Mr. McKENZIE. Absolutely.

Mr. VAILE. Most of them did.

Mr. McKENZIE. I say now these men, most of them, were in the noncombatant corps.

Mr. LAYTON. Will the gentleman yield for a question?

Mr. McKENZIE. Yes.

Mr. LAYTON. Does not the gentleman believe that there is something in this amendment that has been made by the gentleman from Minnesota that means a good deal in the future to the public service of the country. Does not the gentleman think that it is a good proposition in order to secure in the hour of emergency the very best talent to know that when you secure them they will not be discriminated against but will be given an equal right and equal grade?
